The 11th Polish competition for the most interesting physical education lessons was won by Klaudia Urbanek and Paulina Mendowska from the Academy of Physical Education in Poznań. Poznań students in the competition for the best physical education lesson implementing the core curriculum with the use of attractive forms of physical activity proposed classes from the world of the popular cartoon "Gummibears" - «Looking for ingredients for the gummy juice we improve basic movement forms based on the gummy story». The next podium places were taken by: Mikołaj Morawski from the Poznań Academy of Physical Education for the lesson «We shape motor skills while traveling through distant galaxies» and Radosław Bartycha and Klaudia Łasicka from the State Higher Vocational School in Konin for the lesson «We improve general fitness - a functional circuit».

International Conference and Assembly of Students' Scientific Clubs in Wrocław

2018-05-28

Members of the student scientific circles came to Wrocław for the 23rd International Conference and the 35th Meeting of Student Scientific Clubs. In total, 550 students met at the University of Environmental and Life Sciences in Wrocław. They discussed various topics: evolution of spiders, impact of online media on girlfriend selection in Poland from an anthropological perspective, sensory evaluation of chocolate with larvae of flour miller, vitamin C content in potato subjected to technological processes and obtaining jellies from vegetable concentrates. Participants of the conference and the regional council discussed also the modeling of urban transport space in the context of its impact on noise and pollution emissions as well as the dynamics of water intake by the leek roots and the issue of horse nutrition in Poland. Young scientists were also interested in the liver cancer in ferret, fungi in car air conditioning and ecological safety in road transport. Logopedical conference at the University of Warmia and Mazury

2018-05-29

The Institute of Polish Studies and Logopedics of the University of Warmia and Mazury in Olsztyn and the Warmian-Masurian branch of the Polish Speech Therapy Society invite participants on 8-9 June 2018 to the conference „Diagnosis, therapy and support of people with speech disorders”. The organizers want to focus on the issues of diagnosis, therapy and support for people with speech disorders. In addition to the problems of diagnosis and speech therapy, particular attention will be paid to the forms of supporting speech therapy, such as: theater, art, music, computer and information technologies as well as institutional care and legal assistance in the case of various language and communication disorders.

University of Lodz Researchers receive the award of the European Commission „Best of the Best“

2018-05-29

Researchers from the Faculty of Biology and Environmental Protection of the University of Lodz received the highest distinction of the European Commission, the „Best of the Best“ prize, for the project of cleaning the water tanks in the Arturówek in Lodz. The project and activities of the team from the Lodz University were considered the best solution in Europe in the „environment“ category - informs the Promotion Center of the University of Lodz. The coordinator of the project was Professor Maciej Zalewski, and the teamwork was led by Dr Tomasz Jurczak. The project «Ecohydrological remediation of recreational reservoirs» Arturówek «(Łódź) as a model approach to the remediation of urban reservoirs» was implemented in 2010-2016. Thanks to the work of the Lodz scientists, the water quality in the upper Bzura river basin, which includes Arturówka reservoirs significantly improved in a short time.

Lower Silesian Capital Club awards „Young Talents“

2018-05-29

Students and PhD students of the University of Life Sciences in Wrocław won in the 3rd „Young Talents“ competition organized by the Lower Silesian Capital Club. The aim of the competition is to promote and reward the students achieving significant scientific, artistic, social and sports success in innovative and entrepreneurial activity. Kinga Piłarska, a biotechnology student, won in the category «Success in social activities». In the same category, the second winner was Safoura Reza, a veterinary student. PhD student Żaneta Król received the distinction in the category «Success in innovation» and in the category «Success in science» - PhD students Katarzyna Kornicka and Sabina Lachowicz were awarded. The «Young Talents» competition was organized for the third time. Its jury includes the rectors of Wrocław's universities, representatives of the Lower Silesian Capital Club, entrepreneurs, local and regional au-

thorities. More: http://www.glos.upwr.edu.pl/aktualnosci/47912/mlode_talenty_2018_sukces_upwr.html

Lublin Students best in the Nationwide Medical Simulation Competition

2018-05-29

Students of the Medical University of Lublin won the Nationwide Medical Simulation Competition, which took place at the Medical Simulation Center of the Medical University of Gdańsk. The home team took the fourth place. Teams from the 10 medical schools had to solve tasks consisting of clinical situations: pre-hospital intervention in acute heart attack, processing with myocardial infarction and cardiac arrest and respiratory cardiopulmonary resuscitation, management of pulmonary edema and asthma, acceptance of labor and surgical treatment of wounds. Teams were evaluated by referees having experience in international competitions. The first place was taken by the team from the Medical University of Lublin, the second by Jagiellonian University - Collegium Medicum in Krakow, and the third by Medical University in Poznań. A total of eighty-nine participants took part in the competition.

World Congress of Graduates at the Catholic University of Lublin

2018-05-30

On 8-9 June 2018, the World Congress of Graduates will take place at the Catholic University of Lublin. The event starts on June 8 with a holy mass celebrated by Archbishop Stanisław Budzik, Metropolitan of Lublin. The guests can listen to the lecture «100 years of the Catholic university in Lublin. Intentions and challenges» by Prof. Stefan Sawicki. They can participate in the discussion panel „Students of Freedom“ and in alumni meetings at faculties and institutes. The artistic part will be featured by Marcin Kydryński and a well-known Polish vocalist Anna Maria Jopek.

State Higher School in Biała Podlaska to participate in the international project of monitoring physical activity and sport

2018-05-30

The Pope John Paul II State Higher School in Biała Podlaska is the only Polish university participating in a two-year international project of monitoring physical activity and sport in the European Union member states. The program is managed by the Portuguese Institute of Sport and Youth. The EUPASMOS program already covers several European countries, including Poland, and is co-financed by the European Union (Erasmus + Sport Central Project). Its aim is to implement a system of monitoring physical activity and sport through the development of an «integrated and common methodological process that will provide comparable, confirmed and reliable data on physical activity and data on participation in sport in the European Union Member States». More: www.eupasmos.com

National Agency for Academic Exchange hosts Delegation from Beijing

2018-05-30

The Beijing Municipal Bureau of Human Resources and Social Security delegation visited the National Academic Exchange Agency. The talks concerned cooperation between universities and scientific organizations as well as the possibilities related to the exchange of scientists. Beijing Municipal Bureau of Human Resources and Social Security is a Beijing government institution responsible for increasing the mobility of researchers. The Chinese guests were presented with the mission and priorities of the National Academic Exchange Agency, as well as the programs run by the Agency. The Chinese side is interested in the exchange of research workers with Poland and support for inter-university cooperation. It was emphasized that this could take place, among others, within the framework of the Academic International Partnerships program implemented by the Agency.

Professor Krystian Jażdżewski to become „Gazeta Wyborcza” Man of the Year

2018-05-30

The readers of „Gazeta Wyborcza” distinguished Prof. Krystian Jażdżewski from the Center of New Technologies of the University of Warsaw with the title of the Man of the Year in the „Science” category for his studies of hereditary neoplasms. In 2017, the team of Prof. Krystian Jażdżewski and Dr Anna Wójcicka started the implementation of the screening program. After registering on the website www.BadamyGeny.pl and entering medical data, participants just donate blood and wait for the results. The cost of the test is several times lower than anywhere in the world and amounts to PLN 599 (about USD 160). Thus, researchers are able to assess the risk of hereditary cancer, as well as to indicate how to avoid the disease. Detailed information can be found on the program's website: www.BadamyGeny.pl.

Awards for the University of Torun Publishing House at the ACADEMIA fair

2018-05-30

The Scientific Publisher of the Nicolaus Copernicus University in Toruń received the prize and two distinctions in the ACADEMIA 2018 competition, which was a part of the 12th Academia and Academic Book Fair and the Warsaw Book Fair. The Toruń Publishing House won the Rector's Award of the University of Warsaw for the best academic publication in the field of social sciences and humanities for the book of Prof. Przemysław Urbańczyk «Bolesław Chrobry - roaring lion» (series Monographs of the Foundation for Polish Science) and special distinction in the competition ACADEMIA 2018 for the best academic and scientific publication for the editorial work: Zygmunt Krasiński, «Collected Works. New edition» edited by Prof. Mirosław Strzyżewski. The distinction in the ACADEMIA 2018 competition for the best academic and scientific publication was awarded for the book of Prof. Anna Drązkowska, «History of lingerie from the fourteenth to the end of the nineteenth century».

Modern catamaran in the service of the University of Gdańsk

2018-05-30

The Faculty of Oceanography at the University of Gdańsk has started the operation of the modern „Oceanograf” scientific-research catamaran. The ship has wet, measuring, sterile, thermostatic laboratories as well as a seminar and computer room. - The first impressions of the nautical capabilities of the unit are very good. Representatives of the crew inform that the unit is very stable and the advantages of a huge working deck, which offers a double-hull design, can not be overestimated - says Dr Mariusz Sapota, director of the Institute of Oceanography. The „Oceanograf”, is a catamaran with a total length of 49.5 m and a width of 14 m. The lateral height is 3.80 m, the height of the upper deck is 6.55 m. The draught of the ship is only 2 meters. The catamaran is to conduct biological, chemical, physical and geological studies of the environment and nature of the Baltic Sea and to provide students with didactic classes.

Professor Alina Wieliczko to become honorary doctor of University of Veterinary Medicine and Biotechnology in Lvov

2018-05-30

Professor Alina Wieliczko from the Wrocław University of Life Sciences became the honorary doctor of the University of Veterinary Medicine and Biotechnology in Lvov. She is the first woman in the history of this university, granted with this dignity. Professor Wieliczko works in the Department of Epizootiology with the clinic of birds and exotic animals at the Faculty of Veterinary Medicine at the University of Life Sciences in Wrocław. She is an outstanding specialist in veterinary science, the creator of rich scientific and popularizing achievements in the field of bird pathology. In an interview for «Głos Uczelni», the professor compares the award of the honorary doctor to the professorial nomination - This is something more. Of course, this dignity can be obtained

without being a professor, because it is obtained for special achievements, but it is a great honor, distinction and appreciation in many areas, not only scientific ones - emphasizes Prof. Wieliczko. More: http://www.glos.upwr.edu.pl/aktualnosci/47907/prof_alina_wieliczko_doktorem_honoris_causa_lwowskiej_uczelni.html

Silesian University of Technology student becomes champion in Polish programming

2018-05-30

Marcin Podsiadły - a student of the Automation, Electronics and Computer Science Faculty at the Silesian University of Technology won the Polish Programmers Championships at the Wrocław University of Technology. Over 90 students and students from all over the country participated in the final of the competition. Students joined the championships in one of two age categories: master - intended for secondary school students and expert - for regular students. Marcin Podsiadły is a student of automation and robotics and he took the first place in the expert category. He won a paid internship in the automation and IT industry Procom System and 5 annual licenses for additional software for the university. The Polish PLC Programmers' Championship is an event bringing together students and students from all over Poland as well as potential employers from the industrial automation sector. The organizer of the competition is the Wrocław University of Technology and the „Automatyk” Students' Scientific Association.

Scientific conference „1968 - Poland, Europe, World” at the University of Warsaw

2018-06-01

The 50th anniversary of 1968 events reminds that history did not concern Poland only, but also other parts of the world. „Rebellion of the young”, counter-culture, new values, more democracy and forms of participation are the determinants of our June discussion - conclude the authorities of the Faculty of Political Science and International Relations of the University of Warsaw in a letter inviting participants to the conference „1968 - Poland. Europe. World „, which will be held on June 27-28, 2018. During the conference there are planned 6 discussion panels: “Generation of March ‚68 - generation of new explanations”, “The new times are coming - how the social has become the political”, “I can see thunders and lightnings - the end of obviousness in social policy”, “We all want to change the world - the rebellion and counter-culture of the generation of revolt”, “The world is strange and there is still a lot of evil - the Cold War of the 1960s”, and “There must be some way out of it - 1968 after the Iron Curtain”. As Prof. Stanisław Sulowski, dean of the Faculty of Political Science and International Relations emphasized, the organizers hope that the participation in the conference will inspire reflections on 1968 events and on the contemporary world.

Agreement on cooperation between the Krakow University of Technology and the Railway Transport Office

2018-06-01

The Krakow University of Technology and the Railway Transport Office have signed a cooperation agreement regarding the implementation of joint activities in the areas of research, education and human resources. According to the agreement, the Rail Transport Office will give opinions on educational programs in the fields of specialization related to rail transport, offer students the diploma issues and organize internships for students. In turn, the Krakow University of Technology declared the launch and

conduct of post-graduate studies, courses and trainings related to rail transport. The university will also implement the results of joint projects and possible patents. It will also carry out research and provides the access to measuring equipment for the Office.

Researchers of Warsaw University of Life Sciences develop standards for shaping green areas in Warsaw

2018-06-01

The City of Warsaw Capital Council adopted the „Standards for shaping Warsaw green areas”. The document was prepared by scientists from the Warsaw University of Life Sciences in cooperation with the Polish Dendrological Society. This is a key expert study that is expected to improve the quality of green spaces in the Polish capital - informs the Warsaw University of Life Sciences. It was prepared by the employees of the Department of Landscape Architecture and the Department of Environmental Protection. It is to support the work of municipal administration authorities in shaping the green areas in Warsaw and contribute to the unification of procedures in the whole city regarding the laying and maintenance of green areas.

Deputy Prime Minister Jarosław Gowin meets Israeli Prime Minister Benjamin Netanyahu

2018-06-01

During the international conference „Thinking out of the box” devoted to innovation in Israel, the Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin talked to Israeli Prime Minister Benjamin Netanyahu. The talks concerned technological development and research cooperation between the two countries. - The Israeli economy is based on modern technologies, and at the moment it is promoting the concept of Israel as a state of start-ups. In this respect, we can learn a lot from our Israeli friends - said Jarosław Gowin in Jerusalem. He added that the conversation concerned only economic and scientific cooperation, because these two spheres in Israel are inseparable.

Scientists from Bydgoszcz win EUROINVENT Fair of Creativity and Invention Awards

2018-06-01

The invention of scientists from the University of Technology and Life Sciences in Bydgoszcz „The roller mill with an inter roller plate” won two medals during the 10th European Fair of Creativity and Invention of EUROINVENT in Romania. The invention developed by Prof Józef Flizikowski, Dr Eng Andrzej Tomporowski, Dr Eng Adam Mroziński and Eng Weronika Kruszelnicka won the EUROINVENT 2018 gold medal and the Indonesian Invention and the Innovation Promotion Association medal. The EUROINVENT fair in the Romanian Iasi was devoted to promoting creativity in the Europe by presenting the activities and achievements of technical schools, higher education institutions, research units, individual inventors and companies. Poland took part in the fair for the sixth time, presenting 6 inventions. The jury awarded Polish exhibitors a total of 6 medals - four gold and two silver medals.

Gdańsk University of Technology to cooperate with universities from China

2018-06-01

Gdańsk University of Technology has signed a five-year cooperation agreement with Xidian University. During their stay in China, the rector and vice-rector of the Gdańsk university started talks with four other universities and took part in the conference University Alliance of the Silk Road in Xi'an. Professor Jacek Namieśnik, rector of the Gdańsk University of Technology and Prof. Janusz T. Cieśliński, vice-rector for organization met the authorities of the Harbin Institute of Technology, of Shaanxi Normal University, of Chang'an University and of the University of Shanghai for Science and Technology. The talks ended with declarations of willingness to start cooperation. The rectors of the Gdańsk University also participated in the international conference University Alliance of the Silk Road - associating 135 universities from 36 countries of the non-governmental institution, which aims to internationalize higher education, and stimulate the economic development of the countries associated with the Silk Road Economic Belt.

VI Science and Culture Picnic in Katowice

2018-06-01

The Science and Technology Park Euro-Centrum invites participants on Friday 8th June to Katowice for the Picnic of Science and Culture. It is an event full of attractions raising awareness about ecology, energy efficiency and promoting social responsibility and intergenerational cooperation. It will be a scientific and entertaining program. The motto of the Picnic and Forum of the New Economy Forum is „Silesian Region on the way to the COP24 Climate Summit.” The event aims to help the youngest in understanding complex scientific theories, natural phenomena and it will stimulate their creativity and ecological and social awareness. As part of the event, there will also be a concert supporting the action „Silesian Region for children from Aleppo”. During it, the Franciscan Fathers will achieve money to create a specialized day-care center for children - victims of the war.

Małopolska Festival of Innovation in Krakow

2018-06-04

The Museum of Japanese Art and Technology „Manggha” is holding the Małopolska Festival of Innovation. The main topic is social innovation and solutions that improve the quality of life of entire social groups. The festival is held in Krakow from June 4, 2018. The event will begin with the conference «The Social Dimension of Innovation», which concerns issues of innovative technologies and their social dimension. During the festival there will be presented inventions of students and scientists from the Małopolska Region. Visitors will be able to see an intelligent Find Air inhaler that allows users to predict dyspnoea, a nanocapsule that supplies the body with selected substances such as drugs or food supplements and a geopolymer- unusual material produced from volcanic tuff, which is cheap, extremely durable, and absorbs moisture and odors.

Popular science conference on protective vaccinations

2018-06-04

On June 7, 2018, the College of Artes Liberales of the University of Warsaw, is holding a popular science conference titled „220 years of preventive vaccinations- on the anniversary of Edward Jenner's publication on the vaccination of smallpox”. Speakers include experts from the Polish Academy of Sciences. Professor Andrzej Karpiński from the Institute of History will deliver a lecture entitled „Fear - epidemics in early modern Europe” and Prof. Anna Nasiłowska-Rek from the Institute of Literary Research will bring closer the issues from the point of view of literature in the lecture „From the plague of Defoe to the plague of Camus: epidemics and literature”. Also, scientists from the Medical Center of Postgraduate Education will present the medical arguments for the necessity of vaccinations. Professor Teresa Jackowska will give a lecture on „Protective vaccinations - facts and myths”, and Dr Janusz Ostrowski will hold lecture: „Hilary Koprowski and polio vaccination”.

Delegation of the Chinese province of Henan at the University of Lodz

2018-06-04

The authorities of the University of Lodz invited the Chinese delegation composed of representatives of the administration of Henan Province and Chinese universities. The guests visited the Faculty of Economics and Sociology launching every year academic teachers to the Chinese partner university with lectures. The Chinese delegation was led by Rong Xihai, director of the Education Department of the Henan Province and Shi Maosheng, the dean of international education at the University of Zhengzhou. The purpose of the visit was to deepen the cooperation of the University of Lodz with the Zhengzhou University in the 2 + 2 program in economics (the first two years of study in Poland, two more years in China), which was the first program of this type accredited by the Ministry of Education in China between the Polish and Chinese universities.

22nd Science Picnic at the National Stadium in Warsaw

2018-06-04

The largest outdoor scientific event in Europe will take place on June 9, 2018 at the National Stadium in Warsaw. Polish Radio and the Copernicus Science Center are the organizers of the 22nd Science Picnic. This year's motto is «Movement». As part of the event, the organizers prepared a few picnic programs: “World in motion: atom, planet, space”, “People in motion: society and transport”, “Machine in motion: manipulators, robots, vehicles”, “The body in motion”. In addition, the Copernicus Tent will be established, in which visitors will be able to «explore the possibilities of human body and mind, look at the world from a cosmic perspective and feel the positive vibes». Animators from the Copernicus Science Center will help to create and launch the rocket into space, and teach the secrets of engine construction. They also tell the participants how to construct the telescope. More: <http://www.kopernik.org.pl/projekty-specjalne/piknik-naukowy/>

Architects from the Gdansk University of Technology wins the arturbain.fr contest

2018-06-04

The employees and students of the architecture faculty at Gdańsk University of Technology took the first three places in the international arturbain.fr competition. This year's motto of the contest was „Pour un réseau d'espaces publics accessibles à tous” - „Network of public spaces available to everyone”. The laureates are didactic employees: architect Dr Katarzyna Zielonko-Jung, architect Dr Izabela Burda, architect of the Chamber of Architects of the Republic of Poland Janusz Gujski and students of the architecture department - Patrycja Marcińska, Anastasiia Volyk, Aneta Szrot, Alicja Sikorska, Arnaud Gaultier and Pauline Ribault. The international arturbain.fr contest has been organized for 27 years by Séminaire Robert Auzelle, a public benefit organization of the Ministère du Logement et de l'Habitat durable in Paris. The public presentation of the awarded works and the awards ceremony will take place on June 8 in Paris.

IV Silesian Medical and Legal Conference in Katowice

2018-06-04

The Silesian Medical University and the University of Silesia in Katowice together with the Silesian Medical Chamber, the District Legal Council in Katowice and the self-government of PhD students of the Silesian Medical University organize the IV Silesian Medical and Legal Conference. This year's conference is addressed primarily to lawyers, PhD students and medical and law students and it was divided into two parts. The first part will explain the role of experts and their importance in criminal and civil procedures. Speakers will discuss the adopted rules for the appointment of experts, both in teams of institutional and «ad hoc» experts. The conference is intended to confront the positions of the practitioners and theoreticians of law and medicine, as well as to define the needs and expectations of the judicial authorities. The second part of the conference will present the issues related to the medical errors. More information on the website: <http://lekarzprawniczy.sum.edu.pl/>

Paleozoologists from the University of Wroclaw to hold a picnic „Life and death of Gorzow Stefania”

2018-06-04

Researchers from the Paleozoology Department of the University of Wroclaw invite visitors to a science picnic as part of the Gorzów Wielkopolski Days from 8 to 10 June. They will talk about the rhino skeleton of *stephanorhinus kirchbergensis*, known as Stefania, discovered during the construction of the Gorzów beltway. The remains are over 120,000 years and they are one of the best preserved animal skeletons from that time in Poland. The discovery initiated the cooperation of the Lubuskie Voivodship, the City of Gorzów and the University of Wroclaw. On Friday, June 8, a letter of intent will be signed about joint activities promoting paleontology. „Stefania” inspired Wroclaw scientists to launch an idea for the Cenozoic Park. On Saturday, a scientific session will take place, on Sunday there is planned „Paleontology for fun” including educational films, presentation of bones, rocks and minerals and the performance of rhino and ammonite figurines on the plaster. Picnic program on the website of UM Gorzów: <http://mckgorzow.pl/dni-gorzowa-2018-energia-mias-ta-program/>

National Academic Exchange Agency in the USA

2018-06-05

On 27 May - 2 June 2018, the delegation of the National Academic Exchange Agency headed by Director Łukasz Wojdyga participated in NAFSA fairs and conferences held in Philadelphia. NAFSA is the world's largest non-governmental organization dealing with international education. The Directors of the National Academic Exchange Agency met the President of the Institute of International Education, Alan Goodman, and participated in the panel on internationalization and the Agency's offer at Villanova University. The event was attended by Polish scientists, representatives of Polish associations, as well as scientists from Villanova University and other institutions from Pennsylvania. In Chicago, the del-

egation of the National Academic Exchange Agency met the representatives of universities from the states of Illinois, Wisconsin and Indiana, and with Polish media in USA.

Silesian University of Technology to talk start-ups

2018-06-05

The Center for Innovation and Technology Transfer of the Silesian University of Technology in Gliwice along with the Mechanics, Technology and Transport faculties and Academic Incubator organize on Wednesday 6 June 2018 the meeting „Local SmartLab - START-UP with success. From incubation to acceleration. „ The meeting will be devoted to solutions in the field of machine building, material engineering and transport. It will combine lectures, discussion of experts and practical workshops. During the panel, experts will talk about how to effectively promote business through social media, how the local government can support business development through various initiatives and where to get the money to finance the idea and where to seek support. More: <https://www.facebook.com/events/191896891444324/>

Prof. Köhler to hold lecture on telemedicine at the Medical University in Wroclaw

2018-06-05

Medical University of Wroclaw and Fund Scientiae Wratislavenses invite participants to the lecture of Prof. Friedrich Köhler, head of the Cardiovascular Telemedicine Center, Charité University of Medical Sciences in Berlin. The event will take place on June 8, 2018 as part of the international Cardiology Innovations Day conference - informs the Wroclaw University. The lecture entitled „The concept and implementation of the program for telemanagement of patients with heart failure” will be presented in English with simultaneous translation. Professor Friedrich Köhler is the author of many publications in prestigious scientific journals and a laureate of prizes in the field of propagation and implementation of telemedicine solutions. He is also a member of the European Cardiac Society.

„Conscious Consumer” - conference at the Medical University of Gdańsk

2018-06-05

The Medical University of Gdańsk together with the Pomeranian State Sanitary Inspectorate organizes on June 7, 2018 the conference „Conscious Consumer - dietary supplements, food, cosmetics, environment. Warnings, labels, information. „ During the event, the lecture „About dietary supplements” will be held by Regina Szymańska, head of the Department of Food Hygiene, Nutrition and Objects of the Regional Sanitary and Epidemiological Station in Gdańsk, Dr Małgorzata Grembecka from the Department of Bromatology at the Gdansk university will hold a lecture „Dietary supplements - when and for whom?” and Paulina Metelska from the Gdansk University Clinical Center will deliver a lecture „How to understand food information, etiquette and composition”.

University of Rzeszów meets representatives of Guangdong Polytechnic Normal University

2018-06-05

The authorities of the University of Rzeszów met the representatives of the Guangdong Technical Normal University (GPNU). The purpose of the meeting was to establish detailed rules for the organization of the learning process in the direction of „Chinese Culture and Social Development” - informs Dr. Maciej Ulita, spokesman for the Rzeszów University. The first two years of classes will be carried out in English, two more in Chinese. The completed studies will be payable respectively - 1,500 euro / semester for two years in Poland at the University of Rzeszów, and then 13,000 yuan / semester for two consecutive years in China. Dr Maciej Ulita argues, this is a future study related to the global economy, industry and also cultural exchange. If anyone dreams about knowing the specifics of Chinese culture and business then they should apply for it. During the meeting, detailed rules for the exchange of scientific and administrative employees necessary for the implementation of the assumed study program were also established.

Polish-French Forum of Science and Innovation at the University of Warsaw

2018-06-05

On 12 June 2018, the „Polish-French Forum of Science and Innovation” will be held at the Library of the University of Warsaw. The aim of the project is to promote Polish-French cooperation in the field of research and innovation, celebrating 60 years of the existence of the French Culture Center and the Francophone Studies of the University of Warsaw and emphasizing the opportunities offered by European research programs. The event will start with the speeches of Dr Maciej Duszczek, vice-rector for scientific affairs of the University of Warsaw, Piotr Dardziński, undersecretary of state in the Ministry of Science and Higher Education, and Pierre LEVY, the ambassador of France in Poland. The participants will also discuss the internationalization of higher education and research, the perspectives of Polish-French cooperation in the field of science in 2013-2018 and the bilateral program of PHC Polonium. Forum registration until June 6, 2018 at: https://docs.google.com/forms/d/e/1FAIpQLSehAkIdQmZOI_T2TZbngSfKaDMIs5Mv8sTp-gi1g-V7Tf42cRQ/viewform

Polish students dominated the Martian robot competition University Rover Challenge 2018

2018-06-06

The Martian rover from the Czestochowa University of Technology won the University Rover Challenge 2018 competition. The Kielce University of Technology team was third, the fourth place was taken by the Technical University of Lodz. The best in the world Martian rover designed and led to victory Students of the scientific circle of computer design of mechatronic devices and machines of the Czestochowa University of Technology, who form the PCz Rover Team constructed the best Martian rover in the world. In the final of this year's competition of Martian robots held in the desert in the US state of Utah there were 36 teams from 10 countries, in-

cluding 6 from Poland. The winning rover received the title World's Top Martian Rover - the best rover in the world. The prize in the competition includes the possibility of presenting the robot at the international meeting of the International Mars Society Convention.

XIV Forum of the New Economy in Katowice

2018-06-06

Representatives of science, business, administration and social organizations will talk about a fair energy transformation for the Silesian Voivodeship. The 14th Forum of the New Economy will take place on Friday, June 8th in the Science and Technology Park Euro-Centrum in Katowice. The discussion is entitled „Silesian Region on the way to the COP 24 Climate Summit”. In addition to workshops and panel discussions, international meetings of entrepreneurs are planned. During the plenary session, invited guests and representatives of the energy, sociology and environmental sectors will talk about preparations for the December climate summit in Katowice. The meeting will be an opportunity to exchange views on the best practices regarding the promotion of entrepreneurship and instruments supporting the development of energy sector enterprises. More: <https://www.forumng.pl/>

Civil Engineering students of the Silesian University of Technology distinguished in the Builder magazine competition

2018-06-06

Students of the Faculty of Civil Engineering at the Silesian University of Technology - Karolina Balcer and Magdalena Skrocka have received a distinction in the first nationwide Competition for Young Engineers of the Builder magazine. Participants of the competition had to perform one of the four tasks proposed by the organizers. Two tasks were projects and two were project implementation. Students of the Silesian University of Technology chose the implementation task. The topic of their work was „Technical and economic comparative analysis of the execution of a reinforced concrete ceiling“. The competition for Young Engineers is implemented as part of the „Builder For The Young Engineers“ project that supports students and young civil engineers in their professional development. The competition reveals the authors of the best works - characterized by ingenuity, openness, high quality of projects, correctness of applied material and technological solutions.

To develop scientific and business projects, contact BraveCamp

2018-06-06

Only until June 8, 2018, students, PhD students, employees and graduates of the University of Warsaw and the Medical University of Warsaw can apply for the BraveCamp weekly summer school. The Camp allows participants to develop their ideas for scientific and business projects. From 8 to 14 July at the Zegrze Lake, participants of the BraveCamp will refine and shape their ideas under the supervision of specialists dealing with project management, self-presentation, marketing and sales. At the end of the camp, students, PhD students, employees and graduates of two Warsaw universities will present their solutions, and the jury will choose only one project. The winner will receive a grant of PLN 10 thousand. More: <https://www.iuwnet.org/>

Nobel laureate to hold lecture at the Copernicus Science Center

2018-06-06

Polish Academy of Sciences with the participation of the Academy of Young Scientists and the Copernicus Science Center invites the participants to the lecture of Prof. Tim Hunt, Nobel laureate in medicine and physiology in 2001, which will be held on June 14 at 18.00 at the Copernicus Science Center in Warsaw. Prof. Hunt will talk about his research on cell cycle regulation and share his thoughts about a successful research career. During the panel discussion after the lecture, he will conduct a conversation about the characteristics of a good scientist, their role in the modern world, as well as the scientific balance between openness and competitiveness, professional duties and personal life.

International conference on the cities impact on competitiveness in the modern economy

2018-06-06

The World Economy Institute of the Warsaw School of Economics is organizing an international scientific conference on innovation and competitiveness. This year, on June 15, participants of the event will try to answer the question how cities can contribute to a competitive advantage in the modern global economy. The conference will analyze the theoretical and practical aspects of international competitiveness and urbanization, including the concepts of metropolitan innovation systems, smart cities, internationalization and cultural diversity. The results of research on the competitive position of selected economies, successful urbanization patterns and the development trends of the largest cities in Poland and in the world will be discussed.

„Borderland Mathematics“ in Bialystok

2018-06-06

University of Technology and the University of Bialystok organize on 15-17 June 2018 an interdisciplinary conference „Borderland Mathematics“. Its

aim is to popularize the use and presence of mathematics in various areas of our lives: architecture, art, nature, space and even music. The task of the conference is to connect scientists on both sides of Poland's eastern borders and, at the same time, seek a bridge between mathematics and other fields of science. The organizers invite mathematicians from Poland and neighboring countries Lithuania, Ukraine, Belarus and Russia. More: <http://mp.wi.pb.edu.pl/index.php/en/>

University of Silesia to receive the „Amicus Librorum“ statuette

2018-06-07

The University of Silesia in Katowice awarded the „Amicus Librorum“ statuette from the Silesian Library. The statuette is honoring outstanding figures and institutions that have contributed to the enrichment and strengthening of culture, the region and the city. The award was granted in the 50th anniversary of the Silesian university. It is an appreciation of the university and its contribution to the development of the region. Many scientific and popular science works that have been created at the University of Silesia are the result of research carried out thanks to the rich, often unique collections of the Silesian Library in the world. The university and Library in 2006 established the Silesian Digital Library. The project promotes culture and science, provides access to the cultural heritage collected in Silesia and to exceptionally valuable scientific publications, educational and teaching materials.

Collegium Civitas to hold a seminar “Perspectives of political development in Palestine”

2018-06-07

The Embassy of Palestine in Poland and the Office of Cultural Safety of Collegium Civitas organize on June 21, 2018 a seminar called „Perspectives of political development in Palestine”. The event will start at 18.00 in the Aula B Collegium Civitas (XII floor of the Palace of Culture and Science in Warsaw) and it will include an expert panel, a debate and a screening of a promotional film about Palestine. The inaugural speech is to be delivered by Mahmoud Khalifa, ambassador of the Palestinian State in Poland. It is worth noting that in the last ranking of Polish higher schools Perspektywy 2018, Collegium Civitas took the 1st place among non-public universities in sociology and international relations.

General Róžański delivers a lecture at the School of Economics in Radom

2018-06-07

On June 3, 2018, the general of the army, Dr Mirosław Róžański held a lecture „Challenges for the state and NATO armies and the global security system” at the School of Economics in Radom. In 2011, General Mirosław Róžański obtained a PhD degree in the field of defense sciences. In 2015-2017 he was the General Commander of the Armed Forces. During the lecture, for the first-year Master’s students in the field of Internal Security and Administration, he discussed the role of national armed forces in shaping state security, in the context of belonging to NATO structures and the need to modernize Polish armed forces. He drew attention to the provisions of the Washington Treaty, which impose on NATO member states the obligation to maintain their individual capabilities to resist assault.

Wrocław University of Technology students dominated the Student Constructions competition KOKOS 2018

2018-06-07

Students of the Wrocław University of Technology won in three of four categories of the Student Constructions Competition KOKOS 2018. The awards were presented during the ceremony in Krakow. The PWR Aerospace team was awarded for the „App4Hab” project. They sent a balloon with a mobile phone to the stratosphere as an on-board computer. The jury distinguished them in the Sky category as the construction moving in the air and space. Students from the PWR Racing Team won in the Cars category. Their RT08 racing car turned out to be unrivaled. Light Electric Motorcycle Lem Falcon won in the Joker category - constructions out of existing categories. Only the category of Ecology was won by the team of another university - the Krakow AGH University of Science and Technology for the solar-powered boat Solar Boat.

University of Life Sciences in Poznań wins Polish Intelligent Development Award

2018-06-07

The Center for Innovation and Technology Transfer of the University of Life Sciences in Poznań has been awarded the Polish Intelligent Development Prize 2018 in the category of Innovative Future Solutions for the University. The prize was awarded by the Polish Patent Office for the implementation of the EkoBioFood project - PULS PLANTINOVA PPNT. The Polish Intelligent Development Award is a nationwide prize awarded to the most innovative projects implemented under EU and national programs by scientific institutions and companies involved in research and development. It is given to entities which contribute to the sustainable development of the country and increase the standard of living of the local community. The prize-giving ceremony is planned at the Gala of the Polish Intelligent Development Award during the International Forum of

Intelligent Development 3.0 Uniejów 2018. More about the project: <http://www.ciitt.up.poznan.pl/Projekt-ININ,p82.html>

Students of the Silesian University of Technology are the laureates of the international Digilent Design Contest

2018-06-07

Students of the faculty of automation, electronics and computer science at the Silesian University of Technology took the third place in the 14th international Digilent Design Contest competition in Cluj-Napoca in Romania. Young engineers - Przemysław Mazur, Robert Nawrath and Marcin Beberok - have developed an industrial controller PLC compatible with the international standard including a central unit, APB bus, function block modules, I / O modules and a serial bus interface. An integral part of the designed system is a programmer with an operator panel. As part of the presentation, students wrote a demonstration program, thus proving the high performance of their controller. The jury of this competition appreciated their unique and innovative solutions.

Prof. Hermann Maurer to hold a lecture at the Wrocław University of Technology

2018-06-08

Wrocław University of Technology invites participants on Tuesday, June 12 to the lecture „We need lots of imagination to solve some of the big problem facing mankind“. The lecture will take place as part of the Interdisciplinary Scientific Seminar. The lecturer will deal with unconventional solutions to the basic problems that have faced humanity – related to overpopulation, global warming or digitization - says prof. Arkadiusz Wójs, chairman of the Interdisciplinary Scientific Seminar. Professor Maurer is associated with the Technological University in Graz. In 1965 he obtained a Ph.D. in mathematical sciences, he also graduated from the University of Calgary. He lectured at universities in Australia, Brazil, Canada, Germany, New Zealand and the USA. He has developed many innovative solutions in the field of information technology, data collection and processing, or the development of Internet networks.

Academy of Young Inventors in Częstochowa

2018-06-08

University of Humanities and Natural Sciences in Częstochowa will carry out the project „Academy of Young Inventors, an initiative broadening the horizons of creative and innovative thinking of children and youth“. The Young Inventors' Academy aims to show young people that learning can be a form of fun. It is a kind of mobilization of children and youth for critical and creative thinking, stimulating the imagination, solving problems and innovative action while acquiring knowledge. The project covers only the didactic activities aimed at developing key competences and universal skills - transversal skills - necessary on the labor market among the participants of the project. Activities will be implemented using the technical and human resources of the Faculty of Mathematics and Natural Sciences at the University of Częstochowa.

Biochemists of Gdańsk Medical University top in Superhelisa 2018

2018-06-08

Julia Denis, Izabela Kotlewska and Małgorzata Styczeńska are students of the Medical Faculty of the Medical University of Gdańsk, who won the team classification of the National Polish Biochemistry Review „Superhelisa 2018“. Małgorzata Styczeńska was also the best „Young Biochemist“. She scored the highest number of points in all three stages of the competition. The second place was Dominik Rus from the medical department of the Warsaw Medical University, the third was Piotr Mielczarek from the Silesian Medical University in Katowice. Teams from Katowice and Warsaw took the second and third place in the team competition. In the 15th National Competition of Biochemical Knowledge, 30 best medical students from Polish universities took part. After written analysis of issues, a test of the entire material and a final oral statement, students visited the European Solidarity Center and the Gdańsk Old Town.

Lower Silesian Cluster of Cybersecurity established

2018-06-08

Protection and security of key IT resources as well as design and development of secure software are the main tasks of the Lower Silesian Cybersecurity Cluster, established at the initiative of the Wrocław University of Technology. The cluster's tasks include protection of institutions, business systems and control in industry; management, law and auditing - managing the security and risk analysis team and conducting technical audits of the most important IT systems within applicable legal regulations; forensic science - acquisition and analysis of evidence from digital systems to find traces and obtain evidence relevant to the security of information and information systems, and electromagnetic security. The creators of the cluster also announce penetration research - identification and evaluation of potential attacks and vulnerabilities in information systems and implemented defense systems. More: <http://pwr.edu.pl/uczelnia/aktualnosci/nowy-klaster-zadba-o-bezpieczenstwo-w-sieci-10884.html>

University of Wrocław in the SCALINGS research project

2018-06-08

The research project Scaling up Co-Creation: Avenues and Limits for Integrating Society in Science and Innovation (SCALINGS) has been launched. The project involves a team of scientists from the University of Wrocław. The project is implemented as part of a competition whose guiding principle is to involve society in co-creation of science and innovation as well as development of responsible science and innovation (proper research and innovation-RRI). The Polish team will examine the economic and financial aspects of implementing new technologies, in particular, renewable energy in cities. The consortium of executors consists of 35 European universities including Technical University of Munich, Eindhoven University of Technology, Technical University of Denmark, The Ecole polytechnique fédérale de Lausanne, Mines Paristech, University of Natural Resources and Life Sciences Vienna, University College London and the Social Innovation Exchange.

TOP 100 Innovators of the Economy - a new program of the Ministry of Science and Higher Education

2018-06-08

The Ministry of Science and Higher Education launched the „TOP100 Innovators of the Economy” program, whose aim is to facilitate cooperation between entrepreneurs and scientists as well as to support the managing of scientific research. According to the Ministry of Science, the program will enable employees of enterprises to complete internships in foreign scientific units or in enterprises with experience in conducting research and development activities. Piotr Dardziński, Undersecretary of State in the Ministry of Science and Higher Education, emphasizes that intensifying cooperation between scientists and entrepreneurs is one of the most important aims of the Ministry. There is no possibility of developing the Polish economy without using the scientific output. The Ministry of Science will allocate over PLN 15 million for the implementation of the program. More: <https://www.nauka.gov.pl/komunikaty/uruchomienie-programu-top100-innowatorzy-gospodarki.html>

International conference on planning teacher education and development at the University of Białystok

2018-06-08

From 7 to 9 June 2018, the Faculty of Pedagogy and Psychology at the University of Białystok will hold an international scientific conference devoted to the planning of teacher education and development („Designing Teacher Education and Professional Development for the 21st Century: Current Trends, Challenges and Directions for the Future”). According to Katarzyna Dziedzic, spokesperson of the University of Białystok, the event will be attended by nearly 160 researchers and representatives of educational institutions from around the world. The main goal of the conference is to undertake an international discussion on trends, challenges and perspectives in teacher education in the 21st century. The organizers of the

conference are the Faculty of Pedagogy and Psychology at the University of Białystok and the Association for Teacher Education in Europe (ATEE).

Prof. Emilio Meneses to hold a lecture at the University of Lodz

2018-06-11

The Faculty of Economics and Sociology at the University of Lodz invites participants to a lecture by Prof. Emilio Meneses, titled „Central Europe and Latin America: front line or peripheric regions?”, which will be held on June 12, 2018. The Professor will discuss issues of geopolitical status and economic importance of Central Europe and Latin America, especially in the context of US-Chinese-Russian rivalry. Professor Emilio Meneses is a graduate of Georgetown University and the University of Oxford. In the years 1981-1984 he was an adviser to the Minister of Defense of Chile. Then he was the head of the Department of Defense Studies at the Catholic University of Chile and the Department of International Relations at Chilean Naval War College.

Feast of the University of Rzeszów

2018-06-11

On June 7, 2018, the University of Rzeszów celebrated its anniversary. As the part of the event, assistant professors and PhD holders were promoted, Prof. Anna Blom received the title of doctor honoris causa and Tadeusz Ferenc, the President of Rzeszów received the Great Medal of the University of Rzeszów. The celebrations began with the performance of Gaude Mater Polonia sung by the Choir of the Music Department under the direction of Dr Bożena Stasiowska-Chrobak and greetings from Prof. Sylwester Czopek, rector of the University of Rzeszów. After the graduation ceremony, Prof. Sylwester Czopek said: „I would like to thank all the promoters for their work with PhD holders and for participating in today’s solemn promotion. I wish doctors a further development of their scientific interests. „ In the second part of the celebrations of the University of Rzeszów, Prof. Anna Blom received the title of doctor honoris causa, the President of Rzeszów received the Great Medal

of the University of Rzeszów and the University staff received state awards.

EkoPark at the University of Gdańsk

2018-06-11

The EcoPark was established on the Baltic Campus of the University of Gdańsk. It is the only project in the region that combines educational, scientific and recreational functions. Its total cost is almost PLN 3 million with over PLN 2 million co-financed from European funds. The park was created between the faculties of biology, chemistry and mathematics, physics and informatics on the university campus in Gdańsk Oliwa. It is an area of preservation and promotion of biodiversity. It also fulfills educational, scientific and recreational functions to the entire local community. The research on the species that require special care and practical classes for students are planned in it. The park will contribute to the increase of the ecological value of Gdańsk by increasing access to green areas and thus properly developed areas for recreation of students and Gdańsk residents.

Final of „Algorithms and data structures” within the Programming Academy of the Maria Curie-Skłodowska University in Lublin

2018-06-11

On June 11, 2018, the final of the „Algorithms and data structures” competition will take place as part of the Academy of Programming at the Maria Curie-Skłodowska University in Lublin. The „Programming Academy” is a long-term educational project aimed at popularizing information technology among school students from the Lublin Province - informed Katarzyna Koziółewicz from the press office of the Lublin university. The „Academy” offer is addressed to a wide range of students interested in programming. The organizers plan to motivate young people to broaden their horizons and prove that IT issues can be presented in an interesting and accessible form. Ultimately, the „Academy” will offer complete programming courses.

10th Summer Academy of Music in Wrocław

2018-06-11

Academy of Music in Wrocław invites music teachers and students to the 10th Summer Academy of Music. The workshops directed by excellent musicians and teachers are planned from June 26 to July 1. The deadline for applications is 12 June. The Summer Academy courses are organized for students of primary music schools, students of music secondary schools, graduates and music school educators. The Wrocław Academy of Music offers the improvement of playing technique and interpretation, the improvement of vocal technique and interpretation as well as conducting techniques in the choral and symphonic music, as well as shaping the compositional skills, the creative expression and the development of artistic personality.

Conference on social engineering in politics at the University of Szczecin

2018-06-11

The Institute of Political Science and European Studies of the University of Szczecin invites participants to the national scientific conference on June 12 and 13. The organizers intend to discuss political theory and political marketing regarding social engineering activities in the sphere of politics. The organizers of the two-day conference announce a discussion on the following topics: the relationship of political social engineering with political marketing, social engineering instruments, subject of socio-technical impact, social engineering in the activities of political subjects, destructive methods of deprecating political opponents and social engineering in historical politics and the media. The conference will be combined with the „ Humanistic Szczecin „ event, during which Prof. Mirosław Karwat will give a lecture on historical and social aspects relating to Szczecin and Western Pomerania.

Polish Science Towards EMBL conference at the Polish Academy of Sciences

2018-06-11

The Institute of Experimental Biology of the Polish Academy of Sciences organizes on 19 - 20 June 2018 the Polish Science Towards EMBL conference to commemorate the Polish membership in the European Molecular Biology Laboratory (EMBL) and to bring together Polish and world experts and scientists involved in biomedical research. The scientific symposium will allow to consolidate the community dealing with molecular biology. During the event, biology students, PhD students and researchers will be able to obtain comprehensive information on the possibilities of cooperation with EMBL. More: <http://embl.nencki.gov.pl/>

Information meeting for innovative companies in Łomża

2018-06-12

On June 13, 2018 at 10:00 am the Łomża Industrial Park holds an information meeting on the possibilities of supporting companies carrying out innovative projects. The meeting will be attended by Adam Hamryszczak, deputy minister of investment and development. During the event participants will get acquainted with the principles of support for companies from the Intelligent Development Program for innovative undertakings, from the Eastern Poland Program and from the Regional Program of the Podlasie Voivodship. After the seminar part, individual consultations will be held with experts from institutions that implement European Funds.

Meeting of QGIS users at the Krakow University of Technology

2018-06-12

The Faculty of Environmental Engineering of the Krakow University of Technology organizes on 19 June 2018 a meeting of university representatives, commercial companies and local governments to

discuss QGIS, the most popular free program for working with spatial data. The QGIS program was originally created as a tool for working with spatial data and for creating maps. Thanks to the free and open license, programmers and scientists from many countries joined the creation of the QGIS project. Its reputation is stressed by the fact that it is used as a base platform for conducting remote sensing training organized by the NASA. The Faculty of Environmental Engineering is one of the first in Poland to base education and research on the QGIS platform, and the Krakow University of Technology is the first university in Poland to create a certified QGIS training center.

Cardinal Stefan Wyszyński University to establish Collegium Medicum

2018-06-12

The Cardinal Stefan Wyszyński University in Warsaw will launch soon Collegium Medicum. The Parliamentary Committee on Education, Science and Youth gave a positive opinion on the bill amending the Act on the Cardinal Stefan Wyszyński University. For several years, the Warsaw University has been preparing to educate future PhD holders in medicine. In 2014, the Laboratory Center was opened for basic research in the field of medical sciences. In 2016, the Center for Virtual Anatomy and Surgical Simulation was established, and the biology specialty was launched in the biology studies. As emphasized the priest Prof. Stanisław Dziekoński, the rector of the university in the Polish Parliament, Collegium Medicum is an opportunity for the Polish medical community to acquire new international partners. In recent years, the Cardinal Stefan Wyszyński University has established cooperation with the Gemelli Hospital in Rome, with the European School of Advanced Ophthalmological Research (ESASO) at the Swiss University of Lugano and with Isarklinik in Munich.

Conference „A Polish DIAS for Europe”

2018-06-12

The Ministry of Science and Higher Education is organizing an international conference „A Polish DIAS for Europe” with the participation of representatives of the European Commission, the European Space Agency and other European institutions from the space sector. The conference will be held on July 2, 2018 at the Copernicus Science Center in Warsaw. It will emphasize the importance of Copernicus DIAS for Poland and all of Europe. During the event, the potential of the Polish space sector in the field of processing and use of satellite data will be presented. Participation in the conference is free and registration for the event begins on June 11, 2018 at: <https://www.nauka.gov.pl/rejestracja-na-konferencje-a-polish-dias-for-europe/>

Students of the Silesian University of Technology win in Shell Eco Marathon

2018-06-12

Students of the Silesian University of Technology won the competition Shell Eco Marathon in the BatteryElectric Prototype category at the RKC Carting Paris. The victory in Paris assures Wrocław University admission to the Shell Eco-marathon Europe Championship. The competition in France lasted a week. Students from the SmartPower team successfully passed the technical inspection and took the first place in the BatteryElectric Prototype category. The designers hope that the France experience will help them to success at the Shell Eco-marathon Europe Championships planned for July. The final in London is the 34th competition of energy-saving constructions. The first such competition was held in Paris in 1985 and 25 wooden vehicles started then. The victory is not the only success of the Wrocław Technological University. Previously, they awarded the prize for the Best University at the Hydrogen Horizon Automotive Challenge.

University of Economics in Katowice supports Silesian secondary schools

2018-06-12

The University of Economics in Katowice signed further support agreements with secondary schools. The educational cluster including already several dozen institutions has been joined by the Technical and High Schools Complex in Bytom, Complex of Technical and General Education Schools No. 3 in Katowice and I High School in Wodzisław Śląski. - The University of Economics is a perfect place to study economics, business, IT and humanities. We are happy that among our students we have the best graduates of the secondary schools with which we cooperate, including winners and finalists of the subject competitions. The successes of candidates and students motivate us to even more intensive work to improve the quality of education and science – said Prof. Sławomir Smyczek the Vice-Rector for Education and Internationalization signing the contract.

Debate „Will the World Cup in Russia be safe?” at Collegium Civitas

2018-06-13

The Center for Terrorism Research Collegium Civitas invites participants to a debate on June 13 with the participation of experts from the politics, media and sports entitled: „Will the World Cup in Russia be safe?” The meeting will start at 17:30 at the Collegium Civitas headquarters (XII floor of the Palace of Culture and Science in Warsaw, room 1222). The speakers include Roman Kosecki, former Polish football representative, in 2012-2016 the vice president of the Polish Football Association and currently a member of the Sejm, Przemysław Iwańczyk, sports journalist, Maciej Karczyński, spokesman for the Internal Security Agency in 2012-2016, Andrzej Mroczek, expert on terrorism and Dr. Krzysztof Liedel, director of the Center for Terrorism Studies Collegium Civitas. The topics of the debate are mass sports events as high-risk events, security measures for mass sports events in the world, sports in high-

risk conditions - how we perceive contemporary sports spectacles and safe support - good practices and recommendations.

Student exhibition at the University of Warsaw at the Copernicus Science Center

2018-06-13

Institute of Polish Culture at the University of Warsaw, artists and researchers have completed the exhibition „Project Powiśle. Creative study of the city. „ It will be held on June 16 to July 15 at the Copernicus Science Center in the pavilion at the Vistula Boulevards in Warsaw. The exhibition consists of photographs, video works, drama and interactive installations prepared mainly by students of culture animation. Dr Joanna Kubicka from the Institute of Polish Culture stressed that the students explored the social, material, visual and audial sphere of the district Powiśle, using the strategies of contemporary art. An important element of the project - says Dr. Kubicka - was their work out of the university buildings and establishing relationships with the Powiśle community. More: <https://www.facebook.com/events/1016836625133123/>

Experts from the National Center for Research and Development to meet entrepreneurs in 50 Polish cities

2018-06-13

The National Center for Research and Development has launched a series of meetings for entrepreneurs, with the aim to familiarize them with the offer of this executive agency of the Minister of Science and Higher Education and the principles of applying for co-financing. Meetings will take place in 50 cities throughout Poland. During the meetings, the experts will present the possibilities of obtaining subsidies for activities that will allow companies to introduce innovative solutions. As emphasized Prof. Maciej Chorowski, director of the National Center for Research and Development, many entrepreneurs do not undertake innovative activities, either because of fear of risk or lack of knowledge about the possibilities of obtaining support for their innovative scientific projects. - Our activity meets the needs of such companies. I encourage them to participate in meetings and take advantage of our offer - he adds. More: <https://www.ncbrdlafirm.pl/>

Cooperation between the Maritime University and the Szczecin police for improving security

2018-06-13

Maritime Academy and Provincial Police Headquarters in Szczecin have signed a cooperation agreement. The aim is to support all initiatives and joint actions to improve road safety and improve the automotive culture among all road users and institutions and organizations supporting these activities. The signatories of the agreement are provincial police chief in Szczecin - Jacek Cegiela and the rector of the Academy – Dr. Eng. Capt. Wojciech Trybacz, Prof. of Maritime Academy. The commander stressed that the key factor will be the development of new road safety improvement projects and their active implementation. - We believe that acting together

with the police, the Academy can use knowledge and experience to observe everyday life and provide the results of analyzes in order to create the traffic space that is friendly to all road users - says the commander quoted on the Academy website.

Conference on material remnants of World War II in Gdansk

2018-06-13

Scientific Department of the Museum of World War II in cooperation with the Provincial Office for the Protection of Historic Monuments in Gdańsk will hold a conference „Material remnants of conflicts and crimes of the 20th century in the light of the latest archaeological research”. The conference will take place at the Gdańsk Museum on June 14 and 15. The lectures will be presented by 23 speakers from academic centers and museums from Poland and Ukraine. Participants will present the results of their work and new directions of their activities. They will also present the opportunities and threats associated with the use of acquired artifacts. Among the issues there are planned to be discussed exhumation and archaeological works in Ukraine and in the vicinity of the Rawka and the Bzura, other discoveries made during road constructions and results of research conducted in Polish maritime areas. There are planned lectures on issues linked to the archeology - such as its reception in the media. More: <https://muzeum1939.pl/konferencja-naukowa-materialne-pozostalosci-konfliktow-i-zbrodni-xx-wieku-w-swietle-najnowszych/aktualnosci/1347.html>

Students of the Academy of Technology and Humanities in Bielsko-Biala are the best in emergency medical care

2018-06-14

Students of the Academy of Technology and Humanities in Bielsko-Biala won the 9th National Competition of Universities in Emergency Medical Services. The organizer of this year's edition of the championships, in which 25 teams competed was

the Jagiellonian University. During the competition, students had to demonstrate theoretical knowledge and practical skills in the field of medical rescue operations. Teams had to complete a total of eight tasks, with extensive medical scenarios. The rescuers had to deal with a patient with acute coronary syndrome as a result of drug use, a gunshot wound in the abdomen of a 12-year-old child, and a criminal with a bronchial asthma attack. This is the third title for the Bielsko Academy of Technology and Humanities. Thanks to the victory next year - the tenth competition will be organized in Bielsko-Biala.

Students of Warsaw University of Technology on the podium in the first Brick Architecture Competition

2018-06-14

The goal of the brick architecture competition was to present a vision of optimal solutions that can be implemented in two categories: Housing construction and Construction of the future. The competition was organized by the Association of Employers of Building Ceramics and the Association of Polish Architects. In the category of Construction of the Future Klaudia Lachcik, a student at the Faculty of Architecture from the Warsaw University of Technology won for her project „Multithreading”. In the category of residential construction - single-family house, the second was Piotr Zalewski from the Warsaw University of Technology who designed the house for mountain climbers. 54 projects made by students representing 13 universities, were submitted for the competition.

Seminar on the uberization of business, economy and work

2018-06-14

the auspices of the Rector of the University of Lodz and the Marshal of the Łódź Province on June 15, 2018, the seminar „Uberization of business, economy and work” will be held in the Łódź Special Economic Zone. The organizers of the event Polish-American Center of Management (PAM Center) and the Faculty of Management of the University of Lodz inform that the participants will discuss following questions: How does the dissemination of uberization affect the development of business and the labor market? What will the new class of „on-demand workers” bring us? Also, they will discuss the identification of new solutions and business models that undermine traditional business patterns; anticipating the consequences and impact of „uberisation” on employment, payment systems, legal regulations and market activities of companies; analysis of opportunities and threats in the changing labor market. More: <http://pam.uni.lodz.pl/w-pam-center/>

Wroclaw Academy of Land Forces cooperates with the Institute of National Memory

2018-06-14

The Academy of Land Forces in Wroclaw signed a cooperation agreement with the Institute of National Memory for the development of science and shaping the committed patriotic and civil attitudes of the future young Polish citizens. The contract concerns the study of the history of Polish arms and the search for final resting places of people killed in the struggles for independence and the unification of Poland. It also assumes cooperation in the area of commemorating historical events, places and characters as well as organizing patriotic events and promoting a soldier's ethos. The signatories will also organize symposia, scientific conferences, exhibitions and discussion panels on the history of Poland. In addition, the cooperation agreement will allow both institutions to make available their archival and library collections for use for scientific purposes.

Nobelist of Ben L. Feringa to hold a lecture at the University of Poznan

2018-06-14

of Chemistry of Adam Mickiewicz University and the City of Poznań invite participants to the open lecture „The Art of Building Small”, which will be given by the Nobel laureate in chemistry - Professor Ben L. Feringa. The lecture will start at 12 on Thursday, June 21 in the auditorium (room 264) of the university's chemistry department. In addition to the Nobel Prize in 2016 (obtained together with Jean-Pierre Sauvage and Sir J. Fraser Stoddart), he has also received many other prestigious awards for designing and synthesizing molecular machines. He is the winner of the highest Dutch scientific prize - the Spinoza prize in 2004 and the Humboldt Foundation awards in 2012. Prof. Feringa is a co-author of over 800 scientific works cited nearly 50,000. times. The Polish Chemical Society honored Prof. Feringa with the highest medal of Maria Skłodowska-Curie.

Wroclaw University of Technology wins the prize of the Polish Bank Association and the „Promyk Słońca” Foundation

2018-06-14

University of Technology received the prize of the Polish Bank Association and the Promyk Słońca Foundation. The university was honored for outstanding and innovative technological solutions for people with disabilities. The initiator of the award is the „Promyk Słońca” Foundation, which rewards people, institutions and companies in this way for solutions that use new technologies to support disabled communities. The award was presented during the 13th Congress of Electronic Economy 2018 in Warsaw Jerzy Borowiec, a plenipotentiary for disabled people, received the award on behalf of the rector of the Wrocław University. - It is a big surprise for us, because we did not know at all that we are being tipped in the competition. We are even more happy that we are rewarded for our normal everyday work for students with disabilities - he said.

Researchers from the University of Warsaw discover ancient city in Albania

2018-06-15

During the excavation works in northwestern Albania, researchers from the Center for Research on Antiquity of Southeastern Europe of the University of Warsaw discovered the remains of the settlement from over 2,000 years ago. The excavations revealed coins and ceramics from the Hellenistic era, as well as remains of stone structures referred to as the Cyclopean walls. The archaeological excavation campaign lasted several days and resulted in discovering a gate with two bastions and defensive walls covering an area of about 20 hectares. The researchers' goal is now to determine the actual name of the discovered city. There has been speculation that it can be Bassania destroyed at the beginning of our era by the Romans. Scientific symposium „Metagenomes of different environments” held at the Catholic University of Lublin

2018-06-15

The Faculty of Biotechnology and Environmental Sciences of the Catholic University of Lublin organizes on June 28-29, 2018, the 3rd National Scientific Symposium - „Metagenomes of different environments”. The aim of the Symposium is to summarize the current knowledge and present the latest developments in metagenomics, microbiology, genetics, interactions between micro and macroorganisms of different environments and their importance for the development of microbiology, biotechnology, agriculture and environmental protection. During the conference, the results of research carried out in various scientific centers will be presented and discussed. The co-organizer of the event is the Warsaw University of Life Sciences, Maria Curie Skłodowska University in Lublin and the Institute of Agrophysics of the Polish Academy of Sciences.

Graduates of the University of Life Sciences win in the fifteenth „Wrocław Magnolia” competition

2018-06-15

Natalia Kordysz, landscape architecture graduate at the Wrocław University of Environmental and Life Sciences, took the first place, and Aneta Szymoniak received a distinction in the competition for the best master's thesis in the competition „Wrocław Magnolia”. Natalia Kordysz presented the development project for the wharfs on the Oława river in Wrocław. In her concept, she preserved wide green lanes along the river and used landscape features to integrate residents and promote the city. Aneta Szymoniak created a concept for the development of the area at the Ślęza River in Wrocław. She designed the area in Wrocław at Grabiszyniek, consistent with the principles of sustainable space development and the use of green infrastructure solutions. „Wrocław Magnolia” is a competition that promotes the best master's thesis that contribute to improving the life comfort of the inhabitants of Wrocław. More: http://www.glos.upwr.edu.pl/aktualnosci/48009/xv_edycja_wroclawskiej_magnolii.html

Festival of High Temperatures - Art at the First Fire

2018-06-15

The Wrocław Academy of Fine Arts invites participants to the International Festival of High Temperatures. It is the only open artistic event in Poland, during which fire work masters share their knowledge and experience with the public. The motto of this year's Festival is „Art at the First Fire”. Professionals from all over the world will be presenting their creativity and skills from 22 to 24 June in Wrocław. Festival events are divided into three sections: metal; ceramics and glass section. In the first section guests will be able to make small sculptural forms of aluminum, bronze and cast iron and observe the process of creating jewelry. In the second section, they will use a potter's wheel without using electricity, in the third one students will show methods of blowing glass to plaster molds cast from wax sculptures. There will also be glass decorating workshops by grinding, sanding and engraving it. More: <http://festiwalwysokichtemperatur.pl/pl/>

Scientist from Poznań wins the „Supertalents in Medicine 2018” competition

2018-06-15

Dr Alicja Kalinowska-Łyszczarz, assistant professor in the neurochemistry and neuropathology of the department of the Poznań University of Medical Sciences, has won the competition „Supertalent in Medicine 2018”. This year's competition was attended by dozens of doctors and graduates of medical related faculties from academic centers and clinical hospitals. The winner deals with the diagnosis and treatment of patients with multiple sclerosis, and also conducts educational activities promoting knowledge about MS among doctors and patients. In her scientific and research work she deals with the issues of neuroimmunology and neuropathology of multiple sclerosis and related diseases. Supertalents in Medicine is a contest organized by „Puls Medycyny” since 2012. Its aim is to select and reward young doctors and graduates who will influence changes in the health care sector in Poland in the coming years.

Scholarship call for German scientists in Poland

2018-06-18

The Foundation for Polish Science launches the twenty-second call for the Polish Honorary Scientific Scholarship, within which well-known German scholars can come to Poland for several months studies. From 15 June to 1 October, Polish scientists may appoint foreign candidates for scholarships. The scholarship is aimed at honoring the scientific achievements of the scholars and stimulating long-term cooperation between Polish and German researchers. It is the equivalent of the Humboldt-Forschungspreis, a prestigious award for foreign scholars of the well-known German Alexander von Humboldt Foundation. The Foundation aims to promote Poland as an increasingly attractive place for practicing science for both Polish and foreign researchers - said Dr. Tomasz Poprawka, deputy director for program activity at the Foundation.

COST seminar at the University of Warsaw

2018-06-18

On July 2, at the University of Warsaw, a seminar on the European Cooperation in Scientific and Technical Research - COST will be held. What is the COST program? How can a Polish scientist participate in COST program activities? How to join current activities (COST Actions)? These issues will be explained by Jadwiga Mrozowska, the main specialist in the Department of International Cooperation of the Ministry of Science and Higher Education. COST is a European Program for Scientific and Technical Cooperation (European Cooperation in Science and Technology) created by 36 European countries and Israel (as a cooperating state), whose most important task is to organize multilateral scientific and technical cooperation of member countries. Registration for the seminar: <http://bob.strony.uw.edu.pl/seminarium-cost-europejski-program-wspolpracy-w-dziedzinie-badan-naukowo-technicznych-european-cooperation-in-science-and-technology/>

Jagiellonian University wins a prize for the best public health educational program in Europe

2018-06-19

The Europubhealth + program, realized by the Institute of Public Health of Collegium Medicum the Jagiellonian University, received the first ASPHER Deans' & Directors Award for the best educational program in the field of public health in the European region - informs the Krakow university. ASPHER (Association of Schools of Public Health in the European Region) is an independent European organization that strengthens the role of public health by improving the education of specialists in this field. The Europubhealth + program has been implemented for 12 years by the Institute of Public Health together with a consortium of 5 European universities: EHESP School of Public Health in Rennes (France), University of Sheffield's School of Health and Related Research (Great Britain), University of Granada - Andalusian School of Public Health (Spain), University of Rennes 1 (France) and Maastricht University (Netherlands). The program includes 2-year Master's degree programs within the Erasmus Mundus program educating in the field of public health.

Landscape architects of the University of Life Sciences develop the concept of the Wrocław-Fabryczna Park

2018-06-19

Linear Park Wrocław-Fabryczna will be built on the site of a closed railway siding in Wrocław. This is the first investment in the city connecting new office buildings with the public green area. The design was created in the Study and Design Studio of the Institute of Landscape Architecture at the Wrocław University of Environmental and Life Sciences - says Dr. Justyna Rubaszek, head of the team developing the project. The design of the park is part of the global tendency to transform post-railway areas into green areas. Linear parks are an important element of the city's green infrastructure - they connect functionally and spatially dispersed green and open areas, thus facilitating access to them. Their linear layout has also ecological value. The park, with a total length of approx. 600 m, is planned together with new office developments arising in the area of Strzegomska and Fabryczna streets, in the new business center of Wrocław. More: http://www.glos.upwr.edu.pl/aktualnosci/47862/powstanie_park_linearny_wroclaw_fabryczna.html

15th anniversary of Korean philology at the University of Poznan

2018-06-19

Adam Mickiewicz University in Poznan invites participants to the 15th anniversary of the Korean Philology celebrations, which will begin on Thursday, June 21 at 10:00 at the Lubranski Hall Collegium Minus. As part of the celebrations, the «Korea Forum # 3» conference is planned. Among the invited guests are representatives of the embassy of the Republic of Korea, Warsaw, Jagiellonian, Wrocław Universities and Hangeul University of Foreign Studies and graduates of Korean philology. Students of philology learn not only to write and speak Korean, they also study literature, culture and history of Korea. They attend the Korean language course as part of the academic exchange to the Republic

of Korea and can undertake research or studies at South Korean universities. Graduates are diplomats, managers of the largest South Korean companies, translators, businessmen, ministerial officials, academic teachers and corporate employees.

University of Gdańsk awarded in the Promyki 2018 competition

2018-06-19

The „Seekers of the Lost Hall” project of the University of Gdańsk received the distinction in the category „New media” in the competition for the best project promoting and communication activities of the university - Promyki 2018 - informs the University spokesperson, Dr. Beata Czechowska-Derkacz. «Seekers of the Lost Hall» is an escape room in the open air. This is the first such student initiative of this type in Gdańsk. During the field game, students and university staff looked for secret, interesting places on the campus in Gdańsk, and learned about them, solved various puzzles and tasks. The project was prepared and implemented by Radio MORS of the University of Gdańsk in cooperation with the Student Research Club «Inspiar». Promyki is a competition for the best project promoting the marketing and communication activities of the university, organized for eight years by the Association of PR and Promotion of Polish Universities PRom. The Association includes the largest public and non-public higher education institutions in Poland.

International scientific conference „Renewable Energy Sources – technology and innovations”

2018-06-20

The Department of Energy Resources of the Faculty of Geology, Geophysics and Environmental Protection of the AGH University of Science and Technology in Krakow and the Department of Mechanical Engineering and Agrophysics of the Production Engineering and Energy Department of the University of Agriculture in Krakow organize an international scientific conference on June 20-22 in Krynica V en-

titled „Renewable Energy Sources - Technology and innovations.” The conference will be attended by representatives of scientific communities, local governments and energy industry entrepreneurs. The thematic scope of the event w the theoretical and practical aspects of modern technologies of renewable energy sources such as: solar energy, geothermal energy, biomass and biomass fuels, combustion, co-firing and cogeneration, heat pumps and wind energy. More: <http://www.renewenergy.pl/>

Students of three Wrocław universities implemented the Joint Architectural Initiative

2018-06-20

Three Wrocław universities summarized the Joint Architectural Initiative. Students of the Academy of Physical Education, Technological University and Academy of Fine Arts worked together with teachers on the elimination of architectural, communication and technical barriers in the apartments of people with disabilities. Mixed teams completed housing adaptation projects: for a person with dementia, with multiple sclerosis, for a blind person and for a wheelchair person. They also developed the architectural concept of a rehabilitation and education center with an independence home for patients with Prader-Willi syndrome. The completed project shows how important is the approach to the subject from the point of view of different positions. The work of students and tutors allows to shape an appropriate approach to investors / patients placing them at the center of the project, not as recipients.

The University of Szczecin summarized the PhilosophUS project

2018-06-20

The debate with the participation of pupils from Szczecin schools completed the PhilosophUS project, which was realized in 2017-2018 at the Szczecin University. The aim of the project was to increase the level of argumentative and communication skills of schoolchildren of the West Pomeranian Region. The operation covered ten schools of the region - nine secondary schools and a junior school, in which employees and PhD students of the humanities faculty conducted classes in philosophy. The project was co-financed from the funds of the Operational Program Knowledge Education Development. During the debate, the students presented their argumentative skills answering questions: «Can a computer think like a human?»; «Are there universal cultural values?»; «Can you understand other cultures?» And „Post-truth and a lie. Are they the same? Is post-truth a kind of truth or lies? „

Zagłębie's Mediateka is already operating - it has collected over 200,000 volumes

2018-06-20

Inhabitants of the Silesian and Zagłębie region can use the Zagłębiowska Mediateka including a library, reading room, multimedia, department of regional collections, children's Land of Science and Fantasy, the Cultural Orangery and the courtyard with a terrace. The media library collections include over 200,000 volumes and 3 thousand audiobooks, 200 board and electronic games, as well as multimedia devices and toys for children and game consoles. Until the end of June, guests can visit the exhibition prepared for the 50th anniversary of the University of Silesia. During the open day, the Mediateka organized exhibitions, meetings with authors, workshops, lectures, film screenings and a picnic. The participants of the event saw also scientific demonstrations prepared by members of scientific groups operating at the University of Silesia, and a 3D mapping show.

Poznan University of Technology at the NAFSA conference in Philadelphia

2018-06-21

Poznan University of Technology participated in the NAFSA conference and fairs in Philadelphia. The university presented its offer at the NAFSA National Academic Exchange Agency stand - under the motto „Ready, Study, Go! Poland „. During the fair, two new cooperation agreements were signed - with the University of Areandina from Colombia and with the Catholic University of Korea. Meetings with existing partners were held to strengthen cooperation. The Poznan University established new contacts with partners from the USA, Mexico, Chile, Spain and France - informs the university on the website. NAFSA is the world's largest non-governmental organization dealing with international education. Its annual conference and fairs dedicated to m.in. foreign students and the internationalization of universities gather about 10,000 participants from over 100 countries. This year's conference was held under the slogan «Diverse Voices, Shared Commitment».

Students-architects of the Wrocław University of Technology rewarded abroad

2018-06-21

Two works from the Wrocław University of Technology were honored by the Association of Polish Architects (SARP) in France. Paulina Gocoł and Wojciech Motyka received equal prizes. In turn, Zofia Fedorów took the third place in the international competition for the design of the Museum of Language in London. The Association of Architects in France awards the prize for the most interesting engineering project. 18 works from 18 colleges participated in this year's edition. The jury chose the work of Paulina Gocoł for her work entitled «Introverus: Experimental theater and promenade, Wrocław - Na Grobli» and the project of Wojciech Motyka - «Hermitage: House of creative work». The work of Zofia Fedor from the University took the third place in the international competition for the Museum of Language in London organized by Archasm. She

managed to overcome almost 300 works created by professional architects and students from around the world - informs the Wrocław University on the website.

University of Gdańsk becomes a member of the Alliance of Silk Road Business Schools

2018-06-21

The University of Gdańsk has been officially admitted to the Alliance of Silk Road Business Schools (ASR), whose aim is to cooperate between science and business institutions in countries on the new Silk Road. Alliance of Silk Road Business Schools was established in June 2016 and brings together over 150 universities. In addition to more than 50 Chinese higher education institutions, the association includes almost 100 universities from 20 countries located on the Silk Road - Armenia, Bosnia and Herzegovina, the Czech Republic, Cambodia, Kazakhstan, Lithuania, Latvia, Moldova, Romania and Serbia. The admission of the Gdańsk university was announced at the The Belt and Road conference on International Business Education in China. During the conference, Dr Katarzyna Świerk - head of the Office of Science and International Cooperation at the University received the award for an article and a paper on the internationalization process of the university.

Extended call for Strategy of Excellence applications

2018-06-22

The Ministry of Science and Higher Education informs that the deadline of the call for applications under the Strategy of Excellence - Research University has been extended until July 6. The subject of the call is support for scientific research and analyzes aimed at realizing goals and assumptions of the long-term university development plan including activities increasing the international recognition of academic activities, strengthening research cooperation with high-reputable research centers internationally, improving the quality of education of students and PhD students, preparing comprehensive solutions for the professional development of university employees and improving the quality of university management. The allocated budget is PLN 20 million.

Summer University Warsaw 2018

2018-06-22

On July 2-13, 2018, the Warsaw School of Economics is organizing Summer University Warsaw. These are two-week international courses in economics and management, with lectures and workshops including numerous case studies, discussions and group projects. Bachelor and master students have the opportunity to obtain 4 or 8 ECTS points by participating in Summer University Warsaw. The organizers are planning the following courses: Financial management; Corporate governance, Investment project management; Economics of innovation; Brand management and Intercultural negotiations. The lecturers will be teachers from the Warsaw School of Economics and invited guests from partner universities participating in the Erasmus + KA107 exchange program, as well as practitioners from international corporations. More: <http://suw.sgh.waw.pl/>

Meeting „Direct to Internationalization”

2018-06-22

On June 29, the National Academic Exchange Agency invites participants to Warsaw for a meeting „Direct to Internationalization”. The event will be devoted to training in marketing, user experience and educational markets in India, China and Ukraine. The meeting is directed to representatives of universities responsible for foreign promotion and recruitment of foreign students. It will be opened by a lecture by Edwin van Rest, the managing director of StudyPortals and a member of the EAIE General Council. Van Rest is the director of the largest portal specializing in searching and selecting courses of study, the winner of the EAIE Rising Star Award and the Award of the Change the World organization. More: <https://nawa.gov.pl/images/art.-biurowe-i-spozywcze/Program-29.06.pdf>

Scientists of the Wrocław University of Technology become laureates of the „Best technical achievement of 2017” competition

2018-06-22

The Association of Polish Engineers and Technicians announced the results of the nationwide competition for the „Best technical achievement of 2017”. The first place in the „Research and development works and positions” category was taken by scientists from the mechanical faculty of the Wrocław University of Technology. The project «A new generation electric vehicle with adaptive operating properties as a base platform for universal applications» was created at the Department of Mechanical Engineering of Industrial Machines and Vehicles. The work of Prof. Piotr Dudziński, Gustaw Sierzputowski and Adam Konieczny is a unique modular chassis structure that allows configuring a wide range of vehicle variants with any suspension system, vehicle turn layout, number of drive wheels and chassis geometry. The construction can be used in the mining, agricultural and construction industries and also in the army and fire brigade.

Gdańsk University of Technology resolved the Entrepreneurship Swallows Contest 2018

2018-06-22

The best business idea in this year’s competition carried out by the students and PhD students of the Gdańsk University of Technology was the MedTagger project, a platform for collecting and labeling medical data, created by students of the electronics, telecommunications and computer science department. The winning project combines learning with business. Its main assumption is to create public and open data sets that will allow the development of artificial intelligence in medicine. The idea is to provide the platform in the cloud and provide a group of volunteers to label the images. The second place was taken by a team of chemists who elaborated PiaZel - a high-energy material made of polyurethane foam and a liquid-absorbing hydrogel. The creators of the Stripes Care project - an innovative body care product took the third position. The product fights cellulite, its innovation is based on the use of black tea caffeine extract.

Unihockey World Hockey Championships will take place in Łódź

2018-06-25

From 26 to 30 June, the University of Technology in Lodz will host the Unihockey World Hockey Championship. 250 competitors from 8 countries will take part in it. The main organizer is Academic Sports Association of the Lodz University of Technology. Students from the Czech Republic, Finland, Japan, Poland, Singapore, Slovakia, Switzerland and Sweden will compete in the matches, which will be played by six-person female and male teams. The championships will be played in the Bay of Sport of the Lodz University of Technology. From June 26 to 28, the group stage matches will be held. On Saturday, June 30, finals are planned. After the last Saturday match around 20.00 the winners’ decoration and the closing ceremony are scheduled.

Professor Hlibowicka-Węglarz awarded the Brazilian Order of Rio Branco

2018-06-25

Professor Barbara Hlibowicka-Węglarz, head of Portuguese studies at the Maria Curie Skłodowska University in Lublin and honorary consul of Brazil in Lublin, was honored with one of the highest state decorations of Brazil – Order of Rio Branco. The award was granted by the President of the Republic of Brazil, Michel Temer - informs Aneta Adamska, spokesman for the Lublin university. The award ceremony took place on June 20 at the embassy of Brazil in Warsaw. The Order of Rio Branco has been awarded annually since 1963, mainly to diplomats and politicians, on the occasion of the «Day of Diplomacy» on 20th April - at the birth date of Baron Rio Branco - a well-known Brazilian diplomat, patron of Brazilian diplomacy.

Candidates to apply for the National Center of Science Council

2018-06-25

On June 21, 2018, the Minister of Science and Higher Education announced the election of candidates for the members of the Council of the National Science Center, based in Krakow. The candidates for the members of the Council of the National Science Center should be submitted by: «entities being scientific units with at least category A and entities representing the scientific community. Both categories are able to submit two candidates for each field of science. « The entity submitting the candidate, apart from his personal data, must describe the scientific achievements and provide information on the candidate's scientific activity, including the number of publications and the number of citations, describe the qualifications and professional experience useful to perform the function of a Council member and attach a list of completed or implemented research projects. Applications should be submitted by July 20, 2018. More: https://www.nauka.gov.pl/komunikaty/nabor-kandydatow-na-czlonkow-rady-narodowego-centrum-nauki_20180621.

16th INFINITI Conference on International Finance is held at the University of Economics in Poznan

2018-06-25

Researchers from all over the world participated in the international conference „16th INFINITI Conference on International Finance” at the University of Economics in Poznan. This is one of the most prestigious European financial conferences organized at the Poznań university. This year's conference is the result of cooperation between three academic centers: Trinity College, Dublin (Ireland), Monash University Melbourne (Australia) and University of Economics in Poznań. Over 200 scholars from Europe, Australia and North America took part in the conference. Conference lectures covered international finance, financial markets, asset valuation, diversification of the investment portfolio, corporate governance, behavioral aspects and many other issues of international finance.

Faculty of Architecture at the Krakow University of Technology to launch Open Summer School

2018-06-26

The Faculty of Architecture of the Krakow University of Technology organizes from 16 to 27 July 2018 the Open Summer School under the motto „Architecture as experience”. The main assumption of the Open Summer School is to support the didactic-scientific activity of the architecture department of the Krakow University of Technology. Students of architecture departments at Polish and foreign universities will take part in July classes. Participants will deal with issues of contemporary architecture and urban planning. Lectures and presentations will be hosted by representatives of Polish and foreign academic centers, architects and technologists. More: <http://www.cracowsummerarchitecture.pk.edu.pl/>

Congress innoSHARE'18 - LET'S INSPIRE POLAND

2018-06-26

On 27-29 June the Warsaw Palace of Culture and Science is hosting the innoSHARE'18 Congress - LET'S INSPIRE POLAND. Almost 1,000 people from over a dozen countries will share their knowledge and experience in the field of innovation development, cooperation between science and business, internationalization of business, development of start-ups and spin-offs, commercialization of research and creation of new technologies or ground-breaking research. Event organizer - Polska Innowacyjna Foundation plans to build an international network of innovators, scientists and entrepreneurs through the congress and support the internationalization of startups and science. During the congress, the participants will talk about: artificial intelligence, space technologies, electronics, biotechnology or modern materials. innoSHARE'18 will be visited by scientists and entrepreneurs of Polish origin who create new technologies, conduct groundbreaking research or develop business in various parts of the world. More: <http://www.innoshare.pl/>

Discussions about tourism during the international conference in Poznań

2018-06-26

Almost 40 participants representing national and foreign scientific units held their presentations during the second national scientific conference „Laboratory of Tourist Experiences. Controversies and problems around the modern tourism economy” at the Academy of Physical Education in Poznań. The debate was about tourism and its variety, especially on the tourism forms considered to be controversial. Progressing changes, creativity of producers, innovations in the tourism sector allowing for the development of more and more specialized segments of visitors, become a kind of testing ground in the era of experience society. The best conference presentations, after positive reviews, will be published in the Polish Journal of Sport and Tourism.

Prof. Roman Czernecki Competition for the best article on education

2018-06-26

Until June 30, participants can apply to the Prof. Roman Czernecki competition for the best article on education. The competition should have a positive impact on the development of education in Poland through the appreciation and dissemination of the work of specialists conducting scientific and journalistic activities in this field. Submitted articles must be published in Polish or English and be authored or co-authored by the applying person. Only articles that have been published in the period from January 1, 2016 to June 30, 2018 can be submitted for the competition in both categories. The prizes in the first Competition in 2018 will be awarded in two categories - for a scientific article (with prize of PLN 20,000) and for a journalistic article (funding a participation fee in an education event up to PLN 10,000). More: <https://efc.edu.pl/>

International workshop at the University of Szczecin

2018-06-26

The Science and Research Center of Natural Sciences of the University of Szczecin invites participants on 27-29 June to the international workshop organized by the International Seabed Authority (ISA). The meeting will initiate the process of preparing a framework and guidelines for Regional Environmental Management Plans in the areas of occurrence of polymetallic sulphides on mid-oceanic ridges, in particular in the areas covered by contracts. Representatives of ISA, contractors, scientists and representatives of non-governmental organizations dealing with the protection of the marine environment from around the world will take part in the workshop. ISA is an autonomous international organization established by the UN Convention on the Law of the Sea. It deals with areas of the ocean bed beyond the reach of national jurisdiction, with particular emphasis on areas with mineral deposits. More: <http://usz.edu.pl/miedzynarodowe-warsztaty-w-centrum-dydaktyczno-badawczym-nauk-przyrodniczych-us/>

Researchers of the Gdańsk University of Technology win Siemens award for research achievements

2018-06-26

Professor Dariusz Mikielwicz and Dr Eng Jan Wajs from the Faculty of Mechanical Engineering at the Gdańsk University of Technology received the Siemens Research Prize, awarded for the particularly valuable and practicable results of scientific research. Scholars of the mechanical department were awarded for their work: «Waste heat management from the power unit through the use of the ORC cycle reheated with steam from the vent and new high-performance heat exchanger structures». The Siemens award is granted to Polish scientists and research teams since 1995. The award promotes outstanding and practical achievements in the field of technology and research conducted by scientists of academic and non-academic institutions in Poland in the electrotechnics, energy, electronics, ICT, automation, rail transport, biomedical engineering and environmental engineering.

Pupils of the Wrocław primary school win Inventors Academy competition

2018-06-26

The design of the drive system for supporting the stroller won the Robert Bosch competition of the Academy of Inventors. Its authors are students of the Wrocław elementary school No. 25. The Academy aims to arouse young people's interest in science and encourage them to think creatively. Wrocław University of Technology joined the project for the eighth time. This year, the jury recognized the design of an independent drive system for supporting a pram, which was created by students of elementary school No. 25 in Wrocław. The trolley is driven by two electric motors providing power to adjust the speed of the trolley to the pace of the walk. The device is safe - the motors turn off automatically when you take your finger off the start button. The prize for the winners was electronic equipment, the school received a voucher worth 5,000. PLN

for equipping the technical studio. More about the competition: <http://pwr.edu.pl/uczelnia/aktualnosci/gala-finalowa-akademii-wynalazcow-boscha-na-pwr-10916.html>

Call for Polish-Lithuanian research teams

2018-06-27

Polish and Lithuanian scientists submitted 253 applications within the first DAINA call organized by the National Science Center together with the Lithuanian Scientific Council. 16 projects for the total amount of almost PLN 15 million received financing. The Polish-Lithuanian research teams carrying out research in all scientific disciplines applied for the support. The receivers of the DAINA 1 program will research the common cultural and natural heritage of Poland and Lithuania. In this context, they will follow the perception of the bison and the primeval forest in the 18th and 19th centuries. As part of astronomical research, scientists will organize a Polish-Lithuanian «hunt» for galactic black holes, while in life sciences they will research systems of long-range electrical signaling in plants. Researchers from Poland and Lithuania will also check how the adaptation to the environmental change from water to land had progressed. See the list of projects targeted at financing: <https://www.ncn.gov.pl/konkursy/wyniki/2018-06-25-daina1>

Graduate of the College of Ecology and Management awarded by the Association of Polish Architects in France

2018-06-27

Engineer architect Volodymyr Melymuka from the College of Ecology and Management in Warsaw received an honorary distinction and a cash prize for the project „Museum of Modern Art and Teatr Rozmaitości” in the competition for the most interesting engineering diploma project. The competition was organized by the Association of Polish Architects in France - says Katarzyna Nowakowska from the marketing and international cooperation department of the Warsaw university. The plot for the project is located in a very attractive place in the Polish capital, at the foot of the Palace of Culture and Science on the Plac Defilad. Location was one of the main design challenges of the work, because the building had to fit in the environment and at the same time arouse interest. In the vicinity of the plot there are many communication routes, including two metro lines, which was quite a huge problem. The author treated this as an asset and placed a car park and a bus stop in the basement of the building. The work „Museum of Modern Art and Teatr Rozmaitości” was done under the supervision of Dr. Eng. Artur Bulawa-Gabryszewski.

Days of Polish Culture at the North-East University in Shenyang

2018-06-27

From 28 to 30 June, the Days of Polish Culture will take place at the University of North-East (North East University - NEU) in Shenyang. Polish-Chinese projects have been implemented since 2013, when cooperation between NEU and the University of Silesia began. As part of this year's Days of Polish Culture organized by the Center for Polish Studies in Shenyang Polish language teachers from the University of Silesia will hold the open lectures on Polish culture (including Polish animated films) and Polish language (changes in contemporary Polish). The program includes Polish dance workshops and

listening to Polish songs. Chinese students will also be able to make Silesian dumplings and typical Polish sandwiches by themselves, as well as try the traditional soup żur and wodzionka. The ceremonial opening of Polish Culture Days will take place on June 28 at 14.00 Chinese time.

Construction students of the Wrocław University of Technology win the Builder journal competition

2018-06-27

Students of the Faculty of Civil and Water Engineering at the Wrocław University of Technology won the first Competition for Young Construction Engineers organized by the journal „Builder”. Not only students but also graduates and PhD students of technical universities took part in the competition. The competition was held as part of the «Builder For The Future» program, which is to facilitate the professional start for young architects and construction engineers. Participants had to choose one of the design tasks - to design a foot-bicycle path or municipal ground garage, or an implementation task - to optimize the implementation of a reinforced concrete ceiling. The winners, Veronika Olczak, Małgorzata Zielińska, Martyna Lewek and Mateusz Psiuk, chose the implementation task. - Preparing the optimization was really demanding. We checked different ways of reinforcement, ceilings and eventually we were able to prepare the right project - says Martyna Lewek from the University.

TopMinds program ends

2018-06-28

The Ministry of Science and Higher Education held the ceremonial ending of TopMinds 2018 program. It is a mentoring program created by the Association Top 500 Innovators and the Polish-American Fulbright Commission for ambitious students and PhD students from Polish universities. According to the Ministry of Science, over 330 students from over 50 national universities applied for the TopMinds program in 2018. Most students applied from the University of Warsaw, the AGH University of Science and Technology in Kraków, the Medical University of

Gdańsk, the Warsaw University of Technology and the Jagiellonian University. In the second TopMinds program, which lasted from March to June 2018, participants took part at the weekend BootCamp. It was three weekend training session and project work aimed at solving selected social problems related to health prevention, improving the quality of life and providing facilities for disabled people and foreigners during their stay in Poland. 15th Americanist Forum at the University of Białystok

2018-06-28

The Department of History of the United States of the University of Białystok organizes the 15th Americanist Forum. The forum will start on June 29, 2018, its participants will talk about Polish-American relations in the context of the 100th anniversary of Poland's independence. The Forum guests will talk about the participation of Poles and representatives of American Polonia in the battles of the First World War or the attitude of President Woodrow Wilson to Polish independence issue. The honorary guest of the conference will be Dan Hastings - cultural attaché of the US Embassy in Warsaw, who will give a speech «100 Years Together: People, History, Future». During the three-day debates, the participants will listen to over 25 lectures and will learn how reacted the press overseas to the kidnapping of King Stanisław August Poniatowski by the confederates, how was the November Uprising reported? Was Kazimierz Pułaski actually the father of the American cavalry? What connected Thomas Jefferson and Tadeusz Kosciuszko?

Prof. Edward Balcerzan receives Poznań City Scientific Award

2018-06-28

Professor Edward Balcerzan from the Adam Mickiewicz University in Poznań became the laureate of the XXVIII Scientific Award of the City of Poznań. The Committee also awarded scholarships to two young researchers from the Poznań university. Candidature of Prof. Balcerzan - a literary scholar, poet, prose writer, translator and essayist was put forward by the Poznań University. The authors of the application underlined the importance of the Professor's achievements in Polish post-war science about literature. Thanks to his theoretical studies, Prof. Balcerzan became the co-founder of the structural and semiotic school, which made Poznań famous as a center of humanistic research. In the monograph «Literariness. Models, gradations, experiments» he proved that Polish theoretical thought in literary studies proposes original concepts and methods to foreign scientists. The Award Committee also awarded scholarships to two young scientists Piotr Alexandrowicz and Anna Walczak from the University.

University of Economics in Katowice scholars succeed at an international conference

2018-06-28

Prof. Sławomir Smyczek, Prof. Aleksandra Burgiel, Dr Jolanta Zrałek were honored with the „The best paper” award at the international conference on Global Business Research Symposium (GBRS) in Rome. Professor Smyczek also received the „The best discussant” award for preparing the best paper review. This year's international GBRS conference was organized by St. John's University under the motto «The Future of Business: Technology, Innovation, and Regulation.» Awarded papers «Sustainable consumption and values for consumers» by Prof. Sławomir Smyczek and «Access-based consumption: Its technological determinants and implications for the future business - the Polish example» by Prof. Aleksandra Burgiel and Dr Jolan-

ta Zrałek will be published in the international journal Review of Business. More: <https://www.gbrsconference.org/>

Gdańsk University of Technology to cooperate with General Electric

2018-06-28

Department of ocean engineering and shipbuilding at the Gdansk University of Technology and Alstom Renewable Poland Ltd /Baker Hughes, and GE Company signed an agreement on scientific and didactic cooperation. The agreement includes provisions for conducting lectures by employees of the company, organization of study visits at Elbląg, participation of students in reviews of implemented projects, cooperation of the company with students - including providing topics for the implementation of engineering and master's theses, as well as organization of student internships. In addition, the company's employees will have the opportunity to continue professional development in the scientific field as part of PhD theses. The agreement also covers research and development cooperation. In the first stage of contract implementation, 10 students of the University of Technology will hold a month-long professional practice or a six-month research and industrial internship at General Electric.

Professor Jan Cwajna from the Silesian University of Technology receives Henry Clifton Sorby Award

2018-06-28

Professor Jan Cwajna from the Faculty of Materials Science and Metallurgy of the Silesian University of Technology received the Henry Clifton Sorby Award granted by the International Metallographic Society. Professor Cwajna is a graduate of the Silesian University of Technology. He obtained his PhD degree and postdoctoral degree in material engineering at his alma mater in 1991, in 2002 he received the title of professor. His scientific achievements include 381 works (including 7 monographs and chapters in monographs, 80 scientific publications

in international journals, 58 publications in national magazines), 84 scientific and research works and 4 patents, including 1 in Europe. The Henry Clifton Sorby Award is awarded to people known in the international scientific community for a comprehensive contribution to broadly understood metallography and material engineering. The laureate delivers the main lecture during the annual meeting of the International Metallographic Society.

Conference Business and Innovation Network Gliwice @ 2018

2018-06-29

Silesian University of Technology invites participants to the conference BIN @ Gliwice 2018, which will take place on July 2 and 3 in Gliwice. The conference is a part of the Regional Contact Point of the Silesian University of Technology - Projektożery. The aim of the conference is to combine partners from various disciplines and industry sectors. Presentations and discussions will focus on current challenges and solutions in the field of science and technology, as well as on the cooperation of partners and the creation of consortia. The specific topics of the meeting are challenges of the circular economy in key industries; creative technologies - games, extended reality and BIM (Building Information Modeling) technology and Industry 4.0. BIN (Business and Innovation Network) is a network connecting the world of technology universities with the world of business, committed and supporting the creation of a lasting forum for exchanging good practices and innovation opportunities.

Rover from the Częstochowa University of Technology win the University Rover Challenge 2018.

2018-06-29

The Mars rover designed and built by students of the scientific circle of computer design of mechatronic devices and machines of the Częstochowa University of Technology won the University Rover Challenge 2018 competition. Over 500 students from 35 teams from around the world participated in the competition at Mars Desert Research Station in the US state Utah. The construction of Częstochowa students triumphed significantly and overtook the defenders of the title - Missouri University of Science & Technology team - by over 30 points. The third place was taken by the team of the Kielce University of Technology. The leader of the winning team of constructors is Piotr Ptak - a student of the Faculty of Mechanical Engineering and Computer Science, and the whole project is headed by Prof. Eng Dawid Cekus from Czestochowa University of Technology. More about the competition: <http://urc.marsociety.org/home/urc-news>

Katowice University of Economics scholar receives Springer Publisher Award

2018-06-29

Tomasz Wachowicz, Prof. of the University of Economics in Katowice received the second prize of the Springer Publishing House for the best publication as part of the Group Decision and Negotiation conference in 2018 in Nanjing, China. The publication deals with research errors and limitations when planning, organizing and analyzing the results of experimental research on bilateral negotiations, carried out in a multicultural context. The author draws attention to the necessity to take into account many factors determining the occurrence of cultural differences at various levels of generality, eg: national, organizational and group culture of student culture. The awarded article: «Some Methodological Considerations for the Organization and Analysis of Inter- and Intra-cultural Negotiation Experiments»

was created in co-authorship with Prof. Gregory Kersten from Concordia University Montreal and Dr Ewa Roszkowska from University of Białystok.

Nobel lecture at the conference on nanophotonics at the Wrocław University of Technology

2018-06-29

Nobel Prize winner - prof. William E. Moerner will give a lecture at the 11th International Conference on Nanophotonics ICNP2018. The beginning of the lecture is planned on July 2 at 9.00 in the building D-20 Wrocław University of Technology. The lecture «Nanophotonics Based on Individual Molecules and Light Gives Rise to 3D Super-Resolution Imaging and Beyond» will inaugurate the ICNP conference which will take place from 2 to 6 July at the Wrocław University of Technology. ICNP2018 will discuss the latest developments, ideas and solutions in the field of optics and photonics on the nano and micro scale. Professor William E. Moerner works at Stanford University. He deals with the spectroscopy of single molecules, tracking their motion and trapping them. He is one of the pioneers of the super-resolution microscopy which brought him together with Eric Betzig and Stephan Hell the 2014 Nobel Prize in chemistry. More: <http://www.icnp2018.pwr.edu.pl/conference/>

Professor Dudzińska becomes chairman of the International Society of Indoor Air Quality and Climate

2018-07-02

Vice-rector for science at the Lublin University of Technology, Professor Marzenna Dudzińska was elected the chairman of the International Society of Indoor Air Quality and Climate (ISIAQ) for the term 2018-2020. Officially she will take up her duties in Philadelphia on July 24, 2018 at the plenary meeting of ISIAQ. ISIAQ is an international, independent, multidisciplinary non-profit scientific organization whose aim is to support actions for the quality of the internal environment. It counts nearly 800 members

from over 50 countries including scientists involved in the study of indoor air quality, policy-makers setting standards and principles, doctors, construction and air conditioning engineers, architects, and lawyers specializing in the field of environmental protection. ISIAQ organizes, sponsors and supports initiatives such as conferences and seminars on indoor air quality, including the most well-known Indoor Air and Healthy Buildings.

„Science for You” competition is underway

2018-07-02

The „Science for You” competition is one of the projects implemented under the third pillar of the so-called Gowin’s strategy “Science for You” - the social responsibility of science. 1000 students and almost 150 teachers qualified for the first stage of the competition. By July 24, 2018, the tutors of 73 teams will take part in on-line seminars, during which they will learn how to apply the scientific method, create educational aids themselves and how to prepare a draft research project. The authors of the best outlines will take part in the Summer School of Prototyping, which will take place in the last week of August 2018 - informs the Ministry of Science and Higher Education. More: <https://naukadlaciebie.gov.pl/kategoria/nauka-dla-ciebie/>

Silesian University of Technology works for the protection of monuments from the UNESCO World Heritage list

2018-07-02

Silesian University of Technology started cooperation with the Association of Tarnogórska Land Lovers. The aim is primarily to protect and develop the monuments of Tarnogóra, which are on the UNESCO World Heritage List. The agreement signed at the Historic Silver Mine in Tarnowskie Góry is the first such agreement in Poland between the university and a non-governmental organization operating globally. The agreement provides for the exchange of experiences and obtaining grants and subsidies for investments. One of them will be the modernization of the Steam Engine Open Air Museum at the silver mine. Additional funds will also be used for conservation of buildings listed on the UNESCO World Heritage List. The signatories will prepare research and didactic projects, organize seminars and conferences, as well as cooperate in the implementation and dissemination of the results of scientific and research works as well as the organization of internships and apprenticeships.

Competition of flying and driving unmanned vehicles at the Gdańsk University of Technology

2018-07-02

Gdansk University of Technology invites participants to the competition of unmanned, autonomous flying and traveling vehicles Intelligent Autonomous Vehicles Cup 2018, which will take place on July 6 from 9:00 to 15:00 at the Academic Sports Center of the Gdańsk university. The plan includes three competitions: Drone Race, Marker Search and Free-style, in which the players will surprise viewers with their ingenuity. The competition is organized by the faculties of Electronics, Telecommunications and Information Technology, Electrotechnics and Automation and the SafeIDEA Scientific Circle. The event

precedes the conference IAV 2019, dedicated to smart autonomous vehicles. Owners of autonomous and remotely controlled vehicles can participate in the competition after registration via: eti.pg.edu.pl/safeidea/rejestracja.

Call for proposals in the Eurostars-2 competition starts

2018-07-03

Micro, small and medium enterprises that conduct business in Poland may submit applications in the 10th Eurostars-2 competition. The aim of the competition is to support international cooperation in research and development. The National Center for Research and Development emphasize, that there are no thematic restrictions in Eurostars-2. Projects must be market-oriented, that is, they should anticipate the development of a new product, process or service and must have a civil purpose. Partners in the competition outside the European Union are Canada, South Korea, South Africa and Turkey. Applications can be submitted by September 13, 2018. The recruitment of international applications takes place electronically at: <https://www.eurostars-eureka.eu/apply-funding>

Summer with the Warsaw University of Technology

2018-07-03

The Warsaw University of Technology Scientific Camp is a summer offer of a scientific and recreational nature addressed to primary school, middle and high school students interested in exact and technical sciences. The Warsaw University of Technology Scientific Camp 2018 will take place in Piękna Góra near Giżycko. As the University of Warsaw convinces, this is an ideal proposition for pupils who are considering studying at the Warsaw University of Technology or other technological universities. The goal of the Camp is to provide each participant with participation in 25-hour scientific workshops, conducted by research and teaching staff graduates and students of the Warsaw University of Technology. More: <https://klatrat.org/projekt/oboz-naukowy-pw-2018>

Researcher from the University of Wroclaw wins Polpharma Scientific Foundation competition

2018-07-03

Dr Aleksander Czogalla from the biotechnology department of the University of Wroclaw has been awarded within the Polpharma Scientific Foundation competition. A Wroclaw scientist obtained a grant of 510,000 PLN for the implementation of the research project «Designing, manufacturing and checking the effectiveness of new TP53 gene carriers for use in anticancer therapies». The theme of this year's competition was the development and optimization of processes in medical biotechnology. The participants were scientists with at least a PhD degree who proposed: optimization of existing drug manufacturing methods - or potential biotechnology drugs, creation of new, better expression systems, mathematical models of biotechnological processes enabling their optimization and control, devices or technical solutions that improve biotechnology processes.

Three IT jubilees at the University of Nicolaus Copernicus in Torun

2018-07-03

Outstanding Polish IT specialists participated in the fifteenth conference „Information Technology in Education” (IwE2018) at the Nicolaus Copernicus University in Toruń. The event was an opportunity to celebrate three jubilees: the 15th anniversary of IwE, the 70th anniversary of computer science in Poland and the 25th anniversary of the Information Olympics. Participants, scholars, university lecturers and institutions interested in improving the quality of IT education, listened to speeches given by eminent personalities of IT education. Lectures were delivered by: Prof. Włodzisław Duch, Prof. Krzysztof Diks, Prof. Jan Madey and Prof. Maciej M. Sysło. IT education is undergoing changes, which is why IwE is opening up to teachers and lecturers who want to consciously use methods and techniques derived from computer science to solve problems in the taught subjects: mathematics and natural sciences, humanities, artistic and early school education.

University of Silesia patents a new method for the preparation of polyether diols

2018-07-03

Researchers from the University of Silesia have developed a new method of obtaining polyether diols - products for the production of polyurethanes, commonly used in the footwear, automotive, furniture and construction industries. The solution has been patented. The new method is more efficient - polymers with increased molecular weight are created with lower energy consumption of the process and reduction of side reactions. The polyether diols obtained in this way find application as surfactants, moisturizing agents, lubricants and impact modifiers. The authors of the solution are scientists of the Faculty of mathematics, physics and chemistry Dr. Eng. Zbigniew Grobelny and Kinga Skrzeczyna, and Dr. Andrzej Swinarew, Dr. Justyna Jurek-Suliga and Jadwiga Gabor from the Faculty of computer science and science about materials.

PLN 100,000 support for video game authors

2018-07-04

Do you want to create a video game and need support for your idea? Apply to the ARP Games acceleration program. You can receive up to 100,000 for the implementation of the idea. As announced by the Polish Development Fund, the 4th ARP Games accelerator has been launched. This is an offer dedicated to teams, having an interesting and unique idea for the game, and at the same time people with high creativity. The initiative may involve teams of two or more people of any nationality who have the opportunity and willingness to set up a company in Poland. Applications are accepted until July 31, 2018. More: <https://www.startup.pfr.pl/pl/aktualnosci/ruszyla-4-edycja-akceleratora-arp-games>

Copernicus Science Center in Warsaw to hold Tesla Day

2018-07-04

The Copernicus Science Center in Warsaw invites participants on 8 July 2018 on Tesla Day, organized on the occasion of the birthday of Nikola Tesla, who patented more than 120 inventions as electric motor, bicycle dynamo, radio, hydroelectric power plant, fluorescent lamp or AC transformer. The event will be available to all visitors who buy a ticket to the Copernicus Science Center. In the program there are two performances within the «high voltage theater»: Thunder stormers - see the struggles of a man with the electricity and learn more about storms and musical currents - listen to Tesla transformers playing. More: <http://www.kopernik.org.pl/projekty-specjalne/lato/lato-2018/dzien-tesli-2018/>

Academy of Career Development at the University of Silesia

2018-07-04

The University of Silesia invites students to training as part of the Career Development Academy. The organizers of the workshops are the Career Office of the University of Silesia together with representatives of the cooperating companies - Capgemini Poland, VEO Worldwide Services, PwC SDC, WEM Consulting and Belbin Polska. Career Development Academy is a series of summer trainings for students and graduates of the University of Silesia. Classes will take place in July, August and September in the Student Activity Zone in the rectorate of the University of Katowice, at ul. Bankowa 12, room 133. The project is addressed to people who want to develop their skills and increase their chances on the labor market. Each participant will receive a certificate confirming participation in the workshop. The topics of the meetings will concern effective communication, assertiveness, team cooperation, time management, e-branding and coping with stress. More: www.bk.us.edu.pl

Passive exoskeleton wins a prize at the Inventions and Innovation Fair in Katowice

2018-07-04

A passive exoskeleton made in 3D printing technology to support the strength of weakened upper limbs in children - authored by researchers from Bydgoszcz, won three prizes at the 11th International Fair of Inventions and Innovation INTARG 2018 in Katowice. The joint project of the employees of the Collegium Medicum of the Nicolaus Copernicus University in Toruń and the Kazimierz Wielki University in Bydgoszcz won the Grand Prix in Katowice, the Platinum Award (together with the diploma of the Minister of Investment and Development) and the Special Award granted by the Croatian delegation. Exoskeleton is supposed to support muscle activity in children with the possibility of extending its application to adults. Thanks to the use of 3D printing, each exoskeleton is made individually, according to the dimensions of the future user based on 3D scans of its torso and upper limbs as part of a personalized therapy (patient-tailored therapy). More: <https://www.umk.pl/wiadomosci/?id=25533>

Opole University of Technology to hold a conference on the EU nitrates directive

2018-07-04

Agricultural engineering experts from academic centers and enterprises from Poland, Austria, Belgium, the Czech Republic, Finland, Lithuania, Slovakia, Sweden, Hungary and Great Britain participated in the international symposium at the Opole University of Technology. The organizer of the symposium «Nitrate Directive in Poland and what next ..?» was the Department of Biosystem Engineering of the Faculty of Production Engineering and Logistics at the Opole University of Technology, University of Life Sciences in Poznań and Research and Development Center in Twardawa. The Nitrates Directive is a European Union document recommending the reduction of water pollution by nitrates from agricultural activities. Conference participants discussed ways to maintain high yields without a large amount of nitrogen in fertilizers and costs associated with plant protection. Thanks to the participation of guests from countries where EU rules have been applied for years, Polish experts had the opportunity to learn many interesting solutions.

Students of the Silesian University of Technology win the Volkswagen BE THE BEST!

2018-07-04

Students of the Automation, Electronics and Computer Science Faculty of the Silesian University of Technology won the nationwide Volkswagen BE THE BEST competition. Marek Bonk and Antoni Zegartowski have developed an innovative design of the system of supervision over the removal of failures at the welding room along with the application for mobile devices. BE THE BEST! is a competition organized by Volkswagen Poznań. Participants individually or in two-person teams choose one of the proposed topics, described by professional departments as a case study and create their own project. The best works are rewarded and innovative ideas have the chance to be implemented in Volkswagen

factories. BE THE BEST! competition is an example of practical cooperation between science and business. The innovative projects developed by the students concern problems that the employees of the company deal with on a daily basis. It is an opportunity to confront theoretical knowledge with the real business situation.

Potential of the Polish space sector presented at the „A Polish DIAS for Europe” conference

2018-07-05

The representatives of the European Commission, the European Space Agency and other European institutions operating in the space sector met at the international conference „A Polish DIAS for Europe” organized by the Ministry of Science and Higher Education at the Copernicus Science Center in Warsaw. According to the Ministry of Science, the event was an opportunity to emphasize the importance of Copernicus Data and Information Access Services (DIAS) for Poland and the whole of Europe, and to present the potential of the Polish space sector in the processing and use of satellite data. One of the four winning consortia that run the DIAS platform is the joint-stock company Creotech Instruments. It is the fastest growing Polish company operating in the space sector. The contract signed by the company for running the DIAS platform, amounting to approximately 16 million euros, is the largest contract for the Polish institution under the EU programs in the space sector.

Discovery of archaeologists of the University of Warsaw on cultivated fields in El Salvador

2018-07-05

Research conducted by a team from the Center of Pre-Columbian Studies at the University of Warsaw under the supervision of Dr. Jan Szymański, carried out in the Central American town of San Isidro, proved that this area did not belong to the peripheries of the Mayan cultural civilizations”. Warsaw scientists have set up a research stand in a place

where sugar cane is currently being grown. Preliminary work allowed them to discover about 20 large remnants of ancient platforms or pyramids. A few thousand years ago, the constructions fulfilled sacred, administration and residential functions. Their discovery with the implementation of a precise altitude map of the fields was possible thanks to the use of drones. It may be the basis for changing the thesis of the area of western El Salvador as the peripheries of the cultural Mayan civilization.

Over EUR 27 million from the European Investment Bank for the Poznan University of Medical Sciences

2018-07-05

The European Investment Bank provided the Medical University of Poznan with a 27.3 million euro loan from the Juncker plan. The money will be used to build and equip the Medical Simulation Center. As part of the investment, a new facility of Collegium Pharmaceuticum will be built as well as the Center for Innovative Pharmaceutical Technologies. The funds will also allow the construction of the ophthalmology department and the Hospital Rescue Department. The vice-president of the EIB, Vazil Hudák, European Commissioner for health and food safety, Vytenis Andriukaitis and Minister of Investment and Development Jerzy Kwieciński, took part in the official signing of the agreement. Medical University of Poznan was represented by the rector of the university - Prof. Andrzej Tykarski. The transaction is guaranteed by the European Fund for Strategic Investments.

Professor Jacek Cichoń from Wrocław University of Technology is the most favorite lecturer of Wrocław students

2018-07-05

Professor Jacek Cichoń from the Wrocław University of Technology became a favorite lecturer of Wrocław students in the Academic Radio Luz competition. The „Cup for the Lecturer” competition was organized by the radio station for the sixth time. Lecturers from all universities in Wrocław could take part in it, with the exception of winners from previous years. Professor Cichoń received 3089 votes - this is the best result in the entire competition history. The second place was held by Dr. Zygmunt Domagała from the Medical University in Wrocław, gaining 2592 votes, and the third was Prof. Piotr Drożdżewski from the Faculty of Chemistry of the Technical University, with 1729 votes. - I am very happy with this award. Acquiring students' liking is a complex process, but the most important thing is probably the fact that students feel that I just like them - said prof. Cichoń during the broadcast on Radio Luz.

Collegium Civitas to launch media and digital education workshops

2018-07-06

The Modern Poland Foundation and the Warsaw Collegium Civitas College organize free workshops on media and digital education for secondary school students. The aim of the workshop is to develop the competence of young people in communication, cooperation, critical thinking and creative problem solving as well as innovative activities. Two-day classes will be held at the Collegium Civitas headquarters (Palace of Culture and Science in Warsaw) by university lecturers. The first day will be devoted to particular areas of media and digital competencies as using information, relationships in the media environment, media language, network security, copyright and media law and economic aspects of media operations. On the second day, the workshops will focus on the legal and economic aspects

of the functioning of the media. Applications for the workshops will be accepted until August 1, 2018. More: <http://edukacjamedialna.edu.pl/info/warsztaty/>

European Center of Aviation Simulators located near Rzeszów

2018-07-06

The Polish Agency for Enterprise Development has signed a contract with a consortium of four companies to co-finance the project „European Center of Aviation Simulators”, which will be implemented in the Podkarpackie Science and Technology Park „Aeropolis” in Jasionka near Rzeszów. Its goal is to launch the «Royal Fly» brand providing the flight simulator services for education, training and entertainment purposes. They will be the first services in the world that combine the use of technologically advanced flight simulators, professional aviation training on real aircraft and aviation events for the aviation enthusiasts. The Polish Agency for Enterprise Development co-financed the project with an amount of almost PLN 10.5 million.

Professor Andrzej Górak receives the Order of Merit of North Rhine-Westphalia

2018-07-06

Professor Andrzej Górak from the Faculty of Process Engineering and Environmental Protection of the Lodz University of Technology received the Order of Merit of North Rhine-Westphalia. For a quarter of a century the professor has been involved in the organization of cooperation between scientific organizations in the Land of North Rhine-Westphalia and Poland. Professor Andrzej Górak is a well-known and respected scientist in the field of chemical engineering, as well as a propagator of Polish science and an enthusiast of the idea of international cooperation. He is particularly involved in the Polish-German cooperation of scientific institutions and industrial organizations.

Bydgoszcz scientists win gold medals at INTARG 2018

2018-07-06

Teams from the University of Casimir the Great in Bydgoszcz received two gold medals at the INTARG 2018 fair in Katowice. Prof. Marek Macko University of Bydgoszcz and MA Zbigniew Szczepański were awarded for the development of light-cured dental implants. Prof. of Bydgoszcz Univrsity Joanna Paciorek-Sadowska, Eng. Marcin Borowicz, Prof. Eng. Bogusław Czupryński, Dr Eng Joanna Liszkowska, Eng. Ewa Tomaszewska received a gold medal for the development of pro-ecological industrial technology for waste management of polylactic acid as an alternative polyol raw material for the production of polyurethanes for the construction industry. The INTARG fair has an interdisciplinary character - it presents a wide range of novelties in the area of ecology, medicine or IT, as well as new solutions for various industries and everyday objects.

Student of the Wrocław University of Technology creates an apartment management application

2018-07-06

A student of the Wrocław University of Technology created an application that will settle bills in a simple way and allow the users to control their home budget. It can be used not only by owners and managers of apartments, but also by tenants. The creator of the application, Paweł Abramowicz, emphasizes that Naym is to a certain extent the result of his own experiences, because during his studies he happened to live with six roommates. The application allows the users to settle bills in a simple way, develop a residential budget with automatic calculation of receivables for each tenant and remind about the approaching payment date by e-mail or SMS. The Naym will also help owners and managers of apartments in precise calculation of monthly fees, including rent, electricity and water. The user only fulfills the charts, and the application will calculate the receivables itself and additionally send an e-mail or SMS to all tenants with the exact amount. More: <http://pwr.edu.pl/uczelnia/aktualnosci/naym-aplikacja--ktora-pomoze-zarzadzac-mieszkaniami> 10917.html

University of Silesia invites to „breakfast on grass”

2018-07-06

The University of Silesia in Katowice invites participants on Saturday, July 7 from 10.00 to 16.00 to the Rosarium of the Silesian Park for „Breakfast on the grass with the University of Silesia”. The guests will be able to use the Mobile Recruitment Point, solve the „Focus” quiz and sign up for studies. For kids, classes will be organized in the Children's Zone, pupils can participate in a lecture entitled «The Secret Life of Trees» prepared by Prof. Piotr Skubała from the Faculty of Biology and Environmental Protection. The program also includes games, exercises and sports shows run by the Academic Sports Association of the University of Silesia. The event guests will take part in a show of Chinese tea ceremony

combined with a tasting it. At the end, a lecture on Chinese language and customs prevailing in China is planned and within the interactive part the visitors will be able to learn some basic phrases and write selected Chinese characters.

Graduate of the Silesian University of Technology becomes a laureate of the Siemens Award

2018-07-09

Paweł Mync, a graduate of the mechanical engineering department of the Silesian University of Technology won the second prize of the 8th Siemens Award Competition for graduates of automation and robotics. The young engineer was awarded for his master's thesis „Application of an expert system for diagnosing a selected automation system”. The matter discussed in the diploma thesis refers to the need to apply new methodologies and measures enabling practical implementation of Industry 4.0 concept. The solution proposed at work is an innovative and practical approach to the construction of diagnostic expert systems operating in the cloud computing. In this year's competition, 26 diploma theses were submitted, which in the opinion of the jury members presented a very high and even level. The works were evaluated in terms of the innovativeness of the idea, the practical application possibilities, the scientific level and the quality of the work.

Researchers at the Wrocław University of Economics at the Climate Reality Project conference

2018-07-09

Representatives of the Wrocław University of Economics participated in an international conference organized by The Climate Reality Project in Berlin. The purpose of the meeting was to draw attention to the problem of global warming and its economic, environmental and social consequences. Professor Bożena Ryszawska and Prof. Piotr Szymański had the opportunity to meet with the founder of the or-

ganization - former US vice president and laureate of the Nobel Peace Prize Al Gore. They also received the «The Climate Reality Leadership Corps» certificates. The Wrocław University is the first Polish partner of The Climate Reality Project. It participates in “100 percent. Committed”, one of the flagship projects of the organization related to the transition to renewable energy on campus. These activities are in line with the Paris agreement, where global leaders have committed themselves to reducing carbon emissions, developing renewable energy and a green economy.

University of Gdańsk to cooperate with Chinese Nanyang Normal University

2018-07-09

The University of Gdańsk signed an agreement with the Chinese Nanyang Normal University. The document regulates the issues of academic cooperation in the field of exchange of academic staff, students, employees as well as joint research and publications. The contract was signed by the Vice-Rector for Science and Cooperation with Foreign Prof. Piotr Stepnowski and vice-rector of Nanyang Normal University Prof. Kan Yunchao. The future cooperation between the two universities will focus on engaging PhD students in innovative research in both institutions. Nanyang Normal University is a university founded in 1907, which is in the top 10 universities in Henan province of China. It has 24 research institutes and 26 laboratories.

International conference on the use of polymeric materials in medicine in Krakow

2018-07-10

The Polish Society of Biomaterials in cooperation with the International Society for Biomedical Polymers and Polymeric Biomaterials and the Faculty of Materials Science and Ceramics at the AGH University of Science and Technology in Krakow organizes on 15-18 July 2018 an international conference dedicated to biomedical polymers and polymeric biomaterials. The event will cover issues related to polymeric materials for medical purposes - methods of obtaining innovative polymer implant materials, their characteristics, research of cell and tissue reactions, analysis of experimental and clinical results to examples of applications. It will be a multidisciplinary conference, on material engineering, chemistry, biotechnology, biology and medicine. More: <https://isbpb2018.org/>

Students of the Lodz University of Technology win international competition for the project of a home wind turbine

2018-07-10

GUST - a team of students from the Lodz University of Technology won the international competition International Small Wind Turbine Contest 2018 organized by the NHL University of Applied Sciences in the Dutch Leeuwarden. Ten teams from around the world took part in this year's competition for the home wind turbine. GUST (Generative Urban Small Turbine) is a student project launched in October 2015 and operating within the Students' Scientific Circle of Power Engineers at the Institute of Fluid-Flow Machinery at the Polytechnic. During the competition in the Netherlands, the team from the Technical University of Lodz for the first time presented two turbines - one with a horizontal axis and the other with a vertical axis of rotation. Students of the Lodz University of Technology received a grant from the Ministry of Science and Higher Education for the project in the competition Najlepsi z najlepszych! 2.0.

Gdańsk students succeed in the National Competition of Physiological Knowledge

2018-07-10

Małgorzata Styczevska, student at the Medical University of Gdańsk, won the individual competition of the National Great Synapsis Knowledge Contest in Poznań. The competition organized under the patronage of the Polish Physiological Society was attended by 57 students from the 9th medical schools. In the first part of the competition, participants solved the test of choice. After the selection of 12 finalists, the second test part was held, with the increased difficulty of questions. Representatives of the Gdańsk university, Małgorzata Styczevska, Mikołaj Młyński, and Izabela Kotlewska, took the third place in the competition of teams. The competition involved 9 student teams. The participants had to solve clinical problems during simulation scenarios with the use of practical skills and physiological knowledge. After a fierce battle, the students from Poznań won against the team from Katowice.

Professor Wojciech Polak becomes chairman of the Council of the Institute of National Remembrance

2018-07-10

Professor Wojciech Polak from the Faculty of Political Science and International Studies at the Nicolaus Copernicus University in Toruń was elected the chairman of the Council of the Institute of National Remembrance. The Council is an advisory and consultative body of the President of the Institute. In particular, it adopts annual activity reports, expresses opinions about the candidates for management positions presented by the president, gives opinions and recommends directions of activity and research programs, approves the rules for recording, storing, developing, securing, sharing and publishing documents. Professor Polak is a historian. He deals with the latest history of Poland, the history of «Solidarity», state-church relations in the PRL and Polish-Russian relations. He is the author of 25 books and many articles, an editor of numerous collective

works and a publisher of historical sources. He is a head of the Department of Political Conflicts at the Faculty of Political Science and International Studies at the University of Toruń.

Inventions of the University of Technology and Life Sciences in Bydgoszcz awarded in Třinec

2018-07-10

Two inventions of the University of Technology and Life Sciences in Bydgoszcz received gold medals at the INVENT ARENA 2018 Exhibition of Technical Innovation of Patents and Inventions in the Czech city of Třinec. The department of technology and chemical engineering and the department of mechanical engineering of the University of Technology and Life Sciences presented their works and innovations. The first awarded invention is: «The design of the valve for emptying the tank from granular materials for a vibrating apparatus with a propeller-screw drive system» by Dr Eng Marek Domoradzki, Dr Eng Wojciech Poćwiardowski and Eng Joanna Szulc. The second gold medal was received by Dr MS Stanisław Jung, MSc. Marek Andryszczyk and Eng. Marcin Głowacki for «Device for the rehabilitation of the radial-wrist joint».

Summer of Polish diaspora in Lublin

2018-07-11

On July 11, 2018, the inauguration of the next Year of the Polish Community will take place. The event is organized by the Center for Polish Language and Culture for Polish Diaspora and Foreigners of the Maria Curie-Skłodowska University in Lublin. Summer of Polish diaspora includes a variety of Polish language and culture courses for Poles and foreigners, which traditionally take place in the Lublin university each year in July. This year's summer will be attended by a total of 150 participants who will improve their Polish language, will learn about Polish history and culture - says Katarzyna Skąlecka from the press office of the Maria Curie Skłodowska University. As part of the Summer of the Polish diaspora, the Summer School of Polish Language and Culture 2018 will be held. The course is co-financed by the National Academic Exchange Agency. 79 people from 29 countries will come to Lublin to take part in the event.

Skeletal bones from 6,500 years ago digitized at the Cardinal Stefan Wyszyński University

2018-07-11

Center of Information Technology of Humanities and Social Sciences of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw digitized 63 bones of the Man from Janisławice. The Man from Janisławice is the oldest human skeleton found in Poland. It was discovered in 1937 in Janisławice in the Lodz region and it counts, according to the latest data, over 6,500 years. The work was carried out by UKSW and company 3D Master. As the Warsaw University reports, photogrammetry and 3D scanning with structural light were used in the works. The first stage consisted in creating complete 3D models of bones allowing not only to visualize them, but also to perform basic measurements and tests. As part of further work, it is planned to print 3D bones and process them further to create realistic copies. It is a joint project of the State Archaeological Museum,

Cardinal Stefan Wyszyński University in Warsaw and 3D Master company.

Dr Łucja Bieleninik from the University of Gdańsk received Polish Academy of Sciences Award

2018-07-11

Dr. Łucja Bieleninik from the Clinical Psychology and Neuropsychology Department of the Institute of Psychology of the University of Gdańsk received the Andrzej Malewski Polish Academy of Sciences Award. The award is granted to young scientists (aged up to 35 years) for outstanding scientific achievements in the field of psychological theory, psychological research, methodology of social sciences and interdisciplinary research (one of the disciplines should be psychology). This year it was awarded for the 14th time. Dr Bieleninik is the second person from the Institute of Psychology at the Gdańsk University, who received this prestigious award. In 2015, the prize was awarded to Prof. Michał Harciarek also from the clinical psychology and neuropsychology department of the University of Gdańsk.

Gdańsk University of Technology becomes a partner of the International Fair for Young Innovators

2018-07-11

The Europe's largest exhibition for Young Innovators Expo Sciences Europe (ESE), organized for over 20 years, will be held for the first time in Poland. The host of ESE from July 16 to 22 will be Gdynia. The partner of the event is Gdańsk University of Technology. 339 participants from 29 countries from around the world applied for participation in the fair. They will be able to see 135 innovative projects. Poland will be represented by the finalists of the Scientific E(x)plory, who were selected during last year's event finale - Gdynia E(x)plory of the Week 2017. ESE are organized every two years since 1996. The main organizer of the fair is the non-governmental non-profit organization MILSET-International

Movement for Leisure Activities in Science and Technology, whose aim is to develop scientific culture and promote innovation among young people. Until now, the hosts of ESE were Czech Republic, Portugal, France, Belgium, Russia, Spain, Slovakia, Germany and Hungary. More: www.ese2018.milset.org

Szczecin students in the final of The Trial by Vinci Construction contest

2018-07-11

Students of the West Pomeranian University of Technology performed well in the final of The Trial by Vinci Construction- competition. The aim was to prepare a conceptual design in the categories Constructions of the future, Sustainable construction and Cities above and below cities. The team prepared a project entitled «Floating Garden Poland» referring directly to the conditions of Szczecin, where more than a half of the area are reservoirs and green areas. Students proposed solutions based on the 4R principle: the use of old sea containers (Reuse) for the implementation of small residential units with a high energy standards (Reduce); their energy supply using renewable energy sources (Renewable) - photovoltaic panels and a heat pump using water-ice phase transformation - limiting the negative impact on the environment. The treatment of water in a small wastewater treatment plant (Recycle) was also planned.

„Academic Forum” Competition for young scientists

2018-07-12

The editors of the monthly journal „Academic Forum” announced the 14th competition for the popular science article „Complicated and simple. Young scholars about their research „. The competition was supported by the Minister of Science and Higher Education. The competition can be attended by people who are under 35 years of age: researchers of universities and research institutes, and PhD students. The science articles should promote in an accessible way participants’ own scientific research or research in which they took part. The competition will accept texts in Polish with 10-12 thousand characters. Interested students are requested to submit their articles by 11 September 2018 with the note «Competition» to the following address: Forum Akademickie, ul. Zana 38, 20-601 Lublin, room 407 See the competition rules: <https://forumakademickie.pl/wp-content/uploads/2018/06/Regulamin-XIV-Konkursu-Skomplikowane-i-proste.-M%C5%82odzi-uczni-o-swoich-badaniach.docx>

Polish prime minister awards scholars for scientific achievements

2018-07-12

The President of the Council of Ministers awarded 50 prizes for scientific, technical, artistic, post-PhD and PhD dissertations for 2017. Prime Minister’s prizes were established on the initiative of the Polish Academy of Sciences in 1994. They are awarded for scientific or artistic achievements, including outstanding academic, artistic or highly-rated achievements being the basis for holding the PhD or post-PhD titles, outstanding PhD dissertations and other scientific and technical achievements. This year’s winners are Prof. Agnieszka Słowik and Prof. Tadeusz J. Popiela from the Collegium Medicum of the Jagiellonian University in Krakow, who received the first prize in the category of scientific and technical achievements for the „Małopolska program for the treatment of acute ischemic stroke with mechanical

thrombectomy coordinated by the University Center for the Treatment of acute ischemic stroke - CITO”. In the category of scientific achievements, Prof. Ewa Górecka was awarded for outstanding scientific achievements in the field of chemistry and physics of liquid crystals, in particular for pioneering contributions to research on the structure and properties of liquid crystal materials. The full list of the winners: <http://bip.kprm.gov.pl/download/75/34943/ListpracwywozoneProzzaPresidentRadyMinistroww2018r.docx>

Polish research and development units implementing a cybersecurity project

2018-07-12

The Institute of Communications, Scientific and Academic Computer Network of the National Research Institute and the Institute of Innovative Technologies EMAG have started joint implementation of the cybersecurity project - KSO3C. The result of the work will be the creation of an organizational structure and the development of uniform methods for assessing and certifying the security of ICT products and services. The KSO3C project, or «National Scheme of Assessment and Certification of Security and Privacy of IT Products and Systems Compliant with Common Criteria», is co-financed by the National Center for Research and Development.

Graduates of the Silesian University of Technology win in the competition The Best Progress 3 Master Thesis Award 2017

2018-07-12

Graduates of the Silesian University of Technology have won in four of five categories of the competition for the best master thesis „The Best Progress 3 Master Thesis Award 2017”, organized as part of the Progress 3 consortium. Only in the category of economics and finance the graduate of the Silesian University of Opava - Nicola Rusková won the

first place. The first places in other categories were taken by the graduates of the Silesian University of Technology. Jakub Bodys won in the category of raw materials, energy and environmental protection. Kamila Dydlińska won in the category of health and applications in healthcare. In the category of information technologies and electrical engineering Krzysztof Kubiczek was a winner. The category of competitiveness of the machine industry and materials research was won by Paulina Cieśla. The Progres 3 consortium includes fifteen universities from three countries - Poland, the Czech Republic and Slovakia. Each of the consortium’s universities could submit up to two entries to the competition in each of the five thematic categories.

Academy of Land Forces in Wroclaw at the International Military Academic Forum

2018-07-12

The delegation of the Academy of Land Forces participated in the International Military Academic Forum (iMAF). The purpose of the meeting was to develop new training modules that will be implemented by European military universities in the future. During the Forum organized by the National University of Public Service in Budapest the Academy representatives also worked on solutions in the education systems for candidates for officers, in order to make them even more qualified. Representatives of the Academy met with the delegation from the American Virginia Military Institute. The cooperation between universities, in particular the exchange of cadets and academic staff, was discussed. Universities will soon sign cooperation agreements. IMAF is a platform for teaching and training cooperation between military universities in European Union countries organized under the auspices of the Implementation Group.

Award for the Naval Academy in Gdynia for the port security system

2018-07-12

The Naval Academy in Gdynia won the Amber Medallion in the Admiral Xawery Czernicki Grand Prix Competition. The award was granted for the Ports Protection, Passive Defense and Underwater Reconnaissance Module. The strategic object protection system is an advanced, technologically integrated system of controlling the changes of physical field parameters in the underwater marine environment. It is equipped with detectors enabling measurement of physical features of the watercraft: hydroacoustic, electric, seismic parameters. It enables detecting and analyzing parameters of physical field for passive defense of ships, mine wars, port security and monitoring of maritime communication routes, which is of particular importance in the case of asymmetric threats. It can be used to protect ports and objects of strategic importance - fuel bases, re-loading terminals, drilling rigs and water dams.

Scholars of the Katowice University of Economics participate at a scientific conference in Copenhagen

2018-07-12

Prof. Aleksandra Burgiel and Dr Jolanta Zralek from the University of Economics in Katowice took part in an international scientific conference in Copenhagen. They presented the results of their research on the sustainable behavior of Polish consumers. The ladies have delivered the presentation of «Sustainable consumption perception matrix», they also presented the poster «Non-ownership & collaborative consumption as a sustainable alternative for consumerism lifestyles in Poland». The conference «Sustainable Consumption: Fostering Good Practices and Confronting the Challenges of the 21st Century» was organized by the Sustainable Consumption Research and Action Initiative in cooperation with Copenhagen Business School. It was attended by over 200 academic researchers and practitioners.

Researcher of the Maria Curie Skłodowska University wins Grand Prix of the International Print Triennial

2018-07-13

Karol Pomykała, assistant at the Department of Convex Print at the Faculty of Arts of the Maria Curie Skłodowska University in Lublin, received the Grand Prix of the International Print Triennial 2018 in Krakow for the work „One Direction”. Thanks to VR glasses, the viewer moves completely into the middle of the crowd, disappearing in it and becoming part of the installation. This allows the recipient to feel almost tangibly overwhelmed and the helplessness of the individual. The installation is a combination of traditional graphics made in linocut technology with contemporary technology represented by virtual reality. It is a collision of the current with the virtual reality, the transfer of two-dimensional, analogue graphics to the three-dimensional world generated by computers. It aims to encourage the viewer to enter the created world and intensify their reception.

Ten medals for scientists at the Wrocław University of Technology at the exhibition of inventions and innovations

2018-07-13

Scientists from the Wrocław University of Technology have won 10 medals at the International Fair of Inventions and Innovation INTARG 2018 in Katowice. The gold medals were awarded for «New antistatic agents obtained from vegetable natural resources»; «New natural surfactants - safe and effective wood preservatives»; «Ionic liquids with a pharmacological component: the direction to obtain new bioproducts»; «The use of resonance in impact machines» and «Core drill for drilling in concrete» works. Silver medals were received for inventions: «A mobile platform for a device to study the morphology of flat surfaces, especially concrete ones.» And “Natural antioxidant compounds produced from medicinal plants”. The bronze medals were awarded for the projects: «Non-contact quality

control of plates in motion using ultrasonic Lamba waves», «Innovative hydraulic bumper» and «Agent for making epoxy resin coatings and its application».

Students of the Warsaw School of Economics to participate in the finals of the Enactus competition in the USA

2018-07-16

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin met with students of the Warsaw School of Economics, who won the Polish Enactus competition and represent Poland in the final of this competition in the USA. - Our goal is to make Polish science, our research achievements and finally - Polish scientists more visible on the international arena. We are extremely pleased that at the beginning of their scientific path, our students take part in prestigious international competitions. I keep my fingers crossed for the Polish team – said Deputy Prime Minister Jarosław Gowin during the meeting. Enactus operates in 36 countries around the world (at 14 universities in Poland) and gathers over 700,000. members from nearly 1,700 universities. University teams participating in the competition are tasked with implementing educational and business projects within the framework of socially responsible business (CSR), addressed to local communities.

University of Silesia to hold „business breakfast” devoted to modeling and 3D printing

2018-07-16

The Office for Cooperation with the Economy of the University of Silesia invites participants on Tuesday, July 17 at 9.30 for a „business breakfast” devoted to the scanning, modeling and 3D printing. The meeting will take place in the rectorate of the University of Katowice (second floor, room No. 159). The meeting is addressed to the academic community, primarily to people whose research topic is associated with modeling and 3D printing. The organizers are representatives of ScanTech companies from Katowice and CADXPRT from Krakow specializing in the field of scanning and 3D printing. The meeting is organized as part of the Incubator Innovation + project, which is to support the process of managing the results of scientific research and development works, in particular in the commercialization (non-competitive project of the Ministry of Science and Higher Education „Support for research management and commercialization of R & D results in scientific units and enterprises”).

University Natural Center is open all summer

2018-07-17

The University Center of Natural Sciences will be open all summer on the campus of the University of Białystok. The visitors can visit it from Monday to Friday between 9.00-15.00 and on Saturdays, from 9.00 to 14.00. Admission is free - informs Katarzyna Dziejdzik, a spokesman of the University of Białystok. The facility consists of 9 exhibition halls and 10 permanent exhibitions. The largest exhibition room is dedicated to the nature of north-eastern Poland. Visitors can see bisons, moose, deer, as well as wolves, badgers, raccoons, beavers and many species of birds. In addition, thanks to special infospots, visitors can learn to recognize 220 species of Polish birds and their voices. In the next rooms, guests can see fossils of post-glacial sediments, minerals and rocks as well as exhibitions presenting protected and characteristic plants of the Podlasie Region, the fauna of subtropical seas, tropical arthropods and the wildlife of polar regions.

Student rocket of the AGH University of Science and Technology in Krakow ranked second in the US competition

2018-07-17

The „Turbulence” rocket created by students of the AGH University of Science and Technology in Kraków took second place in the IREC rocket competition in the USA in the category of liquid-fueled and reaching the level of over 9 km rockets. Team AGH Space Systems is the first and only team from Poland so far, which took part in the prestigious Spaceport America Cup 2018 competition - informs Anna Żmuda-Muszyńska, AGH spokesman. The competition was attended by 132 teams from around the world that competed in six categories. Each team was evaluated in terms of technical documentation, quality of the final design, flight and recovery of the rocket, the amount of own hand-made and designed elements and the overall assessment of the team professionalism. Taking into account all characteristics, „Turbulence” won second place in its category.

KITS Opening Innovations in Krakow

2018-07-17

Foundation Kraków Miastem Startupów, Marshal's Office of the Małopolska Region and the Swiss bank UBS invite participants to the Krakow City Hall on 20 July, where KITS Opening Innovations will take place. This initiative is to help introduce new technologies developed at Kraków's universities into the business world. The meeting is addressed both to large business - enterprises that have the ability to absorb innovative technologies in practice as well as to small and medium-sized companies or start-ups. During the event, lectures, discussion panels and a series of individual meetings will be held to establish new direct business contacts. More: <https://www.facebook.com/events/1844847399150924/>

Geological Polar Expedition of AGH University of Science and Technology

2018-07-18

The Geological Polar Expedition of the AGH University of Science and Technology (AGH) from Krakow will conduct geological research of the Arctic, staying on Spitsbergen until August 24, 2018. The expedition was organized under the direction of Dr Eng Maciej Manecki and Dr. Eng. Jarosław Majka from the Department of Mineralogy, Petrography and Geochemistry of the Faculty of Geology, Geophysics and Environmental Protection of the AGH. The researchers will focus on isotopic dating and on petrological, geochemical and structural studies of rocks, which constitute the oldest crystal substrate of the Svalbard archipelago. This research will allow a gradual reconstruction of the geological history and tectonic evolution of the entire Arctic for 1.5 billion years. Research conducted this year in the Arctic is partially financed under the «Opus» project of the National Science Center and two «Arctic Field Grant» projects funded by the Research Council of Norway.

Scientists of the Wrocław University of Technology become Innovation Leaders

2018-07-18

The researchers of the Wrocław University of Technology received the titles of the Innovation Leaders in the competition under the honorary patronage of Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. The prizes were awarded for special merits in the inventiveness. Dr Joanna Feder-Kubis from the chemical department won in the category of «Female Inventor». She was awarded for her scientific activity of significant importance not only for the development of science, but also for an innovative economy, for participation in numerous Polish and European patents and patent applications, as well as many awards received both in the country and internationally. In the „Technology” category, the jury appreciated Prof. Wiesław Fiebig from the Faculty of Mechan-

ical Engineering for „The use of mechanical resonance to drive impact machines”. The invention was awarded with numerous international medals and distinctions, contributing to the reduction of energy consumption in the propulsion systems of such machines.

Nearly PLN 15 million from the National Science Center for scholarships for PhD students

2018-07-19

The National Science Center (NCN) will allocate nearly PLN 15 million for PhD students who start their research. The result of the ETIUDA provided funding for 147 scientists from 335 applicants. As part of the ETIUDA program, PhD students will receive 4.5 thousand PLN monthly. In addition, the internship holders can run their research at a foreign research center of their choice. To cover the costs associated with a stay abroad, they receive additional 9,000. PLN monthly. As emphasized Prof. Zbigniew Błocki, director of NCN, increasing the mobility of scientists was one of the priorities from the very beginning of the National Center for Science, and the ETIUDA competition activates the younger generation of researchers. More: <https://www.ncn.gov.pl/konkursy/wyniki/2018-07-17-etiuda6>

Recruitment of Polish language teachers to foreign academic centers

2018-07-19

The National Academic Exchange Agency (NAWA) has announced a complementary recruitment of Polish language teachers to foreign academic centers in India, Kyrgyzstan, Moldova, Mongolia and Russia. Applications can be submitted until July 31, 2018. As NAWA informs, the task of lecturers will be to teach and promote Polish language and Polish culture abroad by conducting language courses and classes related to the dissemination of knowledge about Poland within the cooperation with Polish diplomatic missions and cultural institutions. The duties of scholarship holders of the National Aca-

dem Exchange Agency will also include participation in the annual conference for lecturers addressed to foreign academic centers and participation in the evaluation of the program. More: <https://nawa.gov.pl/jezyk-polski/program-lektorzy/ogloszenie#ogloszenie-o-naborze-nr-14-2018-z-dnia-16-07-2018-ii-nabor>

Researchers from the Jagiellonian University awarded by the American Association of Clinical Anatomists

2018-07-19

Dr Przemysław Pękala and Dr Brandon Michael Henry from the Department of Anatomy of the Jagiellonian University Collegium Medicum received awards from the American Association of Clinical Anatomists - AACA. It is the largest and most prestigious association of scientists in the field of anatomy around the world. Dr. Przemysław Pękala received the award for the best science poster (Biomechanics behind the age-related changes in the Anatomy of the Achilles Tendon), and Dr. Brandon Michael Henry for the best anatomical publication (Consensus guidelines for the flat reporting of study ethics in anatomical research within the framework of the anatomical quality assurance (AQUA) checklist). The winning works were created in the Department of Anatomy of the Jagiellonian University Collegium Medicum under the supervision of Prof. Jerzy Walocha and Dr Krzysztof Tomaszewski.

Double prize for a scientist at the Medical University of Gdańsk

2018-07-19

Professor Michał J. Markuszewski, head of the Department of Biopharmacy and Pharmacodynamics of the Medical University of Gdańsk, was awarded with the Medal of Professor Andrzej Waksmundzki and the Medal of Merit in favor of Polish Analytical Chemistry by the Committee of Analytical Chemistry of the Polish Academy of Sciences. Medal of prof. Waksmundzki is an honorary award for significant scientific achievements in the field of chromatography and related techniques. Professor Waksmundzki (1910-1998) was an outstanding specialist in chromatographic research. He was also a recognized teacher and author of textbooks and scripts on chromatography. Medal of Merit in favor of Polish Analytical Chemistry is an expression of recognition for the contribution to the popularization of analytical chemistry, including the organization of «24th International Symposium on Electro and Liquid Phase Separation Techniques» and the XI Polish Chromatographic Conference in Sopot in 2017.

Dr hab. Aneta Hanc-Kuczkowska becomes president of the Polish Society for Mössbauer Spectroscopy

2018-07-19

Dr Aneta Hanc-Kuczkowska from the Institute of Materials Science at the University of Silesia was elected the president of the Polish Society for Mössbauer Spectroscopy (PTSM). Dr Aneta Hanc-Kuczkowska, researcher from the University of Silesia was elected during the PTSM meeting summoned during the XII National Seminar of Mössbauer Spectroscopy. Dr Hanc-Kuczkowska was previously vice-president of the Society. Now she replaced Prof. Eng. Krzysztof Ruebenbauer. The Board's term lasts four years and the members of the authorities perform their functions in an honorary way and do not receive any remuneration. The Polish Society for Mössbauer Spectroscopy supports and develops scientific, technical, didactic and popularizing activi-

ties related to the Mössbauer spectroscopy method. Its purpose is also to support basic and applied research using this method.

Polish scientific session at the Arctic Circle Assembly

2018-07-20

The prestigious Arctic Circle Assembly will take place in Reykjavik on October 19-21 2018. One of the sessions, entitled Biotic indicators of the Arctic environmental changes, will be organized by members of the Polish Polar Consortium. According to the Ministry of Science and Higher Education, the Polish session was selected from among 100 applications and was rated the highest by the Scientific Council. It will be devoted to «new phenomena of adaptation and expansion of plants and shrubs as a result of the ice sheet passing and warming of the climate in polar areas». The Arctic Circle Assembly is an annual forum for the presentation of achievements, plans and the promotion of scientific, economic and educational activities in the Arctic by individual countries and international organizations. Over 2 thousand participants take part in the conference including representatives of the world of science, politics and business from over 60 countries.

Poland is a member of the European Molecular Biology Laboratory

2018-07-20

President Andrzej Duda signed the ratification documents establishing the European Molecular Biology Laboratory (EMBL). In 2017, the Council of the European Molecular Biology Laboratory accepted the presentation of Poland and unanimously approved its application for membership. EMBL (European Molecular Biology Laboratory) was founded in 1974 and is one of the leading research centers in Europe that conducts specialized research and training. Since 1997, it has the right to award own PhD degrees. The aim of EMBL is to conduct scientific research in the field of molecular biology, including work on a new technological solutions. Membership in the organization creates opportunities for establishing the EMBL laboratory in Poland. It would be

the first laboratory in Central and Eastern Europe. EMBL currently includes 24 European countries and two associated countries: Australia and Argentina.

Car of the Wrocław University of Technology comes third in the Student Formula competition in Italy

2018-07-20

The PWR Racing Team car took the third place in the general classification of the competition at Riccardo Paletti in the Italian Varano. The designers from the Wrocław University of Technology did not manage to repeat the victory from last year - informs Michał Ciepielski from the Information and Promotion Department at the Wrocław University. The German team of the Erlangen-Nuremberg University took the second place, and young constructors from the Austrian Technical University in Graz won the competition. Wrocław University of Technology will have two more starts this season - in the Czech Republic (July 31-August 4) and Germany (August 6-12). Formula Student is an international engineering competition for student teams from around the world. The competitors must design a car, construct it and achieve the best results on the track, as well as present the business concept of its vehicle.

PhD student at the Opole University of Technology wins the competition for an innovative solution in the field of energy

2018-07-20

Dawid Piwowarski from the Faculty of Mechanical Engineering at the Opole University of Technology won the Warm up Your Business with ECO & PNT contest for an innovative solution in the field of energy. The winning idea - «Analysis of heating systems using unmanned aerial vehicles equipped with a thermal imaging camera», i.e. diagnostics using a drone - defeated projects from all over Poland in the final and was rewarded with PLN 10,000 prize. The competition was organized jointly by the Opole University of Technology, the Opole Science and Technology Park and the Incubators site pl. More: <https://warmupbiznes.pl/>

Warsaw Stock Exchange is a partner of the Institute for Market, Consumption and Business Cycles Research in a scientific project

2018-07-23

The Warsaw Stock Exchange has signed a partnership agreement with the Institute for Market, Consumption and Business Cycles Research - the National Research Institute on the scientific project „Algorithmic system of quantitative and qualitative characteristics evaluation of the issuer of capital market instruments”. The Ministry of Science and Higher Education has allocated almost PLN 1 million under the «DIALOG» program for the project implemented by the Institute for Market, Consumption and Business Cycles Research. Under the agreement, the Warsaw Stock Exchange will disseminate the research results achieved as a result of its educational activities. The aim of the project is to open the science to the labor market, improve the effectiveness of cooperation with the economic environment, support innovation processes and commercialize research results.

Researchers from the École Nationale Polytechnique d'Alger to cooperate with the University of Silesia

2018-07-23

Scientists from the École Nationale Polytechnique d'Alger from Algeria visited the University of Silesia in Katowice. They talked about the possibilities of establishing cooperation between high schools. Their cooperation can result in scientific achievements, patents and even the implementation and development of economic cooperation between Poland and Algeria. Scientists from the École Nationale Polytechnique d'Alger are planning to use biological methods to purify and enrich phosphate ores - one of Algeria's natural resources. The biologists from the University of Silesia intend to develop environmentally friendly methods for removing cadmium from phosphate ores. The first work has already been undertaken and one of the students of the Algerian technical university, Hakim Rabia MSc, is a laureate of the UNESCO scholarship program including optimization of research methods.

Baltic Sea and Space Cluster established

2018-07-23

During the general meeting of the Polish Maritime Cluster, a decision was made to expand the activity and establish the Baltic Sea and Space Cluster (Balt-SeaSpace Cluster). Prof. Edmund Wittbrodt from the mechanical faculty of the Gdańsk University of Technology, chairman of the Space Sciences Commission of the Polish Academy of Sciences becomes the chairman of the Baltic Sea and Space Cluster commission. The cluster consists of several dozen entities – simple companies with supporting and partner members. It also includes Department of ocean engineering and shipbuilding at the Gdańsk University of Technology. The cluster serves to exchange information, undertake joint activities and implement projects. It will carry out its tasks by integrating science, business and administration in the field of maritime economy and space technologies. More https://pg.edu.pl/aktualnosci/-/asset_pub-

PLN 100 million for the grant program of the Foundation for Polish Science

2018-07-24

The Foundation for Polish Science will allocate PLN 100 million its new grant program called TEAM-NET. It is financed from the resources of the Intelligent Development Operational Program. The call for the competition in the program will be conducted from October 1 to October 31, 2018. The aim of the program is to encourage Polish scientific units and their researchers to establish closer scientific cooperation. To obtain a grant, the applicant will have to prepare a joint interdisciplinary research project covering a minimum of two fields of science and implemented by at least 3 to 6 teams. The subject of the project should be in line with the list of National Smart Specializations and take into account the implementation of R & D works so that the project's effects could be applied in economic practice. The project management will be supervised by the Management Team together with the Scientific and Economic Committee performing management and advisory functions. More: <https://www.fnp.org.pl/oferta/team-net/>

PhD holders can still submit nominations for the Dream Chemistry Award competition

2018-07-24

Young PhD holders of natural and technical sciences can take part in the Dream Chemistry Award. The winner of this year's competition will receive 10,000 euro and Dream Chemistry statuette. Nominations should be reported by the end of July. The organizers are the Institute of Physical Chemistry of the Polish Academy of Sciences and the Institute of Organic Chemistry and Biochemistry of the Czech Academy of Sciences. Dream Chemistry Award is a competition aimed at researchers implementing a scientific project in the field of chemistry with physics, biology, medicine or material engineering. The finals of the subsequent competitions take place alternately in Warsaw and Prague. The competition can be attended by scholars under 37 who defended their PhD in 2011 or later. Candidates for the award may be submitted by researchers with a PhD or higher title and at least 10 years of experience in exact or natural sciences. More: www.dreamchemistryaward.org

Invention of Krakow scientists wins the gold medal of the Inventions Festival in the USA

2018-07-24

The invention „New Photoinitiating Systems for Processes of Cationic, Free-radical and Hybrid Photopolymerization under UV and Visible Light”, developed by a scientific team under the supervision of Dr Eng Joanna Ortyl from the Faculty of Chemical Engineering and Technology of the Krakow University of Technology, was awarded the gold medal of the Silicon Valley International Invention Festival - SVIIF. The team of Dr Eng Ortyl invented new photosensitizers. It also developed «new photoinitiating processes for radical, cationic and hybrid photopolymerization based on new photosensitizers». The innovation of the solution is based on the use of completely new chemical compounds as photosensitizers. The research results of the Krakow scientific team have a huge impact on the production of

paints, varnishes and light-curing adhesives, which are used in the cosmetics, automotive, printing and furniture industries.

Dr Maria Katarzyna Lasatowicz becomes the chairwoman of the Association of Polish German Studies

2018-07-24

Dr Maria Katarzyna Lasatowicz, Prof. University of Opole became the chairwoman of the Association of Polish German Studies. The general assembly of the organization unanimously entrusted her with this function. Professor Lasatowicz is the director of the Institute of German Philology at the Opole university. - This is, on the one hand, a proof of great trust, and on the other, it opens a lot of different possibilities to our German university. It must be remembered that the association is an organization that brings together the German studies community from all over Poland, which gives great opportunities for scientific cooperation, exchange of experiences, establishing contacts between universities - says the chairman. The task of the Association is to support research work, disseminate scientific achievements in the field of German studies, organize cooperation between Polish institutes of German studies and foreign institutions.

Summer school of language, literature and Polish culture at the University of Silesia

2018-07-24

Almost 250 people from nearly 30 countries will participate in the XXVIII summer school of Polish language, literature and culture organized by the School of Polish Language and Culture at the University of Silesia. Classes will start on August 1. The participants of the summer school will learn Polish for a month. They will also participate in lectures and seminars on history, literature, art, culture, social and economic changes and the political situation in Poland. The program includes language games, poetry meetings, shows, concerts, Silesian

feast and meetings with interesting people. Among this year's students are scholars of the National Agency for Academic Exchange, the Senate of the Republic of Poland and students from the partner universities including 40 scholars from Beijing University of Technology and Southwest University in Chongqing.

Wrocław student awarded for the design of a model housing estate on the coast of the Al Jadda bay

2018-07-24

The design of the estate in Dubai by Joanna Wnuczek from the architecture department of the Wrocław University of Technology was awarded in the international competition MultiComfort House Student Contest. It was already the 14th competition, organized by Saint-Gobain with the support of Dubai Municipality and Dubai Properties Group. Its participants were to prepare an architectural and urban design of a model housing estate on the coast of Al Jaddaf bay in Dubai. 50 works from 28 countries were qualified for the finals. The designs had to fit into the architectural trend embedded in local traditions. The authors also had to take into account the weather conditions in Dubai. In summer, the average temperature is over 40 degrees Celsius, and the hot climate is accompanied by a sharp wind, causing sandstorms. In her project, a Wrocław student used spacious terraces referring to the eastern architecture, glass facades of buildings and traditional wind towers - wind catchers.

Polish scientists discover a new species of shrimp

2018-07-25

The Polish team of scientists from the Department of Zoology of Invertebrates and Hydrobiology of the University of Lodz and the Department of Zoology of Invertebrates and Limnology of the University of Szczecin discovered a new species of shrimp. *Atyaephyra vladoi* is the name given to the new species. It was discovered in the waters of Skadar Lake located in Albania and Montenegro. This is an endemic species, which occurs only in this area. - Our research allowed to state that the freshwater fauna of this region is much more diverse than previously thought, and its formation is largely associated with sea level fluctuations and uplift of lands in former geological eras - says Professor Michał Grabowski, one from the authors describing the new species of shrimp.

Researcher of the University of Silesia awarded the Honorary Badge for Merit

2018-07-25

Prof. Zbigniew Kadłubek, head of the Department of Comparative Literature at the philological faculty of the Silesian university, was awarded the Golden Badge of Honor for the Merits for the Silesian Province. Prof. Zbigniew Kadłubek is a classical philologist, a comparative linguist and essayist. He is the author of sketches and books about the old and contemporary culture of Silesia, as well as the selection of essays «Saint Medea» and the geo-poetical novel «Fado. A song about the soul. « His «Letters from Rome» from 2008 (epistolary novel in the Silesian ethnolect) was performed at the theatre scenes. Honorary Badges for Merits for the Silesian Voivodship are awarded to persons (or institutions, local government units, entrepreneurs and organizations), who contributed to the economic, cultural and social development of the voivodship.

Piotr Dardziński becomes secretary of state in the Ministry of Science

2018-07-26

Dr Piotr Dardziński was appointed the secretary of state in the Ministry of Science and Higher Education. So far he was the undersecretary of state and he was responsible in the Ministry of Science for innovation and international cooperation. Piotr Dardziński has been the deputy minister of science since November 2015. In the Ministry he is responsible for EU programs related to research and innovation, computerization of science and higher education as well as international cooperation. He supervises the National Center for Research and Development, the National Academic Exchange Agency, the Information Processing Center - the National Research Institute and the Polish Center for Technology Development PORT. Dr Dardziński in the years 1997-2002 completed PhD studies at the Jagiellonian University at the Institute of Political Sciences and International Relations in the Department of History of Political and Legal Doctrines. He was a scholarship holder at the University of Fribourg in Switzerland.

Recipe of the first sea buckthorn jam developed at the University of Warmia and Mazury

2018-07-26

Researchers from the Department of Chemistry and Raw Materials Processing of the University of Warmia and Mazury in Olsztyn are co-authors of the original recipe for sea buckthorn and carrot jam. The jam won the gold medal at this year's World Food Warsaw Fair. The jam recipe was established last year at the request of the company «Szarłat», which has an experimental field of sea buckthorn and deals in the processing of this fruit. The product has been developed by Dr Eng Beata Piłat and it is the first jam on the market in which sea buckthorn is the main ingredient. Dr Eng Piłat devoted a few years of scientific work to the sea buckthorn. She is a co-author of two patents related to the processing

of this plant, including a patent for the preparation of a phospholipid-carassinode preparation from sea-buckthorn berries.

Watch the total eclipse of the moon in the Copernicus Science Center

2018-07-26

Already on Friday, July 27, the longest total lunar eclipse will occur, which humans will experience in the 21st century. The Warsaw Copernicus Science Center is preparing its telescopes for this unique phenomenon in the Discovery Park. Thanks to them, the visitors can watch the eclipse «at close». During the event, lectures on the phenomenon of the lunar eclipse will be provided. The moon can be observed from the Świętokrzyski Bridge and the National Stadium, which will switch off the lighting and special effects Friday evening so that the eclipse will be more visible. The full lunar eclipse will start around 21.30 and end at 23.13. The next eclipse of this type will be visible in Poland only in 2123.

Researcher of the Medical University of Gdańsk awarded in Slovakia

2018-07-26

Dr Eng Magdalena Buszewska-Forajta, scientist of the Department of Biopharmacy and Pharmacodynamics of the Medical University of Gdańsk, was awarded for the best oral presentation delivered during the 24th Intensive Symposium on Separation Sciences and 21st International Conference Analytical Methods and Human Health. The symposium and conference took place in Jasna, Slovakia. The winning work «Formalin-Fixed, Paraffin-Embedded (FFPE) or fresh tissue? Which matrix is more suitable for metabolomics?» is implemented as part of cooperation with the Department of Pathology and Neuropathology, under the direction of Prof. Ewa Iżycka-Świeszewska. The presentation is part of the project implemented thanks to the grant obtained from the National Science Center as part of the Sonata competition.

Students from Asia improve English at the Summer University of Opole

2018-07-26

Students from China, Indonesia, Kazakhstan and Kyrgyzstan participate in classes held at the Summer University of Opole. They learn English, visit various cities and learn about the history of Poland and Europe. Four groups of students from Asia - a total of 60 people - came from partner universities: Fujian Normal University, Southwest University and Dalian University of Languages from China and from Universitas Brawijaya from Malang in Indonesia. For three weeks, students will practice English intensively, and in the afternoons they will be divided into specialist groups: Intercultural competence & communication, Academic English or Art and literature. In the evenings artistic and cultural activities are planned, and on weekends they will trip to Wrocław, Krakow and European capitals. Participants will live on the university campus, with additional classes accompanied by students from Poland, Ukraine and Turkey.

Students from the USA on courses at Collegium Civitas

2018-07-27

Collegium Civitas has been holding Summer School classes for American students. From May to July 2018, 60 students from the USA visited the Warsaw University. They took part in courses on security, cybercrime and cultural diversity. Guests from the USA also gained knowledge about Polish culture and history during trips to museums and cultural institutions. They participated in concerts and visited Krakow. In addition, they had the opportunity to learn about the history of the «cold war» during a three-day stay in Berlin. Most of the participants have already returned to the USA. 11 students continue their stay in Warsaw participating in the internship program at the Warsaw Uprising Museum, the Jewish Historical Institute and the Center for Research on Terrorism, Collegium Civitas.

National Academic Exchange Agency to invite to the autumn fair promoting the offer of Polish universities

2018-07-27

The National Academic Exchange Agency (NAWA) together with the Ministry of Foreign Affairs and diplomatic missions offers the opportunity to promote the educational curricula of Polish universities at jointly prepared stands during educational fairs around the world. Interested universities can take part in fairs in South Korea, Singapore, Azerbaijan, Indonesia, Peru and Ecuador in autumn. National Academic Exchange Agency with the campaign «Ready, Study, GO! Poland» has been part of the Study in Europe project, which is run by the European Commission. As part of this campaign NAWA invites in September to the fairs in India, in October to the fairs in China, and in November on the educational mission in Ukraine. More: <https://nawa.gov.pl/promocja-i-targi/targi>

Center of Astronomy of the Nicolaus Copernicus University to modernize its radio telescope

2018-07-27

The Center of Astronomy of the Nicolaus Copernicus University in Piwnice received nearly PLN 1.6 million for the modernization of the 32-meter radio telescope apparatus, which will enable observation by means of large-scale interferometry. The Very Long Baseline Interferometry (VLBI) method allows radically improve the resolution of radio astronomy observations by combining radio telescopes into a network so that the pairs of elements of this network act as interferometers. In 2019, in all radio astronomy observatories in Europe working in the VLBI network, the standard of the observation method will be changed - the data acquisition speed will be increased to 2 Gb / s and then to 4 Gb / s first. Modernization will ensure compatibility of the Toruń radio telescope with other elements of the network and further participation in international cooperation.

Poznański scientist at the International Commission on the History of Geological Sciences

2018-07-27

Professor dr hab. Janusz Skoczylas from the University of Adam Mickiewicz in Poznań became an honorary member of the International Commission on the History of Geological Sciences as part of the International Union of Geological Sciences (INHIGEO IUGS). INHIGEO IUGS is an organization that promotes current research on the history of Earth sciences. It sponsors the annual symposium, promotes publications of individual and collective works on the history of geology and historical research in the field of earth sciences. It was established in 1967 and currently associates about 300 members from 57 countries. Professor Skoczylas is a member of the Institute of Geology of the Faculty of Geographic and Geological Sciences of the University. His scientific interests include petroarcheology (archeometry), regional geology, dynamic geology, zoology (geoecology), history of geology, exploration, exploitation and use of rock raw materials.

Metropolitan apiary on the roof of a shopping center in Wrocław

2018-07-27

Five bee families live on the roof of the Wroclavia shopping center, in the heart of the capital of Lower Silesia. This is a joint venture of the shopping center and the Wrocław University of Environmental and Life Sciences, which looks after bees. - There is one family in each of the five hives - from 50,000 to 60,000 bees. Of course, only suitable breeds of bees are chosen for such breeding, like the Kraińska bee - says Paweł Migdal from the biology and animal breeding department who was responsible for the preparation and moving of the bee families. About 100 kg of honey can be obtained from this apiary in the season. Residents can facilitate the work of bees by planting velvet, verbena, heathers and heaths, lavender and nasturtiums on their balconies. The first metropolitan apiaries were established in

Paris, today they are also in Munich, Copenhagen, Zurich, Warsaw and Krakow. They are also created in Wrocław - at the Voivodship Office building and in the Capitol musical theater. More: http://www.glos.upwr.edu.pl/aktualnosci/48154/otworzylymy_pasieke_w_centrum_wroclawia.html

Pomeranian Medical University in Szczecin launches the Progressio- Integrated development program

2018-07-30

The implementation of the Progressio - Integrated development of the Pomeranian Medical University in Szczecin has started. This support program will include 1927 students, 100 administrative and administrative staff and 2 teaching staff. The aim of the project is to develop the university by expanding the educational offer corresponding to the needs of the economy, labor market and society, and to improve the functioning of the university by supporting organizational changes and improving staff competences. The project will include studies for medical, medical and dental students, medical analysis, biotechnology, nursing, physiotherapy, cosmetology and dietetics students, as well as specialized courses and study visits for nursing students, training for management and administrative staff and internship for teaching staff. The purchase of IT systems to manage the university and employing a career counselor are also planned.

Scientist from Gdynia becomes a member of the General Bathymetric management committee of the Chart of the Oceans

2018-07-30

Capt. Dr. Eng. Karolina Zwolak from the Naval Academy in Gdynia was nominated to the GEBCO (General Bathymetric Chart of the Oceans) Guiding Committee - a management committee of an international organization dealing with the creation of large-area bathymetric ocean maps. GEBCO brings

together hydrographs, oceanographers, and geophysicists representing scientific and commercial governmental organizations. GEBCO products are developed in many formats based on the world's largest measurement databases from research cruises and are available free of charge for scientific and commercial applications. The roots of GEBCO date back to 1903, when the commission for underwater nomenclature initiated the development of the first general bathymetric maps of the Atlantic. Currently, GEBCO operates under the auspices of the International Hydrographic Organization and the Intergovernmental Oceanographic Commission.

Two new research centers to be created in Warsaw

2018-07-30

BRAINCITY Center of Excellence in Neuroplasticity and Brain Diseases and the CENTERA Center for Research and Application of Terahertz Technologies will be two new research centers in Warsaw. The Foundation for Polish Science will allocate 73 million PLN for their creation. The first center will be created at the Institute of Experimental Biology and the second at the Institute of High Pressure Physics of the Polish Academy of Sciences. New scientific institutions will be financed thanks to funds granted in the recently announced call in the program International Research Agendas of the Foundation for Polish Science. BRAINCITY will investigate the complex mechanisms of plasticity of the human brain, while CENTERA will investigate terahertz radiation, which can have a range of applications in communication, industry, agriculture and trade. The project foreign partners are Goethe University in Frankfurt and CNRS- Institute of Electronics, Microelectronics and Nanotechnology in Lille,

Call „Social and technological innovations in the process of activation of the disabled”

2018-07-31

The State Fund for Rehabilitation of Disabled People has announced the third open call „Social and technological innovations in the process of activating disabled people” for financing research, expert

opinions and analyzes concerning the vocational and social rehabilitation of disabled people. Applications in the call may be submitted by universities, Polish Academy of Sciences, research institutes and other entities with documented research achievements in the field of vocational and social rehabilitation of disabled people, operating on the market for a minimum of 3 years and conducting research activities. The deadline expires on August 27, 2018. The planned amount of funds for co-financing the implementation of projects submitted as part of the competition is PLN 2.5 million. More: <http://www.pfron.org.pl/institucje/badania-i-analzy-naukowe/ogloszenie-z-dnia-27-lipca-2018-trzeciego-otwartego-konkursu-pt-innowacje-spoleczne-i-technologiczne-w-procesie-aktywizacji-osob-niepelnoprawnych-na-finansowanie-badan-ekspertyz-i-analiz-dotyczacych-rehabilitacji-zawodowej-i-spolecznej-osob-niepelno/>

Four young Polish scientists receive grants from the European Research Council

2018-07-31

Four Poles received grants of the European Council for Scientific Research for their research. The grants amount to nearly 6 million euro. This is a record in terms of the number of grants for Polish scientific institutions from the beginning of the Council's existence. The European Research Council (ERC) selected nearly 400 people with unique potential and scientific achievements out of 3170 applications. The grants were awarded in the ERC Starting Grants call under the Horizon 2020 program for the youngest researchers from 2 to 7 years after the PhD. The awarded Polish scientists are: Dr Piotr Achinger from the Institute of Mathematics of the Polish Academy of Sciences, Dr. Michał Németh and Dr Tomasz Żuradzki both from the Jagiellonian University and Dr Magdalena Winiarska from the Warsaw Medical University. More about the awarded projects: <https://informacje.pan.pl/index.php/serwis-media/2290-czterech-polskich-naukowcow-z-najwazniejszymi-grantami-w-europie>

Competition of the Supreme Administrative Court for the best master's thesis in the field of administrative judiciary

2018-07-31

The Supreme Administrative Court announced a competition for the best master's thesis, with aim at popularizing knowledge on administrative judiciary and to promote particularly gifted authors of master's theses. The applications may be submitted for a work which concerns the subject of administrative judiciary, which has been rated by the supervisor and reviewer as a very good or a good plus and is written in Polish. Participants in the competition should be graduates of public and non-public higher education institutions with their master's thesis accepted from October 1, 2017 to October 30, 2018. Applications for the competition must be submitted by November 7, 2018. Regulations of the competition: http://nsa.gov.pl/download.php?id=914&mod=m/11/pliki_edit.php

Center for Renewable Energy of the University of Zielona Góra in the Ekostrateg program

2018-07-31

The Renewable Energy Center of the University of Zielona Góra in Sulechów received a nomination in the Ekostrateg 2018 economic program. The program aims to reward companies and institutions that care for the natural environment, looking for innovative solutions for the economy. Ekostrateg is a nationwide image program aimed at companies in the energy sector and public institutions dealing with environmental protection. The originator of the program is the Polish Agency of Entrepreneurship. The basis for the nomination of the Renewable Energy Center are numerous activities in the field of research and development in the energy sector, as well as active cooperation with the scientific community. The awarding ceremony will take place at the Poznań International Fair during the 6th Polish Congress of Entrepreneurship on September 24-25.

Bee's Day at the University of Wrocław

2018-08-01

The Botanical Garden of the University of Wrocław invites participants to the Bee's Day. The program includes stories about bees, fairs and outdoor game with a bee in the leading role. The event will begin on Sunday, August 5th at 10. The event is to show how to help bees. The Botanical Garden organizes a field game with a bee playing the leading role, workshops for building houses for insects and a demonstration of cutting out bitterwoods. Experts of the subject will talk about the pollination processes, what differs the bee from the honey bee, what are the reasons for the bee disappearance, how to help pollinators and what are properties of different honeys. - We want to show how much we owe to these insects. In our latitude as much as 85 percent. crops are pollinated by bees. Without bees, these plants would cease to reproduce. Meanwhile, bees are in danger. From about 470 species of these insects in Poland as many as 222 are endangered with extinction.

Researcher of the Wrocław University of Technology wins the Award of the European Mathematical Society

2018-08-01

Dr Mateusz Kwaśnicki from the Wrocław University of Technology received the prize of Mikhail Gordin, awarded by the European Mathematical Society. The scientist was awarded for his contribution to the spectral analysis of Lévy's processes. - It is about random processes that are used to model, for example, stock prices or capital of insurance companies. The modeled size may vary in a non-continuous manner. To describe the different quantities associated with these processes, you need to have tools for it. Spectral analysis is one of them - explains the young scientist, quoted on the university website. The award was established to commemorate the outstanding Russian mathematician Mikhail Gordin. It is awarded to researchers from Eastern Europe who have achieved ground-breaking research results in

probability theory or dynamic systems The laureate's scientific interests include the theory of stochastic processes, the theory of potential, harmonic analysis and differential equations. More: <http://pwr.edu.pl/uczelnia/aktualnosci/prestizowa-nagroda-dla-naszego-matematyka-10937.html>

Cardinal Stefan Wyszyński University launches Sports Center

2018-08-02

At the beginning of 2020, the Cardinal Stefan Wyszyński University (UKSW) will open the Sports Center in Warsaw. The investment is financed from the funds of the Development of Physical Culture of the Ministry of Sport and Tourism and the Minister of Science and Higher Education. According to UKSW, the planned Sports Center will have three floors. The facility will include a hall of 56 m for 38 m. It will enable team games - handball, volleyball, basketball and badminton. In addition, there are sports club rooms with exercise, aerobic, weight, fitness and food rooms in the hall. On the first floor there will be stands for 226 viewers. The value of the investment has been estimated for PLN 20 million.

First Polish-Finnish observation satellite launched in orbit around Earth this year

2018-08-02

The ICEYE-X2 satellite is a joint work of the Finnish ICEYE cosmic start-up and the Polish company Creotech Instruments S.A. As representatives of both companies announced they will launch together the satellite to the orbit around the Earth. The ICEYE-X2 satellite weighs approximately 85 kg and is equipped with an innovative SAR radar created by ICEYE, which will allow observation of the Earth's surface regardless of weather conditions. Creotech Instruments S.A. constructed selected components of the satellite and worked on its integration. Creotech Instruments S.A. has been striving to become a satellite integrator for many years. With the financial support of the National Center for Research and Development, it develops the HyperSat microsatellite platform.

Recruitment of candidates for the Council of the National Center for Research and Development

2018-08-03

The Minister of Science and Higher Education asked the scientific and socio-economic and financial groups to indicate candidates for the members of the Council of the National Center for Research and Development. The four members will be selected from the candidates nominated by the scientific community. The candidates should have at least a PhD degree and actively conduct research or development work. Three members will be appointed from professionally active candidates indicated by socio-economic and financial groups. Membership in the Council cannot be combined with membership in: Committee for Evaluation of Scientific Units; Scientific Policy Committee; The Council of the National Center for Science and the Central Commission for Degrees and Titles. More: <https://www.ncbr.gov.pl/o-centrum/aktualnosci/szczegoly-aktualnosci/news/ogloszenie-o-naborze-kandydatow-do-rady-narodowego-centrum-badan-i-rozwoju-48469/>

Monarch butterfly in Bialystok

2018-08-03

A few days ago, Dr Marcin Sielezniew from the Institute of Biology, University of Bialystok, saw a monarch butterfly in front of one of the buildings in Bialystok - informs Katarzyna Dziedzic, press spokesman of the Bialystok University. Monarch butterfly, in Latin *Danaus plexippus*, it is a butterfly from the Nymphalidae family. Every autumn, millions of these insects leave the northern regions of the US and Canada to overcome 4,000. km and spend the winter in the warm mountains of Mexico or California. However, the question arises, how the monarch found the way to Poland? It is known that sometimes individual butterflies are found in the British Isles, driven there by winds across the Atlantic. In addition, the monarch butterflies can be dragged to southern Spain, where their settled populations occur, and on the Canary Islands - says Dr Marcin Sielezniew. According to the biologist, the

most likely hypothesis is that the monarch butterfly comes from a breeding farm, from which it escaped or was deliberately released.

Researcher from the Poznan University of Technology becomes a laureate of the European Coal Association Award

2018-08-03

Professor François Béguin from the Faculty of Chemical Technology at the Poznań University of Technology received the prestigious award of the European Carbon Association (ECA). The prize was presented during the World Carbon Conference 2018 in Madrid. Every three years, ECA awards a scientist whose activity has an important contribution to the state of knowledge in the field of carbon materials. The prize is awarded for contribution to the scientific community dealing with coal and for supporting others in the pursuit of scientific excellence or making a significant contribution to creating a strong foundation for the community of scientists dealing with coal and technologies supporting sustainable development. Professor Béguin is the co-author of over 300 publications cited over 20,000. times, dozens of patent applications and international patents. He is the promoter and mentor of many young scientists from Europe and Asia.

Students and graduates experimenting in the Pomeranian Science and Technology Park

2018-08-03

Students and graduates of biological sciences participate in InnovaBio Pomorze - a program organized by the Bio Laboratory of the Pomeranian Science and Technology Park. In this year's program, participants are working on projects commissioned by companies from the life science sector. The following projects have reached the stage of experimental works at Bio Laboratorium: Margab - development of an innovative, safe for the environment

and health finishing for candle wicks and Vianat - testing and comparison of polyphenols in fruits and fruit and vegetable juices and drinks obtained with a wine innovative method. InnovaBio participants also include Izabela Ryska -for developing a face cream based on butter and vegetable oils, containing amber extract and the University of Gdańsk for analysis of siderophores produced by bacteria from the rhizosphere using the isoelectric focusing technique. University of Zielona Góra concludes an agreement with the Taras Shevchenko National University in Kiev

2018-08-03

The University of Zielona Góra has concluded an agreement with the National University Taras Shevchenko in Kiev - in the field of philosophy and political science. The document was signed by the rectors of both universities: Prof. Eng. Tadeusz Kuczyński and Prof. Leonid Hubersky. The Dual Diploma Program is intended for second-year students studies at both universities. Students from the Kiev University will be able to come to Zielona Góra for the last two semesters of studies and write a master's thesis under the direction of two Polish and Ukrainian promoters in Polish or in English languages. The same opportunity will have students from Zielona Góra. They can spend two semesters at the University of Kiev and write a master's thesis in Ukrainian or in English. The implementation of the program will be coordinated by the Polish-Ukrainian Center for Humanities Studies, created last year by both universities. Recruitment for the dual studies has already begun.

Students from China to participate in the summer school of ceramics conservation at the Nicolaus Copernicus University

2018-08-06

The Faculty of Fine Arts of the Nicolaus Copernicus University in Toruń launches the first summer school of ceramic preservation. Chinese Beijing Union University students attend lectures on art history, European ceramics, materials science, research methods and basic issues of material destruction. In the summer program of the school there are also exercises for Chinese students to learn the basic methodology of conservation procedures: purification, desalination, disinfection, strengthening, filling up of cavities and enamel. They will also be able to test their skills in practice by carrying out conservation work on various original ceramic objects. At the weekends, classes in the form of case studies in Toruń and Gdańsk, as well as visits to monuments and museums, participation in concerts, exhibitions and outdoor events are planned.

First winners of the Miniatura 2 competition

2018-08-06

The National Science Center informed about the first laureates of the second competition Miniatura 2 for scientific activities aimed at implementing basic research. The call for proposals in the Miniatura 2 competition is conducted on a continuous basis and its assessment period is reduced to four months. In the first round of the competition, 30 applications were financed. Subsequent ranking lists will be published by the end of April 2019. The laureates include the priest Dr Adam Kubis from the Catholic University of Lublin for the application „Sin and disease. The nature of the relationship between disease and sin in the light of exegesis analysis J 5,14 and 9,2-3 „, Dr Łukasz Michalczyk from the Ignatianum Academy in Krakow, who submitted the application entitled „Preparation of eye movement sequence and visual spatial attention” and Dr. Małgorzata Andrea Domino from the Warsaw University of

Life Sciences (SGGW) for the study „Evaluation of the mucosal fibrosis process in uterus of mares in the endometriosis at the gene level.” More: <https://www.ncn.gov.pl/konkursy/wyniki/miniatura2>

Young researchers to receive almost PLN 12 million within the programs of the Foundation for Polish Science

2018-08-06

The Foundation for Polish Science has held contests within the HOMING and POWROTY programs. Financing in the amount of nearly PLN 12 million will be received by 15 young researchers who will implement innovative projects in Poland. The Foundation for Polish Science informs that, as part of the HOMING program, 11 young PhD holders will come to Poland from abroad to complete their post-PhD internship projects. The winners will receive grants in the total amount of almost PLN 9 million. The POWROTY program, on the other hand, will enable 4 researchers to return to academic work after a break related to parenthood and work outside of science. The winners of the POWROTY program will receive over PLN 3 million for conducting their research. Funds for financing grants come from the Operational Program of Intelligent Development. More: <https://www.fnp.org.pl/grantobiorcy-homing-konkurs-52018/> <https://www.fnp.org.pl/grantobiorcy-powroty-konkurs-52018/>

„Capsule of time” - a competition for students and architecture graduates

2018-08-07

The „TworzyMY Kraków” Foundation organizes a competition aimed at students and graduates of architectural and artistic faculties. The aim of the competition is to select the best project of a small or medium «architectural sculpture». Within the project the participants are to create the original vision of the «Capsule of time». The idea should have an innovative architectural solution and combine the elements of modern art with the use of innovative technological solutions of the future. The winning

project will be implemented in 2019. It will be permanently placed in Krakow at u Dolnych Młynów 10 Street. The «TworzyMY Kraków» Foundation also provides for its presentation in many places in Poland, on the various exhibitions and fairs of artistic, scientific and cultural character. More: <http://tworzymykrakow.org/konkurs-tworzemy-krakow/>

Dual studies of Engineering of technological processes to launch at the University of Natural Sciences and Humanities in Siedlce

2018-08-07

The recruitment for a new field of Engineering of technological processes has started in Siedlce. Those dual first-cycle studies at the Faculty of Sciences will last 3.5 years. According to the University of Natural Sciences and Humanities in Siedlce, which launched the course, all students starting their studies in the academic year 2018/2019 will participate in the project of the National Center for Research and Development «Engineer with practice needed immediately!» and they will be provided with internships throughout their studies. Engineering technological processes are interdisciplinary studies combining knowledge in computer science, construction, material engineering and production engineering. The program and the study plan were created in cooperation with the largest employers in Siedlce, where students will be able to take the internships.

European universities for improving the Dual Career program for student athletes

2018-08-07

Members of the Conference of Rectors in Coimbra in Portugal signed an agreement on the Dual Career program for student athletes. The new regulations are to improve developing their scientific and sports careers. The agreement, signed by the rectors of European universities and the European University Sports Association, aims at higher education institutions to help students develop their scientific and sports careers. The main assumptions are: providing students with the possibility of pursuing a dual career, adjusting the regulations to provide the opportunity to study and train, promoting the best conditions for training, providing them with the best trainers and the access to the best educational and health offer. The agreement was signed during the largest European university sport event - The European Universities Games Coimbra 2018.

University of Bialystok launches exhibitions

2018-08-08

By the end of August 2018, two exhibitions can be visited at the Institute of Biology of the University of Bialystok. The first exhibition presents the nature of the Podlasie valleys shown in the pictures of university employees. The second exhibition presents the story of life on Earth - says Katarzyna Dziedzic, spokeswoman of the Białystok university. Most of the photographs presented at the photo exhibition have been taken over the last thirty years as a part of wandering along the Narew and the Biebrza rivers. The second exhibition «Life on Earth - an outline of history» presents the development of fauna and flora from the Cambrian period of the Paleozoic era, to the Pleistocene, the time of several serious glaciations of Earth during last 2 million years.

Polish Space Agency to award the best diploma theses in space engineering

2018-08-08

The Polish Space Agency has announced a competition for the Scientific Prize of the Polish Space Agency for the best student diploma thesis in the field of space engineering. The competition is addressed to scientists who have recently completed first-cycle or second-cycle studies at Polish universities. Their graduate theses should refer to issues in the field of widely understood space engineering in the theoretical aspect and practical solutions. The competition will be organized every year, and the Scientific Prizes of the Polish Space Agency will be awarded for the first time in 2018 for the diploma theses realized in the academic year 2017/2018. The Scientific Prizes of the Polish Space Agency will be awarded to three best diploma theses in each of the two categories - engineering bachelor's and master's thesis. More: https://polsa.gov.pl/images/docs/Regulamin_Konkursu_o_Nagrode_Naukowa_Prezesa_PAK.pdf

Electric motorcycle from Wrocław University of Technology comes in third in Spain

2018-08-08

Students of the Wrocław University of Technology took the third place in the general classification of the SmartMoto Challenge electric vehicle competition in Barcelona. The University of Technology won the first place for the best design, the second in static competition. In total, it gave them the third position- said Michał Ciepielski from the Department of Information and Promotion of the university. The students went to Barcelona to present their Light Electric Motor Thunder, which is adapted to rallies in difficult terrain conditions. The vehicle weighs 120 kg and has a power of 30 kW, or about 40 horsepower. Battery capacity, entirely designed by students, allows to drive about 90 km at a speed of 120 km / h. Due to a special system, it can be replaced in a few seconds. In the tournament, all teams had to go through static competition i.e. presentation of the business plan and technical de-

tails of the vehicle, and then the vehicles were tested by dynamic tests of power and acceleration.

Researcher of the University of Economics in Katowice wins the award of the monthly journal Manager

2018-08-08

Dr Katarzyna Bilińska-Reformat, Prof. University of Economics in Katowice and the head of the Department of Marketing Management and Tourism received the Science for Business award from the Manager monthly journal for practical and effective combination of science and business. The award was given to Dr Bilińska-Reformat and Dr. Mateusz Grzesiak from the WSB Academy in Dąbrowa Górnicza for creating pioneering and tangible benefits of business solutions in the field of management and marketing sciences for the sector of small and medium enterprises and setting new development directions for the training and consulting industry. The prize winners are the best proof that a practical and effective combination of science and business is not only necessary, but also possible and beneficial for both parties.

Awards for the projects of the Land Forces Academy during the festival in Silicon Valley

2018-08-08

The Jury of the Silicon Valley International Inventions Festival at the Congress Center Santa Clara honored the Academy of Land Forces in Wrocław with a gold and silver medals for the presented innovations. The gold medal was awarded for the use of light aircraft, stable in flight and invisible for radars, which allows to obtain tactical advantage on the battlefield as well as in projects implemented as part of crisis management. The silver medal was received by Academy for a cascade converter of ionizing radiation and a device for real-time diagnostic imaging, which allows to monitor the level of radioactive contamination. The Academy was also awarded the World Intellectual Property Organization medal for its activities aimed at protecting intellectual property of the presented technologies and solutions.

Archaeologists from the Jagiellonian University discover in Israel a defensive wall from 5,000 years ago

2018-08-09

Researchers from the Institute of Archeology of the Jagiellonian University in Kraków completed the excavation season at the Tel Erani station in Israel with the discovery of a defensive wall from 5,000 years ago. The spot investigated by the team from the Institute of Archeology is located near the town of Kiriath Gat and covers about 26 hectares. The discovery of a defensive wall about 11 meters thick may prove that the cities of southern Levant were built earlier than previously thought. This is the oldest building of this type in Israel. Archaeologists from the Jagiellonian University estimate that it was built around 3,300 years BC and is another proof that Tel Erani was a well-developed center before the arrival of the Egyptians. The project is financed by a grant from the National Science Center and carried out in cooperation with researchers from the Ben-Gurion University in Beersheva, the Israel Antiquities Authority and the University of Buenos Aires. More: https://www.uj.edu.pl/wiadomosci/-/journal_content/56_INSTANCE_d82IKZvhit4m/10172/140485607

Professor Żukowski becomes a member of the Executive Committee of the International Political Society

2018-08-09

Professor Arkadiusz Żukowski, director of the Institute of Political Sciences of the University of Warmia and Mazury in Olsztyn, became a member of the Executive Committee of the International Political Society (IPSA). This choice is a success and appreciation of Polish political science and its contribution to the development of this discipline on the international arena. The elections took place on July 25, 2018 during the XXV World IPSA Congress in Brisbane, Australia. Professor Żukowski was also elected to two committees: Academic Freedom and Participation and membership. He was also invited to the Scientific Council of the scientific journal

„International Political Science Abstracts” and the Editorial Board of „World Political Science”. IPSA, established in 1949, is the only world scientific society that gathers political scientists.

Competition for the best master's thesis „Intelligent power grids - development and operation”

2018-08-09

Tauron Dystrybucja Spółka Akcyjna invites graduates of electrical power engineering, electrical engineering, energy, electronics, automation and robotics, telecommunications, computer science and mechatronics to participate in the 5th competition for the best master's thesis in the academic year 2017/2018. The theme of this year's competition is: «Intelligent power grids - development and operation». The main prize for the author of the best master's thesis on this subject is 10,000. PLN. The organizers will accept applications until October 15, 2018. Details of the contest are available at: www.tauron-dystrybucja.pl/konkurs

Academy of Young Inventors at the University of Humanities and Natural Sciences in Częstochowa

2018-08-09

Jan Długosz University of Humanities and Natural Sciences in Częstochowa invites participants to the project „Academy of Young Inventors, an initiative broadening the horizons of creative and innovative thinking of children and youth”. The project is addressed to young people aged 10-16, fascinated by the world of natural and exact sciences. The pupils will have the opportunity to participate in popular science lectures and independent design and performance of experiments in the field of biology, chemistry, physics and technology. They will participate for one-day educational trip and the opportunity to present their own achievements at the Forum of Young Inventors. Classes will take place from 20 to 30 August in the building of the Faculty of Mathematics and Natural Sciences of the University - in

Częstochowa at al. Armii Krajowej 13/15. The condition is submission of documentation by the parent and participation of the child in recruitment for the project. More: <http://www.power.ajd.czest.pl/amw.html>

Researcher at the Medical University of Gdańsk receives a scholarship from the Deutscher Akademischer Austauschdienst

2018-08-09

Dr Zbigniew Heleniak from the Chair and Clinic of Nephrology, Transplantology and Internal Medicine at the Medical University of Gdańsk received a three-month scholarship from the Deutscher Akademischer Austauschdienst (DAAD). DAAD is an association of German universities, whose main task is the internationalization of German universities and supporting international academic exchange. The organization grants individual scholarships, finances group travel and delegating German scientists to foreign universities. Significant financial resources are allocated for cooperation between German and foreign universities in the framework of specific projects - for programs supporting the internationalization of German universities, as well as for financing study programs, centers and universities abroad.

Professor Andrzej Nowak from the University of Zielona Góra becomes one of the laureates of the Isaacs Award

2018-08-09

Professor Andrzej Nowak from the faculty of mathematics, computer science and econometrics at the University of Zielona Góra and Prof. Georges Zaccour (HEC Montreal, Canada) became the laureates of the prestigious Isaacs Award for outstanding contribution to theory and the use of dynamic games. Rufus Isaacs created in 1950-70 the basics of the theory of differential games. The prize of his name is awarded every two years by the Committee of the International Society for Dynamic Games. The aim of the Society is to promote and popularize the theory and applications of dynamic games and to disseminate scientific information. The Society achieves them by organizing symposia, conferences, workshops and publishing magazines with a high scientific standards. The subject of research conducted by Prof. Nowak are issues of decision-making processes and stochastic games, the theory of optimal economic growth and the issue of optimal use of the capital.

Mayor of Szczecin provides scholarships for students

2018-08-10

The best graduates of high schools and technicians can receive educational scholarships of the Mayor of Szczecin. In this way, the city wants to encourage young talented people to learn at public universities in Szczecin and prepare staff for regional business. The program is implemented as part of the „Academic Szczecin”. The aim of the program is to prevent the outflow of gifted secondary school graduates from the city and to help in acquiring qualified personnel for regional business. The fund is also to build the prestige of Szczecin’s public universities, promote the educational offer and increase competitiveness and accelerate the economic development of local entrepreneurs. The scholarship may be awarded to a student with a secondary school-leaving certificate obtained in the year in which re-

cruitment is conducted. The maximum amount of support is 6,000 gross PLN. Applications can be submitted until 10 October at the secretariat of the Strategy Office of the City Council of Szczecin.

Students of the Wrocław University of Technology get to the semi-final of RoboSub in California

2018-08-10

Students of the Wrocław University of Technology got to the semi-finals and won a special prize for the best computer simulation in the competition of autonomous robotic submarines RoboSub in California. The team from Wrocław was the only Polish team among 47 teams from technical universities around the world. The body of the underwater robot created by the members of the scientific circle «Robocik» was made of fiberglass laminate. It can go down to the depth of 100 m. It has 7 engines and a number of specialized sensors that determine its location, sensors acting as accelerometer, gyroscope and magnetometer, pressure sensors and leak detectors, signaling even the smallest moisture. It also has four cameras. The RoboSub competition has been held for 20 years, is organized by the Foundation of the Association of Unmanned Automotive Systems and the American Navy Research Office.

National Synchrotron Radiation Center Solaris creates the fourth research line

2018-08-13

The National Solaris Synchrotron Radiation Center in Krakow began the construction of the Phelix research line. It will be the fourth line in the university synchrotron. In Krakow, a straight section chamber under the undulator is installed, with the elements manufactured and assembled by the German company FMB Feinwerk- und Meßtechnik GmbH. The investment was supported by the Ministry of Science and Higher Education with nearly PLN 10 million. In the National Synchrotron Radiation Center Solaris at the Jagiellonian University there is a synchrotron -

a source of electromagnetic radiation. This radiation will be used for research in many fields of science: from physics, chemistry and medicine to archeology and art history. The Krakow synchrotron is the first and only research infrastructure of this type so far in Central and Eastern Europe.

New student car from the Lodz University of Technology to compete in Finland

2018-08-13

The team of students of the Lodz University of Technology „Iron Warriors” will take part in the competition of the super-efficient cars Pesaralla Pisimmalle 2018 on 18-19 August 2019. The international contest will take place in Nokia in Finland. According to the Lodz University of Technology, «Iron Warriors» are current Polish record holders in the category of the lowest combustion cars. Their vehicle - Eco Arrow 2.2 makes up to 837 km per 1 liter of fuel. Currently, students have developed an improved structure to cross the limit of one thousand kilometers per 1 liter of fuel. The solutions used in their new Eco Arrow 3 car were presented at the end of July 2018 at the International Conference of ISER (The International Society for Engineers and Researchers) in Melbourne, where they participated thanks to funding under the Ministry of Science project «The Best of the Best 2.0»!

Professor Piotr Lorens becomes a candidate for the deputy executive director of the UN Habitat program

2018-08-13

Minister of Foreign Affairs Jacek Czaputowicz proposed the candidacy of Prof. Dr. Eng. Piotr Lorens from the Gdańsk University of Technology to the position of the deputy executive director of the United Nations Human Resources (UN Habitat) Program. - «Professor Piotr Lorens is an excellent specialist in urban and development planning, and his skills and experience make him a great candidate for this demanding position. I am convinced that his extensive knowledge, professionalism and enthusiasm will be an extremely valuable contribution to the program's activities.» wrote Jacek Czaputowicz in his official letter to Maimunah Mohd Sharif, UN Under-Secretary General and Executive Director of the program. UN Habitat is a UN agency dealing with rational urbanization and sustainable development of urban centers. It aims to improve the quality of life of slum dwellers and to provide people with access to clean drinking water.

Laboratory of Young Master and Discoverer to be opened in Białystok

2018-08-14

By January 2020, the Laboratory of a Young Master and Discoverer will be established in Białystok. The city authorities have signed the agreement with the Białystok Science and Technology Park. The value of the investment amounts to over PLN 25 million, of which PLN 17 million will be allocated by the European Union funds. - The goal is to provide knowledge and experience to all recipients, regardless of age. We assume that its creation will favorably influence the development of technical culture of the region's inhabitants. It is particularly important for us to allow the youngest early to contact with the world of science and technology - said Anna Daszuta-Zalewska, director of the Białystok Science and Technology Park, in the interview to the newspaper «Puls Biznesu». Over 3 thousand square meters of

the Laboratory will be divided into several thematic zones, such as optics, electromobility, telecommunications, life sciences, energy, automation, robotics and mechanics.

Collegium Civitas to simulate the legislative process of the European Union

2018-08-14

From August 23 to August 28, 2018, within the conference held at Collegium Civitas in Warsaw, the participants will simulate the legislative process of the European Union. Young people and students from all over Europe taking part in the conference will take over the roles of MEPs, national ministers in the Council of the European Union and journalists. During the simulation, the students will be able to meet Polish MEPs. The participants of the simulation will be debating the original proposals of the European Commission. The aim of the conference is to understand the structure and functioning of the European Union and to gain experience in negotiations, public speeches and development of leadership skills. The partners of the project are the Representation of the European Commission in Poland, the Foundation for Polish-German Cooperation, the Schuman Foundation, the Capital City of Warsaw, Euractiv.pl, the College of Europe and Collegium Civitas. More: <http://www.meu-warsaw.pl/>

„Test of Polish Language” - international spelling competition held in Cieszyn

2018-08-14

The University of Silesia for the 21st time is organizing an international spelling competition „Test of Polish Language”. The aim of the competition is to select the Foreign Master of Polish Language. The competition will start on Wednesday, August 15 at 10.30 in the Conference Center of the University of Silesia in Cieszyn. Students will compete for the title of the Foreign Master of Polish Language and for free participation in the XXIX summer school of Polish language, literature and culture. The Jury will also award the titles of Eagle and Little Eagle of Pol-

ish Spelling and the prizes «5+» for students who are just beginning their Polish courses. «Test of Polish Language» is one of the most important events for the summer schools of language, literature and Polish culture. The competition task is a dictation of the text, which is prepared especially for the needs of the competition by Polish linguists and specialists in the field of spelling.

Chemists from the University of Poznań recreate the medieval colors

2018-08-14

Chemists from the Adam Mickiewicz University in Poznań recreated the unique medieval colors. This is a key element of the conservation work on reconstructing a drawing on the tombstone of the Rabenstorp family in the church of St. John the Evangelist in Szczecin. Working under the guidance of Prof. Jerzy Langer, scientists from the university faculty of chemistry based on the results of spectrometric analyzes and obtained the formula of the coloring paint composed of wood tar with the addition of crushed pyrite. - The composition of the dye has turned out to be unique, as well as the discovered technology of its use in the form of emulsions - says Prof. Langer. The coloring material was reproduced with great precision in both chemical and microstructural aspects, with the aim to ensure that all components and operations used were available in the Middle Ages. We can even talk about copying the original coloring mass and the technology of its use - adds the Professor.

Discovery of archaeologists from the University of Gdansk

2018-08-14

Archaeologists from the University of Gdańsk during the excavations in the East Ramparts of the Wisłoujście Fortress discovered the remains of the barracks, foundations of the church of St. Olaf and about 2 thousand exhibits. Researchers during the two-week archaeological excavations found fragments of ceramics with the Gdańsk coat of arms and numerous objects made of metal - bullets, metal ornaments, knives, cleaver, coins and a luncheon. The archaeological works will last the next three years. They are implemented as part of the Archaeobalt project, co-financed from the European Union under the South Baltic Program 2014-2020. The project leader is the University of Gdańsk and the partners are the Gdańsk Museum, the Bornholm Museum, the University of Aarhus (Denmark) and the University of Lund (Sweden). The Wisłoujście fortress is a complex of defensive buildings on the right bank of the Martwa Wisła. It was established in a place where in the medieval coastal guards operated controlling the estuary of the Vistula to the Baltic Sea.

Silesian scientist published his monograph in the series „Studies in Computational Intelligence“

2018-08-14

The monograph „Decision Tree and Ensemble Learning Based on Ant Colony Optimization“ by Dr. Jan Kozak from the Department of Knowledge Engineering at the University of Economics in Katowice was published in the series „Studies in Computational Intelligence“ by Springer. The publication of a Silesian scientist concerns machine learning using computational intelligence. In particular, it is devoted to learning decision trees and classifiers using ant algorithms. The Studies in Computational Intelligence series publishes new achievements and progress in various areas of computational intelligence, and the published books are indexed in databases Web of Science, EI-Compendex, DBLP, SCOPUS, Google Scholar and Springerlink. More: <https://www.springer.com/us/book/9783319937519>

Professor Maksymowicz becomes adviser to Deputy Prime Minister Gowin

2018-08-16

Professor Wojciech Maksymowicz, vice-rector of the University of Warmia and Mazury in Olsztyn for Collegium Medicum will be the advisor to Deputy Prime Minister Jarosław Gowina. The Minister of Science and Higher Education appointed Prof. Wojciech Maksymowicz to the team for development of science and higher education. Professor Maksymowicz is a neurosurgeon at the University Clinical Hospital in Olsztyn, vice-rector of the University of Warmia and Mazury for Collegium Medicum and the initiator of the Olsztyn clinic Alarm Clock for adults. He declares that he will translate the effects of science into everyday practice. The basic task of the team is to monitor the implementation of the new law on higher education, which will become applicable in Polish universities from October this year.

Projects of scientists from the Lublin University of Technology awarded in the LIDER competition

2018-08-16

The National Center for Research and Development announced the winners of the 9th LIDER competition. 51 scientists will receive a total of approximately PLN 60 million. Four scientists from the Lublin University of Technology will receive a total of nearly PLN 4.8 million for the implementation of their innovative projects and managing their own research team. The awarded projects are: «Development of technology for increasing the aerodynamic performance of rotorcraft» by Eng Ksenia Siadkowska, PhD student at the Faculty of Mechanical Engineering; «The use of functional zeolite structures for the production of asphalt mixtures in the asphalt foaming process» – by Dr Eng Agnieszka Wozuk from the Faculty of Civil Engineering and Architecture; «New technology of plastic forming of hollow products with flanges for the mining industry» – by Dr Eng Grzegorz Winiarski from the Faculty of Mechanical Engineering; «The production of ultrapure

zeolites and mesoporous siliceous materials from fly ashes for selected environmental applications» - by Rafał Panek, MA, from the Faculty of Civil Engineering and Architecture.

Institute of Psychology of the Jagiellonian University launches a special psychological guide

2018-08-16

The Institute of Psychology of the Jagiellonian University published a special quarterly journal „I, we, they. Political Guide to Politics“ devoted to psychology in the era of neuroscience. The publication was created in cooperation with Institute of Psychology at the Jagiellonian University in Krakow. The guide contains more than a dozen articles and interviews with scientists associated with the Institute. One of the university's mission is to go beyond the walls of the university and share knowledge in a way that facilitates understanding of modern science, its methods and achievements. - We are happy that thanks to cooperation with « I, we, they», the Institute of Psychology of the Jagiellonian University has gained access to a wide range of readers - said Dr. hab. Przemysław Bąbel, deputy director of the Institute of Psychology. In the articles, Krakow researchers described topics related to pain, consciousness, brain plasticity, modern neuroimaging technologies, role of psychology in legal processes and religiousness.

5th Conference of Expert Rights of the Student

2018-08-16

On August 23-26, 2018, the 5th Conference of Expert Rights of Students will be held at the Warsaw School of Economics. The purpose of the conference organized by the Students' Parliament is to prepare student self-government organizations to conduct training in the field of student rights and duties. Conference participants will be prepared methodically and substantively to carry out this type of training. Each student self-government has the possibility to delegate one representative who will take part in the prepared trainings, and the second person on the reserve list. The access is limited and made on the first come- first accepted basis. Participation in the conference is free of charge for representatives of student self-governments (it also includes accommodation and meals). Participants cover only travel costs. More: <https://eps.psrp.org.pl/2018/07/29/juz-wkrotce-rusza-rejestracja/>

Center for German and European Studies receives a positive assessment of the international commission

2018-08-16

Willy Brandt Center for German and European Studies of the University of Wrocław (CSNE) received a very positive assessment of its scientific and didactic activity from the international evaluation committee and guaranteed funding until 2023. In the opinion of the CSNE commission, «it is an institution with high academic qualifications and it is particularly important for foreign culture and science policy, Polish-German bilateral issues and for Europe.» The evaluation committee recommended further funding for CSNE to the same extent as it was subsidized earlier and without any additional conditions. The German Headquarters of the Academic Exchange, the institution that co-finances 20 similar centers in the world, has already decided to support the Center by 2023.

Gdańsk scientists published in the journal Scientific Reports

2018-08-16

The article of the scientists from the Medical University of Gdańsk „Immunophenotyping and transcriptional profiling of in vitro cultured human adipose tissue derived stem cells” was published in the journal „Scientific Reports”. The work was conducted under the direction of Dr Michał Pikuła from the Laboratory of Tissue Engineering and Regenerative Medicine of the Department of Embryology and Dr. Arkadiusz Piotrowski, Prof. Medical University of Gdańsk from the Department of Biology and Pharmaceutical Botany. It presents an extensive evaluation of the phenotype and molecular profile of in vitro grown fat adipose stem cells. Stem cells are an extremely promising material for tissue engineering and regenerative medicine. They have the ability to transform into other cell types, immunoregulatory abilities and are an important model for the study of new drugs. More: <https://gumed.edu.pl/48895.html>

Sumorobots from Białystok University of Technology receive silver medals in Beijing

2018-08-17

From August 10 to 12, the team SumoMasters from the Białystok University of Technology competed in Beijing in the Robotchallenge 2018. Robots of Białystok's students won 3 silver medals in 3 different categories. Every year, the competition in Beijing gathers an increasing number of participants from many countries of the world. About 1500 robots from 30 countries took part in the challenge this year. Due to such attendance and participation of so many countries, Robotchallenge in China are the second most important competition of the sumorobots in the world. - I am very happy with the attitude and results of our team and the fact that our robots can effectively fight not only in the Mega Sumo, but also in the Mini and Nano Sumo categories - said team supervisor, Dr Eng Rafał Grądzki. More about sumo robots designed at the Faculty of Mechanical Engineering of the Białystok University of Technolo-

gy can be found at: <https://wm.pb.edu.pl/studenci/kola-naukowe/projekty-studenckie/sumomasters/>

Landscape architects from Krakow University of Technology to present solutions at the London exhibition

2018-08-17

61 projects from 24 countries, including landscape projects of the architects from the Krakow University of Technology will be presented at the IFLA Europe Exhibition 2018 Landscape Architecture as a Common Ground. The exhibition will be officially opened on September 7 in London. The aim of the exhibition is to show the importance of the landscape architect's profession in shaping a common space. The presented projects are to bring closer «the idea of green connections and the reconstruction of water structures as well as pedestrian and bicycle corridors». The curator and coordinator of the exhibition is IFLA Europe general secretary Dr Eng Urszula Forczek-Brataniec from the architecture department of the Krakow University of Technology.

School of Open Mind XX- Scientific Conference of Students and PhD Students in Kielce

2018-08-17

On August 27 - September 2, 2018, the School of Open Mind XX Scientific Conference of Students and PhD Students will take place in Kielce. Its organizers are Faculty of Humanities, Faculty of Law, Administration and Management at the Jan Kochanowski University in Kielce, National Pedagogical University in Tarnopol, National University in Kamieniec Podolski and the Academy of Humanities and Pedagogy in Krzemieniec. The aim of the conference is to integrate the academic community. Every year, dozens of participants with their scientific supervisors participate in the meetings speaking only Polish, Ukrainian and Russian. Participants are prohibited from using non-Slavic languages. During the event, methodological workshops are conducted by scientists from three countries and interdisciplinary PhD conference will take place. Participants will also take part in three Polish, Ukrainian and Russian cultural evenings.

Wroclaw University of Technology and Bank of New York Mellon jointly to organize the competition

2018-08-17

Wroclaw University of Technology and The Bank of New York Mellon (BNY Mellon) are organizing a competition for the best master's thesis in applied mathematics. The main prize is 15 thousand PLN. Students of Polish universities who wrote or will write a master's thesis in applied mathematics in the years 2017-2018 can participate in the competition. The jury will be the representatives of the university, associated with the Hugo Steinhaus Center, and representatives of BNY Mellon. They will evaluate the submitted works in terms of the originality of the idea, mathematical correctness and the possibility of applying the solution proposed by the students in practice. The competition is the first result of a cooperation agreement signed in 2017 by

both institutions. The papers, written in English, or translated into English, can be submitted by September 30 through a dedicated website: https://www.bnymellon.com/pl/en/competition/index.jsp?cid=CM_Vanity_science

Solar boat of Gdansk students comes seventh in the world championship

2018-08-17

The boat designed by the students of the Ocean Engineering and Shipbuilding of Gdańsk University of Technology took the 7th place in the general classification of the solar boat world championship. This is the best result among all representatives of Polish universities. The boat of Gdańsk University GUT SOLAR1 took part in competitions in Groningen and Leeuwarden in the Netherlands, finally taking 7th place for 22 starting units. - The regatta consisted of various competitions in different weather conditions. The boat participated in the sprint races, long-distance races in city channels that required excellent maneuverability and skills- reports MSc. Hanna Pruszek, tutor of students.

Students of the Bialystok University of Technology receive silver medal in Mars rovers competition in Canada

2018-08-20

The students of the Faculty of Mechanical Engineering at Bialystok University of Technology and their ARGO rover took the second place in the Canadian International Rover Challenge. The Canadian International Rover Challenge is based on the simulation of the Martian mission. The rover is to take samples of the soil and look for life in them, run mining equipment and find a wounded astronaut, seal his space suit and deliver oxygen. The construction of the Argo rover was supported by the Mayor of Białystok under the agreement on the promotion of the city. Participation in the competition was financed by the project «The best of the best! 2.0.» as part of the Operational Program Knowledge Education Development co-financed by the European Social Fund.

Competition for the best work in Project Management

2018-08-20

The Association of International Project Management Association (IPMA) Poland and the Jury of the Project Master Competition invite students to submit bachelor, master, postgraduate and PhD theses in the competition for the best project management work. To participate in the Project Master 2018 competition, everyone who obtained their diploma or PhD thesis at one of the Polish universities, from October 1, 2017 to September 30, 2018. The project must relate to the field of project management. The deadline for submitting works is October 7, 2018. More: http://www.projectmaster.ipma.pl/wp-content/uploads/2018/05/13.5.18r_Regulamin_Project_Master_2018.pdf

Gdańsk scientist participating at the Asian Hyperbaric and Diving Medicine Association conference

2018-08-20

Dr Jacek Kot, head of the National Center for Hyperbaric Medicine, GUMed participated as an invited lecturer at the annual scientific conference „Asian Hyperbaric and Diving Medicine Association (AHD-MA)” in Bangkok. During the conference, Dr. Kot presented three plenary lectures: «Intensive care and HBOT»; «Pre-conditioning of divers and accelerated decompression» and «Extreme recreational diving». The Gdańsk scientist presented physiological and medical aspects of diving in hard-to-reach places (in the mountains, in caves), to extreme depths (exceeding 300 meters), using different types of diving equipment (open circuit, closed circuit). The conference gathered representatives of most Asian countries with the exception of China and Japan, which have their own national scientific societies and do not participate in joint international conferences.

Professor Barbara Kozusznik becomes President of the Division 1 International Association of Applied Psychology

2018-08-20

Professor Dr Barbara Kozusznik, head of the Department of Work and Work Psychology at the Faculty of Pedagogy and Psychology of the University of Silesia, became the president of Division 1 International Association of Applied Psychology (IAAP). IAAP is the largest and oldest international organization of psychologists, and its largest section is Division 1 - a section of work and organizational psychology. The main goal of the section associating psychologists from most countries of the world is to influence the policy of international organizations e.g. the United Nations, the World Health Organization and International Labor Organization. Professor Kozusznik specializes in organization and management psychology. She is the author or co-author of 16 monographs and over 100 scientific articles devoted to the issues of managing, improving the work of employee teams and developing and improving the effectiveness of operations.

Professor Jan Węglarz wins prestigious award in the field of operational research

2018-08-20

Professor Jan Węglarz from the Poznań University of Technology was awarded the Distinguished Service Medal Award by the Association of European Operational Research Societies. Earlier, Prof. Węglarz received the Gold Medal of this organization, along with Prof. Jacek Błazewicz and Prof. Roman Słowiński. The Association of European Operational Research Societies is an organization bringing together 32 countries and several thousand members dealing primarily with operational research - a scientific discipline related to decision theory, allowing to determine a method and solve specific problems related to making optimal decisions. Professor Węglarz is the head of the Operational Research and Artificial Intelligence Unit at the Institute of Computer Sci-

ence at the Poznań University of Technology. He is the creator of the internationally recognized school of science in the field of operational research and its applications - mainly in computer science.

University of Silesia to launch project „University of the Best”

2018-08-20

University of Silesia and the City of Katowice with the support of the Youth Palace and Psychological and Pedagogical Counseling No. 5 in Katowice will implement the educational initiative „The University of the Best”. «The University of the Best» is a project addressed to the most talented primary and secondary school pupils living in Katowice, who go beyond the curriculum of their scientific interests. The main method of work in the «University of the Best» will be personalized training based on tutoring. The result of the cooperation between the supervisor and the student is to find the optimal path of scientific development and adapt it to the interests of the pupil, as well as discovering and developing his talents. The project will be implemented in two periods, from October 2018 to June 2020. More: www.uniwersytetnajlepszych.us.edu.pl.

„Show - Share” conference at the Copernicus Science Center

2018-08-21

The Copernicus Science Center in Warsaw invites participants on 24 and 25 August 2018, to the 12th „Show - Share” conference devoted to constructionism. During the conference, two lectures of special guests are planned. Paulo Blikstein will explain the issue «Learning by creating and constructing: how to use digital fabrication tools in education?» In turn, Gary Stager will give a lecture entitled «Discover to learn. Constructivism, or production, DIY and engineering in education.» The event will also be accompanied by workshops „Constructing in education” and a debate during which participants will try to answer the question: How should education change in Poland in the 21st century? More: <http://www.kopernik.org.pl/projekty-specjalne/konferencja-pokazac-przekazac/>

InterNanoPoland 2018 conference in September in Katowice

2018-08-21

InterNanoPoland 2018 is the largest scientific and business conference in Poland dedicated exclusively to nanotechnology. It will be held in Katowice on 12-13 September. It is an international forum of scientists, entrepreneurs and institutions from the business environment shaping the future of national and global nanotechnology. The organizers are the Foundation for Nanosciences and Nanotechnologies NANONET and the Silesian Nano Cluster, which form a platform for cooperation of entrepreneurs, scientific institutions, public administration and business support organizations to increase the importance of nanotechnology in shaping the innovative economy in Silesia and Poland. The conference offers the possibility of presenting R & D projects, as well as presenting own achievements and sharing the results of work before the media and invited guests. The Nano Startup Challenge is the only in Poland dedicated nanotechnology dedicated startup competition. More: <https://www.us.edu.pl/konferencja-pt-inter-nano-poland-2018>

Conference on the 21st century construction at the University of Technology and Life Sciences in Bydgoszcz

2018-08-21

The University of Technology and Life Sciences in Bydgoszcz invites participants to the IV International Scientific Conference CEPPIS (Civil Engineering - Present Problems, Innovative Solutions). The event is a part of the celebration of the European Year of Civil Engineers (2018 European Year of Civil Engineers). CEPPIS is a flagship event organized by the COMA Scientific Association for Building Management. It is attended by scientists from around the world dealing with contemporary construction problems. The meeting is an opportunity to present the results of research, as well as to exchange experiences of the scientific community. During the conference, which will be held at the University of Bydgoszcz on September 12, it will be possible to take part in the discussion and presentation of theoretical or practical considerations as well as the experiences and results of the conducted research. The theme is the construction of the 21st century - challenges and risks. The official language of the conference is English.

SmartMoto Challenge - electric motorcycle racing competitions in Wrocław

2018-08-21

Students of the Wrocław University of Technology invite participants to the international competitions of SmartMoto Challenge electric motorcycles. This is the first such event in Poland, earlier competitions were held in Barcelona and Moscow. The Wrocław competition starts on the 24th of August. Student vehicles can be seen on the campus of the Wrocław University of Technology (August 24-25), then on the off-road track at Wzgórze Kilimandżaro in Wrocław (August 26). Seven motorcycles constructed by teams from Poland and Russia are qualified for the competition. The SmartMoto Challenge competition is about designing and constructing a cross-country motorcycle. The main goal of the com-

petition is to use the knowledge gained during the studies in a real industrial project. During the competition, the jury will assess the motorcycle and its static and dynamic capabilities as well as the team's skills in business aspects.

Polish-Israeli summer school was held at the Warsaw School of Economics

2018-08-22

On August 6-16, 2018, the Warsaw School of Economics (SGH) in Warsaw in cooperation with the College of Management of Rishon LeZion in Israel organized a summer course of economic law analysis. Over 50 students EMLE program (European Master in Law and Economics) from Israel and Poland took part in classes devoted to corporate governance and economic analysis of the judiciary procedures. The Students' Association for Economic Analysis of the Warsaw School of Economics participated in the organization of the summer school. The College of Management at Rishon LeZion is a private university founded in 1978. The Israeli university educates around 12,000 students within bachelor and master studies.

International conference Polish Ceramics 2018

2018-08-22

The Faculty of Materials Science and Ceramics of the AGH University of Science and Technology in Krakow is organizing the 10th International Ceramics Conference 2018 on September 9-12, 2018. Its aim is to present currently conducted research and scientific and technical achievements aimed at deepening the cooperation of scientific and industrial centers. The topic of the conference will concern raw materials and broadly understood ceramics. Co-organizers of the event are the Institute of Ceramics and Building Materials and the Polish Ceramic Society. More: www.polishceramics.pl

Congress of agricultural economists to be held at the Warsaw University of Life Sciences

2018-08-22

The Faculty of Economic Sciences of the Warsaw University of Life Sciences invites students to participate in the XXV Congress of the Association of Agricultural and Agribusiness Economists. The Congress entitled «Challenges for the development of agribusiness and rural areas» will be held on September 11-13, 2018. The event is addressed to representatives of science and business in the field of agriculture and agribusiness. The aim of the Congress is to present the results of research related to the functioning of agribusiness and rural areas. The key goal is to create the conditions for scientific discussion on new areas of research that provide knowledge necessary to effectively solve rural problems. More: <http://www.seria.com.pl/>

30 years of the Arboretum in Wojsławice - a branch of the Botanical Garden of the University of Wrocław

2018-08-22

The Arboretum in Wojsławice - a branch of the Botanical Garden of the University of Wrocław celebrates its 30th birthday. There are over 12,000 plants growing there on 62 hectares of the park. Wojsławice is located 50 km from Wrocław in the protected landscape area of the Strzelińsko-Niemczańskie Hills. The park was founded there in 1811 by the families von Prittwitz and von Aulock. In 1880, Fritz von Oheimb bought the property in Wojsławice. This expert on plants and climatic conditions revived the area and created a park that already in his lifetime enjoyed fame and recognition. His son Arno continued the works until 1946. After World War II, the park was opened to the public only in 1962. In 1988, it became the first branch of the Wrocław Botanical Garden in history. The Arboretum has the status of «Display Garden AHS» - the show garden of the American Daylily Association. Currently, work is underway to create the Polish Millennium Garden, presenting, achievements of Polish breeders.

Wrocław University of Environmental and Life Sciences promoted in the Shanghai ranking

2018-08-22

In the latest Shanghai ranking, Wrocław University of Environmental and Life Sciences took 186th place in the field of food science and technology, for the top 300 universities in the world. The veterinary medicine department also appeared in the ranking. The Wrocław University made its debut in the 2017 ranking at 255th place in the food science and technology field. The success was due to the increasing number of citations - mainly the work of authors from the biotechnology and food sciences department. Next year brought promotion to 186th place, and the department of veterinary medicine was added in the ranking for the first time - on 190th place. The Academic Ranking of World Universities, called the Shanghai ranking, analyzes the academic staff and students in terms of winning awards in significant scientific competitions and the number of citations and publications in the most important scientific journals.

Toruń mathematicians win medals of the International Mathematical Professions in Bulgaria

2018-08-22

Medals, awards and distinctions were received by students of the Faculty of Mathematics and Computer Science at the Nicolaus Copernicus University at the XXV International Mathematical Competition IMC 2018 in Blagoevgrad in Bulgaria. The organizers of the competition were University College London and American University in Bulgaria. During the competition, student of the University of Toruń Kamil Dunst took the second prize and silver medal; Karolina Wojtyniak took the third prize and bronze medal, and Władysław Klinikowski received a distinction. 351 students from Europe, Africa, Asia and the Americas took part in this year's tournament. Competitors solved 10 tasks within 2 days (each day 5 tasks in 300 minutes). The trip of three award-

ed students and their supervisors was financed by the Ministry of Science and Higher Education as part of the project «The best of the best! 2.0.»

University of Warsaw to hold Workshops on Artificial Intelligence

2018-08-23

The Interdisciplinary Center for Mathematical and Computational Modeling of the University of Warsaw (ICM) invites participants to an all-day and free workshop on August 31. The aim is to promote cutting-edge Artificial Intelligence (AI) methods and implement these methods on the latest Power 9 equipment within OpenPower Academia. The event participants will learn the secrets of artificial intelligence and the newest achievements of the industry's pioneers, using POWER9 systems implemented in the world's largest SUMMIT supercomputer. During the workshop participants will have remote access to POWER9 systems. The workshops will allow them to learn about the newest developments in the field of deep learning tools and techniques, and learn how to use OpenPOWER systems and PowerAI tools to perform AI projects. Workshops will start at 10.00 at the ICM Technology Center in Warsaw at ul. Kupiecka 32.

Discoverer Day - free sightseeing of the Copernicus Science Center

2018-08-23

This coming Sunday, August 26, everyone is invited to visit the Copernicus Science Center in Warsaw for free. At the Discoverer Day, Samsung, the strategic partner of the Copernicus Science Center, invites the participants to see brand new attractions. The Slo-Mo laboratory will allow to film mixed liquids of different density and sound waves with the newest Samsung Galaxy S9 and Note 9 smartphones, equipped with Super Slow-mo mode. In another sector, the journey into space and the chance to watch Earth and other planets from an astronaut perspective will be available with Samsung Gear VR technology. Visitors will also be able to see a maze

of vacuum cleaners that will be used as special equipment to overcome the maze. On August 26, 2018, the Copernicus Science Center will be open from 9:00 - 19:00.

University City of Science to be launched in Katowice in September

2018-08-23

In September, meetings promoting science will take place within the University of Science. The university plans to hold a series of lectures and exercises addressed to students and teachers of primary schools, middle schools and high schools. Classes will be organized in four cycles: «Singularities of the World of Physics», «Biorobotics», «Encounters with science» and «Amazing history of mankind». Lectures and exercises will be conducted by scientists from the Didactic Laboratory of Physics of the University of Silesia, the Unibot group, the University Scientific Society and the Center for Continuing Education at the University of Silesia. The classes will be held at the university campus. The first event is scheduled for September 10. More: <https://www.facebook.com/events/237268810217857/>

Scientists from Toruń become laureates of the Sonatina 2 competition

2018-08-23

Dr Nicolas Peschken from the faculty of physics, astronomy and computer science and Dr Michał Złoch from the Interdisciplinary Center of Modern Technologies of the Nicolaus Copernicus University in Toruń become the laureates of the Sonatina 2 competition of the National Science Center. Dr Peschken will receive over 600,000 PLN for the implementation of the project «The impact of cosmic space-driven winds on disk galaxies and the evolution of their angular momentum», and Dr. Złoch will obtain over 950,000. PLN for the project «The use of MALDI-TOF / MS technique in monitoring and rapid diagnosis of the development of diabetic foot infection». The Sonatina 2 competition is aimed at scientists who have a PhD degree no longer than 3 years. In this year's competition, 154 applications were submitted and funding was granted to 45 researchers. The whole project budget is over PLN 30 million. As part of the grant, the laureates are paid within his Polish scientific organizations, their research projects are supported and they are provided with an internship at a foreign scientific center lasting for 3 to 6 months.

British astronaut to open the European Rover Challenge in Poland

2018-08-24

British astronaut of the European Space Agency Timothy Peake will open the European Rover Challenge, which for the fourth time will be held in Poland on September 14-16, 2018 at the Museum of Nature and Technology in Starachowice. According to the organizers, 400 competitors from around the world will participate in the competition of Mars rovers. In this year's final, 50 teams from six continents will compete, including a record number of teams from Europe. During last three years, the European Rover Challenge has collected over 70,000 visitors and 700 teams, becoming the largest robotics and space event in the world. The Polish government has

inscribed the event in the Polish Space Strategy under the name «sources of creating future specialists for the space sector». More: <http://roverchallenge.eu/pl/home/>

Director of the University of Rzeszów Library to take part in the IRONMAN World Championships in Hawaii

2018-08-24

Dr Bożena Jaskowska, director of the University of Rzeszów Library, was qualified for the IRONMAN world championship, which will take place in October in the cradle of this sport in Hawaii - informs Dr. Maciej Ulita, a spokesman at the University of Rzeszów. - I did not think I would tell you about it this year, but I did it! It made the impossible become possible - says Dr. Jaskowska. At the IRONMAN KALMAR competition in Sweden, she was qualified for the IRONMAN World Championships in Kona. The crossing of 3,800 meters, followed by 182 km by bike and running 42.2 km took her 10 hours and 39 minutes. With this result, I took the fourth place in my age category. Already on October 13, 2018, on my 40th birthday, I will proudly represent our country during the 40th world championship on the Hawaiian island of Kona - adds Dr. Jaskowska.

British-Polish Scientific Forum to be held in September in Warsaw

2018-08-24

On September 13-14, 2018, the British-Polish Science Forum will be held at the Warsaw Marriott Hotel. The event is organized by the British Embassy in Warsaw and the Ministry of Science and Higher Education. The Forum will be the main point of the British-Polish Year of Entrepreneurship, Science and Innovation and one of the activities agreed by the Prime Ministers of Theresa May and Mateusz Morawiecki during the last Polish-British intergovernmental consultations. During the two-day Forum, the organizers are planning lectures, discussion panels, presentations and workshops devoted to Polish-British cooperation in the field of research,

development, innovation and higher education. More: <https://www.gov.uk/government/news/uk-poland-science-forum-to-be-held-in-warsaw>

Researcher at the University of Silesia participates in the congress One World, Many Voices

2018-08-24

Dr Katarzyna Węsierska from the Institute of the Polish Language of the University of Silesia as the only representative of Polish speech therapists participated in the first congress „One World, Many Voices: Science & Community”. The Hiroshima Congress was organized by the International Fluency Association (IFA), the International Cluttering Association (ICA) and the International Stuttering Association (ISA). During the congress, dr Węsierska presented the results of the research conducted in international teams, and during the annual ICA meeting she was elected for the next term as its secretary and editor of its newsletter. Dr Węsierska is an adjunct at the Institute of Polish Language at the University of Silesia; she founded and runs the Speech Therapy Center in Katowice, she is the head of the Postgraduate Studies: Speech Disorders. As the first Polish speech therapist, she was awarded the prestigious title of European Speech Disorders Specialist. More: <http://www.us.edu.pl/dr-hab-katarzyna-wesierska-okestniczka-one-world-many-voices-science-community>

Conference „Technical Safety - changes for development“ at the Gdańsk University of Technology

2018-08-24

The Office of Technical Inspection (UDT) and the Faculty of Mechanical Engineering of the Gdańsk University of Technology invite participants to the conference „Technical safety - changes for development“ on 5 September at the Gdańsk University of Technology. The representatives of the Ministry of Finance and the Polish Agency for Enterprise Development, were invited to participate in the event to present the Constitution for Business. The organizers invite students, PhD students and university employees - in particular representatives of administrative services, management staff, technical specialists, persons responsible for health and safety, manufacturers, designers and users of technical devices, as well as persons interested in ensuring technical safety. The UDT will present the solutions in modern research services, mobile laboratories, a new approach in customer service and certification in the field of public safety. More at: https://www.udt.gov.pl/images/DBT/Gdask__05.09.2018.doc

International Speech Therapy Conference „Speech fluency disorders - theory and practice“

2018-08-24

Institute of Polish Language and Faculty of Theology of the University of Silesia and the Foundation for Knowledge and Social Dialogue „Agere Aude“ invite participants to the 3rd international speech therapy conference „Speech fluency disorders - theory and practice“. The conference is planned for August 31 and September 1 and it is addressed to a wide audience - theoreticians and practitioners of speech therapy. The aim of this conference is to disseminate the achievements and the latest research results in the field of speech fluency disorders. The organizers plan to provide seminars for practitioners and theoreticians specializing in speech fluency disorders representing national and foreign research

and development centers. Workshops will be led by eminent specialists including: Dr. Joseph Agius, Dr. Mięczysław Chęćek, Prof. Kurt Eggers, Benny Ravid, Manon Spruit, Dr. Trudy Stewart, Dr. Katarzyna Węsierska and Prof. Tomasz Woźniak. More: www.konferencja-zpm.edu.pl.

Employees of the Karkonosze State High School were trained in Dresden

2018-08-24

Employees of the Karkonosze State High School (KPSW) in Jelenia Góra visited the Technical University of Dresden (Technisches Universitaet - TU Dresden), to be trained in conducting innovative activities with youth and project work. Employees of KPSW participated in organization of the Summer Laboratory. In 2016, such a Laboratory took place in Jelenia Góra and in 2017 at the Technical University of Liberec. The topic of this year's summer classes was «Smart Materials». Students from 14 to 18 years of age from Poland and Germany carried out their projects under the supervision of qualified staff, using the knowledge provided through demonstrations, experiments, individual and group work. TU Dresden is one of the largest technical universities in Dresden. 36 thousand Dresden students can choose from 120 courses.

Professor Udalski awarded the Karl Schwarzschild Medal

2018-08-27

Professor Andrzej Udalski from the Astronomical Observatory of the University of Warsaw has been awarded the Karl Schwarzschild Medal, prestigious award in the field of astronomy and astrophysics in Germany. The Polish scientist received the medal for his pioneering contribution to the development of a new field of astrophysical research «time domain astronomy», which describes the variability of brightness and other parameters of the Universe objects at different time systems. As Prof. Joachim Wambsganss, president of the German Astronomical Society emphasized, Andrzej Udalski significantly enriched almost all areas of astronomy. For over 25 years, he has been running the OGLE project, which

since its launch has become one of the largest surveys of sky variability and a source of pioneering research in the field of «time domain astronomy». Professor Andrzej Udalski is a real member of the Polish Academy of Sciences, a member of the Polish Academy of Arts and Sciences, and since 2012 he has been also a foreign member of the American National Academy of Sciences.

Foundation for Polish Science to launch a new call TEAM-NET

2018-08-27

In October 2018, the Foundation for Polish Science starts a new call for applications within TEAM-NET project, implemented and financed from the Intelligent Development Operational Program. As the Foundation for Polish Science informs, the aim of TEAM-NET is to encourage Polish scientific units and researchers working in them to establish closer scientific cooperation. In the TEAM-NET project, it will be possible to finance not one but a network of cooperating research teams that will be able to implement large-scale research and development projects of interdisciplinary character. Each team can receive financing up to PLN 3.5 million for 36 months. These funds can be spent for the salaries of leaders and team members, scholarships, as well as the costs of implementing an interdisciplinary research program. The call for applications for the TEAM-NET will be conducted from October 1 to October 31, 2018. The contest's budget is PLN 100 million. More: <https://www.fnp.org.pl/oferta/team-net/>

University of Gdańsk to develop documentation for the construction of the port in Gdynia

2018-08-27

The University of Gdańsk will develop environmental documentation for the construction of the Outer Port in Gdynia. The agreement on this matter was signed by the rector of the university, Prof. Jerzy Gwizdała and the president of the Gdynia Maritime Port Authority - Adam Meller. Researchers at the Gdańsk University will conduct research for the next 12 months. They are to answer the question about the significant negative impact of the construction of the Outer Port on Natura 2000 areas. The scope of analyzes will include inventory of avifauna (birds) staying in the Natura 2000 area of the Puck Bay, ichthyofauna (fish) and benthic organisms living on the bottom of the reservoir. - The future of Gdynia is connected with a deepwater container terminal dealing with the largest vessels that are able to reach the Port of Gdynia. Assuming that around 700-800 people will work in the terminal, it will generate over a dozen thousand jobs in the entire country - announces Adam Meller.

Lubuski Marshal's Office supports future doctors

2018-08-27

The Marshal Office of Lubuskie Voivodeship awarded future doctors with scholarships. The condition for receiving the support was a declaration of employment in one of the Lubuskie hospitals for a period equal to the time of the scholarship. In September, the Office will start another call for this program. Scholarships of 2 thousand PLN monthly were awarded 61 doctors. 16 applications were submitted by students from the University of Zielona Góra, the others came from Poznań (15), Bydgoszcz (5), Szczecin (7), Katowice (2), Lublin (4), Olsztyn (1), Wrocław (5), Łódź (5) and from Rzeszów (1). To support future doctors, the Marshal's Office has allocated 900,000 PLN this year. In the next two years, it will amount to one million PLN. The next call for financial aid applications will start on Sep-

tember 1 and will last until October 31. The rules for applying for next support program are the same as for the first call.

Bank Pekao S.A. to become partner of the Big Data Analysis program at the Kozminski University

2018-08-28

Bank Pekao S.A., one of the largest financial institutions in Central and Eastern Europe, has become a partner of the Big Data Analysis program at the Kozminski University in Warsaw. Big Data Analysis is a specialty in the second-cycle studies in the field of Master in Finance & Accounting. Its aim is to provide both graduates with theoretical knowledge and practical skills. Therefore, the students of the Warsaw Academy will have the opportunity to participate in the bank's business projects and obtain unique mentoring during their studies. Bank Pekao S.A. will also provide lecturers who will teach students about modern technologies operating in financial institutions. In accordance with the agreement signed between Pekao S.A. and the Kozminski University, students of the new course Big Data Analysis will have the opportunity to take up internships at the bank.

State Higher Vocational School in Chełm to co-organize the Polish Navigational Championships

2018-08-28

From September 3 to 9, 2018, the State Higher Vocational School in Chełm organizes the Airplane Navigation Polish Championship in the senior and junior categories. The organizer of the championship is the Chełm High School with the participation of the Polish Aeroclub. Professor Dr Eng Arkadiusz Tofil, Rector of the State Higher Vocational School in Chełm, said that the appropriate infrastructure owned by the university and its experience in the organization of air events will contribute to ensuring that the competition is carried out at the highest level with proper security. The sponsor of the com-

petition is the largest charter airline in Poland - Enter Air, which financially supports the team of the State Higher Vocational School in Chełm. This is the next stage of cooperation between the university and the airline, which has so far resulted in recruitment for the position of a pilot among students.

Geotechnical conferences in Warsaw

2018-08-28

The Polish Geotechnical Committee and the Geotechnical Department of the Warsaw University of Life Sciences are organizing the 18th National Conference on Soil Mechanics and Geotechnical Engineering and the 7th National Conference of Young Geotechnicians on October 4-7, 2018. The conference «Challenges of geotechnics in Poland» is addressed primarily to designers, contractors, employees of specialist companies, academic staff, PhD students and students dealing with geotechnical issues. As part of the event, there will be four thematic sessions: Research and parameter selection, Modeling and design calculations, Threats and securing buildings and Transport infrastructure. More: <http://kkmgig2018.kg.sggw.pl/index.php/en/>

Scientists from the Polish Academy of Sciences published in the scientific journal „Cell”

2018-08-28

Polish scientists from the Institute of Biochemistry and Biophysics of the Polish Academy of Sciences in Warsaw described the mechanism of defense against so-called jumping genes (retrotransposons), i.e. DNA fragments that are specific parasites in cells. Their article was published in the scientific journal „Cell” - one of the most prestigious scientific magazines in the world. As the National Science Center emphasizes, this is the second Polish publication in this periodical in history. Scientists of the Polish Academy of Sciences headed by Prof. Andrzej Dziembowski conducted their research thanks to financial support from the National Science Center, grants from the European Science Council and the Foundation for Polish Science. See the article in the journal Cell: [https://www.cell.com/cell/fulltext/S0092-8674\(18\)30917-6?_returnURL=https%3A%2F%2Flinkinghub.elsevier.com%2Fretrieve%2Fpii%2FS0092867418309176%3Fshowall%3Dtrue](https://www.cell.com/cell/fulltext/S0092-8674(18)30917-6?_returnURL=https%3A%2F%2Flinkinghub.elsevier.com%2Fretrieve%2Fpii%2FS0092867418309176%3Fshowall%3Dtrue)

Researcher at the University of Life Sciences in Wrocław receives Nor-Feed Award

2018-08-28

Dr Kamil Sierzant from the Department of Biology and Animal Breeding of the University of Life Sciences in Wrocław won the Nor-Feed-Award 2017 for his PhD thesis on the use of polyphenols in feeding farm animals. Polyphenolic additives are a group of natural antioxidants obtained from plants that improve the work of the circulatory system. This is best seen on the example of so-called the French paradox, which occurs in the countries of the Mediterranean basin, where the population is less likely to suffer from cardiovascular diseases - explains the researcher. In the case of animal nutrition, preparations containing polyphenols, e.g. herbal extracts or essential oils, may change the turnout of certain microorganisms in the gastrointestinal tract,

acting similarly to nutrition antibiotics prohibited in European Union. Polyphenolic compounds can also improve the condition of animals and their well-being. More: http://www.glos.upwr.edu.pl/aktualnosci/48231/dr_sierzant_z_upwr_z_nagroda_nfa_2017.html

Poles to compete in the International Competition for Mathematical and Logic Games

2018-08-28

Thirty-two Polish mathematicians will start in the finals of the International Mathematical and Logical Games Competition at the Pierre Diderot University in Paris on 29 and 30 August - informs Andrzej Charytoniuk from the information and promotion department of the Wrocław University of Technology. The Polish team was selected in the May qualifying rounds organized by the Faculty of Mathematics of the Wrocław University of Technology and the Wrocław branch of the Polish Mathematical Society. Over 400 mathematicians from all over Poland took part in the qualifiers. The International French Championships in Mathematical and Logic Games, also known as World Championships, have been organized in Paris since 1987. The Polish national team has participated in them since 1992 with many successes. In 2016 it won nine medals in the competition, including three golds. In 2015, the team won twelve medals including six golds.

Almost PLN 1.5 billion in the „Fast Track” program for entrepreneurs by the end of the year

2018-08-29

The National Center for Research and Development (NCRD) will allocate nearly PLN 1.5 billion by the end of 2018 for entrepreneurs within the „Fast Track” program. - The «Fast Track» provides a specific support and concrete results contributing to the civilization and technological leap of our country. Since the beginning of the year, both large and small companies have submitted to us over 500

innovative projects, applying for a total co-financing of nearly PLN 4 billion. So we can see that the willingness to innovate is really big in Polish enterprises - says deputy director of NCRD Izabela Żmudka. The call for proposals in the competition for micro, small and medium enterprises will last until December 14. In the case of large companies and consortia, the leader of which is a large entrepreneur, applications can be submitted from September 3 to November 30. 1st Congress of Physics Teachers

2018-08-29

The first Physics Teachers Congress will be held in Łódź on September 14, 2018. The event is co-organized by the Faculty of Physics and Applied Computer Science of the University of Lodz. The aim of the Congress is to integrate the scientific community and the environment of physics teachers to exchange experiences and take actions aimed at improving the quality and achieving high effectiveness of teaching physics at all levels of education. Participation in the Congress will enable to obtain information from the representatives of the Ministry of National Education and the Ministry of Science and Higher Education on the introduced and planned changes in education, including on education, improvement and promotion of teachers of physics.

Conference „Space career paths. We educate staff for the space technology sector“

2018-08-29

On August 30, 2018, the „Space career paths“ We educate staff for the space technology sector.“ conference will be held in Warsaw. During the event, representatives of the Industrial Development Agency will present the offer of domestic and foreign institutions implementing programs that support the development of competencies necessary to work in the space business. The conference is addressed to students, members of student scientific circles, trainees, young researchers and teaching staff from universities and representatives of companies from the space sector. The event will be attended by Minister of entrepreneurship and technology Jadwiga Emilewicz and deputy minister of science and higher education Piotr Dardziński. Registration for the conference: https://docs.google.com/forms/d/e/1FAIpQLSce_O819WGwqz-sAYZ8QBifxnw8DbukXeTrArpAA1Mc9Wk8Q/viewform

IX Congress of Chemical Technology TECHEM 2018 at Gdańsk University of Technology

2018-08-29

The Faculty of Chemistry of the Gdańsk University of Technology invites participants to the IX Chemical Technology Congress, TECHEM 2018, which will take place from September 3 to 7 at the University of Technology. It is a nationwide conference that gathers representatives of business and academic society every three years. The Congress of Chemical Technology serves as a platform for scientific discussions, cooperative arrangements, business and social meetings, as well as integrates the technological environment. The formula of the event allows for the presentation of scientific achievements and their practical implementations, as well as companies from the technology industry and their achievements. The organizers planned plenary lectures, oral presentations and poster sessions in five thematic sections: harvesting of raw materials, production

of basic products, production of specialist products, new technologies and industrial biotechnology. More: <http://techem9.pg.edu.pl/>

Success of robots from the Wrocław University of Technology in Beijing

2018-08-29

Three medals - gold, silver and bronze - were won by students of the Wrocław University of Technology at the international RobotChallenge 2018 competition in Beijing. Nearly 1.5 thousand robots from 30 countries competed in China. The Freestyle Gold medal was won by the social robot Emys Pro from FLASH Robotics within the «Robotic Checkerboard» program. The silver medal in the same competition was awarded to the SpiceX 3000 realized by students from KoNaR, Revir 3D and Rapid Troopers. The bronze medal in Line Follower Enhanced competition was won by Chen Shi robot. Its task was to pass as quickly as possible the route, with various obstacles to be avoided by the robot. The RobotChallenge competition organized since 2004 is one of the largest and most prestigious events of this type in the world. Draper's telescope after renovation returns into the Center of Astronomy of the Nicolaus Copernicus University

2018-08-29

The Astronomy Center of the Nicolaus Copernicus University in Toruń, after a half-year renovation and conservation, returned one of the most valuable and well-known telescopes in the world - a historic eight-inch astrograph by Henry Draper. Students from the Laboratory of Metal Monuments Conservation at the Faculty of Fine Arts at Toruń's university have restored the device to its original appearance. The astrograph is now being reassembled and it will be available from October. The costs of materials used for conservation were covered by the Foun-

ation of Alexander Jabłoński. The Foundation will also finance the exhibition in the Draper's telescope pavilion. The astrograph served in the Harvard Observatory since 1891, in 1947 it went to the observatory in Toruń Piwnice. Draper's telescope has enormous value for astronomers - the observational material obtained with its help has been used to create the current spectral classification of stars.

First lung transplant in Pomerania performed at the University Clinical Center

2018-08-29

Doctors from the University Clinical Center of the Medical University of Gdańsk conducted the first lung transplant in Pomerania. The lungs were transplanted to a 64-year-old man with an extreme form of emphysema. The patient was subjected to home oxygen therapy, but his condition worsened, which led to more frequent visits to the hospital. The Gdańsk doctors performed a transplant of both lungs without using extra-coronary circulation, which is a minimally invasive technique. On both sides, the chest was opened just for the pleural cavities to enter the transplanted organ. - This is an advanced transplant technique, possibly the least burden on the patient. Rehabilitation of such patients is the easiest. It is not always possible to use such a technique, but it will certainly be the preferred method in Gdańsk Center - says Dr. Jacek Wojarski from the Department of Cardiac Surgery and Surgery who operated on the patient.

Poles win the SmartMoto Challenge competition in Wrocław

2018-08-29

Teams of Wrocław and Katowice technical universities won the international competition of SmartMoto Challenge electric motorcycles in Wrocław. It was the first event of this type in Poland. Previously, the SmartMoto Challenge competition took place in Barcelona and Moscow. Seven motorcycles from three Polish and one Russian universities were registered for the three-day competition in Wrocław. The competition was held in two classes - vehicles with a power of 30 kW, in which LEM Thunder from the Wrocław University of Technology won and 8 kW vehicle, where Elektra of the team of the Silesian University of Technology triumphed. In the SmartMoto Challenge competition teams from universities compete, design and construct a cross-country motorcycle from scratch. The main purpose of the competition is to use the knowledge gained during the studies in a real industrial project. During the competition, the motorcycle is assessed by its dynamic and static capabilities as well as the team's skills in business aspects. More: <http://pwr.edu.pl/uczelnia/aktualnosci/lem-thunder-najlepszy-w-smartmoto-challenge-2018-10962.html>

Polish scientists looking for the place of the greatest battle of antiquity

2018-08-30

Polish scientists from the Jagiellonian University and the AGH University of Science and Technology in Krakow are looking for the place of one of the greatest battles of antiquity won by Alexander the Great. The Battle of Gaugamel, in 331, p.n.e. between the Macedonian-Greek armies under the command of Alexander the Great and the Persian army commanded by the king Darius III, led in effect to the collapse of the Persian empire. The research is financed by a grant from the National Science Center and conducted in today's Iraq, in cooperation with the Italian archaeological mission from the University of Udine. Their goal is to determine the exact

location of the Battle of Gaugamel in the light of multidisciplinary research. In addition to the sources of ancient, archival and contemporary cartographic data, satellite technologies will play an important role in research. More: <https://wiadomosci.onet.pl/swiat/gdzie-miala-miejsce-bitwa-pod-gaugame-la-ustalaja-to-polacy/zb7ymt9>

2nd European Innovation Week

2018-08-30

From September 17 to 21, the second European Innovation Week will take place in Lublin. Over 1,300 participants will take part in 28 thematic sessions, in which over 80 speakers will perform. The goal of the event is to combine experience and achievements in the world of science and business. The event will start from the Open Day in the laboratories of Lublin universities. The next day the Young Scientists' Forum, the Startup Exchange and the debate of cities and partner regions of the Lublin province will be held. As part of the European Innovation Week, there will also be an Innovation Gala, and the thematic sessions where experts from around the world will discuss the Smart Specializations of the Lublin Region: bioeconomy, medicine, low-emission energy and information technology. The event program also included panels and workshops on bioinnovations, 4.0 economy and 2.0 medicine. More: <https://etilubelskie.pl/>

Young Polish scientists want to stay in Poland, but ...

2018-08-30

According to research carried out under the „Project Scientist” funded by the European Commission 80 percent of young Polish scientists would like to stay in the academic sector and work at universities and research institutes. At the same time, as many as 65 percent of the respondents are considering leaving Poland if they do not find a satisfactory job. As the plushr.pl portal informs, the recent research indicates that young researchers consider low number of job offers in the academic sector, low wages and temporary employment contracts as the biggest barriers to develop careers on the domestic market.

Poland has less than half the working scientists compared to the number of them in Great Britain or Germany. There are 20.7 scientists for 10,000 inhabitants in Poland. There are over 43 in Germany and 45 in Great Britain. In the Scandinavian countries, this indicator is about 70. More: <https://www.pulshr.pl/edukacja/wiekszosc-mlodych-naukowcow-woli-zostac-w-kraju-ale-nie-znajduja-tu-pracy,56840.html>

Vehicle for disabled persons designed at the Krakow University of Technology to be produced for market?

2018-08-30

Designed a few years ago by the students of the Faculty of Mechanical Engineering of the Krakow University of Technology, an ultra-light vehicle for the disabled persons „Buzz” has been prepared for mass production. A car responding to the needs of disabled residents of large cities, was presented in several programs broadcast by Polish Television. - The car can be used in a convenient and safe way and it can be operated only by hands. The users do not have to change from a trolley to a car. They can enter the vehicle on a wheelchair, which is stuck in a driver's seat – inform students. See TV material: <http://panorama.tvp.pl/38674929/auto-dla-osob-na-wozkach>

Mars rover from the Wrocław University of Technology comes second in the Mars Society and NASA competition

2018-08-30

Mars rover from the Wrocław University of Technology comes second in the Mars Society and NASA competition. The Martian rover „Eagle” designed by students from the Off-Road Scientific Circle of the Wrocław University of Technology took the second place in the international competition organized by The Mars Society and NASA. One point was missing for its victory. The competition task was to develop a rover that would deliver 10 tonnes of cargo to the Red Planet using only currently available technologies or technologies that can be developed until 2026. The implementation of the project has to be as simple, safe and, most importantly, cost-effective. 15 students from all over the world competed. The teams from Poland, France and the USA as well as two mixed German-Swedish and Italian-Indian groups qualified for the final. The winners were awarded during the international convention The Mars Society in Pasadena. Wrocław constructors received 5,000 dollars. More: <http://pwr.edu.pl/uczelnia/aktualnosci/marsjanski-ladownik-z-nagroda-nasa-10961.html>

Poznań Science and Technology Park looking for new plant protection products

2018-08-30

A consortium of the Poznań Science and Technology Park (PPNT) and the Innosil company gained over PLN 4 million for research on plant inducers and their application. The money comes from the competition Team-Tech Foundation for Polish Science. Research on plant inducers is aimed at developing and implementing a plant protection product that is safe for humans and the environment. The main principle is based on stimulating the internal immunity of the plant, not on the fight against the pathogen, as it is so far. The measure is developed as ecological and, at the same time, economical. Previous studies allow to obtain surprisingly good results with the min-

imum amount of active substance used. The project «New inducers of plant resistance and their use as an innovative approach to the protection of plants against pathogens» is conducted by Dr Eng Marcin Śmiglak from PPNT in cooperation with Prof. Henryk Pospieszny from the Institute of Plant Research.

Competition for financing international research projects on biodiversity

2018-08-31

In October 2018, the BiodivERsA consortium, which includes the National Science Center, will announce a competition for international research projects on biodiversity. The BiodivERsA consortium consists of 22 agencies operating in 14 European countries and Brazil. The aim of this year's competition is to support research projects that concern biodiversity and its impact on the health of animals, people and plants. The competition will be open to international research teams made up of scientists from at least 3 countries of the BiodivERsA consortium participants. The deadline for submitting pre-proposals will expire in November 2018 and project financing will start at the end of 2019. More: <http://www.biodiversa.org/1481>

International metrology seminar in Rzeszów

2018-08-31

On September 17-20, 2018, the Department of Metrology and Diagnostic Systems of the Rzeszów University of Technology is organizing the XXII International Seminar on Metrologists „Methods and Technique of Signal Processing in Physical Measurements”. The aim of the conference is to present scientific and research works and engineering applications as well as exchange of didactic experience in the field of metrology. During the seminar, its participants will focus on issues such as: basic problems of metrology, sensors and measuring transducers, signal processing, information and measurement systems and didactics of metrology. More: <https://msm18.prz.edu.pl/>

Summer Polish language course at the University of Warsaw has ended

2018-08-31

At the University of Warsaw, the 63th summer Polish language course ended. 174 participants from 44 countries spent 4 weeks learning Polish language and culture not only during classes, but also through music and theater workshops. The organizer of the course was the Center of Polish Language and Polish Culture for Foreigners «Polonicum». As the University of Warsaw informs, the summer school is very popular among students and other people who want to learn Polish. Classes were conducted at various levels. This year's course was attended by 55 scholars of the National Academic Exchange Agency. In addition, a specialized language program was developed, focusing mainly on the language of political science, economics and medicine.

Article of scientists of the Medical University of Gdańsk published in „Scientific Reports”

2018-08-31

The work „Cancer stem cells as targets for DC-based immunotherapy of colorectal cancer”, written by scientists from the Gdańsk Medical University has been published in „Scientific Reports” - a renowned journal belonging to the Nature Publishing Group. The project described in the publication concerned the analysis of the potential usefulness of dendritic cells (DC) for the immunotherapy of patients with colorectal cancer. The research is innovative due to the fact that they focused on therapy targeting cancer stem cells (NKM), which are responsible for the pathogenesis of cancer and the development of metastases and remission. The project was entirely planned and developed by Dr Magdalena Szaryńska and Agata Olejniczak from the Department of Histology in cooperation with surgeons from the General, Endocrinological and Transplant Surgery Clinic of the Medical University of Gdańsk. More: <https://gumed.edu.pl/49003.html>

Educational mission of the National Agency for Academic Exchange in Ukraine

2018-09-03

In autumn this year, the National Academic Exchange Agency will organize an educational mission to five Ukrainian cities. Ukrainian students are one of the most mobile national groups undertaking higher education outside their home country. According to the Central Statistical Data, as many as 54% of foreign students at Polish universities are students from Ukraine. As the National Academic Exchange Agency informs, the mission will start with meetings and presentations for Polish language teaching centers and Polish diaspora centers in Kharkiv on 13-14 November 2018. Next, the delegation will go to the educational fair «Education Abroad» in Kiev (November 15-17). After the fair, the delegation will go to Zhytomyr (November 18), then to Vinnytsia (November 19-20) and Cherkassy (November 20-21). Representatives of Polish universities who want to take part in the mission can register at: <https://nawa.gov.pl/promocja-i-targi/targi/9-targi-na-ukrainie/group-registration>

Researchers from the Jagiellonian University discover priceless documents in the Jesuit monastery in Kłodzko

2018-09-03

While working in the archives of the Jesuit monastery in Kłodzko, scientists from the Institute of Art History at the Jagiellonian University in Kraków discovered priceless medieval documents including papal bulls and documents related to indulgences. According to Dr. Michał Kurzej from the Institute of Art History at the Jagiellonian University, this is one of the most valuable collections found out of the state archives in central Europe. Several dozen medieval parchment documents have been preserved here including a lot of materials concerning the history of the region. This is a priceless material for research on the history of the Kłodzko Valley - adds Dr. Kurzej.

Currently, the archive is described and cataloged. Then the conservators and historians will start their work.

Architecture students of the Silesian University of Technology dominated the #ValenciaCall competition

2018-09-03

Students of the Faculty of Architecture of the Silesian University of Technology took first and second place in the international architectural competition #ValenciaCall. The aim of the competition was to design social housing in Valencia, Spain. Contest participants had to take into account the role of the historic city center and the presence of historic buildings, needs of the local community, local culture and tradition, trends in social housing and the purpose of the building. From among over 100 works sent from all over the world, the jury awarded the Casa Española - a work by Paweł Pacak and Katarzyna Ponińska from the Faculty of Architecture of the Silesian University of Technology. The Casa Española is a project based on the atmosphere of the Spanish city and lifestyle of the residents. The work El Espacio of Marta Błaszczuk, Anna Czapla, Filip Gawin, Kacper Kania and Marlena Michalska was awarded the second place. The project is based on three important pillars: diversity, privacy and openness. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci&Page=1&WebPartTitle2=Number&Filter1Field2=Identyfikator&Filter1Value2=2361>

Symposium of the Polish Bioinformatics Society at the Wrocław University of Technology

2018-09-03

The 11th Symposium of the Polish Society of Bioinformatics (PTBi 2018) will take place from September 5 to 7 in the Congress Center of the Wrocław University of Technology (building D-20, 8 Janiszewski Street). The Symposium is an annual meeting on bioinformatics organized by the Polish Bioinformatics Society.

The event's co-organizers include the faculty of basic technical problems, the chemical faculty of the Wrocław University of Technology, the biotechnology department of the Wrocław University and the faculty of biology and animal husbandry at the University of Life Sciences in Wrocław. The topics of PTBi 2018 cover all aspects of bioinformatics - including the development and application of computational methods for modeling and analysis of the structure, function and evolution of genes, proteins and biological systems. More: <http://ptbi2018.pwr.edu.pl/>

Chinese concern TCL to launch artificial intelligence center in Warsaw

2018-09-04

The Chinese concern TCL will open its largest foreign research center in Warsaw with aim to develop artificial intelligence research in which the Chinese want to cooperate with scientists from the University of Warsaw. TCL is the third largest producer of televisions in the world. Over 100 scientists will carry out projects in Warsaw related to learning and understanding body language or image analysis. - It is about new functionalities that facilitate human interaction with devices that can be «installed» in home appliances - explained Bartosz Biskupski, head of TCL Research Europe. According to him, projects created in the laboratory will make a technological revolution. - We have focused on Poland because we need people with mathematical and algorithmic skills to work, and Polish scientists present the highest level – adds Bartosz Biskupski.

„Continuity and change in communication in contemporary Polish-German relations“

2018-09-04

The Polish-German Foundation for Science announces a competition „Continuity and change in communication in contemporary Polish-German relations“. The contest participants should concentrate in their research on communication within contemporary Polish-German relations. The research can be devoted to the role of specific groups and social agents with the emphasis on the communication in the politics, the media and in civil society. Researchers from universities and other scientific institutions in Germany and Poland are invited to submit applications, in cooperation with the relevant institutions from the other country. The subsidy allocated to the project amounts up to 300,000. euro. The project may last from 24 to 36 months, and applications must be submitted in Polish and German by November 15, 2018. The Foundation will announce the decision on the grant by the end of April 2019 at the latest. More: <http://www.pnfn.pl/pl/index.php>

COST Info Day in Krakow

2018-09-04

On 25 September 2018, COST Info Day will be held in Krakow. The event at the Krakow University of Technology is co-organized with the Ministry of Science and Higher Education. According to the Ministry of Science, COST (the European Cooperation in Science and Technology) enables creation and coordination of interdisciplinary research networks as well as the integration of scientists in Europe and beyond it. The program also finances meetings of research teams, scientific exchanges and participation in conferences and workshops. COST Info Day will present basic information about the program and the conditions that must be met in order to join it. More: <http://www.transfer.edu.pl/pl/szkolenie,-cost-info-day-aplikuj-i-zdobadz-srodki-na-dzialania-networkingowe-spotkania-warsztaty-konferencje-publikacje-oraz-wizyty-naukowe-,273.html>

New winners of the MINIATURE 2 competition

2018-09-04

New 95 researchers have been awarded in the MINIATURE 2 competition. They will receive a total of nearly PLN 3.25 million for the implementation of scientific activities such as preliminary research, pilot studies, queries, internships, scientific consultations and conference trips. The laureates are Dr Beata Bielska from the Nicolaus Copernicus University in Toruń, who will receive nearly PLN 40,000 for the implementation of preliminary research in the project «Downloading and plagiarizing. Student culture of copying in terms of massification, commercialization, internationalization and diversification of higher education in Poland»; Dr Zofia Danuta Wóycicka from the Polish Academy of Sciences, who will conduct a research trip for over 30,000 PLN within the project «Rescuing Jews during the Second World War in the narratives of European museums», and Dr Anna Szpakowicz from the Medical University of Białystok, who will receive 50 thousand PLN for pilot studies in the project «The role of new adipokines in the pathogenesis of atherosclerosis and 'obesity paradox' in patients with ischemic heart disease».

Szczecin Mayor's competition for the best humanistic PhD thesis

2018-09-04

Until the first of October students can apply for the competition of the Mayor of the City of Szczecin for the best PhD and master thesis in the humanities in 2018. The competition aims to increase the interest of students and young scientists in the issues related to Szczecin and create conditions enabling young, creative people to shape the creative and innovative development policy. One of the goals is also development and promotion of the city, as well as increasing the interest of the inhabitants in activities aimed at economic, cultural, scientific and social revival of Szczecin. The competition will be run by the Award Committee appointed by the Mayor of Szczecin. The authors of the awarded works will receive cash prizes and diplomas. Regulations of the competition: http://www.szczecin.eu/sites/default/files/Info_NN_regul_humanist.5.04.18.pdf

Students and PhD students of economic sciences at the University of Warsaw win international competitions in Rome

2018-09-05

The students and PhD students of University of Warsaw from faculty of economics took first place in international Rotman European Trading Competition 2018, which took place in Rome. 39 teams from 36 countries took part in this year's competition. Each of team consisted of four people - two men and two women studying at the same university. The participants' task was to perform specific transactions using the Rotman Interactive Trader application during five competitions. Students solved various cases concerning specific problems in a simulated market in real time. More: <https://www.wne.uw.edu.pl/pl/aktualnosci/nawosci-samorzadu-studentow/studenci-wne-zajeli-pierwsze-miejsce-w-rotman-european-trading-competition-2018-w-rzymie/>

Conference „Ecology - Social Solidarity - Sustainability“

2018-09-05

Ecology, social solidarity and sustainable development will be discussed during a conference scheduled for 24 September 2018 at the University of Warmia and Mazury in Olsztyn. This will be the next meeting within «Polonia Restituta. Decalogue for Poland on the 100th anniversary of regaining independence». The whole project is implemented by the Ministry of Science and Higher Education together with the Council for Social Affairs of the Polish Episcopate Conference. The conference «Ecology - Social Solidarity - Sustainable Development» is to draw attention to the need for an integral understanding of ecology and the development of such thinking and sensitivity in Polish society. The project «Polonia Restituta. The Decalogue for Poland on the 100th Anniversary of Regaining Independence» consists of a series of 10 nationwide scientific thematic conferences organized in the most important Polish academic centers and devoted to public, economic, political, social and cultural life.

Congress Impact mobility rEvolution'18 in September in Katowice

2018-09-05

The international congress devoted to the challenges faced by the automotive and transport industries in the context of electromobility and hydrogen technologies and the future of intelligent city infrastructure will take place on 12 and 13 September in Katowice. One of the organizers of the congress is the University of Silesia. During Impact mobility rEvolution'18, the automotive and transport industries will jointly cooperate with technology and telecommunications companies. About two thousand people will take part in the congress including representatives of business, academia, public administration and startups from Poland and abroad. The agenda of the event includes meetings with investors and representatives of science, business and administration, talks with specialists, as well as speeches of over 150 experts. The content of the congress has been divided into seven thematic packages, and the performances will be held in parallel on four separate stages.

University of Silesia to invite scholars to the Regional Geographer Convention

2018-09-05

The Faculty of Geosciences of the University of Silesia invites participants from the 28th to the 30th of September to the Regional Geographical Congress „Geography against regional and global challenges”. The program includes plenary and popular science sessions, a panel discussion, a photo competition, as well as tours around the region and geography related trips. The event is organized on the occasion of the 100th anniversary of the Polish Geographical Society, the 70th anniversary of the Katowice Branch of the Society and the 45th anniversary of the existence of geography at the University of Silesia. The meeting is also part of the celebration of the 50th anniversary of the University of Silesia in Katowice and the Year of Polish Geography. Applications for participation in the congress should be

sent by September 10 to the e-mail address: ptg@wnoz.us.edu.pl or by post: Faculty of Geosciences UŚ, ul. Będzińska 60 41-205 Sosnowiec with the note: Regionalny Zjazd Geografów. Detailed information is available at www.rzgz2018.us.edu.pl

Saxon-Polish Innovation Day at the Medical University in Wrocław

2018-09-05

Technical University of Dresden, Medical University of Wrocław, University Hospital of Carl Gustav Carus in Dresden and the Liaison Office of the Free State of Saxony in Wrocław invite participants to the 2nd Saxon-Polish Innovation Day dedicated to personalized medicine and medical technologies. The Saxon-Polish Innovation Day is an opportunity to present the best examples of knowledge and technology transfer in both countries. The event provides the opportunity for connecting partners, initiation of cooperation, searching for funding and presentation of successes. The Saxon-Polish Innovation Day named «Personalized biomedicine and medical technologies» will take place on September 20, from 9am to 4pm, in the Main Library of the Medical University. The meeting will take place under the auspices of the Consulate General of the Federal Republic of Germany in Wrocław.

One hundred thousand PLN offered in the competition Polish Product of the Future

2018-09-06

The grant of 100,000 PLN is the main prize of the XXIth Competition „Polish Product of the Future” organized by the Polish Agency for Enterprise Development and the National Center for Research and Development. The grant may be used for the development, promotion or internationalization of the Polish products. The main goal of the competition is building awareness of Polish brands, promoting and supporting the development of the most innovative products and technologies developed in Poland. Its participants may include scientific entities, entrepreneurs and consortia consisting of scientific units and

entrepreneurs operating in Poland. The condition of joining the competition is presenting a new, innovative product or technology in one of three categories: Product of the Future by the scientific unit, Product of the Future by the entrepreneur, Product of the Future by a scientific unit and an entrepreneur. Scientists of the world to discuss atmospheric discharges in Rzeszów

2018-09-06

The world's largest congress on atmospheric discharges, International Conference on Lightning Protection 2018, will take place until 7 September at Rzeszów University of Technology. The conference is organized by the Rzeszów University together with the Polish Lightning Protection Committee operating within the Association of Polish Electrical Engineers. The conference is attended by scientists from 41 countries. Over 200 presentations will be attended in 30 sessions. The most, as many as 40 papers, will be delivered by researchers from Japan. Rzeszów University of Technology will present the results of research on issues related to the physics of atmospheric discharges, carried out in the research station of the Rzeszów university, which is equipped with electric field antennas and high-speed video cameras.

Cardinal Stefan Wyszyński University and the Motor Transport Institute developing a rental car project for the disabled persons

2018-09-06

Prof. Stanisław Dziekoński, rector of the Cardinal Stefan Wyszyński University in Warsaw and Prof. Marcin Ślęzak, the director of the Motor Transport Institute, signed an agreement aimed at creating a car rental Mobi-ON for people with disabilities. The car-sharing platform for the disabled persons will be created in cooperation with the Cardinal Stefan Wyszyński University in Warsaw. The University's experience will be used to develop and implement the IT concept, the data analysis subsystem and to support decision-making - informs Mikołaj Krupiński, spokesperson of the Motor Transport Institute. The platform will provide pilot transport services in Warsaw, based primarily on ten vehicles of the Motor Transport Institute, which are adapted for people with various disabilities.

„Nowe Gliwice” Education and Business Center invites participants to the Festival of Innovation and Technology

2018-09-06

Future transport issues, innovative aviation solutions, prospects for the development of the space sector and the future of personalized medicine in Poland are the most important themes of the Festival of Innovation and Technology, which will be held on September 14 at the Education and Business Center „Nowe Gliwice”. Expert meetings in the field of medical technologies, innovative medical engineering projects - «Medica Silesia» and the debate of scientists and representatives of the automotive industry «Future of the Mobility» will be held on the large stage of the Center. At the same time, the Aerospace Forum will be organized on the small stage with the participation of science and business representatives to implement the innovative solutions into industry. The festival will be accompa-

nied by an exhibition of innovative solutions created by scientists and enterprises as well as a summary panel promoting the innovation initiative «Silesian Innovator».

School of Polish Language and Culture to launch Language and adaptive course at the University of Silesia

2018-09-06

The School of Polish Language and Culture at the University of Silesia in Katowice is launching language and adaptation course for 60 foreigners undertaking second-degree studies in Poland under the Stefan Banach Scholarship Program. The course is co-financed as part of the development program by the Ministry of Foreign Affairs. Students from Ukraine, Belarus and Moldova will start their studies at Polish universities after the lectures and seminars extending their knowledge about Poland, and after an intensive Polish language course that will help them participate in academic life. Scholarship holders will learn about the role of Poland in the European Union, international political and economic relations, economic situation and social awareness of Poles, history and principles of academic coexistence. Thus, they will be able to participate in discussions, seminars and workshops on Polish customs and traditions.

Qualifiers for Falling Walls Lab at the University of Wrocław

2018-09-06

University of Wrocław organizes qualifiers for the Polish Falling Walls Lab. The program is addressed to students, who want to present their research, business project, artistic or social initiatives. They can fill out the form, send it until September 14th and take part in this year's competition. The international Falling Walls Lab platform enables the exchange of ideas and inspirations, and facilitates establishing professional contacts all over the world. The competitions are organized every year for students, PhD students, PhD holders and young professors to present the results of their research, projects and

concepts to the jurors - representatives of academic and business communities. The Falling Walls Lab Wrocław will take place on October 12 in the main building of the University of Wrocław. The winner will receive a scholarship and will travel to Berlin in November. More: <https://falling-walls.com/>

Medals for Toruń scientists at the fair in Japan

2018-09-06

The scientists from the Nicolaus Copernicus University have won prizes at the JIDE International Design and Innovation Fair in Japan (Japan Design & Invention Expo - JIDE 2018). The Gold Medal of the Fair was given to the scholars of the Faculty of Medicine at Collegium Medicum: Dr Maciej Gagat, Dr Dariusz Grzanka and Prof. Alina Grzanka - the authors of the invention «Intravascular stent with properties that accelerate the healing of the implant site and reduce the occurrence of thrombosis». The silver medal and the special prize - the medal from the Macau Association of Innovators were received by Michał Meina from the Faculty of Physics, Astronomy and Applied Computer Science, Dr Krzysztof Rykaczewski from the Faculty of Mathematics and Computer Science of the Nicolaus Copernicus University for «The method of determining the position of the object, in particular of man, and the device for determining the position of man». More: <https://www.umk.pl/wiadomosci/?id=25635>

Medical University of Silesia invites volunteers to participate in the Standardized / Simulated Patient Program

2018-09-06

The Medical University of Silesia in Katowice is beginning implementation of an innovative „Standardized / Simulated Patient Program“. The main objective of the project is to support the student education process by including specially trained people for simulation activities, exercises and practical examinations. The Simulated Patient is a person who can realistically reproduce the history of the disease by imitating physical symptoms and emotional reactions of a real patient. The Standardized Patient plays a role in a repeatable way, giving the students possibility to practice a certain skill in identical or similar conditions. Playing clinical situations will allow future medics to acquire the skills, develop a good relationship with the patient, develop emotional intelligence, provide difficult talk and conduct the diagnostics. The university invites people aged 18 and plus who have completed at least secondary education and have passion for acting. More: <http://www.cdism.sum.edu.pl/podstrony-projektu-power/standaryzowany-pacjent/>

Success of the „Polish come back“ program

2018-09-07

The Ministry of Science and Higher Education wants scientists who have left the country to return to Poland. - The „Polish Come back“ program implemented by the Foundation for Polish Science is very successful. Ten scholars applied for one scholarship - said Piotr Dardziński, the deputy head of the Ministry of Science in an interview with the portal Interia. «Polish Come back» is a program that is to help bring the best Polish researchers from abroad. According to estimates, 10,000 Polish scientists work only in Europe. Those who decide to return to the country can count on a salary of up to 350,000. PLN gross annually. As Dr Zofia Sawicka deputy director of the National Agency for Academic Exchange said

in an interview with the agency Newseria Biznes «annually we will be able to accommodate about 25 scholars meeting the high science requirements, so that the public funds of this program will be repaid in the form of significant contribution to Polish science». Polish companies and the innovativeness of the Polish economy will also benefit from the return of scientists.

EUROPHRAS conference at the University of Bialystok

2018-09-07

The University of Bialystok on September 10-12, 2018, is organizing the largest phraseological conference in the world, EUROPHRAS. Nearly 200 researchers from around the world will take part in it. According to Katarzyna Dziedzic, a spokesman of the University of Bialystok, the conference will be attended by phraseologists from 37 countries, including Australia, New Zealand, Japan, China, South Africa, Switzerland, Greece, Georgia, Croatia, Belgium, France, Spain and Italy, Finland, Germany and Russia. The meeting is devoted to constant expressive connections, first of all phraseologies, proverbs and winged words. They are presented in various perspectives, for example contrastive, translational, lexicographical and didactic perspectives. The discussed issues concern the theoretical aspects of phraseology and the practical use of fixed word combinations, for example in advertising texts. More: <http://infofil.uwb.edu.pl/program.html>

Hardy kiwi developed at the Warsaw University of Life Sciences placed on the market

2018-09-07

Researchers from the Faculty of Horticulture, Biotechnology and Landscape Architecture of the Warsaw University of Life Sciences (SGGW) are searching new applications for a variety of hardy kiwi - a fruit grown in experimental orchards of the Warsaw university. Bingo, a variety of hardy kiwi developed at WULS-SGGW, is very easy to grow. It does not require chemical protection, and the fruits are almost free of disease or pests. Hardy kiwis are small and have an edible peel. The research confirms that it is

one of the richest fruit in bioactive components, it contains vitamin C, lutein, polyphenols and proteolytic enzyme - actinidin. Their consumption positively affects the functioning of the digestive system, they also have a protective effect on the cardiovascular system. In September first hardy kiwis will be sold to Polish supermarkets, and a team of scientists from SGGW began work on the use of fruit in food processing.

University of Silesia to launch University Science Town

2018-09-07

The University of Silesia is launching the program of University Science Town. Within the program the scientists of the University of Silesia will run a series of lectures and exercises addressed to students and teachers of primary schools, junior high schools and high schools. Lectures will be organized in four cycles: «Singularities of the World of Physics», «Biorobotics», «Encounters with science» and «Amazing history of mankind». All lectures and workshops will be conducted by the scientists from the University of Silesia including University of Children; robotics community Unibot; University Scientific Society and Center for Continuing Education of the University of Silesia. The sessions will take place on the campus - the first event is scheduled for September 10.

Researchers from the University of Life Sciences in Wrocław examined the health of middle school students

2018-09-07

The research project carried out by the employees of the Department of Human Nutrition at the University of Life Sciences and the Department of Health and Social Affairs and the Department of Education of the City of Wrocław has been completed. For three years, the researchers studied the health of Wrocław teenagers. The project involved 1160 students from 11 junior high schools in Wrocław. The collected data show that the BMI (Body Mass Index) is too high for 21% girls and for 24 percent boys. Too big waist circumference - over 76 cm - was measured in 13.4% female students, and above 80 cm in 19 % students. - We know that 20 % teenagers do not eat breakfast before going to school, 6 % drink coca-cola more than once per day. Approx. 22 percent pupils watch television for 5 to 6 hours a day, and this percentage increases twice during the weekend. Approx. 23 percent teenagers apply a diet to lose weight - says Prof. Joanna Wyka from the Department of Human Nutrition. Prof. Jan Maciejewski receives Premio Apoxiomeno

2018-09-07

Professor Jan Maciejewski, head of the Department of Sociology of Availability Groups at the Institute of Sociology at the Faculty of Social Sciences of the University of Wrocław, has become the first Polish laureate of the Premio Apoxiomeno award. The Apoxiomeno Association, based in Florence, aims to promote legality and security from the perspective of various areas of life under the slogan «Art and sport in uniform». In the art and culture category, awards are given to artists, journalists and representatives of international cinematography promoting the activities of security services and the army. In the sport category, the prize is awarded to Olympic athletes promoting the values of peace and solidar-

ity through sport. This year, for the first time in history, the jury decided to distinguish a representative of science dealing with security issues. Professor Maciejewski was awarded for innovative scientific activity in the field of the sociology of disposable groups.

Researchers from the University of Silesia and the Lodz University of Technology developed new compounds for dyeing fabrics

2018-09-07

Researchers from the University of Silesia and the Lodz University of Technology developed new chemical compounds for dyeing polyester fabrics for yellow, orange, red and brown colors. The already patented solution guarantees high durability of colors and their intensity. Polyester fabrics dyed in this way will not lose their color over time even under the influence of light. Thanks to this, producers will also be able to obtain fabrics with more vivid colors. Patented 2-methylazoquinoline compounds are quinoline derivatives. They are widely used - they have antimalarial, antifungal and antibacterial properties, many of them are also the starting product in the synthesis of so-called cyanine dyes used in photography or medicine. Other derivatives can be used in electronics - for the production of OLED displays or for the creation of DVD-R disc layers, as well as in the food industry.

„EIT Awareness Day” in Warsaw

2018-09-10

The National Contact Point for Research Programs of the European Union and the European Institute of Innovation and Technology (EIT) in Budapest invite participants to the „EIT Awareness Day”, which will take place on September 25 in Warsaw. During the conference, the current activity of the European Institute of Innovation and Technology in Poland and in Europe as well as the possibilities of cooperation between entities from both Poland and Europe in the area of research, business and education

will be presented. Participation in the conference in Warsaw has been confirmed by: Martin Kern - director of the EIT; Piotr Dardziński - secretary of state in the Ministry of Science and Higher Education and Zygmunt Krasiński, director of the National Contact Point for Research Programs of the European Union. More: http://www.kpk.gov.pl/wp-content/uploads/2018/08/EIT-Awareness-Day-_Poland_Agenda-1.pdf

Scientific conference in Vienna about memory and oblivion of German crimes

2018-09-10

On September 25-26, 2018 the Scientific Station of the Polish Academy of Sciences in Vienna organizes the conference „Forgotten and remembered. Memory and oblivion of German Nazi repression, concentration and extermination camps „. Participants of the conference will listen to over a dozen lectures and presentations devoted to the memory and oblivion of German crimes during World War II. Stephan Lehnstaedt from Touro-College in Berlin will give a lecture «German (non) memory of extermination camps within Action Reinhardt: Belżec, Sobibór, Treblinka.», Sławomir Buryła from the University of Warmia and Mazury in Olsztyn will bring closer the issue of lager literature, Paweł Kosinski from the Institute of National Remembrance in Warsaw will give a lecture on the instrumentalization of memory on the example of SS-Hauptsturmführer Karl Chmielewski, the commandant of the Gusen camp, presented in the memoirs of Polish prisoners and his son Werner.

Festival Metamorphoses on artificial intelligence at the Copernicus Science Center

2018-09-10

How will the wider use of artificial intelligence affect society? During the Festival Metamorphoses, the participants can check how algorithms change our civilization informs the Copernicus Science Center in Warsaw, which from 13 to 16 September 2018 organizes the Przemiany Festival. Participants of the event will listen to the lecture «Artificial Intelligence and Society», which will be given by Prof. Luciano Floridi, lecturer in philosophy at the University of Oxford and University of Bari. The organizers also invite viewers to the «Machina Sapiens» exhibition, where they can see artistic projects created by the machines and works of artists using AI algorithms. 4th Conference on Mathematics and Informatics „Congressio - Mathematica” in Olsztyn

2018-09-10

The Department of Complex Analysis of the Faculty of Mathematics and Computer Science of the University of Warmia and Mazury in Olsztyn organizes the 4th Conference on Mathematics and Information Technology „Congressio - Mathematica”. The event is co-organized by the Faculty of Mathematics and Natural Sciences of the University of Rzeszów and the Faculty of Technical Physics, Informatics and Applied Mathematics at the Rzeszów University of Technology. On 20-23 September 2018, conference participants will discuss theoretical and applied mathematics, computer science and technical sciences. The event will be attended by scientists from Universiti Sains Malaysia, University of Eastern Finland, University of Belgrade (Serbia), Holon Institute of Technology (Israel), Kyungsoong University (South Korea) and Swansea University (Great Britain). More: <http://wmii.uwm.edu.pl/congressio-math/>

Researcher at the University of Humanities and Natural Sciences in Częstochowa receives the title of Fellow ChemPubSoc Europe

2018-09-10

Professor Piotr Balczewski, head of the Department of Structural and Materials Research at the Institute of Chemistry, Environmental Protection and Biotechnology, Faculty of Mathematics and Natural Sciences, at University of Humanities and Natural Sciences of Jan Długosz in Częstochowa was awarded the title of Fellow ChemPubSoc Europe. ChemPubSoc Europe is an organization associating and financially supporting 16 European chemical societies gathering a total of about 70 thousand members. The societies publish 14 high-quality magazines in their countries. The organization also has its own publishing house - ChemViews Magazine. The award is the highest prize awarded every two years by ChemPubSoc Europe. They are received by the scientists who contribute to increasing the scientific level and the recognition of publications in chemistry in Europe and in the world. Nominations were announced at the 7th EuChemSoc Congress in Liverpool.

Eight Poles receive medals at the Championships in Logic and Mathematical Games in Paris

2018-09-10

Eight medals, including three golds, were received by Polish scientists at the XXXII Championships in Logic and Mathematical Games in Paris. This is the best result among all countries participating in the competition. The best high school students in Paris were: Krzysztof Olejniczak, who won the first, Mateusz Rzepecki who won the second place. Gold medals were also won by: Łukasz Kalinowski from the Adam Mickiewicz University in Poznań - in the category of students of post-secondary schools - and Gabriel Listowski from Zabrze in adults' competition. Silver medals were won by Damian Dąbrowski from Junior Middle School 16 in Szczecin - in the

category of pupils of middle school – and Grzegorz Adamski from the University of Poznań, Grzegorz Adamski. The bronze medal in the competition of V-VI grade pupils was won by Alicja Mężyk from the Primary School No. 28 in Kielce. The World Championship in mathematics has been organized in Paris since 1987.

Conference of linguists in Poznań

2018-09-10

On September 13-15 the Department of English Studies at the Adam Mickiewicz University in Poznań invites participants to the 48th Poznań Linguistic Meeting. The theme of this year's conference is „Language and evolution: issues and perspectives”. The main lecture: «The evolution of language: at the interface of biology and culture» will be delivered by W. Tecumseh Fitch from the University of Vienna. Daniel Everett from Bentley University will deliver the plenary lecture «Homo erectus, symbols and origin of language» and discuss his research „How Language Began”. Both scientists will also take part in the plenary dialogue and in the debate with other speakers presenting the results of their research during plenary sessions: Ljiljana Progovac, Geoffrey Schwartz and Przemysław Żywicznyński, Piotr Gąsiorowski and Nikolau Ritt. More: <http://wa.amu.edu.pl/plm/>

UMI-SIMAI-PTM conference in Wroclaw

2018-09-10

Wroclaw University of Technology and the University of Wroclaw together with Italian and Polish mathematician associations invite the participants to the UMI-SIMAI-PTM conference which will be held from 17 to 20 September. The conference program will cover a wide range of contemporary mathematical research. Plenary lectures and thematic sessions within the framework of the Joint meeting of the Italian Mathematical Union, the Italian Society of Industrial and Applied Mathematics and the Polish Mathematical Society (UMI-SIMAI-PTM) will take place on the campuses of both universities. Plenary lecturers will be delivered by scholars from Università di Trento, Université Paris-Dauphine, University of Firenze, University of Utah, University of Pittsburgh, Heidelberg Universität, Politecnico di Torino and Università di Torino as well as Polish universities - Jagiellonian, Warsaw and Wroclaw universities.

International automotive conference at the Krakow University of Technology

2018-09-11

Institute of Automotive Vehicles and Diesel Engines of the Faculty of Mechanical Engineering of the Krakow University of Technology and the Automotive Commission of the Krakow branch of the Polish Academy of Sciences invite participants to the cyclical international automotive conference „Konmot 2018”. The modern world requires ecological solutions, low energy consumption, safety and easy operation from the automotive industry. The role of engineers and scientists is the implementation and management of construction and operating processes in this field. The conference, which will take place on September 13-14, 2018, will be accompanied by the presentation of ecological city vehicles, designed by students of the Krakow University of Technology under the supervision of the university's academic staff as part of their engineering and master's theses. More: <http://www.konmot.pk.edu.pl/index.php/pl/>

Congress of Young Polish Mathematicians in Lublin

2018-09-11

The Mathematical Institute of the Polish Academy of Sciences and the Faculty of Mathematics, Physics and Computer Science of the Maria Curie-Skłodowska University in Lublin are the main organizers of the Congress of Young Polish Mathematicians, which will be held on September 20-23, 2018 in Lublin. Congress is an event that gathers mathematically talented middle school and high school students from Poland. During the event, its participants will listen to lectures of: Prof. Dr Marek Kordos from the University of Warsaw - „Everything (well, almost everything) about a cycloid”, Prof. Piotr Gwiazda from the Mathematical Institute of the Polish Academy of Sciences - „Mathematics approximate”, and Prof. Andrzej Ruciński from the University of Adam Mickiewicz in Poznań - „Extreme harvest theory”. More: <https://7kmmmp.umcs.lublin.pl/>

World Information Congress for the first time in Poland

2018-09-11

The 24th World Information Congress will take place in Poznań on September 17-21. The event will be organized in Poland for the first time. Lectures, discussions and workshops will be conducted by the best IT experts in the world. Themes of the Congress are: Security and protection of privacy; Big Data; Business analytics; ERP and database technologies; Internet of things; Information technology in industry, entertainment and education, and Social aspects of information technology. Congress links the content from industry and research, providing a platform to integrate these two sectors. It also gives the opportunity to present and discover innovative ideas. For five days at the Poznan University of Technology Lecture and Conference Center the participants will be able to see the latest international research achievements, as well as leading commercial and industrial solutions.

3rd Congress of Bio-science of Polish BIO2018 at the University of Gdańsk

2018-09-11

The University of Gdańsk invites participants from September 18 to 21 at the III Congress of Bio-science of the Polish BIO2018. It will be attended by world-renown scientists dealing in natural sciences and related fields. Congress is also the 51st Congress of the Polish Biochemical Society. Interdisciplinary topics of papers, meetings and discussions include new solutions in medicine - especially in the treatment of cancer and genetic diseases. The program includes 30 scientific sessions and nearly 500 guests, 150 presentations and speeches, almost 200 poster presentations and a satellite session «Women in Science». Scientists in their speeches will take up contemporary civilization challenges, like the research into the immune system in the fight against cancers, new methods of diagnosing cancer and genetic diseases, research and application of stem cells, research on the possibilities of modifying plant metabolism and research on so-called «Historical» DNA.

Poznański scientist as a member of the board of Asia Pacific Risk and Insurance Association

2018-09-11

Dr Piotr Manikowski, Associate Professor of the University of Economics in Poznań became a member of the board of Asia Pacific Risk and Insurance Association (APRIA). The scientist from the Poznań University Insurance Department has been a member of the Scientific Council and secretary of this organization since 2014. APRIA is one of the three most important international insurance associations in the world. It has a global coverage and brings together scientists from almost all continents. They meet at annual conferences to present the results of the latest research and discussion on insurance and risk management. Conferences are held in different countries. In 2017, thanks to the efforts of the employees of the Poznań University Insurance Department, the conference «Challenges in the Insurance Market: Transparency and Consumer Protection» took place in Poznań. Poland was the first country outside the Asia-Pacific region, which was granted the right to organize such a meeting.

Students of the Wrocław University of Environmental and Life Sciences to participate in the Quarry Life Award competition

2018-09-11

By September 20, students can vote for the project of environmental protection students of the Wrocław University of Environmental and Life Sciences in the Quarry Life Award competition. Four students check how to improve the soil quality in the Nowogród Bobrzański sand mine by using biochar. Students conduct a vase experiment on the soil brought from the mine. They use biochar, mineral fertilization, a mixture of grasses and legumes - one that is sown in difficult and dry areas. The project has been running since April, the students are making measurements by checking the height of the stalks, the amount of flowering plants and the germination rate, check-

ing whether the biochar actually causes that the plants grow larger and healthier. The Quarry Life Award competition has been encouraged students to look for new ways to increase the biodiversity in the mining areas for several years. In the last three editions more than 1,100 project applications were submitted, and the winners received prizes with a total value of over 750,000. euro. More: http://www.glos.upwr.edu.pl/aktualnosci/48287/studenci_upwr_w_konkursie_quarry_life_award.html

4th National Political Science Congress in Lublin

2018-09-12

The Faculty of Political Sciences of the University of Maria Curie Skłodowska in Lublin, the Polish Political Sciences Society and the Political Sciences Committee of the Polish Academy of Sciences organize the Fourth National Political Science Congress, which will be held from 18 to 20 September. The theme of the Congress is «The State in Times of Change». According to Aneta Adamska, spokesman of the Lublin university, the participants of the event will focus on the basic, «traditional» political categories of state and power, taking into account the dynamics and variability of qualitatively new features of the social environment in the states. 726 researchers from 85 research centers will participate in the Lublin Congress, of which 30 participants represent foreign universities. The participation in the commencement of the event was announced by Jarosław Gowin, Deputy Prime Minister Minister of Science and Higher Education. The inaugural lecture will be given by Prof. Stefano Guzzini, outstanding German-French political scientist, specialized in the theory of international relations. More: www.kongrespolitologii.umcs.pl

Students and employees of the AGH University of Science and Technology create the promotional spot

2018-09-12

Expedition to Spitsbergen, exploration of the Caucasus Mountains, races on the fast track or solar boat competitions - these are just some of the activities

of students and employees of the AGH University of Science and Technology in Krakow presented in their latest promotional spot. «Our point of view - POV AGH» is a short film made from beginning to end by university students and staff. During the implementation, the creators used specialized cameras with the possibility of recording from the first person perspective. The work on the AGH promotional spot started a year ago. «Our point of view - POV AGH» is the first promo that show how the slogan AGH «Wiedza-Pasja-Więź» (Knowledge- Passion- Bond) works in practice. The first film touches the theme of student passion, the next promo will reveal more scientific issues and lifestyle of students from AGH. See the spot: www.bit.ly/AGH-POV

European Technology Forum to start September 26 in Katowice

2018-09-12

On 26 and 27 September, the European Technology Forum will be held in Katowice, during which a group of specialists will discuss European research and technology policy. Plenary sessions and four thematic conferences are planned, including the „Industry 4.0” conference organized by the Silesian University of Technology. The main goal of the Forum is to discuss the priorities of European science and technology policy and funding mechanisms for research and technological development, in particular those planned for implementation under the Horizon Europe program. Experts will discuss the promotion of creating different types of networks and partnerships - both by industry, science, and public authorities - to avoid duplication of efforts and set common research and development goals. During the event, the goals of the Responsible Development Strategy for Poland in the field of research and innovation by 2020 and 2030, will also be presented. More: <http://euroforum.iztech.pl/forum>

University of Economics in Katowice to educate children and young people

2018-09-12

Until September 25, pupils can sign up for the next semester of free economic education programs for primary and secondary school pupils at the University of Economics in Katowice. They can apply for the Economical Children's University, the Academy of the Young Economist and the course Economics for the High School and Technical School. Classes in the form of interactive lectures and workshops will take place on Mondays. The academic teachers will focus on the issues of management, economics, marketing, finance, economic history, psychology and business ethics, as well as own development and projects. The Economical Children's University received the Parents' Award for the most developing Silesian initiative for children up to 14 years in the Logic category and a distinction in the Visual arts category in the Sunflowers 2017 plebiscite organized by the portal czasdzieci.pl.

II International Congress of the Movement Europa Christi

2018-09-13

The 2nd International Congress of the Europa Christi movement with the participation of eminent European scientists will take place from October 14 to 22 in Częstochowa, Warsaw, Rzeszów, Lublin, Łódź and Kraków. In the 100th anniversary of Polish independence and the 40th anniversary of the election of Pope John Paul II, the participants of the Congress will debate „Vision of Europe according to Saint John Paul II”. The Cardinal Stefan Wyszyński University is planning the panel «Church in Europe» on 15 October. In other cities there will be five extensive thematic panels devoted to law and economics in the context of European values, re-Christianization of Europe and the role of the family. These issues will be discussed by representatives of Catholic and university societies, politicians, including the prime ministers of Poland and Hungary and representatives of the Polish government and European parliamentarians. 1918 from the Polish, Lithuanian, Belarusian and Ukrainian perspectives

2018-09-13

How were the circumstances, the significance and assessment of Poland's independence presented in historiography and in school textbooks? What was „1918 year“ from the Polish, Lithuanian, Belarusian and Ukrainian perspectives? These are the most important issues to be dealt by the participants of the international scientific conference, which will be held on September 13-14 at the Faculty of History and Sociology at the University of Białystok - informs Katarzyna Dziedzic, a spokesman for the university. The conference will be led by well-known historians from Poland, Lithuania and Belarus. The discussions in the hall of the Historical-Sociological Department of the University of Białystok are open to all participants. The organizers of the conference are the Institute of History and Political Sciences of the University of Białystok, the Polish Historical Society and the Regional Center for International Debate in Białystok.

Career development festival at the Lazarski University in Warsaw

2018-09-13

Lazarski University in Warsaw invites participants on September 15, 2018 to the Career Development Festival, which is addressed to all seeking information on further education and inspiration to acquire new skills. Festival participants will be able to listen to lectures on law, business and development. The participants will also be able to learn more about post-graduate studies and MBA programs at the Lazarski University. As the organizers assure, the festival is also a good opportunity to talk with lecturers of particular majors. More: <https://ckp.lazarski.pl/festiwalrozwojukariery/>

Students of the Warsaw University of Technology to take part in the UAV Challenge Medical Express

2018-09-13

Students from the MeAvio Avionics Research Club, operating at the Faculty of Power and Aeronautical Engineering of the Warsaw University of Technology, will take part in the UAV Challenge Medical Express. The competition is held every two years and involves the best academic teams and teams of professionals involved in the construction of unmanned machines from around the world. This year's competition, which will take place from 24 to 28 September 2018, is organized by the University of Queensland and the Australian Institute for Research and Development. The students of the Warsaw University of Technology will present the drone «Marlin», which performs the missions without operator interference and has the option of automatically changing the flight route in the event of a possible collision with other users of the airspace. It is a combination of a classic aircraft with a combustion engine and an electric-powered multi-rotor.

Educational footballs from Wrocław to be sold in the USA, Canada and the European Union

2018-09-13

Academy of Physical Education in Wrocław signed a license agreement for the production and distribution of EDUball educational footballs with the American company Palos Sports. Educational balls were created 16 years ago at the Academy of Physical Education in Wrocław. by Dr Andrzej Rokita, Prof. Supervisor Tadeusz Rzepa and entrepreneur Marek Nowicki. Now, the footballs will be sold in the USA, Canada and the European Union under the name brainball, The signing of the agreement was preceded by agreements on the transfer of their proprietary copyrights to the university. Educational outcomes with the use of the EDUball have been evaluated for 16 years. Many pedagogical experiments were carried out in schools and kindergartens. This has been

the subject of PhD theses, books and didactic games (including English versions). Palos Sports Inc. is one of the largest companies in the US dealing in the distribution of sports and educational equipment.

Silesian University of Technology to cooperate with Kyosan Electric Manufacturing

2018-09-13

Silesian University of Technology begins cooperation with the Japanese company Kyosan Electric Manufacturing. The partners will work together to improve the safety and fluency of rail and road traffic. Cooperation between new business partners will include the exchange of ideas, know-how and experiences. Both the university and the company declare their willingness to cooperate in the field of research and implementation work as well as general education. Kyosan Electric Manufacturing manufactures and sells railway signaling systems and traffic control systems. The Japanese company is working on ARTEMIS technology, which exchanges information on traffic and work of traffic lights between real-time signal control devices. The new business partner of the Silesian University of Technology counts on cooperation with the university primarily in the field of developing this technology. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci &Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2374>

Young geologists from the University of Wrocław studying Iceland

2018-09-13

Students from the Scientific Circle of Geologists of the University of Wrocław began the science camp „Iceland 2018”. The purpose of the expedition is to describe and document photographic major geological sites in Iceland, take samples of rocks forming volcanoes Askja, Hekla and Katla, and create a geotourist guide. - Through the guide, we want to share the knowledge about the origins of Iceland, its age, the reason why in one part of the island we encounter rocks with a relatively sour composition, others with a more alkalid composition, however it would seem that Iceland abounds only in basalt rocks - explain participants. The group of 12 students is supported by Prof. University of Wrocław Marek Awdankiewicz - volcanologist, petrologist of igneous rocks from the Institute of Geological Sciences and Dr Honorata Awdankiewicz from the Polish Geological Institute of National Research Institute. Supervisors will watch over the scientific part of the trip. More: <https://uni.wroc.pl/mlodzi-geolodzy-z-uw-odkryja-tajemnice-islandii/>

Viadrina and the University of Poznan to carry out the European New School for Digital Studies project

2018-09-13

The European University Viadrina from Frankfurt on the Oder and the Adam Mickiewicz University in Poznań will cooperate as part of the „European New School for Digital Studies” project at the Collegium Polonicum in Słubice. The English-speaking unit is to combine the knowledge of the European University Viadrina in the field of entrepreneurship with the competences of information technology at the Poznan University. There will be scientific research and classes on challenges that global digitization poses to society, the economy and legal systems. The joint group of experts from both universities is working on the project. The first step will be to launch the “Master of Digital Entrepreneurship” in

the academic year 2019/20. In the longer term, the studies are planned to be developed and should attract students, PhD students and renowned scientists to the program. More: <https://amu.edu.pl/aktualnosci/na-glowna/365558-most-naukowy-nad-odra-viadrina-i-uam-wspolnie-stawiaja-czolo-wyzw-poleczenstwa-cyfrowego>

Chinese language course at the Białystok University of Technology

2018-09-14

Białystok University of Technology organizes a Chinese language course which will be run by the Bureau for International Cooperation of the Białystok University and the teacher sent by the Confucius Institute in Beijing. According to Dorota Sawicka, a press spokesperson of the Białystok University of Technology, the Białystok University of Technology has intensively cooperated with universities of China for several years. Every year, Summer Schools of Logistics are organized, where students from both countries can acquire practical and theoretical knowledge about logistics and transport. At the Faculty of Management Engineering, there is the International Chinese and Central-Eastern European Institute of Logistics and Service Sciences, which was established jointly by the Białystok University of Technology and Zhejiang University Ningbo Institute of Technology in China. More: <https://www.facebook.com/chinskinaPB>

Łódź Days of Gerontology

2018-09-14

On September 20 and 21, the Department of Demography and Gerontology of Social University of Lodz organizes „Łódź Days of Gerontology”, which will be devoted to the causes, processes and consequences for aging population. The intention of the organizers is to focus on the following issues: the demographic aging process of the population, with particular emphasis on territorial diversity; aging population and demographic, economic and social security; health, living conditions and quality of life for seniors; tasks of social policy implemented at various levels for elderly people; situation of older people in the labor market. The organizers intend to issue the reports,

evaluated by external reviewers in the journal «Acta Universitatis Lodziensis. Folia Oeconomica».

Medical graduates of the University of Warmia and Mazury can perform their job in India

2018-09-14

The Supreme Medical Chamber of India added the Faculty of Medicine at the University of Warmia and Mazury (UWM) in Olsztyn into the list of medical universities recognized by India. This opens up the opportunity for UWM students to work in India. - We are very happy about this decision. India is one of the most populous countries in the world. It counts more than 1.3 billion people, and in addition, many Indians live outside its borders. This accreditation opens the way for inviting students from India to our Faculty of Medicine - said prof. Andrzej Rynkiewicz, dean of the Faculty of Medicine. Polish universities in Białystok, Gdańsk, Katowice, Lublin, Łódź, Poznań, Toruń and Wrocław as well as the Warsaw Medical University and Collegium Medicum of the Jagiellonian University have already been accepted by Indian Medical Chamber.

Małopolska Researchers' Night

2018-09-14

Over a thousand experiments, workshops and demonstrations will be performed during the 12th Małopolska Researchers' Night, which will take place on 28 September 2018. Meetings with science are planned in 8 cities and towns of the region: Kraków, Nowy Sącz, Tarnów, Oswięcim, Andrychów, Chrzanów, Niepołomice and Skawina. Their goal is to popularize science among the inhabitants of Małopolska, to familiarize children and young people with the profession of scientist, and to encourage young people to choose a career in science. The Małopolska Researchers' Night is part of the European Researchers' Night. In 2017, the event was organized in 342 European cities, and was attended by over one million people. More: <http://nocnaukowcow.malopolska.pl/>

Researcher at the University of Economics in Katowice receives Award of the City of Częstochowa

2018-09-14

Dr Barbara Pabian, Prof. University of Economics in Katowice received the City of Częstochowa Award in the field of Culture for 2018 in the category of „literature and history”. The award was given for the overall research and popularizing activity in the history of the city and the Częstochowa region. Barbara Pabian is a PhD holder in literary and cultural studies, professor of the University of Economics in the Department of Marketing Management and Tourism. She has published 65 scientific papers, including two books on the cultural heritage of the Częstochowa region. She conducts field research describing and popularizing cultural phenomena that testify the uniqueness, regional specificity and the cultural identity of Częstochowa’s inhabitants. Prizes of the City of Częstochowa are awarded for special achievements in five categories: literature and history, theater and film, music and dance, fine arts, and promotion and protection of culture.

International award for students-geologists from the Adam Mickiewicz University in Poznań

2018-09-14

The Student Circle of the American Society of Petrol Geologists at the Adam Mickiewicz University in Poznań received the international Outstanding European Student Chapter Award given by the Europe Region Office of the AAPG (American Association of Petroleum Geologists). AAPG is the largest organization in the world associating specialists in the field of geology - scientists, employees of companies exploring and exploiting mineral resources, students and enthusiasts. Despite the name, AAPG is a global institution. It has almost 40,000 members in one hundred countries around the world. AAPG provides for university-level education and grants for outstanding students. It organizes co-financing for extracurricular knowledge acquisition and global

competitions in earth sciences. This is facilitated by a network of around 300 student circles around the world - including 30 circles in Europe.

Gowin: I am full of admiration for PR abilities of Polish astronomers

2018-09-17

- It’s a storm in a glass of water. I really like astronomers. In Poland, there are many scientific disciplines, sometimes created artificially, to the detriment of science. Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education explained the proposal for changes in the classification of scientific disciplines on the Polish Radio program 1. Deputy Prime Minister Jarosław Gowin emphasized that limiting the number of fields means that they will be realized within other scientific disciplines, and that in the world the astronomy is treated not as a separate science, but part of the physical sciences. - I am full of admiration for PR abilities of Polish astronomers and I am also full of recognition for their scientific achievements and this will be taken into account in my decision - added Minister Gowin.

Academy of Polish diaspora established

2018-09-17

Developing the qualifications of Poles living abroad is one of the objectives of the agreement signed between the Cardinal Stefan Wyszyński University (UKSW) in Warsaw and the „Wspólnota Polska” Association. Signatories of the agreement have committed to undertake and develop activities aimed at cooperation with the Polish diaspora and individual Poles abroad. The activity is to cover science, education, culture, religion, economy, tourism and sport. The agreement is intended to provide more professional support for Polish scientists living outside of Poland including researchers, teachers, doctors, nurses, priests, students and other professional groups of Polish descent. The objectives of the agreement will be implemented through the creation of the Academy of Polish Diaspora. Its task will be to organize seminars, debates and conferences in Polish Diaspora’s issues.

Professor Chłosta becomes honorary doctor of Semmelweis University in Budapest

2018-09-17

Head of the Chair and Clinic of Urology at the Collegium Medicum of the Jagiellonian University in Kraków Prof. Piotr Chłosta received the honorary doctorate of the Semmelweis University in Budapest, the oldest medical school in Hungary. Professor Chłosta is an outstanding specialist in the field of urology. The main areas of his scientific and professional interests are oncological urology, endourology and laparoscopic urology. As the first urologist in Poland and one of the first in the world to perform laparoscopic excision of retroperitoneal lymph nodes in patients with metastatic testicular cancer, he was the first in Poland to create a replacement intestinal bladder only laparoscopically and, as the first urologist in the world, performed an implantation of artificial sphincter around the prostatic coil in a man by laparoscopy.

Success of doctors of the University Clinical Center in Opole

2018-09-17

Dr Med. Jacek Hobot and Dr Med. Tomasz Porażko - doctors of the University Clinical Center in Opole performed the procedure of removing the damaged dialysis catheter with the innovative method - informs Małgorzata Lis-Skupińska, Centrum’s spokesperson. Dialysis using vascular catheters causes complications that require replacement of the catheter, which is usually performed under local anesthesia, painlessly and comfortably for the patient. Sometimes, however, the venous vessel gets attached to the tissue, and the patient requires a major surgical procedure. It was avoided in Opole. Doctors first tried to remove the damaged catheter by inserting a special balloon into it, filling and emptying it. This method turned out to be ineffective. Then they used an intravascular loop to separate the adnexed catheter. The treatment went without complications.

I Congress of Visegrad Clusters in the Education and Congress Center of the Silesian University of Technology

2018-09-17

The first Congress of Visegrad Clusters will take place on 25 and 26 September at the Education and Congress Center of the Silesian University of Technology. The most important topics of the congress will be the aviation-armaments-space sector, ICT, biotechnology and electromobility. The aim of the congress - co-organized by the Silesian technical university is the exchange of information between innovative enterprises and the integration of clusters and cluster initiatives, as well as entities operating in clusters from the Visegrad countries. This is intended by the organizers to help increase competitiveness and equal development opportunities through the exchange of experience. The agenda of the congress includes discussions on innovation in clusters, key clusters, financing clusters in the European Union and the Visegrad countries, as well as on smart specializations, international cooperation, exports, electromobility and motorization. More: <https://visegradclustercongress.klastrypolskie.pl/>

Toruń Science and Technology Park invites participants to the contest Leaders of Innovation of Pomerania and Kujawy Region

2018-09-17

The Toruń Science and Technology Park invites participants to take part in the 10th Leaders of Innovation contest for Pomerania and Kujawy Region, whose goal is to select and promote innovative solutions of scientists and entrepreneurs from the sector of small and medium enterprises in the province. The competition categories are: micro-enterprise; small enterprise; medium enterprise; an academic enterprise and a research unit / research team. The winners will receive the title of «Leader of Innovation of Pomerania and Kujawy» and prizes

funded by the organizers. Only innovations implemented after January 1, 2016 will be evaluated. Particularly outstanding projects can receive the certificate of "The Innovative Brand of the InnoMaRe Region. Made In Kujawsko-Pomorskie". The most innovative entities from the competition will be described in the publication „Innovations in the Kujawsko-Pomorskie”. Applications will be accepted until October 12: <https://liderzy.tarr.org.pl/>

World-renowned Canadian scientists to give lectures at the Gdańsk Medical University

2018-09-17

Professor Philip F. Halloran, international expert in the field of transplantology and nephrology from the Nephrology Clinic of the University of Alberta in Edmonton, head of the Alberta Transplant Applied Genomics Center and Dr. Konrad Famulski, cooperating with him, will deliver lectures at the Medical University of Gdańsk on September 19. Professor Halloran will give a lecture «Molecular analysis of transplant biopsies: insights into mechanisms of disease» and Dr. Famulski «The remarkable versatility of the molecular signature of acute kidney transplant injury.». Both researchers will deliver their lectures in the conference room of the Nephrology, Transplantology and Internal Diseases Clinic. Professor Phillip F. Halloran is the author of numerous publications in the field of transplantology and immunology. Currently, he deals with new methods of molecular diagnostics of transplanted kidney pathology. In 2016, he was recognized as «the most influential personality in the field of transplantology in the last 25 years».

Pomeranian Open Science Conference and Focus on Open Science workshops at Gdańsk University of Technology

2018-09-17

The Library of the Gdańsk University of Technology and the University Information Services Center invite participants to the Second Pomeranian Conference

„Open Science: Direction - Open Science” on September 26-27. The speakers are scientists and librarians working at the Gdańsk University of Technology and representatives of publishers, international organizations (Figshare), institutions and cooperating companies (Clarivate Analytics). The conference will be preceded by the international Focus on Open Science workshop organized on September 25 in collaboration with Scientific Knowledge Services, LIBER (Association of European Research Libraries) and University College London Press. Participants of the conference and workshops will analyze the question how to conduct research, store and share their results. They will also consider how the cooperation between scientists and research centers can implement the policy of openness in science postulated by the European Commission.

Team of the Kielce University of Technology wins the European Rover Challenge

2018-09-18

The Impuls team from the Kielce University of Technology in Kielce won the 4th international robotics competition European Rover Challenge, which took place from 14 to 16 September 2018 in Starachowice. The Raptors team from the Lodz University of Technology took the second place, and the third place was taken by the Canadian team Robotics for Space Exploration from the University of Toronto. The winners of the European Rover Challenge will take part in the prestigious AMADEE-2020 analog mission, organized by the Austrian Space Forum on the Arabian Peninsula in 2020. The robot from the Kielce Impuls team has become the official rover of this mission, and team members will be included in the full cycle of field missions in the Mars simulation. Congratulating the teams, Deputy Prime Minister Jarosław Gowin said: «The nations of the world often fought against each other because of land, I hope that the conquest of the cosmos will take place in a completely peaceful way.» See results: <http://roverchallenge.eu/pl/2018/09/16/wyniki-european-rover-challenge-2018/>

Agreement on cooperation between the University of Life Sciences in Lublin and the Ukrainian National Research Institute

2018-09-18

University of Life Sciences in Lublin signed a cooperation agreement with the National Research Institute for the Control of Medicines and Feed Additives in Lviv. Its most important point is tightening of scientific cooperation and the mobility of academic staff. The document was signed by Prof. Zygmunt Litwińczuk, Rector of the University of Life Sciences in Lublin and Prof. Igor Kotsiumbas, director of the Ukrainian National Research Institute. The agreement on behalf of the Lublin university will be coordinated by Faculty of Veterinary Medicine, Faculty of Biology, Animal Sciences and Bioeconomy, and Faculty of Production Engineering.

Students of the Krakow University of Technology awarded Young Europeans Acting for Road Safety

2018-09-18

Sylwia Pogodzińska and Dawid Dudek from the Krakow University of Technology have won the international Young Europeans Acting for Road Safety (YEARS) competition. The European Transport Safety Council has awarded their project of the reconstruction of a dangerous pedestrian crossing at Okulicki Street in Krakow. This year's competition was attended by 43 teams from all over Europe. Apart from the team from Krakow, the teams from Milan, Naples and Vilnius were awarded. The YEARS competition is addressed to young European engineers working to improve road safety. - It's really inspiring when you see how these young people deal with security issues on their own. They identified dangerous places by thoroughly examining data, designed innovative solutions, sought support for the project and tried to publicize it in the media - said Antonio Avenoso, Director of the European Transport Safety Council.

Conference „Theory, organization and practice of law making process” at the Lazarski University

2018-09-18

On September 22-23, 2018, the Lazarski University in Warsaw will host the international conference „Theory, organization and practice of the law-making process”. The organizers of the event are the Board of the Association for Research on the Sources and Functions of Law, the Lazarski University and the monthly journal „Przegląd Prawa Publicznego”. The conference will include four plenary sessions: Descriptive and normative models of law-making; Legal and institutional dimension of the law-making process; Law-making practice and a special session in English. The conference will be accompanied by the General Assembly of Members of the Association for Research on Sources and Functions of Law and the announcement of the results of the contest «Legal interpretation as a derivative of understanding the purpose and mode of operation - 2017/2018» together with the presentation of the best awarded works.

Students from Poznań win the European GOMAC 2018

2018-09-18

Students from the Adam Mickiewicz University and the University of Economics in Poznan took the first place in Europe in the international competition Global Online Marketing Academic Challenge (GOMAC) 2018. Mateusz Halicki, Dawid Śliwiński, Sebastian Jastrzębski and Aleksander Kempa prepared and conducted a 3-week marketing campaign integrating the Google Ads (AdWords), Facebook and LinkedIn platforms. The campaign was conducted for Ogarniamprad.pl - the first dedicated auction platform in Poland, allowing real-time bidding for purchase and sale of energy as part of group reverse auctions. The competition is organized by the international community of Global Online Marketing Academics, associating academic teachers specializing in digital marketing. After the victory in Poznań, Poznań students are still fighting for the title of Global Winner GOMAC 2018.

University of Opole signs a contract with Changchun University

2018-09-18

The University of Opole will cooperate with the Chinese Changchun University. The signed agreement assumes cooperation in the field of education, science, technology, culture, exchange of teachers and students. Experts and professors from both sides will participate in the demonstration and design of educational cooperation programs, and will create international cooperation programs. They plan to exchange educational and didactic materials, as well as delegate teachers in order to conduct didactic work. Universities will exchange students and provide training for foreign students on the basis of an agreed program, send students from their universities abroad to a partner university in order to learn a language, and conduct vocational studies or internships. The agreement also assumes the exchange of artistic teams and the joint organization of art exhibitions and cultural events.

University of Economics in Katowice to support the conference „How to sell Polish products”

2018-09-18

The IndustryStock.pl portal organize the international conference „How to sell Polish products”. The event, scheduled for October 24, is supported by the University of Economics in Katowice. The conference will be a platform for the exchange of knowledge and experience on the principles of functioning on export markets and cooperation with foreign partners. It will be attended by people involved in the internationalization processes of Polish products, know-how and the Polish economy - managers, entrepreneurs and business representatives. The organizers announce discussions on the following topics: How to effectively build export strategies?; the specificity of export markets; the German market - the first step in exports; international negotiations; effective international marketing and international savoir vivre. More: <http://konferencjaeksport.elamed.pl>.

University of Silesia invites pupils to the program First Steps in Science

2018-09-18

The Silesian Intercollegiate Center for Education and Interdisciplinary Research in Chorzów will implement the „First Steps in Science” tutoring program aimed at pupils providing the development of their interests and supervision of academic teachers. The recruitment will last until September 30. The program includes: the implementation of a scientific project under tutor's supervision, participation in workshops conducted by scientific and didactic staff as well as interdisciplinary scientific seminars. Young scientists will also be able to participate in selected lectures in mathematics, physics and computer science for first-year students. Participants will receive record books from the University of Silesia, they will use university's notebooks to implement a research project or during workshop classes. The project is co-financed by the Ministry of National Education under the «Program supporting the development of highly talented students». More: www.smcebi.us.edu.pl

Deadline for submitting applications in the „Eagle of Innovation” to expire

2018-09-19

Until 30 September 2018 R&D companies can apply to the „Eagle of Innovation” call organized by the newspaper Rzeczpospolita and the National Center for Research and Development. This year, in addition to innovative projects implemented by companies in four categories, the organizers have added the Centennial Innovator category. The main goal of the «Eagle of Innovation» is to select and reward companies conducting research and development, introducing new products and services to the market and achieving business successes. From the delivered applications the Chapter will select companies that successfully invest in innovation and thus are competitive not only on the Polish, but also on the European market. More: <https://orzelnnowacjia.pl/zgloszenie.html>

European School of Magnetism is underway in Krakow

2018-09-19

The European School of Magnetism will last until September 28, 2018. The event takes place at the Academic Center for Materials and Nanotechnology of the AGH University of Science and Technology in Krakow. 120 young scientists and 16 lecturers from 27 countries are participating in the European School of Magnetism. The main purpose of the event is providing specialized education based on Polish and European outstanding scientists and the newest research infrastructure. This year's theme of European School of Magnetism is „Magnetism by Light” - researching and controlling the phenomenon of magnetism by „light”, i. e. by electromagnetic radiation in a very wide range of frequencies (from radio to gamma radiation). More: <http://www.esm2018.agh.edu.pl/>

Polish-British scientific workshops on artificial intelligence and cities of the future to be held soon

2018-09-19

The Polish-British Science Forum dealing with technology transfer, global innovation and exchange of experience on Polish-British cooperation has ended in Warsaw. The conference, aimed at strengthening cooperation in the field of science and innovation between Poland and Great Britain, was attended by scientists and innovators who discussed the implementation of modern technologies, building relations between science and business, strengthening competences in the area of management and effective commercialization of innovation. Deputy Minister of Science Piotr Müller informed, that scientific workshops on smart cities of the future and artificial intelligence are planned with aid of the embassy of Great Britain and the British Council. - We hope that they will be a source of ideas for new projects in areas of important socio-economic challenges - said Müller.

Invention of Bialystok scientists patented in the USA

2018-09-19

The method of ultrafast photomagnetic recording, developed by physicists from the University of Bialystok - Dr Andrzej Stupakiewicz, Prof. University of Bialystok and Dr. Krzysztof Szerenos was patented by the American Patent Office. The invention of Bialystok scientists can revolutionize the efficiency of future computer systems in the field of digital information storage and processing. The results of the research, which were carried out as part of projects developed at the Department of Physics of Magnetism at the Faculty of Physics of the University of Bialystok, were patented. The essence of the invention is a method and a system for photomagnetic recording using a transparent dielectric medium. Some of the research results have already been published in the journal «Nature». Maritime University of Gdynia receives European Commission Certificate

2018-09-19

The Maritime University of Gdynia received the „Logo of HR Excellence in Research“ certificate awarded by the European Commission to institutions that implement and apply the principles of the „European Charter for Researchers“ and the „Code of Conduct for the Recruitment of Researchers“. Granting the HR Logo certificate is one of the activities of the European Commission performed within the framework of the Human Resources Strategy for Researchers aimed at increasing the attractiveness of working conditions of researchers in the EU, as well as standardizing procedures related to conducting scientific research. The granting of the certificate is also aimed at confirming the institutions' readiness to apply and implement scientific projects on the national and international arena. The benefits of having the HR Excellence in Research include increasing the attractiveness of employment at the university, creating a friendly environment for scientific work and respecting transparent rules when recruiting employees. More: <http://www.umg.edu.pl/node/4564>

Scientific conference on taboo in advertising at the Koszalin University of Technology

2018-09-19

The Department of Social Communication and Journalism of the Koszalin University of Technology and the Student Scientific Society „Badamy Reklamy“ invite students to the first scientific conference from the series „Areas of advertising“. Representatives of various scientific fields, as well as practitioners in the field of social communication will take part in the conference. The first scientific conference from the series «Areas of advertising» will focus on the taboo phenomenon in advertising. The meeting is intended to allow a broad reflection on what is accepted in advertising messages - commercial, social and political texts, and what exceeds these standards, causing social opposition and indignation. The

conference, planned for October 22, will also be a chance to reflect on what the broadcasters are gaining, violating publicly accepted social norms with their taboo advertisements, and what they lose or may lose and how they deal with such situations. More: <http://wh.tu.koszalin.pl/art/736>

Preparations for the 3rd Silesian Science Festival KATOWICE are underway

2018-09-19

Academic teachers, academics, supervisors and members of scientific groups, students and PhD students are preparing the 3rd Silesian Science Festival KATOWICE. They are invited to present their passions, scientific interests and achievements. Proposals promoting science can be submitted in the following areas: humanistic and social; artistic; natural; exact sciences; medical; space industry and e-sport. The theme of the 3rd Festival will be Energy. Exhibitors and speakers can submit their participation application via the form available on the event website. This obligation applies to proposals of major festival events scheduled for January 13 and 14 at the International Congress Center in Katowice. The deadline expires on October 31, 2018. More: www.slaskifestiwalnauki.pl

4th Days of Digital Accessibility in Katowice

2018-09-19

The University of Silesia invites participants from 26 to 28 September on the 4th Days of Digital Accessibility. The aim of the event is to promote and familiarize the subject of digital and social inclusion. The meeting will take place at the headquarters of the Regional Institute of Culture in Katowice. The theme of this year's event will be «Digital inclusion and accessibility to the world of culture and art». In the seminar, the participants will listen to lectures on standards of accessibility to the world of culture and art, the social dimension of digitization of cultural heritage, ways of accessing subtitles and accessibility of websites for people with disabilities. During the workshop, rules for creating available content on websites will be presented in accordance with

the Web Content Accessibility Guidelines (WCAG) 2.0 recommended by the W3C Consortium. The participants will learn how to prepare the content of advertisements and events for people with disabilities in an accessible way. More: <http://www.unicat.us.edu.pl/>

National Academic Exchange Agency to launch Polish-Italian bilateral exchange program for scientists „CANALETTO“

2018-09-20

National Academic Exchange Agency (NAWA) has started call for applications for scientists under the bilateral exchange program between Poland and Italy „CANALETTO“. Applications for funding may be submitted by universities, scientific units of the Polish Academy of Sciences, research institutes and international scientific institutes operating in Poland. The aim of the program is to support the mobility of scientists carrying out research projects, agreed and conducted jointly by partners from Poland and Italy. Funding for projects is intended to cover the costs of travel and stays of researchers, excluding funding for the research itself, which must be guaranteed from other sources. The call covers exclusively the following thematic areas: mathematics, physics, chemistry, space, agriculture, food and sustainable environment, nanotechnology and advanced materials, information and communication technologies, cultural heritage, medicine and health.

University of Rzeszów to launch Salon Maturzystów for graduates

2018-09-20

This year's Salon of Maturzystów (the club of graduates) will take place for the first time at the University of Rzeszów. All interested graduates are welcomed on September 24-25, 2018. They can participate in many events and exhibits, workshops, inspirational lectures, expert advice from psychological and pedagogical clinics and employment offices, and professional predispositions research - informs Dr. Maciej Ulita, spokesman of the University of Rzeszów. During the event the graduates will be able to talk with representatives of various universities, learn everything about the directions and course of studies and employment prospects.

Science Festival in Warsaw

2018-09-20

From 21 to 30 September 2018, the Science Festival will take place in Warsaw. Established in 1996 at the initiative of the University of Warsaw, the Warsaw University of Technology and the Polish Academy of Sciences, the Science Festival in Warsaw was the first event of this type in Poland. Its main purpose is to provide knowledge about scientific achievements. The motto of the festival is: «Lack of investment in science is an investment in ignorance». The organizers prepared seven main debates, that focus on such issues as the 100th anniversary of Polish independence, artificial intelligence and climate. The University of Warsaw is the organizer of over 170 from 442 open lectures. More: <http://festiwalnauki.edu.pl/>

Medical University of Silesia invites participants to the Wound Treatment Forum

2018-09-20

Evereth Publishing and the Chair and Department of Descriptive and Topographical Anatomy of the Medical University of Silesia invite participants to the second interdisciplinary conference on the Treatment of Wounds. The conference „Trends and

challenges in modern therapy” will take place from 11 to 13 October in Zakopane. The topics of the Forum are Problems of wound healing in various etiologies in the light of current guidelines, General and local treatment of chronic wound, Antiseptics and dressings, Microbiological aspect of chronic wound healing, Vacuum treatment - NPWT therapy, Compression therapy and Other techniques and methods supporting wound healing. The organizers invite doctors of various specialties, nurses and all those who in their daily practice meet the problems of wound treatment of various etiologies, both in hospital or at home.

„Strategies in making decisions in conflict and cooperation situations” - a joint conference of three Universities of Technology

2018-09-20

Silesian, Wrocław and Gdansk Universities of technology invite participants to the conference „Strategies in making decisions in conflict and cooperation situations”, which will take place on 24-25 September 2018 in Ustroń. The conference is an annual forum for exchanging views and experiences related to the issues of making decisions and shaping strategies in organizations. The theme of the meeting is «Developing the potential of the organization». The organizers of this year's conference propose a discussion on the following issues: management in the era of Industry 4.0 - shaping economic and business relations; Smart City project - knowledge management for the improvement of the quality of life; managing the development of new products and innovations; decision support in management and economics; IT technologies supporting decision making and shaping strategies as well as quantitative models and methods in management and economics.

Students of the Silesian University of Technology to take part in the UAV Challenge Medical Express competition in Australia

2018-09-20

Students of the Silesian University of Technology associated in the „High Flyers” scientific circle will take part in the UAV Challenge Medical Express competition in Australia. The purpose of the competition is to demonstrate the usefulness of unmanned aircraft in civil applications, in particular where they can save human life. The competition organized by the University of Queensland and the Australian Institute for Research and Development provides the design and construction of an unmanned aircraft that should perform an exploration and rescue mission in the Australian outback. An autonomous drone must find a sick man cut off from the world, land without a runway, take a blood sample, take off and deliver a sample to the laboratory for further medical analysis. The construction of the students of the University is a plane of vertical take off and landing HF-10 VTOL (Vertical Take-Off and Landing) - a hybrid unmanned platform combining the advantages of a classic quadcopter and a plane.

Conference in Bydgoszcz: "Critically with Foucault. Anarcheology of education and public space"

2018-09-20

Universities in Bydgoszcz, Gdansk and Lodz invite participants to a nationwide scientific conference: "Critically with Foucault. Anarcheology of education and public space". Anarcheology is the concept coined by Foucault in his lectures at Collège de France in 1980. He used the word game of «anarchy», «archeology» and «genealogy». Anarcheology is understood here as a characteristic, critical «theoretical-practical attitude» and a «rule» concerning the non-necessity of power and understanding of the orders of knowledge. The concept of anarcheology provides the analysis of truth, power, discourse and subjectivity / identity. The value of the conference is its interdisciplinary profile and disputable character. It is addressed to teachers, sociologists, psychologists, political scientists, philosophers and representatives of other scientific disciplines. The conference will take place on November 27-28, the applications should be submitted by September 23.

Młodzi Innowacyjni - a competition for young scientists

2018-09-21

The Polskie Górnictwo Naftowe i Gazownictwo Capital Group (PGNiG) again organizes a competition for students, PhD students and young scientists. It is to aim to find innovative projects and ideas within PGNiG's operations. This year, the organizers are expecting ideas and solutions in the following areas: Hydrogen technologies - hydrogen and gas; Suggestions for smartphone applications for gas industry and gas consumers; Acquisition of methane from coal (CBM); Robotics and artificial intelligence; Social media - opportunities for the sector; New use of gaseous fuels; Innovative methods of cooperation with the client; Technologies improving the effectiveness of well cementation and directional Drilling; technological challenges. Applications for the Young Innovation contest may be submitted by

31 October 2018 in electronic form to the following address: konkursMIP@pgnig.pl More: <http://pgnig.pl/mlodzi-innowacyjni-dla-pgnig>

Jagiellonian University launches the synergy between Chinese and Western medicine

2018-09-21

On September 18-19, 2018, the Jagiellonian University in Krakow will hold the conference „Integrative Health. A New Paradigm for Health Care” on possible synergies between Chinese and Western medicine. The organizers of the event emphasize, that Chinese medicine has gained wide recognition in the Western world. Chinese medicine centers are now at many western universities, including the United States, Sweden, Germany and Israel. The conference promoting this approach at the Jagiellonian University was a pioneering event in Poland. Among the speakers were Prof. Ka-Kit Hui, founder and director of the Center for East-West Medicine at the University of California in Los Angeles, Prof. Jing Zhao from the Chinese Academy of Medical Sciences in Beijing and Dr Magdalena Kocot-Kępska, secretary of the Polish Society for the Study of Pain.

Lodz University of Technology to hold a seminar on paper physics

2018-09-21

On September 22-27, 2018, the Institute of Papermaking and Printing of the Lodz University of Technology organizes an international scientific seminar on paper physics - TAPPI Progress in Paper Physics Seminar. The Institute of Papermaking and Printing is the only scientific and didactic unit in Poland educating specialists in the field of paper physics. In the field of paper physics the scientists are researching on rheological properties of fibrous materials, their optical and chemical properties, and interaction with liquids and gases - says Dr Konrad Olejnik, director of the Institute of Papermaking and Printing at the Lodz University of Technology.

International Bioeconomy Congress in Łódź

2018-09-21

The International Bioeconomy Lodz Conference 2018 will be held on Monday - September 24 – in Łódź. The congress will discuss issues related to the fight against smog, closed-circuit digitalisation, modern technologies in the bioeconomy, and high-quality food. As part of the event, the Antismog Forum will be held, organized by the University of Lodz. The organizers invited Prof. Joanna Wibig from the Department of Meteorology and Climatology, University of Lodz; Wiktor Warchałowski, president of the board and co-founder in Airly - a startup that builds a network of air sensors for cities and municipalities, thanks to which it is possible to monitor air status in real time using an online map; Prof. Wojciech Hanke from the Institute of Occupational Medicine and Rafał Czyżewski - president of the board of GreenWay Polska, who is building the first in Poland comprehensive network of publicly available stations for fast charging of electric vehicles to participate in the panel discussion.

V International Conference of Thermal Spraying and Welding in Wrocław

2018-09-21

Department of Materials Science of Strength and Welding of the Faculty of Mechanical Engineering of the Wrocław University of Technology invites participants from 26 to 28 September to the 5th International Conference of Thermal Spraying and Welding „Progress, applications and modern technologies”. It is the only monothematic regular conference devoted to technologies of thermal spraying in Poland and the largest such conference in Central and Eastern Europe. Its most important topics are new materials and technologies, properties of coatings and paddings produced by various methods and new industrial applications in various operating conditions. The organizers also promise to discuss problems related to training specialists, certification system and quality in thermal spraying and padding technologies. A session devoted to generative technologies of metallic materials is also planned, with particular emphasis on 3D printing.

University of Silesia participates in the „European Association for International Education” conference

2018-09-21

Representatives of the University of Silesia in Katowice participated in the conference „European Association for International Education” (EAIE) - the largest branch conference in Europe concerning higher education. This year's event took place in Geneva and gathered over 5,000 participants. The conference was attended by researchers and specialists in international cooperation from European universities as well as state agencies and organizations involved in the internationalization process. The event was accompanied by educational fairs. University of Silesia presented its offer at the stand «Ready, Study, GO! Poland „prepared by the National Academic Exchange Agency. University representatives also took part in meetings with partner universities from Spain, Sweden, the United States, Canada, Japan and Taiwan. The talks focused on strengthening existing cooperation and establishing new contacts.

Conversatorium of Atomic Spectrometry to be held at the University of Bialystok

2018-09-24

On September 24-26 at the Institute of Chemistry of the Faculty of Biology and Chemistry of the University of Bialystok, for the first time the Conversatorium of Atomic Spectrometry (KOSAT) will be held. According to Katarzyna Dziedzic, spokesperson at the University of Bialystok, it will be the 15th nationwide meeting of analytical chemists involved in spectral analysis. About 120 scientists will participate in the seminar, including guests from Monaco and France. Participants of the three-day meeting will have the opportunity to listen to over 30 lectures and present the results of their research. The most important event of the scientific meeting will be a special session during which Dr Emilia Vassilieva (International Atomic Energy Agency, Environment Laboratories in Monaco) and Prof. Henryk Matusiewicz (Faculty of Chemical Technology, Poznan University of Technol-

ogy) will be honored with the special award of Dr Jerzy Fijałkowski for their contribution to the development of spectral analysis methods. More: www.kosat.pl

Interdisciplinary conference in Bielsko-Biała „Femininity and masculinity in the media”

2018-09-24

The Institute of Modern Languages, Faculty of Humanities and Social Sciences, Department of Economic and Social Sciences, Faculty of Management and Transport, University of Bielsko-Biała and the Faculty of Humanities and Social Sciences of the Polish Naval Academy in Gdynia invite participants to the ninth interdisciplinary scientific conference „Femininity and Masculinity in the Media”. The conference, scheduled for November 5 at the campus of the Academy of Technology and Humanities, is devoted to the role of the media in the process of social definition and reconciliation of the meanings of such cultural constructs as femininity and masculinity. Mass media affect the normalized understanding of femininity and masculinity. They give not only a sense of what it is meant to be «feminine» or «masculine», but also how people should behave in this regard, what to look for, what to desire. More: www.konferencjamedia.ath.bielsko.pl

Seminar „State and threats to the natural environment in the Silesian Voivodeship”

2018-09-24

The Statistical Office in Katowice and the Faculty of Biology and Environmental Protection of the University of Silesia invite participants to the seminar „State and threats to the natural environment in the Silesian Voivodeship” scheduled on 11 October. The seminar is addressed to representatives of research centers and research institutes, academia, representatives of local administration, employees of the Ministry of Statistics and everyone interested in environmental protection. The participants of the seminar will discuss the problems of environmental protection and development in the Silesian Voivode-

ship, the search for innovative solutions and research, monitoring and information and education activities undertaken in the field of environmental protection and natural resources. The meeting will also be an opportunity to promote the achievements of the scientific community and to present the information offer of public statistics in the field of environmental protection.

Professor Anders Grubb awarded the title of doctor honoris causa of Gdansk University

2018-09-24

The Senate of the University of Gdańsk awarded the title of doctor honoris causa to Professor Anders Grubb, an outstanding scientist and doctor, a specialist in the field of clinical chemistry. The ceremony of awarding the title will take place on September 28 in the hall of the chemistry department in Gdańsk Oliwa. This is the highest academic distinction that Professor Grubb receives for outstanding achievements in the field of medical chemistry and the impact on the development of new research topics at the Faculty of Chemistry. Professor Anders Grubb is an internationally acclaimed specialist in clinical chemistry, in particular medical diagnostics and biochemistry. His research include studies on the structure and function of proteins and their use in medical diagnostics, in particular kidney diseases. For many years, Professor Grubb has been cooperating with scientists of the Faculty of Chemistry and he wrote almost 350 scientific works in collaboration with researchers from the University of Gdańsk.

University of Warmia and Mazury becomes leader of Universities for Future Work Skills 2020

2018-09-25

University of Warmia and Mazury became the leader of the project Universities for Future Work Skills 2020. It receives over a million PLN for its implementation. About 200 people (students, academic teachers and entrepreneurs) from 6 European Union countries will be involved in the project. The partners of the Olsztyn University are the Romanian-American University in Bucharest, the Main School of the Liège Province in Belgium, the University of Vigo in Spain, the Technological University in Porto in Portugal and the consulting companies from Greece and Spain. The aim of the project is to increase the chances of university graduates to gain employment by developing their soft skills and soft skills of their academic teachers. The project will end in February 2021.

Polish-Vietnamese talks on increasing scientific and economic cooperation

2018-09-25

Increasing the level of academic exchange, intensification of joint research activities and promotion of Polish language at Vietnamese universities are the topics of the meeting of Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education with the Vietnam government delegation headed by Truong Hoa Binh, Deputy Prime Minister of Vietnam. During the meeting, the internationalization of studies was discussed. To enhance it, the sides decided to create a Polish language course at the University of Hanoi. The representative of the Vietnamese government expressed a wish to increase the limit of Vietnamese scholarship holders at Polish universities in the future. Deputy Prime Minister Gowin emphasized during the talks that Polish-Vietnamese cooperation could be intensified in the pharmaceutical, agri-food, armaments or tourist sectors. He also stressed that the presence of a large Vietnamese diaspora in Poland remains important factor of economic cooperation.

Inauguration of the academic year for the Lane Kirkland Scholarship Program

2018-09-25

The University of Maria Curie Skłodowska (UMCS) in Lublin held the inauguration of the academic year 2018/2019 of the Lane Kirkland Scholarship Program. The main group of participants of the inauguration were 42 new Kirkland Program scholarship holders and four scholars of the Kirkland Research Program. The students come from eight countries: Ukraine, Belarus, Russia, Armenia, Georgia, Kyrgyzstan, Kazakhstan and Moldova. They are young leaders operating in their countries within public administration, academic, business, media and politics. The inauguration took place on September 21. Lane Kirkland Scholarship Program is a project of the Polish-American Freedom Foundation, whose mission is supporting democratic and free market changes in the countries of Central and Eastern Europe.

Warsaw University of Technology to participate in the Graphene Project of the European Union

2018-09-25

Warsaw University of Technology, represented by the Faculty of Physics, as the only Polish university joined the Graphene Project of the European Union implemented as part of the „New Technologies and Technologies of the Future” program. The aim of the project is the effective use of research conducted at the highest level in innovative material solutions based on graphene and related materials. The project will last until 2023. Warsaw University of Technology in September 2018 joined the project consortium, which consists of 158 partners from 23 European countries. For several years scientists of the Faculty of Physics have been conducting research on graphene and other sandwich materials in the field of new technologies of manufacturing, characterization and applications in electronics and other technical fields.

European Technology Forum in Katowice

2018-09-25

The European Technology Forum will take place on 26-27 September at the International Congress Center in Katowice. The Forum will be an open platform for consulting European research and technology policy. The event is organized by the Polish Chamber of Commerce for High Technology under the patronage of Prime Minister Mateusz Morawiecki. The program includes discussion on the priorities of European science and technology policy and funding mechanisms for research and technological development, in particular the issues planned for implementation under the seven-year Horizon Europa program and the analysis of synergies between this program and other programs in the field of research, innovation and competitiveness. Participants will also talk about the promotion of creating various types of networks and partnerships by industry, science and public authorities. During the forum, the objectives of the Responsible Development Strategy for Poland in the field of research and innovation will be presented along with a discussion on the ways of their implementation. More: <http://euroforum.iztech.pl/>

University of Opole organizes a conference on rock music

2018-09-25

The Institute of Slavic Studies at the Faculty of Philology at the Opole University invites participants to the 10th nationwide conference „Unisono in poliphony”. The meeting in Tułowice will bring dozens of scientists from all over Poland who are involved in rock music and close disciplines. The event will be held on September 28-29. The main topics of the meeting are primarily rock music and other genres, but due to the interdisciplinary nature of the conference, not only musicologists and musicians will participate in it. Also literary scholars, historians and visual artists designing album covers are invited. This year, one of lecturers will be a doctor who will talk about occupational diseases affecting musicians. The originator and co-organizer of the event is a linguist, Dr Radosław Marcinkiewicz. His scientific interests include onomastics, musical terminology, monolingual and translation lexicography, and research on key elements of phonographic works.

Talks on digital transformation at the e-Health Forum in Sopot

2018-09-25

Almost 400 participants - patients, service providers, scientists, medical professionals, and representatives of the Ministry of Health and the Center of Information Systems for Health Care participated in the e-Health Forum in Sopot. The Forum co-organized by the Medical University of Gdansk and the Polish Society for Health Programs became a platform where the stakeholders of the digital transformation process made many important declarations. - We are building a foundation on which we will be able to base new services for patients, tools for doctors, algorithms for analysts - said Deputy Minister of Health Janusz Cieszyński. Deputy President of the National Health Fund Adam Niedzielski declared a new way of thinking of the Fund, more open to new technologies. He emphasized the importance of pilot programs in the field of telemedicine, which in practice demonstrate whether the adopted solutions are effective and can be applied on a wider scale. More: <https://gumed.edu.pl/49631.html>

Poznan students win Global Online Marketing Academic Challenge

2018-09-25

Students of the Adam Mickiewicz University and the University of Economics in Poznan won the Global Online Marketing Academic Challenge (2018). Earlier, the Poznań team proved to be the best in Europe. It qualified for the final round, where the world's winners were selected. At GOMAC 2018, students prepared and implemented an online marketing campaign for a real company, competing on the real market and incurring real costs without the upper limit of the budget imposed by the competition regulations. This year, students under the supervision of Dr. Wojciech Czart worked with Ogarniamprad.pl - an auction platform enabling bidding of energy prices in real time. Poznań students have already started preparations for participation in GOMAC 2019. A team of seven students will prepare and conduct an online campaign for the German company IBS GMBH GEO-CAD, offering a system of booking accommodation for employees in Poland and Germany.

Talks about the prospects of Industry 4.0 development held in Gliwice

2018-09-25

The 8th International Conference „Social and Technical Sciences - the scope of cooperation for the development of Industry 4.0” will be held on September 28 at the Center for Innovation and Technology Transfer at the Gliwice University of Technology. The main organizers are the Faculty of Mechanical Engineering, the College of Social Sciences and Foreign Languages, and the Center for Innovation and Technology Transfer. This year's event is devoted to the prospects of Industry 4.0 development in Poland and abroad. The organizers have planned a panel discussion with experts, representatives of industry, business and public institutions. The purpose of the conference «Social and technical sciences - the scope of cooperation» is to integrate a transnational academic environment, create opportunities to present

research results, establish interdisciplinary scientific cooperation, exchange ideas of researchers interested in changes taking place in the modern world.

Scientific conference „Problems of literature anthropology” held in Białystok and Grodno

2018-09-26

Literary researchers from the University of Białystok and Janka Kupala Grodno University from Belarus organized the International Scientific Conference „Problems of literature anthropology”. For three days, from September 21 to 23, the event was held in Grodno, and for following two days (September 24-25) the scientists moved to Białystok. The topic of the Białystok conference was «Literary work in the cultural space”. Conference participants listened to dozens of presentations, including: „Between the word and the image - literature on television” by Dr Alicja Kisielewska, Prof. University of Białystok, „Drama text in the theater” by Dr. Jadwiga Gracla from the University of Warsaw, „Anthropological aspect of Lidia Zinovieva's Annibal” Dr Agnieszka Gozdek from the Maria Curie Skłodowska University in Lublin and „Space in contemporary Belarusian literature” by Katarzyna Drozd from the University of Warsaw.

XXI International Onomastic Conference „Onomastic terminology – Names Studies”

2018-09-26

The Faculty of Humanities of the Maria Curie Skłodowska University in Lublin in cooperation with the Linguistics Committee of the Polish Academy of Sciences and with the support of the Lublin Branch of the Society of Polish Language Lovers organizes the XXI International Onomastic Conference „Onomastic terminology – Names Studies.” The conference is scheduled for October 4 at the Creative Work House of the Association of Polish Journalists in Kazimierz Dolny on the Vistula. Onomastics is a branch of linguistics dealing with the study of proper names, including names of places, names, surnames. The conference will be attended by over 100 scholars representing academic centers from Poland, the Czech Republic and Slovakia, Russia, Belarus and Ukraine, Lithuania, Croatia and Macedonia, as well as from Hungary and Italy.

Young scientists from the Gdańsk University of Technology receive scholarships from the Minister of Science and Higher Education

2018-09-26

Dr Eng Anna Zielińska-Jurek from the Faculty of Chemistry of the Gdańsk University of Technology, Dr Eng Adrian Bekasiewicz and Dr Eng Michał Sobaszek from the faculty of electronics, telecommunications and computer science received scholarships from the Minister of Science and Higher Education. Dr Anna Zielińska-Jurek from the Department of Chemical Technology deals with new materials enabling the use of less energy-intensive light sources in photocatalytic reactions and their use in removing xenobiotics from the water and gas phase. Dr Adrian Bekasiewicz from the Department of Microelectronic Systems deals mainly with techniques of rapid design and optimization of microwave and antenna systems using surrogate methods. Dr

Michał Sobaszka from the Department of Metrology and Optoelectronics deals with the diagnostics and synthesis of diamond structures for sensory and optoelectronic applications.

Professor Jean Marc Lobaccaro to hold lectures at the West Pomeranian University of Technology

2018-09-26

The West Pomeranian University of Technology and the city of Szczecin invite participants to open lectures by Prof. Jean Marc Lobaccaro. The lecture will be delivered on 28 September at the Nanotechnology Didactic and Research Center, (lecture with simultaneous translation) and on 2 October at the Faculty of Biotechnology and Animal Breeding (lecture for PhD students). Professor Jean Marc Lobaccaro is an authority in physiology, endocrinology, as well as molecular biology of tumors. He is an employee of the University of Auvergne Clermont-Ferrand, recognized and very popular didactic teacher, as it was proved by numerous awards in competitions for the best academic teacher of his home university. The professor is a big fan of the Star Wars saga, which reflects the title of the lecture: «Prostate cancer and lipids: from dark spectrum to new hope». The second lecture is also devoted to prostate cancer and is entitled «Network of nuclear receptors in prostate physiology». More: <http://www.zut.edu.pl/zut-strona-glowna/informacje-biezace/article/gmina-miasto-szczecin-oraz-zut-w-szczecinie-zapraszaja-na-wyklady-otwarte-profesora-jean-marc-lobac.html>

Stratospheric experiment of scientists from the National Center for Nuclear Research

2018-09-27

The meteorological balloon brought a capsule containing a specially adapted set of two CosmicWatch educational detectors into the Space. The item is prepared by scientists from the National Center for Nuclear Research (NCBJ). According to Dr. Armand Budzianowski from NCBJ, the aim of the undertaking was to make measurements showing how the

intensity of cosmic radiation changes at various altitudes. The balloon reached the stratosphere at a height of about 32 km. There the pressure difference outside and inside of the balloon caused it to break. From that moment, the capsules with instruments were free to parachute downward to Earth. The sets measured cosmic radiation intensity, which after reading and comparing with balloon flight parameters allow to illustrate how it changes at various altitudes.

Ministry of Science preparing salary increase for scientists

2018-09-27

The salaries of academic teachers can increase by 30 percent from next year. The Ministry of Science and Higher Education is preparing a program to increase the salaries of scientists. Deputy Prime Minister Jarosław Gowin underlined that the government will allocate additional funds to increase salaries for both the academic and the administrative staff. Next year's salary increase will not end the process of raising wages for academic staff. From January 2019, in accordance with the recently issued regulation of the Minister of Science and Higher Education, the regular professor's minimum salary will amount to PLN 6,410 (PLN 1,000 more than at present). A university professor will earn no less than 83 percent, and an associate professor will earn 73 percent of regular professor's salary.

Hieronimki 2018 - celebration of translators at the Maria Curie Skłodowska University

2018-09-27

This Friday, September 28, 2018, the Department of Applied Linguistics at the Maria Curie Skłodowska University (UMCS) in Lublin invites participants to the fifth celebration of translators - Hieronimki 2018. The name of the initiative comes from Saint Hieronim, the patron of translators and the author of the first translations of the Bible - explains Aneta Adamska, UMCS press spokesman. The program of the event includes lectures, language workshops and language contests, meetings with linguistics staff, students and successful graduates in Poland and Europe. The specifics of the simultaneous interpreters' work will be experienced during workshops conducted in modern simultaneous translation laboratories, and thanks to the presence of translators-practitioners, participants will learn about the translator's work in court, during a conference, when translating a film or a literary work.

Medical University of Gdańsk carrying out a project promoting the improvement of air quality

2018-09-27

The Gdańsk Medical University in cooperation with the Polish Association of Health Programs implements a project promoting the improvement of air quality by transforming the transport technologies into healthier ones. The project is conducted in 7 European countries by the European Public Health Alliance - an international organization associating entities acting for public health. In addition to Poland, the project includes organizations from the Czech Republic, Spain, Greece, Lithuania, Romania and Bulgaria. Participants prepare a report and recommendations for the national and local authorities, which are to contribute to the improvement of air quality. The use of diesel technology in densely populated areas of the agglomeration is considered to be a particularly important public health problem. In contrast to the so-called low emissions of

households, the problem of air pollution caused by transport remains underestimated at the level of public debate.

In October, secondary school students to join the „Antiquarian League” in Toruń

2018-09-27

Applications for the 12th „Antiquarian League” - an educational program for secondary school students from the Kujawsko-Pomorskie voivodship will be accepted until October 5. The event is co-organized by the Chair of Classical Philology at the Nicolaus Copernicus University in Toruń. The league has the form of a competition. Its aim is to popularize knowledge about ancient culture, to stimulate and deepen interest in antiquity and to shape among young people the awareness of common European tradition. Classes are scheduled for one Saturday per month from October 2018 to May 2019 (except December). The program provides for 7 meetings in the buildings of the Nicolaus Copernicus University. The series is organized thanks to the cooperation of university classical philologists, the Toruń branch of the Polish Philological Society, the Traditio Europae Foundation and the Marshal's Office of the Kuyavian-Pomeranian Voivodeship. More: <https://www.umk.pl/wiadomosci/?id=25662>

Professor Kaliński joins organizing committee of the World Congress on Theory of Machines and Mechanisms

2018-09-27

Professor Krzysztof Kaliński, vice-dean for science at the Faculty of Mechanical Engineering of the Gdańsk University of Technology, became a member of the 15th organizational committee of the 15th IFToMM World Congress, the World Congress of Theory of Machines and Mechanisms to be held in Krakow in 2019. International Congress for Mechanics and Machine Science The World Congress is a prestigious international scientific conference organized every four years in various countries. Next year, after 50 years, it will be held again in Poland. Professor

Eng Krzysztof Kaliński graduated from the Faculty of Mechanical Engineering at the Gdańsk University of Technology in 1980, he received his PhD degree in 1988, he was awarded the postdoctoral degree in 2002 and the title of professor of technical sciences in 2013. From 2015 he is a regular professor. In 2003, he set up a scientific group to research dynamic processes, later renamed the Mechatronics Team, which he continues to run to this day.

Krakow University of Technology to join the Santander Universidades program

2018-09-28

Krakow University of Technology and Santander Bank Polska S.A. will cooperate in the implementation of academic, technological and scientific initiatives, programs and projects. The contract was signed by Prof. Jan Kazior, rector of the Krakow University of Technology and Wojciech Leśniewski, manager of the Santander Universidades program. Santander Universidades program includes more than 60 universities from Poland and over 1,000 higher education institutions from the world largest academic centers. The Krakow University of Technology and Santander Bank will develop academic cooperation between the university and academic centers in the countries where the Santander Universidades program operates. The implementation of selected technological, research, development and educational projects as well as supporting the mobility and entrepreneurship spirit of students, employees, PhD students and graduates of the University are also planned.

Researchers from the Cardinal Stefan Wyszyński University printed a 3D copy of a skeleton from 6.5 thousand years ago

2018-09-28

Researchers from the Institute of Ecology and Bioethics in cooperation with the Center of Information Technology of Humanities and Social Sciences of the Cardinal Stefan Wyszyński University in Warsaw printed a 3D copy of the oldest skeleton found in Poland, the so-called Man from Janowice, which is over 6,500 years old. As the Warsaw University informed, the aim of the undertaking is to preserve a valuable finding for future generations and provide the opportunity to present it at museum exhibitions. The project was created thanks to the cooperation of the State Archaeological Museum, Cardinal Stefan Wyszyński University in Warsaw and the 3D Master company and was financed from the National Science Center funds as part of the «Old material with new methods» program.

Dr Cezary Możejki honored with the medal of Ignacy Mościcki

2018-09-28

Dr Eng Cezary Możejki, a long-time director of the Institute of New Chemical Syntheses, was honored with the medal of Ignacy Mościcki for outstanding achievements in the field of chemical technology, constituting the basis for industrial implementations of innovative products and chemical processes - informs Anna Tyńska from the Research Support Unit at the Institute of New Chemical Syntheses in Puławy. Dr Eng Możejki is a recognized specialist in the fertilizing industry and an authority in the technology of synthetic ammonia production. He has developed 49 innovative technological solutions in the form of licenses and he implemented them in industry in all plants of the Great Chemical Synthesis sector in Poland and abroad. He is a member of the Chemical and Process Engineering Committee of the Polish Academy of Sciences and the Main Council of Science and Higher Education.

New project for innovative companies interested in expansion in Asia

2018-09-28

The call for proposals for the project Polish Technological Bridges (Polskie Mosty Technologiczne) has been launched. The initiative of the Polish Investment and Trade Agency (PAIH) is addressed to innovative enterprises characterized by fast growth dynamics, having potential for internationalization and operating in the area of innovation. The call for proposals for small and medium-sized enterprises (SMEs) interested in China, Japan and Vietnam will last until November 9. The support consists in providing expert advisory services from specific areas and areas, thanks to which the company will receive a jointly developed strategy of expansion into a selected foreign market. The PAIH offers the supply of skills and practical information in the context of the development of operations on foreign markets to the participants. The project also assumes the gathering of knowledge about the expectations of SMEs and building and improving the implementation model of the expansion program.

MOST Wiedzy by Gdansk University of Technology wins IT Future Expo

2018-09-28

The MOST Wiedzy (Bridge of Knowledge) is a project realized at the Gdańsk University of Technology. It received the „Cloud Computing - Cloud solutions” award in the IT Leaders competition 2018, organized as part of the IT Future Expo IT Fair. - MOST of Knowledge (Multidisciplinary Open Knowledge Transfer System) is a symbolic bridge connecting the world of science and business. The public platform collects constantly updated information on the latest scientific achievements, innovative solutions and directions of development of research topics in the academic units of the university. The system has built-in intelligence and mechanisms to understand the search context. It is an intelligent advisor, which automatically learns from search history, can suggest the content to users, recognizes users' groups,

and matches results for them. The project is co-financed from the European Regional Development Fund under the Operational Program Digital Poland for 2014-2020. More: <https://mostwiedzy.pl/pl/>

University of Agriculture in Taiwan to cooperate with the University of Opole

2018-09-28

National Chung Hsing University in Taichung wants to expand cooperation with the University of Opole. Taiwanese University that specializes in agricultural sciences would like to create international research teams for exchanging students and lecturers. The University of Taichung originates from the earlier established agricultural university. The Center of Research for Agriculture and Agricultural and Food Industry, as well as agribusiness specialists of the Faculty of Economics, established at the University of Opole, could certainly benefit from cooperation with the leading agricultural science center in Taiwan. One of the interesting solutions at the Taiwanese University is the research center to assemble research teams, consisting of employees from various university units, to undertake specific topics. This enables cooperation of researchers representing humanities and experimental sciences.

Warsaw Institute of Aviation invites viewers to see F-16 fighter during the 9th Night of Aviation

2018-10-01

The Warsaw Institute of Aviation invites viewers to see over 20 aircrafts, including F-16 fighter, special exhibition zone with military and civilian helicopters and to meet the only Polish astronaut, Mirosław Hermaszewski during the 9th Night of the Institute of Aviation, which will take place on October 12, 2018. Between 17-23 PM guests of the event will be able to see and enter the planes: F-16, CASA C-295M, M-28B / PT Bryza, Antonow An-28TD, AT3, Cessna 172, Aviat Husky, An-2, TS-11 Iskra, the Kukułka plane, the Extra 330LX aerobatic plane and antique aircraft related to the history of Polish

aviation. An additional attraction will be the combat equipment of planes and the F-16 Tiger Demo Car in the air painting, which will be placed right next to the American „Falcon”. The star of the whole evening will be the only Polish astronaut, General Mirosław Hermaszewski. More: www.nocwinstytutcielotnictwa.pl

Start-Up Academy at the University of Białystok

2018-10-01

The University of Białystok invites primary school pupils of the 5th, 6th, 7th and 8th grades from the Podlasie Voivodeship to participate in the first „Start-Up Academy” project. The applications can be send from October 1 to October 12, 2018 - informs Katarzyna Dziedzik, a spokesman of the Białystok University. Classes will be conducted by scientists from two university faculties (economics and management as well as historical and sociological faculty), qualified trainers and entrepreneurs. The summing up of the project will be a gala, during which students will present their ideas of start-ups to business representatives, investors, innovation experts - says Dr. Magdalena Owczarczuk from the Faculty of Economics and Management, project co-ordinator. The project will last two years, in total 144 students are planned to take part in it. The University has received funding for its implementation - over 343,000. PLN within the program of the National Center for Research and Development «University of the Young Explorer».

Results of „Innovator of Mazovia” contest

2018-10-01

The government of the Mazowieckie voivodeship awarded the most creative scientists and companies of the 10th „Mazovia Innovator” competition. In the Innovative Young Scientist category, the first prize (PLN 15 thousand) was awarded to Dr Adam Okniński for the work «Selection of parameters and optimization of sounding rockets and their drive units». The second prize (PLN 12.5 thousand) was awarded to Dr. Wojciech Krauze for the work «Numerical method of phase analysis of biological

micro-objects in the optical tomography with limited angular projection», and the third prize (PLN 10,000) – to Dr. Maciej Trusiak for the work « Processing and analysis of fringe images using Hilbert-Huang transformation for field optical measurement methods ». In the Young Innovative Company category, the first prize (PLN 25,000) was received by QuickerSim Ltd for the development of simulation software for thermal and flow processes and consulting services.

Prof. Małgorzata Mikołajczak receives Silver medal of Meritorious for Culture Gloria Artis

2018-10-01

Professor Małgorzata Mikołajczak from the Department of Theory of Literature and Literary Criticism of the Institute of Polish Philology, Faculty of Humanities of the University of Zielona Góra received the silver medal „ Meritorious for Culture Gloria Artis” from Piotr Gliński, Deputy Prime Minister and Minister of Culture and National Heritage. Professor Mikołajczak joined among 22 outstanding writers, scientists and activists associated with the works of Zbigniew Herbert. The ceremony of awarding her took place at the Royal Castle in Warsaw during the inauguration of the First International Congress of Contemporary Polish Literature and the 15th Herbert Workshops. Professor Mikołajczak is the head of the Department of Theory of Literature and Literary Criticism and the Laboratory of Research on Regional Literature at the Institute of Polish Philology. She is a member of the Committee of Literary Sciences of the Polish Academy of Sciences, author of 5 scientific books, an editor and co-editor of 10 scientific books and 2 anthologies of poetry, as well as the author of approximately 160 articles. Students’ Science Expo held in the Centennial Hall in Wrocław

2018-10-01

Over 80 scientific clubs will be presented on October 3 during the Students’ Science Expo in the Centennial Hall in Wrocław. The program includes presentations, lectures and discussion panels on the development of start-ups and financing activities. This is the first such nationwide fair in Wrocław. They are to be a place of connection for many different environments - students, researchers, enterprises and residents of Wrocław, with special emphasis on junior high school and high school students. The event is also intended to encourage Polish companies to support the substantive and financial activities of student scientific circles and create the opportunity to raise the level of their activities and projects. Students from universities in Kraków, Szczecin, Warsaw, Częstochowa, Łódź, Gdańsk, Białystok, Katowice and Wrocław announced their participation. More: <http://sse.pwr.edu.pl/>

Medical University of Katowice to support secondary school pupils

2018-10-01

The Public Health Department of the Medical University of Silesia in Katowice and the city of Siemianowice Śląskie are implementing the project „Better start into the future”. The subject of the project is the development of key competences necessary in the labor market of the pupils of grades 1-3 in three secondary schools in Siemianowice. The target group is 160 pupils and 10 teachers. Support and didactic classes in biology, chemistry, physics, math and English are planned. Pupils will also be supported with additional classes of self-presentation as well as group and individual career counseling. The project implementers also want to organize training for teachers in the field of working with a student with special educational needs. Pupils will take part in thematic workshops for students participating in the project - in cooperation with the Silesian Medical University in Katowice.

University of Wrocław invites participants to meet Dr Fred Stern

2018-10-01

The guest of the University of Wrocław will be Dr. Fred Stern, a psychologist and psychoanalyst from New York, who will tell about the history of his family that originates from Wrocław. The protagonists of the story will be Dr. Catherine Stern, - his grandmother and Prof. Fritz Stern- his father. Catherine Stern (1894-1973) was the founder of the first kindergarten Montessori in Wrocław. After emigration to the USA, in cooperation with Max Wertheimer, one of the creators of Gestalt psychology, she created a method for calculating and basics of mathematics for children in pre-school and early school age - Stern Math (Structural Arithmetic). Fritz Stern (1926-2016) was an outstanding historian, who for nearly 50 years was associated with Columbia University in New York. He researched and explained the history of Europe in particular Germany. He was a friend of Polish Wrocław, he was awarded the title of honored doctor of the University of Wrocław. Fred Stern will visit Wrocław on October 2 to participate in the receiving the Fritz Stern Professorship by a journalist Anne Applebaum.

Polish-American Scientific Prize awarded

2018-10-02

Professor Peter B. Reich from the University of Minnesota and Prof. Jacek Oleksyn from the Institute of Dendrology of the Polish Academy of Sciences became the laureates of the Polish-American Scientific Award 2018. According to the Foundation for Polish Science, they were honored for their achievements in the field of environmental protection and botany. The aim of the award is to emphasize the importance of Polish-American scientific cooperation and to present the results of mutually complementing activities of each researcher. It is always granted to a pair of scientists, one working in Poland and the other in the USA, for outstanding scientific achievement resulting from joint research. The prize amounts to USD 5,000 for each of the winners. The prize is awarded jointly by the Foundation for Polish

Science and the American Association for the Advancement of Science (AAAS), the world's largest multidisciplinary scientific association.

Arboretum of University of Wrocław wins the Lower Silesian Key of Success

2018-10-02

The Arboretum of the University of Wrocław won the Lower Silesian Key of Success in the category of „the best tourist undertaking or organizer of mass cultural, recreational or sporting events”. The award was presented during the final gala of the XXII competition. The Wojsławice arboretum is one of the few survived former parklands in Lower Silesia. With a collection of over 12,000 plant species and their varieties it belongs to the richest gardens in Poland. The largest and most valuable sets of plants: azaleas, boxwood and daylilies in 2011 received certificates of Polish National Collections. In 2013, the American Hemerocallis Society awarded the daylily collection the prestigious title of «Display Garden AHS». The Lower Silesian Key of Success is the highest regional distinction, granted annually by a specially appointed jury. It enjoys great recognition in economic, cultural and local government societies.

Gdansk University of Technology offers half a million PLN in the third civic budget

2018-10-02

From October 17, employees, PhD students and students of Gdańsk University of Technology will be able to submit their proposals to the third civic budget. The university authorities allocated half a million PLN for this purpose. Projects implemented in previous programs included mobile student workshop, elevator control and defibrillators. - Previous citizen budget programs were successful. I am glad that employees and students are involved in activities that make our campus more beautiful and contribute to the comfort of work and study - says Prof. Jacek Namieśnik, rector of the Gdańsk University of Technology. Projects that gain the most support in

the voting will be entered into the PG budget and will be completed by the end of 2019. As for previous years, the budget amounts to half a million PLN, of which 350,000. PLN is allocated for employee projects, and 150,000 PLN for student projects.

Provincial Office and the University of Katowice to support the integration of foreigners in the region

2018-10-02

Silesian Governor Jarosław Wierczok and Rector of the University of Silesia Prof. Andrzej Kowalczyk signed a partnership agreement for the project „Support for the integration of foreigners in the Silesian voivodeship”. The aim of the project financed by the Asylum, Migration and Integration Fund (FAMI) is to help in the integration of foreigners who are not citizens of the European Union, staying in Poland in order to study, conduct scientific research or development work or do business. The assumptions of the project will be implemented through: organization of courses and conferences, creation of an information and counseling points, extension of the educational offer in schools for foreigners, and establishing a forum for cooperation between institutions and organizations dealing with foreigners' matters in the voivodeship.

Scientists of the University of Life Sciences among 30 Creative Persons of Wrocław

2018-10-02

PhD students Katarzyna Kornicka, Paweł Stępień and Prof. Krzysztof Sośnica from the University of Life Sciences in Wrocław joined the group of „30 Creative Persons of Wrocław” - a project distinguishing remarkable Wrocław residents. „30 Creative Persons of Wrocław” is an urban project that distinguishes important, bold Wrocław residents in the areas of culture and art, business and science. The creators come from Wrocław or have chosen this city for their home. Through their passions, dreams and initiatives Wrocław is more open to people, a friendly, good place to live, study and work. Katarzyna Kornicka is a PhD student at the Laboratory of Electron Microscopy and deals with stem cells. Paweł Stępień is a PhD student at the Institute of Agricultural Engineering, where he deals with research on alternative fuels. Professor Krzysztof Sośnica from the Institute of Geodesy and Geoinformatics deals with satellite geodesy. More: http://www.glos.upwr.edu.pl/aktualnosci/48381/30_kreatywnych_wroclawia.html

European nomination for an Opole cardiologist

2018-10-02

Professor Marek Gierlotka, head of the Cardiology Clinic of the University Clinical Hospital (USK) in Opole, was elected a member of the Board of the Acute Cardiovascular Care Association (ACCA) of the European Cardiac Society. According to USK spokeswoman Małgorzata Lis-Skupińska, this is an honor and a great success for Polish cardiology. Working on the ACCA Board opens the possibility of implementing international projects and including medical and scientific staff at the University of Opole. Professor Gierlotka is also the chairman of the Intensive Cardiac Therapy and Resuscitation Section of the Polish Cardiac Society - the Polish equivalent of ACCA. As the co-chairman of the ACCA Scientific Section, Prof. Gierlotka will be responsible for coordinating activities related to science.

Warsaw Medical University to receive PLN 740 thousand for an international scholarship exchange

2018-10-03

The National Academic Exchange Agency has awarded over PLN 740,000 to the Warsaw Medical University as part of the PROM Program - International scholarship exchange of PhD students and academic staff. The PROM program enables to improve the competences of PhD students and academic staff from Poland and abroad, including students from outside the European Union, through an international scholarship exchange. The National Academic Exchange Agency finances projects of universities and research units offering scholarships to cover the costs related to the participation of PhD students and academic staff in short forms of education (lasting from 5 to 30 days) of international character.

Naval Academy in Gdynia becomes a partner of the FRONTEX agency

2018-10-03

The Naval Academy in Gdynia obtained the status of Partner Academy of the European Border and Coast Guard Agency - FRONTEX. The partnership agreement was concluded by the end of 2020. The signed agreement enables conducting scientific and research works for FRONTEX and training, as well as extending the cooperation network of the Academy with other academic units of the European Union. The agency was created in 2005 originally under the name «European Agency for managing operational cooperation at the external borders of EU Member States» - FRONTEX with its registered office in Warsaw as a response to the growing migratory pressure to Europe. In 2016, in response to the unprecedented migration crisis, on the basis of FRONTEX, the European Border and Coast Guard Agency was established, with the scope of expanded tasks, among others for conducting rescue operations at sea and the possibility of wider cooperation with other maritime institutions of the European Union.

Dr Edyta Widawska wins the Mieczysław Biegańska Equality Prize

2018-10-03

Dr Edyta Widawska from the Faculty of Pedagogy and Psychology at the University of Silesia became a laureate of the Mieczysław Biegańska Equality Prize. The prize is awarded to persons or entities of the social economy performing special activity in the protection of human rights and counteracting discrimination among residents and residents of Częstochowa. Dr Edyta Widawska is the founder of the Polish Institute of Mediation and Social Integration - an association that has been operating since 2009, dealing with human rights, social participation, family assistance and social mediation. The laureate is also a member of the Watchdog Polska Civic Network, initiator and organizer of the «Watch Dogs Human Rights in Film» Film Festival, a specialist in human rights and monitoring. It works with many third sector organizations.

Universities from Bielsko-Biała and Nicosia to cooperate

2018-10-03

The Academy of Technology and Humanities in Bielsko-Biała will cooperate with KES College in Nicosia, Cyprus. The guests from Cyprus agreed the details of cooperation in the field of joint projects and exchange of students as part of apprenticeships and internships. The possibility of organizing a joint summer school was also discussed. The cooperation between KES College in Nicosia and the Faculty of Management and Transport at the Academy of Technology and Humanities will focus on creating a joint educational offer within the scope of International Management / International Business within the studies conducted in English. In addition, the cooperation will also cover joint research and development projects in the field of management sciences, with particular emphasis on logistics as well as social responsibility of universities.

Academy of Physical Education in Warsaw receives a check for nearly PLN 32 million

2018-10-04

- 90 years ago and today the Józef Piłsudski Academy of Physical Education in Warsaw has been a highly specialized university, providing services to people of all ages. Every year, many eminent graduates leave our university with a diploma of a trainer, instructor, pedagogue, physiotherapist, nurse, cosmetologist and occupational therapy specialist - said Prof. Andrzej Mastalerz, rector of the Academy of Physical Education, opening a new academic year. The inaugural lecture titled «Mountaineering – a strange sport» «was delivered by Dr Janusz Onyszkiewicz, former president of the Polish Mountaineering Association and two-time national defense minister. According to the university, during the ceremony, the delegation of the Ministry of Science and Higher Education handed over to the Rector of the University of Physical Education a check with a nominal value of PLN 31,925,000 in treasury bonds, which will increase the university's capital and will allow to finance investment tasks of the Warsaw Academy.

Prime Minister Morawiecki participates in the inauguration of the academic year at the Medical University in Lublin

2018-10-04

Prime Minister Mateusz Morawiecki took part in the inauguration of the academic year at the Medical University in Lublin. The university will educate over 6,900 students. «Financing Polish science must be increased every year to become a locomotive for the country's economic growth,» said the prime minister. He also appreciated the contribution of the University of Lublin in shaping the future elites. «It is here in Lublin, at your wonderful universities, the knowledge, achievements and future of Polish science are forged»- he added. The inauguration

ceremony of the academic year 2018/2019 was accompanied by the opening of a new building of the Medical Simulation Center. Prof. Andrzej Drop, Rector of the Medical University of Lublin stated that «the presence of such an entity in the structure of the university is the current world standard of modern medical education».

NMedycyna2018 + conference held at the Lazarski University in Warsaw

2018-10-04

The Institute of Neuroscience and Cybernetic Medicine of the Medical Faculty of the Lazarski University in Warsaw organizes the conference nMedycyna2018 +. The event will take place on October 26, 2018 and will have the character of a nationwide forum devoted to new technologies in medicine. - NMedicine (new medicine) will soon be the medicine of the past. Such rapid and dynamic changes in technology are a specific challenge and a new responsibility for the doctors and medical institutions. This is an ethical obligation to use everything that is useful - and especially what's new to improve the patient's health and quality of life - says Dr. Piotr Zwoliński, chairman of the Organizing Committee of conference nMedycyna2018 +, head of the Institute of Neuroscience and Cybernetics at the Faculty of Medicine at the University Lazarski. More: <http://www.nmedycyna.pl/>

Medical University of Gdańsk organizing a scientific and training conference Nefrooncology 2018

2018-10-04

The Department of Nephrology, Transplantology and Internal Diseases of the Medical University of Gdańsk invites participants on 5-6 October to the 1st Scientific and Training Conference Nefrooncology 2018. The plan includes lectures of eminent experts and presentations of clinical cases. The organizers intend to address the following issues: acute kidney injury / chronic kidney disease in oncological patients in the context of drug side effects and on-

cological therapies; active oncological treatment in renal replacement therapy patients, including renal transplant patients and renal paraneoplastic syndromes. One of the sessions will also be devoted to tuberous sclerosis. Nephrologists and oncologists combine the needs of patients and the rapid development of both fields of medicine. The Nephrologist often needs the knowledge and support of an oncologist and vice versa. As daily practice shows, there are many areas where decisions should be made jointly.

Opole Center for Research and Innovation in Cardiovascular Diseases to receive additional funds

2018-10-04

The project of establishing the Center for Research and Innovation in Cardiovascular Diseases at the University Clinical Hospital in Opole received an additional PLN 6 million of EU funding. The value of the entire project is 27 million PLN, of which 18 million are external funds. The project of the Center for Research and Innovation in Cardiovascular Diseases USK assumes the creation of a leading center for innovative modern technologies, establishing a common research space for USK units to deal with cardiovascular diseases. Establishing a center means creating an infrastructure to study the health problems of the Opole community, with particular emphasis on the aging population. Thanks to the center, it will be possible to establish a unit equipped with appropriate infrastructure and software, which will enable integration of specialists in various fields, as well as remote cooperation with specialists from Poland and abroad.

Interactive exhibition about sound and acoustics at the Center for Popularization of Science at the Silesian University of Technology

2018-10-04

From October 1 to December 30 pupils and students can visit an interactive exhibition dedicated to the sound and acoustics of „Highway of sound“. The exhibition is addressed to children and it is organized at the Center for Popularization of Science of the Silesian University of Technology. During the tour, students can make a trip to the magical world of acoustics. They will see and touch what they have just read in physics textbooks. Thanks to spectacular experiments with their own eyes and, above all, ears they will be able to check how unusual the phenomenon is sound. Knowledge gained during physics lessons will be consolidated and supported by experiments in which the visitors themselves will be able to take active part. The exhibition can be visited after prior booking at the Science Population Center by phone 32 237 18 54 or by e-mail: rjp6@polsl.pl.

Economics of the future and time in business to be discussed in Wrocław

2018-10-04

The University of Economics in Wrocław and the Lower Silesian Development Fund invite participants to the 365 Timing Economic Congress on October 15-16. The topics of the meeting are the challenges of modern economies, time and business, the global dimension and timing in decision-making processes. 365 Timing Economic Congress is a concept of a holistic approach to time issues in socio-economic processes, taking into account the needs of the individual, business, but also society and the state. Participants of the congress will look for answers to the following questions: What path does our economy follow? How do other economies of our region look after systemic change? Have we been able to properly use the time that passed since the transformation to build a modern knowledge-based economy? Is the passing time one of the most important,

if not the most important factor conditioning the development of business, and thus the economies? More: www.365timing.pl

Conference on the multicultural heritage of the former Polish-Lithuanian Commonwealth held in Rzeszów

2018-10-05

The participants of the International Scientific Congress talked about the state of research on the multicultural heritage of the former Polish-Lithuanian Commonwealth. Over one hundred historians, archivists, art conservators and librarians from Poland, the Czech Republic, Ukraine, Belarus and Lithuania presented the results of their research conducted on the former borderlands of Poland. As Dorota Janiszewska-Jakubiak, director of the National Institute of Polish Cultural Heritage Abroad POLONIKA, said in Radio Rzeszów, it was about the exchange of experiences of people who dealt with documenting and preserving the heritage of their ancestors. The aim of the event was to present the current state of research and research needs regarding the heritage of the former Polish-Lithuanian Commonwealth, in particular outside Poland.

Student of the Jagiellonian University listed in the Forbes „30 before 30“ ranking

2018-10-05

Jan Witowski, a sixth-year student of the medical faculty of the Jagiellonian University Collegium Medicum in Krakow, is listed in this year's „30 before 30“ ranking of Forbes magazine. This prestigious prize was awarded to him for research on the application of new methods of spatial visualization, in particular 3D printing, which he runs at the Faculty of Medicine. «30 before 30» is an award to distinguish those young scientists who achieved success in various industries before the age of 30. 24-year-old Jan Witowski is the youngest in the ranking. He conducts his work in the Second Department of General Surgery under the supervision

of Dr Michał Pędziwiatr. He developed the cheapest method of performing 3D liver models, which can significantly reduce the costs of complicated operations of the body, and thus support the process of the treatment.

First competition under the program „Support for scientific journals“

2018-10-05

The Minister of Science and Higher Education announced the first competition as part of the „Support for scientific magazines“ program. The call for applications will last until October 16, 2018. The aim of the program is to support the publishers of Polish scientific journals not included in the international databases of scientific journals with the largest coverage, but publishing scientific articles on a high scientific level. This support is to be used to improve the level of publishing and editorial practices. The first call was announced in the fields of humanities; engineering and technical sciences; medical sciences and health sciences; agricultural sciences; social sciences; exact and natural sciences and theological sciences. More: http://www.bip.nauka.gov.pl/g2/oryginal/2018_10/4e73bd30b9bda7345f0e66df11054e6b.pdf

Rector of the Białystok University of Technology awarded for his activities for the development of cooperation between science and business

2018-10-05

Rector of the Białystok University of Technology Prof. Lech Dzienis was awarded by the Chamber of Commerce and Industry in Białystok. The Chamber appreciated the activity of Prof. Dzienis for the development of cooperation between science and business. - I am glad that my efforts have been appreciated in order to connect the business of Podlasie with our university. Białystok University of Technology is a strategic partner of the national key cluster of Metal Processing. We are also active in the Eastern Construction Cluster. We work effectively with many individual companies. We also co-create study programs with enterprises. The course of furniture engineering has just begun. Soon, we will sign contracts with companies and internships and specially prepared practical classes for electrotechnic students within dual studies will take place - said Prof. Dzienis.

Nicolaus Copernicus University in Toruń extends cooperation with Tianjin Normal University

2018-10-05

The Nicolaus Copernicus University in Toruń (UMK) will continue to cooperate with Tianjin Normal University (TNU). The agreement was signed by the rector of the Nicolaus Copernicus University, Prof. Andrzej Tretyn during his stay in Tianjin at the celebration of the 60th anniversary of the Chinese university. In Tianjin, the rectors discussed the cooperation of the local Department of History and Art with the Faculty of Historical Sciences of the Nicolaus Copernicus University. Initial arrangements involved the exchange of academic staff and the admission of Chinese history students for semester courses in English. The Chinese side also expressed interest in

East and Central European Studies conducted by the Faculty of Philology at the Nicolaus Copernicus University. During the visit, an annex to the partnership agreement was also signed, enabling 10 students of Tianjin Polish Philology from October 2018 to take up studies in the field of Polish philology as a foreign language, offered by the Faculty of Philology.

High Flyers team from the Silesian University of Technology took the fifth place in UAV Challenge Medical Express competition

2018-10-05

The drone, constructed by the High Flyers team, took the fifth place in the international UAV Challenge Medical Express competition in Australia. The team of the Silesian University of Technology turned out to be the best European team. The competition included designing and building an unmanned aircraft that had to carry out a search and rescue mission. The drone had to provide blood samples of the patient from the remote outland spot to the laboratory in the most autonomous way. It had to cover a distance of 44.5 km, avoiding forbidden areas. UAV Challenge Medical Express is one of the most well-known and prestigious competitions in the field of autonomously controlled unmanned flying systems. It is organized by the University of Queensland and the Australian Institute for Research and Development. The competition is supported by Northrop Grumman, Lockheed Martin and Boeing, and the Department of Defense of Australia.

Talks about the challenges of the senior policy at the University of Silesia in Katowice

2018-10-05

The Faculty of Law and Administration of the University of Silesia in Katowice invites participants to the scientific conference „Challenges for a senior policy in the 21st century”. The purpose of the meeting is to discuss the consequences for the aging popula-

tion. The conference, scheduled for October 11, is addressed to scientists dealing with the labor law and social security, as well as to employees of the Social Insurance Institution, marshal offices, government institutions and organizations of senior policy. Demographic changes require integrated activities covering many spheres of social life, both in the field of law and social insurance, as well as labor market policies and health care. The conference will inaugurate scientific cooperation between the University of Silesia and the Social Insurance Institution implemented under the agreement signed in 2017.

Polish-Japanese talks on cooperation at the Silesian Medical University

2018-10-05

Representatives of Toho University, during their visit to Katowice, talked with the authorities of the Medical University of Silesia on the possibilities of cooperation. The process of establishing cooperation between representatives of the Polish and Japanese scientific and medical communities are continued from this year's Forum of „Polish Medicine of the 21st Century” in Tokyo. Visitors from Japan visited the Center for Didactics and Medical Simulation in Katowice-Ligota, where they reviewed modern simulation equipment in the operating room and intensive care unit, as well as an ambulance and a virtual anatomical table. During a few-hour visit, the hosts and guests exchanged experiences in conducting research and teaching in Poland and Japan and discussed the possibilities of cooperation between universities, the exchange of students, employees and implementation of research and development projects.

Researcher of the Medical University of Gdańsk wins the Tswett-Nernst prize

2018-10-05

Professor Roman Kaliszan from the Department of Biopharmacy and Pharmacokinetics of the Medical University of Gdańsk received the Tswett-Nernst prize. The prize was awarded during the 32nd International Symposium on Chromatography 2018 in Cannes-Mandelieu. The Tswett-Nernst Prize is awarded every two years by the European Society for Separation Science to scientists who have «profoundly influenced the development of separation sciences for the progress of our civilization». The authors of the award are the founder of the chromatography Mikhail Tswett, who conducted his research and results at the University of Warsaw and Walter Nernst, a German Nobel prize winner in chemistry, who was born and raised in Polish Wąbrzeźno. Professor Kaliszan is the eighth winner in the history of the prize and the first Pole to receive this award. The second scientist awarded this year was Prof. Michel Martin from the École Supérieure de Physique et de Chimie Industrielles in Paris.

„Hello Earth!“ The latest film by the Copernicus Science Center

2018-10-08

The trailer of the movie „Hello Earth!“ appeared on the Internet. The film was realized in the fulldome technology, designed specifically for planetariums by the Copernicus Science Center in Warsaw. «Hello, Earth!» won the Golden Dolphin Award at the prestigious Cannes Corporate Media & TV Awards in 2018 in the category of «360 degrees - documentary». The plot of the film focuses on the history of communication on Earth, which began in the caves to reach the cosmos. As the filmmakers write, «striving to get in touch with another human being is one of the earliest manifestations and the strongest human need.» To satisfy it, mankind discovered a magazine, radio, telephone, telegraph and finally the Internet.» See the movie trailer: <https://youtu.be/VPc9BeaTdq0>

Five nominees for the Prof. Kotarbiński Award

2018-10-08

The Jury of the Prof. Tadeusz Kotarbiński Award chose five authors of books that will compete for the title of the best book in the humanities. This is the fourth nationwide competition organized by the University of Lodz. The grand finale will take place on November 25, 2018 at the Łódź Philharmonic Theatre. The works nominated for the prize include: Islamophobia as a technology of power. Study on political anthropology by Monika Bobako, (Society of Authors and Publishers of Scientific Works UNIVERSITAS); Theoretical disputes in jurisprudence. Perspective of holistic pragmatism by Adam Dyrda, (Scientific Publisher SCHOLAR); Case of the Eleven. The imprisonment of the leaders of NSZZ «Solidarność» and KSS «KOR» 1981-1984 by Andrzej Friszke (Znak Horyzont publishing house, in cooperation with the Institute of Political Studies of the Polish Academy of Sciences); A dream of a perfect nation. Between biopolitics and ethnopolitics by Piotr Madajczyk, (NERITON Publishing House and Institute of Political Studies of the Polish Academy of Sciences); Is there something that we call moral character and virtue? by Natasza Szutta, (Academic Scientific Publisher).

Young Scientists' Forum: „Innovation - Interdisciplinarity - Interactivity“

2018-10-08

On November 3 - 15, The Maria Curie Skłodowska University in Lublin and the Marshal's Office of the Lublin Voivodship in cooperation with the Institute of Agrophysics of the Polish Academy of Sciences in Lublin will organize the second Young Scientists Forum „Innovation - Interdisciplinarity - Interactivity“. The meeting is addressed to PhD students and young researchers from Lublin universities (up to 35 years of age) who conduct or would like to conduct interdisciplinary and innovative research and are focused on interactivity. The proposed topics of the workshops during the Forum are Design Thinking,

Public Speaking (self-presentation), Stress in the work of a researcher, Creating the image of a scientist and planning the path of a young scientist, Research project management and Scientists in business on the example of photonics. More: <https://www.umcs.pl/pl/fmn.htm>

How to write a project application to the European Space Agency

2018-10-08

The Polish Space Agency together with the European Space Agency are organizing on October 16 - 19, 2018 in Warsaw, a training and workshops entitled „How to write good projects in response to ESA Invitation to Tender for R & D activities“. The Polish Space Agency training is addressed to representatives of industrial entities and scientific-research units. The course includes a three-day workshop on writing a project application for the European Space Agency and training on ECSS standards in the field of «Space Project Management». Classes will be conducted in the form of lectures and workshops in groups of several people. The lectures will be led by experts from the European Space Agency: Olivier Pin, Fabio Mazzaglia, Gian Lorenzo Casini, Gertrud Talvik and Stephane Combes. More: <https://polsa.gov.pl/wydarzenia/zapowiedzi/18-zapowiedzi/726-szkolenie-i-warsztaty-how-to-write-good-proposals-in-response-to-an-esa-invitation-to-tender-for-rd-activities>

Gowin: The task of our generation is to build a strong and efficient state

2018-10-08

- It is a special inauguration, on the anniversary of the events and the people who hundred years ago ensured an independent existence for our homeland and who sought for hundred years for this existence - said Prof. Jacek Semaniak, rector of the Jan Kochanowski University in Kielce during the inauguration of the academic year 2018/2019. There will be 11,600 students and 300 PhD students at the Kielce University of Technology studying in 49 fields of study. This group includes 560 international students from 22 countries. The Deputy Prime Minister Jarosław Gowin said that «the task for our generation is to build a strong and efficient state, create conditions for the modern economy, build a prosperous society». The condition for achieving these goals is to create great universities that will excellently educate the new generation and conduct research constituting the flywheel of Poland's civilization development - added the Minister of Science.

Professor John Maxwell Coetzee becomes doctor honoris causa of the University of Silesia

2018-10-08

Professor John Maxwell Coetzee will receive the title of doctor honoris causa of the University of Silesia in Katowice. The award ceremony is scheduled for Tuesday, October 23 in the Hall 5 of the Faculty of Law and Administration. The Council of the Faculty of Philology applied for the title on behalf of Professor Coetzee. Professor John Maxwell Coetzee is one of the greatest contemporary writers, winner of the Nobel Prize for literature (2003), two-time winner of the Booker Prize in 1983 and 1999 - and other prestigious literary prizes. He is a laureate of the highest distinction of South Africa, professor of literature, honorary member of the research center of his name at the University of Adelaide and a respected literary scholar and translator.

Gdynia E(x)plory Week in the Pomeranian Science and Technology Park Gdynia

2018-10-08

On October 24-26, the Pomeranian Science and Technology Park Gdynia is launching the seventh biggest celebration of science and innovation for enthusiasts - Gdynia E(x)plory Week. Gdynia E(x)plory Week is the final event of Program E(x)plory, which has been organized by the Foundation for Advanced Technologies for 7 years. In Gdynia, the National Final of the Scientific Competition E (x) will take place, which will select the most talented young scientists. Also the organizers planned the Festival of Science and Technology E(x)plory, where the participants can visit scientific stands and take part in workshops, lectures and scientific discussions. The events are addressed to all enthusiasts of science and new technologies, including school children, teachers and families with children. Another fixed point of the Gdynia E(x)plory is also Congress E(x)plory, whose theme this year will be «Mentoring. Does every student need a master?»

Young Programmer's Club opened in Nysa

2018-10-08

Over 2.5 thousand children and their parents will be able to participate in programming workshops at the Young Programmer's Club in Nysa for the next two years. Young Programmer's Clubs are workshop spots, where children and youngsters can learn programming in rooms equipped with various teaching aids - tablets, sets of educational robots and educational mats for learning programming. Classes will be conducted by qualified staff. - Our goal is to create a space to bring learning about programming to children and parents from medium-sized cities. We want them to know that this is not a job for the elite, but a great way to spend time together - said Marek Zagórski, the Minister of Digital Affairs during the opening of the Club in Nysa. The opening of the Young Programmer's Clubs is an element of the Educational and informational campaigns project for the dissemination of benefits from the use of digital technologies.

International conference on high-temperature reactors

2018-10-09

HTR 2018 international conference dedicated to high-temperature reactors and their applications will be held in Warsaw on October 10, 2018. The conference is organized by the National Center for Nuclear Research. The HTR 2018 conference aims to exchange information on research and development in the field of HTR technologies and to accelerate its wide application in industrial heat production. The subject matter includes the current construction of HTR reactors in China, reactors proposed for Canadian mines, research results from European, Japanese and American programs, British plans for small reactors, as well as the presentation of Poland's plans in this field. The patrons of the conference are the Minister of Energy, the Minister of Science and Higher Education, the Polish Committee of the World Energy Council and the European Nuclear Cogeneration Industrial Initiative.

Eastern eBusiness Forum „EastBiz”

2018-10-09

The Faculty of Management Engineering at the Białystok University of Technology, the Białystok Science and Technology Park and EastCamp Białystok are organizing on 12-13 October 2018 the East eBusiness Forum „EastBiz”. It is the largest event in north-eastern Poland dedicated to running a business online. The EastBiz provides the most interesting case studies, workshops or new knowledge. It is the best opportunity to establish new business contacts and create own networking. Forum participants through the presentations and discussions will try to find the answer to the questions: How to develop effectively online sales on the global market? How to make money by sending SMSs? How to prepare the company for the lead generation campaign? More: <https://east-biz.pl/>

25 scholarships within the program New Technologies for Girls

2018-10-09

The 25 most talented female students of IT and related faculties received a scholarship as part of the New Technologies for Girls program, which was created by Intel Technology Poland in cooperation with the Perspektywy Educational Foundation. The New Technologies for Girls program is a response to a small number of women working in the IT industry. The initiative is to give talented students support in science and in the field of planning and career development in the technology industry. For the next year, scholarship holders will receive financial and substantive support. They will be mentored by the experienced Intel employees. They will also receive a scholarship of PLN 12,000, which will cover part of the expenses they incur during their studies. And in their holidays, they will be invited to an internship in Gdańsk - where the largest research and development center of Intel in Europe is located or to the American headquarters of the company.

KONIK 2018 - Fair of Scientific Clubs and Student Organizations of the Warsaw University of Technology

2018-10-09

On October 24 and 25, 2018, the 15th Scientific Society and Students ,Organizations Fair of the Warsaw University of Technology KONIK 2018 will be held. The event is organized by the Scientific Clubs Council of the Warsaw University of Technology in cooperation with the Students' Association of the Warsaw University of Technology. According to the Warsaw University of Technology, 70 student clubs and organizations will be presented during the two-day fair. There will be aviation enthusiasts, game development specialists, the creator of a mechanical palm prosthesis, a team involved in the design of racing cars, as well as travellers and sailors. Everyone will be able to talk to them, get to know their goals and achievements.

Conference "Church, media, society" at the Catholic University of Lublin

2018-10-09

The Catholic University of Lublin together with the editorial staff of the „ Gość Niedzielny” invite participants to the national scientific conference „Church, Media, Society”. The event will take place on October 11, 2018 at the Lublin Center for Knowledge Transfer. The conference will include three panel discussions: An image of the Church created by the people of the Church; Faith in the media and Media about the Church. The conference takes place on the 20th anniversary of the Lublin edition of the „ Gość Niedzielny” and on the 100th anniversary of the Catholic University of Lublin. The Archbishop Stanisław Budzik, Metropolitan of Lublin, took the honorary patronage over the conference.

Conference on the role of navigation in securing human activity at sea

2018-10-09

The Naval Academy in Gdynia and the Polish Navigation Forum invite participants to the 21st Nav-Sup Scientific and Technical Conference „The Role of Navigation in Securing Human Activities in the Sea”. The conference has been carried out every two-years for 40 years. The organizers encourage to present the achievements, products and solutions in the field of maritime as well as land, sea and air transport economies, as well as navy and other types of armed forces. The conference on 15-16 November is an excellent opportunity to exchange experiences, knowledge and views on navigation, transport and security. It is also a great place to present achievements and technological solutions supporting navigation and transport. The conference topics include terrestrial, marine and air navigation, new systems and technologies, hydrography, geoinformatics and satellite geodesy. More: <http://www.navsup.pl/>

13th Researchers' Night of the Silesian University of Technology

2018-10-09

Center for Popularization of Science together with the city of Gliwice invite participants to the 13th Researchers' Night of the Silesian University of Technology. This year's event will take place on October 13. From 15 to 22 pm, nearly 120 presentations from the Silesian university are planned. The viewers are invited to play the games, to participate in laboratory demonstrations, scientific experiments, to learn about the issues from the world of exact sciences and humanities - including physical, chemical, electronic, mechanical and mining demonstrations, to take a part in unique dance lessons and to learn about German, English, Russian, French and Chinese culture. «Junior and senior» shows, prepared by specialized and qualified academic staff of the Silesian University of Technology will be presented on university campuses in three cities: Gliwice, Zabrze and Katowice. The honorary patronage over the event was taken by the Ministry of Science and Higher Education and the Board of Education in Katowice. More: <http://www.nocnaukowcow.com.pl/>

Higher schools from Bielsko-Biała and Maan in Jordan to cooperate

2018-10-09

The University of Technology and Humanities in Bielsko-Biała will cooperate with the Jordanian Al-Hussein Bin Talal University. The agreement was signed by the rectors of both universities - Prof. Najib Abu Karaki and Prof. Jarosław Janicki. The document, signed during the visit of the Polish delegation to Jordan, assumes in the first stage cooperation and acquisition of students for the Faculty of Mechanical Engineering and Computer Science, especially to the Department of Computer Science and Automation. In subsequent stages, didactic and research cooperation in other areas and joint projects are planned. The delegation of the Bielsko-Biała university was accepted by the Minister of Higher Education and Scientific Research in the Hashemite Kingdom of Jordan, Prof. Adel Tweissi. The Polish delegation submitted all documents necessary for joining the universities authorized to cooperate with Jordanian partners. Information about the meeting was recorded by the Jordanian press.

International Communication in the Network Society conference in Wrocław

2018-10-09

The Department of International Communication at the Institute of International Studies of the University of Wrocław invites students to participate in the International Communication in the Network Society conference, which will take place on October 11-12 in Wrocław. The conference will be attended by scientists who in their research deal with the impact of new technologies on social communication. On the first day, the organizers planned a plenary session with the participation of scientists from Poland, Germany, the United States and Italy. The second day will bring panel sessions devoted to new phenomena in global communication, intercultural communication and human rights, political and network communication as well as international PR and marketing. The debate will be closed by a round

table meeting, during which media and communication researchers from the leading Polish research centres will discuss the media issues. More: www.intcomm.uni.wroc.pl.

Archaeologists from the Jagiellonian University discovered the oldest human remains in Poland

2018-10-10

The journal „Journal of Paleolithic Archeology” will publish the article about the scientists from the Jagiellonian University in Krakow who discovered the oldest human remains in Poland. The discovery is the set of bone of the young Neanderthal's hand, devoured by a gigantic bird. It was found in the Cicha Cave in the Malopolska voivodeship and is around 115,000 years. - We have no doubt that these are Neanderthal remains because they come from a very deep layer of the cave. This layer also contains the typical stone tools used by Neanderthals - said Paweł Valde-Nowak from the Institute of Archeology of the Jagiellonian University. After the examination, it turned out that the bones of the child's hands are porous, with a lot of small holes on the surface. Researchers say that this is the result of the bone passing through the digestive system of a large bird.

Conference „Workshop of cities: Rzeszów”

2018-10-10

Rzeszów University of Technology together with the authorities of Rzeszów and the editors of „Gazeta Wyborcza” are organizing a conference „Workshop of cities: Rzeszów”, which will be held on Thursday, October 11 in the building of the Rzeszów university. The conference will be conducted in the form of panel discussions. The first panel will be devoted to Industry 4.0 and Education 4.0. Participants will discuss the following questions: Will robots replace people in factories? How are companies and cities prepared for it? How should the competences of employees change? Are universities ready for these processes and if and how are the education systems

changing? The second panel will concern mobility. The talks will focus on innovative solutions in public transport introduced in cities in Poland and around the world.

PhD students' conference at the Warsaw University of Life Sciences

2018-10-10

PhD students of the Faculty of Production Engineering of the Warsaw University of Life Sciences and the Institute of Agrophysics of the Polish Academy of Sciences are organizing on October 25, 2018 the PhD Students' Conference entitled „Four Elements - Contemporary Problems in Life Sciences”. The purpose of the event is to exchange knowledge covering the fields of agricultural, forestry and veterinary, natural and technical sciences. The conference is addressed to PhD students who would like to present their scientific interest, the fragment of their own research or to share the insights from their scientific research in a wider group of PhD students. The event will be held under the patronage of Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education.

Scientists from the Warsaw University of Technology receive silver medal of Exhibition of Inventions Geneva 2018 for their invention

2018-10-10

The invention developed by scientists from the Faculty of Chemistry and the Faculty of Materials Science at the Warsaw University of Technology in cooperation with the company POLSPORT S.A. was awarded a silver medal during the International Exhibition of Inventions of Geneva 2018. As Warsaw University of Technology informs, the jury awarded the protectors that use Shear Thickening Fluids technology (STF). The main advantage of such fluids is that they are flexible, and under the influence of rapid pressure or hit they rapidly harden and become very strong. The team of over a dozen people working on the invention was headed by Prof. Eng. Mikołaj Szafran, Prof. Eng. Gabriel Rokicki and Prof. Eng. Marcin Leonowicz.

Grant for PhD scholarships for the University of Humanities and Natural Sciences in Częstochowa

2018-10-10

University of Humanities and Natural Sciences in Częstochowa is one of the beneficiaries of the „PROM” program - an international scholarship exchange of PhD students and academic staff. For its implementation, the university will receive over PLN 680,000 from the National Academic Exchange Agency. Thanks to the subsidy, it will be possible to finance the costs related to the participation of PhD students and academic staff in short forms of education of international character. «PROM» concerns both trips of representatives of the Polish university abroad, as well as visits of PhD students and academic staff from abroad. Scholarships may also be used for stays connected with acquiring materials for didactic or scientific work, acquiring the ability to operate unique research equipment or to increase skills related to the preparation of international grant applications.

Talks about academic cooperation between Poland and Papua New Guinea

2018-10-11

Deputy Minister of Science and Higher Education Sebastian Skuza met Pila Niningi, head of the department responsible for higher education and science in Papua New Guinea. The topics of the talks were academic cooperation and the possibility of student exchange between Poland and Papua New Guinea. Ministers discussed the possibility of participating students from Papua New Guinea in the Ignacy Łukasiewicz scholarships. The National Academic Exchange Agency, which was established to facilitate scientific mobility, can help in this area. Minister Pila Niningi pointed out that Papua New Guinea is very interested in intensifying scientific and research cooperation as well as academic exchange with Poland. The minister also confirmed the willingness to invite Polish medical students to hospital practices in the field of tropical diseases.

Researcher Prof. Gryko published in Angewandte Chemie

2018-10-11

Prof. Daniel Gryko from the Institute of Organic Chemistry of the Polish Academy of Sciences, laureate of the Foundation for Polish Science 2017, published the results of his research in the Angewandte Chemie Journal. The research was conducted in cooperation with the team of Prof. Valentine Vullev (University of California, Riverside). Scientists have demonstrated for the first time that the molecule of an organic dye can completely stop the transfer of an electron in one direction using molecular electrical dipoles (so-called electrets). At the same time, moving the electron in the opposite direction is very fast. The discovery of professors Gryko and Vullev can potentially accelerate research on the conversion of light into electricity in modern technologies. More: <https://onlinelibrary.wiley.com/doi/10.1002/anie.201802637>

Award for the Laboratory of Railway Movement of the Krakow University of Technology

2018-10-11

The Office of Rail Transport settled the contest „Safety culture in rail transport”. One of the awards was received by the Krakow University of Technology for launching the Laboratory of Railway Traffic Engineering. The Krakow laboratory is equipped with railway traffic simulators and enables practical learning of traffic management principles and actions in atypical situations. It was established at the Institute of Road, Railway and Transport Engineering at the Faculty of Civil Engineering at the Krakow University. It is equipped with 12 computer workstations, which reflect the work of the traffic dispatchers. The studio is used for all students of transport, including rail transport specialties. Ultimately, classes are planned for students of Construction with specialty railways.

The Treatment Center for Drug resistant Epilepsy established in Szczecin

2018-10-11

The Department of Developmental Neurology at the University Clinical Center in Gdańsk and the Clinical Department of Pediatric Neurosurgery with the Department of Neurosurgery of the Adults of the „Zdroje” Hospital in Szczecin established the first suprarregional Center for the Treatment of Drug Resistant Epilepsy. Two entities renowned and recognizable in Poland have created a centre that gives patients in Poland the chance to diagnose and treat surgical treatment-resistant epilepsy under the supervision of experienced specialists in conditions that meet the highest standards of care. Epilepsy is treated mainly pharmacologically, using drugs that in most cases bring the expected results. However, there is a group of patients who are resistant to pharmacological agents, which is particularly dangerous in children. Then it is advisable to quickly implement the surgical treatment, minimizing the effects of epileptic seizures that are destructive to the young body.

University of Gdańsk to cooperate with China Ocean University in Qingdao

2018-10-11

The University of Gdańsk and China Ocean University in Qingdao have signed a cooperation agreement on the exchange of employees, students and PhD students and joint scientific research. The cooperation agreement, which will first comprise the Faculty of Oceanography and Geography, Faculty of Economics and the Faculty of Law and Administration, was signed by the rectors of both universities, Prof. Jerzy Gwizdała and Prof. Yu Zhigang during a delegation visit from China in Gdansk. One of the points of the visit was a meeting at the University Oceanograf research ship. The ship's crew presented the unit's research potential and its equipment. The Chinese delegation was very impressed with the modern solutions used in this floating research laboratory.

Lecture of father Leon Knabit at the University of Silesia

2018-10-11

On Saturday - October 20, Father Leon Knabit OSB - Benedictine of the Tyniec Abbey, author of articles and books, laureate of the Blog of the Year 2011 Award in the category of professional blogs will be the guest of the Faculty of Theology of the University of Silesia. In the faculty hall at ul. Jordana 18 in Katowice Father Leon Knabit will give two lectures: at 11:00 - «Knowledge and wisdom seek a covenant with holiness. Professor Saint John Cantius speaks today» and at 13:30 - «Faith is not moving away from the world.» Both lectures are free. Father Leon Knabit OSB was one of the editors of the «Cenobium» journal. He conducted television programs (including «Father Leon invites», «Salomon» and «Credo»), he was awarded the Knight's Cross of the Order of Polonia Restituta. He got also a Medal of Smile.

Tianjin delegation Polytechnic University visited the Jan Kochanowski University in Kielce

2018-10-12

The Chinese delegation, headed by Hong Zhao, vice president of Tianjin Polytechnic University, talked with the authorities of the Jan Kochanowski University in Kielce about widening the cooperation between universities. The Jan Kochanowski University has been cooperating with Tianjin Polytechnic University for 4 years. Universities conduct a student exchange, which mainly includes science and arts. This year, 27 students from Tianjin came to Kielce. They study law, environmental protection, physics, design, artistic education and fine arts. As the Kielce University informs in the near future, the cooperation is to be extended by systematic, several-week courses and study visits for students and university staff from Poland and China as well as by joint artistic events.

Agreement on cooperation between the State Higher Vocational School in Chełm and LOT Crew

2018-10-12

The State Higher Vocational School in Chełm has signed a cooperation agreement with LOT Crew Ltd a company specialized in pilot training and recruitment for LOT Polish Airlines. - There is a huge market demand for pilots whom we train. LOT Polish Airlines has asked us to create a special student group to support with additional training process dedicated to work at LOT Polish Airlines - said Prof. Eng. Arkadiusz Tofil, rector of the State Higher Vocational School in Chełm. Thanks to the agreement, students of the Aeronautical Engineering specialization and the Pilotage of Airplane specialization will be able to take their apprenticeships in Polish Airlines LOT. In this academic year, the group under the LOT Crew will have 15 students.

Workshops in the field of copyright law at the University of Economics in Poznan

2018-10-12

The Association for the Collective Management of Copyright of Authors of Scientific and Technical Works of KOPIPOL invites participants to workshops on copyright for researchers. Workshops, under the auspices of the Minister of Science and Higher Education, will take place on October 16 at the University of Economics in Poznan. The Association's experts will talk about organizations for the collective management of copyright and reprographic fees as compensation for the use of a scientific work by the third parties for personal use, and authorizations of the author of the work, including the work of the author, taking into account the copyright aspects of the law on higher education. The other topics of the workshop are: A piece as a manifestation of the creative activity of a researcher, including the idea of protection of the idea and Transfer of proprietary copyrights.

Registration for the Laboratories' Night of the Medical University of Wrocław started

2018-10-12

Students can sign up for the Laboratories' Night of the Medical University of Wrocław. – On October 20, we will learn the unusual use of plants, see cell cultures, look at the pharmacy recipe, carry out diagnostic tests and isolate our own DNA - announced the organizers. Not available on a daily basis, the university's laboratories will be opened in two locations - on the campus of the clinics at Street Chałubińskiego and at the Faculty of Pharmacy with the Department of Medical Analytics. Participants will have the opportunity to hear the lecture of Dr Bożena Karolewicz, head of the Chair and Department of Drug Form Technology, on the subject of modern forms of medicine. In addition, a series of workshops will be provided concerning methods of determining paternity, bacteria and microworld around, diagnostic tests and natural medicines. Viewers will also be able to visit the University Medical Simulation Center.

Silesian University of Technology invites participants to the Silesian Science Festival in Katowice

2018-10-12

Until October 31, students can submit their applications for the 3rd Silesian Science Festival in Katowice, which will take place in January 2019. The event, scheduled for January 2019, is co-organized by the Silesian University of Technology. The festival is an opportunity to popularize knowledge in various forms: lectures, exhibition stands, exhibitions, workshops, experiments. Applications can be submitted electronically on the festival website. The organizers encourage to submit lectures and interactive demonstrations. As in previous years, the program of the 3rd Silesian Science Festival will be divided into six areas of knowledge: socio-human sciences, art, technical sciences, exact sciences, medicine and health sciences, and natural sciences. In addi-

tion, the following zones will be available: space zone, sports zone, e-sport zone, children zone, as well as exhibition and lecture spaces. Last year, the event was visited by over 30 thousand people. More: <http://www.slaskifestiwalnauki.pl/>

Researchers from Collegium Civitas to participate in the symposium of London School of Economics

2018-10-15

Researchers from the Warsaw Collegium Civitas on October 26-27, 2018 will take part in the symposium „We, the people: Political, media and popular discourses of ‚us‘ and them”, which will take place in the Department of Media and Communications of the London School of Economics. Prof. Stanisław Mocek, rector of the Collegium Civitas will present there the topic: «Opposed Poles: Political and Social Discourses on the Nation, Democracy and Europe», and Dr. Marek Troszyński will talk about «Liberal and illiberal Polish encounters with refugees». The two-day London Symposium will explore communication strategies and populist discourses in the society. The seminar will be devoted to the politics of identity, political, media and social narratives concerning «us» and «them» in Europe and beyond.

Contest for children „Science for You”

2018-10-15

Ten teams of pupils competed in the finals of the „Science for You” contest. Nearly 1,000 participants from all over Poland took part in it. The children, under the supervision of teachers, conducted their own research, answered the scientific questions and verified the hypotheses. Five teams will receive prizes from the Deputy Prime Minister and Minister of Science and Higher Education Jarosław Gowin on a special gala on October 23. Within the competition prototypes of a puddler, an electronic ear or an air tunnel were created. The puddler is a scientific tool prepared by pupils of the Social Primary School No. 2 in Warsaw, whose aim is to visualize the move of waves in the water. The pupils of the SKRZYDŁA

Primary School in Lublin together with the teachers developed a prototype of an electronic ear. Ranking list of projects: <https://www.gov.pl/documents/1068557/1069061/lista-rankingowa-2-etap.pdf>

Professor Brożek becomes the laureate of the National Center for Science Award

2018-10-15

Professor Bartosz Brożek from the Faculty of Law and Administration of the Jagiellonian University in Krakow has been awarded this year's National Science Center Award (NCN). He received this prestigious prize for the innovative concept of normativity of law and other normative systems. Established in 2013, the award is given to researchers up to 40 years of age. The idea of the NCN Award is to support the most outstanding scientists conducting research in the field of basic research in Polish scientific units. The jury appreciated the innovative concept of normativity of law and other normative systems, based on philosophical argumentation and the use of findings of cognitive and evolutionary sciences. Scientific interests of Prof. Brożek include the theory and philosophy of law, as well as the philosophy of science, language and mind.

Attractions of the Laboratories Night at the University of Wrocław

2018-10-15

The University of Wrocław invites participants to the Night of Laboratories 2018, which will be held on October 20. Its employees prepared an evening full of scientific attractions for all visitors of the university. In the Documents Research Laboratory of the Department of Forensics at the Faculty of Law, Administration and Economics, students will be able to find out how to check the authenticity of documents, how to recognize counterfeit money, and learn how to verify identity cards, passports, driving licenses and registration documents. The Faculty of Biotechnology invites viewers to three workshops within program «Discover the secrets of genes.» The guests will get to know the modified organisms, including their advantages and disadvantages and how they are created. There will also be attractions at the Faculty of Earth Sciences and Environmental Sciences, where scientists will explain what a geologist's job is about. It will also be possible to independently examine the surface of the rocks with the binocular loupes and the polarizing microscope.

Talks on the challenges and threats of national and international security

2018-10-15

The Department of International Relations of the Institute of Political Sciences and Journalism of the University of Silesia in Katowice and the Police Headquarters invite participants to the second national scientific conference „Challenges and threats to national and international security in the 21st century”. The aim of the conference is to try to identify the most important challenges and threats to internal and international security in the 21st century and formulate recommendations for policy-makers in Poland's security policy. The results of scientific research will be confronted with the experiences of people representing institutions whose main task is to ensure state security. The organizers announced the topics of human traffic and drug trade and the

so-called designer drugs as a social problem and a security threat. Other problems of European and global internal security in the second decade of the 21st century will also be analysed.

Students of Poznań University of Technology win in the EDP University Challenge 2018 competition

2018-10-15

Poznań University of Technology students took the second and third place in the Polish EDP University Challenge 2018 competition organized by the global leader in the renewable energy market, EDP Renewables. The second place was taken by «Electric Vehicles Energy Storage Management System» by Mikołaj Walkowiak and Józef Borys. The third place was taken by Edyta Bosacka and Damian Sikora, authors of the project «Hill heating system to improve the functioning of bee hive» The task of the EDP University Challenge participants was to prepare the project in one of four areas: Innovation - projects increasing the use of renewable energy sources; Efficiency - researching technological innovations that enable increasing the efficiency of production processes of renewable energy sources; Marketing and strategy - increasing awareness of renewable energy and / or EDP Renewables activity promotion in Poland and Sustainable development - environmental protection and local development.

25 years of cooperation of the Krakow University of Technology with the University of Tennessee

2018-10-16

In Krakow, on October 15-16, 2014, a conference took place that summarized 25 years of cooperation between the Krakow University of Technology and the College of Architecture and Design at the University of Tennessee in Knoxville - one of the best public schools in the United States. The Tennessee program is the longest running exchange program offered to architecture students in the United States and Poland. To date, over 600 students have used

the possibility of student exchange as part of the Tennessee Program. During the conference, Prof. Eng. Jan Kazior, rector of the Krakow University of Technology, handed jubilee medals to deans of partner schools. Professor Scott Poole, dean of the College of Architecture and Design, University of Tennessee and Prof. Jason Young, director of the Architecture Program, University of Tennessee presented their experiences related to their scientific and didactic work.

Lectures by Prof. Yoshida at the Academy of Mining and Metallurgy in Krakow

2018-10-16

By October 18, 2018, in the Energy Center of the AGH University of Science and Technology in Krakow, Professor Kazuya Yoshida from Tohoku University in Japan will hold a series of lectures. Professor Kazuya Yoshida is an outstanding global specialist in the field of construction of satellites and space robots. He also acts as CTO (Chief Technology Officer) in the company ispace realizing the project of the lander, which is to be soon delivered to the Moon. According to the organizer of the event, which is the Faculty of Mechanical Engineering and Robotics AGH, the Professor Kazuya Yoshida's lectures will be devoted to the following topics: orbital robots, planetary works, microsatellites and future issues.

Latest book of the University of Lodz Publishing House deals with the functioning of e-business

2018-10-16

The book o "Functioning of e-business" by Anna Misztal, a researcher from the University of Lodz, was published by the University of Lodz Publishing House in the series Akademia Zarządzania i Finansów. The publication is a kind of guide to the e-business. The author deals with the current problems, models and strategies used by organizations conducting on-line business. The researcher from the University of Lodz discusses individual segments of e-business taking into account their advantages, disadvantages and key determinants of functioning and development of individual branches of the economy on the example of well-known and successful companies operating in a virtual environment, such as LinkedIn, YouTube, Eobuwie or Filmweb. The latest position of the publishing house of the Łódź university is addressed primarily to students of economic studies and management, as well as to all those interested in the subject of virtual business.

Academy of Physical Education in Wrocław implements the international project „Kid Move”

2018-10-16

The Academy of Physical Education in Wrocław is implementing the international project „Kid Move” devoted to physical activity of children and youth. The project is financed by the European Union through Education, Audiovisual and Culture Executive Agency. The project is devoted to the physical activity of children and adolescents, the factors determining physical activity and its role in maintaining the efficiency of cognitive processes. The project leader is the Metropolia University of Applied Sciences from Helsinki (Finland) and the partners - in addition to the Wrocław university - are Windesheim University of Applied Sciences at Zwolle (Netherlands), Masaryk University at Brno (Czech Republic) and sports clubs: AZS-AWF Wrocław, Special Heroes -

Arnhem (Holland), Bulldogs Brno (Czech Republic), Icehearts of Helsinki (Finland) and Sportunion-Steiermark - Graz (Austria).

Success of employees of the Department of Molecular Microbiology at the University of Wrocław

2018-10-16

Employees of the Department of Molecular Microbiology of the Faculty of Biotechnology of the University of Wrocław received Prof. Kazimierz Bassalik prize for the best Polish microbiological work. The competition is organized by the Molecular Biology Committee of the Cells of the Polish Academy of Sciences. The main prize was received by Dr Joanna Hołowka, Dr Damian Trojanowski, Dr Katarzyna Ginda, Dr Bartosz Wojtaś, Bartłomiej Gielniewski, Prof. Dagmara Jakimowicz and Prof. Jolanta Zakrzewska-Czerwińska for the work «HupB is a bacterial nucleoid-associated protein with an indispensable eukaryotic-like tail». One of two equally important awards was received by Dr. Agnieszka Strzałka, Dr. Marcin Szafran, Prof. Terence Strick and Prof. Dagmara Jakimowicz, for the work: «C-terminal lysine repeats in Streptomyces topoisomerase I stabilize the enzyme-DNA complex and confer high enzyme processivity».

Second season of the Interdisciplinary Scientific Seminar of the Wrocław University of Technology starting

2018-10-16

Wrocław University of Technology begins the second series of meetings as part of the university Interdisciplinary Scientific Seminar. On Tuesday, October 23, the lecture „Historical coexistence of Poles and Jews and the challenge of reconciliation” will be given by Zeev Baran - architect and honorary consul of the Republic of Poland in Jerusalem. Zeev Baran was born in Vilnius in 1935. He survived the Holocaust thanks to the help of Helena and Bronisław

Krzyżanowski. After the war he emigrated with his mother and brother to France, and in 1948 the family reached Israel. He graduated in architecture and urban planning at the Technological University in Haifa. He specializes in selective projects and in projects for developing countries and for minorities in Israel. For many years she has been involved in the promotion of Poland as well as dialogue and cooperation between our nations. The Interdisciplinary Scientific Seminar is a series of lectures for students, PhD students, academics and anyone interested in deepening knowledge of exact sciences.

University of Life Sciences in Poznań promoted in Asia

2018-10-16

The project Promotion of the educational offer of the University of Life Sciences in Poznań with the use of digital marketing instruments on selected Asian markets (# PULS4YOU) will be co-financed in the competition of the National Academic Exchange Agency. The aim of the project, addressed to recipients from Uzbekistan, China, India and Kazakhstan, is to increase the activity of the university in the promotion of areas of its activity using modern instruments. This goal is to be achieved through building awareness of the university's brand and increasing its recognition in the target markets, creating the desired image, promoting the offer and developing a digital campaign and video marketing. The competition could finance integrated promotion and information campaigns, online activities in social media, website positioning, cooperation with bloggers, youtubers, adwords campaigns, e-learning, and promotional films and PR activities.

Theophrastus Prize awarded for the best popular psychological book

2018-10-17

The „psychological lexicon of psychology“ by Jolanta Pisarek and Dr. Paweł Fortuna from the Department of Experimental Psychology at the Catholic University of Lublin received this year's Theophrastus Award for the best popular science psychological book. As reported by the Charaktery publishing house, which has been awarding the prize for 10 years, it is an expression of appreciation for Polish psychologists for their research, knowledge and willingness to share it. - We know how difficult it is to describe the complex mechanisms that guide the psyche and behavior of people. One of the first scientists to do this was the patron of the Prize, Theophrastus of Eresos - Greek natural philosopher and author of Character. The honorary patron of the Theophrastus Prize is Prof. Jerzy Duszyński, president of the Polish Academy of Sciences.

Visit of Deputy Prime Minister Gowin at the State Higher Vocational School in Chełm

2018-10-17

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin visited the State Higher Vocational School in Chełm. He visited the Center for Engineering Studies at the University of Chełm and met with the participants of the Polish-American Congress, which took place in Lublin from October 11 to October 14. Deputy Prime Minister Gowin also held talks with a senator and congressmen from the state of Wisconsin. The talks concerned the strengthening of Polish-American cooperation in the area of economy and science. During the visit to the Engineering Studies Center of the State Higher Vocational School in Chełm, guests could see innovatively equipped laboratories and hold talks on scientific cooperation.

Agrotourism resort with glass houses designed by a student of the Rzeszów University of Technology

2018-10-17

Student of the fifth year of architecture at the Rzeszów University of Technology Jakub Lazarowicz created a project of a modern agrotourism center in the Bieszczady Mountains, which is built up with light, glass summer houses. The diploma project was created under the supervision of Dr. Rafał Mazur from the Faculty of Civil Engineering, Architecture and Architecture at the Rzeszów University of Technology. The assumption of the project was light, glass, towering houses with a modern form, integrated into the Bieszczady nature. They are to refer to the lightness of sails in the Soliński Lake. One of the main inspirations was the climate of this area of the Bieszczady and the Solina Lake. The agrotourism center in this form is an attempt to introduce new quality in this unique area with a huge potential - says Jakub Lazarowicz, the author of the project.

Exhibition „Polish aviation achievements in the 100th anniversary of Independence Recovery“ held at the Warsaw University of Technology

2018-10-17

The Warsaw University of Technology on 22-23 October 2018 invites participants to the exhibition Polish aviation achievements in the 100th anniversary of Independence Recovery „Per aspera ad astra“. In the main building of the Warsaw University of Technology the viewers will be able to see the legendary Polish fighter - PZL P.11c and the world's first Polish moto-glider with electric drive AOS-71. The exhibition will be accompanied by a conference at which lectures will be given by representatives of the Air Force Institute of Technology, Institute of Aviation, Military University of Technology, General Electric, Airbus Defense and Space, Thales PL, Thales Alenia Space and student science clubs operating at the Warsaw University of Technology.

Seminar on the International Day of Stuttering Consciousness

2018-10-17

The Scientific Information Center and the Academic Library of the University of Silesia invite participants to the seminar on the occasion of the International Stuttering Awareness Day (ISAD 2018) on October 20. The theme of this year's event is „Speak your mind - Say what you mean!“. The program includes lectures of specialists in communication and speech fluency disorders, and a panel discussion with the participation of experts who deal with professional support (as part of speech therapy, psychological therapy or self-help groups), and at the same time with the stutterers themselves. The seminar is addressed to people who stutter and their families, teachers, parents, speech therapists and students. Participation is free, but due to the fact that all participants of the meeting are provided with personalized certificates, prior notification is required via e-mail (kasia.romaniuk@interia.pl).

German Evening of Research and Development in the Poznań Science and Technology Park

2018-10-17

The Poznań Science and Technology Park invites participants to the German Research and Development Evening on October 24th. The purpose of the meeting is to establish and deepen contacts between scientists, researchers, representatives of the organization and potential business partners from both countries. - We invite those who deal with projects related to environmental protection and new technologies at the meeting point of science and business or are interested in international cooperation in the field of research and development projects in the field of environmental protection and sustainable development. The «German evening of research and development» will consist of a substantive and networking part. During the first part, a discussion will be held about the challenges related to innovations in environmental protection, commercialization of scientific research and international cooperation. The second part will include time for networking, meeting new people in the industry and establishing valuable contacts. More: <http://ppnt.poznan.pl/biznes-i-badania-w-niemczech-poznaj-partnerow/>

Researchers from abroad win the Falling Walls Lab Wroclaw

2018-10-17

Brazilian scientist Taiana Mui from the Leibniz Institute for Plasma Science and Technology won the regional contest Falling Walls Lab Wroclaw and will go to the final conference in Berlin. In the victorious speech „Breaking the wall of plasma in agriculture” she told what plasma is and how it can be used in the seed treatment process. Second place went to Dr Sabine Wollmann from University of Bristol, conducting research on the possibility of increasing the limits of logic gates used in quantum computers. The third award was given to Masoud Rostami from Iran, a doctor at the University of Cologne, working on the creation of a model for studying the structure

of the Earth and other planets. The idea of Falling Walls Lab is to disseminate information about current research, to establish scientific and business cooperation and to broaden research horizons. The Berlin final will be held under the slogan «Great minds, 3 minutes, 1 day». More: <https://www.falling-walls.com/lab/about>

4th University Business Debate held at the University of Economics in Krakow

2018-10-18

At the University of Economics in Krakow, the 4th University Business Debate was held, during which the participants discussed subject of entrepreneurship and academic innovation as well as the model of cooperation between economic universities and employers. - Further development of the economy is possible only through knowledge-based development, which is an element of employees' qualifications and which brings technological and organizational progress through innovation - said Deputy Minister of Science and Higher Education Piotr Dardziński during the debate. The Ministry of Science and Higher Education undertakes legislative and program initiatives, aimed at bringing the world of science and business closer together - he added. During the discussion, the Minister emphasized that the implemented by the government Strategy for Responsible Development as the basis for the competitiveness of the Polish economy is indicated by the development of innovative companies implementing permanent mechanisms of cooperation with the world of science.

University of Life Sciences in Poznan to cooperate with the University of Lvov

2018-10-18

The Faculty of Veterinary Medicine and Animal Sciences at the University of Life Sciences in Poznan has established cooperation with the Lvov National University of Veterinary Medicine and Biotechnology. The cooperation agreement was signed by the dean of the Faculty of Veterinary Medicine and

Animal Sciences, Prof. Piotr Ślószarz and rector of the Lvov university, Prof. Volodymyr Stybel. The first stage of the joint activities will be the exchange of students from mainly veterinary and zootechnical courses as part of internships. The agreement also assumes joint scientific research, organization of bilateral seminars and cooperation of students within scientific circles and conferences. The signing of the contract is the result of long-term contacts between the director of the University Center of Veterinary Medicine at the Poznań University Dr. Maciej Gogulski with the Lvov National University.

Scholar from the University of Silesia becomes the first general spokesman of the EU Court of Justice

2018-10-18

Dr Maciej Szpunar from the Faculty of Law and Administration of the Silesian University was elected the new first general spokesman of the Court of Justice of the European Union in Luxembourg. The decision on the nomination was made after receiving the opinion of Committee of all General Advocates, to which Maciej Szpunar belongs since October 2013. He will perform its function for three years. The spokesperson will deal with organization of the work of General Advocates, who support the work of the judges of the Tribunal, presenting in an impartial and independent manner, legal opinions on cases considered by the Court of Justice of the European Union.

University of Lodz invites participants to the conference „Aging with dignity“

2018-10-19

The Faculty of Philology and the Faculty of Economics and Sociology of the University of Lodz in cooperation with the Activus Foundation are organizing a scientific conference on October 25 entitled „Aging with dignity“. As part of the event, a dozen presentations were planned within two modules: «When does old age begin?» And «Senior project in danger - presentation of the effects of the project and involvement of the University of Lodz in the senior issues in the region of Lodz». Conference participants will try to find out how to deal with issues related to seniors in the world of challenges that society faces today and in the near future, in connection with demographic forecasts on social structure i.e. a dynamic increase in the share of older people in society.

Olsztyn scientist vice-president of the Polish Historical Society

2018-10-19

Dr Andrzej Korytko from the Institute of History and International Relations of the University of Warmia and Mazury in Olsztyn became the vice-president of the Polish Historical Society. He will be responsible for historical contests and popularization of history. The Polish Historical Society is one of the largest and oldest associations in Poland. It was established in 1886 in Lvov. It has over 40 active branch offices and has about 4,000 members. Dr Andrzej Korytko is scientifically involved in modern history, examining the seventeenth-century gentry elite of the Polish-Lithuanian Commonwealth and the old Polish parliamentarianism.

Recruitment of students - volunteers to the Student Rescue Service starts in Białystok

2018-10-19

The University of Białystok has started recruitment for the Student Rescue Service. Students - volunteers who would like to help the pupils of socio-therapeutic day care centers with their homework, can apply until October 26. - In this semester, we would like to support 12 socio-therapeutic day care centers in Białystok, Supraśl, Sokółka and Kuźnica Białostocka, as well as a family orphanages. Work for children is an opportunity to gain invaluable experiences, strengthen interpersonal competences in contact with other people. The Student Rescue Service started in spring 2013. So far, several hundred students have been involved in the volunteering, mainly from the University of Białystok.

Krakov University of Technology to co-organize international conference in Beirut

2018-10-19

On October 19, 2018, the international conference „Post War Reconstruction: The Lessons of Europe“ will be held in the capital of Lebanon, organized by the Lebanese-American University in Beirut with the Krakow University of Technology. The Beirut conference is to be a forum for the presentation of scientific papers that deal with the problems of rebuilding the country after the destruction caused by armed conflicts. Participants of the event will present and summarize various models of activities in this area that were undertaken after the end of World War II in Poland, Germany, France, Italy and Great Britain. The conference will be accompanied by an exhibition addressing the impact of architecture on the creation of Polish national identity in the interwar period.

Medical University of Silesia to hold Conference „Prevention in medicine“

2018-10-19

The Silesian Medical University in Katowice invites participants to the conference „Prevention in Medicine“ on October 26th. The 15th event is devoted to the prevention of diseases, early diagnostics of diseases and reducing the risk of their complications. The program of the conference provides for the presentation of the latest guidelines to improve the effectiveness of preventive and curative activities, the latest results of multicentre clinical trials and the presentations of students and PhD students of the Students' Society Scientific Society. The topics of the conference will include: prevention of cardiovascular disease, neurology, pulmonology, nephrology, geriatrics, diabetology, dermatology and infectious diseases and psychiatry. More: <http://www.profilaktykawmedycynie-2018.sum.edu.pl/>

Members of the Polish-Chinese academic consortium met at the Silesian University of Technology

2018-10-19

Representatives of Polish and Chinese universities met at the Silesian University of Technology as part of the Sino-Polish University Consortium, the first Polish-Chinese academic consortium that was established last year as part of the One Belt One Road initiative. The meeting was attended by representatives of several dozen Chinese and Polish universities, including Beijing University of Technology, North China University of Technology, Tianjin University of Technology, AGH University of Science and Technology, and Silesian University of Technology, Warsaw and Opole University of Technology. The participants discussed on the role of the university in strengthening Polish-Chinese relations. Sino-Polish University Consortium was established in March 2017. It is directed by the rectors of Beijing University of Technology, Chongqing Jiaotong University and Opole University of Technology. The consortium currently comprises 27 universities in Poland and China.

Wrocław University of Technology to launch Laboratories Night

2018-10-19

Researchers and students of the civil and water engineering and the geoenvironment, mining and geology faculties of the Wrocław University of Technology invite participants on Saturday, October 20 to the Laboratories Night. During this year's event students will be able to visit the Museum of Minerals and take part in chemical workshops. The history of bridge-making in the world and the specificity of Polish bridges will be described by Prof. Jan Biliszczuk - designer of the Rędzński bridge. Dr Bogdan Przybyła will take participants under the surface of Wrocław's streets and reveal what the Mobile Laboratory of Underground Infrastructure is dealing with. There will also be an opportunity to learn how the condition of concrete on construction sites and in historical facilities is examined in a non-destructive way using a modern scanner. All lectures and classes will be held on the Grobla Campus. <http://pwr.edu.pl/uczelnia/aktualnosci/przed-nami/noc-laboratoriow-w-geocentrum-565.html>

Researchers from the Polish Academy of Sciences conducted a statistical analysis of the bitcoin market

2018-10-22

The Institute of Nuclear Physics of the Polish Academy of Sciences (IFJ PAN) in Krakow carried out a detailed statistical analysis of the bitcoin (BTC) market. Its results have been published in the renowned scientific journal "Chaos: An Interdisciplinary Journal of Nonlinear Science". The analysis puts Bitcoin, and potentially other cryptocurrencies, in a surprisingly positive light. The analysis included changes in bitcoin prices in the period from 2012 to April 2018, recorded in one-minute sequences and variability of return rates. The most important statistical parameters of the bitcoin market clearly indicate that for many months it has met all the important criteria of financial maturity. It seems that in the case of other cryptocurrencies, a similar transformation

may be expected - says Prof. Stanisław Drożdż from the IFJ PAN and Krakow University of Technology. More: <https://informacje.pan.pl/index.php/informacje/14-nauki-scisle-i-nauki-o-ziemi/2374-bitcoin-lepszy-od-dolara-analiza-statystyczne-instytutu-fizyki-jadrowej-pan>

Professor Timothy Snyder becomes honorary doctor of the Maria Curie-Skłodowska University

2018-10-22

The Maria Curie-Skłodowska University (UMCS) in Lublin awarded Prof. Timothy Snyder - American historian, professor Yale University, specializing in contemporary history of Central and Eastern Europe with the honorary doctorate of UMCS. The title of doctor honoris causa was awarded to Prof. Snyder by the UMCS Senate, at the request of the UMCS Humanities Faculty Council. Professor Timothy Snyder received the title in recognition of his outstanding contribution to understanding the history of the twentieth century and the courage to proclaim difficult truth, for constant reminding about the ethical dimension of the historian's work and social intellectual responsibility, for the exceptional ability to show Poland's history in a broader European perspective and for long-term and fruitful cooperation with the Maria Curie-Skłodowska University.

Meeting of the Conference of Rectors of Polish Universities devoted to the Constitution for Science

2018-10-22

Lublin Catholic University of John Paul II (Catholic University of Lublin) on 22 October 2018 will hold a meeting of the Conference of Rectors of Polish Universities (KRUP). The meeting will be attended by 20 rectors and vice-rectors representing all Polish universities, as well as representatives of the Ministry of Science and Higher Education, the National Science Center and PhD students. Rectors affiliated to the (KRUP) are invited to the Catholic University on the occasion of the 100th anniversary of the uni-

versity to discuss the financial and practical aspects of the implementation of the new law on higher education and science. The Conference of Rectors of Polish Universities (KRUP) was established by the rectors of universities in 1989. It allows to develop and present opinions and positions on issues important for the development of Polish science, higher education, culture and education, in cooperation with the Conference of Rectors of Academic Schools in Poland.

Scientists from the Polish Academy of Sciences discovered a castle in Mazovia

2018-10-23

Researchers from the Institute of History of the Polish Academy of Sciences discovered a medieval castle in Żelechów, Mazovia. It was possible thanks to the use of the most modern exploration techniques, including airborne laser scanning. - We knew that the castle existed, though information about its location, size and construction had not been preserved anywhere - said the archaeological research director, Wojciech Bis from the Institute of Archeology and Ethnology of the Polish Academy of Sciences. The castle was a regular quadrangle surrounded by a moat filled with water. The stronghold was protected by the earth embankment reinforced with wood and stones. Most of the structures were made of wood, although one buildings was raised on stone foundations. Scientists suppose that it was the seat of the ruler.

Kozminski Academy to cooperate with the National Center for Nuclear Research

2018-10-23

Kozminski Academy (ALK) in Warsaw signed an agreement on scientific and didactic cooperation with the National Center for Nuclear Research (NCBJ), which includes, among others, joint research projects, the development of analytical tools and the application of artificial intelligence in the analysis of large data sets. Researchers and IT specialists at the National Center for Nuclear Research have quite rare skills acquired during the processing and analysis of a huge amount of data that we have been dealing with in physical experiments for many years - said the NCBJ director Prof. Krzysztof Kurek. There is a lot of evidence that these skills and tools and methods developed by physicists can be successfully applied to the analysis of social, economic and economic processes and phenomena. Our scientists already have achievements in this field, in particular in the area of medical data analysis. We are sure that together with colleagues from ALK we will be able to broaden this list of achievements considerably - added the NCBJ director.

European Center of the Maria Curie-Skłodowska University started its activity

2018-10-23

The scientific symposium „European integration and human rights”, which took place on October 22, 2018, officially started the scientific activity of the European Center of the Maria Curie-Skłodowska University (UMCS) in Lublin. The symposium was devoted to the issue of human rights in the context of European integration, in connection with the 25th anniversary of Poland's ratification of the European Convention on Human Rights. The establishment of the European Center of the Maria Curie-Skłodowska University was preceded by the signing of a cooperation agreement between UMCS, the University of Larnaca, the European Center in Nancy, the Institute of International Relations of the Kiev National University, the Chernovtsi National University, the

Carpathian National University in Ivano-Frankovsk, the Municipality of Lublin and the City of Nancy. The Center is to conduct research and teaching activities in the field of European integration in an interdisciplinary perspective.

University of Silesia launches Intensive Workshops for Final Exams

2018-10-23

The team of the University of Graduates, operating as part of the Continuing Education Center of the Silesian university, is organizing Intensive Workshops for this year's secondary school graduates. The innovative educational project includes 60 hours of interesting classes and creative exercises that will facilitate passing the final examination. The workshops are to prepare the pupils for the final examinations in Polish and mathematics at the basic and extended levels as well as history, knowledge about society, biology and chemistry at an advanced level. They will start on October 25. The classes will be run by trainers and lecturers specializing in preparing for the final examination. Qualified university staff and the best teachers from the region will use modern didactic methods and tools to prepare the best students for this year's final exams. The classes conducted in a group of ten persons guarantee intensive work tailored to the needs of the participants. More: www.maturzysta.us.edu.pl

Conference on the future of humanities at the Ignatianum Academy

2018-10-24

The Ignatianum Academy in Krakow invites participants to a scientific conference on October 29 entitled „What is the future of humanities?”. The conference will be attended by Jarosław Gowin - deputy prime minister, minister of science and higher education. The event will start with an introductory lecture delivered by Deputy Prime Minister Gowin. It will be devoted to the Constitution for Science in the aspect of opportunities and challenges that it brings for the social sciences and humanities. The Krakow

conference is part of the project «Humanities have a future» realized by the Ignatianum Academy as part of the «Dialogue» program. The aim of the project is to improve the image of social and humanistic sciences, highlight the socio-economic importance of the humanities, show it as an attractive career path and popularize the humanities as a science area.

Talks on media education in the world of digital consumerism in Gdansk and Gdynia

2018-10-24

The Polish Society for Media Education, Faculty of Social Sciences of the University of Gdańsk and the European Center for Solidarity and Science Experiment invite participants to the Third Media Education Congress, which will take place in Gdansk and Gdynia on October 25 and 26. The Congress is held under the slogan «Media education in the world of digital consumerism. New technologies and a solidary and pluralistic society». One of the important tasks currently faced by media education is to draw attention to the paradox of new technologies. They are providing for democratization and pluralization, but they can also be a tool for surveillance and manipulation. The main partner of the Congress is the Konrad Adenauer Foundation in Poland. The honorary patronage over the event was taken by the Lech Wałęsa Office and the Polish Committee for UNESCO. More: <http://kongres2018.ptem.org.pl/>

Cultural Tourism Quo Vadis? - conference at the University of Physical Education in Poznan

2018-10-24

Researchers, educators and practitioners from Brazil, Hungary, Uganda, Portugal, Australia, Canada, Kosovo and Poland will discuss the issues of cultural tourism during the conference „Cultural Tourism - Theory and Practice. Research status, practical applications and development perspectives” at the University of Physical Education in Poznań. The scientific goal of the conference is to assess the world of cultural tourist, both in the perspective of social sciences (social communication, sociology, management sciences) and humanities (cultural anthropology, philosophy, history, cultural studies). The speakers who will deliver their speeches on October 25 and 26 at the Poznań university include world-renowned scientists. The conference program includes plenary speeches, discussions, speeches in sections and workshops, as well as an accompanying program: visiting Poznań for foreign guests and a study trip to the Piasts Route. More: <http://www.awf.poznan.pl/pl/lista-aktualnosci/newsy-2018/3810-quo-vadis-turystyko-kulturowa>

Faculty of Biotechnology of the University of Wrocław to hold lectures on vaccination

2018-10-24

The Faculty of Biotechnology of the University of Wrocław invites participants to a series of lectures on vaccination. During the lectures will be discussed the mechanism of immunization and the formation of immunological memory, the risks of giving up vaccination, the most important facts will be given and the myths about vaccination will be explained. The lectures are open, they will be held on Saturdays at 9:30 and last 45 minutes. The first meeting - «Introduction to immunology» - is scheduled for October 27. During the lecture, Dr. Zdzisław Wróblewski will acquaint students with the basics of immunological knowledge, which are based on vaccination. The organizers announce the presentation of the concepts of antigen and antibodies, cells of the human

immune system, as well as the methods of natural acquisition of immunity. The lecturer will also talk about immunological memory and individual immunity as well as population resistance and its importance for the health of the society.

National Science Center has signed the DORA declaration

2018-10-25

Director of the National Science Center Prof. Zbigniew Błocki has signed the DORA declaration (San Francisco Declaration on Research Assessment) regarding the method of evaluating the quality of scientific research by entities financing science, journals and scientific units. The basic postulate formulated in the declaration is to assess the quality of researchers' work on the basis of substantive and not quantitative criteria. In the opinion of the signatories the researchers should be assessed primarily by the originality of their achievements and the impact on the development, and not only with the use of bibliometric indicators. The San Francisco Declaration was formulated in December 2012. At present, 667 organizations and over 13,000 people from all over the world signed the declaration. The Foundation for Polish Science is one of the signatories.

National Academic Competition „Concrete Architecture” settled

2018-10-25

The 19th National Competition on Concrete Architecture was organized jointly by the Architecture Department of the Krakow University of Technology and the Association of Cement Producers. The competition included the projects from eleven architectural faculties throughout Poland. They were judged by a jury chaired by Prof. Eng. Kazimierz Kuśnierz, deputy dean of the Architecture Department at the Krakow University of Technology. The equivalent prizes were awarded to: Aleksandra Kozłub from the Białystok University of Technology for the work «Eluwium: Polis of diving, Galway Bay»; Michał Przetaczek from the Andrzej Frycz Modrzewski Krakow Academy for the work «Vineyard Wieliczka» and Anna Kaleta from the Krakow University

of Technology for the work «Library of the Krakow University of Technology».

Polish-Norwegian seminar on fair economic transformation

2018-10-25

The Institute of Environmental Protection - National Research Institute together with the Norwegian Ministry of Climate and Environment are organizing a Polish-Norwegian seminar on sustainable equitable economic transformation on 25 October in Krakow. The main objective of the project is bilateral cooperation between Poland and Norway, which aims to support and present the concept of a balanced fair economic transformation taking into account social costs and the need to create new jobs. The seminar will present the experience of Poland and Norway related to economic transformation and challenges related to climate change. SECURE 2018 - Conference on ICT security

2018-10-25

In Warsaw on October 23-24, 2018, SECURE 2018 conference on IT security was held. Its organizers were the NASK National Research Institute (NASK PIB) together with NASK SA and the CERT Polska team operating within the NASK PIB. Cyberthreats are not just hacking servers and stealing data. A large part of cybercrime is fraud, similar to common theft, and the only difference is the use of the Internet as a method of communication - said Krzysztof Silicki, the head of NASK PiB. During the first 9 months of 2018, CERT Polska - a security response team operating within NASK on cybersecurity reported 2690 incidents in Polish networks related to security breaches on the Internet. More than half of them were computer frauds, among which phishing i.e. false e-mail correspondence or websites aimed at extorting money or confidential information was most frequently reported. Foundation act for the building of the Institute of Computer Science of the University of Gdańsk

2018-10-25

A foundation act was signed for a modern five-storey Institute of Computer Science of the University of Gdańsk, which is being built on the Baltic campus of the university in Gdańsk Oliwa. - I hope very much that the building of the Institute of Computer Science of the Faculty of Mathematics, Physics and Computer Science at the University of Gdańsk will prove to be a perfect response to the needs of the labor market, which is still insatiable with IT specialists - said Jerzy Piotr Gwizdała, the rector of the University of Gdańsk during the ceremony. The new building will include seminar and computer rooms, auditoria, didactic and scientific rooms as well as office and social rooms. The value of investments necessary to implement the project amounts to over PLN 39 million. The investment is co-financed under the Regional Operational Program of the Pomorskie Voivodeship for the years 2014-2020. Its completion is scheduled for the second half of 2019.

Academia Copernicana: an innovative and international PhD school in Toruń

2018-10-25

The Interdisciplinary PhD School „Academia Copernicana” at the University of Nicolaus Copernicus in Torun has started. The Torun University is the first in Poland to implement an innovative program of PhD education. «Academia Copernicana» provides a prestigious curriculum for young scientists. The best candidates will work under the supervision of international research teams. The program places emphasis on innovation, interdisciplinarity and internationalization and it is in accordance with the European Salzburg II Initiative. The aim is to prepare participants for research activities and academic and didactic at the academic level. Studies will be conducted in English. In connection with the growing importance of mobility of young researchers, all participants will have a compulsory three-month in-

ternship with a foreign tutor. Consultations with foreign tutors will also be held during summer schools organized in Toruń.

Anti-discrimination and anti-conflict workshops at the University of Warsaw

2018-10-26

In November, students of the University of Warsaw will take part in workshops during which they will learn how to respond to violence and unequal treatment due to their origin, nationality or skin color. «Anti-discrimination and anti-violent workshops for foreign and Polish students» is one of eleven projects that were selected as part of the first participatory budget of the University of Warsaw. During the four-hour workshop, students will be able to learn how to react to violence and unequal treatment. Meetings will take place at the University Volunteer Center and will be conducted in Polish, English and Russian.

II Rzeszow Forum Technology in Medicine „From an idea to an industry”

2018-10-26

The Management Board of the „Technology in Medicine” Cluster, which includes Rzeszów University of Technology, University of Rzeszów and representatives of regional hospitals, medical companies and Rymanów Zdrój health resort, invites participants to the 2nd Rzeszów Forum of Technology in Medicine „From an idea to an Industry”. The conference will take place on October 30, 2018 at the University of Rzeszów. Its aim is to familiarize students of medical engineering, PhD students, young businessmen and people who plan to create their own company related to medical industry with medicine opportunities and development ways, and to create a forum for exchanging experiences, seeking contacts and funds to conduct innovation activities and their implementation. Researchers of the Cardinal Stefan Wyszyński University perform at the 9th Mazovia Development Forum

2018-10-26

The possibilities of modern technology, 3D printing, photogrammetry, unmanned aerial vehicles and VR technology were presented to the participants of the 9th Mazovia Development Forum by scientists from the Center for Digital Science and Technology of the Cardinal Stefan Wyszyński University in Warsaw. The Center experts presented in detail «Application of 3D printing in museology, archeology, architecture and medicine on selected examples implemented by UKSW in Warsaw”, „Digitization of cultural heritage monuments using photogrammetry” or „Printing in technology CJP, SLA and FDM. Solid and surface modeling. Models created on the basis of 3D scanning”. They also answered questions about „Innovative vocational courses for drone operators, enabling the acquisition of VLOS, BVLOS” and also presented new opportunities for professional development with the use of drones.

II Symposium of Young Ornithologists

2018-10-26

The Ornithological Section of the Students’ Scientific Society of Biologists of the University of Lodz and the Ornithological Section of the Scientific Circle of Foresters of the Forestry Faculty of the Warsaw University of Life Sciences are organizing the II Symposium of Young Ornithologists on November 9-11, 2018. The main aim of the symposium is to create a forum for integration and exchange of experiences between students and PhD students who co-create the ornithological movement in Poland through presenting reliable results of ornithological research. The conference is addressed to students, PhD students and representatives of non-governmental organizations. Young ornithologists will meet at the Center for Natural and Forest Education in Rogów. Dr. Kamila Duś-Szachniewicz to receive Polish Intellectual Development Award

2018-10-26

Dr Kamila Duś-Szachniewicz associated with the Chair and Department of Pathomorphology of the Medical University in Wrocław becomes a laureate of the Polish Intelligent Development Award in the category „Innovative young science leader” for the project „The use of innovative technology of optical pliers for the development of low-invasive targeted lymphoma therapy”. The prestigious award was won by the most innovative projects implemented under EU and national programs by Polish scientific institutions, institutions and companies involved in research and development, which contribute to the sustainable development of Poland. Dr Duś-Szachniewicz’s project was financed in 2015-2018 by the National Center for Research and Development as part of the LIDER program. The project obtained two patents and two applications for the inventions.

COMPLETE project of the University of Gdańsk becomes a flagship project

2018-10-26

The project COMPLETE (Completing management options in the Baltic Sea Region) co-implemented by the University of Gdańsk, has obtained the status of a flagship project within the framework of the European Union Strategy for the Baltic Sea Region. The main goal of the COMPLETE project is to minimize the introduction of harmful aquatic organisms and pathogens into the Baltic Sea, which are found in the Baltic Sea through two main sources - ballast water and ship hulls. The 12 partners from the Baltic Sea Region countries want to develop a «road map» for a regionally harmonized strategy for the management of biological pollution brought by ship hulls (biofouling). Thanks to the status of the flagship project, the results obtained and the recommendations developed have a better chance of being passed to the legislative level, which in turn gives them the opportunity to be used in practice. University of Silesia deepening its cooperation with the Beijing Technical University

2018-10-26

The University of Silesia extends cooperation with the Beijing Technical University. Among the planned initiatives is the establishment of a Confucian Class at the Silesian University. After the signing of the framework agreement, that was made during the visit of the Chinese delegation in Katowice, the implementation work of executive contract for running a student exchange program enabling the diplomas of both universities began. The academic exchange was initiated during the summer school of language, literature and Polish culture in Cieszyn. Both universities have been cooperating since 2017. At that time, together with the third partner the Opole University of Technology they announced the organization of a Chinese language course at the University of Silesia. Since January 2018, the Center of Chinese Language and Culture has been operating. This research and didactic unit conducts classes on Chinese language and culture, and undertakes numerous initiatives to promote countries of the Far East in Poland.

National Academic Exchange Agency to hold conference „Science: Polish Perspectives” in Oxford

2018-10-29

On November 16-17, 2018, the conference „Science: Polish Perspectives” will take place in Oxford. It is a meeting of the Polish scientific diaspora in Great Britain organized by the National Academic Exchange Agency (NAWA). The participants of the conference will have the opportunity to listen to many interesting lectures presented by a group of young scientists and take part in the workshops. Łukasz Wojdyga, NAWA Director will hold the presentation entitled „What are the latest

news in Polish and higher education?” and will talk about the NAWA programs and the role of the Agency in the internationalization of science in Poland. More: <https://poloniumfoundation.org/sppox-ford2018/>

Mining Economic Forum in Krakow

2018-10-29

“Act as a miner, think like an economist” - this is the slogan of the Mining Economic Forum, organized on 5-7 November 2019 by the AGH University of Science and Technology in Krakow. The event is organized by the Faculty of Mining and Geoengineering of AGH in cooperation with the Science and Traditions Mining Foundation. The Forum’s program is divided into 5 discussion panels: Poland’s raw materials policy - challenges and risks; Mining enterprises and their development strategies in creating their value for stakeholders; Support for raw materials enterprises and their suppliers on export markets; New regulations in the field of fuel quality in Poland and Methods of optimization of the production process in opencast mining. More: <http://www.gfe.agh.edu.pl/>

Commercialization of research - a challenge for young scientists

2018-10-29

The Academy of Young Scientists of the Polish Academy of Sciences together with the National Center for Research and Development invites participants on November 15, 2018 to the conference „Commercialization of research – a challenge for young scientists”, which will take place in Warsaw. The aim of the conference is to create a platform for discussion to identify problems faced by young scientists who want to commercialize their research. During the event, a panel discussion will take place to introduce the case study, presenting specific examples of successful and complicated commercialization processes. Speakers will describe the critical stages of the process and present their points of view on the commercialization process.

Polish-Israeli call for research and development projects

2018-10-29

National Center for Research and Development (NCBR), executive agency of the Minister of Science and Higher Education, jointly with the Israel Research and Development Center for the Israel Innovation Authority / ISERD announced a joint competition for research and development projects aimed at developing innovative products or technological solutions with high potential for commercial applications. The NCRD budget for co-financing the implementation of projects selected in the Polish-Israeli call is PLN 2 million. Co-financing can be allocated only for those R&D projects developed by Polish and Israeli entities, which will receive funding from the Israel Innovation Authority. The applications can be submitted by January 15, 2019. Foundation for Polish Science awarded the Leszek Kołakowski Honorary Scholarship

2018-10-29

Dr Caterina Tarlazzi, historian of medieval philosophy from the University of Geneva, received the Leszek Kołakowski Honorary Scholarship granted by the Foundation for Polish Science. - Receiving the prize named after Leszek Kołakowski, outstanding thinker of the 20th century, is a great honor for me. This award will surely strengthen my cooperation with the Polish scientific community - said Dr. Caterina Tarlazzi during the ceremony of presenting the scholarship. Dr Caterina Tarlazzi holds the title of Doctor Europaeus, jointly awarded by the Università degli Studi di Padova in Italy and the Université Paris IV Sorbonne in France. Since 2017 she has been working at the University of Geneva. The aim of the scholarship is to honor scholars who already at the beginning of their academic career can boast of outstanding scientific

achievements in the history of medieval and modern ideas and philosophy until 1939.

Pomeranian Historical League of the University of Szczecin

2018-10-29

The third season of the Pomeranian Historical League has begun. The League is a project of the Institute of History and International Relations of the University of Szczecin, with aim to explore the history of Western Pomerania within the history of Poland and Europe. The third League program will include: a tournament «Western Pomerania in the years 1815-1945», a historical route, historical debates, interviews with witnesses of history and creating a museum concept. The participants are to prepare their ideas for each event in their localities, and send the results of their works for evaluation. The organizers will invite the participants to the «face to face» competition with the other participants. The league will end on May 30 next year, when the winners will receive the prizes. The best participants will be also set off for a few days for a scientific trip around historic Pomerania, and the winning school will receive a passing cup. More: <http://plhszczecin.eu/>

Competition for the best science book in the academic year 2017/2018 settled

2018-10-30

During the 22nd International Book Fair in Krakow, the Association of Higher School Publishers settled the „Gaudemus” competition for the best academic or didactic book in the academic year 2017/2018. The main prize and statuette were awarded to the Maria Curie-Skłodowska University Publisher in Lublin for the publication of «Methods of speech therapy». In addition, the Krakow University of Technology Publishing House was awarded for the book «Space. Scenario analysis in planning and landscape design», University of Gdańsk Publisher and Professor Waclaw Szybalski Foundation received the prize for the book «Professor Waclaw Szybalski's opinion about Lvov, genes, essence of life and Nobel Prize winners» and the Scientific Publisher of the Nicolaus Copernicus University in Toruń for the publication «Bolesław Chrobry - roaring lion».

Winners of the Science Awards of the journal „Polityka”

2018-10-30

The Polityka weekly journal for the 18th time selected the winners of the „Polityka” Science Awards. Five young scientists received scholarships of 15 thousand PLN. The laureates of this year's competition are: Dr. Jan Olaszek from the Institute of National Remembrance, who studies the Polish opposition until 1989 in the comparison to the dissident movements in other communist countries in the humanities category; Dr Mateusz Strzelecki from the University of Wrocław, head of the polar station in Spitsbergen in the social sciences category; Dr. Szymon Drobnik from the Jagiellonian University, author of 36 publications in the field of evolutionary biology in the category of life sciences; Dr Eng Daniel Prochowicz from the Polish Academy of Sciences, who is scientifically involved in photovoltaics in the exact sciences category; Dr Eng Judyta Cichočka of the Wrocław University of Technology, involved in parametric design and Optimization of Architectural Design techniques in the technical sciences category.

Young Scientists' Forum in Lublin

2018-10-30

The Maria Curie-Skłodowska University in Lublin and the Marshal Office of the Lublin Province in cooperation with the Institute of Agrophysics of the Polish Academy of Sciences on November 14 and 15 are organizing the Young Scientists Forum under the slogan 3xl: „Innovation - Interdisciplinarity - Interactivity”. The event is addressed to PhD students and young science employees from Lublin universities (up to 35 years of age), who conduct or would like to conduct interdisciplinary and innovative research and are focused on interactivity. The forum will include workshops on the following issues: Public appearances (self-presentation); Stress at the work of the scientist; Creating the image of a scientist and planning the career of a young scientist; Research project management and Researchers in business on the example of photonics. More: <https://www.umcs.pl/pl/fmn.htm>

Prime Minister's prizes for two researchers from the University of Life Sciences in Wrocław

2018-10-30

Dr Dominika Kulig and Dr Anna Gliszczyńska from the Faculty of Biotechnology and Food Sciences of the Wrocław University of Environmental and Life Sciences have received prizes of the prime minister for PhD dissertations and the achievements being the basis for their postPhD degree. Dr Dominika Kulig works in the research group «BioActive Team» dealing with the development of innovative methods for food preservation. The aim of her PhD thesis was to produce materials for use as edible casings for food products - in particular raw meat and its products. These materials are of natural origin and are formed on the basis of biodegradable polymers. Dr Anna Gliszczyńska was awarded for receiving a new generation of environmentally friendly biopesticides that selectively reduce populations of harmful insects. They are also effective in the prevention and therapy of cancer diseases based on natural origin compounds. Silesian Medical University to launch Museum of Medicine and Pharmacy

2018-10-30

In December, the Silesian Medical University in Katowice will open the Museum of Medicine and Pharmacy of in Sosnowiec. The subsidy 100,000 PLN for the museum was given by the Mayor of Sosnowiec. The museum is to serve primarily as a teaching aid for students of medical faculties, and also it will be a perfect complement to knowledge in the history of medicine and pharmacy for the inhabitants of Sosnowiec and pupils of secondary schools. The establishment of the museum will contribute to the popularization of the rich achievements of Silesian medicine and the pioneering achievements of doctors working here. For several years, the University has been collecting unique exhibits with the

intention of showing them at the university museum. In the facility located at ul. Ostrogórska 30 in Sosnowiec, there will be an exhibition of tools and equipment used in the past, a gallery presenting the work of staff in operating rooms and a former pharmacy, where you will be able to see the vessels and tools for making medicines.

Students of the University of Warsaw win the Polish Academic Championships in Team Programming

2018-10-31

The team from the Faculty of Mathematics, Computer Science and Mechanics at the University of Warsaw (WMiM UW) composed of Jakub Boguta, Konrad Paluszek and Mateusz Radecki won the XXIII edition of the Polish Academic Championships in Team Programming. 51 teams took part in the competition, with 8 teams from the University of Warsaw. Another team from WMiM UW Maciej Hołubowicz, Dawid Jamka and Jan Tabaszewski took the second place. The Polish Academic Championships in Team Programming are the most important competitions for IT students in the country. The first competition took place in 1996 in Poznań. This year's championship was held at the University of Wrocław. More: <http://www.amppz.ii.uni.wroc.pl/>

University of Silesia invites participants to the Business - Science Forum. Nano-POWER

2018-10-31

University of Silesia in Katowice, NANONET Foundation, Institute of Non-Ferrous Metals in Gliwice and the Center of Polymer and Carbon Materials of the Polish Academy of Sciences invite participants to the Forum Biznes - Nauka. Nano-POWER - inspiration in the energy industry. During the Forum - November 7, the scholars will present good practices of implementing nanotechnology and nanomaterials in power industry, construction and heating. The main topics will include: the use of nanotechnology in optoelectronics, thermal insulation products, batteries and accumulators as well as catalysts for energy

and renewable energy sources. As part of the Forum, the Silesian Inter-University Center for Education and Interdisciplinary Research in Chorzów will hold the „Materials Research for Industry” workshops. During the workshop, visitors will be able to use devices for determining the physico-chemical parameters of the nanoscale materials. More: http://www.imn.gliwice.pl/articles/926/zapraszamy_na_forum_biznes_%E2%80%93_nauka_nano-power_%E2%80%93_inspiracje_w_branzy_energetycznej

Center for Innovation and Technology Transfer of the Silesian University of Technology receives Golden Emblem of International Quality

2018-10-31

The Center for Innovation and Technology Transfer of the Silesian University of Technology was awarded the Golden Emblem of International Quality 2018 and became the winner of the Highest Quality program in the QI Services category. The award was received during the European Quality and Innovation Forum. The Center plays a key role in managing intellectual property of the Silesian University of Technology, in the commercialization of research results and in establishing and maintaining contacts with the business environment. The title Golden Emblem of International Quality and the certificate signed by leading institutions are a confirmation that the university applies the highest standards, constituting a competitive advantage on the Polish and international market. The European Quality and Innovation Forum is an event addressed to the scientific, business and local government community. Its purpose is to exchange information and experiences and to integrate these environments.

University of Torun plans deeper cooperation with Beijing International Studies University

2018-10-31

The Nicolaus Copernicus University in Toruń (UMK) plans to deepen the cooperation with Beijing's International Studies University (BISU). The authorities of both universities talked about extending the student exchange agreement signed in March 2018. The plans include increasing the number of Polish language teachers on BISU and Chinese studying in Toruń. Currently, 38 people from BISU are studying at the Studium of Polish Language and Language for Foreigners at the Faculty of Philology. They are students of Polish philology, which is a prestigious field at the Beijing University. There are talks about the inviting another 20 students for the full cycle of studies next year. The Chinese side is interested in a new field of study at the Faculty of Philology - Polish philology as a foreign language. Chinese students, after their graduation, could study in other Polish-language majors. The plan also includes the promotion of UMK in Beijing secondary schools.

Foundation for Polish Science awards scholars

2018-11-02

Professors Timothy Snyder, Krzysztof Pachucki, Andrzej Gałęski and Andrzej Dziembowski, became the laureates of the 27th Foundation Award for Polish Science. The prize winners are Prof. Andrzej Dziembowski from the Institute of Biochemistry and Biophysics of the Polish Academy of Sciences (PAS) in Warsaw in the field of life sciences and earth for explaining the function of key RNA-degrading enzymes, whose disturbances lead to pathological states; Professor Andrzej Gałęski from the Center of Molecular and Macromolecular Studies of the Polish Academy of Sciences in Łódź in the field of chemical sciences and materials for the development of a new plastic deformation mechanism for polymers; Professor Krzysztof Pachucki from the Faculty of Physics of the University of Warsaw in the field of mathematics, physics and engineering sciences for

precise quantum-electrodynamic calculations of spectroscopic parameters of light atoms and molecules; Professor Timothy Snyder from Yale University in the field of humanities and social sciences for the analysis of the political and social mechanisms that in the twentieth century led to national conflicts and genocide in Central Europe. The prize is 200,000 PLN.

Ministry of Science and Higher Education launches Mooc Poland

2018-11-02

The Ministry of Science and Higher Education in cooperation with the Foundation of Young Science has launched an educational platform with open online courses that allows free lifelong learning. The Polish Mooc (massive open online course) is a virtual course created by Polish academic centers and institutions related to distance learning in cooperation with the business world and non-governmental organizations. - The technological revolution, also in the area of education, is happening before our eyes. Already today, over 80 million students in the world use platforms that offer MOOC courses. Over 800 universities provide such courses to students around the world. They support and supplement traditional forms of education, where the master-student relationship is the most important thing - said Piotr Dardziński, deputy minister of science and higher education during the inauguration of the project. More: <https://polskimooc.pl>

Dr Eng Judyta Cichocka from the Wrocław University of Technology becomes the laureate of the journal Polityka Science Award

2018-11-02

Dr Eng Judyta Cichocka from the architecture faculty of the Wrocław University of Technology became a laureate of the Political Science Award. The researcher won commemorative diploma and prize 15 thousand PLN in the technical science category. The laureate deals with parametric design and

optimization techniques for architectural design. They consist in modeling in three dimensions using programming, which makes it easier for designers to make formal, spatial and material decisions. Dr Cichocka is a co-author of the «Silvereye» optimization program based on particle swarm optimization. According to the results of its research, it can solve design problems many times faster and more efficiently, what improves the quality and ensures higher energy efficiency of architectural realizations. The Scientific Awards of the journal «Polityka» are awarded in the following categories: humanities, social sciences, technical sciences and life sciences.

Institute of Aviation begins cooperation with the Faraday Research and Development Center

2018-11-05

The Institute of Aviation in Warsaw has signed a cooperation agreement with the Faraday Research and Development Center appointed by the Energa Group. The goal of the cooperation is to develop innovative solutions that will help to provide the Group's clients with high quality services and new products as well as to reduce operating costs and introduce new technologies for everyday use. - We want to use the potential of the Institute for efficient detection of failures and prevention of line and energy infrastructure from failures. The Institute's extensive experience in the use of drones or planes and in advanced analysis of the recorded material with the use of artificial intelligence will help to achieve that - said Marcin Karlikowski, president of the Energa Faraday Research and Development Center.

4th Green Smart City Forum - a voice of science to manage smog

2018-11-05

On November 19 and 20, the 4th Green Smart City Forum will take place in Krakow - the voice of science to manage smog. The event is organized by the InnoTechKraK School Union. Representatives of the voivodship authorities, the city of Krakow, municipalities of the Małopolska province, experts and scientists from Kraków's universities are invited to participate in the Forum. Within two days, at various panel discussions, participants will talk about air pollution in Poland and how to combat it. The organizer of Green Smart City, the InnoTechKraK University Association, is the first formal union of universities in Poland, created by the AGH University of Science and Technology in Krakow, Krakow University of Technology and University of Agriculture in Krakow, whose goal is to strengthen the research and teaching potential of those three Krakow universities.

Professor Krzysztof Wielecki becomes a member of the Pontifical Academy of Social Sciences

2018-11-05

Krzysztof Wielecki, professor of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw and director of the Institute of Sociology, UKSW, was appointed by Pope Francis as a member of the Pontifical Academy of Social Sciences. Professor Wielecki is the 26th member of the Academy, which brings together economists, sociologists, psychologists, political scientists and philosophers. The aim of the Academy is to promote the study and progress of social, economic, political and legal sciences in the perspective of research and development of the Catholic social doctrine. The Academy also promotes the application of this doctrine in modern society. The academy consists of no less than 20 and no more than 40 ordinary academic scholars and honorary scholars. Academy scholars are appointed by the Pope on the basis of «competence in social sciences and integral moral attitude».

Seminar „100 years of Independence” held at the Faculty of Political Science of the Maria Curie-Skłodowska University in Lublin

2018-11-05

Until 9 November, the Faculty of Political Science of the Maria Curie Skłodowska University (UMCS) in Lublin will hold a series of events organized for the 100th anniversary of Poland's independence. The seminar entitled «On the manifesto of the Provisional People's Government of the Republic of Poland» will take place on November 6. On November 7-8 a theatre drama will be performed presenting the disputes of the Provisional People's Government, which 100 years ago were held at the Lubomirski Palace - the current seat of the Faculty of Political Science at the UMCS. On November 8, two scientific conferences will take place: „People's vision of Independence. People's government in Lublin” and „Equality of women in Poland. Between theory and practice.” The series of events will be finalized by the National Academy of Stories „Unknown Heroes of our Independence”.

University of Silesia invites participants to the conference „Polish Politics 1918-2018”

2018-11-05

The Institute of Political Sciences and Journalism of the Faculty of Social Sciences of the University of Silesia invites participants to the scientific conference „Polish Politics 1918-2018”. The partners of the event are: Society for Scientific Initiatives, Polish Political Sciences Society Branch in Katowice, Upper Silesia-Zagłębie Metropolis, Katowice Special Economic Zone. The organizers of the conference are planning a scientific debate summarizing the political processes taking place in Poland in 1918-2018. The debate will be held on 6 and 7 November in Wisła. Scheduled thematic panels are: 100 years of Poland in Europe and in the world; politics in Poland in the years 1918-2018; Poland in international relations, including foreign policy in the years 1918-2018; Central and Eastern Europe in the years 1918-2018; Polish media in the years 1918-2018 and Silesia as a region in Poland and Europe. More: www.inpidz.us.edu.pl

Dr Monika Bobako from the Adam Mickiewicz University becomes the laureate of the Długosz Prize

2018-11-05

Dr Monika Bobako from the Laboratory of Frontier Questions of the Adam Mickiewicz University in Poznań becomes a laureate of the 21st Competition for Jan Długosz prize. The award was received during the International Book Fair in Krakow for the book „Islamophobia as a technology of power. Study on political anthropology.” Professor Ryszard Nycz, in his laudation, said that the book written by Monika Bobako is the first attempt in the Polish humanities to deal with the phenomenon of Islamophobia, which is important in contemporary social life. - It can be said that this book is involved, and even interventionist, in the best humanistic sense of the term; it proposes an original study and solution of a socially important problem in a way that leads to a change in mental and social attitudes - said Prof. Nycz.

Fiat Chrysler Automobiles Award

2018-11-06

Until 15 November 2018 students can submit master's theses and PhD dissertations within the 20th competition for the Fiat Chrysler Automobiles Award (FCA). The competition is for students dealing with the issues devoted to the broadly understood Automotive subjects and who defended their theses at the Warsaw University of Technology in the academic year 2017/2018. The aim of the competition is to support young scientists interested in Automotive topics, including innovative construction solutions and research methods. The Competition for the Fiat Chrysler Automobiles Award is announced on the basis of an agreement on scientific and technical cooperation between the FIAT Research Center and the FCA companies that co-finance prizes and three Polish universities: Warsaw University of Technology, Silesian University of Technology in Gliwice and the Technical and Humanities Academy in Bielsko-Biała.

Polish-German declaration on cooperation in the field of research and development

2018-11-06

As part of the Polish-German intergovernmental consultations held in Warsaw, Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education, with Anja Karliczek, the Federal Minister for Education and Research, signed a declaration of cooperation in the area of research and development. The topic of talks between the heads of the Polish and German science ministries was the cooperation of the National Science Center with the Max Planck Society as part of the DIOSCURI Program, which aims to create Centers of Scientific Excellence in Central and Eastern Europe. The discussion also focused on strengthening the participation of Polish scientists in European Union programs and cooperation in the field of the European Research Area. In the signed declaration both ministers undertook to support research projects as the main element of bilateral cooperation. The document underlines the importance of cooperation in the fields of science, research, development and innovation.

Talks on cybercrime at the University of Lodz

2018-11-06

The Faculty of Law and Administration of the University of Lodz held a meeting with Brian Schilling, one of the directors of ICANN, an organization dealing with control and management of the Network, which presented the participants of cybercrime and defense against cybercrimes. ICANN (Internet Corporation for Assigned Names and Numbers) is a global non-profit organization that manages the global Internet. Every day, it makes decisions about choosing the right to resolve disputes between Internet users. During the meeting Brian Schilling talked about his daily work and presented the most interesting, current legal challenges related to the functioning of the global network - from the issue of intellectual property protection to the prosecution of organized criminal groups.

Conference „Banking in the Age of Crisis of Civilization” planned at the Kozminski University

2018-11-06

The Kozminski University in Warsaw, the Polish Bank Association, and the ALTERUM Center for Research and Analyzes of the Financial System invite participants to the conference „Banking in the age of civilization crisis”. The participants of the conference, which will take place on November 8 at the Kozminski University, will attempt to assess the most important events related to the financial sector that took place in 2018. They will also try to answer the following questions: Are we prepared for the next crisis? Regulations – do they inhibit or stimulate the innovation of the financial sector? New business models - evolution or revolution? The special nature of this event is highlighted by the fact that it is a joint venture between people of science and practitioners from the financial circles, giving an opportunity to exchange views and flow of information between those groups.

Student of the Jagiellonian University wins a competition for literary translation

2018-11-06

Barbara Bruks, a student of literary and cultural translation at the Faculty of Polish Studies at the Jagiellonian University in Krakow, won the translation contest, which took place under the patronage of the Association of Literary Translators during the 14th International Festival of Stories in Wrocław. 280 translations from English, German and French were sent to the competition. The jury awarded the first prize to Barbara Bruks for translating the « Wyspiarze z ronda» («Die Verkehrsberuhigten») story of the Austrian writer and musician Elias Hirschel into Polish. See the awarded translation: <https://polonistyka.uj.edu.pl/documents/41623/140847814/E.+Hirschl+Die+Verkehrsberuhigten+-+t%C5%82um.+B.+Bruks.pdf/f92bbe75-1b21-440f-aa94-ee867c705ab9>

Memorandum on cooperation between Jan Długosz University and Zhengzhou University of Light Industry

2018-11-06

Jan Długosz University of Humanities and Natural Sciences in Częstochowa and the Chinese Zhengzhou University of Light Industry have signed a memorandum, which will allow for better cooperation in language teaching, vocational education and cultural exchange. The signatories of the document declared their will to organize more higher short-term courses, paid traineeships, as well as cultural events that would allow students to get to know the partner's academic environment, the region and the country. The agreement also assumes the organization of more frequent visits by scientists in Poland and China. The memorandum was signed during the visit of the Chinese delegation in Częstochowa. The main interest of the Chinese side was the opportunity to participate in PhD studies and to prepare a PhD dissertation with the participation of two promoters (Chinese and Polish). Zhengzhou University of Light Industry has existed since 1977. It is a leading university in Henan province, with over 22 thousand students studying there.

Wrocław polar geographer wins the award of the journal „Polityka”

2018-11-06

Dr. Mateusz Strzelecki from the Institute of Geography and Regional Development of the University of Wrocław wins the scientific award of the journal „Polityka”. The Wrocław polar geographer won the award in the category of social sciences. Dr Strzelecki is the head of the polar station of the University of Wrocław in Spitsbergen, leader of Polish research teams on the evolution of the coast and the paraglacial transformation of the landscape in the High Arctic. He is the youngest member of the Polar Research Committee of the Polish Academy of Sciences. The aim of his research is to determine how climate change transforms the polar coasts and threatens to the social clusters existing in these exceptionally sensitive zones. The competition organized by the journal «Polityka» is aimed to promote the young scientists. Its laureates receive scholarships of 15 thousand PLN.

International Day of Science Centers and Museums at the Copernicus Science Center

2018-11-07

On Saturday, November 10, visitors to the Copernicus Science Center in Warsaw will be able to see the achievements of Polish scientists from the last century. The event is organized on the occasion of the 100th anniversary of Polish Independence and the International Day of Science Centers and Museums. The Warsaw center will prepare special stands with experiments referring to the work of the most outstanding Polish scientists. On this day in the Copernicus Centre, the visitors will also be able to meet young researchers developing modern science. - We want to show how important in the development of science is the spirit of cooperation and the ability to make cross borders research. Today's Polish scientists achieve world-class successes precisely because they are able to work in international research teams, in projects often conducted by hundreds of people.

National Academic Exchange Agency summarizes the first year of operation

2018-11-08

The National Academic Exchange Agency (NAWA) was established a year ago. On this occasion Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education and Piotr Dardziński, Deputy Minister of Science and Higher Education, paid a visit to the Agency. NAWA Director Łukasz Wojdyga presented programs implemented by the Agency such as Polish Returns and a dozen other bilateral exchange programs. The first year of NAWA's activity also includes over 700 participants of Polish language courses and 4,500 authenticated documents. - Without the National Academic Exchange Agency, it would be impossible to implement the internationalization mission of Polish science and Polish universities. Thank you for the first year of work and congratulations on the achievements - said Deputy Prime Minister Gowin during the meeting with the Agency's employees.

Fashion Economy Moda 4.0 conference

2018-11-08

The Lazarski Academy of Business and Fashion Academy in Warsaw invites participants on 13 November to the Fashion Economy 4.0 conference, during which discussion panels will be organized concerning new technologies in the general fashion, men's fashion and fashion marketing. Also, the main conclusions from the KPMG report on the fashion industry in Poland will be presented. The conclusions of the latest KPMG report in Poland will concern consumer behavior and development perspectives of the fashion sector. The report characterizes the condition of the Polish clothing and textile industry, presents shopping habits and decision-making factors of consumers as well as observations of enterprises operating on the market. More: <https://fe.cbp.lazarski.pl/>

Researchers from the Warsaw University of Life Sciences win the main Science Challenge Day award

2018-11-08

A team of scientists from the Faculty of Production Engineering of the Warsaw University of Life Sciences (SGGW) won the main prize in a competition organized as part of the Science Challenge Day. Science Challenge Day is an event aimed at finding interesting technological ideas to solve the problem of plastic in packaging. Teams presented their solutions during the one-day innovation marathon, which took place at the Wrocław University of Technology. A team of scientists from the Warsaw University of Life and Agriculture (SGGW) will be able to devote an award of 10,000 euros to the acceleration of their idea in the Scitech Fund investment fund.

International Scientific Conference „Debuts of Mickiewicz. Debuts of the Romantics” at the University of Białystok

2018-11-08

Under what circumstances did the „Urban Winter” appear- the first piece by Adam Mickiewicz published in 1818 in the Tygodnik Wileński? What were the beginnings of the Romantism poets from Poland, Europe and even America? These are just some of the topics of the conference, which will take place in Białystok from 9 to 10 November. The conference will take place in the 200th anniversary of the poetic debut of Adam Mickiewicz. The event will inaugurate the cycle of national Mickiewicz Anniversary. The organizers of the Białystok event are the Department of Philological Studies «East-West» (Faculty of Philology of the University of Białystok), Polish Academy of Learning and the Podlasie Library.

Startup Weekend in Podkarpackie Science and Technology Park- Aeropolis

2018-11-08

From 16 to 18 November, the Startup Weekend will take place at Podkarpackie Science and Technology Park Aeropolis in Jasionka. It is the largest startup event in the Podkarpacie region, supported by the Rzeszów University of Technology. During the three-day event, participants are combined into teams that prepare a startup within 54 hours. The main assumption of the event is the joint work of spontaneously created teams consisting of programmers, graphic designers, UX/UI designers and marketers to create new solutions, products, services and companies. The implementation of projects is supported by mentors who are specialists in various fields of science. More: <https://www.facebook.com/events/1346181608851451/>

Composite wheels awarded Eagle of Innovation Startup in the „Rzeczpospolita” competition

2018-11-08

The project of the Fibrattech company won the Award Eagle of Innovation Startup, in the category „Groundbreaking Technology” within the newspaper „Rzeczpospolita” competition. The Fibrattech develops business in the automotive industry in the Pomeranian Science and Technology Park Gdynia. The jury awarded the main prize to the company for designing an ultralight, composite car wheel. The parkers' project from Gdynia outclasses competition solutions by 15% lighter weight and 30 percent higher hardness of the wheel. The purpose of the Eagle of Innovation competition Startup is to select and reward the best Polish startups offering innovative products / services or running operations in an innovative way. The competition is also to promote good practices in the area of innovation and support the young, dynamically developing Polish enterprises. The competition is organized by the paper «Rzeczpospolita» daily, with Google as the strategic partner. More: <http://>

University of Lodz to hold conference „Tourism in nature”

2018-11-09

The Institute of Urban Geography and Tourism of the Faculty of Geographical Sciences of the University of Lodz is organizing on November 16-17, 2018 a scientific and didactic conference for upper secondary school teachers entitled „Tourism in nature”. The goal of the organizers is to familiarize participants with resources and natural values in tourism. - We would like to encourage you to deepen your knowledge of the peculiarities of animate and inanimate nature and the possibility of getting to know them through tourism, as well as the participation of tourism in its protection. We will pay attention to the following issues: nature protection in the context of tourism development, changing relations between tourism and the natural environment, nature perception, landscape aesthetics, natural environment absorption, development and use of natural resources to renew and improve human psychophysical forces.

Researchers from the Warsaw Medical University receive Award of the American Physiological Society

2018-11-09

The American Physiological Society awarded the article „Chronic, low-dose TMAO treatment reduces diastolic dysfunction and heart fibrosis in hypertensive rats”, describing research conducted under the supervision of Dr Marcin Ufnal from the Department of Experimental Physiology and Pathophysiology at the Medical University of Warsaw (WUM) with the APSselect. The publication concerns the influence of TMAO - a compound found in fish and produced by intestinal bacteria, on the cardiovascular system in the hypertension model. Research on TMAO is financed from the resources of the National Science Center. The American Society of Physiology founded

in 1887 is one of the most prestigious American scientific societies in the field of biomedical sciences. It counts over 10,000 members and publishes 15 prestigious scientific journals.

University of Silesia to hold 9th conference „Past for the Future”

2018-11-09

The Department of Special Education at the Faculty of Ethnology and Educational Sciences of the University of Silesia and the Regional Center for Social Policy of the Silesian Province invite participants to the conference „Past for the Future” on November 14th. This year's, ninth conference refers to events related to the 100th anniversary of regaining independence and the 100th anniversary of women's electoral rights in Poland. The first part of the conference will deal with historical aspects, and the deputy Konstancy Wolny, who was one of the first Silesian deputies to the Sejm. In the second part, a panel discussion «Activity - prevention and health» is planned with the participation of scientists, doctors, politicians and seniors. Co-organizers of the conference are the Academic Association of Social Assistance, the Association of Active Silesia, and Universities of the Third Age in Cieszyn and Wodzisław Śląski.

Invention of the scientists of the Medical University receives Gdańsk European patent

2018-11-09

The European Patent Office has decided to grant a patent for the invention „Oral vaccine containing the Bacillus subtilis spores and its application to immune against Helicobacter pylori”, The creators of the invention are: Prof. Michał Obuchowski and Dr Krzysztof Hinc from the Department of Molecular Bacteriology at the Medical University of Gdańsk and Prof. Ezio Ricca from the University of Naples. The use of spores as vaccine carriers represents a new approach to immunization. The proposed solution has a high potential for therapeutic use as a drug in people already infected with Helicobacter pylori. The beneficial oral form of administration of the vaccine, especially for among children and the elderly people, resistance to low pH prevailing in the stomach and effectiveness of action make the vaccine an interesting solution on the modern pharmacological market.

Scientist of the Silesian University of Technology found serious errors in the D-link routers

2018-11-09

Dr Eng Błażej Adamczyk from the Institute of Informatics of the Silesian University of Technology during his research has detected and published errors in the software of eight models of D-Link routers, allowing for the remote control over them. The discovery is commented in many international portals dealing with network security, and the manufacturer is already developing and implementing patches in the software. The researcher detected three security errors that together could lead to the takeover of control over routers. Combining them all can allow to execute remote control of any devices. This means that the hacker can do literally everything with a endangered device - from changing the configuration and the possibility of further attack of the internal network, through using as an intermediary server and building a «botnet» network, and even

eavesdropping on network traffic along with registering passwords and redirecting calls.

Conference on women fighting for social advancement 1700-1918 at the University of Wrocław

2018-11-09

The Historical Institute and the Institutes of Roman and English Philology from the University of Wrocław invite participants to the international conference „Freedom, equality ... for everyone?. Women in the fight for social advancement 1700-1918”, which will be held on November 20 and 21. The topic of the conference refers to the flagship postulates of the French Revolution and its democratic aspirations changing the world order. These demands are also valid today - on the hundredth anniversary of the end of the First World War, what largely contributed to the fuller implementation of Enlightenment slogans, through to the electoral rights granted to women and the introduction of gender equality in most European countries. The organizers of the conference will focus on the «long ages» of the eighteenth and nineteenth century. It was the time of political, economic and, above all, mentality transformations that preceded and enabled the twentieth century breakthrough.

Rzeszów University of Technology to hold Open Days and IV Night Meetings with Science

2018-11-12

On Thursday and Friday, 22 and 23 November 2018, the Rzeszów University of Technology will host Open Days and the 4th Night Meeting with Science. On the first day, representatives of all departments of the Rzeszów University of Technology as well as students from scientific circles and student organizations will participate in the physics and chemistry shows, listen to lectures prepared by university staff and students. On November 23, Rzeszów University of Technology organizes the 4th Night Meeting with Science. The event will last from 5 pm to 10 pm. The main event

will provide the opportunity to visit the Rzeszów University of Technology laboratories, which usually are available only to the students and the employees.

Krakow University of Technology to hold Career and Mobility Days

2018-11-12

Krakow University of Technology launches Career and Mobility Days as part of the Project Scientist. The offer is addressed to young scientists. The event will take place on November 20-21 2018 at the Krakow University of Technology. On the first day, young researchers will be able to meet representatives of agencies and research funding organizations who will present the offer of Polish and international grants for young researchers. The second day will be devoted entirely to training and workshops on writing effective scientific publications, relations and conducting negotiations in the science and business sectors or in the career planning.

DIAGMOL 2018 to hold conference „Molecular biology in diagnostics of infectious diseases and biotechnology”

2018-11-12

The Warsaw University of Life Sciences (SGGW) together with the Section of Physiology and Pathology of the Polish Horse of the Society of Veterinary Sciences organize on November 17, 2018 the conference „Molecular biology in diagnostics of infectious diseases and biotechnology” DIAGMOL 2018. The aim of the conference is to promote the achievements of molecular biology and biotechnology in the diagnosis of infectious diseases. The event is also aimed at spreading the latest knowledge on infectious agents, pathogenesis of infectious diseases and the participation of non-specific and specific immune mechanisms. Particularly important part of the conference is the «Young Scientists» session, during which the employees of science in various research centers in Poland will present their works related to the subject of the conference.

Conference in Wroclaw about WWI

2018-11-12

The Historical Institute of the University of Wroclaw and a branch of the Institute of National Remembrance in Wroclaw invite participants to the international scientific conference „The Breakdown of Empires. Shaping the post-war order in Central and Eastern Europe in 1918-1923 „, which will take place on November 22 and 23. The conference will be dedicated to the turbulent times after the First World War - crumbling empires, the new states and struggles for their borders. The event is open to all participants, the languages of the conference are: Polish, Ukrainian, English. The starting point for the discussion will be the hundredth anniversary of the end of World War I and the regaining of independence by Poland. The organizers want to highlight the development of the eastern border of the Poland and the state-forming processes of nations formed on the ruins of the Russian Empire and Austria-Hungary. More: <https://upadekimperiow19181923.wordpress.com/>

Dick Helm at the University of Gdańsk to hold a lecture The leadership is about ...

2018-11-12

The Center for Physical Education and Sport of the University of Gdańsk invites participants to an open lecture by Dick Helm - a graduate of the prestigious Wheaton College, teacher, lecturer and coach in NBA teams. The lecture „The leadership is about ...” will take place on November 16. Dick Helm graduated from Wheaton College in 1955. Until the mid-1980s, he served as a trainer and sports director at Judson College and at Wheaton College. After completing his university-level work, he was offered a job as a scout trainer for the Seattle Supersonics NBA team. For the next 15 years, Helm served as the first assistant to Seattle Supersonics, Cleveland Cavaliers, Atlanta Hawks, Toronto Raptors and New York Knicks. His career in the NBA enabled him to conduct coaching workshops and give lectures on coaching aspect, leadership, personal development, management and motivation.

Silesian University of Technology to discuss on autonomous combat systems

2018-11-12

Center for Advanced Technologies of Security and Defense of the Silesian University of Technology and Zakłady Mechaniczne Tarnów S.A. invite participants to the symposium „Autonomous combat systems - the future or the present?” The Symposium will take place on November 15 in the Bureau of the Education and Congress Center of the Silesian University of Technology at Konarskiego 18B in Gliwice. During the symposium, 12 papers will be delivered. Speakers include representatives of the Ministry of National Defense, industry and scientists from the Silesian University of Technology, AGH University of Science and Technology in Kraków, Military University of Technology in Warsaw and the Pedagogical University in Krakow. The organizers are planning to discuss the ethical and political challenges related to the use of autonomous combat systems and the presentation of funding opportunities for scientific and research defense projects from the European Union funds.

III Real Education Forum in Lublin

2018-11-13

On November 16-17 the Competence Development Office of the Maria Curie Skłodowska University (UMCS) in Lublin, together with the Center for the Development of Real Schools at the Bednarska Real School, organizes the 3rd Real Education Forum “Let’s school the world!” This year’s forum is organized under the slogan: How today’s education deals with the challenges of the real world. The meeting is designed for people interested in broadly understood education and adapting schools to the realities of the modern world. The III Real Education Forum is time for meetings with enthusiasts of youth work, presentations of innovative, alternative educational methods, discussions and workshops. The invitation to the Third Real Education Forum is directed in particular to teachers, parents, students, university staff involved in the development of education as well as employers and local government.

Feast of Exact Sciences - Days of Prof. Antoni Hoborski to be held at the AGH University of Science and Technology

2018-11-13

From 14 to 18 November, the AGH University of Science and Technology will hold the Feast of Exact Sciences - Days of Prof. Antoni Hoborski. Since 2017, this event is a statutory university ceremony, the aim of which is to popularize the development of exact sciences and awareness of their proper teaching. The aim of the Feast of Sciences is to pay attention to the problems associated with teaching basic subjects. It is also a commemoration of the Professor Antoni Maria Emilian Hoborski - an outstanding Polish mathematician, the first rector of the Mining Academy and dean of the Mining Faculty. The event will include the Conference of Students' Scientific Clubs of Prof. Antoni Hoborski and a scientific conference presenting selected achievements of the Faculty of Computer Science, Electronics and Telecommunications, Faculty of Materials Science and Ceramics, Faculty of Power and Fuels, Faculty of Physics and Applied Computer Science, Faculty of Applied Mathematics and AGH University of Science and Technology.

Prof. Herta Flor to hold a lecture at the University of Wrocław

2018-11-13

The University of Wrocław and Academia Europaea Wrocław Knowledge Hub invite participants to the lecture of Prof. Herta Flor „From acute to chronic pain: the role of learning and cerebral plasticity”. Professor Flor, a world-renown specialist in the field of neuropsychological research on chronic pain, will talk about short-term and chronic pain, its impact on the body and quality of life, and how neuropsychology can help in coping with suffering. Herta Flor is a professor of neuropsychology at the University of Heidelberg and the director of the Cognitive and Clinical Neuroscience at the Central Institute of Mental Health in Mannheim. She also deals with the process of learning and memorizing in the context of neurology, treatment of psychological disorders such as depression, anxiety or substance abuse and neuropsychological rehabilitation.

Archaeologists from the University of Warsaw discovered in Kuwait the ruins of the temple from 7,000 years ago

2018-11-14

Archaeologists from the University of Warsaw (UW) discovered the ruins of the oldest Persian temple. The building is 7,000 years old and was built in Kuwait, in the Al-Subijah desert. It was located in the prehistoric settlement from the end of the 6th century BC. It was surrounded by a circular wall, which highlights its religious character. Researchers from the Center of Mediterranean Archeology of the University of Warsaw working under the supervision of Prof. Piotr Bieliński finished their season of the Kuwaiti-Polish Archaeological Mission. The ruins of the Persian temple are not the only discovery of the Polish-Kuwaiti team. They found large fragments of the square surrounded from three sides by buildings, located in the center of the settlement. This is an example of quite advanced architecture, unknown to scientists before.

Institute of Geophysics of the Polish Academy of Sciences to manage a consortium dealing with observation system of the European plate

2018-11-14

The Institute of Geophysics of the Polish Academy of Sciences has been selected to manage the European consortium and integrate research infrastructures in the EPOS-ERIC (European Plate Observing System) in the field of geophysical threats accompanying the exploitation of Earth's natural resources. EPOS is an infrastructural scientific project that allows to understand earthquakes, volcanoes eruptions, tsunamis and other threats - including those associated with the exploitation of deposits with potentially serious impact on the environment. The European Commission accepted the transformation of the program into a European consortium EPOS-ERIC, which on November 8, 2018 in Rome, officially began its operations. EPOS ERIC is the 20th European Research Consortium and the fifth in the field of environmental sciences.

9th European Forum of Marketing of Scientific and Research Institutions in Warsaw

2018-11-14

The Institute of Aviation invites participants in marketing science to participate in the 9th European Forum of Marketing of Scientific and Research Institutions, which will be held on November 15-16, 2018. The aim of the Forum is to present the latest research results and practical solutions used by scientific and research institutions, institutes, universities and technology parks from all over Europe. The forum will be an opportunity to show visitors from Europe the achievements of Polish scientists, marketing specialists and practitioners in the field of promoting science and innovation. The event will be held under the patronage of the Ministry of Science and Higher Education, and will take place in the Institute of Aviation in Warsaw at al. Krakowska 110/114. „Woman in the 21st century - between liberalism and conservatism”

2018-11-14

The Department of Ethics and Social Philosophy of the Department of Philosophy at the University of Economics in Krakow organizes on 22-23 November 2018 a scientific conference „Woman in the XXI century - between liberalism and conservatism”. The organizers want to start the debate about the place and social role of a modern woman against the background of significant trends in political thought: liberalism and conservatism. Both trends appear as theories having fundamental importance for shaping the current position of women. The discussion during the conference is to focus on the following issues: the impact of mainstream political philosophy on the way of thinking about a woman; conservative and liberal vision of a woman; What is feminism? (definitions, trends, polemics); What is the difficulty with social understanding and assimilation of the feminist tradition?; What do we mean by discrimination against women?

University of Silesia to hold symposium on prosecuting offenses against the environment at the University of Silesia

2018-11-14

The Faculty of Law and Administration of the University of Silesia invites participants on 26th November to a scientific and training symposium on the subject of prosecuting crimes and offenses against the environment. This is another initiative of the scientific circles of Internal Security, Criminal Law, Environmental Protection Law, Law of Protection of Animal Rights and the Foundation of the Faculty of Law and Administration of the University of Silesia *Facultas Iuridica*. The representatives of the National School of Judiciary and Prosecutor's Office, the State Hunting Guard, District Directorate of State Forests, Veterinary Inspection, municipal guards, representatives of the prosecutor's office and common courts are invited to present the conference topics: incineration outside the incineration plant; illegal logging and theft; illegal fishing; poaching; crimes against animals and ecoterrorism. More: www.wpia.us.edu.pl

Students can become soldiers

2018-11-15

The Command 4 of the Warmian-Masurian Territorial Defense Brigade invites students of the University of Warmia and Mazury (UWM) in Olsztyn to undergo a basic military training, which will take place in February 2019, during the winter break. Dr Wiesław Łach, dean of military studies at the Olsztyn university emphasizes that the program is addressed to all UWM students, «seeking additional opportunities to improve their qualifications and wanting to test themselves in difficult conditions». Both graduates of the Legia Akademicka as well as students who did not deal with military service can apply for the 4th Warmian-Masurian Territorial Defense Brigade.

Center of Modern Technologies of the University of Toruń allowed to operate commercially

2018-11-15

The interdisciplinary Center for Modern Technologies of the Nicolaus Copernicus University in Toruń was allowed for the economic use of research infrastructure. It means the possibility of conducting commercial activities in the field of basic research, industrial research and development. Non-profit research activities were launched at the Center in 2013. Due to the fact that the construction of the unit was co-financed from the European Regional Development Fund, commercial works have so far been excluded due to the lack of appropriate regulations. Now the Center will be able to commercially use its infrastructure to 20 percent of its total annual performance. It will be able to offer paid research services and to rent its laboratories for research and development works financed by R&D institutions, business and individuals.

University of Silesia to cooperate with the Institute of Organic Industry

2018-11-15

University of Silesia in Katowice signed an agreement of cooperation with the Institute of Organic Industry - Branch in Pszczyna (IPO). The document was signed by the Vice-Rector for international and national cooperation, Dr Tomasz Pietrzykowski and the head of the IPO branch Dr. Przemysław Fochtmann. The cooperation assumes the implementation of joint projects, promotion of entrepreneurship in the academic environment, supporting the projects of university students, organization of student internships for full-time and part-time students, and organization of internships for the best students and graduates of the University. Representatives of the Institute will participate in consultations regarding education programs and diploma theses at the university. The purpose of the contract is also to animate and create cooperation networks to use the scientific and human potential of both organiza-

tions. The Institute will also help in the expansion of the University's laboratory infrastructure.

History of Schuman Plan for Europe

2018-11-16

On Tuesday, November 20, 2018 the Warsaw School of Economics will hold a conference with Professor Stanisław Gebhardt, entitled „Processes and conditions for the unification of Europe under the direction of Robert Schuman”. During the event, Prof. Stanisław Gebhardt will share his reflections on Robert Schuman and the processes of European unification after World War II, the creation of the Coal and Steel Community and the European Economic Community, as well as the European Youth Movement organized by Robert Schuman. Professor Gebhardt is currently the president of the Ignacy Paderewski Foundation for the Restoration of Democracy dealing with promoting the ideas of famous Poles.

Conference „(Dis)abled people on the labor market”

2018-11-16

On November 21, the Medical University of Lodz together with the Łódź Akademicka Foundation are organizing a conference entitled „(Dis)abled people in the Labor Market”, which will deal with new technologies and digital exclusion of people with disabilities. The aim of the conference is to enable people with disabilities to meet employees directly and to provide them with activities that will increase their chances of finding the right job, apprenticeship or internship. During the event, participants will listen to a lecture delivered by Prof. Paweł Strumiłło from the Electronics Institute of the Lodz University of Technology, entitled «Electronic systems for supporting the disabled people- now and tomorrow» and learn about the applications of Lodz students dedicated to disabled people.

Catholic University of Lublin to hold Conference for Spanish language teachers

2018-11-16

Foreign Languages Center of the Catholic University of Lublin (KUL), Spanish Language School „Dialogo” and the Development Foundation of the Catholic University of Lublin are organizing a conference for Spanish language teachers Expertos ELE on November 17-18, 2018. The goal of the event is to promote Spanish and to present prototype solutions supporting the didactic process in the field of foreign language teaching. During the conference, participants will take part in workshops conducted by experts from Spain, professionally active Polish teachers and representatives of scientific publishing houses. More: <http://www.expertosele.com/>

Deputy Prime Minister explains the „Polish Returns” program

2018-11-16

The Office of the Prime Minister hold a press conference devoted to the „Polish Returns” program. In addition to Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin, the director of the National Academic Exchange Agency (NAWA), Łukasz Wojdyga and Dr Łukasz Bratasz, a scientist returning from Yale University participated in the conference. - We must create conditions for as many scientists as possible who emigrated to the best universities around the world, and who would like to come back to Poland, to have the right conditions to conduct world-class research and have the conditions to educate their successors, our future intellectual and scientific elites - said Jarosław Gowin. Within the program «Polish Returns» run by NAWA, 22 Polish scientists will return to Poland. One of them is Dr Łukasz Bratasz, who states that the research on national heritage is conducted in Poland on a global level and Poland can boldly compete with the best research centers in the world. The amount of 40 million PLN was allocated to the Polish Returns program.

School of Law and Chinese Culture at the University of Silesia

2018-11-16

Until November 30, students can sign up for the School of Law and Culture of China at the Faculty of Law and Administration of the University of Silesia. The project is carried out in cooperation with two renowned Chinese universities: the Beijing Foreign Studies University and the Northeastern University in Shenyang. The program will cover issues related to business contacts and Chinese law in the field of starting and conducting business in China - administrative procedures, labor law, elements of criminal law, principles of concluding and performing contracts. Participants will also learn about the language, traditions and customs of China. Each session will be conducted by specialists - professors from partner Chinese universities. The school is a venture addressed to students and entrepreneurs interested in cooperation with China and to people fascinated with the culture of this country. Classes will begin in January 2019. University of Szczecin to hold conference on unconventional power engineering

2018-11-16

The Faculty of Earth Sciences of the University of Szczecin together with the Marshal's Office of the Westpomeranian Region invite participants to the conference „Unconventional energy in Western Pomerania - potential, problems, perspectives”, which will be held on November 20th. The main topics of the conference are energy security, energy planning in local governments, environmental protection, use of renewable energy sources and social acceptance for RES investments. The participants will also learn about the principles of operation of local energy clusters. During the conference participants will be able to see the research on the use of diatoms for biofuels production, which have been conducted for years at the Faculty of Earth Sciences. One of the conference panels will be devoted to legal issues

- including spatial planning and regional energy policy. More: <http://usz.edu.pl/dla-srodowiska-i-dla-energii/>

3rd International Latin American Conference in Lublin

2018-11-19

The Faculty of Political Science of the Maria Curie-Skłodowska University in Lublin, the Polish Academy of Sciences, the Branch in Lublin and the editorial staff of the scientific journal „Anuario Latinoamericano - Ciencias Políticas y Relaciones Internacionales” are organizing the III International Latin American Conference on November, 21 and 22. The event is an interdisciplinary forum and international debate on Latin America and the Caribbean, during which the participants will present the results of their research on the conditions, role and change of the region's position in international relations in the 21st century. The event will be attended by political scientists from Polish and foreign research centers and representatives of the diplomatic corps of Latin American countries in Poland. During plenary sessions, lectures in Spanish will be given by guests from Argentina, Brazil, Colombia, Mexico, the Czech Republic, Spain, Lithuania, Germany and the United Kingdom. 4th Conference for leaders of the university management LUMEN 2018

2018-11-19

Practical aspects of the implementation of the new Act on Science and Higher Education, including change of universities management, will be the topic of the fourth Conference for the leaders of the university management LUMEN 2018, which will be held on November 27, 2018 in Warsaw. The conference is supported by the Ministry of Science and Higher Education, the Polish Rectors Foundation, the Main Council of Science and Higher Education, the Conference of Rectors of Academic Schools in Poland, the Polish Accreditation Committee, and the Patent Office of the Republic of Poland. The organizers proposed two themes: Strategic Management, which will be a debate on practical aspects of the implementation of the Act and will take place with the participation of eminent academic representatives and IT Management addressed to people involved in computerization of universities - IT directors, administrators, system users, rectors and vice-rectors for informatization. More: <http://www.lumen.edu.pl/>

Technical University of Lodz to hold a conference on the world of consumption

2018-11-19

Dr. Joanna Mysona-Byrska, professor of the Papal University in Krakow will deliver a lecture „Attempt to escape from the world of consumption” within the meeting organized by the Faculty of Management and Production Engineering of the Lodz University of Technology as part of the series of Open Scientific Seminars „Man-Business-Technologies”. During the meeting, Dr Mysona Byrska will bring closer the characteristics of the world of consumption, its rules and principles, impact on society and the political system. She will attempt to answer the questions whether people may not be a consumer and whether it is possible to escape from the world of consumption. The meeting is scheduled for 22 November 2018 at 4 pm on the campus of

the Lodz University of Technology at ul. Wólczańska 215, in building B-9, room 418.

President of Poland met the creators of Polish innovative projects

2018-11-19

The President of Poland Andrzej Duda and the Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin met the creators of Polish innovation projects in the Congress 590 in Jasionka near Rzeszów. The Congress 590 is the largest event in the Podkarpacie Region dedicated to the science and business. As part of the congress, Deputy Prime Minister Jarosław Gowin participated in the debate entitled «Science condemned to business» regarding cooperation between science and business. Experts discussed issues related to smart city, venture capital market in Poland, foreign investments, cyber security and the armaments industry. Participants of the event met the representatives of the National Center for Research and Development, the Polish Center for Technology Development, the National Academic Exchange Agency, the National Contact Point for Research Programs of the European Union, the Information Processing Center and entrepreneurs who have already benefited from funds to support development and innovation, including European funds.

Polish researchers become laureates of L'Oréal-UNESCO scholarships for women in science

2018-11-19

Six Polish researchers received this year's L'Oréal-UNESCO scholarships for women in science. The Polish Committee for UNESCO, the Ministry of Science and Higher Education and the Polish Academy of Sciences are the partners of the „L'Oréal Poland for Women and Science” program. Scholarships in the amount of PLN 35,000 in the post PhD category were received by: Joanna Gościańska from the Faculty of Chemistry, Adam Mickiewicz University in Poznań, Dr. Paulina Kasperkiewicz-Wasilewska from

the Faculty of Chemistry of the Wrocław University of Technology and Dr. Anna Muszewska from the Institute of Biochemistry and Biophysics of the Polish Academy of Sciences. Scholarships in the amount of 30 thousand in the PhD category were received by Beata Małachowska from the Medical University of Lodz and Anna Piotrowska-Murzyn from the Institute of Pharmacology of the Polish Academy of Sciences in Kraków. Scholarship in the MA category in the amount of 20 thousand PLN was received by Aleksandra Synowiec, a student at the Faculty of Biochemistry, Biophysics and Biotechnology of the Jagiellonian University in Krakow.

Center for Didactics and Medical Simulation in Katowice to hold Scientific and business brunch

2018-11-19

SPIN-US Sp. z o.o, a special-purpose company of the University of Silesia, and the Technology Transfer Center of the Silesian Medical University invite participants to the Center for Didactics and Medical Simulation in Katowice on November 28 for the scientific and business brunch „Billion in patient 5”. The meeting will provide the opportunity to present solutions in the areas of medicine and pharmacy and Life Quality Technology in terms of their use in the economy, identify projects for the future commercialization of research results and create new relationships that can become the basis for implementation of research and development projects. The presented innovations include minimally invasive treatments in the field of aesthetic medicine; a biodegradable dressing nanofiber; a new approach in health care of the youngest patients; 3D technology in modern anatomy education and modern methods of polymer synthesis. University of Opole to launch Virtual Academy of Astronomy

2018-11-19

The University of Opole for the sixth time launched the Virtual Academy of Astronomy. The inaugural lecture „Why is it worth observing the sky” was given by Grzegorz Sęk from the Youth Astronomical Observatory in Niepołomice. Virtual Academy of Astronomy supports the work of schools in the implementation of additional classes on astronomy and physics. Scholars of the Opole University conduct lectures, workshops and astronomical observations. Classes are held at school or at the University of Opole. During the classes students acquire competences in the field of computer science, physics and astronomy. Joint observations and team work allow to mobilize students to cooperate with colleagues. An additional motivation is the «Discoverer of the Worlds» competition, organized during the school year, while young people can compete in the following areas: literature, art and photography, and in the most prestigious category - the best research work.

University of Wrocław organizes the exchange of scientific circles

2018-11-19

Students' scientific circles at the University of Wrocław presented their activities during the Scientific Circles Exchange. The event was organized for students who would like to get involved in additional activities, and for students of Lower Silesian schools planning to study at the University of Wrocław. 40 scientific circles participated in the event. The «Przybysz» Circle of Biotechnologists presented the basic techniques of genetic engineering and the Judaism experts from the «Sznirele Perele» circle showed how to write their name in Hebrew and Yiddish. At their stand, the guests could listen to the latest hits of Israeli music performers, as well as foretell future with aid of the Talmud. The Scientific Circle of Military Historians showed historic military equipment, and the Ancient Dance Group presented their skills through the renaissance, baroque and English counter-dance dances.

Rector of the University of Warsaw to award best teachers

2018-11-20

The Rector of the University of Warsaw on November 21, 2018 will give didactic awards to the best academic teachers working at the Warsaw university. The didactic award of the Rector was established in 2015, and a year later it was given for the first time. It is awarded in three areas: natural and exact sciences, social sciences and humanities. This year, the award will be received by Dr Danuta Solecka from the Institute of Experimental Biology and Biotechnology of Plants in the field of natural and exact sciences; Dr Agata Komendant-Brodowska from the Institute of Sociology in the field of social sciences, and Dr. Filip Kawczyński, from the Institute of Philosophy, who will receive a didactic award in the area of humanities.

Kielce Energetic Science Center celebrates 3rd anniversary

2018-11-20

On the last Saturday, November 17, 2018, Energetic Science Center, located in the Kielce Technology Park, celebrated its 3rd anniversary. Participants of this event learned the magic of the chemistry and how to warm up without burning a fire. The visitors also had the opportunity to make experiments on prepared interactive stands. Energetic Science Center was launched on November 18, 2015. It covers an area of 500 square meters, and includes the exhibition «Energy», laboratory «Power Generator», as well as a 2D / 3D cinema. Also, the Energy Garden of Experiences is located next to the building of the Center.

Professor Michael Piechowski visiting the State Higher Vocational School in Płock

2018-11-20

Professor Michael Piechowski, an American specialist in transpersonal psychology, will be the guest of the Faculty of Humanities and Social Sciences of the State Higher Vocational School in Płock this Thursday, November 22. Professor Piechowski specializes in the study of «levels of development of talented and talented people, self-fulfillment, moral, emotional and spiritual development of the individual and increased mental excitability belonging to the development potential». He was a lecturer at the University of Illinois, Northwestern University and Northland College. In Płock, he will give a lecture for students entitled «Theory of Positive Disintegration. Examples of a high level of development» and will conduct a seminar for university employees «Talent development and the development of a person».

Prof. John-Dylan Haynes to deliver lecture as part of the project ,Great Questions in Krakow'

2018-11-20

Professor John-Dylan Haynes, director of the Berlin Center for Advanced Neuroimaging, will deliver an open lecture on free brain imaging on November 22. The event is part of a joint project of the Center for Copernicus of Interdisciplinary Studies, the Jagiellonian University and the city of Krakow entitled „Great Questions in Krakow”. This time the listeners will learn the answers to the questions: What effect do our cognitive processes have on free will? How does the brain code our experiences and thoughts? Can neuro-scans illustrate brain activities such as decision making, remembering or imagining? Does modern science allow us to predict what decisions we will make? The lecture will be delivered on November 22, 2018 at 18.30 at the Faculty of Law and Administration of the Jagiellonian University, ul. Krupnicza 33a in Krakow.

Chemist from the Wrocław University of Technology receives prestigious scholarship

2018-11-20

Dr Paulina Kasperkiewicz-Wasilewska from the Faculty of Chemistry at the Wrocław University of Technology became a scholarship holder of the L'Oréal-UNESCO program for Women and Science for conducting advanced research in the field of life sciences. The chemist is involved in the determination of activity and imaging of proteolytic enzymes - an important group of enzymes controlling biochemical processes occurring in living cells and leading to removal of abnormal cancer cells. The results of her research have recently been published in the prestigious Journal of the American Chemical Society. The «L'Oréal Poland for Women and Science» program is aimed at promoting scientific achievements and encouraging the continuation of scientific work. Its partners are the Polish Committee for UNESCO, the Ministry of Science and Higher Education and the Polish Academy of Sciences. The winners are awarded a scholarship to cover the costs of traveling to any chosen scientific conference in Europe.

Students of Białystok University of Technology to participate at IMAV 2018 competition in Australia

2018-11-21

Until November 23, 2018 students of the Białystok University of Technology were taking part in the International Micro Air Vehicle Competition and Conference in Melbourne. Students from the Robotic Science Club and the Mechatronix Scientific Circle of the Białystok University flew to Australia for IMAV 2018 to present their four drones. Students' drones are original, independently constructed four-rotors vehicles with on-board computers and own software. The drone competition includes the creation of a map of the area, finding a wounded firefighter in the forest, detecting metal hidden underground and locating the position of the simulated threat.

Scientific conference about the beginning of the Neolithic period in Poland

2018-11-21

The Institute of Archeology of the Maria Curie Skłodowska University (UMCS) together with the State Archaeological Museum in Warsaw and the Institute of Archeology and Ethnology of the Polish Academy of Sciences are organizing a scientific conference on November 22, 2018 entitled „The Neolithic Beginnings in Poland.” The conference will be held on the occasion of the centenary of the birth of Dr Jan Kowalczyk - an outstanding archaeologist, an expert on Neolithic issues, a researcher in the prehistory of the Lublin region and a long-time scholar of the UMCS Chair of Archeology. Papers at the conference will be given by eminent Polish stone age researchers: Prof. Stefan K. Kozłowski (Cardinal Stefan Wyszyński University in Warsaw), Prof. Sławomir Kadrow (University of Rzeszów), Prof. Marzena Szymt and Prof. Aleksander Koško (Adam Mickiewicz University in Poznań) and Prof. Stanisław Kukawka (Nicolaus Copernicus University in Toruń).

Professor Grzegorz Kołodko becomes Honorary Professor of the University of Corvinus in Budapest

2018-11-21

The Senate of the University of Corvinus in Budapest awarded Prof. Grzegorz Kołodko the title of Honorary Professor for outstanding achievements and scientific works in the field of economics and economic policy. Grzegorz Kołodko is a professor of economics and a lecturer at Kozłowski University in Warsaw. In the years 1994-1997 and 2002-2003 he was the Minister of Finance and the Vice-President of the Council of Ministers. He has published many books and publications on economics and politics. He is considered to be the author of the theoretical trend of economics called New Pragmatism. He is a member of the European Academy of Science, Arts and Letters and the Scientific Council of the Foundation for European Progressive Studies.

XV Polish-German conference „Cross-border power industry of Poland and Germany - the world of tomorrow's energy”

2018-11-21

The Department of the University of Zielona Góra in Sulechów, Lubuskie Association for Energy Development, Chamber of Power Industry and Environmental Protection, Brandenburg State, E.DIS AG and Chamber of Commerce of Eastern Brandenburg invite participants to the 15th Polish-German conference on 29 and 30 November “The cross-border power industry of Poland and Germany - the world of tomorrow's energy”. On the first day of the conference, the topics of the papers include current challenges of energy recovery in the state of Brandenburg and the energy and climate policy of the European Union, challenges for regions. On the second day, lectures on energy efficiency are planned: «Breakthrough innovations in power engineering including cold production» «New support mechanism for high-efficiency cogeneration in Poland» and «Distributed heat and electricity distribution - Bad Belzig, as electricity and heat island». More: <http://www.pnke.pl/>

University of Silesia Conference to hold conference „Business Constitution - new experience”

2018-11-21

The Scientific Circle of Competition Law and Regulations IUS PUBLICUM of the University of Silesia together with the Polish Economic Society, the Institute of Economic Law and the Polish Foundation for Competition Law IUS PUBLICUM are inviting participants to the national scientific conference „Business Constitution - a new experience”. The conference will be an opportunity to analyze new regulations in the field of undertaking and conducting economic activities - so-called Business Constitution, which in the opinion of its creators is supposed to be appreciated by entrepreneurs. It should facilitate to start a business and change the attitude of public administration bodies toward entrepreneurs. The conference will take place on November 27 at the Faculty of Law and Administration of the University of Silesia in Katowice, at ul. Bankowa 11B. More: <http://konferencja.iptg.pl/>

Joint competition of the Wrocław University of Technology and The Bank of New York Mellon

2018-11-21

Jonas Al-Hadad, PhD student at the Faculty of Mathematics, won joint the Wrocław University of Technology and The Bank of New York Mellon competition for the best master's thesis in applied mathematics. The competition is the first effect of the cooperation agreement that the bank and the university signed in 2017. The jury consisted of representatives of the university, associated with the Hugo Steinhaus Center and representatives of the New York bank, who evaluated the submitted works in terms of the originality of the idea, mathematical correctness and the possibility of applying the solution proposed by the students in practice. The main prize was received by Jonas Al-Hadad, a

graduate of Applied Mathematics, for «Pricing of American options: single and double continuation region». The laureate is currently a PhD student at the Faculty of Mathematics and participates in the project «InterDok - Interdisciplinary Programs of PhD Studies at the Wrocław University of Technology». More: <http://pwr.edu.pl/uczelnia/aktualnosci/praca-doktoranta-pwr-wyrozniona-11030.html>

Summit on sustainable development of economy and economy based on values in Krakow

2018-11-22

Representatives of administration, science, business and art from over 20 countries met in Krakow at the third Open Eyes Economy Summit. Participants discussed sustainable development of economy and value-based economy. As Deputy Prime Minister Jarosław Gowin said in the opening speech of the congress, «the conviction that the market economy can only be developed within the ecosystem of values is guided by all my actions. This synergy between the open market and values is also guided by the Open Eyes Economy Summit.» Environmental protection is an example of values that should be particularly protected. The key to this is the statement of the common good, of which the environment is an example. As regards the responsibility for them, free market must recognize the supremacy of superior values – pointed out the Deputy Prime Minister.

Researchers from Lublin awarded at Nuremberg iENA 2018

2018-11-22

In Nuremberg, the 70th International Fair „Ideas, Inventions, New Products” iENA 2018 was held. It is one of the largest European exhibitions of this type. Its awards were received also by the representative of the Maria Curie Skłodowska University in Lublin Dr. Aneta Ptaszyńska with her team. -Our scientists presented at the Fair solutions intended to treat bees disease - nosemosis. The jury awarded them a

silver medal for developing a method of treating a fungal infection and supporting the immune system by enriching the winter diet of insects with Lactobacillus bacteria - says Katarzyna Skąłicka from the Press Office of the Maria Curie Skłodowska University in Lublin.

3rd Gala of University Laurels

2018-11-22

The Forum of Polish Universities and the Students' Self-Government of the Jagiellonian University (Jagiellonian University) in Krakow invite participants to the Auditorium Maximum of the Jagiellonian University for the 3rd Gala of University Laurels on 30 November. The idea of University Laurels is to indicate initiatives, people and organizations that support students' activities. The prizes will be awarded in the following categories: university science project, university didactic project, university cultural project, university sports project, perspective university, student mentor. University Laurels Gala will take place as part of the Congress of the Polish Universities Forum in Krakow - an autonomous agreement of student self-governments associated in the Conference of Rectors of Polish Universities.

Professor Saloni to hold a lecture as part of the „Master Lectures” at the University of Białystok

2018-11-22

Professor Zygmunt Saloni will be the guest of the next meeting from the series „Lectures of Masters” at the Faculty of Philology of the University of Białystok. On November 22, 2018 at 15:00 he will tell the listeners about a century of independence and „fixed” Polish spelling. Professor Zygmunt Saloni is an outstanding linguist, honorary member of the Polish Linguistic Society and an honorary member of the Society of Polish Language Lovers. His research interests are focused on Polish grammar and lexicography. He is the author or co-author of many fundamental and repeated works: «Syntactic features of the Polish verb», «Introduction to Polish conjugation», «Polish verb: variation, dictionary», academic textbook «Syntax of contemporary Polish language» and a grammar dictionary of the Polish language.

Exhibition devoted to the achievements of Polish science in Prague

2018-11-22

The Ministry of Science and Higher Education, the Polish Science Foundation and the Polish Cultural Institute in Prague are the organizers of the „Poland is science” exhibition held in the Czech capital city. The exhibition at the National Technical Library in Prague provides a multimedia presentation of the 25 greatest achievements of Polish science in the last 27 years in chemistry, physics, medicine, nanotechnology and archaeology. The achievements presented at the exhibition include graphene, cochlear implant and the discovery of planets outside the Solar System, as well as archaeological successes in Egypt. Research on gravitational waves is also presented.

EURAXESS workshops - a portal for mobile researchers offering grants, scholarships, and jobs

2018-11-22

Regional Center for Innovation and Technology Transfer of the West Pomeranian University of Technology in Szczecin (RCIiTT) invites participants to the „EURAXESS - mobile researchers’ portal. Grants, scholarships, jobs” Participants will learn how the portal works, how to search for job offers and grants for researchers, as well as set up their own account to be able to communicate with the scientific world and participate in events addressed to researchers. During the meeting, career planning tools offered by the portal as well as rules for creating and publishing a scientific CV will also be presented. The workshop will take place on November 29 at the RCIiTT in Szczecin at Jagiellońska 20-21. Due to the interactive form of classes, it is necessary for each participant to bring in their own mobile computer. The deadline for applications is Monday, November 26.

Scientists from Bydgoszcz and Toruń receive awards of Inova-Croatia 2018 Fair

2018-11-22

The scientists from Bydgoszcz and Toruń won prizes at Inova-Croatia 2018 Fair. More than 800 inventions from more than 30 countries competed for the medals in Zagreb. The gold medal in the category Best invention for special needs and the special prize of the Iran delegation were received by the scientists from the University of Kazimierz the Great, Collegium Medicum in Bydgoszcz and the Nicolaus Copernicus University in Toruń for the invention «3D printed passive exoskeleton for children with weakness in upper limbs». International Invention Show Inova Budi Uzor are considered the third oldest exhibition of inventions in the world. This year’s Zagreb International Fair was visited by inventors, visionaries and scientists, entrepreneurs and representatives of commercial research centers and over 100,000 visitors from around the world.

Toruń coin designs winning world awards

2018-11-22

Two coins designed by Dr. Sebastian Mikołajczak from the Department of Sculpture of the Fine Arts Department of the Nicolaus Copernicus University in Toruń have been awarded in international competitions. A silver coin with the image of Nicolaus Copernicus, which inaugurated the series of the National Bank of Poland, «Great Polish Economists,» won the main prize and the title «Coins of the Year 2018» in the international competition «Coin Constellation - 2018». The coin depicts the image of Nicolaus Copernicus and a fragment of the original manuscript of the dissertation about the minting of a coin from the collection of the National Museum in Krakow. Another work of Dr. Mikołajczak - a project of a silver collector’s coin with a denomination of 15 euros, dedicated to the 150th anniversary of Jaan Tõnisson” birth, won the competition of the Central Bank of Estonia. The silver coin depicts the image of a statesman, politician and lawyer, two-time president and prime minister of Estonia, Jaan Tõnisson. More: <https://www.umk.pl/wiadomosci/?id=25782>

Researchers and students from outside the European Union to receive permission to stay in Poland for up to 5 years

2018-11-23

The Polish government has submitted to the Sejm a bill amending the Act on foreigners. The new regulations will allow researchers and students from countries not belonging to the European Union to obtain a permanent residence permit in Poland for up to 5 years. The draft law adapts the Polish law to the EU directive on the conditions of entry and stay of third-country nationals for the purpose of conducting research, studies, training, volunteering, exchange programs for schoolchildren or educational projects and taking up an au pair work. The new regulations will allow foreigners involved in education to stay in Poland for a period of 5 years.

Ministry of Science allocated PLN 88 million to reconstruct the new infrastructure of the Polish Antarctic Station

2018-11-23

The Ministry of Science and Higher Education has allocated nearly PLN 88 million for the reconstruction of the infrastructure of the Henryk Arctowski Polish Antarctic Station. including the construction of a new main building. - It is fair to say that the Polish Antarctic Station is our flagship in this region of the world, an unofficial embassy of Poland in Antarctica - said Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education. The head of the Ministry of Science emphasized, that the most important factors for Poland are the extensive research possibilities that the station provides for Polish scientists. Poland belongs to the elite group of 20 countries with year-round research stations in the Antarctic region. The monitored and collected research data since 1977 are used by Polish and foreign scientific institutions.

1st Mining and Metallurgy Beer Festival in Krakow

2018-11-23

The AGH University of Science and Technology (AGH) in Krakow, the ACADEMICA AGH UST Students and Graduates Foundation and the Studio Club are organizing the First Mining and Metallurgy Beer Festival on November 24th. The event is addressed to those people, who are interested in science and technology within the brewing industry. During the Festival, the participants will be able to listen to speeches and shows of enthusiasts as well as outstanding specialists and experts on brewing topics. The participants will also receive presentations of technologies and raw materials for home brewers and they could taste the craft beer. Speakers include representatives of the Krakow Brewing School operating at the University of Agriculture in Krakow - Dr Eng. Aleksander Poreda and Dr Eng. Marek Zdaniewicz, as well as a group of certified brewers, who will tell participants about beer from a scientific and practical point of view.

Prince from Malaysia visits Polish universities

2018-11-23

Prince Tuanku Syed Faizuddin Putra Jamalullail, ruler of the state of Perlis in Malaysia and the chancellor of the technical university of Malaysia Perlis (UniMAP) is visiting universities in Poland. He met the authorities of the Jagiellonian University in Kraków, the Lodz University of Technology and the University of Warsaw. During their stay at the Lodz University of Technology, a delegation from Malaysia visited the campus of the university, met the rector of the Lodz University of Technology Prof. Stanisław Wiak and signed the cooperation agreement. It assumes student exchange as part of the Erasmus program.

Silesian University of Technology to launch Final of the Three Minute Thesis contest

2018-11-23

Center for Science Popularization and the University Council of the PhD Students of the Silesian University of Technology invite participants on Saturday, November 24 to the Three Minute Thesis final - a global competition in science communication licensed by the University of Queensland in Australia. The young popularizers of science will try to prove in their presentations that the complex topic of scientific research can be presented in an interesting way, within three minutes only. From the presentation held at the Mrowisko Student Culture Center students will be able to find out whether plants can have complexes, what is the concrete of the 21st century and whether chemical compounds have potential. Three Minute Thesis competition was first held in 2008 and so far it was organized by 600 universities and institutions in 59 countries. The winner of last year's final held at the Silesian University of Technology, Małgorzata Krystek from the building department, was invited to the nationwide final of the contest FameLab.

Prof. Maria Lewicka to hold lecture Recovering memory. The role of memory in the identity of the place

2018-11-23

University of Szczecin and the City of Szczecin invite participants to the lecture of Prof. Maria Lewicka „Recovering the memory. The role of memory in the identity of the place.” The conference takes place within the program Explosions of Knowledge. The idea is to present the most interesting issues from the world of science to the general public. During the lecture, the professor will analyse whether and to what extent the consciousness of the towns' past is present in the memory of contemporary inhabitants of the cities of Central and Eastern Europe; how strong ethnocentrism is in the perception of the past of own towns and what psychological factors are developing and hindering the inclusion of foreign identities in their own national and / or local identity. Special emphasis will be placed on the role of two types of national identity - attachment to the country (patriotism) and glorification of one's own country (nationalism). The lecture will take place on November 26 in the hall of the mathematics and physical faculty. More: <http://usz.edu.pl/eksplozja-wiedzy-odzyskiwanie-pamieci-rola-pamieci-w-tozsamosci-miejscal>

University of Life Sciences in Wrocław launches a network of stations for vibration tests of the Earth's crust

2018-11-23

The Institute of Geodesy and Geoinformatics of the University of Life Sciences in Wrocław has launched a network of permanent Global Navigation Satellite Systems (GNSS) as part of the EPOS-PL project - European Observation System. GNSS receivers allow to determine the position of the station on the basis of satellite signals with an accuracy of a few millimeters and can be used to study vibration measurements of the Earth's crust during seismic shocks and mining bumps. The network consists of stations located in Wrocław, Katowice, Będzin, Chorzów, Chełm Śląski, Rybnik, Borowa Góra near Warsaw and in Komorniki near Środa Śląska. GNSS stations perform continuous autonomous observations of satellite signals from five navigation systems: US GPS; Russian GLONASS; the European Galileo system; Chinese BeiDou and Japanese QZSS. Inauguration of the program „Great Questions in Science” in Rzeszów

2018-11-26

On 5 December 2018, the University of Information Technology and Management in Rzeszów and the „Tygodnik Powszechny” Foundation are organizing the third conference „Great Questions in Science”. The event will be attended by Prof. Jerzy Bralczyk and journalist and columnist Michał Ogórek. Within the meeting entitled «The Art of Conversation» Prof. Bralczyk and Michał Ogórek will advise listeners how to master the art of conversation, how to make the conversation a pleasure and how important is the ability to listen, apart from the ability to express their thoughts efficiently.

Researchers of the Maria Curie Skłodowska University win the „Historical book of the year” competition

2018-11-26

The scholars of the Institute of History at the Maria Curie Skłodowska University (UMCS) in Lublin have become the laureates of this year's „Historical book of the year” competition. In the category «The best source publication devoted to the history of Poland and Poles in the 20th century», the jury awarded Dr. Prof. Associate Mariusz Korzeniowski, Dr. Prof. Associate Krzysztof Latawiec and Dr. Dariusz Tarasiuk for the book titled «Polish Refugees in Russia during the First World War in the Light of Documents» published by UMCS Publishing House. During the final of the eleventh competition, the prizes were awarded to the laureates. The organizers of the event were: Polish Television, Polish Radio, Institute of National Remembrance and the National Center for Culture. Researchers from Japan visited the Lublin Technological University

2018-11-26

On November 23, 2018, the Lublin Technological University hosted Japanese scientists as part of the Erasmus + program. Professor Narumol Matsuyama of Saga University and Professor Nobuya Hayashi of Kyushu University gave a series of lectures on the generation and diverse applications of low-temperature plasma as well as water resource management and hydropower. During their stay in Lublin, scientists from Japan also took part in the meeting of the Institute of Electrotechnics and Electrotechnology, where they presented their research results. Dr Joanna Pawłat, MSc. Michał Kwiatkowski, MSc. Piotr Terebun and the guests conducted joint research on the applications of a non-thermal plasma for the treatment of plant material in the Department of Plasma Technologies and Renewable Energy.

Intercultural year at the Poznan University of Technology

2018-11-26

The Department of Continuing Education and International Poznań University of Technology (PP) obtained over 200,000 PLN funding from the National Agency for International Exchange (NAWA) for the implementation of the project „The PP around the world - intercultural year” The project emphasizes the integration of the university's academic environment with students and foreign employees, exchange of experiences and shaping attitudes of openness and tolerance in the academic environment. Within its framework, the university is planning to conduct trainings aimed at increasing the communication and intercultural competence for 100 administrative employees of the PP having daily contact with foreign students. In addition, the plan includes 15 meetings of an intercultural cafe for students and employees of the Poznan University of Technology and many accompanying activities. The main event of the year will be the fair combined with a conference on the internationalization of universities with the participation of diplomats from the students' countries of origin.

Scientists from Toruń win the iENA 2018 prizes in Nuremberg

2018-11-26

Inventions of scientists from the Nicolaus Copernicus University have won medals and special awards of the 70th International Fair „Ideas, Inventions, New Products iENA 2018” in Nuremberg. They won the silver medal for «Method of obtaining hybrid carbon materials containing oligoheterocyclic compounds», the bronze medals for «Intravascular stent with properties that accelerate healing of the implant site and reduce the occurrence of thrombosis» and «Preparation with adaptogenic effect based on extract from *Eleutherococcus senticosus* and method of preparation with an adaptogenic effect based on an *Eleutherococcus senticosus* extract.» The special award of the Association of Inventors of Taiwan was received by the authors of the invention: «Method of obtaining a biological preparation of fungal origin accelerating the degradation of polymer materials and biological preparation».

Report of the Polonium Foundation on the Polish scientific diaspora

2018-11-27

The Polonium Foundation in cooperation with the Foundation for Polish Science and the Polish Scientific Society in Exile published the report „Unnoticed: Polish scientific diaspora as a source of social capital”. The report was based on an online survey on a sample of 464 Polish scientists from 31 countries - including the United Kingdom, the Netherlands, Belgium, Germany and France. The aim of the study was to collect information and opinions about the Polish scientific diaspora, relations with the Polish scientific community and the prospects of returning to Poland. Almost 47 percent Polish scientists working abroad do not intend to return to Poland with 27 percent declaring readiness to return and 26 percent are undecided scholars. See the report: <https://poloniumfoundation.org/research/>

Day of the Young Engineer at the Krakow University of Technology

2018-11-27

The Krakow University of Technology together with the Builder journal, as part of the „Builder for the Young Engineers” educational program, is organizing the Day of the Young Engineer on November 29, 2018. The participants of the event will take part in lectures divided into two thematic blocks. The first will be devoted to solutions and technologies in modern construction. The second one will discuss engineering challenges based on specific examples of completed investments. The lectures will be conducted by outstanding engineers representing the largest companies from the construction industry. More: <http://buildercorp.pl/2018/11/14/dzien-mlodego-inzyniera-krakow-29-11-2018/>

Professor Czerny from the University of Warsaw becomes doctor of honoris causa at Colombian Universidad de Manizales

2018-11-27

Professor Mirosława Czerny from the Faculty of Geography and Regional Studies of the University of Warsaw received the honorary doctor degree of Universidad de Manizales in Colombia. Prof. Czerny deals with development geography, socio-economic geography of Poland and spatial urban development models. The researcher is the author and co-author of numerous publications - mainly in Polish and Spanish. During the ceremony of awarding the title of doctor honoris causa, which took place on November 20, 2018 at the Colombian university, a distinguished researcher from the University of Warsaw gave a lecture „Desarrollo sostenible y sus aplicaciones para la ciudad de Manizales” (Sustainable development and its application in the city of Manizales).

Wroclaw University of Technology participates in the project „Professional Lower Silesia”

2018-11-27

Almost 2.5 thousand students from 44 schools and educational institutions took part in the project of the self-government of the province Lower Silesia „Professional Lower Silesia”. The University of Technology was one of the main partners of the program. The project was supposed to improve the competitiveness of vocational students in the following professions: freight forwarder technician, logistic technician, digital graphic process technician, electrician technician, IT technician, mechanic technician and machine tool operator. Nearly 2.5 thousand students from 44 schools from the Lower Silesia province participated in the project. One of the main points of the program was laboratory workshops organized by the Wrocław University of Technology and joint classes of interest groups from vocational schools and student science clubs. The program involved thirteen poviats and four municipalities from all over Lower Silesia. The value of the project, co-financed by the European Social Fund, is over PLN 4 million. Professor Marek Biesiada becomes a laureate of the scientific prize of the Polish Physical Society

2018-11-27

Professor Marek Biesiada from the Faculty of Mathematics, Physics and Chemistry at the University of Silesia became the laureate of this year's Wojciech Rubinowicz Scientific Award of the Polish Physical Society. Every year the Polish Physical Society awards experienced scientists, young researchers and teachers for their outstanding achievements and services in the field of scientific research, popularization of physics and its teaching. Wojciech Rubinowicz Scientific Award is granted for an article or series of articles published in the five years preceding the year of submitting the application. Professor Biesiada was awarded for innovative research on gravitational lenses and compact radio sources as new tools for cosmology and fundamental physics.

Rectors of Poznań universities signed the Charter of Academic Traditions of Poznań

2018-11-27

The rectors of all Poznań universities and presidents of the Polish Academy of Sciences in Poznań and the Poznań Society of Friends of Sciences (PTPN) solemnly signed the Charter of Academic Traditions of Poznań. The ceremony took place in the PTPN meeting room on the centenary of the establishment of the Organizational Committee of the Polish University in Poznań. The jubilee is an opportunity to confirm the values that guided the creators of the Poznań University and set the directions in which the Poznań scientific community should follow, and the Charter commemorates the most important events and people, as well as the ideas that preceded the establishment of the university in 1919. - We treat the legacy of the creators of Wszechnica Piastowska (Poznań University) and the later academic environment of Poznań as a challenge and duty for all of us, sharing the faith in the importance of science development, the importance of academic education and the mission we have to fulfill, exceed-

ing the divisions and paving new paths of modern Universitas- emphasized rectors in the Charter.

Delegation from Rzeszów University of Technology visits Great Britain

2018-11-28

From November 21 to 22 Delegation of the Rzeszów University of Technology (PRz), chaired by the Vice-Rector for Education, Dr Eng. Grzegorz Masłowski visited two universities in the United Kingdom: Surrey University in Guildford and University Degrees in the Football and Sports Industry (UCFB), whose headquarters are located at the Wembley stadium in London. During the visit, the Rzeszów University of Technology signed the cooperation agreement with Surrey University in the field of research in the field of 5G telecommunications networks and material engineering. During the visit to the University Degrees in the Football and Sports Industry, the delegation of the Rzeszów University presented plans to launch the field of sports management at the Faculty of Management and the specialty of sports engineering within medical engineering faculty. Representatives of both universities expressed their willingness to cooperate in the exchange of students and joint projects.

Date for launching a rocket with a satellite of Warsaw University of Technology's students

2018-11-28

SpaceX (Space Exploration Technologies Corporation) plans to launch a Falcon 9 rocket on Wednesday, November 28. The satellite is constructed by students of the Warsaw University of Technology and will be launched to the orbit of Earth. The most important target of the PW-Sat2 mission will be testing the deorbiting sail. The strategic partner of the project are Polish companies Future Processing and FP Instruments, involved in the software and purchase of the on-board computer. The start can be postponed for one day, on Thursday, November 29. The PW-Sat2 project was launched in 2013. Stu-

dents worked on satellite components in the Space Research Center of the Polish Academy of Sciences, the Center for Advanced Materials and Technologies CEZAMAT and the Innovation Management and Technology Transfers Center at the Warsaw University of Technology.

Professor Andrzej Friszke becomes the laureate of Prof. Tadeusz Kotarbiński Award

2018-11-28

Prof. Andrzej Friszke, author of the book "The Case of eleven prisoners. The imprisonment of the leaders of NSZZ „Solidarność” and KSS „KOR” 1981-1984” received the Prof. Tadeusz Kotarbiński award for outstanding scientific work in the field of humanities. The winner received PLN 50,000 for further implementation of his research. Professor Andrzej Friszke works at the Department of the Contemporary Political History of the Institute of Political Studies of the Polish Academy of Sciences. Thanking for the prize, the laureate said: «I tried to tell the truth about past times, about the challenges that the Poles survived and about the consequence, that is, the victory of freedom in Poland.»

Rector of the Cardinal Stefan Wyszyński University becomes doctor honoris causa of the University of Lutsk

2018-11-28

Rector of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw, priest Prof. Stanisław Dziekoński received the title of doctor honoris causa of the Łesia Ukrainka Eastern European National University in Lutsk. - The act of granting me an honorary doctorate of this University is a special sign of building a bridge between our Universities and, consequently, bringing the Ukrainian and Polish people together by developing fraternal cooperation in the wider educational field. The history of the university in Łuck dates back to 1940, when the State Pedagogical School was established. Currently, the Eastern European National University has 7 institutes, 9 faculties and 76 departments with 14,000 students.

Tale of the 21st Century Concrete won the 3MT Three Minute Thesis competition

2018-11-28

Natalia Paszek, PhD student from the Faculty of Civil Engineering of the Silesian University of Technology, won in the university final of the 3MT competition - Three Minute Thesis by telling the jury her three-minute long story about the concrete of the 21st century. The final of the competition was organized by the Center for Popularization of Science and the University Council of PhD Students. 10 PhD students from several faculties of the Silesian University of Technology qualified to the final. Each of them had to stand up at the Student Cultural Center «Mrowisko» and tell the audience about their scientific research. The participants had 3 minutes for this and they had to do it in an interesting and accessible way for non-scientists recipients. This year's competition was won by Natalia Paszek with the presentation «Geopolimer - concrete of the 21st century» concerning the construction material created mostly from waste. She also won the audience award.

Works of young architects from Vienna presented at the exhibition of the Wrocław University of Technology

2018-11-28

Until December 2, the exhibition „YoVA 4 Young Viennese Architects and Landscape Architects” - „Young Viennese architects and landscape architects” - can be visited at the Center for Knowledge and Science and Technology Information of the Wrocław University of Technology. The exhibition presents the works of young architects from the 11 Vienna design offices, selected for a competition organized by Vienna authorities. Only those partners that have their headquarters in Vienna could take part in it, provided they implemented at least one project in Vienna, and the age of the studio owner does not exceed 45 years. The YoVA 4 is the fourth Young Architects competition, and the catalogue of the companies present at the exhibition is a collec-

tive portfolio of the young generation of Viennese architects. The exhibition was organized in cooperation with the Austrian Consulate in Wrocław.

University of Casimir the Great in Bydgoszcz to launch the conference on anti-state ideas

2018-11-28

The Institute of Political Sciences of the Casimir the Great University in Bydgoszcz invites participants to the scientific conference „Against the State: Anti-State Ideas and Political Activities.” The subject of the conference, scheduled for December 6 at the Main Library of the University of Casimir the Great, will be the institution of the state and reflection on what role in the process of evolution and formation of state institutions are fulfilling ideas, concepts, attitudes and political behaviors of anti-state character. The organizers are planning a discussion about the model of the state that can be considered socially beneficial in the era of the fourth industrial revolution, the power of transnational corporations, the rise of individualistic attitudes in the world, the revival of nationalisms and growing populism. Scientific conference „Traditional culture in the perspective of protection of heritage and regional identities”

2018-11-29

The national scientific conference „Traditional culture in the perspective of protection of heritage and regional identities” will take place on 29 November 2018 at the Maria Curie Skłodowska University (UMCS) in Lublin. The event is connected with the 70th birthday anniversary of Prof. Jan Adamowski - the founder of the Institute of Cultural Studies of UMCS and a long-term research worker at the Institute of Polish Philology. During the jubilee cel-

ebrations, the laudation will be delivered by Prof. Jerzy Bartmiński to gathered friends and students of Prof. Adamowski. The conference program will include debates, thematic sessions, discussions and presentations on traditional culture. The event is organized by the Institute of Cultural Studies and the Institute of Polish Philology at UMCS, Polskie Towarzystwo Ludoznawcze, the Polish Society of Folklore in Lublin in cooperation with the Association of Folk Artists.

Canadian Ambassador to Poland to be a guest of the Rzeszów University of Technology

2018-11-29

The possibilities of research and development cooperation between Canadian and Polish aerospace research centers were the subject of talks that Leslie Scanlon, the Canadian ambassador in Poland, conducted with the authorities of the Rzeszów University of Technology. The participants discussed business development opportunities of Canadian companies in the aviation industry, as well as research and development cooperation between Canadian and Polish aerospace research centers. Both Rzeszów University of Technology and the Center of Advanced Technologies AERONET - Dolina Lotnicza have a great potential to initiate or join research and development projects with Canadian researchers. Professor Jarosław Sęp, dean of the aviation and mechanical engineering department at the Rzeszów University of Technology emphasized that cooperation with Canada has enormous potential and development prospects, and the effects of the meeting will be visible in the near future.

Scholars of the Institute of Aviation participated in the ESA Clean Space Industry Days 2018

2018-11-29

Employees of the Space Technology Center at the Institute of Aviation from November 23 to November 25, 2018 participated in the ESA Clean Space Industry Days 2018 in the Dutch Noordwijk. During the event Eng. Paweł Nowakowski from the Department of Space Technology presented the latest results related to the development of «dedicated propellant», developed by a Polish consortium led by the Institute of Aviation. The consortium includes: Mesko S.A., Institute of Organic Industry and Gamrat Special Production Plant. The Polish solution is very popular in the European industry, and elaborating it is to be continued together with the European Space Agency.

Applications for the next TopMinds program

2018-11-29

The process of applications for 2019 of TopMinds will be continued until December 2, 2018. It is a training and mentoring program that was initiated by the Association of Top 500 Innovators and the Polish-American Fulbright Commission. The TopMinds initiative is addressed to students of Polish universities who after graduating, need support in choosing the right career path. As part of TopMinds, mentors and experts, graduates of the Program Top 500 Innovators financed by Ministry of Science and Higher Education and Fulbright Program will support participants in finding their own career path, help in developing interpersonal competences, and indicate ways to strengthen the sense of professional and personal value. More: www.topminds.pl

Opole vocational education support project is the best in Europe

2018-11-29

The project „Opole Vocational Schools closer to the Labor Market2” implemented in the partnership of the Opole University of Technology with the Region-

al Education Support Team, the Opolskie Center for Economic Development and the Opole City Office was recognized as the best in Europe in the category „European funds for excellence”. As part of it, preparatory courses for technical studies for technical secondary school students and classes for vocational school students took place at the university - including programming lessons using ArduinoUNO circuits, AutoCAD support, programming using Lego Mindstorms EV3 and 2D and 3D computer graphics. The project also included workshop activities in the combustion engine laboratory, aerodynamics and hydrodynamics laboratory for machines, devices and building structures, and the reverse engineering automation and reflexology laboratory and a teacher training course «3D graphics modeling and animation of objects in the Blender».

Publication of Prof. Tadeusz Widła awarded in the forensics competition

2018-11-29

Professor Tadeusz Widła from the Faculty of Law and Administration of the University of Silesia became the laureate of the Prof. Tadeusz Hanausek Award organized by the Polish Criminalistic Society. He received the award for the book „World of signatures”. Assessing the submitted works, the jury was guided by their scientific level, the opinions of reviewers and promoters, the topicality and novelty of the presented subject matter, as well as the particular importance for forensic practice. Works based on empirical research were highly rated. Professor Widła is an expert in the field of writing research and promoter of many PhD dissertations in the field of forensics. He wrote monographs in the field of psychophysiology of the writing and the role of an expert opinion. He is the author of popular academic textbooks for logic and scientific articles. For years, he has been specializing in the research of painters' signatures - which is the topic of the awarded publication.

Polish technology on the Arabian Peninsula

2018-11-30

Dr Rashed Ali Hashem, a public school teacher from the United Arab Emirates, won the prize worth over PLN 1 million in the competition for the best teacher in the Persian Gulf region. The jury appreciated the teacher who funded 12 modern laboratories at his school from his own funds. One of the laboratories was equipped with the „Magic Carpet” from Poland. Michał Zębik from Good One PR informed that the awarded project consisted in laboratories presenting scientific achievements and encouraging physical activity. One of them is equipped with the «Magic Carpet» - an interactive projector from the Polish company Funtronic, supporting physical and mental activity. «Magic Carpet» is a device that is used as a support in pre-school and early school education. The interactive projector, directed by hand and leg movements provides with a set of multimedia exercises, games and motion games, thanks to which children learn the basics of English, maths, history and even programming.

Mural competition for the 100th anniversary of the AGH University of Science and Technology in Krakow completed

2018-11-30

The winner of the mural competition for the 100th anniversary of the AGH University of Science and Technology in Krakow is Anna Wardęga, a student at the Krakow Academy of Fine Arts. The painting of mural is planned for the early spring of 2019. The mural presents various fields of science that are developed at the university, including geodesy, space science, acoustics and renewable energy. Anna Wardęga, the author of the winning work, comes from Krakow and is a third-year student of the Faculty of Painting at the Academy of Fine Arts in Krakow. Her other project won in 2018 a mural competition for one of the walls of the dormitory in Wrocław.

20 years of the Technology Transfer Center of the University of Warsaw

2018-11-30

The spin-off company of the Warsaw University Warsaw Genomics, which specializes in conducting genetic tests as well as a research team that discovered a method of obtaining sustained mRNA for develop innovative anticancer vaccines, were awarded at the 20th anniversary of the Technology Transfer Center of the University of Warsaw. During the ceremony, Prof. Marcin Palys, rector of the University of Warsaw explained that the best universities do not only conduct edge-cutting research and ensure the quality of education. They also have a strong impact on the environment, including the commercialization of the results of research and the support of entrepreneurship of employees, PhD students and students. The Central European Startup Awards distinguished the spin-off company Warsaw Genomics in 2017 as the best biotechnology start-up in Poland.

The „Perspectives - Women in Tech Summit 2018” conference held in Warsaw

2018-11-30

On November 27-28, 2018, the conference „Perspectives - Women in Tech Summit 2018” took place in Warsaw. The partner of the event was the Ministry of Science and Higher Education, with the honor guest Maria Gabriel, European Union commissioner for the digital economy and digital society. The aim of the conference organized by the Perspektyw Edukacyjny Foundation is to support innovation in the area of IT and new technologies, as well as international promotion of Poland as a place of high quality IT education. Over a thousand talented women from Europe and Central Asia took part in the conference. Plenary sessions, workshops and debates accompanying the event concerned mainly the future of IT and Big Engineering, and enabled the acquisition of industry knowledge, what helped to develop a network of contacts and to plan the next steps of the career. More: <https://womenintechsummit.pl/pl/>

Professor Edmund Wittbrodt becomes the chairman of the Scientific and Program Council Hevelianum

2018-11-30

Professor Eng. Edmund Wittbrodt, from Gdańsk University of Technology (PG) was elected the chairman of the Scientific and Program Council of Hevelianum (formerly Hewelianum Center) - a modern science center in Gdańsk. The Hevelianum, until October 25 called Centrum Hewelianum, conducts activities for education, science, culture, recreation and environmental protection. It is located in the center of Gdańsk, in the historic complex of Fort Gradowa Mountain. The Center celebrates its 10th anniversary this year. The task of the Scientific and Program Council is to indicate long-term directions of activity and provide substantive and consultative support for the Hevelianum. Professor Edmund Wittbrodt specializes in applied mechanics, automation and robotics, biomechanics and computer methods in machine dynamics. Until 2017, he headed the Department of Mechanics and Mechatronics PG. He was the rector of the Gdańsk university, minister of national education and senator of the Republic of Poland.

University of Silesia to hold symposium „Safeguarding our Climate, Advancing our Society”

2018-11-30

The Polish Academy of Sciences, the Pontifical Academy of Sciences and the National Center for Scientific Research invite you to the seminar „Safeguarding our Climate, Advancing our Society” at the Faculty of Law and Administration of the University of Silesia in Katowice. The seminar program includes a panel discussion and three thematic sessions devoted to the results of the latest research on climate change and the challenges resulting from these changes in the technological, economic and social dimensions. One of the speakers will be Prof. Jacek Jania from the Faculty of Earth Sciences at the Silesian University - chairman of the Center for Polar

Studies. The event supported by the Rector of the University of Silesia will be part of COP24 climate summit organized in Katowice. More: www.institution.pan.pl

Prof. Rita Felski to hold a lecture at the University of Wrocław

2018-11-30

The Literature Department after 1989 at the Institute of Polish Philology at the University of Wrocław invites participants to a lecture by Prof. Rita Felski (University of Virginia), „Hooked. Art and Attachment”, based on a new, unpublished book by this outstanding American critic and theoretician of literature. The lecture will be delivered on December 7 in the Nehring Room (library reading room) at the Institute of Polish Philology at Nankier Square 15. The organizers provide simultaneous interpretation. Rita Felski was born in Birmingham, in a family of emigrants (father was a Pole, mother was a Czech). She worked at universities in Australia, the United States, and recently in Denmark. She deals with feminist criticism, concepts of modernism, postmodernism and avant-garde, a phenomenon of reception of literature and literary criticism. Her latest book, The Limits of Critique, deals with suspicion as the basic feature of reading in its today's critical reception.

International scientific conference „University as the center of intellectual culture of the nation”

2018-12-03

The Faculty of Social Sciences of the Warsaw University of Life Sciences (SGGW) and the Faculty of Historical and Social Sciences of the Cardinal Stefan Wyszyński University, in cooperation with the National Center for Culture are organising an international scientific conference „University as the center of intellectual culture of the nation”. The honorary patronage over the conference was taken by the President of the Republic of Poland, Andrzej Duda. The conference on the occasion of Poland's independence will take place on December 6, 2018 in the WULS SGGW's Crystal Hall. The organizers of the conference are planning the debate on the importance of the university as a center of intellectual culture of nations in the past and nowadays. The issue of the conference will concern the place of the university and scientific knowledge in social life.

University of Białystok promotes the book „Not only about science. Conversations with Professor Sir Leszek Borysiewicz”

2018-12-03

On Monday, December 3, 2018 Prof. Sławomir Presnarowicz will promote his book „Not only about science. Conversations with Professor Leszek Borysiewicz”. The main character of the publication, Professor Sir Leszek Borysiewicz, is a world-renowned British biologist and a doctor of Polish descent. He invented a vaccine against a virus that causes human papilloma cancer, for which he was knighted from Queen Elizabeth II. In 2010-2017 he was the Vice Chancellor of the University of Cambridge. In February 2018 he was awarded the title of doctor honoris causa of the University of Białystok. Author of the book, Dr hab. Sławomir Presnarowicz is a scholar of the Department of Public Finance and

Financial Law at the Faculty of Law of the University of Białystok. He is also a judge of the Supreme Administrative Court in Warsaw.

Researcher at the Jagiellonian University wins the prize of the Art Historians Association

2018-12-03

Dr. Dobrosława Horzela from the Institute of Art History at the Jagiellonian University (Jagiellonian University) in Krakow has been awarded the Prof. Jerzy Łoziński's prize granted by the Association of Art Historians. She received the honorable award for her scientific work on the history of Polish art, with particular emphasis on documentary and cataloging work and for the book: «Die mittelalterlichen Glasmalereien in der Stadtpfarrkirche Mariä Himmelfahrt in Krakau.» Mit einer kunstgeschichtlichen Einleitung von Marek Walczak”. This research is devoted to stained glass windows in the St. Mary's church in Kraków, one of the most important urban churches in Central Europe. Stained-glass windows were created at the end of the reign of Casimir the Great and in the initial period of the reign of the Jagiellonians and they are the largest set of stained-glass painting in Poland.

Maria Konopnicka Schools in Pyskowice supported by Silesian University of Technology

2018-12-03

Silesian University of Technology has signed an agreement on cooperation with the Maria Konopnicka Schools in Pyskowice. The aim of the agreement is to extend the university's broadly understood scientific support of the Pyskowice school. The University of Technology committed to provide a didactic base and enable school pupils to participate in lectures, blackboard, laboratory and science classes, and to promote the opportunity for students to work with a talented pupils as part of extracurricular activities. Students of the Silesian University of Technology will be able to hold subject-methodical and pedagogical apprenticeships at the Pyskowice

school. The agreement also allows to promote the educational offer of the University among pupils of the Pyskowice schools. Pupils will be able to take part in events organized by the Silesian University.

Santander Universidades Digital Day to launch in Lublin, Gdańsk, Łódź and Warsaw

2018-12-04

Santander Universidades Digital Days with free conferences and workshops will take place will be held on December 5 in Lublin, at the Maria Curie-Skłodowska University, on December 6 in Gdansk, at the Gdańsk University of Technology, on December 11 in Lodz, at the University of Lodz and on December 13 in Warsaw, at the Warsaw School of Economics. All students can participate in the events, regardless of the university and the field of their studies. During the conference, participants will listen to lectures on trends and requirements of the labor market. The Google representatives will hold lectures on the impact of digital technologies on a career in each city. Participants will learn how to take care of their digital competences in the modern labor market and how to plan their professional development and maximize their strengths. More: <https://santander.pl/santanderuniversidades-pl/digitalday.html>

Students of Construction Faculty of the Lodz University of Technology win the 4th National Competition of Wooden Bridges

2018-12-04

Students of the Faculty of Civil Engineering, Architecture and Environmental Engineering of the Lodz University of Technology won the IV National Competition of Wooden Bridges. This is the second victory of the students from Lodz, as they also won last year's competition. During the competition in 2017, the bridge constructed by students from Lodz endured the weight of 68.40 kN, this year it endured the weight by almost 12 kN higher than in the previous year, exactly - 80.89kN. The suspended structure has been designed based on the carpentry solutions of the primary girders, based on modern connections.

XIV Polish-German Student Metallurgy Seminary in Krakow

2018-12-04

The 14th Polish-German Student Metallurgy Seminar will be held on December 6-7, 2018 at the AGH University of Science and Technology in Krakow. The event is organized by the Student Scientific Society of Metallurgy of Steel and Steel. The seminar has been organized for 13 years and is held alternately in Krakow and in Freiberg in Germany. It is the result of cooperation between two friendly faculties: Faculty of Metal Engineering and Computer Science, AGH and Institut für Eisen - und Stahltechnologie TU Bergakademie Freiberg. The seminar will also be attended by representatives of the Silesian University of Technology, the Częstochowa University of Technology and students from the Czech Republic, Japan, China and Ukraine.

Next Clubs of the Young Explorer established in north-eastern Poland

2018-12-04

Coaches from the Copernicus Science Center in Warsaw met last Saturday, December 1, 2018, at the University of Białystok campus (UwB) with teachers from north-eastern Poland who are interested in establishing Young Explorer Clubs. The Club of the Young Explorer is a program implemented by the Copernicus Science Center with the support of the Polish-American Freedom Foundation. Its idea is to organize educational, extra-curricular activities, during which children and youth together learn about the world of science. The tutor can be a teacher, a cultural animator or a parent. Several hundred clubs are operating throughout Poland and abroad. At the moment, under the care of the Białystok University there are 10 clubs, not only in the Podlasie Voivodeship, but also in Ełk, Ostrołęka, Huszlew, Ostrow Mazowiecka and Biała Podlaska. 18 teachers participate in the training and they intend to set up other Club of the Young Explorer.

Lecture on Saint Nicholas at the University of Wroclaw

2018-12-04

The Institute of English Philology at the University of Wroclaw invites participants to a lecture of Prof. Leszek Berezowski „All you need to know about Saint Nicholas and Santa Claus”. The Santa Claus meeting will take place on December 5 at the Marianum Oratorium. Professor Berezowski will talk about how the image of St. Nicholas and related customs and how his doppelgangers were created - for example English Father Christmas or American Santa Claus. «All you need to know about Saint Nicholas and Santa Claus» will be illustrated with pictures, poems, advertisements, photos, postage stamps, dispatches of news agencies, and even military communications regarding Saint Nicholas and his doppelgangers. The lecture is especially addressed to secondary school pupils and will be conducted in English.

Silesian University of Technology awarded „For merits for inventiveness”

2018-12-04

The Silesian University of Technology was honored the award „For merits for inventiveness” by the Patent Office of the Republic of Poland. The award was received by the vice-rector for student affairs and education, Dr Eng. Tomasz Trawiński, during the ceremony at the Royal Castle in Warsaw. The award ceremony was part of the celebrations of the jubilee year of the centennial of the establishment of industrial property protection and the Patent Office of the Republic of Poland and the profession of patent attorney. The Patent Office of the Republic of Poland, established on December 28, 1918 by the decree of the head of state Józef Piłsudski, was one of the first state institutions established after regaining independence. The honorary medal «For merits for inventiveness» was awarded for the first time in 1993-2000 and again from 2003, to individuals, institutions, organizations and associations distinguished by achievements in the development and popularization of inventiveness.

Graduate of the Silesian University of Technology wins the second prize in the Zachwatowicz competition

2018-12-04

A graduate of the Silesian University of Technology, Joanna Rozbrój, took the second place in the Prof. Jan Zachwatowicz International Competition of the Polish National Committee of the International Council for the Protection of Monuments ICOMOS for the best student diploma thesis dealing with the issues of cultural heritage protection. The awarded work concerned the adaptation of the Szombierki Heat Power Plant in Bytom to the center of culture, visual and phonic art. There were 33 works submitted to the competition. The student's promoter was Dr. Eng. Jerzy Wojewódka. The jury distinguished design work in the field of conservation, adaptation and modernization of architectural monuments, theoretical in the field of conservation of architectural objects and maintenance history, and research on methods and materials used in architectural restoration. The founders of the award are Krystyna Zachwatowicz-Wajda and Andrzej Wajda.

British Council to launch the eighth FameLab competition

2018-12-05

The British Council is launching the 8th FameLab contest all over the world. The Polish part of the contest is co-organized by the Copernicus Science Center with support of the Ministry of Science and Higher Education. The partners of the competition are the Foundation for Polish Science, the Kosciuszko Foundation and the Association of Science Spokesmen. FameLab is an event, where the organizers are offering the stage and microphone to those scientists, who want to receive training support and to acquire a new tool in popularizing science or to improve skills important in a scientific career. The participation in FameLab will open new doors for scientists to develop their career. Applications will be accepted till January 28, 2019. More: <http://www.famelab.org.pl/>

Laureate of the Foundation for Polish Science program becomes also Entrepreneur of the Year

2018-12-05

Dr Filip Granek, the winner of the HOMING PLUS program, as well as the founder and president of the XTPL nanotechnology company, was awarded the Entrepreneur of the Year prize in the 16th competition organized by Ernst & Young. Dr. Granek is one of the world's best specialists in modern solar cell manufacturing and nanomaterial-based technologies. The jury honored him with the title Entrepreneur of the Year 2018 for «working on breakthrough technology that has a serious chance to change the world for the better.» Dr Granek will represent Poland during the international final of the EY World Entrepreneur of the Year 2019 competition, which will take place in June next year in Monaco. More: <https://przedsiębiorcaroku.pl/news/filip-granek-prezes-xtpl-s-a-zostal-przedsiębiorca-roku-2018/>

Students of the University of Warsaw become the champions of Central Europe in Team Programming

2018-12-05

Students from the Faculty of Mathematics, Computer Science and Mechanics at the University of Warsaw won the XXIV Academic Central European Championships in Team Programming. Warsaw students were the only ones who solved all 12 tasks prepared by the organizers. The competition took place from November 30 to December 3 in Prague. 74 teams took part in them, representing the best universities teaching computer science from Austria, Croatia, the Czech Republic, Poland, Slovakia, Slovenia and Hungary. Other teams representing the University of Warsaw took the 3rd, 5th, 16th, 17th and 25th places. The project was supported by Ministry of Science and Higher Education as part of the project «The best of the best! 3.0.» and sponsors: PKO Bank Polski and Atende SA. More: <https://contest.felk.cvut.cz/18cerc/contest.html>

9th INTERSTUDENT competition for the best foreign student in Poland

2018-12-05

Until December 12, candidates for the 9th INTERSTUDENT competition for the best foreign student in Poland can be nominated. The organizers want to award foreign students who build cooperation between cultures and enrich the Polish academic environment. The competition is organized as part of the «Study in Poland» program. The condition of participation is the proved activity in the local student cultural, social, ecological, sports environment as well as obtaining good results in science and participation in interesting research projects. Candidates may be nominated by their professors, guardians, university authorities, foreign cooperation offices, student self-governments as well as other students. More than 70,000 foreign students are currently studying at Polish universities. The Competition Jury will select the best foreign students studying at Polish public and non-public universities from the undergraduate, graduate and PhD studies. More: <http://www.studyinpoland.pl/interstudent/>

University of Zielona Góra to hold EXPO Conference Medical Simulation - Challenges of the Future

2018-12-05

The Faculty of Medicine and Health Sciences of the University of Zielona Góra invites participants to the EXPO Conference Medical Simulation - Challenges of the Future. As part of the two-day meeting on December 6 and 7, the organizers are planning lectures, discussion panels and workshops. Medical simulation is becoming a standard of education in medical majors. It has opened a range of hardware options for undergraduate and postgraduate education. The Zielona Góra conference is to be a place for discussion and exchange of experiences related to the implementation of the didactic program in order to learn about the latest technologies and available solutions in teaching the methodology of medical simulation. The organizers are planning to talk about design, organization and management of the Medical Simulation Center. More: <http://www.exposymulacjamedyczna.pl/>

Satellite of students from Warsaw University of Technology launched

2018-12-06

On December 3, 2018, the Falcon 9 rocket from SpaceX launched from the United States Air Force base in Vandenberg, California. It brought into Space also a satellite constructed by members of the Student Astronautic Circle that operates at the Faculty of Power and Aeronautical Engineering at Warsaw University of Technology. The students have been working on the PW-Sat2 satellite for almost six years. This is the fourth Polish satellite, and the second one constructed by students of the Warsaw university. PW-Sat2 is a CubeSat satellite. It has a rectangular shape measuring 10 × 10 × 22 cm. Its mission will last 40 days. During the mission time, it will do four experiments. The most important is to test the innovative deorbiting sail. The designed solution is to prevent the satellites that have already completed their mission from remaining in orbit. More: <https://pw-sat.pl/>

National Academic Exchange Agency becomes a member of the Academic Cooperation Association

2018-12-06

During the conference of the Academic Cooperation Association (ACA), which was held in Vienna, the National Academic Exchange Agency (NAWA) was admitted as a member of this organization. ACA is a think tank operating in the field of international cooperation in higher education, whose activities include research and analysis, evaluation, consulting and publications. At the same time, it is also a networking platform associating 22 institutions that are NAWA equivalents. As part of regular meetings, ACA members exchange information on changes in the area of science and higher education that take place in their countries, present new programs implemented by their organizations and present the main directions of promotion of higher education abroad.

Graduates of the Krakow University of Technology become laureates of the Honorary Award of the Association of Polish Architects

2018-12-06

The Association of Polish Architects (SARP) awarded the graduates of the Krakow University of Technology: Piotr Lewicki and Kazimierz Łatak. Architects from Krakow for their outstanding creative activity. The jury emphasized that most of Piotr Lewicki and Kazimierz Łatak projects have unique features that confirm the identity of the place and enrich the natural and cultural environment. Their projects of multi-family buildings in Wrocław, the development of the Ghetto Heroes Square in Kraków and the 100-year anniversary hall of the Cracovia sports club are particularly noteworthy. Piotr Lewicki and Kazimierz Łatak graduated from the Architecture Department of the Krakow University of Technology in 1990. Kazimierz Łatak is also a graduate of the

Faculty of Civil Engineering. In the years 1992-1999, architects were employees of the Krakow University of Technology. More: http://www.sarp.org.pl/pokaz/honorowa_nagroda_sarp_2018,2644/

Symposium „Law day for climate protection and climate management 2018” at the University of Silesia

2018-12-06

On 7th December the Faculty of Law and Administration of the University of Silesia in Katowice invites participants to the scientific symposium entitled „Law day for climate protection and climate management 2018” („Advancing Law & Governance Contributions to Climate Action under the Paris Agreement”), which is one of the events accompanying the climate summit. The symposium will be attended by world-renowned representatives of science and international institutions working for climate protection. During the conference, prizes for the best student essay on legal climate protection will be presented. The organizers announce a discussion on ensuring synergy for capacity building and cooperation in the field of climate change research and exchange of knowledge, ideas and experiences between specialists representing various areas of law and management - so that it will be possible to develop an effective implementation model of the Paris Agreement.

University of Adam Mickiewicz in Poznan awarded university Laurels

2018-12-06

Four projects of students of the University of Adam Mickiewicz in Poznań (UAM) won first places in the University Laurels competition organized by the Polish Universities Forum. During the award ceremony of the University Laurels in Krakow, the Students' Self-Government Parliament of the University of Adam Mickiewicz and students from the Academic Scientific Society of Spatial Management won the contest in all four nominated categories. The awarded projects are: Great Grilling of Adam Mickiewicz University, Poznań Map of Barriers, Anvil 2.0 and Student Quality Forum. University Laurels Gala is one of the most important events organized by the Polish Universities Forum, where the best and most creative ideas realized by the student community are rewarded. In the last year's contest, the Battle of Academics - one of the projects of the Students' Self-government of the UAM won the competition.

Students of the Wrocław University of Technology won the housing architecture competition

2018-12-06

Students of the Faculty of Architecture of the Wrocław University of Technology took first and third place in the national competition „Habitat Now” for projects in the field of housing architecture. The first prize was received by Katarzyna Ponińska for the work «Connectiv housing» - My project is of course conceptual, but it also draws attention to important aspects that are neglected in today's designing of developer housing, namely security, understood as a higher social awareness and better neighbor relations, not a fence, monitoring or guard, but rather connection with nature, a substitute for rural life in the city. The whole idea is connected in the form of a city Multifamily residential housing, which makes the project more real and accessible. The third place was taken by Wojciech Szkarłata for 'Sport & Living Hybrid' project. The concept assumes combining a

large-scale facility with a sports function in a multi-family housing, which facilitates interpersonal relations and human contact with sport.

Exhibition of chicken at the Warsaw University of Life Sciences

2018-12-07

The Warsaw University of Life Sciences in Warsaw together with the Union of Best Poultry Breeders in Poland invite participants on 8 and 9 December 2018 to the Exhibition of Chicken. The exhibition will include hens from around the world: China, Japan, Indonesia, England, Germany, the Netherlands and India. The participants will admire the smallest hens in the world, such as seramy, szabo and sebrtkis. In contrast, there will also be the largest hens in the world – giant hens, which include brahmas, cochinas with weight of about 7-10 kg. The exhibition is addressed to both young and experienced scientists, breeders and hen lovers from Poland and abroad. The exhibition will be attended by breeders of these animals, scientists conducting research on animals, students, as well as representatives of industry companies.

Students of the Białystok University of Technology win Robotex 2018 competition

2018-12-07

Students of the Białystok University of Technology won the second and third place in the finals of the Robotex robotics competition 2018. The competition took place in Estonian Tallinn. This is another success of students from Białystok, the world champions in constructing and fighting robots on the ring. Students from the mechanical faculty of the Białystok University of Technology have already won at international robotics competitions in China, the United States and Romania. Financial support for the construction and improvement of their constructions and participation in the competition was given to the team as part of the project of the Ministry of Science and Higher Education «The best of the best! 3.0. «

Kielce Foreigner's Day

2018-12-07

Ukrainian, Chinese and African dances, Chinese rap, Portuguese guitar and lyric Italian song will be presented on December 4, 2018 on Kielce Day of Foreigners. It is an event organized by foreign students of the Jan Kochanowski University in Kielce to show their talents to the public. There are over half a thousand foreigners studying at the University of Jan Kochanowski, mainly from Ukraine. - For us, this city is a new home, we have become familiar with Kielce. We study and live here. In this way, we want to repay the city for the support we receive from you, «said Maria Bereziuk from the Homo Politicus Association, which organized the Kielce Foreigner's Day with the Jan Kochanowski University. See the gallery from the event: <http://www.ujk.edu.pl/webujk/galitem.php?eid=1224>

Foundation for Polish Science awards Prizes

2018-12-10

Professor Andrzej Dziembowski from the Institute of Biochemistry and Biophysics of the Polish Academy of Sciences (PAS), Prof. Andrzej Gałęski from the Center of Molecular and Macromolecular Studies PAS, Prof. Krzysztof Pachucki from the Faculty of Physics at the University of Warsaw and Prof. Timothy Snyder from Yale University received the Awards of the Foundation for Polish Science during the gala at the Royal Castle in Warsaw. The Deputy Prime Minister, Minister of Science and Higher Education participated in the ceremony and said that all the prize-winners meet the criterion of scientific excellence. - I believe that in the coming years there will be even more research possibilities for scientists like today's winners, also through the implementation of Constitution for Science. I wish that the selection of winners from year to year would be more and more competitive, so that the Foundation would continue to choose the best of the best - added Deputy Prime Minister Gowin.

Academic Choir of the Warsaw University of Technology wins Grand Prix of Polish Choral Competition

2018-12-10

The Academic Choir of the Warsaw University of Technology won the Stefan Stuligrosz Grand Prix of the Polish Choral. Before Polish choral teams competed in one of the six oldest Polish choir competitions. The Academic Choir of the Warsaw University of Technology won the main prize this year at the Feliks Nowowiejski International Festival of Choral Music in Barczewo. This award allowed the choir to participate in the Polish Grand Prix. During the event, the choir conductor, Dr Dariusz Zimnicki received the award for the best conductor of the competition. See the fragment of the performance: <https://youtu.be/Z30r25Qy5no>

Prof. Piotr Sztompka to hold an open lecture at the Jagiellonian University

2018-12-10

The Department of Contemporary Culture Research at the Institute of Sociology at the Jagiellonian University in Krakow invites participants to a lecture by Prof. Piotr Sztompka „On the notion of culture once more: The classical concept of culture in a new, original approach”. The meeting will take place on December 11 at the Institute of Sociology. Piotr Sztompka is a retired professor at the Jagiellonian University and an active professor at the Father Józef Tischner Higher European School in Krakow. He is a member of the Polish Academy of Sciences and the Polish Academy of Learning, Academia Europaea (London) and the American Academy of Arts and Sciences (Cambridge, Massachusetts). In the years 2002-2006 he was the president of the International Sociological Association (ISA). He is a laureate of the New Europe Prize (1995), the Foundation Award for Polish Science (2006) and twice the prizes of the Prime Minister of the Republic of Poland. Professor Sztompka is a doctor honoris causa of four universities: in Moscow, Stockholm, Krakow and Warsaw. He is the author of 30 books and over 300 scientific articles that were published in 15 languages.

Researchers from Georgia visit the Cardinal Stefan Wyszyński University

2018-12-10

Cardinal Stefan Wyszyński University (UKSW) in Warsaw hosted representatives of Georgian scientific institutions. The Rector of CSWU Prof. Stanisław Dziekoński met Prof. Zviad Gabisonia - director of the Shota Rustaveli Foundation for Science, Prof. George Ghavtatis, Rector of Akaki Tsereteli University in Kutaisi and scientists from Georgian academic centers. During the meeting, a cooperation agreement was signed regarding the implementation of research and scientific projects devoted to the role of the state and religion in building a democratic state. The document also provides for cooperation in conducting conferences and seminars.

Satellite with a communication system created at the Wrocław University of Technology already launched in space

2018-12-10

The ESEO S-50 scientific satellite with a telecommunications system constructed by scientists and students of the Wrocław University of Technology has been launched into space from the Vandenberg base in California. The system is an original development with technical solutions created entirely at the Wrocław University of Technology. It consists of a microwave transmitter, a satellite onboard computer and a microwave antenna. His task is to manage the exchange of transmitted data. The whole device weighs 0.8 kg, and the antenna, made of ultra-light materials, weighs less than 40 grams. The transmitter allows scientists to send a large amount of satellite data to a ground station with a speed of 10 Mbit / sec. The ESEO (European Student Earth Orbiter) satellite was created as part of the educational program of the European Space Agency, implemented since 2000. It was attended by 30 European universities, including the Wrocław University of Technology.

Silesian University of Technology receives the Elsevier publishing prize

2018-12-10

Silesian University of Technology was awarded the Elsevier Research Impact Leaders prize in the category of social sciences. The prize is awarded to universities, whose publications had the greatest impact on the perception of Polish science in the world. The award was received by the Vice-Rector for Science and Development, Prof. Eng. Marek Pawełczyk. The award was result of the very high share of publications in the highest-cited magazines and the related citation rate. Special attention of the jury was attracted by primarily publications in the field of restructuring. The Elsevier Research Impact Leaders prize, awarded for the first time in 2016, is part of the Elsevier global initiative to support research and the development of science. The intention of the Elsevier Award is to identify and grant universities whose latest scientific works have the greatest impact on the image of Polish science in the world.

Students from developing countries receive scholarship to study in Poland

2018-12-11

73 students from developing countries received scholarships as part of Ignacy Łukasiewicz program to study in Poland. The largest number of scholarship holders are interested in studying at faculties such as IT and electronics, construction, food and nutrition technology, and chemistry. Ignacy Łukasiewicz Scholarship program has been implemented since 2015 by the Ministry of Science and Higher Education, the Ministry of Foreign Affairs and also by the National Academic Exchange Agency. It is addressed to students from developing countries such as Indonesia, Angola, Myanmar, Ethiopia, Philippines, India, Indonesia, Kenya, Colombia, Mexico, Nigeria, Palestine, Peru, Senegal, Tanzania and Vietnam.

Delegation from Indonesia visits the Warsaw University of Life Sciences

2018-12-11

The Warsaw University of Life Sciences (SGGW) hosted a delegation of representatives of universities and journalists from the Indonesian province of West Nusa Tenggara. The delegation included the rectors of five Indonesian universities: University of Nahdlatul Ulama, Health Science School, University of Muhammadiyah, University of Mahasaraswati and Hamzanwadi University. Guests from Indonesia met the rector of WULS-SGGW Prof. Wiesław Bielawski. The topic of the talks were the possibilities of cooperation between SGGW and universities from this province. From the academic year 2019/2020, the University of Warsaw will recruit students from Indonesia to study the following programs in English: Engineering Infrastructure, Restoration and Management of Environment, Horticulture, Economics and Organization of Enterprises, Big Data Analytics and Organic Agriculture and Food Production.

Collegium Civitas to hold a debate „Will democracy regress?“

2018-12-11

On the anniversary of the imposition of martial law in Poland, on December 13, 2018 at 5:00 PM the Collegium Civitas in Warsaw is holding a debate entitled „Will democracy regress?“. The event is based on the book by Steven Levitsky and Daniel Ziblatt „How Democracies Die“, also recently published in Polish. The participants of the debate will try to compare the mechanisms limiting democracies on the example of countries with a different history and political culture. The debate will be attended by: Prof. Bohdan Szklarski - political scientist, Americanist, Dr Piotr Łaciński - political scientist, specialist in the policy of South American countries, Dr Dominik Hej, a political scientist, specialist in Hungarian politics.

Professor Jerzy Marian Brzeziński becomes honorary doctor of the Maria Curie-Skłodowska University in Lublin

2018-12-11

On Wednesday, December 12, 2018, the Maria Curie-Skłodowska University (UMCS) in Lublin is holding the ceremony of awarding the title of doctor honoris causa UMCS to Prof. Jerzy Marian Brzeziński - a psychologist, professor of the Adam Mickiewicz University in Poznań. Professor Brzeziński is a psychologist, specializes in methodology, psychological diagnosis and ethics of scientific research. He is a member of the Polish Academy of Sciences. For many years he has been the dean of the Faculty of Social Sciences, director of the Institute of Psychology and head of the Department of Psychological Research at the University of Adam Mickiewicz in Poznań. Professor Brzeziński is a member of the Central Commission for Degrees and Titles. He published many scientific papers, including: «Methodology of psychological research» and «Experimental research in psychology and pedagogy».

University Adam Mickiewicz University in Poznan to hold a lecture on randomness in music

2018-12-11

University Adam Mickiewicz and the Academy of Music. Ignacy Paderewski in Poznań invite participants on December 13 for the lecture „Randomness in music“, which in the Hall of Lubranski at the university Collegium Minus will be given by Prof. Jarosław Grytczuk from the Warsaw University of Technology. The lecture is addressed to high school students and within the program «Mathematics in music and music in mathematics». It will be devoted to the broadly understood randomness that many composers use in their works. Randomness provides the performance of a musical piece depending on the toss of coin. Professor Grytczuk is a specialist in the field of discrete mathematics and theoretical

computer science. He conducts active scientific activity, and he is also a great popularizer of mathematics among a wide audience. He is also interested in the phenomenon of uniqueness in combinatorial structures used in contemporary music.

Researchers from the University of Silesia receive prizes from the Minister of Science and Higher Education

2018-12-11

Scientists of the University of Silesia became the winners of the awards of the Minister of Science and Higher Education. Prestigious awards are granted every year for outstanding individual and collective scientific and didactic achievements and organizational successes. The award for lifetime achievement in science, didactics and organization was received by Prof. Marian Paluch, head of the Department of Biophysics and Molecular Physics. The laureate works on high-pressure techniques in the study of molecular dynamics in condensed matter, charge in ionic liquids, phase transitions and crystallization kinetics. Dr Mariola Jabłońska, the head of the University Atmosphere Control Laboratory (ULKA), was awarded for organizational achievements. Her design is used to study air quality and sources and directions of pollution movement. ULKA is a mobile laboratory placed in the balloon basket and stationary laboratories for atmospheric research. Opole to hold a seminar on commercialization based on the experience of the Fraunhofer Institute

2018-12-11

The Technology Transfer Center of the Opole University of Technology (OP) and the Fraunhofer Design Center for Advanced Light Technologies invite participants to the seminar on „Practical aspects of commercialization on the example of the Fraunhofer Institute’s experience” on December 14th. The meeting was divided into two modules. The first module includes OP and the Fraunhofer Institute presentations of technology transfer, commercialization and implementation. The subject of knowledge transfer in the context of European trends and protection of industrial property will also be discussed. The second module will deal with the latest trends in light construction technologies, the development of materials and processes related to plastics, and technology for joining materials. The organizers are planning to present the possibilities of financing projects under domestic and foreign programs.

Catholic University of Lublin to hold a conference on culture and identity

2018-12-12

The Catholic University of Lublin (KUL) is holding a conference within the program „Polonia Restituta. The Decalogue for Poland on the 100th Anniversary of Regaining Independence „, dedicated to culture. -It is necessary to repeat after Pope John Paul II: Man lives a truly human life thanks to culture. His life is culture and he cannot live without culture. He is a creator of culture, it expresses him and he is confirmed in it - said Jarosław Gowin, deputy prime minister, minister of science and higher education. The participants of the event discussed the importance of national culture and Polish patriotism during the period of the partitions, and then occupation and Soviet domination. The conference was accompanied by the exhibition «KUL University of Independent Poland», an exhibition of postage stamps «Fathers of Independence» and an exhibi-

tion of the Baroque sculptures from the collections of the Museum of the Catholic University of Lublin. More: <https://polonia-restituta.pl/>

Competition: The Word of the Year 2018

2018-12-12

By the end of 2018 everybody can vote in a competition organized by the University of Warsaw for the most vibrant word of the passing year. The competition is organized for the eighth time. The catalog of words is updated each month and it is displayed on www.sloworoku.uw.edu.pl. It contains statistically the key words in Polish journals monitored as part of the «Words of the Day» and «Words on Time» projects. Currently, it includes the following words: «guardian», «supervision (financial)», «coalition», «constitution», «championship», «second round», «parade» The word with the highest number of entries will win in the internet competition. Last year, the word most frequently chosen by the internet users was «resident». Regardless of the Internet plebiscite, the word of the Year 2018 will also be chosen by the professors of linguistics. More: www.sloworoku.uw.edu.pl

II Ignacy Domeyko Latin American Congress

2018-12-12

On 15 and 16 December, the Department of Latin American and Comparative Studies at the University of Lodz and the Main Board of the Polish Association of Latin American Studies are organizing the Second Ignacy Domeyko Latin American Congress. The Congress, combined with the celebrations of the 40th anniversary of the Society and the 100th anniversary of Poland’s independence, will be an opportunity to analyse the Polish presence in Latin America, summarize Polish scientific accomplishments in the field of Latin American issues and continue dialogue on the possibilities of its further development. The meeting will start with a session with honorary guests representing Polish-American scientific communities in Latin America, followed by Polish-American, cultural, political, archaeological and anthropological thematic panels. Researchers from Gdansk University of Technology awarded by the Minister of Science and Higher Education

2018-12-12

Professor Piotr Dominiak from the Faculty of Management and Economics, Vice-Rector for Internationalization and Innovation of the Gdańsk University of Technology and Prof. Eng. Zbigniew Krzemiński from the faculty of electrotechnics and automation became the laureates of the Minister of Science and Higher Education Awards for 2018. Scientific interests of Prof. Krzemiński are primarily modelling of power electronic systems and converter drive using DSP processors. The scientist promoted 15 PhD holders, 5 of whom hold a postdoctoral degree. He is a reviewer of numerous publications, including monographs and 90 publications in domestic and foreign science magazines. Professor Dominiak focuses on the economics of the small and medium enterprise sector and the role of entrepreneurship in the economy. He is the author of over 120 original scientific papers. He promoted 19 PhD students, six of whom hold a postdoctoral degree.

Researcher at the Warsaw Medical University wins a prize from the European Orthodontic Society

2018-12-13

Dr MSc Ewa Czochrowska from the Department of Orthodontics of the Warsaw Medical University (WAM) received the Distinguished Teacher Award. The prize is awarded annually a distinguished European lecturer in the field of orthodontics by the European Orthodontic Society. Dr Ewa Czochrowska is the first Polish orthodontist who was honored with this award. The European Orthodontic Society is the oldest and largest orthodontic company in Europe. It was founded in 1907. The seat of the company is London. The Society publishes the European Journal of Orthodontics and organizes annual orthodontic congresses in various European countries.

Scientists from Torun seek dark matter in the Universe

2018-12-13

Scientists from the Faculty of Physics, Astronomy and Applied Computer Science of the Nicolaus Copernicus University published their article in the prestigious scientific journal *Science Advances*. The text describes the operation of the Earth's sensor network aimed at detecting dark matter. The network is based on the four most precise atomic clocks in the world located in the United States, Japan, France and Torun in Poland. The publication is the result of work of an international team of scientists, including the researchers from the Department of Atomic Physics, Molecular and Optical Institute of Physics of the University of Toruń: Dr Piotr Wcisło, MSc. Piotr Ablewski, Dr Eng. Sławomir Bilicki, Dr Marcin Bober, Dr Eng. Piotr Morzyński, Prof. Roman Ciuryło, Beata Zjawin and Dr Michał Zawada. The research was financed from the resources of the Foundation for Polish Science. More: <https://www.umk.pl/wiadomosci/?id=25832>

Project „Save the World!” becomes a part of the UN climate summit

2018-12-13

University of Silesia Children in cooperation with Katowice City of Gardens - Krystyna Bochenek Institution of Culture, Theater Bonn and Save The World invite inhabitants of Silesia to participate in the project „Save the World!” on December 14th. This is one of the events accompanying the UN climate summit. As part of the event, the University is planning lectures, theatrical and dance performance «The Little Prince», a concert of pop music and instrumental concert of the classical guitar. The event is addressed primarily to children and youth. The lectures and classes are to promote international cooperation between academic environments, cultural and educational institutions and self-government units, expanding knowledge about ecological problems and the possibilities of counteracting their negative effects, promoting cognitive, pro-ecological and pro-social attitudes, as well as stimulating passion and scientific and artistic passion.

Poznan professors awarded for inventiveness

2018-12-13

Three professors from the University of Adam Mickiewicz in Poznań were awarded the Honorary Medal for Merit for Inventiveness. Medals were awarded as part of the 100th anniversary of the Patent Office and the system of protection of industrial property in Poland. Professor UAM Jacek Guliński specializes in organosilicon chemistry and issues related to the transfer of innovation and technology, innovation policy, relations of science with economy and commercialization of research results. Professor Hieronim Maciejewski deals with technologies of preparation of organosilicon compounds, synthesis and modification of inorganic polymers, catalysis of hydrosilylation processes. Professor Stanisław Sołtysiński is a member of the national correspondent of the Polish Academy of Arts and Sciences, author of scientific publications in the field of commercial and inventive law, co-author of a four-volume commentary to the Commercial Code issued by

C.H. Beck. More: <https://amu.edu.pl/wiadomosci/aktualnosci/pracownicy/profesorowie-zwiazani-z-uam-odznaczeni-za-zaslugi-dla-wynalazczosci>

Medals of the 25th anniversary of the Faculty of Political Science at the Maria Curie-Skłodowska University in Lublin

2018-12-14

On December 14, 2018, the 25th anniversary of the Faculty of Political Science at the Maria Curie-Skłodowska University (UMCS) in Lublin will be held. During the event, the medals of the 25th anniversary will be awarded for long-term cooperation with the Faculty. Individual medals will be received by Krzysztof Żuk - Mayor of Lublin, Piotr Franaszek - director of the Center for the Meeting of Cultures in Lublin, Małgorzata Piasecka - Editor-in-Chief of the Polish Radio Lublin, Zbigniew Sobczuk - Art curator and President of the Society for the Encouragement of Fine Arts in Lublin and Katarzyna Kępa - director of the Municipal Labor Office in Lublin. Awards will also be given to the following institutions: NN Theater, Cultural Center, Homo Faber, Misericordia, Center for Eastern Europe and editorial offices of the *Gazeta Wyborcza*, the *Kurier Lubelski*, Radio Centrum, the *Dziennik Wschodni* and TVP Lublin.

PLN 50 million for the Information Technology Center

2018-12-14

The IT Championship Center is starting a grant project funded by the Digital Poland Project Center to provide IT classes for over 12,000 particularly gifted primary and secondary school students. As part of the project of 1,500 mentors including teachers, medallists and finalists of IT competitions, with the support of five technical universities: Lodz University of Technology, which is a project leader and a technical university from Wrocław, Gdańsk, Warsaw and the Krakow AGH University of Science and Technology will work out curricula and implement them through organized IT clubs activities. The project will be also supported by associations: Coding Masters, I Love Math and the Foundation for the Development of Electronic Education. Digital Poland Project Center has allocated nearly PLN 50 million for the implementation of the project.

Reportage at BBC Arabic on the research of scientists from the Jagiellonian University

2018-12-14

Reportage on research conducted at the Małopolska Biotechnology Center of the Jagiellonian University in Kraków by the Białystok Protein Crystallography Research Group under the supervision of Dr Grzegorz Dubin, appeared on BBC Arabic. Research conducted by Dr Dubin is to enable a better understanding of the structure of proteins and their functioning in the human body, which can be used in the creation of new drugs. The BBC's Arabic-language television channel presented material as part of the 4Tech program - a series of BBC Arabic reportages devoted to the latest scientific discoveries and technical inventions that are watched by millions of viewers, mainly from the Middle East and North Africa. See the BBC Arabic report: <https://youtu.be/3IGgqVtsWzM>

Students of the University of Zielona Góra Polish become champions in surgical sewing

2018-12-14

Students of the medical faculty of the University of Zielona Góra won the Polish Surgical Sewing Championship. Zielona Góra University organized competition for 80 medical students from 20 teams from all over Poland. The competition included 4-person teams from medical universities, clubs and student associations from all over the country. The two-day competition was divided into two parts. In the first, theoretical part, the lectures were held to prepare participants in terms of content. The second practical part consisted in checking the skills acquired on the first day. Students from Zielona Góra defended the title from last year. The second place was taken by the team from Wrocław, and the third by the students from Lublin. The main goal of the championship is to raise the knowledge and skills of medical students in the field of surgical stitching techniques, knowing modern suturing materials and the integration of medical universities from Poland.

Professor Janusz Janeczek from the University of Silesia becomes the laureate of the Honorary Pearl of the Polish Economy

2018-12-14

Professor Janusz Janeczek from the University of Silesia received the Honorary Pearl of the Polish Economy - the distinction of the English-language economic monthly „Polish Market” during the event at the Royal Castle in Warsaw. Professor Janusz Janeczek, head of the Department of Geochemistry, Mineralogy and Petrography of the University of Silesia, is a geologist, a specialist in the field of geological aspects of radioactive waste disposal, atmospheric dust mineralization and pegmatites. He is the chairman of the Council for Nuclear Safety and Radiological Protection and the Council of the National Science Center. Honorary Pearls are awarded to outstanding personalities and institutions recognized as authorities in the fields of economy,

science, culture and propagation of patriotic and social values. The event is organized by the English-language economic monthly „Polish Market” - a magazine promoting the Polish economy, as well as science and culture in the country and abroad.

Deputy Prime Minister Gowin visits the Mediatheca in Piotrków Trybunalski

2018-12-17

Piotrków Trybunalski's Mediatheca began its activity. It is a place for the exhibitions, workshops, a discussion club or literature meetings. - I believe that Mediatheca will become a place where programs promoting science will be implemented - from classes of the University of the Young Explorers, through lessons for primary and secondary pupils, to lectures for students of the University of the Third Age. Science should serve all of us»- said Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education, visiting the Mediatheca. By the end of 2019, a scientific part of the project with multimedia interactive exhibitions and a workshops will be created in the Mediatheca. The exhibitions will be organized as multi-functional stands with built-in multimedia content, assuming a high interaction with visitors.

Project of scientists from the Krakow University of Agriculture awarded in the international competition

2018-12-17

The project developed with the participation of Polish scientists was awarded in the international competition in the field of forest management under the name „ForestValue - Innovating the forest-based bioeconomy”. The project «Innovative strategies of forest management for sustainable bioeconomy in the era of changing climatic conditions and weakening of the stability of forest stands (I-MAESTRO)» will be implemented by a Polish team from the University of Agriculture in Krakow under the direction of Prof. Eng. Jarosław Socha in cooperation with research groups from France, Germany and Slovenia. The coordinator of the international consortium is the National Research Institute of Science and Technology for Environment and Agriculture (IRSTEA) from France. More: <https://forestvalue.org/>

Medical University of Silesia to launch the Museum of Medicine and Pharmacy

2018-12-17

The Museum of Medicine and Pharmacy was officially opened at the Faculty of Pharmacy with the Division of Laboratory Medicine at the Medical University of Silesia. For the needs of the exhibition, the ground floor of Student Dormitory nr 2 in Sosnowiec was adapted. In the museum visitors can watch several thousand of exhibits - including the apparatus of a lung machine made by Prof. Tadeusz Paliwoda, cardiac surgeon of the Silesian Medical Academy, operating table of Prof. Wiktor Bross and the first Polish hip joint endoprosthesis designed by the team of Dr Janusz Daab from Piekary Śląskie. The museum will serve as a didactic aid for students, and will contribute to popularizing knowledge about the achievements of Silesian and Zagłębie medicine and the pioneering achievements of doctors and pharmacists working in Silesia. The university has spent over PLN 2.6 million from its own resources for the renovation and equipment of the museum. 100,000 PLN was allocated by the City Hall of Sosnowiec.

Scientist from the University of Bialystok awarded statuette of the 70th anniversary of Polish Information Technology

2018-12-18

Dr Eng. Wiesław Póljanowicz from the Faculty of Mathematics and Computer Science at the University of Bialystok received the statuette of the 70th anniversary of Polish Information Technology. The honorable prize is granted by the Main Board of the Polish Information Processing Society to persons and institutions especially deserving for the development of computer science in Poland. In addition to scientific and didactic work, Dr Eng. Póljanowicz participated in the implementation of the project «Modern and effective education in cooperation with entrepreneurs» (2009-2011). Its effect was the implementation of an e-learning platform at the University of Bialystok.

Record year in the history of the Aeronautical Center of the Rzeszów University of Technology

2018-12-18

In 2018, 30 people completed the total air training for a plane pilot license in the Aeronautical Center of Rzeszów at University of Technology. This is the best result in the 40-year history of the center. The year 2018 marks the record in the history of the pilotage of the Rzeszów University of Technology. In total, 114 students spent 6 156 hours in the air, which is an exceptional result to compare with 2017, when it was 3 839 hours. In 2018, 11,107 take-off and landing operations were carried out - said Mieczysław Górak, director of the Aviation Training Center at the Rzeszów University of Technology. Rzeszów University of Technology has been training civil aviation pilots for over 40 years, and since 2007 it trains also aviation mechanics. Rzeszów University has educated over 780 pilots of civil aviation.

Dr hab. Wojciech Sowa becomes the chairman of the Scientific Council of the international HERA program

2018-12-18

Dr Wojciech Sowa, coordinator of disciplines in the humanities, social and art department of the National Science Center, became the chairman of the Scientific Council of the international HERA program (Humanities in the European Research Area). The President of the Council is responsible for the coordination of ERA-Net HERA's strategic activities, representation of the network's position on issues of contemporary humanities and conducting a dialogue with the scientific community. HERA is a network supporting research in the humanities. The consortium is to initiate the cooperation of scientists from various European research centers and to draw attention to the social, cultural and political challenges of contemporary Europe.

Institute of Aviation to undertake cooperation with the Jenbacher group companies

2018-12-18

The Institute of Aviation in Warsaw signed a framework agreement on cooperation with Jenbacher Ltd and INNIO Jenbacher GmbH & Co OG. The contract concerns cooperation in the field of scientific research, expertise and technical analysis and engineering services - in particular through the constant use of the laboratory base of the Institute of Aviation for the needs of the activities of companies from the Jenbacher group. Jenbacher Werke was founded in 1959 and produced gas and diesel engines as well as locomotives. In 2003, the company was bought by General Electric. INNIO Jenbacher GmbH & Co OG is a leading provider of gas engine technology, power equipment and digital platform and related services in the area of electricity generation and gas compression. The Polish company Jenbacher Ltd concentrates in its activities on research and development.

Polish-Japanese conference on the Holocaust and Hiroshima held at the University of Nagoya

2018-12-18

The „Memory of World War Two in Poland and Japan: The Holocaust and Hiroshima in Comparative Perspectives” Conference was organized by Prof. Ariko Kato from World Liberal Arts Center. The topic was a comparison of the effects of two national disasters: Hiroshima for the Japanese and the Holocaust of Jews for Poles. Scientists from the Polish Academy of Sciences spoke about Polish attitudes towards Jews during the Holocaust (Prof. Barbara Engelking, Prof. Jacek Leociak), new research concerning the Kielce pogrom (Prof. Joanna Tokarska-Bakir) and the meanders of post-war historical policy (Prof. Piotr Forecki). The conference was a fruitful platform for exchanging experience and a similar meeting in Poland will probably be organized.

Delegation of the University of Silesia visits Beijing University of Technology

2018-12-18

The delegation of the University of Silesia (UŚ) visited the Beijing University of Technology (BJUT). During the visit, agreement for student exchange was signed, and further development of cooperation between universities was discussed. The cooperation agreement was signed in Beijing by the vice-rector for international and national cooperation, Prof. Tomasz Pietrzykowski. It regulates issues of students' stay as part of part-time studies and trips to Polish and Chinese summer schools. During the visit, the promotion and development of Polish-Chinese higher education and the organization of the academic forum in 2019 were also discussed. BJUT and UŚ are associated in the Polish-Chinese academic consortium, and the cooperation between them is dynamically developing. The Chinese Language and Culture Center has been operating at the University since January, and several dozen Chinese students took part in this year's summer school of language, literature and Polish culture organized in Cieszyn.

Poznań holds a conference on international business in a changing world

2018-12-18

Over 450 scientists from all over the world participated in the international scientific conference „International Business in a Transforming World - the Changing Role of States and Firms” organized at the University of Economics in Poznań. The conference was organized jointly by the European International Business Academy and the University of Economics in Poznań. Discussions focused on the role of the state and the market in the context of strengthening the position of enterprises from post-transformation economies, increasing the intensity of international transactions using new technological solutions, continuing changes in global value chains, and developing international cooperation in investments and trade. Plenary sessions, with the participation of researchers from the field of international business and international economics and representatives of the business world, were accompanied by panel sessions, PhD seminars and workshops on writing articles for prestigious scientific journals.

National Science Center in Krakow to receive the new headquarters

2018-12-19

The National Science Center (NCN) has begun operating in a new headquarters at ul. Twardowski in Krakow. This is the first such important institution located outside the current capital of Poland - said on Monday, December 17, 2018, Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin, during the inauguration. NCN is an executive agency of the Ministry of Science and Higher Education. In the office building, located near the ICE Krakow Congress Center, nearly 170 employees will have at their disposal more than 5,000 square meters of modern space. Deputy Prime Minister Gowin thinks that the NCN is a great opportunity for Krakow. As he emphasizes, locating the center outside of Warsaw is an expression of the philosophy of deglomeration. - The idea

of sustainable development of Poland should also be expressed in the fact that key institutions are located in other cities than the capital - said the Deputy Prime Minister.

Dr Eng Andrzej Chmielarz becomes the president of the Prometia association

2018-12-19

Dr Eng. Andrzej Chmielarz, Prof. of the Institute of Non-Ferrous Metals in Gliwice was elected the President of the Prometia Association - Mineral Processing and Extractive Metallurgy for Mining and Recycling Innovation Association. Prometia is an international non-profit association based in Brussels, whose aim is to promote innovation in the processing of non-ferrous ores and extractive metallurgy of primary and secondary raw materials. The association deals with strengthening competences in the field of processing of mineral resources and supporting the development of the industry in Europe by promoting the most innovative, breakthrough scientific solutions emerging in European research teams, through access of industrial partners to qualified European research and development centers and assistance in organizing activities aimed at acquiring funding for research.

Katowice conference discusses the legal and economic aspects of cooperation with China

2018-12-19

The Interfaculty Scientific Circle of Chinese Culture and Law invites participants to the conference „Legal and economic aspects of cooperation with the People's Republic of China“, which will take place on February 15 at the Faculty of Law and Administration of the University of Silesia. This is the first conference on the subject of law and business in Silesia in relations with the People's Republic of China. The goal of the event is to interest the academic community of China. The conference is addressed to students, scholars and business representatives, including small and medium-sized enterprises. Passive participation is free and does not require registration. The deadline for sending abstracts is January 7, 2019. Detailed information: <https://konferencjeiny.wixsite.com/info>

Professor Matthias F. Melzig becomes doctor honoris causa of the Warsaw Medical University

2018-12-20

Professor Matthias F. Melzig from the Free University of Berlin received his honorary doctorate from the Warsaw Medical University (WUM) during the 11th Scientific Conference of the Faculty of Pharmacy with a Division of Laboratory Medicine. Professor Matthias F. Melzig, associated with the German university conducts research and scientific relations with scientists from the Warsaw Medical University since the 1960s. As emphasized Prof. Piotr Wroczyński, dean of the Faculty of Pharmacy, the result of this long-term joint work is not only the scientific development of the Medical University, but also the education of future generations of scientists and students. The special title of the WUM was gained by Prof. Matthias F. Melzig for researching plants as a source of new drugs.

Researcher from the Jagiellonian University wins the Award of the Biotechnology Committee of the Polish Academy of Sciences

2018-12-20

Dr Katarzyna Magiera-Mularz from the Faculty of Chemistry at the Jagiellonian University in Krakow received the Prof. Waclaw Szybalski Award of the Biotechnology Committee of the Polish Academy of Sciences for the best original work of a young Polish researcher in the field of biotechnology published last year in an international journal. Dr Katarzyna Magiera-Mularz was awarded for the publication «Bioactive Macrocyclic Inhibitors of the PD-1 / PD-L1 Immune Checkpoint», which appeared in the journal «Angewandte Chemie International Edition». In the award-winning publication, Dr. Magiera-Mularz presented the results of her work, which is «a significant contribution to the development of PD-L1 inhibitors with potential use in immunotherapy - the most promising among recently developed anti-cancer strategies».

National Center for Nuclear Research participated in the project of construction of a multi-element container inspection system

2018-12-20

The National Center for Nuclear Research (NCBJ) and the National Tax Administration participated in the international C-BORD project, which aims to develop and test a comprehensive, cost-effective solution for inspecting containers and large loads at the borders of the European Union - in particular in seaports. Five control methods were developed in the project: an X-ray scanner, radiometric gates, a neutron system, a photo-grafting system and a vapor analyzer of a container. The idea is that C-BORD, operating in a wide range of non-intrusive inspections, could detect drugs, tobacco, explosives, chemical warfare agents, human smuggling and nuclear

materials. The project has shown that it is technically possible to develop and integrate a multi-element inspection system. The tests were carried out at a roadside checkpoint in Hungary and in container ports in Gdansk and Rotterdam.

University of Physical Education in Wroclaw to carry out projects for children and seniors

2018-12-20

Two projects of the Wrocław Academy of Physical Education received funding under the call of the National Center for Research and Development 'Third University Mission'. The total amount of funding is over one million PLN. Teachers of the Department of Human Biology and the Department of Physiotherapy at the Faculty of Physiotherapy, under the supervision of Prof. Krzysztof A. Sobiech will carry out the project «Children's competences in the field of lifestyle for 5». The project will be implemented in selected primary schools of Wrocław in the years 2019-2021. Dr Jarosław Fugiel and Dr Krystyna Chromik from the Department of Physical Anthropology will carry out the project «Senior activity is their efficiency and health», which assumes the preparation and implementation of an exercise program for the elderly people. Classes will be conducted in the form of lectures and exercises to increase the level of physical activity. The project will be attended by 240 people aged 60+ and will be implemented in 2019-2021.

Toruń scientist becomes the laureate of the Association of Historians of Antiquities

2018-12-20

Dr Karol Kłodziński, a scholar of the University Library in Toruń, became the laureate of the Association of Historians of Antiquities for the book „Officium a rationibus. A study on the history of the Roman administration during the principate period”. The book was published by the Scientific Publisher of the Nicolaus Copernicus University in Toruń as part of the prestigious series «Monographs FNP». It was devoted to the «a rationibus» («accountancy / bills») office - the main central institution managing the finances of the early Roman Empire, and the officials who held the post. The aim of the award is to honor the achievements of Polish researchers in the field of broadening and popularizing knowledge about antiquity. In the annual competition procedure, authors of scientific or popular science books with a high research level may take part in the contest.

Students of the University of Wrocław to participate the world championship in team programming

2018-12-20

Students of computer science at the University of Wrocław, Jarosław Kwiecień, Michał Górniak and Anadi Agrawala, qualified for the World Team Programming Championships. They were promoted by taking 4th place in the championship of Central Europe. Academic Team Programming Championships are organized by the Association for Computing Machinery. They are the oldest, the most prestigious and the biggest in terms of the number of participants competitions of this type. Representatives of universities from all over the world take part in them. During the competitions, participants receive several programming tasks to solve and only one computer. Effective cooperation is extremely important in this situation, especially since every second counts - the classification takes into account both the correctness of the tasks performed and the time

of solving them. And there are so many tasks that team members work on them separately, but the solutions are to write in computer files.

Professor Jan Burdukiewicz awarded for the development of the Confucius Institute in Wrocław

2018-12-20

Professor Jan Burdukiewicz received the Individual Performance Excellence Award in recognition of his contribution to the development of the Confucius Institute at the University of Wrocław. The medal was handed over by Tian Xuejun, Minister of Education in China, during a conference in Chengdu organized on the tenth anniversary of the founding of Confucius' Institutes. The Confucius Institutes are established by Hanban, a non-governmental Chinese organization whose main task is to share the Chinese language, as well as the culture and traditions of China. There are 548 institutes in the world, with 5 in Poland: in Kraków, Opole, Poznań, Wrocław and Gdańsk. Professor Jan Burdukiewicz, vice-rector for international cooperation and international projects at the University of Wrocław, is the chairman of the Council of the Confucius Institute. He is involved in archeology, specializing in the Stone Age. He conducted research on the Silk Road and worked closely with Chinese scientists.

Researcher from the Warsaw Medical University awarded the Prize of Presidents of the Polish Cardiac Society

2018-12-21

Dr Medical Sciences Marcin Grabowski from the 1st Department of Cardiology Clinic of the Medical University of Warsaw (WUM) has been awarded this year's prize of the Presidents of the Polish Cardiac Society (PTK). The award committee appreciated the series of seven papers on the use of clinical and biochemical markers in the diagnosis and prognosis of patients with acute cardiological conditions. The awarded works enrich the knowledge about the results of distant treatment of acute coronary

syndromes, independent deathly risk factors after leaving the hospital - informs Bayer Ltd, the founder of the prize. The PTK President's Award is an individual prize, awarded for an original, defined scientific achievement or an innovative solution in the field of clinical or experimental cardiology, documented by works published in peer-reviewed scientific journals.

Professor Kofman received the prize of André Lallemand of the French Academy of Sciences

2018-12-21

Professor Włodek Kofman from the Department of Dynamics of the Solar System and Planetology at the Space Research Center of the Polish Academy of Sciences (CBK PAN) was awarded the prize of André Lallemand from the French Academy of Sciences for achievements in the field of space research. In the justification of the decision, the Academy announced that the prize is a proof of recognition for contribution to the research of Mars and comets 67P / Churyumov-Gerasimenko, which were made using low-frequency radars MARSIS (Mars Express space mission) and CONSERT (Rosetta space mission). The André Lallemand prize (Prix Lallemand) is awarded every three years. It honors outstanding scientists for work in various fields of astronomy, preferring those studies that may be used in other fields of science.

Day of the Young Architect held at the College of Ecology and Management

2018-12-21

The Builder magazine held the Young Architect's Day at the College of Ecology and Management (WSEiZ) in Warsaw. The event was attended by architecture students from various universities and students of two architectural and construction schools from Warsaw. Participants of the Young Architects Day had the opportunity to participate in lectures, workshops conducted by outstanding architects and in industry consultations with representatives of several companies. Participants of the event were welcomed by the rector of the University of Economics, Dr Monika Madej, Dean of the Faculty of Architecture Dr Eng. Małgorzata Leszczyńska-Domańska and Marek Zdziebłowski, publisher of the «Builder» magazine. The inaugural lecture «Specification of the design of medical facilities» was given by Dr Eng. Michał Grzymała-Kazłowski, lecturer at WSEiZ and owner of the Archimed architectural studio.

PhD student of the University of Life Sciences in Poznan becomes finalist of the Science Promoter competition

2018-12-21

Mateusz Kęsy - PhD student at the Department of Insects Breeding of the Institute of Zoology at the University of Life Sciences in Poznań became a finalist of the 14th Science Promoter contest. The young scientist will compete for the victory in the Animator category. Mateusz Kęsy popularizes knowledge related to zoology and protection of the natural environment among children and adults. He conducts scientific workshops in kindergartens and schools, open lectures and classes with students. During many journeys around the world, he gains nature collections, which he then uses during scientific workshops. He is the author of many publications on nature conservation, participant and co-organizer of scientific conferences in Poland and abroad. He was a scholarship holder of programs for young scientists and a finalist of numerous competitions.

He was awarded many times for scientific and educational activities. The final of the competition is organized by the Science in Poland service and the Ministry of Science and Higher Education and will take place in January.

Professor Cezary Madryas admitted to Academia Europaea

2018-12-21

Professor Cezary Madryas, rector of the Wrocław University of Technology, was admitted to Academia Europaea. It is a prestigious, international organization associating scientists from various fields. The Academy is based in London, its members are almost 4,000. outstanding specialists in medicine, chemistry, physics, mathematics, economics, humanities and social sciences. There are over 70 Nobel laureates in this group. The Academy exists since 1988, introduces the highest standards in science, research and education, and supports an interdisciplinary approach to learning. It is divided into 20 sections in four subject groups - humanities, social and related, strict and biological sciences. Professor Madryas was elected to the commission of 400 members (including 15 from Poland) of the Physics and Engineering from the nomination of Prof. Adrian Bejan from Duke University and Prof. Keith Moffatt of the University of Cambridge.

Biologists' Night at the University of Szczecin

2018-12-21

For the 8th time the University of Szczecin invites viewers to take part in the Biologists' Night. On January 11, employees and students of the biology department prepared interesting lectures, demonstrations and workshops as well as laboratory classes. The themes of the Biologists' Night will be related to the world of plants, immunology, biochemistry, cell biology and genetics. The organizers prepared electric bioimpedance demonstrations and workshops as well as laboratory classes during which participants will be able to analyze your body composition - fat, muscle and body water. They will also be able to isolate and view their

own DNA, find out how animals communicate with each other and what tricks flowers use to attract pollinating insects. It will also be possible to find out what plants are gathered at home and find out if bacteria are our enemy or ally and why laughter helps to loose weight and heals. Silesian Science Festival to be hold from January 12 in Katowice

2018-12-21

From January 12 to 14, Katowice will host the 3rd Silesian Science Festival. The program included more than one hundred and fifty exhibition stands, dozens of lectures and presentations from various areas of science as well as workshops and meetings with interesting people. The largest scientific event in southern Poland is organized by the University of Silesia along with the City of Katowice. The slogan of the event is „Energy”. The official inauguration of the festival is scheduled for Saturday, January 12 at Teatr Śląski in Katowice. It will be led by Dr Tomasz Rożek - a graduate of the University of Silesia and one of the most recognized scientific journalists in Poland. The inauguration program provides for a conversation with a special guest - astronaut NASA Nicole Stott, a musical-visual presentation of the project CallTrain MO4 / HG4 prepared by Prof. Marian Oslislo from the Katowice Academy of Fine Arts and accompanying musicians, as well as presenting Silesian Academic Awards. More: <http://www.us.edu.pl/3-slaski-festiwal-nauki-katowice>

Branch of the Polish Geopolitical Society established at the State Higher Vocational School in Chełm

2018-12-24

The Board of the Polish Geopolitical Society based in Krakow agreed to establish its branch at the State Higher Vocational School in Chełm. The Polish Geopolitical Society was founded in 2008 as a nationwide scientific association. The main activity of the Society is organization of scientific conferences, conducting independent scientific research in thematic committees, publishing activities and popularizing geopolitics. The Polish Geopolitical Society supports Geopolityka.net portal. It publishes the «Geopolitical Review», «European Journal of Geopolitics», as well as books and reports. One of the first events organized by the branch of the Society in Chełm will be a lecture delivered by General Waldemar Skrzypczak on contemporary threats and challenges for the security of Poland, which will take place on 16 January 2019 at the State Higher Vocational School in Chełm.

Scientist of the Adam Mickiewicz University in Poznan receives the prize of Prof. Hofmokl

2018-12-24

Professor Jacek Pyżalski from the Adam Mickiewicz University in Poznań received the prize of Prof. Tomasz Hofmokl in the „Information Society” category. The award was presented during the gala on the occasion of the 25th anniversary of the Scientific and Academic Computer Network - the National Research Institute (NASK). Professor Jacek Pyżalski works at the Faculty of Educational Studies of the Poznań university. He is the author of numerous publications, a member of scientific networks and a coordinator of many research projects, a coach in communications and difficult behaviors. His research interests include: electronic aggression, new media, communication at school, health promotion

and cyberbullying among young people. Professor Tomasz Hofmokl was the creator and first director of NASK, a research institute supervised by the Ministry of Digitization, which for 25 years has been working on the development of the information network and society in Poland.

5 inventions from the Lodz University of Technology awarded at the Seoul International Invention Fair 2018

2018-12-27

Five inventions from the Department of Microelectronics and Information Technology of the Lodz University of Technology were awarded at the Seoul International Invention Fair 2018 in South Korea. Three inventions received gold, and two silver medals. The gold medal was received for the system of optimization of construction costs and exploitation of underground high voltage cable lines by Dr Eng. Andrzej Cichy, Dr Eng. Bartosz Sakowicz, Prof. George Anders and Dr Eng. Marek Kamiński. The second medal was awarded for the ARUZ project - Real-Complex Systems Analyzer, which is a chemical process simulator using FPGA (Field-Programmable Gate Array) technology by Dr. Eng. Jarosław Jung, Dr Piotr Polanowski, Dr Eng. Rafał Kiełbik, Dr Eng. Krzysztof Hałagan, Dr Eng. Witold Zatorski, Prof. Jacek Ulański, Prof. Andrzej Napieralski and Prof. Tadeusz Pakuła, Marek Cieślak. The third gold medal was obtained by MSc. Piotr Perek, Dr. Eng. Dariusz Makowski, Dr. Eng. Aleksander Mielczarek and Prof. Andrzej Napieralski for the stereoscopic image registration.

Solar panels imitating plants - an innovative project of a student of the AGH University of Science and Technology

2018-12-27

Karolina Gocyk, student of the AGH University of Science and Technology in Krakow has developed an innovative device for controlling solar panels.

The structure imitates the movements of plants following the most favorable sunshine. The project assumes placing a solar panel on a stem-shaped skeleton, which has smaller solar cells and the mechanisms controlling the structure connected to them. The skeleton is flexible and can move freely towards the changing position of the sun. It allows the panels to change the angle of inclination depending on the incidence of light, in order to use solar energy as effectively as possible. Karolina Gocyk won her award for the project during the Gdynia E(x)plory Week Festival 2018.

Students from the University of St. Thomas to take part in an educational program at the Catholic University of Lublin

2018-12-27

The Open University of the Catholic University of Lublin from 4 to 30 January 2019 will host a group of students from the University of St. Thomas (Minnesota, USA), who will participate in the educational program John Paul II in His Polish Context. The main axis of the program is the analysis of the activity, philosophy and teaching of Karol Wojtyła - Pope John Paul II in the socio-cultural context. Outstanding specialists, mainly employees of the Catholic University of Lublin, will present issues related to the history and culture of Poland of Pope John Paul II. In addition, participants will visit Zamość, Kozłówka, and Warsaw and go on a tour around places closely related to John Paul II. They will see Krakow, Czestochowa and Wadowice. The four-week education program will be completed with exams.

Professor Jacek Jassem becomes the chairman of the board of the Polish League of Fight Against Cancer Polska foundation

2018-12-27

Professor Jacek Jassem, head of the Chair and Clinic of Oncology and Radiotherapy at the Medical University of Gdańsk, became the president of the board of the Polish League of Fight Against Cancer Foundation. The former president Dr Łukasz Andrzejewski resigned. The Foundation's mission is to care for the health and lives of hundreds of thousands of Polish women and Poles struggling with cancer, and the aim of the activity is to constantly increase the chances of their cure and reduce the cancer threat. The Foundation was created thanks to the involvement of over thirty experts representing various professions and environments who believe that the struggle against cancer should be a priority of health policy in Poland. Professor Jassem is a member of many Polish and foreign scientific societies, author of several hundred original scientific papers and academic books.

Music Integrative Children's University held at the University of Casimir the Great in Bydgoszcz

2018-12-27

The Department of Music Education at the University of Casimir the Great in Bydgoszcz (UKW) will receive over 700,000 PLN from the National Center for Research and Development for the implementation of the project „Music Integrative Children's University”. The project will be implemented in 2019 - 2021. As part of the project, children and youth from the Special Education and Care Center for Weak Seeing and Blind Children and Youth in Bydgoszcz and from the First Degree Public Music School in Górska will participate in music integration activities at the UKW music education department. The classes will be run by academic teachers from the University of Bydgoszcz. The project also

includes visits and workshops in the cultural institutions of Bydgoszcz, an integration camp, and the recording and release of the CD.

Night of Biologists is coming

2018-12-28

On Friday, 11 January 2019, the 8th „Biologists' Night” will take place in 34 scientific centers and natural sciences and biology departments of universities in Poland. The night encounter with biology will consist of nearly 1,500 events: shows, presentations, workshops, lectures and exhibitions. Researchers will try to answer the questions: How do animals and plants spend the winter? Does everyone sleep at night? What is happening in the laboratories of biologists? As the organizers stress, that night «dozens of scientists fascinated by the phenomenon of Life, will come out of laboratories to tell people what their work is and how unusual phenomena can be observed even with very simple methods”. More: <http://nocbiologow.pl/noc/index.php>

Professor Paul H. Dembiński becomes the honorary doctor of the Warsaw School of Economics

2018-12-28

Rector and Senate of the Warsaw School of Economics invite participants on 16 January 2019 to participate in the awarding Prof. Paul H. Dembiński, director of the think-tank of the Financial Observatory in Geneva, professor at the University of Freiburg in Switzerland with the title of doctor honoris causa. Professor Dembiński is also the director of the Eco Diagnostic Institute of Economic Research and the president of the International Association for Christian Social Teaching and a member of the Scientific Council of the Vatican Foundation, Centesimus Annus. He published in Polish, among others. «Finances after a heart attack. From financial euphoria to economic order» and «Economic crisis and crisis of values»(together with Simona Beretta).

KomPlasTech 2019 - the 26th international conference organized by the AGH University of Science and Technology

2018-12-28

The Faculty of Metal Engineering and Computer Science of the AGH University of Science and Technology in Krakow, in consultation with the AGH UST AGH UST Academics and Graduates Foundation, organizes the 26th International Conference „Computer Methods in Materials Technology - KomPlas-Tech 2019” from 13 to 16 January in Zakopane. The event is part of the 100-year anniversary of the AGH. The aim of the conference is to present scientific achievements and exchange experiences in the field of representatives of science and industry in the field of IT applications in various fields of metal processing, as well as industrial processes management. More: <http://www.komplastech.agh.edu.pl/index.php>

Scientist of the University of Gdańsk receives Wiktor Kemula Medal

2018-12-28

Professor Piotr Stepnowski from the University of Gdańsk became this year's laureate of the Medal of Wiktor Kemula. The award was granted for outstanding scientific achievements in the field of analytical chemistry. Professor Stepnowski is the head of the Department of Environmental Analysis at the Faculty of Chemistry and Vice-Rector for Science and International Cooperation at the University of Gdańsk. He is a recognized global authority in the field of research and environmental protection. In recent years, his research focuses on the detection and assessment of the effects of residues of pharmaceuticals in the natural environment. Wiktor Kemula Medal is a distinction awarded by the Polish Chemical Society and the Committee of Analytical Chemistry of the Polish Academy of Sciences for outstanding achievements in the field of analytical chemistry. The patron of the award was a chemist considered to be the founder of the Polish school of polarography, the electrochemical analytical method. Professor Kemula was the inventor of the electrode with a hanging drop of mercury.

Professor Jerzy Łuczka becomes a member of the National Council of the Center for Science

2018-12-28

Professor Jerzy Łuczka, head of the Department of Theoretical Physics at the University of Silesia, becomes a member of the National Council of the Center for Science (NCN). The NCN Council consists of twenty-four scientists representing various disciplines of science. Their duties include defining priority areas of basic research and conditions for conducting competitions for research projects, determining the amount of funds allocated for them, as well as announcing competitions. Professor Łuczka conducts research on classical and quantum statistical physics of non-equilibrium processes, physical basis of quantum information, nanophysics

and modeling of biological and Brownian molecular motors. From 2012, he is chairman of the Council of Statistical and Non-linear Physics at the European Physical Society, he is also a member of the Liaison Scientists Network (Deutsche Forschungsgemeinschaft - Foundation for Polish Science).

Professor Alojzy Z. Nowak joins the elite group of economists

2018-12-31

Professor Alojzy Z. Nowak, dean of the Faculty of Management at the University of Warsaw, became a member of the Scientific Council of the Institute of New Structural Economics at the University of Beijing. Professor Nowak joined to 22 outstanding scientists from around the world, with four Nobel Prize winners in the field of economic sciences Prof. Edmund S. Phelps from Columbia University, Prof. Michael Spence from New York University, Prof. Roger Myerson from the University of Chicago and Prof. Christopher Pissarides from the London School of Economics. The Institute of New Structural Economics at the University of Beijing was founded in 2015 on the initiative of Prof. Justin Yifu Lin, former vice president and chief economist of the World Bank, who acts as the leading adviser to the President of China on economic matters. See the Council: <http://www.nse.pku.edu.cn/en/Department/index.html?type=Advisory>

Fulbright Slavic Award Scholarships

2018-12-31

Until 18 January 2019 students can apply for a Fulbright Slavic Award for a scholarship to the US in the academic year 2019-2020. The scholarship is intended for scholars employed at Polish universities and scientific units who specialize in the culture and history of Poland and Central and Eastern Europe. It enables conducting classes with students at one of two universities cooperating with the Polish-American Fulbright Commission: University of Washington in Seattle, where the trip lasts 3 months and includes courses on literary studies, film studies or culture studies, in a historical, social or political per-

spective, in the context of Polish and Central and Eastern Europe culture, and the University of Illinois in Chicago - a trip for 4 months covering courses on cultural studies, gender studies or film studies and media studies in the context of Central and Eastern Europe. More: <https://fulbright.edu.pl/slavic/>

Conference „Foreign students in Poland 2019”

2018-12-31

The annual conference „Foreign students in Poland 2019” will be held on 17-18 January 2019 at the Warsaw University of Life Sciences. The conference will be devoted to current issues of internationalization of Polish higher education, development of mobility of students and researchers as well as promotion of intellectual potential of cities and regions. The organizers of the event are the Conference of Rectors of Academic Schools in Poland, the Warsaw University of Life Sciences and the Perspektywy Educational Foundation. They invite rectors, vice-rectors, deans, directors and specialists from international cooperation offices and promotion offices, as well as representatives of municipal and provincial self-government authorities to participate in the conference. Conference program: <http://www.studyingpoland.pl/konferencja2019/program>

Student of the Warsaw Medical University wins the Queen Silvia Nursing Award

2018-12-31

Paulina Pergoł, a nursing student at the Faculty of Health Sciences of the Medical University of Warsaw, has won the Polish international competition for the Queen Silvia Nursing Award. The student of Warsaw University Paulina Pergoł was awarded for the project «Letters from a friend», consisting of a systematic exchange of correspondence between volunteers and residents of Social Welfare Homes or Homes for OAPs. The laureate drew attention to the mental condition of the elderly people and suggested to improve it without pharmacological agents, through the correspondence with older, lonely persons who would feel important and not left. The award was established by the Swedish Care International organization as a gift for the Queen of Sweden Sylvia.

Ministry of Science working on a list of awarded scientific publications

2019-01-02

In 2019, a full list of awarded scientific publications will be published. The Ministry of Science and Higher Education is working on a list of annexes, which is to reduce so-called „predatory publications“, which publish scientist books regardless of quality. The researcher will receive a greater number of points needed for further career and scientific development for using official publishing houses from the list. Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin assured that the list of publications is being prepared by experts, not employees of the Ministry. Minister Gowin added that the aim of the list is to limit the publication of «pseudoscientific works».

Polish Arctic Station to seek employees

2019-01-02

The Institute of Biochemistry and Biophysics of the Polish Academy of Sciences has announced recruitment for participants of the 44th expedition to the Polish Antarctic Station such as electricians, cooks, car mechanics, IT specialists and ecological observers. Applications will be accepted until January 13, 2019. The Polish Antarctic Station «Arctowski» is looking for employees for a six-month and all-year expeditions. For the six-month expedition, they seek a maintainer (service, maintenance and repair of floating equipment), field assistant (support of scientists in the field), and a cook. On a year-long trip, they seek expedition manager, an energy specialist, an electrician, a car mechanic, a computer specialist, a paramedic, an ecological observer, a sea observer, a hydrochemical and glaciological observer. More: <http://arctowski.aq.pl/rekrutacja/>

Student of the AGH University of Science and Technology in Krakow created model of the campus from LEGO pieces

2019-01-02

Maciej Kocot, an IT student at the electronics and telecommunications informatics department of the AGH University of Science and Technology in Krakow, built a model of the AGH campus at the scale of 1: 1250 from LEGO pieces. Maciej Kocot composed the model himself. He worked on the project from April to December 2018. He started with the most recognizable main building (A-0) and the headquarters of the Department of Computer Science (D-17), the building where he spent the most time. Then the Center of Energy was established. The author measured individual campus buildings and calculated their dimensions into blocks, decomposed all segments, changed them to make the effect more accurate and stable. The final building, consisting of several thousand pieces, is placed on a 27 x 81 cm board. See the model of the AGH campus: <http://zbudujmy.to/2018/12/10/agh/>

Fokker D.VII aircraft recreated at the Poznan University of Technology

2019-01-02

Aviation enthusiasts from the Poznań University of Technology reconstructed three Fokker D.VII planes. Flying replicas of aircraft captured by Wielkopolska insurgents in December 1918 at the Ławica airport in Poznań were one of the attractions of the picnic on the occasion of the 100th anniversary of the Greater Poland Uprising. In December 1918, Polish insurgents captured 300 German machines in Poznań, which later became the beginning of the interwar Polish aviation and took part in the Polish-Bolshevik war. Aircraft replicas weigh about 400 kg (the original weighed 540 kg). They differ in the covering materials - the originals were made of impregnated flax, a replica is made of polyethylene material. Airplanes were equipped with electronics, avionics and engines based on Volkswagen elements, and also machine-gun mimics. The propellers have been ordered from a specialist manufactory. The machines form the Greater Poland Squadron of Freedom. It is a project supported by the Poznan University of Technology, the voivodship self-government, and the Polish Motorsport Association.

European award for the cultural heritage education project

2019-01-02

The Erasmus Plus ANHER project - Innovative format of education and training in integrated archaeological and natural heritage, headed by Prof. Arkadiusz Marciniak from the Adam Mickiewicz University in Poznań received the award of the Directorate General for Education, Youth, Sport and Culture of the European Commission. The project from the Poznan university is the only Polish project awarded by the Directorate General. The award was granted for the development of innovative forms of education for groups of professionals in the field of cultural heritage. As a result of the recognition of its educational value and good practices, the project has become part of the information and promotion strategy of the European Commission for the European Year of Cultural Heritage and Erasmus Plus projects.

Polish-Australian cooperation in Antarctica

2019-01-03

The Polish Academy of Sciences (PAN) and the Institute of Geophysics PAS have reached an agreement with Geoscience Australia, under which scientists from both countries can conduct joint research in Earth sciences in the Antarctic area. This is the first document on scientific cooperation in Earth sciences, concluded at this level between Poland and Australia. The document will enhance joint scientific activities within the Australian Antarctic Strategic Science Plan and the Polish Strategy for Polar Research. The first stage of cooperation will be revitalization of the Polish polar station named after Antoni B. Dobrowolski, located in the Bunger Oasis (Eastern Antarctica) and unused for over 40 years. The station will start erecting autonomous geophysical stations on the exposed rocks of the Antarctic continent. After 40 years, the first expedition of Polish geophysicists to the Bunger Oasis is planned in 2022.

„Partnership for Innovation” conference to be held at the Krakow University of Technology

2019-01-03

The Technology Transfer Center of the Krakow University of Technology together with the American Chamber of Commerce in Poland invites participants to the conference „Partnership for Innovation” on January 15. The conference is to summarize the «Incubator of Innovation +» project, under which 16 pre-implementation works were selected at the Krakow University of Technology in spring 2017 within the TRL + competition. The Investment Committee of representatives of science and business chose projects with the highest implementation potential. The event will also be an opportunity for scientists from Krakow to establish direct contacts with representatives of American and Polish companies interested in the commercialization of their solutions.

International conference Shapes of Futures in Bielsko-Biała

2019-01-03

The Institute of Modern Languages at the University of Technology and Humanities in Bielsko-Biała invites participants to the third international conference „Shapes of Futures”. The subjects of the conference are issues related to various dimensions, conceptualizations and visions of the future in culture, art, film and literature as well as political and social sciences. The following topics are scheduled for March 1 and 2: visions of the future and their dynamics; futurism and studies about the future; functions of the future and processes shaping the future (shaping of trends, simulations, modelling, anticipation and planning of the future). The organizers are also planning a discussion on the politics of time and temporality of politics, relations between the past, present and future, and a block of topics „future and narrative” (narrations and metaphors of the future, science fiction and speculative fiction as catalysts in studies on the future, history of the future). More: <https://shape-soffutures.wordpress.com/>

Conference „Cultural heritage of the borderland” to be held in Gorzów Wielkopolski

2019-01-03

Department of the Polish Language of the Faculty of Humanities and the Academic Center of Ukrainian Studies of the Academy in Gorzów Wielkopolski in cooperation with the Tourism Department of the Carpathian National University in Ivano-Frankivsk (Ukraine) invites participants to the International Scientific Conference „Cultural heritage of the borderland”. The aim of the conference planned for 14 and 15 May at the University of Gorzów is to present the broadly understood cultural heritage of the borderland in terms of its impact on cultural and scientific development, ethnic and national identity, religious and mutual relations. The conference is addressed to cultural researchers, linguists, historians, sociologists, political scientists, literary scholars, euroregional officers, pedagogues, catechists, theologians, psychologists and others.

Scientific Award of the Polish Academy of Sciences for a Poznań scientist

2019-01-03

Dr Michał Klichowski from the Adam Mickiewicz University in Poznań received a scientific prize from the Faculty of Humanities and Social Sciences of the Polish Academy of Sciences (PAN) for the book „Learning in CyberParks. A theoretical and empirical study”. - The considerations in the book revolve around constitutive concepts for the idea of learning in CyberParks. Theoretical analysis, however, led to a surprising discovery: one of the latest concepts of neuroscience, the concept of double-task costs, suggests that this type of learning may not only be inefficient, but also in some way dangerous for students. To clarify this issue, I carried out two experiments in the paradigms of cognitive neuroscience, whose assumptions and results were presented in the second, empirical part of the book. The PAN scientific prizes are awarded for outstanding and creative works published in the four years preceding their granting.

Seminar on Crisis, Migration and Affective Tuning in Iceland to be held at the University of Lodz

2019-01-04

On Thursday, 17 January 2019, the Institute of Ethnology and Cultural Anthropology of the University of Lodz invites participants to the seminar „Crisis, migration and affective tuning in Iceland“. The seminar will be led by Dr Marek Pawlak, anthropologist at the Institute of Ethnology and Anthropology of the Jagiellonian University in Krakow. He will present changes in the Icelandic political economy and the socio-cultural transformations of the country, triggered by neoliberalism. The participants of the meeting will also learn how the newly created subjectivity of the 90s prepared a fertile ground for the crisis in 2008 and its consequences.

„ Week of Law State at the Jagiellonian University“

2019-01-04

From January 14 to January 25, 2019, the „ Week of Law State at the Jagiellonian University“ will take place in Krakow. Organizers of the event will answer the following questions: Is the idea of the rule of law necessary for the functioning of a democratic state? What is the Polish dispute over the rule of law? How is the idea of the rule of law changing in other countries and in the European Union today? On January 14, participants will listen to the lecture of Prof. Andrzej Grabowski entitled «The theory of a constitutional state of law: a paradigm shift?». The last of 6 lectures will be a paper of Prof. Fryderyk Zoll «Can civil law fulfil its role without a state of law?» which will be delivered on January 25.

IT specialists of the Poznań University of Technology awarded by the Prime Minister

2019-01-04

Two scientists from the IT department of the Poznań University of Technology received prizes from the Prime Minister. The award for the highly-rated achievements was given to Dr Eng. Miłosz Kadziński for his work «Methodology of computer-aided decision making based on various forms of indirect preferential information and a comprehensive analysis of the resilience of solutions». The research concerns computer-aided decision-tools allowing for solving complex decision-making problems. The prize for the best PhD dissertation was awarded to Dr. Eng. Michał Melosik for «Reconfigurable hybrid chaotic generator for hardware cryptography». The scientist has developed a chaotic generator model whose structure ensures that random properties are maintained, even in the case of interaction from hardware Trojans.

University of Economics in Katowice invites participants to the AIR 2019 conference

2019-01-04

Department of Statistical Methods and Mathematics in Economics and Department of Labor Market Analyzes and Forecasting at the University of Economics in Katowice invite participants to the 11th International Scientific Conference „Analysis of International Relations 2019. Models and Methods of Regional Development“. The organizers are planning to discuss following topics: analysis of international economic relations in the Eurasian area; price risk of capital market products and allocation of investment capital in the development of regions; risk modeling and analysis in the insurance market; new energy technologies in regional development; models and methods for forecasting regional development and theoretical considerations of regional development. The conference will be supported by the Legal and Economic Sciences Committee of the Katowice branch of the Polish Academy of Sciences.

University of Gdańsk joins the consortium „European University of the Seas“

2019-01-04

Representatives of the University of Gdańsk and five other European universities have signed a declaration of participation in the „European University of the Seas“ initiative (SEA-EU), which aims to obtain funding for the creation of a European university. The SEA-EU consortium, along with the University of Gdańsk, includes: Universidad de Cádiz (Spain) - leader; Sveučilište u Split (Croatia); Université de Bretagne Occidentale (France); Christian-Albrechts-Universität zu Kiel (Germany) and L-Università ta (Malta). The idea of establishing European universities has been initiated by member states of the European Union (EU), the Council and the European Commission. By 2024, about twenty European universities are to be established, which will form a basic university network in the EU, enabling students to obtain academic degrees by combining studies in EU countries and thus contributing to the increase of international competitiveness of European universities.

100th anniversary of AGH University of Science and Technology to be celebrated in Krakow

2019-01-07

In 2019, the AGH University of Science and Technology in Krakow celebrates the 100th anniversary of the university. The Krakow academy has prepared many events to mark the jubilee. The charity concert «Together for children - 100 years of AGH-UST» will be held on February 7. On April 8, an exhibition on the history of the founding of the Mining Academy will be opened. Exactly that day in 1919, the Council of Ministers of Poland adopted a resolution on the establishment of the Mining Academy in Krakow. In May in the Silesian Beskid Mountains, the 100th AGH Anniversary the Stars Ride and the Brainstorm will take place to show the most interesting student projects awarded in contests. From June 13 to 15, the 4th World Congress of Polish Engineers is planned, and on October 18-19 the Main Celebrations of the Jubilee and the World Congress of AGH UST Graduates will take place.

Conference „Fear of strangers and hostility“

2019-01-07

The conference “Fear of strangers and hostility” will take place on 11 January 2019 at the University of Warsaw. The main topic of the conference will be relationship of Polish students to foreigners studying at universities in Poland. The meeting is to show positive aspects of cooperation between people of different cultures, as well as encourage openness and establish friendly contacts with foreign students. Co-organizers of the event are the Commission for Communication and Social Responsibility of the Conference of Rectors of Academic Schools in Poland and the Marek Dietrich Institute for the Problems of Contemporary Civilization. Conference programme: <https://uksw.edu.pl/images/konferencje/program-konferencji-lekprzedobcymi.pdf>

Modern Management Conference 2019 to be held at the University of Economics in Katowice

2019-01-07

Student Scientific Circle of Human Resources Development at the Department of Human Resources Management of the University of Economics in Katowice invites participants to the conference Modern Management 2019 on January 15. The event aims to develop students' competences and skills through participation in lectures and workshops conducted by specialists and business practitioners. The conference gives an excellent opportunity to develop modern competences and skills as well as integration of academic environments with business environments - students will have the opportunity to consult, consult their ideas or take part in recruitment processes prepared by business partners especially for the academic community. The event will benefit both students and entrepreneurs looking for educated, young and ambitious people to work in their teams.

Student of Gdansk University of Technology wins the Young Innovation competition for PGNiG

2019-01-07

Eng. Jędrzej Wrzaskowski, a student of Power Engineering of the Gdańsk University of Technology, took the second place in the fourth competition for the research and development project Young Innovation for PGNiG (Polish Oil and Gas Mining). The subject of his work is „Demonstration system for obtaining hydrogen from DME as an element of electromobility”. The awarded work contains a proposal to solve the problem of hydrogen storage. It assumes the use of synthetic fuel DME (dimethyl ether) as a carrier, and then the recovery of hydrogen in the process of steam reforming. The small size of the installation allows it to be mounted in an electric vehicle powered by a fuel cell, enabling the use of hydrogen in a safe and ecological way. The Innovative Young Competition for PGNiG aims

to find innovative ideas from the areas of activity of the PGNiG Group, which may initiate the implementation of research and development projects.

Architecture students of the Wrocław University of Science and Technology awarded for the Best Social Project 2018

2019-01-07

Students of the architecture faculty at the Wrocław University of Science and Technology received a distinction in the competition for the Best Social Project 2018. The award was granted for the help of disabled people in the design of their apartments. The awarded project is the Joint Architectural Initiative (WIA), which has been run for 8 years by the Association for Support of the Development of Disabled People and the PoPArch Scientific Circle. The aim of the WIA is to help people with disabilities to remove architectural and technical barriers and to communicate. The WIA also trains students of the Faculty of Architecture at the University and the Faculty of Interior Design and Design at the Academy of Fine Arts to create projects that comply with the principles of universal design. The first place in the competition was awarded by the Harvest project of company AmRest, which is implemented jointly with the Food Banks. They were awarded for their program to prevent a large scale food waste at KFC restaurants.

Deadline for submitting applications for the program „Cooperation” is expiring

2019-01-08

Until 14 January 2019, farmers, scientists, entrepreneurs and agricultural advisors forming Operational Groups can submit applications for support within the program „Cooperation”, which is a part of the Rural Development Program for 2014-2020. The goal of Operational Groups is to introduce innovative solutions to agricultural practice. The «Cooperation» program enables transfer of knowledge from research and development centers to fields. Projects will leave the drawers of scientists and will be delivered to farmers and processors. Applications for assistance in the implementation of projects under the Cooperation program can be submitted to the headquarters of the Agency for Restructuring and Modernization of Agriculture, in Warsaw at ul. Poleczki 33.

Researchers from the Maria Curie-Skłodowska University win the main prize in the „Geology 2018” competition

2019-01-08

Employees of the Institute of Physics of the Maria Curie-Skłodowska University in Lublin (UMCS): Dr Andrzej Pelc, Prof. of UMCS, Dr Tomasz Pieńkos, Dr Andrzej Trembaczowski and Dr Artur Wójtowicz received the main prize of the Minister of the Environment in the „Geology 2018” competition. The aim of the competition is to promote innovative services and solutions, to promote activities aimed at sustainable management of environmental resources and to support scientific development and popularization of geological knowledge. The jury of the competition awarded projects for the development and promotion of Polish geology, scientific and technical solutions and fundamental discoveries in this field. The award was given to UMCS scientists in the «Industry, Innovation» category for the work aimed at improving the mass spectrometric techniques of studying the isotopic composition of elements in the natural environment and geological formations. More: <https://www.gov.pl/web/srodowisko/>

Word „Konstytucja” wins in the plebiscite on „Word of the Year”

2019-01-08

The noun „Konstytucja” (Constitution) won the internet voting on the competition for the „Word of the Year” organized by the University of Warsaw and was also selected by the jury of linguists. As much as 69.02 percent Internet users voted for the word „Konstytucja”. The second place was taken by the noun «dane»(data) with 5.71 percent of votes, and the third - independence (4.26 percent). «The Constitution was not the most popular word of any of last months, but the graph of the key characteristics of this word from January 1 to December 31, 2018 indicates that it was an expression present in the public discourse throughout all that time» – comment the scientists from the University of Warsaw.

Law on the Łukasiewicz Research Network delivered to the Sejm

2019-01-08

A new draft Law on the Łukasiewicz Research Network has been delivered to the parliament. The first version of the proposal was delivered to the Sejm a year ago. At that time, however, it did not pass the legislative procedures. The new project assumes that a network of research institutions will be created in Poland, which will be subject to one central organization. As emphasized the Ministry of Science and Higher Education, the Łukasiewicz Center will be the coordinator of scientific and educational efforts. It will also develop a «procedure for providing specialist tools to external entities», including enterprises, which will allow to build a bridge between science and business. The point is to change discoveries and scientific work into economic success. The Łukasiewicz Research Network will cost PLN 25 million in the first year of operation and PLN 17.5 million per year in the next 10 years.

Szczecin scientist to receive Award of the Minister of Science and Higher Education

2019-01-08

Dr Andrzej Potemkowski, Prof. University of Szczecin (US) received the award of the Minister of Science and Higher Education for the organization of „Inter-university Conference Day of the Brain”. The conference has been organized by the Department of Clinical Psychology and Psychoprophylaxis of the Institute of Psychology, together with the Department of Psychiatry of the Pomeranian Medical University, the Regional Medical Chamber, Szczecin's departments of the Polish Neurological Society and the Polish Psychiatric Association and the Cogito Association from 2012. It includes the series of lectures and research in the field of neuroscience. The Minister of Science awards are granted annually for outstanding scientific results, individual and collective didactic achievements and organizational successes made in the past year. 69 representatives of the universities received them in the competition this year.

Researcher of the Poznań University of Technology nominated for the Polish Intelligent Development Award

2019-01-08

Krzysztof Wegner from Poznan University of Technology has been nominated for the Polish Intelligent Development Award 2019 in the category: „Scientist of the Future”. He received his nomination for the project „MUCHA - Spatial Image Registration and Processing System” financed by the National Center for Research and Development under the LIDER VIII program. The aim of the Poznań researcher's work is to develop an innovative system of recording and processing of spatial images with very high resolution, a large number of registered beams and a wide angle of acquisition. The result of the project will be the technology of the construction of a new generation of spatial image cameras. Along with the spatial image registration system, specialized algorithms processing the recorded spatial mobile scene will be developed. They will enable virtual walks in previously recorded mobile spatial scenes and precise geometric measurements of registered objects.

Researcher of the University of Wrocław awarded for her research on smell

2019-01-08

Dr Anna Oleszkiewicz from the Institute of Psychology at the University of Wrocław received the award for scientific achievements in 2018, funded by the Research section on the Smell and Taste of the German Otorhinolaryngological Society. The award was granted during a conference in Bern, where Dr. Oleszkiewicz presented new age standards of the most popular test of smell «Sniffin «Sticks», developed on a sample of over 9100 people. She published an article on this subject in the journal European Archives of Oto-rhino-laryngology. According to the test results, new standards of sex and age were necessary because the previous normative values were based on smaller sample sizes

- especially in the group of older individuals. After developing the results of the new tests, a significant effect of sex and age on the olfactory efficiency was observed. The most pronounced was the increase in the olfactory test results between 5 and 20 years of age and a dramatic decline between the ages of 60 and 71.

Popular science lectures to be held at the Astronomical Observatory of the Adam Mickiewicz University

2019-01-08

The Institute of Astronomical Observatory of the Adam Mickiewicz University in Poznan invites participants to a series of popular science lectures in 2019. Interesting issues in the field of astronomy will be delivered by university scientists. The lectures will be held once a month, twice a day. Admission is free, but advance booking is required. After each lecture, the visit the Observatory is planned to use the telescopes and observe the sky. Proposals and dates of lectures for the first half-year: on January 18 - 100 years of the Astronomical Observatory in Poznań; February 15 - About women looking at the sky; March 15 - A giant among giants; April 12 - About baobabs and the Little Prince, or what hides the asteroid; May 10 - Solar eclipse in 1919. a General Theory of Relativity and June 14 - «A small step for man, but a big leap for humanity» More: <http://www.astro.amu.edu.pl/pl/popularyzacja/wo/>

Nearly PLN 50 million for raising wages of scholars at the institutes of the Polish Academy of Sciences

2019-01-09

The authorities of the institutes of the Polish Academy of Sciences (PAN) will receive nearly PLN 50 million from the Ministry of Science and Higher Education to raise minimum wages. The additional money is the reaction to the appeal of scientists working in institutes who demanded equating the level of their earnings with salaries of scholars of public universities, who will receive significant pay-rises thanks to

the increase of the minimum wage. - Increasing the subsidy for maintaining the research potential will enable to rise salaries in institutes, and it is a kind of gentlemen's agreement between the Ministry of Science and the leadership of the Polish Academy of Sciences. The Ministry of Science does not currently have the right to set a minimum level of remuneration, as it happens in the case of university employees - said Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education.

Students of the Silesian University of Technology advanced to the second stage of the Global Management Challenge

2019-01-09

The team of students of the Silesian University of Technology „Golden Eye” advanced to the second stage of the 19th largest business simulation in the world - Global Management Challenge 2018/2019 (GMC). In GMC, teams of three to five people run companies competing on the virtual market. In the first stage of the simulation, 155 teams took part. They competed for five weeks for the highest investment result of their companies. 60 teams qualified for the next stage In the advanced training program GMC uses gamification- the use of mechanisms from computer games in business. The simulation gives the opportunity to take on the role of the board of directors and conduct the company for the next quarters in the virtual market. GMC is the only competition in Poland in which students compete with employees of companies in management. It has been organized since 1980 in the form of nationwide on-line competitions. The initiative has already gathered over half a million participants worldwide.

Qualifiers for the XXVI International Championship in Mathematical and Logic Games started

2019-01-09

The qualifiers for the XXVI International Championship in Mathematical and Logic Games have begun. The organizers have already provided a set of qualifying tasks and new regulations. The best competitors will come to the Wrocław University of Science and Technology in May, where the finals will be held. The participants are divided into eight categories: primary school, junior high school, high school and college pupils, students, mathematicians and IT specialists, and other adults (regardless of education or profession). The first two qualifying rounds are conducted online. Solved tasks should be sent by 20 January 2019 via a special registration form. The winners of the May competition will form Poland's representation at the XXXIII International Championship in Mathematical and Logic Games in Paris, known as unofficial world maths championships. In 2018, Polish enthusiasts of maths won 8 medals, including 3 golds. More: <http://pwr.edu.pl/uczelnia/aktualnosci/matematycy-nastart-11067.html>

Forum of Polish Universities at the University of Białystok

2019-01-10

Members of the Polish Universities Forum will meet on 11-13 January at the University of Białystok (UWB). The congress is organized by the Student Parliament of the largest university in the Podlasie region. The topic of the discussion will include reform of higher education and the role of students in the process of implementing the Law on Higher Education and Science. The Forum of Polish Universities is an autonomous organization of the student self-governments of universities associated in the Conference of Rectors of Polish Universities. It is a commission of the Students' Parliament of Poland. The discussions will be held on the campus of the University of Białystok. The most important point of

the congress will be the selection of the new authorities of the Polish Universities Forum.

Professor Ryszard Tadeusiewicz receives the title of the Science Populariser 2018

2019-01-10

Professor Ryszard Tadeusiewicz, Dr Aleksandra Ziemińska-Buczyńska, Dariusz Aksamit, the Circle of Papillon Language Lovers, Centrum Nowoczesności Młyn Wiedzy and Paulina Łopatniuk became laureates of the 2018 Science Promotion contest organized by the Polish Science Agency in Poland and the Ministry of Science and Higher Education. In the Competition Science Populariser, the organizers award people and institutions sharing their knowledge with people unrelated to the academic environment and revealing the secrets of modern science. The main prize and the title of the Science Populariser 2018 was awarded to Prof. Ryszard Tadeusiewicz from the AGH University of Science and Technology in Krakow. The professor deals with the promotion of topics related to biocybernetics, biomedical engineering, artificial intelligence, automation and robotics.

Piotr Dardziński becomes the government plenipotentiary for the reform of the functioning of research institutes

2019-01-10

Prime Minister Mateusz Morawiecki appointed the secretary of state of the Ministry of Science and Higher Education (MNiSW) Dr Piotr Dardziński to the position of the government's representative for the reform of the operation of research institutes. In turn, Piotr Müller, former Undersecretary of State at the Ministry of Science and Higher Education, who took office in December 2018, became a secretary of state. Deputy Minister Piotr Dardziński will be responsible for creating the integrated network of research centers whose main task will be transfer

of knowledge to the economy. Reform of research institutes is one of the priorities of the Polish government's policy. Its implementation is an important element of the implementation of the Strategy for Responsible Development.

Professor Jerzy Sobczak becomes a member of the Management Committee of the European Action COST

2019-01-10

Professor Eng. Jerzy Sobczak from the Department of Foundry of the AGH University of Science and Technology in Krakow was nominated as a member of the Management Committee of the European Action COST, at the request of the Ministry of Science and Higher Education. COST (The European Cooperation in Science and Technology) provides funding for the creation of research networks called COST activities. These networks offer open space for collaboration between scientists across Europe (and beyond), and thus give impetus to research and innovation. Researchers can create a network based on their own interests and research ideas in any field of science.

XI Robotic Arena to be held in the Wrocław Congress Center

2019-01-10

On January 12, robots from around the world will compete under the 11th Robotic Arena in the Wrocław Congress Center. The competition is organized by the Scientific Circle „KoNaR”, operating at the electronics faculty of the Wrocław University of Technology and the student organization BEST Wrocław. During this year's competition, the organizers prepared new tasks: Combat of robots with saws, knives, hammers and pickaxes and Rescue task, i.e. searching for a missing person in a maze, and then transporting them to a safe base. This year, drones will appear on the Robotic Arena. The following tournaments are: Drone (performing the figure resembling the symbol of infinity along the designated route) and Drone Sandbox - fighting for the title of ace of the sky on a specially prepared

track. Robotic Arena is one of the largest robotic events in Poland. The aim of the competition is to have fun, integrate the environment and promote robotics.

6th International Consumer Conference in Katowice

2019-01-10

The Faculty of Law and Administration of the University of Silesia, the Association of Consumer Ombudsmen and the Foundation for the Faculty of Law and Administration of the University of Silesia Facultas Iuridica invite participants to the 6th International Consumer Scientific Conference „Consumer Accident Investigation. A new order for consumers”. The conference will be devoted to consumer rights and issues related to new legal regulations in this area. Participants will have the opportunity to discuss practical and theoretical protection of consumers, exchange experiences and undertake domestic and foreign cooperation. The conference will take place on February 28 and March 1 at the Faculty of Law and Administration of the University of Silesia (Katowice, 11B Bankowa, Auditorium No. 7) and at the Arena Hotel (Tychy, General de Gaulle 8).

Ministry of Science to recruit members of the Science Evaluation Commission

2019-01-11

The Ministry of Science and Higher Education has started recruitment of candidates for the members of the Science Evaluation Commission. Applications will be accepted until January 25, 2019. The tasks of the commission include evaluating the quality of scientific activities, preparing draft lists of scientific monographs and scientific journals and peer-reviewed materials from international conferences and preparing analyzes and evaluations of the quality of scientific activity and quality of education in PhD schools. The Ministry is looking for people having the highest scientific authority in academic environments, dealing with issues within the scope of individual science disciplines, as well as possessing outstanding scientific achievements. World Logics Day to be held at the University of Warsaw

2019-01-11

This year, the World Logic Day will be celebrated for the first time at the University of Warsaw (UW). The Institute of Philosophy of the University of Warsaw invites students to participate in open lectures held as part of the event „World Logics Day at the University of Warsaw” on January 14. The aim of the event is to mark the role of logics among other sciences and in social life. The initiator of the World Logic Day is Prof. Jean-Yves Beziau from the University of Rio de Janeiro, organizer of congresses devoted to various aspects of logics. He chose the date of January 14, because it is a day associated with the life of world-renowned logicians who became patrons of the event: Polish Alfred Tarski (118th anniversary of birth) and Austrian Kurt Gödel (41st death anniversary). There are currently 29 universities in different parts of the world involved in the World Logic Day.

Researcher of the Medical University of Gdańsk becomes a laureate of the Science Populariser competition

2019-01-11

Paulina Łopatniuk from the Department of Physiology of the Gdańsk Medical University has become one of the winners of the Science Populariser competition organized by the Polish Press Agency and the Ministry of Science and Higher Education. The Gdańsk researcher runs a scientific blog «Patologists». She discusses various medical issues, especially in the field of pathology, oncology, reproductive biology, infectious and parasitic diseases, and preventive vaccinations, in accessible way. The 14th «Science Promoter» competition ended on January 7 at the Copernicus Science Center in Warsaw. The ceremony was attended by Deputy Prime Minister,

Minister of Science and Higher Education Jarosław Gowin and Vice President of the Polish Press Agency Łukasz Świerzewski. The competition has been organized since 2005. Awarded blog: <https://patolodzynaklatce.wordpress.com/>

Prof. Kazimierz Darowicki from the Gdańsk University of Technology receives Primum Cooperatio prize

2019-01-11

Professor Eng. Kazimierz Darowicki, head of the Department of Electrochemistry, Corrosion and Materials Engineering at the Faculty of Chemistry of the Gdańsk University of Technology, received the Primum Cooperatio prize. The award is given to scientists of the Pomorze region for outstanding scientific achievements combined with documented activities in the implementation of their scientific achievements in the economy. It has been granted since 2014 by the Employers of Pomerania organization. Professor Eng. Kazimierz Darowicki leads the Chair of Electrochemistry, Corrosion and Materials Engineering, a world-renowned scientific department dealing with the study of corrosion and protection against corrosion. He developed and implemented maintenance-free, automatic system for monitoring corrosion of the waterworks of the lower terrace of the city of Gdańsk, as well as methods for assessing the condition of linings and anti-corrosive coatings in flue gas desulphurisation installations at the Bełchatów Power Plant.

Researchers of the Nicolaus Copernicus University in Toruń exploring the medieval port of Puck

2019-01-11

Researchers from the Department of Underwater Archeology of the University of Nicolaus Copernicus in Toruń are investigating the remains of the early medieval port in Puck. Their work is carried out as part of the European Virtual Arch project „Visualize to Valorize” financed from the Interreg Central Europe program. Apart from the University of Toruń

and the City Hall in Puck, Croatia, the Czech Republic, Austria, Italy, Slovakia, Slovenia and Germany take part in the project. The undertaking assumes the popularization and dissemination of knowledge about the archaeological heritage. The implementation of this goal is based on the use of virtual and augmented reality methods, which are increasingly popular tools for the presentation of unreachable spaces, including the remains of past landscapes and archaeological sites. More: <https://www.umk.pl/wiadomosci/?id=25867>

Scientific conference on the social role of the film to be held in Katowice

2019-01-11

The University of Silesia in Katowice and the SWPS University invite participants on April 4th and 5th to the third national scientific conference „Film psycho-tropy”. The motto of this year’s meeting is „The Social Role of the Film”. The program includes thematic sessions, a student and poster sessions, lectures of invited experts, a discussion panel with the participation of researchers, practitioners and creators, as well as certified workshops for teachers. The meeting will be an opportunity to exchange experiences and good practices. The conference is addressed to a wide range of researchers from various disciplines, PhD students of various fields of study, teachers, school pedagogues and psychologists, people using film in education, prevention and therapy, filmmakers, as well as film enthusiasts.

Children's channel Nickelodeon together with the Warsaw University of Technology to teach children programming

2019-01-14

On 4-8 February 2019, the broadcaster of the children's television channel Nickelodeon in cooperation with the Institute of Automation and Applied Computer Science, Warsaw University of Technology is organizing a winter holiday course of programming for children in Warsaw. During the workshop, children in two age groups: 8-11 years and 12-15 years will learn programming skills including creating websites, applications and games under the supervision of specialists and educators. Children can participate in trips to the Warsaw University of Technology and to the Copernicus Science Center, spherical cinema, workshops and relaxation exercises with elements of yoga for children. Applications can be submitted on the website: www.nick.com.pl/technickcamp

President of the Polish Space Agency to award the best student diploma theses in the field of space engineering

2019-01-14

The Contest Jury of the Scientific Award of the President of the Polish Space Agency awarded the best student diploma theses in the field of space engineering. In the category of engineering works, the jury awarded Piotr Skoczylas of Rzeszow Technological University for his thesis titled: «The Theseus engine. A proposal for the reliable and affordable suborbital propulsion system». In the master's thesis category, the first prize was received by Michał

Hałoń from the Warsaw University of Technology for his work «Detecting and Recognizing Markers for the European Rover Challenge mobile robot competition». The aim of the competition is to promote individual and team achievements of students of Polish universities in the field of space engineering, conducting educational activities in the field of research and use of space and conducting promotional activities in the field of the outer space.

Professor Aleksandra Ziemińska-Buczyńska from the Silesian University of Technology awarded as a Science Communicator

2019-01-14

Professor Aleksandra Ziemińska-Buczyńska from the Silesian University of Technology was awarded as the Science Communicator of the Year 2018 in the scientist category. The Science Communicator competition has been organized since 2005 by the Polish Press Agency and the Ministry of Science and Higher Education. The laureate is a microbiologist and director of the Center for Science Popularization, which was founded at the University of Technology in 2017. - I am an active scientist, teacher and science communicator. In addition, I try to coordinate popular science activities at my university, because I like to share my knowledge - says Prof. Ziemińska-Buczyńska. The activities at the Center include «Tailored learning» - classes tailored to the individual needs of the student, «Junior and Senior University of Technology» - classes for children with carers. Individual classes with scientists for the winners of school competitions are also organized there.

Researcher at the Medical University of Gdansk receives the Education Star

2019-01-14

Dr Sławomir Wójcik, assistant professor at the Department of Anatomy and Neurobiology and head of the Recruitment Department at the Medical University of Gdańsk became the laureate of the competi-

tion „Internationalization Stars 2019” organized by the Educational Foundation „Perspektywy”. He won in the Star of Education category - Teaching Star. The laureate has been involved in the internationalization of universities and science in Poland for over 15 years. The area of his activities includes national and international communication, recruitment for Polish and English studies, teaching at the level preparing for higher education (anatomy and neurobiology) and preparation for recognition exams. The aim of the competition is to award and promote people with outstanding achievements in the internationalization of Polish universities. Applications for awards can be submitted by universities, student organizations, university employees and students.

Graduate of Architecture department at Rzeszów University of Technology wins nomination to ArchiPrix International 2019

2019-01-15

Luiza Pośluszny, graduate of architecture at the Faculty of Civil and Environmental Engineering and Architecture of the Rzeszów University of Technology received a nomination for the ArchiPrix International 2019 competition as an award for her diploma thesis „Roofs of the city - the concept of urban reconstruction”. It is an international competition organized in the form of a biennial competition, presenting the best diploma projects sent from around the world. In her project, Luiza Pośluszny focused on the space above people. She chose Wrocław to implement her diploma thesis. - My work draws attention to the problem of non-functional places with potential. It is an attempt to improve the quality of urban space with the possibility of free shaping of roofs of the city - explains Luiza Pośluszny. More: <http://www.archiprix.org/2019/?m=22>

Dr Henryka Bochniarz to hold a lecture at the University of Lodz on economic challenges in 2019

2019-01-15

On January 17, 2019, Dr Henryka Bochniarz will conduct a lecture entitled „A new global order or a new global mess?” at the Faculty of Economics and Sociology at the University of Lodz (UŁ). Dr Bochniarz will try to answer the following questions: What challenges await us in 2019? After years of economic growth, in 2019 the world is waiting to slow down. How will it affect the economic condition of the European Union and Poland? European economy: how to find a place in the new global economic order? Relative economic stability and peace in Europe are not enough for the European Union to gain a secure position in global disorder. Henryka Bochniarz completed her PhD in economics. She is the founder and the president of the Confederation Lewiatan and the vice-president of BUSINESSEUROPE, the largest employer organization in the European Union.

Project of the Wrocław Academy of Fine Arts and the Labvonn company

2019-01-15

After six months of intensive cooperation, the Wrocław Academy of Fine Arts (ASP) and the Świebodzice company Labvonn completed the project under the program „Dolnośląskie Bonus for Innovation”. The result of the project is the preparation of a comprehensive design documentation and prototype of a bag for a dog or cat, a bed and a piece of furniture for a cat. The Labvonn company offers the furniture and accessories for animals. It announces the implementation of designs for mass production developed by students of the Wrocław university.

The program «Dolnośląski Bonus for Innovation» is to support the cooperation between business and scientific environments offered by the Lower Silesian Regional Development Agency. The budget of the project, implemented from June to December 2018 by the Department of Design of the Academy, amounts to 71 thousand PLN.

Scientific Information Center and the Academic Library in Katowice to talk on the problem of „predatory magazines”

2019-01-15

The Scientific Information Center and the Academic Library in Katowice (CINBA) invites participants on January 17 to lecture of Dr. Aneta Drabek, who will talk on the problem of „predatory” magazines and publications, and will help recognize unfair practices used by the so-called predators. Scientists are increasingly the victim of fraud made by the part of predatory publishers, whose main purpose is extortion of texts and money for publishing them. Such magazines are usually not subject to either the publishing or the review process. Their activities focus primarily on convincing potential authors to publish them in their publishing house and collecting the fee. CINBA is a shared library of two Katowice colleges: the University of Economics and the University of Silesia.

Poznan scientist wins the scientific prize of the Polish Society of Microbiologists

2019-01-15

Dr Eng. Wojciech Smulek from the Department of Organic Chemistry of the Poznan University of Technology, as the leading author, received the scientific II degree prize of the Polish Society of Microbiologists, for the article „Sapindus saponins, impact on hydrocarbon, biodegradation by bacteria strains after short- and long-term contact with pollutant”. Publication, co-authored by: Agata Zdarta; Piotr Krawczyk; Teofil Jesionowski and Ewa Kaczorek, presents interdisciplinary research including

microbiology, physicochemistry and environmental engineering. The collected results allow for more effective designing of bioremediation processes of areas contaminated with petroleum derivatives. In addition, the effects of previous studies point to the high potential of plant extracts containing saponins as natural surfactants.

Conference „The first experience of performing the function of Data Protection Officer”

2019-01-16

SABI - Association of Data Protection Supervisors together with the Faculty of Management at the Warsaw University of Technology (PW) invites participants to the national conference „The first experience of performing the function of Data Protection Officer”, which will be held on January 24, 2019, in the main building of the Warsaw University of Technology. The inaugural lecture entitled «Data protection supervisor in the era of the 4th technical revolution» will be delivered by Dr Eng. Janusz Zawila-Niedzwiecki, Dean of the Faculty of Management at Warsaw University of Technology. The conference will consist of lectures and a discussion panel devoted to the tasks of the Data Protection Officer. More: <http://sabi.org.pl/dzien-IOD-2019.php>

Rzeszów University of Technology commemorates the 100th anniversary of the International Astronomical Union

2019-01-16

The Student Self-government of the Rzeszów University of Technology in co-operation with the student volunteers Projektor are organizing the event „Look at the stars, expand the horizons”. The event will take place on January 18, 2019 in the Center of Culture and Science at the Rzeszów University of Technology. The event is organized to commemorate the 100th anniversary of the International Astronomical Union in 2019. During the event, sci-

entific circles and student organizations will present their activities. The Faculty of Management at the Rzeszów University of Technology is planning to conduct lectures led by invited speakers promoting astronomy.

XI Days of Transport at the Krakow University of Technology

2019-01-16

On 17-18 January 2019, students from the Scientific Society of Logistics TiLOG operating at the Faculty of Civil Engineering of the Krakow University of Technology are organizing International Scientific Seminar XI Days of Transport. The main objective of the project is to exchange knowledge and experience both with the academic environment, companies from the TFL industry, as well as with students from other universities from Poland and abroad. The discussions will consist of three panels: logistics, rail and air. Participants will address such issues as: intelligent transport systems, computer tools in controlling and optimizing logistics and transport processes, directions of railway integration development with other means of transport, air transport market in Poland and in Europe, and digitalisation of air travel. More: <https://www.facebook.com/events/199192580978120/>

Eugeniusz Piasecki Competition for the most interesting lesson in physical education

2019-01-16

Until April 12, students can submit works to the Eugeniusz Piasecki Nationwide Competition „The lesson of physical education implementing the core curriculum with the use of attractive forms of physical activity”. The organizer of the 12th competition is the Academy of Physical Education in Poznań. The aim of the competition is to select the most interesting lessons in physical education, which not only shape physical fitness, but also teach cooperation, and allow

students to express themselves. Competition works including an outline of the entire lesson of physical education and record of the lesson should be sent no later than April 12 this year to the Department of Physical Activity Didactics at the Academy of Physical Education. The final of the competition will take place on May 16. The Competition Regulations are available at: www.awf.poznan.pl/pl/wfsir-zd-daf-materialy

Researcher at the University of Gdańsk receives Haiman Award

2019-01-16

Dr Anna Mazurkiewicz, Prof. Associate from the Faculty of History at the University of Gdańsk, was awarded the Haiman Prize. The award was given during the 75th jubilee conference of the Polish-American Historical Society. This is the most prestigious award granted by the Polish American Historical Association, an American scientific society that has existed since 1944. The Haiman award has been granted since 1966 for «an outstanding contribution to the development of research in the field of Polish-American studies». The laureate conducts research on the history of Central European political emigrants after World War II. She is the author of the monograph «Political refugees from Central and Eastern Europe in the American Cold War Policy 1948-1954» and a number of articles devoted to Polish political emigration in the United States. At the University of Gdansk, she teaches history of the US and world history after the Second World War and the history of migration.

Scientists of the University of Adam Mickiewicz in Poznan receive Awards of the Minister of Science

2019-01-16

Two scientists from the University of Adam Mickiewicz in Poznań received awards from the Minister of Science for outstanding scientific achievements, individual and collective didactic achievements and organizational successes made in the 2018. The award for lifetime achievement was received by

Prof. Marek Hendrykowski, founder of the Poznań film school, Professor of the Institute of Film, Media and Audiovisual Arts, researcher of the history of art and film culture, media expert, theoretician of the film, author of publications in the field of film studies. The 1st degree academic award was received by Dr Tomasz Grzyb from the Faculty of Chemistry, Adam Mickiewicz University. The laureate's scientific interests include synthesis of nanomaterials and their functionalization, spectroscopic properties of lanthanide ions, conversion phenomenon and energy transfer processes in nanomaterials, laser spectroscopy.

Students of the University of Szczecin win scholarships from the Mayor of Szczecin

2019-01-16

Four students from the University of Szczecin (US) received scholarships under the first scholarship program of the Mayor of Szczecin for the best graduates of high schools and technicians. The aim of the program is to encourage young gifted people to take up and finish education at public universities in Szczecin, prevent outflow of talented high school graduates from the city and help in acquiring qualified staff for regional business. - The scholarship also has the task of developing the prestige of Szczecin's public universities, promoting the educational offer and increasing the competitiveness and economic development of entrepreneurs operating on the local market - says Piotr Zieliński from the City Information Center. Student laureates are Karolina Łukawska from journalism and social communication; Weronika Niedźwiecka from management; Kacper Paszyński from legislation and Piotr Smuda from logistics.

Professor Victor Calo from Australia to conduct a seminar at the AGH University of Science and Technology

2019-01-17

On January 21, 2019 at the Information Center of the AGH University of Science and Technology in Krakow, Professor Victor Calo from the Curtin University in Perth, Australia will hold an open seminar on isogeometric analysis. The seminar will be an introduction to the subject of isogeometric analysis, created by Prof. Victor Calo. Isogeometric analysis is a method of performing effective and accurate numerical simulations of various engineering problems. Professor Victor Calo is so-called a Highly Cited Researcher. It means that it belongs to 1 percent of world's most-cited IT scientists. There are 95 such scientists in the world, and five of them are involved in the field of isogeometric analysis.

Architectural success of students of the Wrocław University of Science and Technology

2019-01-17

Students of the Wrocław University of Science and Technology took the third place in the international architectural competition. Their forest meditation cabin allows for deep concentration and it is also ecological. The competition task was to develop a one-man, year-round house with an area of max. 15 sq m, which could stand in the forest surrounding Lake Bezidbene in Latvia. The cabin is to allow quiet meditation of the nature around and additionally it should be equipped with heating, kitchen and sanitary facilities, water and

food supplies for one person. The design of Karolina Kiełpińska, Marta Lisiakiewicz, Emilia Oworuszko and Aleksandra Białkowska assumes that the construction will be made mostly of wood, but due to its all-season character, the walls have been insulated. The energy for lighting the interior is provided by photovoltaic panels, and the building is heated by a heating oil stove. More: <http://pwr.edu.pl/uczelnia/aktualnosci/ich-projekt-ulatwi-medytacje-na-lonie-natury-11076.html>

Leszek Balcerowicz to hold a lecture at the University of Szczecin

2019-01-17

The University of Szczecin and the Civic Development Forum invite participants to the open lecture of Dr Leszek Balcerowicz „Institutional systems and living conditions in the country.” The lecture will take place in the Prof. Przemysław Małek auditorium, at the Faculty of Economic Sciences and Management. The speaker will outline the role of political systems in creating conditions for economic development and life of the population of a given country, because state management systems are of great importance for the residents' life in an economic context. It will also draw attention to the role of civic rights, the rule of law, economic freedom and democratic mechanisms in building well-being, because all these systemic variables are interdependent and equivalent. Dr Leszek Balcerowicz is a specialist in economics, former president of the National Bank of Poland, deputy prime minister and minister of finance in the first non-communist government of Poland after World War II, Professor of Warsaw School of Economics.

International successes of scientists at the Nicolaus Copernicus University in Toruń

2019-01-17

Researchers from the University of Nicolaus Copernicus in Torun have won 6 medals at the Paris International Fair of Invention, the Grand Prix Eiffel and the exhibition Kaohsiung International Invention

& Design EXPO in Taiwan. The gold medal in Paris and the silver medal in Kaohsiung were received for the following projects: «Endovascular stent with properties that accelerate the healing of the implant site and reduce the occurrence of thrombosis» and «Method for obtaining a biological preparation of fungal origin accelerating the degradation of polymer materials and biological preparation». The gold medal in Paris and the bronze medal in Kaohsiung was received by the «Preparation with adaptogenic effect based on the extract of *Eleutherococcus senticosus* and the method of producing the preparation with adaptogenic effect based on the extract of *Eleutherococcus senticosus*». The fairs in Paris gathered 150 inventions from 14 countries, in Kaohsiung there were representatives of 21 countries and they presented over 380 inventions.

Assistant Professor of the University of Economics in Katowice wins the Prime Minister's Award

2019-01-18

Dr Hanna Kelm, assistant professor at the Department of Public Management and Social Sciences at the Faculty of Economics of the University of Economics in Katowice received the Prime Minister's Prize for her PhD dissertation „The effectiveness of family policy in the conditions of demographic regress in Poland”. Dr Kelm developed and used the proposed model for the diagnosis of Polish family policy, which is based on the needs of families, divided into four types of needs: economic; reconciliation of work and childcare; health care for pregnant women and children; support for dysfunctional families and family safety. Dr. Kelm's dissertation was also awarded by the Institute of Labor and Social Studies. This year, the Chairman of the Council of Ministers awarded 54 prizes of 462 submitted works. 6 scientists were honored for their outstanding scientific and artistic achievements, 19 scholars received distinctions for scientific and technical achievements. 29 PhD and postPhD dissertations were also awarded.

Wrocław University of Science and Technology to inaugurate cooperation with the Liceum in Oleśnica

2019-01-18

Wrocław University of Science and Technology inaugurated cooperation with Juliusz Słowacki Secondary School in Oleśnica. This is one of the six high schools, which cooperate with the Wrocław university. The main goal of the cooperation is to promote exact and technical sciences and help in developing students' interests and passions. The university committed to provide support in the implementation of projects within the Lower Silesian Science Festival, to offer the pupils to participate in the «Talent Study» program and to present students with projects implemented by student research clubs. The program also assumes that pupils can participate in University Open Days. They will be informed about scientific conferences, seminars, lectures and supported during recruitment to university.

Lower Silesian Cluster of Cybersecurity launched

2019-01-18

The Lower Silesian Cybersecurity Cluster inaugurated its activity. During the first meeting a cluster council was established and the plan of the most important actions in 2019 was also specified. The main areas of cooperation of the cluster members are: cyber defense - protection and security of the most important IT resources of institutions, business systems and control in industry; management, law and auditing - managing the safety team and techniques of risk analysis and conducting technical audits of the most important IT systems. The other

topics of the cluster's activities are forensics - acquisition and analysis of evidence from digital systems in order to find traces and obtain evidence relevant to the security of information and information systems; electromagnetic safety; application security and penetration testing - identification and evaluation of potential attacks. More: <http://pwr.edu.pl/uczelnia/aktualnosci/dolnoslaski-klaster-cyberbezpieczenstwa-zainaugurowal-dzialalno-11079.html>

Scholar of the University of Gdańsk nominated for the award of the Association of Journalists of the Republic of Poland

2019-01-18

Alina Kietrys from the Institute of Philosophy, Sociology and Journalism at the Faculty of Social Sciences of the University of Gdańsk was nominated for the Bolesław Prus award of the Association of Journalists of the Republic of Poland for lifetime achievements in journalism. Bolesław Prus Award, for many years had been the highest and most prestigious distinction of outstanding journalists, members of the Association of Journalists of the Republic of Poland. After years of interruption, the Association resumed awarding these prizes, according to the new modified regulations in 2015. Journalists from the entire journalistic community, members of all journalistic associations and organizations can apply for the Award. The prize has two forms: the main prize for lifetime achievements in journalism («Golden Prus») and an award for a young journalist up to the age of 35 («Green Prus»).

University of Silesia to hold XXV Theological Evening „Marriage Processes in the Church”

2019-01-18

The Faculty of Theology of the University of Silesia in Katowice invites participants to the XXV Theological Evening. The theme of the meeting on January 24 will be „Marriage Processes in the Church.” The

program includes a poster exhibition, introductory performance and open lectures in the field of canon law. During the evening, the most frequently appearing legal titles, the method of determining the formula of process doubt, as well as the subsequent stages of the ordinary and shortened process will be presented. Speakers are canonist lawyers: Dr Mariusz Auguścik - vice-rector of the Metropolitan Court in Katowice and priest Dr. Rafał Dappa – vice-rector of the Bishop's Court in Gliwice. The poster exhibition prepared by the deacons of the Higher Silesian Seminary will present obstacles and defects of marital consent and information about the form of the relationship, as well as a canonical description of the marriage. A short introductory spectacle will be also presented by students.

Medical University of Gdansk and the University Clinical Center become Medical Leaders

2019-01-21

The Medical University of Gdańsk and the University Clinical Center (UCK) in Gdańsk have been awarded in the competition Success of the Year 2018 in Health Care and became Medical Leaders. The university was awarded for its rich educational and training activities, while UCK was considered the most innovative hospital in Poland. The jury of the competition appreciated the great involvement of the academic community and initiatives taken by the university. The Medical University of Gdańsk has popularized knowledge about health, disease prevention and treatment methods, both among children and adults for many years. Gdańsk students actively participated in a charitable educational and educational program to support the development of children raised in orphanages, foster families and in families with low material status. As part of the Heart of Kenya project, they taught Kenyans how to correctly perform ECG testing and interpret its results. More: <https://gumed.edu.pl/52795.html>

Researchers awarded the Silesian Scientific Prize

2019-01-21

Scholars and artists from the province Silesia have been honored with the Silesian Academic Award, a prize for scientists who have a significant contribution to the development of science, have special artistic achievements, and promote Silesian science and art on the national and international arena. The prizes were awarded to Prof. Jan Kisiel from the University of Silesia; Dr Eng. Przemysław Data from the Silesian University of Technology, Prof. med. Beata Kos-Kudła from the Silesian Medical University, Dr Ewa Jabłczyńska from the University of Humanities and Natural Sciences Jan Długosz in Częstochowa, Dr Paweł Linek from the Academy of Physical Education in Katowice and Prof. Jacek Rykała from the Academy of Fine Arts in Katowice. The award in the PhD student category was given to Waclaw M. Adamczyk from the University of Silesia, and to Konrad Graczyk from the University of Silesia, Zuzanna Rzepka from the Silesian Medical University and Mateusz Wąsik from the Silesian University of Technology.

Observations of Poznan astronomers described in the journal Nature

2019-01-21

The results of research conducted under the guidance of a scientist from the Institute of Astronomical Observatory of the Adam Mickiewicz University in Poznan (UAM) have been published in the latest issue of the prestigious journal Nature. Poznań astronomers Dr Michał Michałowski, Prof. Tadeusz Michałowski, Dr Krzysztof Kamiński, Dr Tomasz Kwi-

atkowski and Mikołaj Krużyński, working in the international team, observed the gamma flash and related cocoon of heated matter and for the first time they confirmed the relationship of this phenomenon with simultaneous supernova explosion. The observations were made using the Roman Baranowski Telescope - a robotic instrument belonging to the UAM, located in Arizona and managed remotely from Poznan via the Internet. "Nature" is one of the oldest and most prestigious scientific journals. For years, it has one of the highest citation rates among all scientific journals in the world. 17th century liber amicorum returned to the collections of the University Library in Wrocław

2019-01-21

The 17th century liber amicorum of Melchior Lucas from 1665, being a Polish loss of war, returned to Poland. The manuscript comes from the collections of the former City Library in Wrocław, whose heir is currently the University Library. The liber of amicorum was put up for sale in April 2018 at the Kiefer auction house in Germany. The Ministry of Culture and National Heritage after the initial verification of the object immediately requested the owner of the auction house to stop the sale of the manuscript. The director of the library asked the Department of Restitution of Cultural Property, functioning within the Department of Cultural Heritage Abroad and War Loss of the Ministry of Culture and National Heritage that successfully carried out the process of restitution of the manuscript. The recovered liber of amicorum was created in the 17th century. It was a part of the collections of Thomas Rehdiger (1540-1576), gathered at the church of St. Elisabeth in Wrocław. Okta Chandra Aulia from Indonesia becomes the best foreign student in Poland

2019-01-22

Okta Chandra Aulia from Indonesia, a forestry student at the Warsaw University of Life Sciences (SGGW), won the Interstudent competition for the best foreign student in Poland in the category of Master's students. Okta Chandra Aulia participates in climate and sustainable development initiatives and cooperates with the Promotion Office. She is currently an intern at the WULS-SGGW. Okta Chandra Aulia has also been a member of the Indonesian Red Cross for thirteen years and since the arrival to Poland she runs the Association of Indonesian Students in Poland. The Interstudent competition is organized by the Perpektywy Education Foundation with the honorary support of Prof. Eng. Jan Szmidt, chairman of the Conference of Rectors of Academic Schools in Poland. The competition's partners are the Conference of Rectors of Academic Schools in Poland, the Students' Parliament of the Republic of Poland and the National Representation of PhD Students.

Torun Scientist becomes a Rising Star of Internationalization

2019-01-22

Dr Agata Karska from the Faculty of Physics, Astronomy and Applied Informatics at the University of Nicolaus Copernicus in Toruń became the Environmental Star of Internationalization by the Education Foundation „Perspektywy”. The Toruń researcher received the special Rising Star award. The prize is awarded to scholars under 35 years and whose achievements have been noticed not only at the home university, but also in the national and international dimension. The award committee appreciated Dr Karska for successfully combining scientific research at a global level with the function of the dean's plenipotentiary for internationalization and coordinating a number of projects aimed at increasing the internationalization of research and education at the University. Students from Chełm to represent Poland in the Junior World Gliding Championships

2019-01-23

Tomasz Hornik, Kinga Tchorz and Konrad Partyka, pilot students of the State Higher Vocational School (PWSZ) in Chełm, were appointed to represent Poland in the Gliding World Junior Championships, which will be held in July in Hungary. - The appointment for the world championship is undoubtedly the fulfilment of one of my aerial dreams, it offers many possibilities and opens up more than one door in a professional career in the future - said Kinga Tchorz. Currently, about 150 future pilots study at the PWSZ in Chełm. At the end of last year, the university purchased three new training aircrafts thanks to the subsidies from the Ministry of Science. Thus the air fleet of the Chełm school expanded to 10 planes.

Kozminski Academy to hold a conference „In search of a better world”

2019-01-23

The Kozminski Academy in Warsaw, the Economic Sciences Committee of the Polish Academy of Sciences and the Polish Economic Society are organizing on January 28-29, 2019 a scientific conference „In search of a better world - economy and politics”. The first day of the event includes debates that will focus on the conditions and strategies for economic development, the future of globalization, fiscal and monetary policy, the methodology of modern economics and the Chinese development model.

The main lecture will be given by Prof. Justin Yifu Lin, vice president of the World Bank in 2008-2012. The second day will include a discussion among leading Polish economists, co-authors of the book «Economics and Politics, Around Grzegorz W. Kolodko's Economic Theory» published by the PWN Scientific Publishers, edited by Prof. Elżbieta Mączyńska. The debate is to address the most important challenges of contemporary economics and politics, the condition and evolution of the European Union as well as the opportunities and threats facing the Polish economy.

Professor Bogusław Pawłowski becomes the chairman of the European Human Behavior and Evolution Association

2019-01-23

Professor Bogusław Pawłowski from the Department of Human Biology at the University of Wrocław became the chairman of the international organization European Human Behavior and Evolution Association (EHBEA). EHBEA is an international association supporting scientists in interdisciplinary research on the evolutionary basis of human perception, behavior and social relations. It gathers scholars dealing with evolutionary biology, anthropology, evolutionary psychology, neuroeconomics or the evolution of culture. Professor Pawłowski deals with the mechanisms of human evolution and the biological basis of human behavior and preferences - in particular, the influence of various features perceived as attractive in terms of sexual selection and biological condition. He published in scientific journals Nature, Evolution and Human Behavior, Current Anthropology and in the American Journal of Human Biology.

Deputy Prime Minister Gowin visits the Warsaw School of Economics

2019-01-24

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin visited the Warsaw School of Economics (SGH) on 22 January. The

Deputy Prime Minister was invited by the Rector of the Warsaw School of Economics, Prof. Marek Rocki. The university authorities thanked the minister for co-financing the construction of the scientific and didactic building at ul. Batory in Warsaw. The subsidy for this purpose amounted to PLN 30 million. The conversation also concerned current issues related to the implementation of the new Law on Higher Education and Science. - The Warsaw School of Economics anticipated the solutions that are included in the Constitution for Science, and it has been the leader in Poland providing solutions guaranteeing the improvement of the level of education of students and scientific research for almost 30 years. I wish that the spirit of perfection and perseverance in forming the elite of the young generation should always be guided by the Warsaw School of Economics - wrote the deputy prime minister in the memorial book of the university.

Polish Academy of Sciences in Gdansk announces a competition for young scientists

2019-01-24

By March 31, scholars can submit applications to the Scientific Award of the branch of the Polish Academy of Sciences in Gdańsk for young scientists 2018. The award is granted to scholars or PhD students of scientific institutions in the Kuyavian-Pomeranian, Pomeranian and West Pomeranian provinces for the original research achievement, published in the year preceding the submission of the application for the award. The prize is awarded equally to five winners in the following fields: humanities and social sciences, biological and agricultural sciences, exact sciences and earth sciences, technical sciences and medical sciences. Candidates who were under 33 years in the year preceding the submission of the application may apply for the competition. Applications should be submitted in electronic form to: gdansk@pan.pl More: <http://gdansk.pan.pl/nagroda-oddzialu-dla-mlodych-naukowcow>

Prof. Monika Hardygóra from the Wrocław University of Science and Technology receives the title „Personality of the year”

2019-01-24

Professor Monika Hardygóra, dean of the geoengineering, mining and geology faculty of the Wrocław University of Science and Technology received the title „Personality of the Year” in the competition of the Mining Chamber of Commerce and Industry. She was appreciated for the overall activity of particular importance for Polish mining in the area of didactics, science and cooperation between science and industry. Professor Hardygóra is the author or co-author of two books, 92 articles, 142 conference papers, 6 patents and over 200 research works on the mining industry. She is a member of the scientific council of the Institute of Mineral Resources and Energy Economy of the Polish Academy of Sciences and the Central Mining Institute. The competition has been organized by the Mining Chamber of Industry and Commerce for 10 years. Its aim is to promote and popularize projects for innovation and the development of Polish underground mining, personalities of special importance and pro-ecological activities.

University of Szczecin launching Winter Birds Counting

2019-01-24

The Scientific Circle of Zoology of Vertebrates „Wąsatka” of the Faculty of Biology at the University of Szczecin and the National Society for the Protection of Birds (OTOP) are inviting participants for an ornithological walk as part of Winter Bird Counting. The first walk is planned on Friday, January 25th. During the walks, the scholars are planning to teach how to recognize birds and discover places where they can be observed. In addition, participants will also learn how to properly help birds in the winter and what to feed them. This year's campaign is focused on goldfinches. - During Winter Birds Counting, we observe birds that spend the winter in close company of man, that is in urban gardens and parks. We are counting birds for a minimum one hour and then send the results to the electronic observation centre available on the OTOP website. Numerous school and pre-school teachers who organize class trips can take part in Winter Bird Counting. More: <http://usz.edu.pl/zimowe-ptakoliczenie-2019/>

Warsaw University to hold the debate „Japan: political life and relations with the state”

2019-01-25

The University of Social Sciences and Humanities in Warsaw, together with the Warsaw Public Library are organizing a debate „Japan: political life and relations with the state” on January 31. East Asian countries have always fascinated Westerners. Japan became the first in Asia to adopt Western values and seems to be a master in showing the West its modern face. And how does real life in modern Japan look like? This and other questions will be answered by Prof. Teruji Suzuki - a retired professor of Tokai University and Kagawa University, currently lecturing as a visiting professor at the University of Warsaw; Dr Bartosz Wojciechowski – teacher of Japanese, lecturer at the Jagiellonian University and Edyta Nowicka, a consultant in Japanese business, living in Tokyo and a lecturer at the SWPS University. The moderator of the meeting will be Prof. Krzysztof Gawlikowski, head of the Department of Asian Studies of the SWPS University.

Institute of Labor and Social Affairs to award prizes for the best master's and PhD theses

2019-01-25

The Institute of Labor and Social Studies in Warsaw awarded the prizes of the 20th competition for the best master's and PhD theses in the field of work and social policy organized in the Social Dialogue Center in Warsaw. In the category of master's thesis, the first prize was awarded to the graduate of the Economics Department of the University of Rzeszów (UR), Monika Reda for her work “MA «Entrepreneurship of the University of Rzeszów as a stimulator of a successful entry into the labor market” supervised by Dr Anna Barwińska-Małajowicz. In the category of PhD dissertations, two equivalent first level prizes were awarded. They were received by Dr Anna Sanecka for the thesis «Support activities of Wrocław Christian Churches for the elderly people. Theological and social study”, supervised by Dr Kalina Wojciechowska, Prof. ChAT, Christian Theological Academy in Warsaw. The second prize was received by Dr Wiktoria Domagała for the dissertation «Occupational segregation by gender and its conditions in OECD countries» supervised by Dr Baha Kalinowska-Sufinowicz, University of Economics in Poznań.

Student of the Medical University of Gdańsk wins the INTERSTUDENT competition

2019-01-25

Charles Woode from Ghana, a 3rd year student of the Nursing of the English Division of the Medical University of Gdańsk, won the prestigious INTERSTUDENT competition in the MA category. The competition is addressed to foreigners studying at Polish universities. The prizes are awarded in the following categories: undergraduate studies, master's studies and PhD studies. The jury distinguishes active people in the academic life, achieving good results in science and participating in interesting research projects. The other winners are: Okta Chandra Aulia from Indonesia from the Warsaw University of Life Sciences (Master's degree) and Svitlana Sovinska

from Ukraine from the Krakow University of Technology (PhD studies). Special awards for supporting foreigners and charity were received by: Danylo Funtovoi from Ukraine - a student of the Lublin University of Technology and Lisa Aditya from Indonesia, studying at the Gdańsk University of Technology.

Academy of Physical Education in Poznan to hold a conference on dancer movements

2019-01-25

The Department of Dance and Gymnastics and the Students' Scientific Society The Laboratory of Dance of the Academy of Physical Education in Poznan invite participants to the International Scientific Conference Dance Connections which will be held on February 14 and 15. In Poland, dance is still perceived first and foremost in aesthetic terms, as a field of art, and people forget about its rehabilitation and therapeutic character. Conference guests will present different systems of thinking about movement and dance. The event will be attended by Frey Faust, a world-renowned dancer and choreographer who built an evolving pedagogical approach to the organization and mutual correlation of empirical and scientific results of research on human movement thanks to his independent research on anatomy, biomechanics and physics. The conference is addressed to physiotherapists, athletes, lecturers, dancers, teachers and trainers related to physical culture and fitness, and people interested in personal development. Cardinal Stefan Wyszyński University organizes a course

for people working with foreigners

2019-01-28

School of Polish Language and Culture for Foreigners of the Cardinal Stefan Wyszyński University in Warsaw and the Mazowieckie Local Government Center for Teachers' Training are organizing a free course for people working with foreigners. The course is addressed to employees and associates of non-governmental organizations, educators, local government employees and local activists from all over Poland who work or plan to work in institutions dealing with multiculturalism, integration and supporting foreigners living in Poland. The program includes intercultural communication, family support in the process of integration and adaptation in the local environment, basics of methodology and didactics of teaching Polish as a foreign language and designing activities and workshops in the local community related to foreigners.

International forum on learning and teaching at the University of Warsaw

2019-01-28

On February 14-15, the University of Warsaw will host a forum devoted to the issues of learning and teaching „Towards successful learning: Controversies and common ground”. The event is organized by the European University Association which consists of over 800 universities and national conferences of rectors from 48 countries, including University of Warsaw. The conference is divided into three sessions. The first one is devoted to teaching purposes, the speakers will discuss the issue of whether is critical thinking a part of study programs. The second session will concern European policies related to learning and teaching. The last session will show two different approaches to education from University College Cork and the University of Oslo. More: https://www.eua.eu/events/24-2019-european-learning-teaching-forum.html?utm_source=social&utm_medium=LinkedIn&utm_name=LinkedIn-social-02-10-2018

Pomeranian Academy in Słupsk to cooperate with the Regional Directorate of Environmental Protection in Gdańsk

2019-01-28

The Pomeranian Academy in Słupsk (AP) will cooperate with the Regional Directorate of Environmental Protection in Gdańsk (RDOŚ). Agreement on this matter was signed by the Regional Director of Environmental Protection in Gdańsk Radosław Iwiński and the rector of the university - Dr Eng. Zbigniew Osadowski. The parties agreed to provide the joint organization of events, conferences, expert seminars for the protection of the environment and nature, and support for educational projects. The agreement also regulates the students' practice at RDOŚ. The signatories of the agreement agreed to provide mutual support in the field of promotion of knowledge concerning environmental protection and nature including publishing projects; co-organizing lectures and workshops on information and popularization of environmental protection and nature directed to the local community.

Conference at the University of Casimir the Great in Bydgoszcz on the 20th anniversary of joining NATO

2019-01-28

The University of Casimir the Great in Bydgoszcz invites participants on March 11 and 12 to the National Science Conference „Poland in international relations twenty years after joining NATO”. The topics of the conference include assessment of historical processes resulting in access of Poland to NATO and the European Union and conditions resulting from the changing geopolitical position of Poland in Central and Eastern Europe in the twentieth century as well as Poland's attitude to the crises of contemporary Europe (including the conflict in Ukraine, migration crisis, Brexit). The organizers are also planning to discuss Poland's activities in international organizations and initiatives, such as the OSCE,

Council of Europe, the Visegrad Group, the Weimar Triangle and the Three Seas Initiative and the impact of historical policy of Poland and other countries on mutual relations, including re-opening the problem of reparations and war damages, and possibly the issue of revision of the borders. Awards for young scientists of the West Pomeranian University of Technology

2019-01-28

Three young scientists from the West Pomeranian University of Technology received the Prize of the Mayor of the City of Szczecin in a competition for master's theses and diploma theses aimed at development of modern technologies and innovations. The award for the best master's thesis on modern technologies and innovations was granted to Paweł Grochocki for the work «Electric machine with magnetic barriers moved by hybrid engine». In the category of the best PhD dissertations focused on modern technologies Dr Eng. Kamila Stępný was awarded for «CNC manual programming system with the use of virtual reality technology», and Dr Eng. Dariusz Pulikowski for „Experimental and numerical tests of winding superconductor coils made of Rutherford type Nb₃Sn multi-conductor cable”. The competitions have been held since 2008 and are addressed to young researchers and graduates of Szczecin's universities.

University of Life Sciences to create a nutritional education center

2019-01-28

Wrocław University of Environmental and Life Sciences and the German association Christlich-Soziales Bildungswerk Sachsen will implement the

project „Network of nutritional education for the sustainable development of the Euroregion Nysa”. As part of the project, nutritional education centers will be created in Radomierz and Hoyerswerda. They help to promote health, good eating habits and not to waste food. One of the aims of the project is to draw the attention of the region's inhabitants to balanced nutrition. For this purpose, firstly, statistical surveys on knowledge in the field of production and handling of food in the Euroregion Nysa will be carried out. The test results will show the type and amount of food that is bought and discarded when it could still be consumed. An analysis of eating habits will allow to assess knowledge about the nutritional and energy value of food and will enable the identification of consumer behavior patterns in selected households. More: http://www.glos.upwr.edu.pl/aktualnosci/48938/stacja_w_radomierzu_bedzie_centrum_educacyjnego.html

Recollection of the Holocaust at the Catholic University of Lublin

2019-01-29

Until February 1, 2019, the First Commemoration of the International Day of Remembrance of Victims of the Holocaust in the Lublin region will take place, with the support of the Marshal of the Lublin Voivodeship, Jarosław Stawiński. Until January 31, participants will be able to take part in a conference entitled «Holocaust and after the Holocaust ...» and in the meeting with survivors from the Holocaust and Polish representants of the Righteous Among the Nations as well as listen to a lecture by Tomasz Chojnacki from the Catholic University of Lublin entitled «The fate of Jews in German concentration camps». The participants of the event will also be able to watch the film entitled «The Story of Irena Sendlerowa,» directed by Andrzej Wolf and to meet the director of the film and Irena Sendlerowa's daughter - Janina Zgrzebska. Competition for the most

interesting PhD dissertations in the field of humanities devoted to modernity

2019-01-29

Until February 22, students can apply to the competition for the most interesting PhD dissertations in the field of humanities, dedicated to modern times. Prof. Alina „Inka” Brodzka-Wald competition is organizing the Academy for the Development of Philanthropy in Poland. Alina Brodzka-Wald was one of the most recognizable Polish historians and theoreticians of literature. To commemorate her life and merits, the Fund named after her was created. Its objective is development of science, education, culture, health care and social assistance. For the past six years it has been organizing a competition for the most interesting PhD dissertations defended in the year preceding the recruitment. The jury of the competition consists of well-known representatives of the humanist community: Prof. Maryla Hopfinger-Amsterdamska; Prof. Grażyna Borkowska; Prof. Jan Kordys; Prof. Marek Zaleski and Dr Tomasz Żukowski from the Institute of Literary Research of the Polish Academy of Sciences. More: <http://www.funduszewieczyste.pl/pl/modele-funduszy-wieczystych/item/7-fundusz-im-prof-aliny-brodzkiej-wald>

Academy of Innovation for the University 2020

2019-01-30

The Polish Rectors' Foundation and the Chairman of the Conference of Rectors of Academic Schools in Poland are holding an event called the Academy of Innovation for the University 2020, which will take place on February 15 in Warsaw. - The Constitution for Science grants universities a huge autonomy in the process of strategy modeling, organizational structure or educational programs offered by universities. Wisely used EU funds can become a driving force for changes that Act 2.0 allows - emphasizes Prof. Łukasz Sułkowski, president of the PCG Academia Board, one of the organizers of the event. The organizers also include other companies from the Polish and global IT solutions market for universities: Blackboard, Microsoft, Inspira, Think Beyond, N-educat.io and 3strona.pl. Participation in the

event is free for university representatives. The program and registration form are available at: www.AI2020.pl

Researcher at the University of Gdańsk wins the Heweliusz Science Award

2019-01-30

Professor Piotr Stepnowski from the University of Gdańsk, a recognized global authority in the field of research and environmental protection, has been awarded the Gdansk University of Science and Technology Award of Jan Heweliusz for the year 2018 in the category of exact sciences and natural sciences. The prize, called the Pomeranian Nobel, was awarded to Prof. Stepnowski for his significant contribution to the development of research on the prognosis, detection and assessment of the negative effects of remnants of medicinal substances and ionic liquids in the environment. Professor Stepnowski is a world pioneer of research in the field of detection and assessment of environmental exposure of atypical chemical pollutants such as drug residues and so-called ionic liquids - modern industrial solvents. His methods are now widely used by scientific and industrial laboratories around the world to analyze ionic liquids and products of their transformation and decay. More: https://ug.edu.pl/media/aktualnosci/85508/prof_piotr_stepnowski_laureatem_nagrody_naukowej_miasta_gdanska_im_jana_heweliusza_za_rok_2018

University of Life Sciences in Poznan organizes a course for people interested in beekeeping

2019-01-30

University of Life Sciences in Poznan invites everyone who wants to know the biology of the honey bee and the basic principles of running an apiary. The condition for participation in the course is the age of 18 or more and no medical contraindications to work in the apiary. The course will start in March and is intended for both those who have just started their first apiaries and those who are planning it. Classes will be held at the Department of Ownership Breeding of the University of Life Sciences in Poznań (theoretical part) and in the apiary in the field station in Swadzim near Poznań (practical part). The lecture topics will include biology of honeybee and bee colony; apiary economy; bee diseases and pests and basics of beekeeping botany. Practical classes will include family reviews, preparing families for the production of honey and honey harvesting.

Prof. Juliusz Chrościcki to hold a lecture in the Museum of the University of Wrocław

2019-01-30

The Museum of the University of Wrocław invites participants on February 1 for a lecture by Prof. Juliusz Chrościcki „READING LETTER of Jan Vermeer van Delft”. Professor Chrościcki is one of the greatest Polish historians of modern art and a specialist in the field of iconography of power. The lecture will be devoted to a chosen motif in the work of one of the most famous painters in history: Jan Vermeer van Delft. This Dutch artist is considered to be the master of genre scenes, especially the pictures of women in residential interiors, occupied with everyday activities, such as reading. Professor Chrościcki has been associated with the University of Warsaw, where he has been the deputy dean and dean of the Historical Department. He was the director of the Polish center at the Sorbonne in Paris. He is a co-creator and editor-in-chief of the journal «Barocco. History-Literature-Art» and the author of numerous scientific publications on the history of art and culture of modern Europe.

Delegation from Angola visits the Krakow University of

Agriculture

2019-01-31

The University of Agriculture in Krakow was visited by the delegation of Angola, headed by Domingos Culolo, ambassador of the Republic of Angola in Warsaw. The subject of the talks was the possibility of extending research and teaching cooperation between the Krakow University of Agriculture and universities in Angola. The cooperation so far has been based mainly on contacts with Universidade Kimpa Vita (UniKiVi) in Uíge, with which the Kraków University conducts academic exchange. The positive experience in that cooperation provides opportunities for rapid and intensive development of contacts between the University of Agriculture and other public universities in Angola.

Professor Piotr Dominiak becomes the laureate of the Jan Heweliusz Science Award

2019-01-31

Professor Piotr Dominiak, vice-rector of the Gdańsk University of Technology for internationalization and innovation, received the Scientific Award of the City of Gdańsk Jan Heweliusz in the category of humanities and social sciences. The award committee appreciated the outstanding scientific achievements of Prof. Dominiak in the field of economics of the small and medium enterprise sector and activities that led to the creation in Gdańsk of a thriving center of economic research. - Professor Piotr Dominiak, through the implementation of valuable and internationally-valued scientific research, as well as training of scientific staff and popularization of economic knowledge, significantly contributed to the increase in the importance and building prestige of the Gdańsk scientific center in the field of social sciences - said Prof. Jerzy Błażejowski in laudation in honor of the laureate during the awards ceremony.

University of Silesia to hold a conference about integration in multicultural social and educational environments

2019-01-31

The University of Silesia invites participants to the conference „Integration in multicultural social and educational environments”, which will take place on March 26, 2019 at the Department of Ethnology and Educational Sciences in Cieszyn. The conference is a continuation of the series „Activation of individuals, groups and communities in the local environment” dedicated to selected areas of social pedagogy. The organizers announce the following topics: multidimensional integration processes; social policy for inclusion; diagnosing and designing activities for qualitative changes of inclusion processes; school environment for integration; determinants of integration behavior of educational entities and integration in theory and practice. The co-organizers of the conference are the Institute for Identity Research of the European Pedagogical Faculty and the Department of Slavic Studies of the Faculty of Philosophy of the University of Ostrava; Association for Supporting Intercultural Education and the Polish Pedagogical Society.

Conference on industry 4.0 and the future of the manufacturing industry to be held in Szczecin

2019-01-31

Regional Center for Innovation and Technology

Transfer of the West Pomeranian University of Technology in Szczecin invites participants on February 12 for the first in Szczecin seminar for small and medium-sized companies on industry 4.0 and the future of the manufacturing industry. The meeting is intended for owners, managers and managers of companies from the sector of small and medium-sized enterprises in the manufacturing and logistics industries and related industries. Its aim is to familiarize entrepreneurs with the possibilities of introducing solutions in the field of digitization, IT, robotics and automation in companies - that is entering the era of industry 4.0. The program of the event includes speeches of managerial staff from Poland and Germany as well as a discussion panel that will be conducted by specialists in the field of industry implementation 4.0. It will be a great opportunity to exchange experiences and talk with potential partners who have already implemented technology 4.0 in their companies.

Senate of the University of Białystok honored the distinguished employees of the university

2019-02-01

On January 30, 2019, the Senate of the University of Białystok awarded the „Medal of the University of Białystok” and titles „Merited for the University”. «Medal of the University of Białystok» was received by Prof. Bazyl Poskrobko. By the Vice-Rector for Education, Dr Wojciech Śleszyński, Prof. Poskrobko is an outstanding Polish economist, a leading specialist in the field of environmental economics. He has put a lot of effort for the development of the Faculty of Economics and Management, where he has been working from the mid-eighties. The title of «Merited for the University» was awarded to Andrzej Branicki (Faculty of Physics), Prof. Beata Izabella Godlewska-Żyłkiewicz (Faculty of Biology and Chemistry), Prof. Dariusz Ryszard Kijowski (Faculty of Law), Dr Józef Maroszek (former scholar of the Faculty of History and Sociology), Prof. Bogusław Nowowiejski (Faculty of Philology), Regina Maria Sokółowska (central administration).

Researcher of the Polish Academy of Sciences published in Science Advances on the impact of climate change on the access of trees to water

2019-02-01

The journal Science Advances published the results of worldwide research, which show that due to climate change, trees struggle with water shortages, which results in smaller increments. The main author of the work is Dr Flurin Babst from the Institute of Botany, Polish Academy of Sciences in Krakow. The research was conducted by researchers from research centers in Poland, Canada, Switzerland, Romania and the United States. For the first time, scientists have analyzed large amounts of data on tree rings. The data came from 2710 places from around the world and reflected climatic conditions prevailing in about 70 percent of all forest areas in the world. Research has shown that in the 20th century global warming was much less intense than predicted for the 21st century. - As early as in the twentieth century, it was obvious that the shortage of water is more and more affecting the condition of trees, it is very likely that this phenomenon will intensify in the 21st century - estimated Babst. Graduate of the Gdańsk University of Technology becomes a laureate of the President of the Polish Space Agency

2019-02-01

Luiza Leszkowska, a graduate in electronics and telecommunications (specialty: Wireless Communication Engineering) at the Gdańsk University of Technology received the 3rd degree Scientific Award of the President of the Polish Space Agency for the best master's thesis in the field of space engineering. The laureate's work «A multi-layered planar antenna with a layer of superstratum for satellite applications in the X band», written under the su-

pervision of Dr Eng. Łukasz Kulas and Eng. Mateusz Rzymowski from the Department of Microwave and Antenna Engineering at the Faculty of Electronics, Telecommunications and Informatics presents a new antenna design. The graduate's concept can be used in CubeSat type nanosatellites, for example for fast transmission of images recorded by satellites working in constellations. The winner of the competition also wrote her engineering work: «Circular polarization antennas for CubeSat nanosatellites» about this topic. Her promoter was Dr Eng. Krzysztof Nyka.

Researcher of the University of Zielona Góra becomes an expert of the European Commission

2019-02-01

Dr Piotr Mysiak, vice-dean for science and quality education at the law and administration faculty of the University of Zielona Góra became an expert of the Executive Agency for Education, Culture and Audiovisual Sector of the European Commission (EACEA). EACEA manages financial resources designated for education, culture, audiovisual sector, sport or civic activity. Its mission is to support the European Commission in the implementation and running of projects and funds in these areas. One of the agency's most well-known activities is the Erasmus + program promoting international exchange in higher education. It was the field of expertise of Dr Mysiak, who will also take part in the next evaluation session of projects submitted for the Erasmus + competition Capacity Building in the Field of Higher Education.

PhD students of the University of Silesia invite participants to the conference „Humor Research Project”

2019-02-04

The PhD NEOLinguists Scientific Circle supported by the Institute of English, the Institute of English Language Cultures and Literatures, and the Institute of Romance Languages and Translation Studies at

the University of Silesia invites participants to the Humor Research Project, which will be held on 4 and 5 April. The aim of the conference is to enable an exchange of views on the perception of humor through the different paradigms to look at the phenomenon and its interdisciplinary and universal character, and encourage debate on the place of humor in language, culture and scientific research. Conference topics include various realizations of humor in literature and translations; sense of humor perceived through linguistics; cultural, intercultural and multicultural aspects of humor; examples of humor in research on media and visuality; the role of humor in methodology and teaching, and the importance of humor and laughter in cognition and social interaction. New film at the Copernicus Science Center in Warsaw

2019-02-05

From February 7, the Copernicus Science Center (CNK) in Warsaw invites viewers to a new film entitled „Faster Than Light.” This 50-minute film will be presented in the Heavens of Copernicus planetarium. The development of science and engineering, presented in the film allows to observe the enormity of the universe. «Faster than light» is a trip into the future on a ship equipped with an antimatter engine, and even a warp drive - straight from the Star Trek. Sometimes science fiction becomes a scientific reality. Thanks to human curiosity and perseverance, the humans can reach further and further Space. See the movie trailer: <https://youtu.be/I5xklpJv-HI>

Conceptually Revolutionary University of Competence for students from Wielkopolska

2019-02-05

Piła Nadnotecki Institute of the Adam Mickiewicz University in Poznań will carry out a project to raise the level of competences of students from northern Wielkopolska - „KRUK” - Conceptually Revolutionary University of Competence. KRUK is an educational program about the amazing world of nature, humanity and technology, which uses non-standard

and very unobvious methods of education, resulting from the conclusions of the latest research in the field of neuroscience and sociobiology to educate the competence to acquire experience independently. The training studies will start in April. The leading idea of the project, co-financed from EU programs, is communication in nature, society and the virtual world. During the course, the students, with the support of trainers, will independently acquire knowledge from three areas: exact sciences, social sciences and information and communication technologies. More: <http://krukuam.cba.pl/>

Competition for the best PhD dissertation from Polish universities included in the Progress 3 Consortium

2019-02-05

The Progress 3 Consortium, which includes universities from Poland, the Czech Republic and Slovakia, organizes for the seventh competition for the best PhD thesis in member universities. The thematic categories of the competition include Economics, finance and management; Raw materials, energy and environmental protection; Health and applications in health care; Information technologies and Electrical Engineering and Competitiveness of the machine industry. In the current competition, PhD theses delivered from 1 January to 31 December 2018 or exceptionally in December 2017 can be presented. The Progress 3 consortium was established to create links between universities located in the Czech regions: Moravian-Silesian and Žilina; in the Trenčín region and the Banská Bystrica region in Slovakia and in the Polish Silesia and Opolskie regions.

CyberLab in Świerk simulates a cyber attack against industrial installations

2019-02-06

The CyberLab generated examples of network traffic simulating a cyber attack on the industrial network. The data will be used by security experts by the European Network and Information Security

Agency and will be included in the Agency's training sets. Marcin Dudek from the National Center for Nuclear Research explained that the network traffic is simulated most often for training purposes, but then it deviates very much from reality. - In our case, real attacks on industrial installations were simulated, not data records reflecting such an attack - adds Dudek. The CyberLab laboratory operates within the structure of the Science and Technology Park Świerk (PNT), which is the organizational unit of the National Center for Nuclear Research. CyberLab staff are PNT employees.

Celebrating 100th anniversary of the AGH University of Science and Technology

2019-02-06

As part of the celebrations of the 100th anniversary of the AGH University of Science and Technology in Kraków, students working at the Metal Scientists Scientific Circle at the Faculty of Metal Engineering and Computer Science AGH decided to organize a cruise on the Mediterranean on the Pogoria sailing ship. «The 100th anniversary of the AGH UST» will last from 16 to 23 February 2019. During the sea expedition, a conference will be held on board of the ship titled «100 years of AGH - unforgettable memories», under the auspices of Prof. Anna Siwik, the rector for student affairs of the AGH. Both events will be an opportunity for a multigenerational meeting of faculty employees as well as former and present members of the scientific club. The cruise is also a non-standard and attractive form of promotion of AGH and Jubilee of the university.

Polish Television to present scientific series dedicated to astronomy

2019-02-07

„Independent Astronomy” is a new series of documentary television programs. Its transmission will start on Thursday, February 7 at 17:00 in TVP 3. The first episode will be devoted to the history of the Astronomical Observatory of the Jagiellonian University in Krakow. The series will present the

history of Polish astronomical centers since Poland regained its independence in 1918 to this day. The producers are the Polish Astronomical Society and Polish Television. The financing of the science series «Independent Astronomy - 100 Years of Polish Astronomy» was provided by the Ministry of Science and Higher Education. As underlined Prof. Maciej Mikołajewski, vice-president of the Polish Astronomical Society, the implementation of the series «Independent astronomy» - in addition to popular-scientific values - is also important for the history of astronomy and the history of science. See the trailer of the series: <https://youtu.be/TzjQw-ml6Rk>

Polish-French Year of Science

2019-02-07

Ministers of science and higher education in Poland and France - Jarosław Gowin and Frédérique Vidal, signed a joint declaration on the organization of the Polish-French Science Year. The event will enable deepening and enriching cooperation between Poland and France, in particular between Polish and French higher education institutions and research institutions. The year of science will be officially inaugurated in Paris in March 2019, on the occasion of the 1st Polish-French Forum of Rectors and Presidents of Universities, and will end in Poland in December 2019.

Collegium Civitas to hold a seminar on combating the financing of terrorism

2019-02-07

The Collegium Civitas Center for Research on Terrorism in Warsaw and the House of History invite participants to a seminar devoted to combating the financing of terrorism. The seminar will take place on 15 February as part of the interdisciplinary program «Views on terrorism», which aims to provide the listeners with the history of the fight against terrorism. Such meetings are an opportunity to discuss the evolution of means and methods of this fight, and the axis of the program is the history of terrorism in the twentieth century. The seminar will be attended by experts in the strategies of fight against terrorism, its financing and money laundering: Dr Wojciech Filipkowski, Dr Wojciech Szewko and Dr

Krzysztof Liedel. More: <https://www.facebook.com/events/537789936723823/>

Institute of Polish Philology of the Pomeranian Academy to hold a conference „Sacro-pop. Expressing holiness in mass culture „ in Słupsk

2019-02-07

The Institute of Polish Philology of the Pomeranian Academy in Słupsk, the Baltic Gallery of Contemporary Art in Słupsk and the PhD students and students of the Polish Language Society invite participants to the national scientific conference „Sacro-pop. Expressing holiness in mass culture”. An interdisciplinary seminar meeting will take place on 22-23 May 2019 in Ustka. The organizers are planning to analyse issues within the scope of literary studies, in the Polish tradition, but they are also open to foreign literature. They would like to gather researchers from various academic centers in Poland to interpret issues existing in various areas of human activity.

Researcher of the University of Opole to perform important functions at the Polish Academy of Sciences

2019-02-07

Professor Dr Eng. Czesława Rosik-Dulewska was appointed as the deputy chairman of the Council of Superintendents of the 4th Department of Technical Sciences of the Polish Academy of Sciences (PAN). The scientist of the University of Opole (UO) has also become a member of the Audit Committee of the Polish Academy of Sciences and a member of the Presidium of the Katowice PAN Branch. Professor Rosik-Dulewska is the director of the Institute and the head of the Department of Waste and Water and Wastewater Management at the Institute for Environmental Protection and Development at the Faculty of Natural Sciences and Technology of the University. She has over 265 published scientific items. Since 2016 she has been a correspondent member of the Polish Academy of Sciences. Her scientific in-

terests include principles and requirements related to the natural management of mineral and organic waste, selection of waste neutralization and recovery processes based on their physical and chemical properties, biological reclamation of landfills, including mainly energy and municipal waste.

Student of the Adam Mickiewicz University awarded by the Polish Chinese Business Council

2019-02-07

Joanna Nowotna, a student of sinology at the Adam Mickiewicz University in Poznań, took the second place in the diploma thesis competition, organized by the Polish Chinese Business Council. The prize for the Bachelor's thesis «Electronic payments in China: historical background, current status and development prospects» is an internship at the Polish branch of Bank of China. The laureate continues her master's studies, at the same time realizing the post-graduate program of the School of Law and Economy of China at the University of Warsaw. The organizer of the competition was the Polish Chinese Business Council, in cooperation with Bank of China, HSBC Bank Poland and Haitong Bank. The competition was supported by the Ministry of Enterprise and Technology, the Ministry of Science and Higher Education and the Embassy of the People's Republic of China in Poland. The goal of the competition is to create future leaders and experts in business cooperation between Poland and China.

Students receive awards in the National Student-Inventor Competition

2019-02-08

The laureates of the ninth National Student-Inven-

tor Competition organized by the Kielce University of Technology are awarded with the opportunity to present and promote their innovative solutions during the 47th International Exhibition of Inventions in Geneva. In the ninth competition, 5 main prizes were awarded to Piotr Terebun and Michał Kwiatkowski from the Lublin University of Technology for the device for the plasma activation of liquid materials; Mateusz Wrzochal from the Kielce University of Technology for the device for testing the thrust moments of tapered roller bearings; Julia Radwan-Pragłowska and Łukasz Janus from the Krakow University of Technology for biodegradable chitosan nanocomposites / poly (sodium aspartate) / Fe3O4 with ferrimagnetic properties; Michał Pielka from the University of Silesia in Katowice for the system to monitor the locomotor functions of the body and respiratory functions and Ewa Kozłowska Dymarska, Monika Urbaniak, Monika Grzeszczuk, Jakub Sycz, Jordan Kownacki, Patryk Franczak and Iga Matera Agata from the University of Life Sciences in Wrocław for a series of 26 inventions regarding obtaining steroid compounds with high therapeutic potential as a result of biotransformation.

World Wetlands Day of the Maria Curie Skłodowska University in Lublin

2019-02-08

The Faculty of Geosciences and Spatial Management of the Maria Curie Skłodowska University (UMCS) in Lublin invites participants on February 8, 2019 to celebrate the World Wetlands Day. The event will be a series of open popular science lectures and workshops about the problems of wetlands. The University's scholars, students and graduates of the Faculty and invited guests: Andrzej Różycki (Poleski National Park), Barbara Grzebułska (Regional Ecological Center) and Krzysztof Wojciechowski (Team of Lublin Landscape Parks) will provide participants with the issues related to wetland biodiversity, their protection, and the impact of wetlands.

University of Warsaw to hold Forum of the European University Association on

teaching and learning

2019-02-08

The EUA European University Association, which also includes the University of Warsaw (UW), organizes a forum devoted to the issues of learning and teaching „Towards successful learning: Controversies and common ground” at the Warsaw University on February 14-15, 2019. The European University Association is an institution that consists of over 800 universities and national conferences of rectors from 48 countries. Over 250 people will take part in the Warsaw forum, including vice-rectors, deans, researchers involved in the subject of teaching as well as political decision-makers and students. The forum will consist of three sessions devoted to teaching objectives, European policies related to learning and teaching and two different approaches to learning - presented by University College Cork and by the University of Oslo More: <https://www.eua.eu/events.html?task=euaevents.download-Doc&id=1931>

Researcher of the Adam Mickiewicz University in Poznań receives the L'Oréal-UNESCO scholarship

2019-02-08

Dr Joanna Gościańska from the University of Adam Mickiewicz in Poznań won the scholarship L'Oréal-UNESCO for Women in Science. A scientist from the Faculty of Chemistry is researching technologies that use coal in a new way. Dr Gościańska analyzes multifunctional mesoporous carbon materials in the processes of adsorption of active pharmaceutical substances. The research is to find an answer to the question how to use mesoporous coals as drug carriers. This is an innovative and almost unexplored subject. Dr Gościańska's project includes painkillers and antibiotics. The results of research will allow limit the number of doses of the drug - the drug will be released in the body gradually throughout the day and exactly where it should. The Polish National Committee for UNESCO, the Ministry of Science and Higher Education and the Polish Academy of Sciences are partners of the L'Oréal Poland For Women and Science Program.

University of Silesia to hold a seminar on improving the quality of life in the city

2019-02-08

On March 1st, the Observatory of Municipal and Metropolitan Processes at the University of Silesia in Katowice invites participants to the seminar. „Towards nature, or how to improve the quality of life in the city?” The meeting is part of the Local Government Academy - a program promoting specialist knowledge supporting the activities of local government and building cooperation between its representatives and experts from various fields of science. The subject of the nearest seminar focuses on the issue of natural resources management in order to improve the quality of life of urban residents. The Observatory of Municipal and Metropolitan Processes is an entity of the University of Silesia, where researchers working in research teams carry out, sectoral analyzes for the needs of local government units and provide expert services.

Darwin's birthday to be celebrated at the University of Wrocław

2019-02-08

The Institute of Psychology of the University of Wrocław and the Polish Society for Human Sciences and Evolution invite participants to a series of popular science events on the occasion of Karol Darwin's birthday. As part of the Darwin Days, students of psychology and biology will conduct workshops on the basics of biology and biological

foundations of psychology. Over 500 pupils from 9 primary schools in Wrocław will take part in classes, where they will learn how natural selection works, where emotions come from and how the brain is built (and why exactly). For adults, open popular science lectures are prepared in the hall of the Institute of Psychology at the University of Wrocław, ul. Dawid 1 (start at 18.00). The dates and topics of lectures are: February 11 - Evolution of Romantic Love; February 12 - Evolutionary meanders of human nature and February 13 - Revival of mammoths, dinosaurs and Neanderthals. About ancient DNA. After each lecture a session of questions from the audience is planned.

Researchers from the Lviv University of Technology visit Gliwice

2019-02-08

Silesian University of Technology hosted a delegation of scientists from the Lviv University of Technology. Representatives of the Ukrainian university spent two days in Gliwice, during which they became acquainted with the achievements of the faculties and the research programs implemented on there. The guests visited the faculties of Mechanical Technology, Automation, Electronics and Information Technology, Construction, and Environmental Engineering and Energy. They talked about the research and didactic processes carried out at particular faculties. The implementing dual studies in Ukraine on the basis of EU experience and the concept of building control systems and visualization of water supply networks in cities based on the Matlab program were also discussed. The University of Gliwice has expressed interest in exchanging experiences in the form of temporary employment of scholars from Lviv - involving them in the process of scientific research and the didactic process.

Łódź students win the Polish eliminations of the Philip C. Jessup International Law Moot Court Competition

2019-02-11

Students of the Faculty of Law and Administration of the University of Łódź (WPIA UŁ) won the national eliminations of the Philip C. Jessup International Law Moot Court Competition for the third time in a row. They will perform in the world final of the competition, which will be held in Washington, in April 2019. The winning team was composed of Monika Danilczuk, Franciszek Jędras, Alicja Ozimek, Agata Szczepańska and Jakub Wojtasik. The tutors of the students are Dr Joanna Połatyńska and Dr Marek Wasiński from the Department of International Law and International Relations, University of Law and Administration. The competition involves the simulation of a trial (moot court) before the International Court of Justice. Students take the roles of process representatives of two fictitious states. Each dissertation is a separate «match» and the winner advances to the next round.

Professor Błocki: Expenditure on science should be twice as high

2019-02-11

Polish science is still underfinanced, and the proper funding is a prerequisite for civilization development of the country - said Prof. Zbigniew Błocki, director of the National Science Center. Prof. Błocki emphasized that- "all the time we spend about one percent for research and development, and more or less half of this is spent on science. According to the head of the NCN, expenditures should be at least twice as high. The Polish government made a commitment to the European Union that in the next few years we will reach about 2 percent of Polish GDP. This is a prerequisite for the civilization development of our country, to teach students at least on the comparable level to other European countries - argued Prof. Błocki.

Scholar of the University of Economics in Katowice published in a prestigious journal

2019-02-11

Dr Jan Konowalczyk from the University of Economics in Katowice is implementing the project „Methodology for estimating the value of damage on real estate midwives in areas of limited use of airports in Poland”. Apart from the scholars of the Katowice University's Investment and Real Estate Department, the research involves scientists from five other Polish universities. The results of their work have recently been published in the prestigious journal Sustainability, which is on the Philadelphia list. The text «Investigating the Impact of Airport Regional Policy in Poland», co-authored by Dr Konowalczyk, begins a series of publications in domestic and foreign magazines. The effects of research, implemented since 2016, have already been presented at prestigious conferences in Boston (USA, AAG 2017), Delph (Holland, ERES 2017), Bonita Springs (USA, ARES 2018), Guangzhou (China, AREUEA 2018).

Professor Maciej Żylicz to hold a lecture on „Micro-evolution of cancer cells” at the University of Wrocław

2019-02-11

University of Wrocław invites participants on Febru-

ary 21 for a lecture of an eminent biochemist Prof. Maciej Żylicz, entitled: „Micro-evolution of cancer cells”. The lecture at the Congress Center of the university will take place as part of the Interdisciplinary Scientific Seminar of the Wrocław University of Technology. Professor Maciej Żylicz deals with the molecular biology of thermal shock proteins, the interaction of caring proteins, cancer transformation, p53, MDM2. For many years he worked at the International Institute of Molecular and Cell Biology in Warsaw. Since 2005 he has been the president of the board of the Foundation for Polish Science. He participates in works of many national and foreign academies of sciences, he is a laureate of numerous scientific awards. Professor Żylicz received honorary doctorates from Wrocław, Gdańsk and Jagiellonian Universities. Interdisciplinary Scientific Seminar is a program addressed to students, PhD students, researchers and anyone interested in deepening science knowledge.

Poznań researcher to participate in the management committees of COST scientific networks

2019-02-11

Dr Katarzyna Waszyńska from the Adam Mickiewicz University in Poznań (AMU) was appointed by the Minister of Science and Higher Education to represent Poland in the Management Committees of COST Scientific Networks. The Poznań scientist will work in committees: CA18121 Cultures of Victimology; understanding processes of victimization across Europe and CA18124 - European Sexual Medicine Network. Dr Waszyńska is a psychologist, clinical sexologist and sex educator. She is the head of the UAM Health Promotion and Psychotherapy Unit. Her scientific interests focus on issues related to psychology, sexology, and sexual health promotion. COST is an organization that finances research networks that offer opportunity for collaboration between researchers in Europe and beyond. The network gives an impulse to the development of research and innovation. Since 1971, COST has been receiving funding from the European Union under various framework programs for research and inno-

vation.

Lodz University of Technology invites participants to a debate about new solutions in science and higher education

2019-02-12

The debate „Statutes of the university and the Act 2.0” will take place on February 18, 2019 at the Lodz University of Technology with the participation of Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. The event will take place as part of a series of nationwide debates of the NKN FORUM. It is a new initiative of the Minister of Science and Higher Education created with the participation of representatives of the academic community, serving to discuss key elements and possible solutions resulting from the new law on higher education and science. The Łódź debate combines discussions in thematic groups, which will concern the organization and management of the university, as well as its structures in the context of didactics and research management, employees issues and academic advancements, university assets and finance, and process management models in the light of the new law.

Deputy Prime Minister Gowin visits the State Higher Vocational School in Płock

2019-02-12

The State Higher Vocational School (PWSZ) in Płock was included in the group of 15 vocational schools awarded as part of the „Didactic initiative of excellence” project. Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education announced it during his visit at the Płock school. The decision on the project «Didactic initiatives of excellence» is double good news for vocational schools - said Minister Gowin. Firstly, up to fifteen vocational schools from different parts of Poland will receive an additional one million PLN for the quality of education. Secondly, it is proof that the environment associated with PWSZ played an important role in the process of creating the Constitution for Science.

Additional support for public vocational universities in the field of excellence in education was an important postulate of this group of schools.

Epi-Science Center to be created in Białystok

2019-02-12

The Białystok Science and Technology Park is launching the Epi-Science Center with the aim of popularizing science. The name was selected from over 600 proposals submitted in the competition announced by the Białystok Science and Technology Park. Epi-Center will take over 3 thousand square meters within the Białystok stadium facilities. The Small Explorers Zone will be active here, i.e. the educational space for the youngest, as well as the main exhibition and laboratories addressed to young people and adults. The Epi-Science Center is to encourage the exploration of knowledge about the physics, exact, technical and natural sciences. Special laboratory classes will be conducted with the use of modern technologies. They will also support educational programs implemented by kindergartens and schools.

Conference „Silesian Channel and Waterway of the Upper Vistula - opportunities and challenges”

2019-02-12

The Silesian Water Center of the University of Silesia and the Department of Engineering and Water Management of the Krakow University of Technology invite participants to the scientific conference

on “Silesian Channel and Waterway of the Upper Vistula - opportunities and challenges”. Participants will discuss the planned development of inland waterway transport in Poland as an opportunity for the diversification of transport. The conference include the history of the Silesian Channel and the Waterway of the Upper Vistula - goals, routes, stage of completion, class and stock, as well as the planned scope of works; hydrological and hydrotechnical conditions and water management for its functioning as well as present and future spatial conditions with the indication of strategic nodes. The organizers also plan to discuss the economic effects of the construction of the Silesian Channel, the modernization of the Upper Vistula Waterway and the principles of cooperation of the industry environment with government institutions and local self-government.

University of Gdańsk to participate in the project of prevention of postnatal depression

2019-02-12

„MAMA stop” is a project to prevent postnatal depression. It will be co-financed from the European Social Fund. The educational component of the project will be prepared by the Institute of Psychology of the University of Gdańsk. The leader of the project is Copernicus Podmiot Leczniczy Ltd Gdańsk. It will provide prevention of postnatal depression, screening and treatment options, which in the long-term is to reduce the negative effects of untreated depression on the labor market. The University of Gdańsk is planning preparation of a training plan, participation in the creation of a pilot project on the prevention of postnatal depression and didactic materials for project participants, as well as website and online forum maintenance and providing statistical analysis of program implementation indicators.

Exhibition of Rector's insignia of the Poznań State Higher Schools

2019-02-12

Until March 2nd visitors can see the exhibition „Rector insignia of state universities in Poznań” held in the Archdiocesan Museum in Poznań. The exhibition was organized on the occasion of the 500th anniversary of establishing the Lubrański Academy and the 100th anniversary of higher education in Poznań. In the former headquarters of the Lubrański Academy there are presented the rector's insignia from Adam Mickiewicz University; University of Arts; University of Economics; Medical University; University of Life Sciences; Academy of Music; Academy of Physical Education and Poznan University of Technology. The basic set of insignia includes a chain, scepter and ring. The scepter derived from the shepherd's rod is a sign of power and decision-making, the chain means the authority of the office and the ring refers to the symbolism of the vow when the rector commits to faithful and loyal service to the university.

5th competition for the Kotarbiński Award launched

2019-02-13

The Professor Kotarbiński University of Lodz announced the fifth competition for the works in the humanities. They can be submitted by scientific institutions from all over the country. The author of the winning work will receive 50,000 PLN for further research. The Competition Chapter will evaluate and reward the best scientific works in the field of the humanities. The aim is to emphasize the importance of humanistic reflection in Poland and to show that Polish science produces works of the highest scientific quality. Works should be submitted by 5 April 2019 to the following address: Office of Rector of the University of Lodz, ul. Narutowicza 68, 90-136 Łódź, with one copy of the work together with a written recommendation from the head of the reporting unit.

Professor Jerzy Lis receives The Bridge Building Award

2019-02-13

Professor Eng. Jerzy Lis, prorector for cooperation at the AGH University of Science and Technology in Krakow, was awarded the „The Bridge Building Award”. It is awarded annually by the American

Ceramic Society to a non-US scientist, who made a unique contribution to the development of ceramic engineering. The prize was awarded during the 43rd International ICACC Conference (International Conference & Exposition on Advanced Ceramics and Composites), which took place on January 22-27, 2019 in Daytona Beach, Florida. It is one of the most important world meetings of scientists and representatives of the ceramic industry. Additionally, Professor Jerzy Lis was invited to deliver a plenary lecture entitled „Processing of complex ceramic materials by rapid high-energy techniques“.

Female students of technical universities to participate in the project „Siemens Engineer 4.0“

2019-02-13

By March 3, 2019, female students of technical universities can apply for the „Engineer 4.0“ program, organized by Siemens. The project will include specialist workshops, and participants will get a chance to go to Hannover Messe in April. The program partner are the Perspektywy Education Foundation and the Ministry of Entrepreneurship and Technology. Participants will receive workshops conducted by members of the Siemens board and experts in the field of industrial technology from such companies as KUKA and Daimler. The « Siemens Engineer 4.0» educational project is part of the initiative of Siemens and the Perspektywy Education Foundation «Women's potential for the technology industry», which supports women's career in engineering professions. More information and registration: www.siemens.pl/inzynierki4-0

Students of the University of Economics in Katowice to participate in the second part of the Global Management Challenge

2019-02-13

Two student teams from the University of Economics in Katowice were promoted to the second stage of the world's largest business simulation - Global Management Challenge (GMC). 155 teams from companies and universities participated in the first part of the simulation. Teams fought for the highest investment result of their company for 5 weeks. 60 teams including GoldenEye (students of the finance and insurance faculties, IT and communication faculties and management departments) and MGCG Managers (students of the finance and insurance faculty) from University of Economics qualified for the next competition. GMC is the largest business simulation in the world in which several teams manage companies competing on the virtual market. The project is present in nearly 40 countries around the world. In the advanced training program GMC uses gamification, which means the use of mechanisms from computer games in business.

Polish-Ukrainian scientific conference to be held in Gorzów Wielkopolski

2019-02-13

Department of Polish Language, Academic Center of Ukrainian Studies of the Academy in Gorzów Wielkopolski and the Faculty of Tourism of the Carpathian National University in Ivano-Frankivsk (Ukraine) will invite participants on May 14 and 15 to the International Scientific Conference „Cultural heritage of the borderland“. The aim of the conference is to present the cultural heritage of the border area in the aspect of its impact on cultural and scientific development, the sense of ethnic and national identity, religion and to develop mutual relations. The conference is addressed to cultural researchers, linguists, historians, sociologists, political scientists, literary scholars, euroregional officers, pedagogues, catechists, theologians, psychologists and all interested participants.

Medals for the presentation of inventions for the Technology Transfer Center of the Pomeranian Medical

University

2019-02-14

Technology Transfer Center of the Pomeranian Medical University (CTT PUM) in Szczecin received gold medals for the presentation of five inventions during the International Exhibition of Intellectual Property, Inventions and Innovation IPITEX 2019 in Bangkok. The exhibition on the occasion of the Thai Inventors' Day presents 434 solutions from 25 countries. Szczecin Center received gold medals for the presentation of inventions: Method for detecting the first episode of psychosis; Umbilical cord collection kit; A kit for the treatment of HIV and HCV through the use of virtual algorithms and QR codes; The prototype of the impression tray for unilateral missing teeth in the jaw and the Mobile application for sexual health. The inventions awarded in Bangkok were created as part of the «Incubator of Innovation +» program, implemented by the medical and maritime MareMed consortium, which includes CTT PUM and the Innovation Center of the Maritime University of Szczecin.

Young Programmer's Clubs to operate in 16 Polish cities

2019-02-14

Over 13,000 participants benefited from classes at the Young Programmer's Clubs set up by the Ministry of Digitization. Clubs have been operating for 3 months in 16 medium-sized cities in Poland. The club from Piotrków Trybunalski, where 46 workshops with 522 participants were organized, was the record holder among the workshop points launched last year. The clubs will operate until October 2020, during which 3,200 free workshops will be held for over 40,000 people. The opening of Clubs is an element of the Educational and Informational campaigns project for the dissemination of benefits from the use of digital technologies. They are aimed at promoting the use of technology in everyday life by people of all ages, eliminating barriers and increasing the digital competence of the society. The project covers 4 areas: quality of life, public e-services, network security and programming.

Summer courses of Polish language and culture for foreign university students

2019-02-14

Until 18 March 2019, foreign university students can apply for Summer courses of Polish language and culture. The project, run by the National Academic Exchange Agency (NAWA), is addressed to non-Polish citizens and who do not study in Poland in the academic year 2018/2019. During the courses, participants have the opportunity to learn Polish intensively (about 20 hours of classes per week), to speak Polish at classes and outside (on the street, in a restaurant, during meetings with Poles), and to visit Polish cities, integrate with other foreign students or carry out projects together. More: <https://nawa.gov.pl/jezyk-polski/letnie-kursy-jezyka-i-kultury-polskiej/o-programie>

Researcher from the Jagiellonian University included in the Forbes list „30 under 30 Europe”

2019-02-14

Dr Mateusz Hołda from the Jagiellonian University in Krakow was included in the magazine „Forbes” in the category „Science & Healthcare”. The „30 under 30” lists include the young entrepreneurs, founders of innovative businesses, scientists, social activists, artists, politicians and sportsmen selected by the „Forbes” magazine. Dr Mateusz Hołda is a

co-founder and head of the HEART - Heart Embryology and Anatomy Research Team operating at the Department of Anatomy of the Jagiellonian University Collegium Medicum. The work of his team focuses on the study of cardiovascular morphology, results in the models of heart produced in the 3D print and visualization laboratory developed for medical and scientific purposes.

Debate about the condition of the European Union

2019-02-14

The Faculty of Political Sciences and International Studies at the University of Warsaw (UW) invites participants on February 14, 2019 to the debate „Union at a crossroads”. In what state will the Union be after the Brexit and euroelections? Will the scenario of a «two-speed Europe» be fulfilled with the strengthened position of France and Germany? Will there be a return to «Europe of Homelands»? How real is the disintegration of the Union? Konrad Szymański - Deputy Minister of Foreign Affairs, Radosław Sikorski - Minister of National Defense in 2005-2007, Minister of Foreign Affairs in 2007-2014, Prof. Roman Kuźniar - political scientist and diplomat, chairman of the Scientific Council of the Institute of International Relations of the University of Warsaw and Prof. Tomasz Grzegorz Grosse - a political scientist and sociologist, head of the European Union Politics Department at the Institute of European Studies at the University of Warsaw will answer the issues. The debate will take place in the Świetlica Wolności Center, Warsaw, ul. Nowy Świat 6/12.

Gdańsk University of Technology to hold a conference „Microplastics - a big problem?”

2019-02-14

The Open University of Technology invites partici-

pants on February 21 to the Courtyard of Hevelius in the Main Building of the Gdańsk University of Technology for the first meeting of the #CiekawiNauki program: “Microplastics - the risks associated with them and the quality of water and ways to improve it”. - We encounter the problem of microplastics when shopping or opening a plastic bottle of water. Our cities also deal with that by eliminating potential sources of microplastics and proper treatment of sewage and rainwater. Invited experts will also answer the questions which everyday products contain the most harmful substances, what effect plants have on rainwater purification and how to protect themselves from toxins in everyday life. The program #CiekawiNauki is a new initiative of the Gdańsk University of Technology. Monthly meetings with experts will bring closer the current problems of science and the modern world in an accessible form and in a pleasant atmosphere. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGncmoQv7K0/content/mikroplastik---wielki-problem-pierwsze-spotkanie-z-cyklu-ciekawinauki

Researcher of the Pomeranian Academy in Słupsk nominated for the Polish Intelligent Development Award

2019-02-15

Magdalena Pawlik from the Institute of Physics at the Pomeranian Academy in Słupsk has been nominated for the Polish Intelligent Development Award 2019 in the category „Scientist of the Future” for the project „Optical characteristics of pine pollen grains and their impact on the quality of remote measurements in the Baltic Sea”. Comprehensive measurements of the optical properties of pine pollen and pollen grains found in seawater, as well as its mixture with different amount of optically significant water components will contribute to the knowledge of natural water optics. The results of the research will help to reduce errors in the creation and interpretation of satellite maps. The Polish Intellectual Development Award is being fought by projects implemented by Polish scientific institutions, institutions and companies dealing with research and development activities that, through

their innovative investments and solutions, support the sustainable development of Poland.

Aleksandra Lehmann from the Jagiellonian University in Krakow received the main prize in the third competition for the best works in the field of modern economic cooperation between Poland and China for her work entitled „Luxury goods market in China. Success factors of western brands. „ The organizer of the competition was the Polish-Chinese Business Council, in cooperation with Bank of China, HSBC Bank Polska and Haitong Bank. The goal of the competition is to create future leaders and experts in business cooperation between Poland and China. The winner of the main prize received one-year scholarship at any Chinese university from LIU Guangyuan, the ambassador of the People's Republic of China in Poland.

Dr Michio Kaku to visit Toruń

2019-02-15

Dr Michio Kaku - an American physics theoretician, science promoter and futurologist will be visiting Toruń University at the invitation of the Polish National Foundation (PFN). On the 546th anniversary of the birth of Nicolaus Copernicus, the scientist will give a lecture at the Jordanki Cultural and Congress Center. Dr Kaku will visit Toruń as part of the 100x100 project, during which the PFN - on the occasion of the 100th anniversary of Poland's independence - organizes meetings with hundred celebrities from all over the world. The scientist will visit the Astronomy Center in Piwnice, he will also visit the Polish Optical Atomic Clock at the National Laboratory of Atomic, Molecular and Optical Physics at the Institute of Physics of the Nicolaus Copernicus University and will meet with the authorities of the Faculty of Physics, Astronomy and Applied Computer Science. The main point of the visit of Dr Kaku in Torun will be his scientific show at CKK Jordanki. Admission to the event is free, participants can register for the meeting by writing to the e-mail address: 100x100@pfn.org.pl

Student of the Jagiellonian University wins the competition for the best work on Polish-Chinese economic cooperation

2019-02-15

Conference „World of Claw-Hunters” to be held at the Warsaw University of Life Sciences

2019-02-15

The Aves Scientific Circle operating at the Faculty of Animal Sciences of the Warsaw University of Life Sciences (SGGW) invites participants to the conference „World of Claw-Hunters”, which will take place on March 2, 2019 at the WULS-SGGW campus in Warsaw. The conference topics cover issues related to falconry, breeding, nutrition, physiology and diseases, legal aspects and the protection of birds of prey. During the event, the organizers will focus on falconry and bird of prey in Poland and in the world, breeding of birds of prey and education in falconry in Europe, as well as legal aspects related to the possession and breeding of falconry birds.

Poland joins the European Molecular Biology Laboratory

2019-02-15

Poland became the 26th Member State of the European Molecular Biology Laboratory (EMBL). EMBL is an innovative and interdisciplinary, world-leading research organization related to biology. Research carried out in its structures is carried out by over 80 research groups representing a full cross-section of issues related to molecular biology. An international research institution founded in 1974 employs

over 1,700 employees of many nationalities and specialties. Thanks to its membership, Poland was granted the right to designate two delegates with full voting rights at EMBL. Our researchers will be able to use advanced and state-of-the-art laboratories and equipment, and young scientists will be able to use programs designed for PhD students and doctors starting their careers.

„Warsaw Legends” on the Radio of the University of Cardinal Stefan Wyszyński

2019-02-15

The Development Foundation of Cardinal Stefan Wyszyński University (UKSW) in Warsaw established cooperation with the National Center for Culture in the implementation of the project called „Warsaw Legends: a radio play on the base of legends written by Artur Oppman”. As the University of Warsaw emphasizes, the aim of the project is to popularize and save from oblivion in the minds of young people in Warsaw legends, through their attractive arrangement in the form of radio dramas. The collection of radio plays is based on Artur Oppman's «Warsaw Legends»: Mermaid, Basiliscus and Golden Duck. The project is addressed mainly to young people and students of Warsaw universities and people interested in the history of Warsaw. It will be realized in the studio of Radio UKSW and recorded by journalists and students of UKSW journalism. The first radio play UKSW will be broadcast on February 18, 2019 at 18.00 via the website www.radio.uksw.edu.pl.

University of Silesia to hold a conference "Legal and social aspects of mobbing and discrimination in employment"

2019-02-15

The University of Silesia and the Social Insurance Institution invite participants to the scientific conference „Legal and social aspects of mobbing and discrimination in employment” on 13 March. The meeting aims to introduce the subject in the context of current legal regulations and the achievements of Polish labor law. As part of the conference organized by the «Opus per Laborem» Scientific Society, the Department of Labor Law and Social Policy of the University of Silesia and the Social Insurance Institution, two panels are planned: expert and student. Academic staff from Polish academic centers specializing in labor law as well as members of the Polish Teachers' Union (ZNP) at the University of Silesia and the Antimobbing Club operating in the Silesian district of the PNA are invited to participate in the event. The special guest will be Melike Yaman from Altınbaş Üniversitesi (Turkey), who will give a speech on the subject of mobbing in the light of Turkish law.

Rzeszów University of Technology to cooperate with the Technical School Complex in Leżajsk

2019-02-15

Rzeszów University of Technology (PRz) has signed a cooperation agreement with the Technical Schools Complex (ZST) in Leżajsk. As a result of the agreement, the Faculty of Mechanics and Technology of the Rzeszów University of Technology in Stalowa Wola will support the mechanical profile class at the school in Leżajsk. The agreement was signed by Dr Eng. Grzegorz Masłowski, vice-rector for education at the Rzeszów University of Technology and Halina Samko, head of the Technical Schools in Leżajsk. As part of the cooperation, Rzeszów University of Technology will support the mechanical profile class. The youth from ZST in Leżajsk will take part in conferences and scientific symposia organized by the Rzeszów University of Technology and cooperate with the academic circles operating at the university.

Scientist from Collegium Civitas receives the Paul Ehrlich and Gunther K. Schwerin Human Rights Award

2019-02-18

Dr Rafał Pankowski, co-founder of the „Never Again” Association and lecturer of Collegium Civitas in Warsaw, was honored with this year's Paul Ehrlich and Gunther K. Schwerin Human Rights Award. Rafał Pankowski was appreciated for his consistent actions against anti-Semitism and racism. Dr Pankowski is a professor of sociology at Collegium Civitas, in 2018 he published a widely commented article in the «Israel Journal of Foreign Affairs» about anti-Semitic discourse in Polish media and politics. He also cooperated with many expert organizations and academic institutions, including with the London Chatham House, the Vienna Institute of Human Sciences and the Center for European Studies at the University of Chulalongkorn in Bangkok. The award was established in 1998 by the American Anti-Defamation League to honor people fighting against anti-Semitism in Europe.

Lodz University of Technology to hold an academic debate

„University statutes and Act 2.0”

2019-02-18

The Lodz University of Technology will hold the first academic debate „Statutes of the university and the Act 2.0” with the participation of Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. The meeting and discussions on the most important document related to the functioning of the university, will take place on Monday 18 February 2019. About 400 representatives of all universities in Poland will come to the debate at the Lodz University of Technology. They will discuss the most important topics related to Statute 2.0: authorities, organization and management of the university; the structure of a university and the management of scientific research and employees' affairs, including scientific advancements. During the event in the expert debate, Piotr Müller, the deputy minister of science and higher education, will present the chances and challenges facing high schools working on the new university statute.

Competition „Complicated and simple. Young scholars about their research”

2019-02-18

Agnieszka Muzińska, MA, geomorphologist, PhD student of Interdisciplinary PhD Studies in the field of mathematical and natural sciences at the University of Warsaw, won the first prize in the 14th competition „Complicated and simple. Young scholars about their research”. The competition supported by the Minister of Science and Higher Education is organized by the „Forum Akademickie” magazine. The competition participants were research workers of universities and research institutes, and PhD students under 35 years of age. During the awards gala, Deputy Prime Minister Jarosław Gowin pointed out that the pursuit of scientific excellence is one of the missions of the academic community. - Social responsibility of science and its popularization are forms of debt repayment. I believe that through the awarded works some people will be inspired to follow a scientific career - said Minister Gowin.

Physicist from the University of Warsaw receives the Humboldt Research Award

2019-02-18

In the last competition for Humboldt Research Award, the Alexander von Humboldt Foundation awarded Prof. Jerzy Lewandowski from the Faculty of Physics at the University of Warsaw for his scientific achievements. Professor Jerzy Lewandowski from the Faculty of Physics, University of Warsaw is the head of the Department of Theory of Relativity and Gravity at the Institute of Theoretical Physics. He deals with the geometric theory of black holes and gravitational waves in space-time, as well as the general theory of relativity. He is the author of numerous scientific publications, and in 2016 he received the membership of The International Society on General Relativity and Gravitation. Nomination of Prof. Lewandowski was reported by Prof. Thomas K. Thiemann from the German Friedrich-Alexander-Universität. Thanks to the Humboldt Research Award, the Polish physicist will carry out his research project in cooperation with specialists in Germany.

Risk of accidents increases after sunset

2019-02-18

The risk of an accident for pedestrians after dusk out of town is 12 times higher than during the day – say the analyzes of the Motor Transport Institute (ITS). The Institute has analyzed road acci-

dents involving pedestrians out of town, which occurred during the day and after dark, where the only source of light were car headlights. Analysis of the results indicates that during the day (within one hour before sunset, between 16:00 and 17:30), up to 13% accidents with pedestrians happened. After the same time period, but after dusk, this indicator grew from 87 to 100 percent. It means that after dusk in the researched hours and in similar traffic conditions 12 times more accidents with pedestrians occurred than during the day.

Scientists from the Poznan University of Technology become laureates of the Competition for the Minister of Investment and Development Award

2019-02-18

Researchers from Poznan University of Technology (PP) became the laureates of the Competition for the Minister of Investment and Development Award for diploma theses, PhD and post PhD dissertations as well as publications in the fields of architecture and construction, planning and spatial development and housing. The laureate of the competition in the post PhD dissertation category was Dr Eng. Agnieszka Rumieź for her PhD dissertation «Improvisation as a strategy in architectural creativity.» The supervisors of the work were Dr Piotr Marciniak, and Dr Jerzy Suchanek. The awards in the master's thesis category were received by Adam Jankowski for the work «Scientific station with hotel facilities of the Łazy nature reserve» (supervisor: Dr Maciej Janowski, Ph.D., Eng.) and Adrianna Pacion for the work «Sanatorium Clinic in Czarna Góra» (supervisor: architect Agata Gawlak).

Cooperation between universities from Leszno and German Darmstadt

2019-02-18

Jan Amos Komensky State Higher Vocational School (PWSZ) in Leszno signed a strategic cooperation agreement with the German Hochschule Darmstadt-University of Applied Sciences. Agreement was signed by Prof. Maciej Pietrzak, the Rector of the PWSZ during his visit in Darmstadt. It will enable all graduates of the University of Leszno to participate in the fields of electrical engineering and mechatronics and to continue their studies at the second level studies in Germany without examinations, without program differences and without tuition fees. Other provisions of the agreement are provided paid internships in renowned German corporations. Hochschule Darmstadt-University of Applied Sciences is one of the largest German vocational universities with an offer of over 50 fields of study. The university has about 15 thousand students with 18 percent foreign students.

Exhibition and lecture on Dutch masters and their paintings at the University of Wrocław

2019-02-18

The Center of Culture of the Dutch University of Wrocław invites participants to the exhibition „With a dream and reality”: Copies of Dutch masters. Enthusiasts will be able to admire copies of paintings by the Dutch masters - Bosch, Vermeer and Van Gogh, who inspired Polish poets. The exhibition was inspired by two women: Agnieszka Traczyńska, artist-painter, teacher at the Wrocław High School, who creates wonderful copies of the paintings of Hieronymus Bosch and Magdalena Śniedziewska, researcher of Polish literature, author of the book The Seventeenth century Dutch painting. The official opening of the exhibition with the participation of the representative of the Embassy of the Kingdom of the Netherlands, Martin van Dijk, will take place on March 7 at 17. After the opening, a lecture «It's not quite bad with us if we can admire Dutch painting» by Magdalena Śniedziewska was planned.

Szczecin Institute to hold Inland Shipping International Conference 2019

2019-02-18

The Institute of Transport Management at the Maritime University of Szczecin and the West Pomeranian Maritime Cluster Association will invite participants on 16 and 17 May to the International Scientific Conference Inland Shipping International Conference 2019. The leitmotif of the meeting will be inland navigation as an alternative to road transport - which is in line with the assumptions and objectives of the European Union's Sustainable Transport Policy. The conference is to be a meeting of practitioners and scientists and a forum for the exchange of views and experiences. The organizers are planning to discuss the following topics: The role of inland navigation in the socio-economic development of the regions; The importance of inland waterway transport in multi-bay transport systems and supply chains; Global and European trends in the development of inland waterway transport (infrastructure, means of transport, control systems) and Polish waterways as a key element of the green corridor Baltic - Central and Southern Europe.

Płock to host the 1st Plenary Assembly of Rectors of Public Vocational Universities

2019-02-19

The State Higher Vocational School in Płock will

host the 1st Plenary Assembly of Rectors of Public Vocational Universities. It will take place on March 20 - 23, 2019 and will be combined with the celebration of the 20th anniversary of the Płock university. The conference will be opened by Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. The conference is an association of rectors representing Polish public vocational schools. During the Plenary Assembly held in Płock, the participants will talk on the subjects related to changes resulting from the Constitution for Science and plans for the development of vocational schools. Over 50 rectors and vice-rectors of the State Higher Vocational Schools from all over Poland will take part in the conference.

3rd Scientific and Technical Conference „How to save Polish agriculture from the effects of drought?”

2019-02-19

The Agricultural University in Krakow, in cooperation with Agromax Agrobusiness, organizes on March 21-21, 2019, the 3rd Scientific and Technical Conference „How to save Polish agriculture from the effects of drought?” The event will be attended by scientists from Poland, the Czech Republic and Slovakia, farmers, agricultural producers, representatives of local governments, public institutions and enterprises associated with the industry. Participants will discuss topics such as drought in the face of global climate change, the effects of drought in agriculture and the environmental response to drought. The legal, economic and technical issues of counteracting the effects of drought will also be discussed. 20 papers and discussion are planned. The conference will be held at the Communal Sports and Recreation Center at ul. Parkowa 20 in Zakrzów (Cerekiew, Opolskie province).

University of Białystok to cooperate with military counterintelligence

2019-02-19

Professor Robert Ciborowski, rector of the University

of Białystok (UwB) and Maciej Materka, head of the Military Counterintelligence Service (SKW) signed a cooperation agreement. It is supposed to concern didactic, scientific and publishing activities. In accordance with the provisions contained in the document, cooperation will include joint ventures, whose main objective will be to raise awareness of the possibilities of protection against contemporary threats of the Polish state. It is primarily about the exchange of knowledge and experience in the field of conducting educational activities and raising professional and scientific qualifications of the staff of both institutions. The agreement provides for the possibility of conducting activities or trainings for the needs of the University of Life Sciences, organization of joint workshops or cooperation in the creation of study programs.

Students of the Adam Mickiewicz University in Poznań create a historical computer game

2019-02-19

Students of the Historical Department of the Adam Mickiewicz University in Poznań created a computer game presenting events that led to the incorporation of Wielkopolska to a reborn Polish state in 1919. The project was co-financed from the governmental program Niepodległa. Wojciech Krasucki, Bartosz Kuźnicki, Anna Mączka, Aleksandra Nowak and Maciej Pluciński created the computer game «Towards Victory». Adventure action game with a graphic drawing frame was made in 2d technology on the Construct 2 engine. Its main goal is to popularize the history for young people in a modern way. The game is intended for people from 12 to 20 years of age who are interested in independent games and history. During the game the player will encounter logic puzzles, talk with historical figures and random people and face the game challenges. The game can be downloaded for free from the website of the Wielkopolska Provincial Office in Poznań: <https://bit.ly/2tnJNcZ>

Philosophical seminar at the University of Silesia „Imagined space - created space”

2019-02-19

The lecture entitled „Space of Humanism in Ancient Philosophy” will start a series of meetings organized as part of the general philosophy seminar „Spatial Imaging - Space Created” at the University of Silesia in Katowice. The series of lectures will begin on February 19 and will last until June 4. Speakers include scientists from the University of Silesia, the Jagiellonian University, the Silesian University of Technology and the Silesian Medical University - philosophers, historians, sociologists, cultural experts, architects, theologians and lawyers. The lectures are addressed to students of the humanities and social sciences and all interested. The subject matter of the meetings concerns reflection on various aspects of the understanding of space - especially in relation to the virtual world, changing the approach to the ways of understanding words: close, far, strange, unknown, safe in various contexts.

Wall of lights designed in Gdynia used at Grammy Awards

2019-02-19

A huge wall of lights designed in the studio of the Portman Custom Lights company - located in the Pomeranian Science and Technology Park Gdynia

- was used during awards of the American music industry - Grammy 2019 in Los Angeles. The lighting designed in Gdynia was the main element of the setting of the performance of Miley Cyrus and Shawna Mendes, during which the artists performed the song «In your Blood». Constructors from Portman Custom Lights repeated their success in 2017 when their fittings appeared for the first time during the Oscars' music gala. They also proved that the enthusiasm of light designers from around the world over Polish lights is not only a result of newness, but rather a confirmation of the quality «made in Poland» lamps in the world.

Archaeological discovery in Tuchola Forests

2019-02-19

PhD students of archeology - Mateusz Sosnowski from the Institute of Archeology of the Nicolaus Copernicus University in Toruń (UMK) and Jerzy Czerniec from the Institute of Archeology and Ethnology of the Polish Academy of Sciences in Warsaw made an extraordinary discovery in the Tuchola Forests. Thanks to the use of innovative methods of spatial analysis of the digital image of the earth's surface, they were able to observe relics of the human settlement from about 2 thousand years preserved on the surface. - Thanks to the use of innovative methods of digital terrain model analysis, we managed to register the complete spatial layout of the human settlement, where we are able to indicate cropland relics, the space in which the life of the estate took place - says Jerzy Czerniec. The authors are still waiting for the results of analyzes and dating. If everything is confirmed, the discovered estate is probably the only completely preserved and visible prehistoric human settlement in Europe. More: <https://www.umk.pl/wiadomosci?id=25948>

Scholarship program of the Polish Academy of Sciences for scientists from around the world

2019-02-20

The Polish Academy of Sciences (PAS) will launch a

scholarship program with a budget of nearly EUR 12 million for the best scientists from around the world to conduct research at the Polish Academy of Sciences institutes. The program is co-financed from the European Union funds. The PAS received funding under the Marie Skłodowska-Curie COFUND program, supporting scientific institutions in activities promoting the development and training of research staff. As part of the PASIFIC program („Polish Academy of Sciences' Individual Fellowships: Innovation & Creativity”), 50 two-year scholarships will be funded, for both foreigners and Poles staying at least two years outside of Poland. Scholarship holders will receive scholarships and research grants worth up to 60,000. EUR. The expected results of this program will be further internationalization of PAS institutes as well as the development of scholarship scholars. See: <https://youtu.be/HH1URd5n2Xw>

PLN 250 million for researchers in calls of the National Science Center

2019-02-20

For the tenth time, experienced scientists will receive grants within the MAESTRO call, for the eighth time scientists planning to set up a research team will receive grants within the SONATA BIS call. The HARMONIA call for projects implemented as part of international cooperation has been conducted for the last time. A total of 650 applications were submitted in the calls, of which 147 were qualified for funding. The total funding in all three competitions is over PLN 250 million. The HARMONY was performed for the tenth and last time. The Council of the National Science Center decided to merge it with the OPUS call, which will be supplemented with the September international perspective - said Prof. Małgorzata Kossowska, chairman of the NCN Council. More: <https://www.ncn.gov.pl/konkursy/wyniki/2019-02-18-maestro10-harmonia10-sonatabis8>

Delegation of the Ministry of Science to visit Great Britain

2019-02-20

The delegation of the Ministry of Science and Higher Education, headed by Deputy Minister Piotr Dardziński, visited Great Britain. The most important point of the stay was a meeting with Chris Skidmore, Minister of State for Universities, Science, Research and Innovation in the Business Department, Energy and Industrial Strategy. In addition, the delegation visited the Museum of General Sikorski, met with outstanding Polish scientists and representatives of the British scientific community, and participated in the twelfth Congress of the Federation of Polish Students' Associations in Great Britain. The purpose of the visit was to strengthen Polish-British relations in the field of higher education and science, inter alia by strengthening contacts between research institutions in Poland and the United Kingdom and starting cooperation in supporting short-term mobility of students and researchers.

Month of Mother Language to be held at the Jagiellonian University

2019-02-20

Faculty of Polish Studies at the Jagiellonian University in Krakow, in cooperation with the Students' Scientific Society of Students' Linguistics at the Jagiellonian University, organizes for the fourth time the Month of Mother Language, which will last from

February 21 to March 21, 2019. As part of this undertaking, a number of events related to the Polish language will take place, including the 5th Krakow Dictation, which will take place on March 16, 2019. It will be conducted in two categories - open and junior (for people up to 15 years of age). In addition, there will be a fourth national competition for advertising for primary schools and a chat competition, as well as linguistic workshops conducted by students at schools in the Małopolska Region. Another accompanying event will be the 21st National Rhetoric Competition. More: mjo.uj.edu.pl

„Critical elements - is the era without a smartphone coming? - lecture at the University of Wroclaw

2019-02-20

The Institute of Geological Sciences of the University of Wroclaw invites participants to a lecture from the series „Secrets of the Earth and the Universe”. On Saturday, February 23, Dr Krzysztof Turniak will talk about the elements used in the production of modern equipment, and at the same time threatened by depletion. Each smartphone is made up of dozens of rare elements, and currently exploited sources of some of them are already running out. What is worse - they are located in only one or several countries in the world, which may threaten the stability of supplies. The scientist will try to answer the following questions: What are the critical elements and what are the prospects for their acquisition? Which of them we produce in Poland? Are we in danger of stopping the production of technologically advanced devices due to the lack of certain elements? Can the exploitation of minerals containing critical elements be harmful to the environment?

Researcher of the Nicolaus Copernicus University becomes the editor of a prestigious magazine

2019-02-20

Dr Paweł Nowicki from the Department of Law of the European Faculty of Law and Administration at the Nicolaus Copernicus University in Toruń became a member of the European Procurement & Public Private Partnership Law Review - one of the largest and most prestigious scientific journals in the world concerning public procurement and public-private partnership. The editor-in-chief of the periodical is Christopher H. Bovis, a world authority in the field of public procurement, and the international editorial board includes well-known scientists, including: Prof. Andrea Biondi from King's College London, Prof. Martin Burgi from Ludwig Maximilian University of Munich and Prof. Christopher R. Yukins from George Washington University Law School. Dr Nowicki will be the Case Law Editor and is the only Polish scientist in the European Procurement & Public Private Partnership Law Review.

Scientific conference „Exploitation of unmanned flying systems”

2019-02-21

The Ministry of Infrastructure, Institute of Aviation, Lazarski University in Warsaw, Faculty of Power and Aeronautical Engineering, Warsaw University of Technology and the Association of Unmanned Aerial Systems are organizing a scientific conference on the research and operation of Unmanned Aerial Systems (BSL). The event will take place on March 6, 2019 at the headquarters of the Institute of Aviation in Warsaw at al. Krakowska 110/114. During the conference, the organizers are planning to discuss the following issues: development of UTM (Unmanned Traffic Management) in Poland and in the world; BSL systems certification, test areas for BSL systems in Poland, BSL operator trainings in Poland, rights and obligations of BSL operators.

Lecture by Dr Ryszard Schnepf about the US at the halfway point of the presidency of Donald Trump

2019-02-21

As part of the series „8 lectures for the New Millennium”, on February 26, 2019, Dr Ryszard Schnepf will give a lecture on „Trump’s America - halfway point”. The event will take place in the hall of the former University Library of the University of Warsaw. During the lecture, Dr Schnepf will analyze the situation in the US and try to answer the question of the condition in which US is in the middle of the term of Donald Trump. Dr Ryszard Schnepf is a diplomat, former Polish ambassador in Uruguay, Costa Rica, Spain and the United States. He is currently involved in scientific activities on Latin American culture and contemporary problems of Ibero-American countries. He also specializes in the theory of diplomacy and the issue of international relations in the USA.

4th Psychiatric Prevention University

2019-02-21

The Medical University of Białystok (UMB) is launching the 4th University of Psychiatric Prevention. The Faculty of Health Sciences UMB invites by June 2019 44 senior students. They are graduates of another educational program of the Białystok Medical University – the University of Healthy Senior. Classes are unique in the country, because no other medical school organizes a series of lectures devoted only to psychogeriatrics, mental disorders in the elderly people, although almost all universities have universities of healthy senior citizens. The subject matter of the course will concern mental disorders in the elderly generation, anxiety disorders, sexual disorders or addiction to drugs and alcohol.

Conference „Climate facts and myths” with Dr Marcin Popkiewicz

2019-02-21

The College of Individual Inter-university Studies at the University of Silesia invites participants to a conference with Dr Marcin Popkiewicz „Climate facts and myths”. The event is part of the „ISM gives voice” initiative - a series of meetings with extraordinary personalities of Polish culture, literature, fine arts, journalism and NGOs. On February 26 at the

Center for Scientific Information and the Academic Library Dr Popkiewicz will discuss the issues of climate change, including global warming, around which many myths will grow. The lecture will introduce the climate control processes, its changes in the past of the Earth and those occurring under the influence of human activity. Dr Marcin Popkiewicz is a megatrends analyst, expert and journalist dealing with connections in the areas of economy-energy-resources-environment, author of the publication «World on crossroads», «Energy revolution. But what for? «and» Science about the climate », editor of portals ziemianarozdrozu.pl and naukaoklimacie.pl.

Project of a student at the Academy of Fine Arts in Wrocław qualified for the world costume exhibition in Moscow

2019-02-21

A student of the 4th year of the Scenography at the Academy of Fine Arts in Wrocław - Anna Adasiak - qualified for the world’s costume exhibition „Innovative Costume of the 21st Century: The Next Generation” organized by the Moscow Central Museum of the AA Bakhrushin Theater. The exhibition is located at the State Museum of History at Red Square in Moscow and will be open from June 4 to August 31, 2019. The Wrocław student will present there the «Cord» costume, which was created as part of the Creative Dress Design classes led by Dr Urszula Smaza-Gralak. The exhibition is dedicated to the projects of young artists who began their careers in the 21st century. It will present the most unconventional as well as innovative and experimental projects from over 50 countries around the world in areas of fashion, photography, computer projects, films, and costumes as installations, costumes for ballet, opera, theater, cinema and performative arts.

Project „Juniors at the University of Technology” to

be launched in Płock

2019-02-22

The branch of the Warsaw University of Technology in Płock invites students of the 6th-8th grade primary school classes to participate in the „Juniors at the University of Technology” project. The project will be carried out at the Faculty of Civil Engineering, Mechanics and Petrochemistry of the Warsaw University of Technology in cooperation with the City of Płock. The university received funding for this project under the «University of the Young Explorer» program. Project participants will take part in a series of mathematics and natural science workshops as well as related to information and communication technologies. 180 students will expand their knowledge in the field of mathematical and natural competences, learning skills, critical thinking and ICT competence (information and communication technologies) under the guidance of lecturers. Students can apply for the project until February 28 at: www.umo.pw.plock.pl

Researchers from Rzeszów University of Technology know how to improve the punctuality of city buses

2019-02-22

Academic staff of Department of Roads and Bridges at Rzeszów University of Technology (PRz) have an idea how to improve the punctuality of city buses in Rzeszów. They will talk about this during the seminar „Development of transport systems in Rzeszów”, which will take place on March 27, 2019. The innovation of the idea is the use of a modern ICT infrastructure to manage traffic on bus lanes. The new solution enables the temporary use of the roadway on demand of an approaching bus. As a result, it is possible to more precisely prioritize buses and adjust the time of operation to the actual rush hours - explain Dr Eng. Mateusz Szarata with Dr Eng. Lesław Bichajło are the author of the project «Dynamically separated bus lanes». See: https://youtu.be/59LkN_IgvDQ

Scientific conference „Cursed Soldiers - Steadfast Heroes“ to be held in March in Wrocław

2019-02-22

The Academy of Land Forces (AWL) in Wrocław invites participants on 7 March to the student scientific conference „Cursed Soldiers - Steadfast Heroes“. The event is to commemorate the „Cursed Soldiers“ and to contribute to the deepening of knowledge about them. The conference topics include Forms of activity of the Polish independence underground; Youth Conspiracy in Poland 1944-1956; The repression apparatus and the Polish independence underground; The perception of the underground of the so-called independence second conspiracy by Polish society from the end of World War II to modern times; Cursed Soldiers and contemporary patriotic attitudes; The Narrative about Cursed Soldiers in the People's Republic of Poland and after 1989 and Restoring Memory. From Cursed Soldiers to Steadfast Heroes. The conference is organized jointly by: Naval Academy in Gdynia; Academy of War Art in Warsaw; Lotnicza Military Academy in Dęblin and Branch of the Institute of National Remembrance in Wrocław.

Conference on developing the attractiveness of urban spaces at Colloquium: Future

of Silesian cities

2019-02-22

On February 27, Silesian universities and scientific institutions invite participants to the Auditorium of the Parnassos of the Silesian Library in Katowice for the 3rd Colloquium: Future of Silesian cities. The topic of the meeting is developing the attractiveness of urban spaces. The organizers are planning a discussion about the factors and criteria for the attractiveness of urban space in the business, residential and public dimension as well as the relations between the public, private and civic sectors in jointly developing the attractiveness of space. Organizers of Colloquium are University of Economics and University of Silesia; The Silesian Technical University; Institute for Ecology of Industrial Areas; Study Commission on the Future of Upper Silesia Branch of the Polish Academy of Sciences (PAN) Katowice; The Committee for Spatial Development of the Polish Academy of Sciences in Warsaw; Upper Silesian University of Entrepreneurship and the Silesian Library.

Giant inscription „100 AGH“ in the Mediterranean Sea

2019-02-25

On the night from 20 to 21 February 2019, the STS Pogoria training ship sailed a “100 AGH” -shaped route in the Mediterranean Sea. The phrase could be seen through GPS signal records. The trace was observed by the satellites and it was 4 nautical miles long and 1 nautical mile wide. The initiative was the idea of scholars, students and AGH UST graduates who are currently participating in the jubilee voyage. «The 100th anniversary of AGH» on board the Pogoria. The AGH crew began their journey on February 16. So far, the sailing ship has reached the ports of Loano, Portovenere, Portoferraio and Civita Vecchia. The expedition will last until February 23. GPS track on the map can be seen at: <http://bit.ly/100-AGH>

Day of the Pi number at the Technical University of Lodz

2019-02-25

On March 14, 2019, the Lodz University of Technology (PŁ) invites participants to break the Guinness record in setting the longest chain of people forming the Pi extension. The Pi number is infinite after the decimal point, but we remember it as 3.14. This value is referenced by the date when the world's most known number celebrates its feast. The current Guinness record in the category «The longest extension of the number of Pi composed of people» is 627. The record was established by the mBank Foundation on March 14, 2018 in Warsaw. The breaking of the Guinness record, which is the highlight of the «The Pi Day on PŁ», will start at 13.00 in the specially marked place on the B campus of the Lodz University of Technology. Everyone who joins the mathematical chain of developing the Pi number will receive commemorative diploma and a gift.

Krzysztof Wegner from the Poznan University of Technology becomes the laureate of the Polish Intelligent Development Award

2019-02-25

Krzysztof Wegner from the electronics and telecommunications department at the Poznań University of Technology received the Polish Intelligent Development Award 2019 in the category: „Scientist of the Future“ for the project „MUCHA - Spatial Image Registration and Processing System“. The aim of the project is to develop an innovative system of recording and processing of spatial images with very high resolution, a large number of registered beams and a wide angle of acquisition. The result of the works will be the technology of construction of a new generation of spatial image cameras. The Polish Intellectual Development Award is a nationwide distinction appreciating the most innovative projects implemented under EU and national programs by Polish scientific institutions, institutions and companies involved in research and development, which through their innovative investments and solutions, are committed to the sustainable development of Poland. City Academy launched in Wrocław

2019-02-25

Wrocław Culture Zone in cooperation with scientists from the University of Wrocław - invites participants to a series of lectures within the third semester of the City Academy. The first lecture is titled: How does urban democracy work? will be delivered on February 20 by Prof. Leszek Koczanowicz. The city is an extremely complicated and living organism. The organizers of the Municipal Academy are planning to analyze the key processes that shape the urban space and the living conditions of residents and discuss: the issues of escaping from the suburbs and new bourgeoisie; urban democracy; embarrassing spaces, as well as the importance of literature in creating the city's identity. The aim of the series is to try to understand the changes that Wrocław has undergone in recent decades. The meetings will consist of two parts: lectures conducted by cultural scientists and sociologists, and discussions on the discussed topics.

Professor Jerzy Limon from the University of Gdańsk wins the Pragnell Shakespeare Award

2019-02-25

Professor Jerzy Limon from the Faculty of Philology

at the University of Gdańsk, initiator and director of the Gdańsk Shakespeare Theater became a Pragnell Shakespeare Award winner. This is a prestigious distinction awarded for outstanding achievements in popularizing and developing knowledge about the works of William Shakespeare and a significant contribution to understanding his work. The Pragnell Shakespeare Award is an international award funded by the famous Jeweler Geoge Pragnella from Stratford upon Avon. The award is presented for the achievements of the past year or in recognition of lasting achievements for popularizing Shakespeare's works in the field of theater, critics, research or education. Professor Limon is an English historian, translator of English literature, a theatrologist and a writer. He is recognized as an outstanding expert on Shakespeare and the Elizabethan era. He is a member of Polish Academy of Learning, Polish Academy of Sciences and the International Shakespeare Society. Panel of the University of Silesia scientists included in the Byzantine Studies Association of North America conference

2019-02-25

Prof. Przemysław Marciniak and Dr Katarzyna Warcaba from the University of Silesia organized the panel „Byzantine Animal Studies: Texts, Contexts, Methodologies” and submitted it for the annual conference „Byzantine Studies Association of North America”. They obtained funding for it from The Mary Jaharis Center for Byzantine Art and Culture. The panel will gather also Byzantine specialists from the Czech Republic, Germany and France, will be devoted to the issues of interaction between humans and animals in Byzantium and ways of presenting animals in Byzantine literature. Lecture by Prof. Przemysław Marciniak will be entitled «(Micro) history of Byzantine insects». This year's conference The Byzantine Studies Association of North America, which gathers Byzantine researchers from around

the world every year, will be held in American Madison (Wisconsin) from 17 to 20 October. Detailed information is available at: <https://maryjahariscenter.org>.

Article about the discovery of scientists from Lublin on the NASA website

2019-02-26

An article about the latest scientific discovery made by Prof. Krzysztof Murawski, Błażeja Kuźmy, Dariusz Wójcik from the Department of Astrophysics and Theory of Gravity of the Maria Curie Skłodowska University (UMCS) in Lublin was published on the National Aeronautics and Space Administration website (NASA). The article concerns the discovery of pseudo-shocks, i.e. the so-called «unsuccessful shockwaves» in the atmosphere of the Sun. Due to the high number of waves, they can warm up the atmosphere of the Sun and contribute to solve the problem of heating the corona - the external atmosphere of the Sun, which is about 200 times hotter than its surface. A group of UMCS scientists performed numerical simulations of observed phenomena. Article on the NASA website: <https://www.nasa.gov/feature/goddard/2019/solar-tadpole-like-jets-seen-with-nasa-s-iris-add-new-clue-to-age-old-mystery>

Simulation of the General Assembly of the UN General Assembly to be held at the University of Białystok

2019-02-26

Nearly 100 high school students from all over Poland including foreigners from the British School in Warsaw and students from Germany, took part in this year's debates of BiaMUN (Białystok Model United Nations). The event, which was held on the campus of the University of Białystok (NB) from February 22-24, 2019, was a simulation of the General Assembly of the United Nations (UN). The BiaMUN meeting was inaugurated by a lecture of Włodzimierz Cimoszewicz - former Prime Minister and Minister of Foreign Affairs. The young speakers

debated about politics, social and economic issues. The themes of this year's debates included the Russian-Ukrainian conflict, the aging of European societies or the forced marriages of children. During their speeches, the participants took on the representatives of various UN member countries.

Polish Sejm adopted the draft law on the Łukasiewicz Research Network

2019-02-26

The Sejm adopted a parliamentary bill establishing the Łukasiewicz Research Network. It will join 37 research institutes and the Polish Center for Technology Development and will start its activities on April 1, 2019. The Centre will conduct key research from the point of view of the interests of the state. The primary goal of the network is to coordinate the activities of various institutes. Until now they have been dispersed, losing their potential. The network, thanks to its design, will serve to integrate these potentials, as well as the effectiveness of organizational activities - said Deputy Minister of Science Piotr Dardziński, government plenipotentiary for the reform of the operation of research institutes. The basic tasks of the network are to conduct application research and development works and to provide the transfer of knowledge to the economy, which are particularly important for the country's economic and innovation policy.

Pre- Day for international students at the Wrocław University of Technology

2019-02-26

Almost 300 new students from abroad appeared on

February 22 at the Wrocław University of Technology to take a part in the 'Pre- Day'. They acquainted with the university, colleagues from science clubs and opportunities to spend their free time. In the summer semester, the university will teach a record number of over 1,100 international students. The most of new students come from India, Ukraine and Turkey. The citizens of Pakistan, Iraq, France, Spain, Portugal, Indonesia, Bangladesh, Italy, China, Libya, Brazil and Germany also came to Wrocław to study. They were most eager to choose mechanical; IT and management; chemical and architecture faculties. As part of the event, students watched an information film about the University of Technology and special presentations prepared by the university organizations. They also met their colleagues from scientific circles and student organizations and got acquainted with the offer of the university library. The representatives of the police told the students about safety in the city.

Researcher of the University of Life Sciences in Wrocław joins the ILRS Governing Board

2019-02-26

Professor Krzysztof Sońnica from the University of Life Sciences in Wrocław became a member of the Governing Board of the International Laser Ranging Service (ILRS). The Wrocław scientist is the first Pole in the ILRS management group - an institution associating laser observatories located all over the world and centers for processing laser distance measurements to artificial satellites and the Moon. ILRS provides fundamental observations and products used in various areas of satellite geodesy, physics, astronomy, geophysics, Earth sciences and the environment. SLR laser technology (Satellite Laser Ranging) is used to implement global geodetic reference systems providing the most accurate information on the location of the center of gravity of the Earth's mass, the so-called geocentrum, where the beginning of global reference systems is usually assumed. Seminar on space mining to be held in the Warsaw Kozminski University

2019-02-27

The Center for Space Studies of Kozminski University (ALK) in Warsaw organizes on February 28, 2019 the seminar „Cosmic mining - the perspective of the Polish and international space industry”. The event's partners will be experts from the Space Research Center of the Polish Academy of Sciences and The Hague International Space Resource Governance Working Group, who will share knowledge in the field of technological and legal aspects of space mining. Seminar participants including invited engineers, economists and lawyers will try to answer questions about key technological aspects related to the extraction of raw materials in space conditions and learn to try to regulate the issue of cosmic mining in Polish law.

Warsaw University of Life Sciences develops a „Code of Practice for Organic Food Processing”

2019-02-27

The Faculty of Human Nutrition and Consumption Sciences, the Department of Organic Food of Warsaw University of Life Sciences (SGGW) will implement the international project „Code of Practice for Organic Food Processing / Code of Practice for organic food” under the Horizon 2020 program processing”. The aim of the project is to develop a flexible and practical Code of Practice for organic food processors and certification bodies. The coordinator of the project is Prof. Ewa Rembiałkowska, its budget is PLN 492,580 and is financed by the National Center for Research and Development.

Katowice pupil wins the 11th Elektron competition at the Wrocław University of Science and Technology

2019-02-27

Nearly a thousand secondary school pupils competed in the 11th the all-Polish Elektron competition. Its organizer is the department of microsystems and photonics of the Wrocław University of Science and Technology. Participants solved tasks based on electrical engineering, telecommunications, optoelectronics and photonics as well as mechatronics. The competition took place in three stages, starting from the elimination at schools, through the regional stage, to the final. It was won, as last year, by Hubert Kulka from the Silesian Technical Research Institute in Katowice. The second place was taken by Jakub Dietrich from the School of Communications of Nicolaus Copernicus in Poznan, and the third by Jakub Jendryka from the Academic Schools of the Wrocław University of Technology. Participants solved tasks prepared by scholars of the University of Science and Technology and students from the Association of Polish Nanotechnology Enthusiasts. They concerned electronics, and often extended beyond the school curriculum.

Seminar „Everyday life in couples” to start at the

University of Gdańsk

2019-02-27

The University of Gdańsk invites participants on February 28 for the first meeting as part of the seminar „Everyday life in couples”. The series will start with the lecture „Materialization of the couple: tension and roles in the process of building a home everyday for two”. The inaugural lecture will be delivered by Dr Filip Schmidt from the Adam Mickiewicz University in Poznań - author of the book «Couple, flat, marriage. The dynamics of intimate relationships in the context of historical changes and contemporary discussions about the processes of individualization», published by the Polish Science Foundation. The dates and topics of the next meetings are: March 7 - about pairs at work; March 28 - non-heteronormative pairs; April 3 - on couples finances and April 10 - on culturally mixed pairs. The co-organizer of the cycle is the Gdańsk Branch of the Polish Sociological Association.

Night of the Owls at the Maria Curie Skłodowska University

2019-02-28

The Faculty of Biology and Biotechnology of the Maria Curie Skłodowska University (UMCS) in Lublin invites participants to the Night of the Owls. The meeting with owls will start on March 16, 2019, at 16:30 and will last until 17 March. In the first part of the event there will be workshops to find out which species of these birds live in Poland and specifically, in Lublin. There will also be attractions for the kids, e.g. learning to perform owls' voices and a knowledge contest about owls. Participants will be able to get acquainted with ornithological literature and practise with field equipment and even stroke an owl. The second part of the event is a night trip, during which participants will be able to see how the night life of the forest looks, and above all, hear and see owls in their natural environment.

Butterfly from Podlasie published on the cover of the Journal of Zoology

2019-02-28

The Journal of Zoology is one of the oldest scientific journals in the world. This month, the cover of the journal presents *Eunomia* (*Boloria eunomia*), the butterfly photographed in the Knyszyńska Forest by Izabela Dziekańska - PhD student at the Institute of Biology of the University of Białystok. The journal consists an article devoted to this butterfly species, and its co-authors are researchers from the UB. *Eunomia*'s research was conducted by a team headed by Dr Marcin Sielezniew, in cooperation with Dr Piotr Nowicki from the Jagiellonian University and Dr Krzysztof Pałka from Lublin. Using the method of marking, the researchers found that the *eunomias* inhabiting different habitats, i.e. wet meadows and bog forests, differ significantly in terms of life expectancy. The most «long-lived» *eunomias* turned out to be meadow females. More: <https://zslpublications.onlinelibrary.wiley.com/toc/14697998/2019/307/2>

„Science for You” contest is starting for the second time

2019-02-28

The teachers can apply for the second competition „Science for You” organized by the Ministry of Science and Higher Education and the Warsaw Copernicus Science Center. The main goal of the competition is to prepare and implement an educational research project, experimental station or teaching aid. To participate in it, the organizers invite primary school teachers who want to learn how to apply the scientific method and create educational aids themselves. As part of the competition, teams composed of two teachers and from 6 to 12 pupils from grades 1 to 7 of primary schools will prepare their own educational research project. The teams may include students of one or several different classes, as well as members of interest groups. Applications will be accepted until March 18, 2019. More: <https://naukadlaciebie.gov.pl/kategoria/nauka-dla-ciebie/>

Charity action „Students for Palestine” held at the University of Silesia

2019-02-28

The Association of Arabists of the University of Silesia Al-Asabiya organizes the third charity action, which

will take place on March 5 and 6 at the Faculty of Philology in Sosnowiec. It will be used to finance neurological examinations of intellectually disabled patients in the Al Malat center in Bejt Sahur near Bethlehem. As part of the collection, the organizers are planning a bazaar of home-made cakes and dishes as well as Middle Eastern drinks, a fair of books and various things, henna painting, Arabic calligraphy and the auction of valuable items. The event will be accompanied by a concert of Middle Eastern music performed by Palestyna Art Alert and an evening of poetry by Josef Sh'hada. The action is addressed to pupils and students. Participation in the event may contribute to the development of sensitivity, openness to various cultures, curiosity of the world and general knowledge. The applications can be sent electronically: alasabiya@gmail.com

Student of the State Higher Vocational School in Nysa creates a street workout game

2019-02-28

Michał Kopeć, a student in the psychophysical human behavior, specialty: personal trainer at the State Higher Vocational School in Nysa has developed a street workout game in which players can develop own body, practice freestyle or train with their own avatars. The creator of the game has previously studied computer science, also at the University of Nysa. Now he combined two passions into one by creating a game that was well received by Internet users. In the game, players can train your whole body, buy supplements and unlock subsequent exercises by gaining experience. In «PullUpOrDie» game, players can do basic calisthenic exercises: pull-ups, push-ups, sit-ups, and power-ups. The first stage of the game is building your figure just like in bodybuilding. The purpose of the student's application of the University of Nysa is propagating street workout, callisthenics and acquiring skills in building muscle mass. More: <https://play.google.com/store/apps/details?id=com.mkdesignmobile.PullUpORD>

University of Physical

Education in Wroclaw to launch Senior security classes

2019-02-28

The Academy's activities for Safe Senior are organized for the students of the University of the Third Age of the University of Physical Education in Wroclaw by the Municipal Police Headquarters. During the Academy, its participants learn about the types of crimes committed to older people and how to avoid them and how to defend against them. The participants will discuss behavior in emergency situations - how to defend against violence against the elderly people, how to give first aid, and how to inform the emergency services in order to have a short and informative message. The inaugural lecture «History and Tradition of the Police» was delivered by police officer Michał Kawalec. An additional artistic setting was provided by the police orchestra of the Voivodeship Police Headquarters in Wroclaw.

Adam Dobroński becomes the custodian of Ryszard Kaczorowski President's Office

2019-03-01

Dr Adam Dobroński, a retired professor at the University of Białystok (UwB), became the honorary custodian of the President's Office of Ryszard Kaczorowski. The decision was taken by the rector of the UBB, Prof. Robert Ciborowski. Professor Dobroński is a historian working for the largest Białystok university since 1972. He created an exhibition of President Kaczorowski's office (the last President of the Republic of Poland in Exile) in the University Library. The decision to transfer the Warsaw cabinet to the University Library, left by President Kaczorowski, tragically died in 2010, was taken in 2011 by his wife, Karolina Kaczorowska. The collection includes nearly 3 thousand. books, magazines and documents, as well as almost 200 souvenirs, gifts, medals, diplomas, paintings and personal items. The office is located on the campus of the University of Białystok.

Conference "How to attract

American students to Polish universities?"

2019-03-01

The National Academic Exchange Agency (NAWA) and the Polish-American Fulbright Commission organize on March 8, 2019 in Warsaw a conference within the Direct to Internationalization series entitled: How to attract American students to Polish universities? The program includes speeches by guests from the United States, as well as experts on cooperation with the US and representatives of universities who have been successful in developing this cooperation. Participants will learn, among others, about Polish-American cooperation in the area of science and higher education, and the tools and opportunities offered by NAWA and the Fulbright Commission to develop this cooperation. More: <https://nawa.gov.pl/promocja-i-targi/warsztaty-i-szkolenia/cykl-direct-to-internationalization/76-direct-to-internationalization-3>

#TweetupMNiSW held at the Ministry of Science on Innovation and the „Fast Path” competition

2019-03-01

On Wednesday, February 27, 2019, the Ministry of Science and Higher Education (MNiSW) held #TweetupMNiSW, which was devoted to innovations and this year's „Fast Path” competition. Innovation is an important issue for the Ministry of Science, which created new laws on innovation and their implementations. They are an opportunity for cooperation between science and business - said Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. Prof. Aleksander Nawrat, deputy director of the National Center for Research and Development (NCBR), emphasized that «one must have the courage to create innovations». But thanks to such competitions as the «Fast Path» it is much easier now. «Fast Path» is the flagship program of the National Center for Research and Development, which supports the edge-cutting projects of entrepreneurs and is implemented in the form of grant competitions.

Uphagen prize for a graduate of the University of Gdańsk

2019-03-01

Dr Marta Skowron Volponi, entomologist, graduate of the Faculty of Biology at the University of Gdańsk, was awarded the Jan Uphagen Prize for Young Scientists in 2018 in the category of exact sciences. She received the award for her original approach to entomology research - lepidopterology (a branch dealing with butterfly research), significant scientific achievements in the field of behavioral mimicry (conforming to a different species) and description of three new species of butterflies from the family of the viscera family imitating bees or wasps. Jan Uphagen Award for Young Scientists is the most important distinction for young researchers granted in the Pomerania region. The prize for young scientists under the name «Young Heweliusz» was established in 2003, and since 2006 it has been called the Jan Uphagen Prize for Young Scientists. Silesian Medical University to support the IV Congress of Health Challenges

2019-03-01

Directions of development of the health care system, treatment financing, innovations in the medical sector are the most important topics of the IV Congress of Health Challenges scheduled for 7 and 8 March at the International Congress Center in Katowice. The organizers are planning around 60 sessions in five main blocks: health policy, finance and management, therapies, new technologies in medicine and education. The main idea of the Congress are the therapeutic challenges, facing specialists in particular fields of medicine, as well as organizational and financial problems, which the decision-makers shaping the health care systems must meet. Participations in the event were confirmed by outstanding specialists from several medical disciplines, as well as representatives of the world of science, economy, business, finance, insurance market, non-governmental organizations, politics, state and local government administration and the media. More: <https://sum.edu.pl/uczelnia/wiadomosci-z-zycia-uczelnia/9465-iv-kongres-wy-zwan-zdrowotnych-health-challenges-congress-hcc-w-katowicach-7-8-marca-2019-r>

En Arche Foundation announces a scholarship contest for biology students

2019-03-04

The offer is addressed to current students of the third year of bachelor studies who plan to continue their master's studies, to first-year students completing master's studies and to current students of the third and fourth year of master's studies at the faculties of biology. Persons applying for a scholarship should interest in the neo-darwinist theory of evolution and its criticism from the position of intelligent design theory. One of the conditions for receiving the scholarship is to write an essay that will answer the question: What challenges does the intelligent design theory add to the standard model of biological macro-evolution? The Foundation offers a scholarship of PLN 1200 per month, which will be paid for nine consecutive months starting from October 2019 to June 2020. Iliad days in Poznań

2019-03-04

The Raczyński Library, the Institute of Classical Philology of the Adam Mickiewicz University and the Poznań branch of the Polish Philological Society invite participants to the Iliad Days on March 21 and 22, which will take place in Poznań as part of the Iliad International Festival. On March 21, a scientific session Around the Iliad: topics, characters, language is planned. The inaugural lecture «Theogonic Motifs in the Iliad» will be delivered by Dr Bruno Currie from the University of Oxford. In the evening, a concert will take place during which fragments of the operas: Deidamia Georg Friedrich Händel and Il ritorno d'Ulisse in Patri Claudio Monteverdi will be presented. On March 22 at 10 a.m, the Adam Mickiewicz University's Collegium Maius will begin international reading of selected episodes of the Iliad, and from 17 in the Raczyński Library and students of the Institute of Classical Philology will read lectures and excerpts from book VI (Farewell to Hector and Andromache) and book XXII (Death of Hector).

Torun's success in the competition „Innovation is a woman”

2019-03-04

Dr Grażyna Dąbrowska from the Department of Genetics of the Faculty of Biology and Environmental Protection of the Nicolaus Copernicus University in Toruń (UMK) won in the 10th „Innovation is a woman” competition organized by the Women Science Foundation. The winner was appreciated for the innovative solution «Method of obtaining a biological preparation of fungal origin accelerating the degradation of polymer materials and a biological preparation», created jointly with Zuzanna Znajewska from the Faculty of Biology and Environmental Protection and Dr Ewa Olewnik-Kruszkowska and Dr Grażyna Szczepańska from the Faculty of Chemistry of the Nicolaus Copernicus University. The winning project is a preparation from fungi and other microorganisms occurring in Poland, which by about 20 percent accelerates the decomposition of plastics, even those biologically non-degradable. Importantly, the preparation is easy to reproduce and cheap

to prepare.

Professor Alfred Forchel to deliver a lecture at the Wrocław University of Technology

2019-03-04

Wrocław University of Technology invites participants to the lecture by Professor of Alfred Forchel, world-renowned physicist from the University of Würzburg, on 7 March entitled „Semiconductor nanophotonics - opportunities and challenges for science and applications“. It will be a summary of the most important discoveries in the field of semiconductor nanophotonics - new physical phenomena related to the interaction of light with matter at the quantum level and the construction of active optoelectronic elements based on them, serving such forward-looking fields as photonic integrated circuits and quantum communication. Alfred Forchel studied physics at the University of Stuttgart, where he was awarded a PhD degree. In 1990 he became a professor at the University of Julius and Maksymilian in Würzburg, where he headed the Department of Technical Physics. He created there a modern laboratory of nanostructures and semiconductor devices. Since 2009 he has been the rector of this university. University of Zielona Góra invites participants to the Space Medicine EXPO 2019 conference

2019-03-04

The Scientific Society of Space Medicine and Health Sciences of the University of Zielona Góra invites participants to the Space Medicine EXPO 2019 conference on March 16. It is the largest conference in Poland devoted to space medicine, cooperation between the private and public sectors as well as the scientific and innovative economy. Representatives of the parliament, scientists, clinicians, entrepreneurs, local government officials and students will take part in the event organized for the third time. Space Medicine EXPO also provides training for medical students and young scholars as well as a chance to gain invaluable knowledge for those interested in astronomy, law, economics, management and political sciences. During the conference, listeners will be able to take part in debates, lectures and trainings, as well as get acquainted with the anatomical and histological structure of human beings, and establish valuable contacts that can support projects implemented by EXPO guests in the future. 4th Katowice Psychometric Meeting to be held on March 14 and 15

2019-03-04

The Institute of Psychology at the University of Silesia is organizing the 4th national scientific conference in the Katowice Psychometric Meetings series. The conference, which will be held on 14 and 15 March at the Center for Scientific Information and the Academic Library will focus on the problem of the construction of psychological tests. The aim of the conference is to reflect on the changes occurring within psychometry over the years, as well as to disseminate knowledge about optimal strategies for the design of research and diagnostic tools. The meeting will be an opportunity to compare the methods used in the construction and adaptation of

psychological tests, analysis of possible applications of these tools in education, business and the labor market or the use of advanced statistical methods in the preparation of such tests. More: <http://www.psychometria.katowice.us.edu.pl/>

XXXI International Education Salon Perspektywy 2019

2019-03-05

On March 8-9, 2019, the XXXI International Education Salon Perspektywy 2019 will take place in the Palace of Culture and Science in Warsaw. It will include the Salon of Higher and Post-secondary Schools, Foreign Schools, "Study abroad". The Warsaw Salon Perspektywy is an event during which young people can not only talk and get acquainted with the exhibitors' offer, but also participate in an extensive program of meetings, seminars and presentations. The exhibitors will have the opportunity to present the educational offer of universities, post-secondary schools, the offer of high schools and technicians in Warsaw and Mazovia Region, offer of scholarship programs, internships and practices organized by employers, educational publishers and producers of scientific aids. The event will also include presentations of study opportunities abroad, conducted by representatives of embassies, educational institutions and foreign higher education institutions.

Agreement on cooperation between Nowy Sącz and the local State Higher Vocational School

2019-03-05

The joint organization of popular-scientific ventures, research and development projects, supporting the implementation of student internships are only some points of cooperation agreements signed by the Mayor of Nowy Sącz Ludomir Handzel and the Rector of the State Higher Vocational School (PWSZ) in Nowy Sącz, Dr Eng. Mariusz Cygnar. - We know about the investment plans of the State Higher Vocational School to develop the Institute of Economics, we will administratively support this type of

activity and enjoy that students will get such a great base. We will also develop the Technical Institute - emphasized Mayor Ludomir Handzel during the ceremony. The important element is cooperation with the local environment, with entrepreneurs. I am glad that the university is developing towards IT and mechatronics. We need such specialists, and this means that PWSZ will not produce the future unemployed people, because we still need people with technical education on the market - Handzel added.

Deputy Prime Minister Gowin appointed members of the Science Evaluation Commission

2019-03-05

Jarosław Gowin, Deputy Prime Minister Minister of Science and Higher Education, appointed members of the Science Evaluation Commission. In the first, four-year term, 31 people will work in the committee. The Commission consists of three representatives of various fields of science and art, selected from candidates proposed by universities, scientific institutes of the Polish Academy of Sciences, research institutes and international institutes. The committee also included 7 people with experience in the field of science policy, indicated by the Minister of Science and Higher Education. The Science Evaluation Commission is a new body established by the Constitution for Science. The commission's tasks include evaluating the quality of scientific activities in 2021. In addition to the evaluation of scientific units, Science Evaluation Commission will also evaluate education in PhD schools.

Conference in Gdansk: „Women and Men: Activism, Protest, Social Change”

2019-03-05

The Institute of Psychology and the Institute of Sociology, Philosophy and Journalism of the University of Gdańsk invite participants to the conference on „Woman in Culture”, which will be held on 8 March under the slogan „Women and Men: Activism, Protest, Social Change”. During the conference, topics related to social change, actions for equality, improvement of community life, presence of women in science and challenges for women engaging in stereotypically «masculine» activities and career paths will be discussed. - We want our experts to share personal experiences of people involved in changing the world around. We want to discuss the joys and challenges that social activism brings - says Dr Tomasz Besta, co-organizer of the event. The cycle «Woman in Culture” has been carried out for over a dozen years and is addressed to anyone interested in combining scientific research with social practice.

Silesian University of Technology launches „Encounters with passion”

2019-03-05

Meeting with Prof. Jerzy Buzek began the series „Encounters with passion” – the program where the guests inspire students with their achievements. The event was organized by the Students' Self-Government and the University Council of the PhD Students of the Silesian University of Technology. During the meeting with students, the former Prime Minister and the President of the European Parliament recalled times of studies at the Silesian University of Technology, but also convinced that Silesia has a future, and graduates of the University of Technology have never had problems finding a job. Professor Jerzy Buzek graduated from the Silesian University of Technology in 1963. Later he worked at the Institute of Chemical Engineering of the Polish Academy of Sciences in Gliwice, where he wrote his PhD thesis in the technical sciences. In the years 1997-2001 he was the Prime Minister, since 2004 he has been continuously a member of the European Parliament, in the years 2009-2012 he was its chairman.

Poznań students ready for the

SAE Aero Design competition in the USA and Mexico

2019-03-05

Students from the Academic Circle AKL Aero Design at the Poznań University of Technology will once again take part in the SAE Aero Design competition in the USA and Mexico. The first stage of the competition will start on March 8 in Fort Worth, Texas. SAE Aero Design is a prestigious competition for young constructors of aircraft models. The competition has been held since 1986, organized by the International Association of Transport Engineers SAE (Society of Automotive Engineers). The competition consists in the independent design and construction of a remotely controlled aircraft that will be able to carry as much weight as possible. Models must be presented before the commission of judges and carried out with flights loaded. Students of the University of Technology have participated in SAE Aero Design competitions since 2008. During this time, they were on the podium 21 times. This year, they will represent the university and city in Monterrey (Mexico) and in Van Nuys, California.

Peruvian Day held at the Catholic University of Lublin

2019-03-06

The Faculty of the Spanish World, Politics and International Relations of the Catholic University of Lublin (KUL), the Spanish-Polish Circle and the Honorary Consul of the Republic of Peru in Lublin invite participants to the Peruvian Day, which will be held at the Catholic University of Lublin, on March 7, 2019. The event is organized on the occasion of the launch of the Honorary Consulate of the Republic of Peru in Lublin. The program includes the opening of the photo exhibition entitled «Close and a bit further Peru» and a series of lectures devoted to Peru. The lecture on Polish-Peruvian relations will be delivered by Alberto Salas Barahona, Ambassador of Peru to Poland. Also, Pablo de la Fuente from the Department of the Spanish World KUL will talk about Polish-Peruvian football confrontations (1977, 1978, 1982).

Daughter of the Polish President wins the international legal competition

2019-03-06

The team of Jagiellonian University students won the „Best Respondent Award” and „Third Best Team Award” in the 26th international law competition Willem C. Vis International Commercial Arbitration Moot, which was held in Madrid. The team of the Krakow university included Kinga Duda, the daughter of the Polish President Andrzej Duda. Willem C. Vis International Commercial Arbitration Moot is a competition for law students who specialize in international commercial arbitration. Its aim is to popularize international commercial arbitration and the Vienna Convention on contracts for the international sale of goods. Every year, 2,000 students from 300 universities from 60 countries take part in it. Kinga Duda, who is a 4th year law student at the Jagiellonian University, represented the Krakow University also a year ago, during the 25th competition.

Professor Zbigniew Blocki becomes director of the National Science Center again

2019-03-07

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin appointed on 4 March 2019 Prof. Zbigniew Blocki for the position of director of the National Science Center (NCN). Professor Blocki was earlier elected in a competition conducted by the NCN Council and presented to the minister to confirm the election. Professor Blocki has been an employee of the Faculty of Mathematics and Computer Science of the Jagiellonian University since 1990, where he was awarded with his PhD title in 1995. In 1999, he received Fulbright scholarship at the Indiana University in Bloomington and the University of Michigan in Ann Arbor. He worked at the Max Planck Institute in Bonn, and in 2002 he spent three months at the Max Planck Institute in Leipzig. In 2006 and 2013 he was a visiting professor at Indiana University. In 2010-2015 he was a member of the NCN Council, and in the years 2010-2013 he was a member of the Main Board of the Polish Mathematical Society.

Prof. Madeleine Albright to visit the University of Warsaw

2019-03-07

On March 8, 2019, in the auditorium of the former University Library Madeleine Albright, an American diplomat who was the first woman in history to be the secretary of state of the USA will meet Warsaw students. Her visit to the University of Warsaw is connected with last year's edition of her book entitled «Fascism. Warning». In the years 1997-2001, Professor Albright held the office of secretary of state of the USA, nominated by President Bill Clinton. Earlier, she worked at the White House, where she dealt with foreign policy. She was also a member of the Woodrow Wilson International Center at the Smithsonian Institution, as well as an American ambassador to the United Nations. Meeting with Prof. Albright will be conducted in English with the possibility of a translation. More: <https://www.facebook.com/events/728088804258060/>

Candidates to apply for the Council of Scientific Excellence

2019-03-07

Until March 14, 2019, candidates for the Scientific Excellence Council (DAM) will be nominated. They will start their term of office on June 1, 2019. The DAM is a new body operating for the development of scientific staff. It will take care of providing the highest standards of the quality of scientific activity required to obtain academic degrees, degrees in the field of art and the title of professor. Ultimately, the DAM will replace the Central Commission for Degrees and Titles in the supervision of individual promotion proceedings. The composition of the DAM will be determined democratically in the elections in which all persons holding the postPhD degree or the title of professor can participate. Three representatives of each discipline will be accepted to the Council.

Detective story to celebrate the 100th anniversary of AGH University of Science and Technology

2019-03-07

The AGH University of Science and Technology in Krakow as part of the celebration of 100th anniversary of the university launched a contest for detective stories containing the topic of the University. The most interesting, suspenseful work with the campus and the AGH community in the background will be published in a common collection of stories. The competition is open and directed to both professional writers and amateurs. Stories should present the idea referring to the hundred-year history of AGH and take into account one of the selected topics: AGH laboratories, the Prometheus supercomputer, St Barbara feast, Juwenalia- student feast, the activity of science clubs, the campus or the Student City. Rules of the competition: https://www.agh.edu.pl/fileadmin/default/templates/images/Aktualnosci/aktualnosci/_2019/0603/Regulamin_konkursu_Kryminal_na_100-lecie_AGH.pdf

Researcher of the University of Economics in Poznan becomes vice president of

ISQOLS

2019-03-07

Dr Piotr Michoń, Prof. Associate of University of Economics in Poznan was elected deputy chairman of the International Society for Quality-of-Life Studies (ISQOLS). He will be responsible for international programs. Founded in 1995, the International Society for Quality of Life Studies ISQOLS is a global organization with the mission of promoting and encouraging research in the areas of quality of life, happiness and research on well-being. It consists of scientists, practitioners, professionals, students, pensioners, statisticians, lecturers and people of all ages from around the world, interested in studying the quality of life, happiness and well-being. Over the last 20 years, ISQOLS has become an internationally recognized industry organization with its own publications, magazines, conferences and identity.

Academic Gala of the Journalistic Laurels 2018 in Lublin

2019-03-08

The University of Maria Curie Skłodowska (UMCS) in Lublin and the Catholic University of Lublin are organizing the Academic Gala of the Journalistic Laurels 2018, which will take place on March 11, 2019 at the Crown Tribunal in Lublin. The celebrations will include a debate: „Local media and civil society”. The Academic Journalistic Laurels (AKLAUD) are annual awards established in 2014 for people who combine work in the media with academic activity. The prize is given in two categories: AKLAUD and junior AKLAUD. The program will include the debate «Local media and civil society» with the participation of the representatives of the AKLAUD Award Chapter, the Lublin media and local government. During the discussion, the invited participants will refer to the issue of relations between local media and individuals, groups and communities, and the role of the media in Lublin in defining the principles of social coexistence and educating future journalists.

Day with Horizon 2020

2019-03-08

The National Contact Point (NCP) of European Union Research Programs invites participants to the Day with Horizon 2020, which will take place on 4 April 2019 in the Innovation Management and Technology Transfer Center of the Warsaw University of Technology. The co-organizer of the event is the Ministry of Science and Higher Education. The meeting will be an opportunity to get acquainted with selected examples of Polish projects implemented under the Horizon 2020 program and the possibilities of applying in contests in the years 2019-2020. Later in the event there will be several short parallel thematic sessions conducted by KPK experts on selected activities in the Horizon 2020 program and detailed rules for applying in open competitions. More: http://www.kpk.gov.pl/wp-content/uploads/2019/02/ID_program_szkic_V5.pdf

Academic publications of the University of Silesia awarded at the book fair in Poznań

2019-03-08

Two publications of the University of Silesia Publishing House were awarded in competitions of the Poznań book fair. The publications were evaluated in terms of content, education and editorial values. The jury composed of representatives of the scientific community and the Polish Chamber of Books, the Association of Higher School Publishers and the media appreciated a book written by Dr Joanna Ewa Szafraniec from the Faculty of Earth Sciences «My map. Creating maps in geoinformation technologies. A supplementary guide to laboratories from the foundations of cartography». It was awarded within the Competition of the Best Academic Book for the Award of the Minister of Science and Higher Education and for the Award of the Rector of the University of Adam Mickiewicz. The book «History of the discoveries of chemical elements» by Dr Jan Grzegorz Małecki, was awarded in the Competition for the Best Popular Scientific Book with the Mayor of Poznań City Award.

Student of the University of

Wroclaw to participate in the Polish final of the competition FameLab

2019-03-08

Martyna Dziakowicz, a second-year student at the University of Wrocław, has advanced to the national final of FameLab, an international competition for scientists organized by the Copernicus Science Center. The task of people taking part in the competition is to tell within 3 minutes what they are doing scientifically and they must do it in a comprehensible, accessible and interesting way. This year, the national finals offer the statutory prizes, participation in the international FameLab International final in Cheltenham and a three-month scholarship in the US funded by the Kosciuszko Foundation. Currently, Martyna Dziakowicz is conducting research in the Department of Cellular Genetics and Physiology, as part of her master's thesis. During the semi-finals FameLab she gave the speech «Hidden truth, or the adventures of the genome», which concerned the existence of the so-called Junk DNA. More: <https://uni.wroc.pl/martyna-dziakowicz-z-uw-r-w-finale-famelab/>

Diplomacy for the 21st century

2019-03-11

Collegium Civitas in Warsaw invites participants to the open meeting „Yet diplomacy”, which will take place on March 30, 2019 (Saturday) at 9.30-14.00, in the Palace of Culture and Science in Warsaw. The guests of the meeting will be experts, diplomats and journalists, people known for public activity. - We will discuss the future of Ukraine, the European Union after Brexit and «forgotten» countries. There will be plenty of polemics, controversies, different views or disputes about the perception of specific diplomatic moves in the category of success or failure. Discussions, also with the participation of the audience, are to provide participants with the features of diplomacy in the 21st century.

Conference “About the role of women in organizations and cultural institutions” to be held in Szczecin

2019-03-11

The Department of Sociology of Organization and Management of the Institute of Sociology at the University of Szczecin, the Szczecin branch of the Polish Sociological Association and the Municipal Public Library in Szczecin invite participants to the National Scientific Conference „Manager, activist, artist - women in organizations and cultural institutions” on March 12. The conference will be devoted to the position, role and activity of women in organizations and institutions in the field of culture, including artistic, educational, social and other forms of culture. It will start at 9:30 in the branch of the Municipal Public Library - ProMedia, at al. Wojska Polskiego 2. The organizers are planning to find answers to the questions: What is the cultural activity of women? What is their contribution to the development of organizations and institutions of culture and art? Is their culture management different from the men's approach?

Team of the University of Economics in Wrocław wins in the national CFA Institute Research Challenge

2019-03-11

The Wrocław University of Economics team took first place in the national finals of the renowned financial competition of CFA Institute Research Challenge. The next stage of the competition will be competition of the Europe, the Middle East and Africa teams, which will take place in Zurich in April. The national finals of this largest student financial contest in the world included defending the analytical report of the selected company (this year it was PKN Orlen, the «hold» recommendation) before the panel of professionals. The winners of the national finals are Karolina Bajorek, Michał Kazan, Tomasz Olejarski, Przemysław Stadnik, Michał Szczepanik (captain) -students of the Master Study in Finance in the department of management and finance. Grzegorz Jajuga (industry mentor) and Dr hab. Tomasz Słoński (academic advisor) also helped the team.

Graduate of Law from University of Opole becomes

the second in the all-Poland tax law competition

2019-03-11

A graduate of the Law and Administration Faculty of the University of Opole - Filip Kwaśniak took the second place in the all-Poland competition „MDDP & OSF Tax Everest- Academic Polish Championship in writing master's theses in the field of tax law". The jury of the competition organized within the 4th Torun Review of Tax Certification in the Faculty of Law and Administration of the Nicolaus Copernicus University in Toruń appreciated the Filip Kwaśniak's Master's thesis «Convergence of administrative and penal sanctions in tax law». 34 master's theses from all universities in Poland were submitted for the contest, 7 were promoted to the final finale. The jury consisted of outstanding experts on the doctrine and practices of tax law in Poland.

13th Pi Day Party to be held at the University of Silesia

2019-03-11

Traditionally, in March, the Faculty of Mathematics, Physics and Chemistry of the University of Silesia organizes the Pi Day Party. The program of the event consists of interesting popular science lectures, various workshops, as well as shows and competitions with prizes. This year's party will start on March 14, 2019 at 9.42 (or $3 * 3.14$). The term is not chosen by chance, it refers to the American record of March 14: 3.14, the first three digits of the number π . The idea of celebrating the holiday was made in 1988 in the United States. At the University of Silesia, the event will be organized for the thirteenth time, and meetings will be held on the campus of the university in Katowice. This year's festival will last two days (March 14 and 15) and will be inaugurated by a lecture by Prof. Paweł Walczak entitled «A word on triangulation of polygons and polyhedrons». More: <http://swietopi.pl/>

Katowice students to launch NIKISZ 4.0 project

2019-03-11

Students of the Faculty of Economics, of Program-

ming of Urban Development at the University of Economics in Katowice, together with students of the Faculty of Architecture at the Silesian University of Technology are launching their strategic and project work as part of the NIKISZ 4.0 project organized by the City of Katowice. The aim of the project is to develop interdisciplinary variant of the strategies and concepts for development of post-industrial areas and facilities in Katowice's Nikiszowiec district by student teams. The best projects will receive financial prizes funded by the City of Katowice. The work of students of Urban Development Programing is coordinated by Dr Adam Drobnik from University of Economics and Dr Radosław Cyran from the Department of Strategic and Regional Studies.

Professor Iwona Hofman becomes the chairman of the Council of Scientific Societies at the Presidium of the Polish Academy of Sciences

2019-03-12

The Presidium of the Polish Academy of Sciences (PAS) appointed Prof. Iwona Hofman, dean of the Faculty of Political Science, Maria Curie Skłodowska University (UMCS) in Lublin, chairman of the Council of Scientific Societies at the Presidium of the Polish Academy of Sciences for the term 2019-2022. The President of the Polish Academy of Sciences, Prof. Jerzy Duszyński emphasized: «this decision is an expression of appreciation for the Professor's extensive scientific, research and organizational achievements and commitment to the development of the social scientific movement». Professor Iwona Hofman is the first woman and the first scientist from Lublin in the history of the Council appointed for this position. The Council of Scientific Societies was founded in 1963. It is a social, national representative body of scientific societies with the status of a problem committee at the Polish Academy of Sciences.

Startup Games conference to be held in Warsaw

2019-03-12

Until March 12, in Warsaw, the Startup Games conference is organized in the Google Campus Warsaw by the Polish Agency for Enterprise Development, the Ministry of Entrepreneurship and Technology and the Embassy of Great Britain in Warsaw. The main goal of the event is to develop the skills of the creators of start-ups in the field of presentation techniques. One of the elements of the conference is developing a game that simulates real market conditions. The 70 start-up creators and 25 investors are invited to take part in the conference. A special virtual game application should convince investors to invest as much as possible money in the presented idea. The start-up with the highest value at the end of the game wins the main prize, which is a weekly participation in London Tech Week.

L'Oréal-UNESCO program for Women and Science

2019-03-12

Until 30 April 2019, L'Oréal-UNESCO program will accept applications for the 19th the L'Oréal-UNESCO For Women and Science. Women conducting research in life sciences have an additional opportunity to promote their scientific achievements and obtain financial support. The organizers have planned three post PhD scholarships in the amount of 35 thousand PLN, two PhD scholarships for 30,000 PLN and one MA in the amount of PLN 20,000 PLN and scholarships for all finalists funded by the Ministry of Science and Higher Education. Researchers can submit their papers in three categories: postdoctoral, PhD and MA thesis, describing their research, scientific achievements and plans for the implementation of research in the field of life sciences, including medicine, biology, physics, chemistry, biotechnology. Applications should be sent via the website www.lorealdlakobietinauki.pl

XVIII National Conference of Teachers and Educators „School a place of man's education”

2019-03-13

The Department of Philosophical Anthropology and Philosophy of Law of the Catholic University of Lublin (KUL) together with the Foundation Servire Veritati Institute of National Education organizes on March 16, 2019 in Lublin, the XVIII National Conference of Teachers and Educators „School a place of human education”. During the event, the participants will hear the lecture of Dr Bogdan Czupryna „School as an environment raising maturity. What determines the effectiveness of education at school? Dr Marek Dziewicki from the Cardinal Stefan Wyszyński University in Warsaw will present the issue of empathy and assertiveness in educational communication. The second part of the conference will be devoted to «contemporary teacher's models» and the school's relationship with parents. This issue in the lecture «Parent-consumer at school. The demand instead of support and cooperation” will be presented by Jacek BANAŚ from the Lublin Teacher Training Center.

20th Competition for the Marshal of the Łódź Voivodship

2019-03-13

The call for proposals within the Competition for the award of the Marshal of the Lodz Voivodship for the best PhD dissertations and works thematically related to the Lodz region has been launched. Universities can submit works and theses defended in 2018 and not awarded with a cash prizes in other competitions. The Marshal's awards are granted for dissertations and works in the humanities, engineering and technical, medical, social sciences, natural sciences and arts, related thematically with the Łódź Voivodeship or promoting the region. Students can also report papers whose research results show usefulness for the social, economic or cultural development of the region. More: <http://www.intelktualne.lodzkie.pl/stypendia-i-konkursy/konkurs-na-najlepsze-prace>

Student Foresters' Club of the University of Life Sciences in Poznań receives awards

2019-03-13

The Student Foresters' Club of the University of Life Sciences in Poznań received the awards: „Forest Institution of the Year 2018” and „Oak Woodlander Statuette”. The award was given for Faculty's nearly 100 years history and its achievements. The jury awarded the formation of active attitudes for many students, through organization of scientific camps, stimulation of social activity of forestry students and commitment connected with commemorating the history of the Forestry Department and the Foresters' Club. The jury also appreciated the improvement of professional knowledge within the dozen sections operating, creating positive conditions for the development of student talents and the role of a recognizable, solid brand of the Poznań Forestry Department.

19th Tischner's Days in Krakow

2019-03-14

From 27 to 30 March 2019, the 19th Tischner's Days will take place in Krakow, under the title „Man. New challenges”. The event is organized by the Jagiellonian University in Krakow in cooperation with the Krakow Academy of Theater Arts, the Institute of Józef Tischner, the Social Publishing Institute Znak and the Pontifical University of John Paul II in Krakow. Three main topics will be discussed during the event. The lecture on the challenges of medicine, especially technology and ethics in technology will be delivered by an outstanding transplantologist Prof. Marek Krawczyk, with the discussion in the «Cave of Philosophers». The second topic includes thinking about the condition of a man and the last topic will concern news, violence and hatred. The Tischner's text «How to break the spiral of hatred?» became the inspiration for the organizers. More: <https://dni.tischner.pl/>

Polish Space Agency to cooperate with the Polish Society of Astronomy Lovers

2019-03-14

The Polish Space Agency and the Polish Association of Astronomy Lovers have signed a cooperation agreement, under which they will jointly organize events promoting astronomical topics. The first joint event will be the National Youth Astronomical Seminar, which will take place on March 21-23, 2019 in Grudziądz. The Polish Society of Astronomy Lovers are celebrating its centenary this year, and they are one of the oldest organizations promoting science in Poland. The organization's goal is to disseminate knowledge about the cosmos by integrating professionals and amateur astronomy and related sciences. The Polish Space Agency is undertaking activities related to the popularization of astronomical subjects as part of the implementation of its statutory tasks. Both institutions will cooperate to promote knowledge about space by organizing events, lectures, competitions and special actions together.

University of Bialystok to launch „March meetings with science”

2019-03-14

Workshops, lectures, shows and visits to scientific laboratories are the part of Open Days held at the University of Bialystok Campus (UwB) on March 21-23, 2019. The event will be held under the slogan „March meetings with science”. The pupils and children together with their parents or guardians will have a lot of fun. The Faculty of Physics invites them to a lecture on gravitational waves. Chemists invite participants to chemical practical classes, where they will eat superice- cream and crunchies of a young scientist. They also prepared art contests for the 100th anniversary of the founding of the Polish Chemical Society and the 150th anniversary of the Periodic Table of Elements. Biologists will tell pupils about great epidemics in the history of mankind. Mathematicians and computer scientists have prepared workshops on photography, robots and computers.

Researcher of the University of Silesia becomes a member of the Program Council of the Polish Academy of Sciences Science Center in Paris

2019-03-14

Professor Wiesław Banyś, director of the Institute of Romance Languages and Translation Studies at the Faculty of Philology of the University of Silesia, was appointed to the Program Council of the Polish Academy of Sciences in Paris for the term 2019-2022. The Scientific Station of the Polish Academy of Sciences in Paris is a scientific organization with more than 100 years of tradition. The institution cooperates with such centers as the French Academy of Sciences (Académie des Sciences de l'Institut de France), Center National de la Recherche Scientifique (CNRS) and UNESCO. Its main tasks are the promotion of Polish science, the development of Polish-French scientific cooperation and the help of Polish scientists, scholars and students in France. Professor Banaś was the rector of the University of Silesia in the years 2008-2016, he is a member of the board of the European University Association, vice-chairman of the Main Council of Science and Higher Education and the president of the board of the Association «Pro Silesia» Business - Science - Local Government.

Scientists of the University of Economics in Katowice awarded in the Progres3 competition

2019-03-14

The work of scientists of the University of Economics in Katowice was awarded in the competition for the best PhD dissertation delivered in 2018 at universities forming the Progres3 consortium. The first prize in the «Economics, finance and management» category was awarded to Dr Grzegorz Krawczyk for «Impact of the public procurement system on the functioning of the transport market in Poland». The work of Dr

Aleksandra Sabo-Zielonka «Decision models in the planning of order picking in a modern warehouse» won the second prize in the category «Information Technology and Electrical Engineering». The third prize in the category «Health Market» was obtained by Dr Karolina Szymaniec-Mlicka for «The impact of the strategic orientation of the organization on the effectiveness of its functioning on the example of public health entities». The Progres3 consortium consists of universities from the Czech regions: Moravian-Silesian, Žilina, Trenčín and Banskobystric, as well as Silesian and Opole Voivodships.

Malaysian Ambassador visits the Jagiellonian University in Krakow

2019-03-15

The development of cooperation between the Jagiellonian University and Malaysian universities in the field of European studies, medicine and chemistry was the subject of talks between Chitry Devi Ramiah, Ambassador of Malaysia in Poland and Prof. Wojciech Nowak, the rector of the Jagiellonian University. The talks concerned higher education in Poland and Malaysia, fields of study conducted by universities from both countries, as well as students and staff mobility. Chitry Devi Ramiah took over the office of the Malaysian Ambassador to Poland on April 17, 2018. She majored from social sciences, international relations and public administration. Formerly, she served as an ambassador in East Timor and as a Consul General in India.

Successful performance of robots from the Wrocław University of Technology at the Iron Cup 2019 in Brazil

2019-03-15

Seven robots constructed by students from the Robot Science Circle KoNaR competed in Brazil at the Iron Cup competition 2019. Robot solutions from the Wrocław University of Technology fought in three categories winning gold and silver medals. In total, nearly 200 robots were shown at the tournament. They competed in several categories:

Students of the Wrocław University of Technology receive SAE Aero Design East 2019 medals

2019-03-14

Five medals including two silver and three bronze were won by students of the Wrocław University of Technology at the SAE Aero Design East 2019 flight constructions at Fort Worth, Texas. Over 80 teams from around the world participated in the competition. Students from the JetStream team with their aircraft competed in the Advanced and Micro classes. The wingspan of their machine was 3.65 m and 1 m, respectively. The task in the Advanced class was a mission simulating the colonization of Mars. Its first part consisted of rising several dozen foam football balls and a dozen or so pint bottles with water to a height of about 30 m and dropping to the target. In the next stage, the goal was to drop three fully autonomous gliders attached to the matrix plane. In the Micro category, the task was to transfer the largest possible weight in the lightest plane and to fold the machine in the shortest possible time. More: <https://pwr.edu.pl/uczelnia/aktualnosci/udany-wystep-naszycz-lotnikow-na-zawo->

sumo machines fighting, «line followers», whose task is to overcome the route as soon as possible, as well as in «trekking» and «soccer» categories. The most spectacular form of rivalry was «combat», or the fight of robots with saws, knives, hammers and pickaxes performed in the closed cage. Wrocław students won gold in the „MiniSumo” competition with the Quality robot and silver medal in the „Line Follower” category with the Cheng Shi robot. Their trip to the Iron Cup 2019 competition was possible thanks to grant funding from the program Best of the Top 3.0 funded by the Ministry of Science and Higher Education. Interdisciplinary conference „Contemporary man in the face of (not) favorable reality”

2019-03-15

The Faculty Council of the PhD Students’ Government and the Department of Social Pedagogy at the Faculty of Pedagogy and Psychology at the University of Silesia invite participants to the interdisciplinary student and PhD conference „Contemporary man in the face of (not) favorable reality”. The aim of the conference is a multi-faceted exchange of views and experiences regarding human functioning in the modern world from the perspective of challenges faced both by individuals as well as by collectives and institutions. The proposed thematic panels include: the shape and functioning of the modern family; cultural determinants of human functioning; shadows and the glamor of elderly people in the modern world; man and health, illness and disability; problems of functioning of socially maladjusted individuals and the media - an opportunity or a threat to modern man? Applications for participation can be sent by Internet: konferencja.czlowiek2019@wp.pl

15th Student Information Festival

2019-03-18

From 21 to 23 March 2019 the AGH University of Science and Technology in Krakow will hold the 15th Student Information Festival. The event is organized by students for students. As every year, the festival gives the opportunity to make interesting acquaintances, broaden horizons and exchange information and views with people sharing similar interests. The Student IT Festival has been organized by students from the computer science circles of four Krakow universities: AGH University of Science and Technology, Jagiellonian University, Krakow University of Technology and University of Economics. Every year, the event unites professional IT specialists and enthusiasts from all over Poland who do not have the opportunity to deal with it professionally. More: <https://sfi.pl/>

Student of the University of Gdańsk becomes a laureate of the Businesswoman of the Year competition

2019-03-18

Olga Grudniak, a student at the University of Gdańsk and the president of the Gdynia-based company Biolumo, producing the diagnostic equipment for doctors, becomes one of the jubilee laureates of the 10th Businesswoman of the Year competition. - I am involved in combining the world of science and business. In business, I am running the Biolumo, a company dealing with the creation of a diagnostic device for the rapid selection of targeted antibiotic therapy for primary care physicians. At the same time I am a biotechnologist, and I have been working in the laboratory on researches aimed at solving the problem of drug resistance of bacteria for 5 years – says Olga Grudniak. The Biolumo company creates a point-of-care medical device for general medical practitioners to help them prescribe a working antibiotic. This solution is adapted to GP surgeries to diagnose quick (6h), in an automated and inexpensive way.

International design conference 2019 Agrafa to be held in April in Katowice

2019-03-18

The Academy of Fine Arts in Katowice invites participants on 4th and 5th April to the 6th international design conference Agrafa 2019. The organizers are planning an international review of the latest student achievements and an accompanying design workshop. They are providing for a opportunity to discuss about how to use the extraordinary possibilities of the 21st century and their consequence in the everyday life, in the environments where people have their relationships. The conference aims to predict what role of the designer in future scenarios. The history of those design events taking place under a common name Agrafa dates back to the early 90s of the twentieth century, when the Nationwide Review of Graphic Design for Students of Fine Art Schools was organized for the first time. The Agrafa has been accompanying international conferences devoted to graphic design tasks since 2007. More: <https://agrafa.asp.katowice.pl/>

Prof. Jan Blecharz to hold a lecture on psychology and sport at the University of Wrocław

2019-03-18

The Institute of Psychology at the University of Wrocław invites participants on 19 March to meet with an outstanding sports psychologist - Prof. Jan Blecharz from the physical education and sports department of the Academy of Physical Education in Krakow. Professor Blecharz, psychologist of the Polish team at the Olympics in Albertville and Salt Lake City, as well as national team in ski jumping, will give a lecture on «Psychological aspects of sports championship». He will talk about the history of sport psychology, its main goals and tasks, and will try to answer why modern sport needs psychology? In his reflections on the role of psychologist and psychology in sport, Prof. Blecharz will be accompanied by his long-time co-worker, two-time Olympic champion, three-time world medallist, Renata Mau-

er-Różańska.

University of Life Sciences in Lublin to launch chemistry courses for pupils of secondary schools

2019-03-19

The free chemistry classes are offered by the University of Life Sciences in Lublin. The aim of lessons addressed to 160 secondary school students is teaching practical chemistry and developing creative thinking. The classes will be delivered as 9 workshops during which the pupils will be experimenting in the laboratory of the Department of Chemistry at the University of Life Sciences in Lublin (UP). Dr Jadwiga Stachowicz from the Department of Chemistry of UP emphasizes that the workshops will stimulate students' cognitive curiosity and interest in the laboratory work, as well as allow them to learn chemistry in a practical way.

Maria Curie Skłodowska University in Lublin to launch Open Days

2019-03-19

The Maria Curie Skłodowska University (UMCS) in Lublin invites pupils on March 22, 2019 to the largest event for university candidates - UMCS Open Days. During the event, the university will present its educational offer, the course of the recruitment process and requirements for candidates for studies. They will also see the real life of the university and get to know how they can pursue their passions at UMCS. The program of the event also includes meetings with representatives of the District Examination Board from Krakow, who will present the modules for the exams in Polish, maths and a foreign language. Additional information, the main program and schedules of events on particular UMCS faculties can be found at: www.drzwiotwarte.umcs.pl

Conference „Flood and drought - how to protect people in harmony with

nature” to be held in Wrocław

2019-03-19

The Regional Representation of the European Commission in Wrocław, Wrocław University of Economics and the Association of Polish Green Networks invite participants to the conference „Flood and drought - how to protect people in harmony with nature”, which will be held on 21 and 22 March in Wrocław. During the conference, the guests will get answers to the questions on what are the natural solutions in the area of protection against flood and drought, how to design and implement them, and what will be their place in the future budget of the European Union. The meeting is addressed first of all to representatives of public authorities responsible at various levels for water management and to all persons interested in the subject of water management and water protection. Detailed information: www.zielonasiec.pl/konferencja

Building of the Faculty of Radio and Television of the University of Silesia awarded with Grand Prix of the Brick Award 2019

2019-03-19

The building of the Faculty of Radio and Television of the University of Silesia was awarded with the Grand Prix of the Polish version of international architectural competition Brick Award 2019. The facility also received the prize in the category public spaces. By granting the Grand Prix, the jury appreciated the advantages of the new headquarters of the Katowice Film School as a contemporary building, at the same time timeless, subtly inscribing into the local context and combining the experience of cultures of northern and southern Europe. The authors of the winning design are Baas Architectura, Grupa 5 Architekci and the Małecy Biuro Projektowe. Brick Award is an award that distinguishes buildings with original ceramic architecture. The international competition for over 14 years (for 4 years in Poland) has been organized by the Wienerberger company,

which produces such materials. The winning realization will represent Polish architecture in the world Wienerberger Brick Award 2020. More: <https://www.us.edu.pl/grand-prix-brick-award-2019-dla-wydzu-u--radia-i-telewizji-im-krzysztofa-kieslowskiego>

Poznań scientists discuss about innovations in occupational therapy

2019-03-19

Over 300 scientists, teachers, students, practitioners and organizers of work in the field of occupational therapy discussed the issues of the therapy during the 2nd Scientific and Training Conference „Innovations in occupational therapy. The international perspective - science, education, practice”. Participants listened to 65 speeches, read 6 posters and took part in 11 workshops. The program session showed an international perspective in the field of science, education and professional practice in occupational therapy. It was delivered with the participation of guests from key scientific, educational and professional organizations in Europe. It became a perfect starting point for the presentation of Polish experiences in the field of research, teaching and good practices. As part of the conference, the Second Polish Summit of Occupational Therapy took place. It was a meeting of academic and educational communities to discuss the assumptions and the shape of the act on the occupational therapist.

Debate of the National Congress of Science about doctoral schools

2019-03-19

The Nicolaus Copernicus University in Toruń will be the place of the second debate of the National Congress of Science (NKN) devoted to doctoral schools. Their introduction is one of the most important changes in the new Law on Higher Education and Science. The level of science practiced in Poland in a few years will be determined by present PhD students. That is why it is so important to create conditions for creative exchange of ideas, to ensure

participation in scientific research at the highest level and contact with eminent scholars. The answer to these needs is to create completely new institutions in Poland - doctoral schools. During the debate on March 20, the representatives of various universities will present their doctoral school projects, exchange experiences and talk about the challenges and opportunities brought by transformations in the approach to doctoral education. The discussion will also concern the organizational structure, joint schools for several universities, education programs, recruitment and evaluation rules.

Dr Bogdanowska from the Krakow University of Technology becomes a monument conservator in the Małopolska region

2019-03-20

The Małopolska Province Governor Piotr Ćwik appointed Dr Monika Bogdanowska from the Department of Painting and Sculpture of the Krakow University of Technology for the position of the Małopolska Voivodship Monument Conservator. Dr Monika Bogdanowska is a conservator of works of art professionally. She was awarded with her PhD at the Faculty of Architecture of the Polish Academy of Sciences, and she received her postdoctoral degree at the Academy of Fine Arts in Krakow in the field of plastic arts, discipline: conservation and restoration of works of art. She is particularly interested in the history of Krakow at the turn of the 19th and 20th centuries, and recently also in modernism.

Professor Eng. Andrzej Jacek Tejchman-Konarzewski from the Gdańsk University of Technology joins the Science Evaluation Commission

2019-03-20

Professor Eng. Andrzej Jacek Tejchman-Konarzewski, head of the Department of Building and Materials Engineering at the Faculty of Civil Engineering and Environment at the Gdańsk University of Technology was appointed to the Science Evaluation Commission (KEN). The Commission has 31 representatives of various fields of science and art as well as specialists in scientific policy appointed by the decision of the Minister of Science and Higher Education, Jarosław Gowin. The task of the body established by the Constitution for Science is first and foremost to evaluate the quality of scientific activity that will take place in 2021. The Commission will also evaluate evaluation of education in doctoral schools. It will also be responsible for preparing draft lists of publications on scientific monographs and scientific journals and peer-reviewed materials from international conferences, as well as presenting to the minister proposals for scientific categories for entities subject to evaluation.

Wrocław University of Technology holds the conference: Industry 4.0 is the future

2019-03-20

Scientists, entrepreneurs and representatives of public administration participated in the II Congress of Innovation at the Wrocław University of Science and Technology. The main topic of the discussion was industry 4.0. Industry 4.0 is the concept of integrating intelligent machines, systems and introducing changes in production processes to increase efficiency and flexibility. It applies not only to technology, but also to the new role of people in the industrial system. During the congress, four key conditions for effective implementation of Industry 4.0 in Poland were discussed: the environment, people,

technology and the market. Understanding the relationship between them and their implementation is to build the competitive advantage of domestic enterprises. The Congress was organized by Wrocław University of Science and Technology; Legnica Special Economic Zone; Wałbrzych Special Economic Zone „INVEST-PARK” together with Key Novelty sp. Z o.o. The Ministry of Entrepreneurship and Technology took the honorary patronage over the event.

Multifunctional SMART furniture awarded Gold Medal of the Poznań International Fair

2019-03-20

A multi-functional piece of furniture for sleeping, storage and work SMART designed by Zuzanna Klorek, graduate of the wood technology department at the University of Life Sciences in Poznań, won the gold medal at the Poznań International Fair. SMART is a multifunctional furniture dedicated primarily to small spaces. It simultaneously has three functions: sleeping, work and storage. The thoughtful design ensures its safe and intuitive use. The most characteristic element is the rotating table top, which can be used in any position. The project underwent a commercialization carried out by the team of the Center for Innovation and Technology Transfer at the University of Life Sciences in Poznań. The purchaser of the technology license in the composition of which the awarded industrial design is entered is the company Idźczak Meble. Last year, the SMART furniture was also awarded the «Diamond of Furniture» prize.

University of Silesia to cooperate with the Cervantes Institute in Krakow

2019-03-20

The University of Silesia has signed a cooperation agreement with the Cervantes Institute in Krakow. The document was signed at the Faculty of Philology in Sosnowiec, during this year's Hispanophony - an event promoting Spanish language and culture. Cooperation enables organizing annual inter-

national conferences for teachers of Spanish as a foreign language (ELE), didactic workshops, as well as developing an internship program for students of the Cervantes Institute and co-organizing cultural events promoting Spanish language and culture, Hispanoamerican and Hispano-speaking countries. The Cervantes Institute is a Spanish state institution established in 1991 to disseminate and teach Spanish and to promote Spanish and Hispanic American culture abroad. The Institute has over 77 branches on five continents.

Collegium Civitas Seminar to fight against terrorism in cyberspace

2019-03-21

In cooperation with the House of Meetings with History and as part of the interdisciplinary program „Views on terrorism“ the Center for Research on Terrorism of Collegium Civitas in Warsaw invites participants to the seminar „Fight against terrorism in cyberspace“. The event, which will take place on Friday 22 March 2019 in Warsaw at ul. Karowa 20, will be devoted to the use of various methods of communication, training and radicalization, also in cyberspace by terrorist organizations. Due to the fact that counteracting these phenomena requires expertise in IT, communication theory and psychological processes of radicalization, the fight against terrorism in cyberspace is one of the most dynamic fields of confrontation with this threat. The seminar will be attended by experts in the field of coun-

ter-terrorism and security in cyberspace.

Olsztyn's students dominated in the European Sensing Competition EUROPEL

2019-03-21

Students of the Faculty of Food Sciences at the University of Warmia and Mazury (UWM) in Olsztyn won 12 awards in the 21st European Sensory Contest EUROPEL held in Poligny (France). The competition was attended by 60 students from 6 countries: France, Italy, Finland, the Netherlands, the United States and Poland. University of Warmia and Mazury in Olsztyn sent two three-man teams. - In total, we have won 12 awards - including 6 individual and 6 group ones. We turned out to be the best in university and in the team categories - said one of the award-winning students Arkadiusz Rosiak. The first individual awards were also received by Dominika Dobrzycka and Arkadiusz Rosiak. The competition consisted of sensory evaluation of products - milk, butter and cheeses: comté, camembert and morbier - adds Dominika Dobrzycka. She emphasized that a great victory reflects the high quality of education at the Faculty of Food Science at UWM.

Conference of partners of Economics, Ecology and Infrastructure at High-Speed Railways project

2019-03-21

The participants of the Economics, Ecology and Infrastructure at High-Speed Railways project have met at the University of Economics in Katowice (UE). The project is financed by the European Union as part of the Erasmus + program. The project involves UE in Katowice, the Technical University of Dresden from Germany (leader), Technical University of Madrid from Spain, M. Auezov South Kazakhstan State University, Tynyshpaev Kazakh Academy of Transport and Communications and Eurasian National University from Kazakhstan, as well as the Russian Federal State Budget Educational Institution for Higher Education «Emperor Alexander I of St. Petersburg State Transport University», Ural State University of

Transportation and Far Eastern State Transport University. The main objective is to support the transfer of knowledge in the field of railway engineering, in particular high-speed rail, through the exchange of knowledge and skills between partners.

7th International Conference of Masters of Science to be held in May at the University of Silesia in Katowice

2019-03-21

The Faculty of International Polish Studies, the School of Polish Language and Culture, as well as the Student Group of Foreign Students „The Tower of Babel“ and the Center for Chinese Language and Culture at the University of Silesia invite participants to the 7th International Conference of Masters of Science. The aim of the meeting, which will be held on May 13 at the Faculty of Philology, is to enable graduate students, outstanding students of the undergraduate studies and PhD students to present fragments of their own diploma theses. The invitation to participate in the conference is addressed to both foreigners and Poles studying at Polish universities. Foreign students can present their point of view on Polish literature, culture and language, while Polish students can present intercultural issues during their lectures. Applications can be sent by April 21 at the e-mail address: szkola@us.edu.pl.

Students of the Wrocław University of Technology reach finals of the CanSat Competition United States

2019-03-21

Students of the Wrocław University of Technology qualified for the finals of the international competition CanSat Competition United States. The competition simulates a real space mission including launching a rocket with a probe in the middle, launching it at a specific altitude, with use of a ground station to control all device parameters. Students' task is to develop a small probe, which will be dropped at an altitude of 700 meters and will collect data while falling. The weight of the device cannot exceed 500

grams, the probe must have specific dimensions (12.5 cm in diameter and 30 cm in length), and the cost of its construction must not exceed 1000 dollars. The design must withstand overloads of 30G and extremely high temperatures. The competition will be held at the airfield in Stephenville, Texas in mid-June. 40 teams from around the world are invited to take part in it. More: <https://pwr.edu.pl/uczelnia/aktualnosci/pwr-aerospace-poleci-do-tek-sasu-na-zawody-sond-kosmicznych-11131.html>

University of Rzeszów becomes the scientific patron of the „Lisia Góra” nature reserve

2019-03-25

The University of Rzeszów (UR) has signed an agreement with the city of Rzeszów, whose aim is to work together for the natural and landscape revalorisation and protection of the „Lisia Góra” nature reserve. Detailed areas of research and protection will be related to the biological and cultural significance of old oak trees, as well as threats from alien, invasive and harmful species. In addition, the cooperation will also consist in updating the natural science data, conducting didactic and educational activities for the inhabitants of Rzeszów and organizing national and international scientific conferences.

State Higher Vocational

School in Płock celebrated its 20th anniversary by changing its name

2019-03-25

The State Higher Vocational School in Płock celebrates its 20th anniversary. On this occasion, the university decided to change the name. From March 21, 2019, it becomes the Mazowiecka Public School in Płock. - The development of our university is balanced. We have a stable number of students, we educate at a high level and regularly expand our study offer. We are developing scientifically, we are improving our educational base - said Prof. Associate Maciej Słodki, university rector, during the anniversary celebrations. Professor Słodki added that the Act 2.0 -Constitution for science changed not only the status, but also the statute of vocational schools. - We were and are a university educating primarily for the needs of our city and the broadly understood region. We would like to highlight it in a special way by changing the name of our university to the Mazowiecka Public School in Płock.

New book of Prof. Marek Bernacki published by Universitas

2019-03-25

Monography of Prof. Marek Bernacki: „Tracking for Milosz. The Hermeneutical bio-graphics of the Poet” appeared in the prestigious series “Modernism in Poland” of the Universitas publishing house. « Tracking for Milosz.» is another work devoted to the interpretation of Czesław Miłosz's works and biography. The publishing review of Prof. Jarosław Ławski emphasizes that it is one of the most important reproductive works on Milosz of the beginning of the 21st century. The Universitas is one of the most important and highly valued scientific publishing house in Poland. It specializes in publishing scientific and popular science books in the field of the humanities, with particular emphasis on the history and theory of literature, history of art, and language science. “Modernism in Poland” is a series edited

by Prof. Włodzimierz Bolecki and Prof. Ryszard Nycz, devoted to the study of modern Polish literature, art, culture and humanities.

New promoting film of the largest wind tunnel in Poland

2019-03-26

The Institute of Aviation in Warsaw presented a film about flight tests of the Polish national team of ski jumpers, who trained in the largest wind tunnel in Poland. These are the first and only shots of this type presenting the research capabilities of this facility with the participation of athletes. The film presents the largest in Poland and Central and Eastern Europe wind tunnel (T-3) which is located in the Aerodynamic Research Laboratory of the Institute of Aviation. The dimensions and research capabilities of the facility are impressive. The measuring space is 5 m in diameter and 6.5 m in length. Engine power (5.6 MW) and maximum air velocity (90 m / s) allow to include the Institute of Aviation tunnel into the world's leading wind tunnel. See the video: <https://youtu.be/dhkvH7mLZR0>

Warsaw School of Economics to hold a conference on migration in the European Union

2019-03-26

The Department of Political Studies of the Economic and Social College of the Warsaw School of Economics (SGH), Konrad Adenauer Foundation in Poland and Research Committee 46 - Migration and Citizenship International Political Science Association (IPSA) are organizing on March 26, 2019 the EUMIGRO conference under the slogan „Migration and integration in the European Union - facts, numbers, challenges and political reactions.” The conference received the Honorary Patronage of the European Commission Representation in Poland. It is organized as part of the EUMIGRO project - «Jean Monnet Module on the European Union and the Contemporary International Migration - an In-

terdisciplinary Approach», which is implemented at SGH with co-financing of the European Union under the Erasmus Program. The main objective of the EUMIGRO project is to promote research and expand SGH teaching offer with new subjects that cover the current and important issues of migration and asylum in Europe in a holistic, innovative and multidimensional way. More: <https://eumigro.eu/pl>

Warsaw University to hold IT Days 2019

2019-03-26

From 26 to 27 March 2019, the Faculty of Mathematics and Information Science of the Warsaw University of Technology will hold the Warsaw IT Days. This is the largest meeting of students, professionals and IT experts in Central and Eastern Europe. The 10th Warsaw Computer Science Days will include interesting lectures in the field of computer science, creating start-ups and workshops take place. The conference is also connected with the IT Job Exchange to present job and apprenticeship offer. Participants of the event will be able to check the latest trends in the IT job market, consult their career path and find out what current and future value in the job market they represent. More: <https://warszawskiedniinformatyki.pl/>

University of Silesia to hold a conference Literature evaluation - criticism, theory, history

2019-03-26

The PhD Students' Scientific Group of the Faculty of Philology of the University of Silesia invites participants on 8 and 9 April to the conference „Evaluation of literature - criticism, theory, history”. The meeting will be devoted to changes in the valuation and evaluation of phenomena in the space of literature and literary studies - critical accounts, theoretical issues and interpretive exchanges. The reception of the literature is in permanent change. The texts are subject to a constant movement of reinterpretation and re-reading; searching in dusty archives and displaying the light of daylight or just the opposite - forgetting and skipping. The topics of the

conference include literary evaluations, literature valuation, evaluation in literature; reception optics, criticism of old and new works; overestimated and underestimated literature and methods in the heat of criticism; canon and periphery about the (un)popularity of works, as well as new perspectives: the state of research and other research strategies. More: <https://www.us.edu.pl/konferencja-pt-ewaluacja-literatury-krytyka-teoria-historia>

European Day at Collegium Civitas in Warsaw

2019-03-27

Elections to the European Parliament will be held on 26 May 2019 and on 9 April Collegium Civitas in Warsaw invites participants to meet EU experts and join CC workshops to celebrate the European Day. During the event, the participants can ask experts about the problems and challenges of the EU and what can be expected from the next elections. They will talk about Brexit and fake news, as well as the direction in which the community is heading and its influence. Also, non-governmental organizations representing various initiatives controlling the EU and animating pro-European and pro-democratic movements are invited to European Day. More: <https://forms.office.com/Pages/ResponsePage.aspx?id=IDQKIVaAjkOjrSqVZyq3wyIZhH61sSBGi2WDER6mbf9URFdDM1FaRjIPOD-Q5UFJORzVCSzJLN1I5OC4u>

Nano and Micromechanics Conference CNM2019 to be held at Rzeszów University of Technology

2019-03-27

Rzeszów University of Technology will host the Nano and Micromechanics Conference CNM2019. The event, which will take place in July this year, as part of the National Academic Exchange Agency (NAWA) project is organized by Rzeszów University of Technology, Institute of Fundamental Problems of Technology of the Polish Academy of Sciences (PAN) and the Committee of Mechanics of the Polish Academy of Sciences. The CNM 2019 conference

is an international meeting devoted to micro and nanomechanics, which takes place every two years in Poland. The conference is addressed to engineers and scientists from both academia and industry from around the world to discuss the latest developments and future changes in nano- and micro-mechanics. The aim of the conference is to familiarize with the latest knowledge in the multidisciplinary area of nanotechnology and microtechnology in the fields of mechanics, fluids, physics, chemistry, biotechnology and biomedicine.

University of Silesia to hold a seminar Vegan narratives: representations / interpretations / inspirations

2019-03-27

The Department of Theory of Literature and Culture and the Philological Research Group BESTO operating under the patronage of the Animal Studies Laboratory - Third Culture University of Silesia invite participants to the seminar on „Vegan Narratives: Representations / Interpretations / Inspirations”, which will be devoted to research on veganism in literary and cultural contexts. The event is addressed to researchers from various areas of knowledge to enable them to discuss how veganism inspires activities and statements – in literary, artistic and cultural contexts. The organizers invite the participants to share the reflection on the language that literature speaks about veganism and the means of expressing vegan identity. The topics will include elements of vegan experience that inspire writers, filmmakers and artists, and how individual experience translates into a universal language of artistic expression.

University of Casimir the Great in Bydgoszcz to discuss on economic crime

2019-03-27

The Criminal Law Society in cooperation with the Faculty of Administration and Social Sciences of the University of Casimir the Great in Bydgoszcz invites participants to the National Student and Doctoral Scientific Conference „Economic Crime”,

which will be held on 3rd April. The conference is to be a platform for the following issues: crime of mismanagement; crime of economic bribery; fraud; money laundering offense; crimes against creditors and excise smuggling and other crimes related to the depletion of excise duty. The organizers are also planning discussions on crimes against public procurement, incorrect keeping of business records, crimes against money and securities trading, tax fraud, abuse against EU financial interests and organized economic crime.

Polish Space Agency to hold a conference on the development of missile technologies in Poland

2019-03-28

The Polish Space Agency and the Institute of Aviation in Warsaw are organizing a conference „Development and application of missile technologies in Poland - a new opening”, which will be held on April 16, 2019 at the Institute of Aviation. The purpose of the event is to present the achievements and potential of national research and industrial entities associated with missile technologies and to indicate areas of interest of the Polish Army in this field. The opening speech of the conference, devoted to the history of development of rocket propulsion in Poland, will be given by Prof. Eng. Piotr Wolański, honorary chairman of the Space and Satellite Re-

search Committee of the Polish Academy of Sciences. The conference was held under the patronage of the Ministry of Enterprise and Technology.

Maria Curie-Skłodowska University in Lublin to hold biochemical competition for secondary school pupils

2019-03-28

For the tenth time the Maria Curie-Skłodowska University (UMCS) in Lublin, is holding a biochemical competition for secondary school pupils. This is the only initiative of this kind organized in Poland. The competition resembles a written exam, during which students have the opportunity to present various areas of biochemistry. This is a very extensive field of knowledge and the questions may concern, for example, clinical biochemistry, enzymology or biochemistry used with elements of biotechnology and genetic engineering. The event, organized by the Department of Biochemistry UMCS, students and PhD students of the Faculty of Biology and Biotechnology UMCS, will take place on April 5, 2019 at the Faculty of Biology and Biotechnology UMCS at ul. Akademicka 19 in Lublin.

AGH University of Science and Technology in Krakow to launch Job Fair

2019-03-28

Over 100 exhibitors present their offers to students and graduates during the Job Fair of the AGH University of Science and Technology in Krakow on March 28, 2019. This year's 115 exhibitors include companies Arcelor Mittal, Ericsson, Nokia, Comarch, Maspex and Motorola Solutions. Such a large number of exhibitors is the result of the fact that employers value highly the candidates coming from the AGH University of Science and Technology. The program of the fair includes consultations of application documents in Polish and English conducted by career counselors at the AGH UST Career Center. Thanks to this, job applicants will have the opportunity to better present their experience and skills to potential employers. More: <http://www.targi.agh.edu.pl/edycja-wiosenna/>

New authorities of the Space and Satellite Research Committee of the Polish Academy of Sciences

2019-03-28

After 16 years Prof. Piotr Wolański ceased to be the chairman of the Space and Satellite Research Committee of the Polish Academy of Sciences (PAN). The president of the Polish Academy of Sciences appointed the new head of the Committee: Prof. Zbigniew Klos of the Space Research Center of the Polish Academy of Sciences. In addition, the Presidium of the PAN appointed Dr Eng. Leszek Lorocho, Dr Eng. Adam Okniński and Dr Grzegorz Brona to the Space and Satellite Research Committee (KBKiS) at the Presidium of the Polish Academy of Sciences for the term 2019-2022. Dr Eng. Leszek Lorocho, director of the Aerospace Technology Center at the Institute of Aviation, was elected to the post of the 2nd Vice President of the Space and Satellite Research Committee of the Polish Academy of Sciences. Dr Eng. Adam Okniński, head of the Department of Space Technology at the Institute of Aviation, was appointed to create the Sections of the KBKiS PAN Exit Systems. Dr Grzegorz Brona becomes the president of the Polish Agency of Space.

Pedagogical University of Krakow to host a conference on the language of the media

2019-03-28

The Pedagogical University (UP) in Krakow organizes on March 28-29, 2019, the 3rd National Interdisciplinary Scientific Conference „Language and Media. Perspectives and threats to language and communication in contemporary media”. The aim of the conference is to create a platform for the substantive discussion of researchers in the field of linguistics, cultural studies, media studies, as well as journalists, political scientists, sociologists, and anthropologists. – The organizers are interested in a broad research approach to language and communication in the media and analysis of all their manifestations; both

theoretical-methodological considerations and material analyzes of specific cases. The participants of the event will discuss e.g. Contemporary areas of media discourse, Barriers and threats to language and communication in contemporary media, Mediatization of politics and media policy and Polish on the Internet - Phrase in new media.

Anti-discrimination days in April in Poznań

2019-03-28

The Association of Anti-Discrimination Days, which includes students from the Adam Mickiewicz University in Poznań, invites participants to the third Anti-Discrimination Days. From 1 to 6 April the organizers are planning trainings, workshops and lectures, film and artistic shows. Main goals of the Days include an effective replacement of stereotypes with reliable knowledge, creating a safe space for discussion on topics related to human rights, exploration of theoretical and practical knowledge, and education on anti-discrimination law, types of discrimination and ways to counteract it. As part of this year's Days, the National Interdisciplinary Expert Scientific Conference will hold a seminar „Faces of discrimination and measures to counteract it”. The final and

the summary will be the Living Library Day meetings with representatives of social groups burdened with stereotypes, prone to prejudice, exclusion and discrimination. More: <https://amu.edu.pl/wiadomosci/aktualnosci/studenci/iii-dni-antydykirusacji>

Scientific conference „MycoRise Up! Young people in Mycology. „

2019-03-29

The Polish Mycological Society, the Mycological and Algological Section of the Students' Scientific Society of Biologists of the University of Lodz (UŁ), the Laboratory of Algology and Mycology, University of Lodz and the Student Biotechnology and Microbiology Circle of the University of Lodz are organizing a scientific conference on 12-13 April 2019 „MycoRise Up! Young people in Mycology.” The conference is addressed to all students and PhD students interested in mushrooms or research using these organisms. Each participant will have the opportunity to present the subject of their research in English or Polish, as part of an oral presentation or a multimedia poster. The three best oral and three poster presentations will be awarded. The event will take place at the Field Station of the Faculty of Biology and Environmental Protection of the University of Lodz in Spała. More: <https://mycoriseup.wixsite.com/konferencja>

Students of the University of Białystok to help the amphibians

2019-03-29

Spring migration of amphibians on many Polish roads causes their mass deaths under the wheels of cars. In order to help frogs, toads or grass frogs safely reach the place of breeding, students from the Biologists' Circle of the University of Białystok (UwB) once again got involved in the Plotki Action. In place of their activities, they chose the Tsar's Way - a route intersecting the Biebrza National Park, on the section between Osowiec and Laskowiec. Biologists have been conducting studies on mortality of vertebrates including amphibians, for several years. The data is alarming: the increasing traffic on the Tsar's Road

has a clear impact on amphibian mortality. To help the amphibians, the students in cooperation with the Biebrza National Park (BPN) set 800 meters of fences made of agrotexiles that prevent the frogs, toads or grass frogs from going out into the road. Pools are dug along the fences, where wandering animals fall. Twice a day buckets are checked and amphibians are safely transferred to the other side of the road.

Debate about the place of humor in language, culture and scientific research

2019-03-29

The PhD NEOLinguists Scientific Circle operating under the patronage of the Institute of English, the Institute of English Language Cultures and Literatures, and the Institute of Romance Languages and Translation Studies at the University of Silesia invites participants to the Humor Research Project on 4 and 5 April. The aim of the conference at the Faculty of Philology at the University of Silesia in Sosnowiec is to enable an exchange of views on the perception of humor through the prism of different paradigms, making it possible to look at the phenomenon of humor and its interdisciplinary and universal character, and to encourage debate about the place of humor in language, culture and research scientific. The proposed issues include various implementations of humor in literature and translations, cultural, intercultural and multicultural aspects of humor, examples of humor in research on media and visuality, the importance of humor and laughter in cognition and social interaction, as well as the role of humor in methodology and teaching.

Poznań projects win the „Young (not) mortal” competition

2019-03-29

Two projects of the University of Economics in Poznań, Student Scientific Club Enactus, won the nationwide competition „Young (not) mortal” on the growing problem of traffic accidents and suicides among young people between 16 - 24 years old. The designs of Enactus club 'Hands to Place' and 'AppDay' received grants of 5,000. PLN from

the event organizer - AXA insurance company. The 46 members of the Poznań club are currently implementing projects related to water saving, rationalization of plastic consumption, senior care and responsible consumption.

Silesian University of Technology invites participants to the Innovator Day

2019-03-29

The Faculty of Organization and Management at the Silesian University of Technology in Zabrze invites participants on April 4 to the „Innovator’s Day” conference. It is an opportunity to exchange knowledge and experiences between students, entrepreneurs and research workers in the field of creating, developing and commercializing innovative solutions and the possibility of supporting young innovators and inventors. The organizers are planning attractions in the form of scientific riddles rooms, interesting lectures, exhibitions and practical workshops on the use of creative thinking techniques for innovative solutions and design thinking. Conference participants will also learn how to facilitate the processes of prototyping and designing new solutions through visual thinking, how to use the Internet of Things to implement a robot controlled via wifi, how to run an IT project “Creating the first mobile application”.

VIII Krakow Conference on Financial Mathematics

2019-04-01

On 5-7 April 2019, the AGH University of Science and Technology in Krakow is holding the VIII Krakow Conference on Financial Mathematics. The event is organized by the Scientific Modeling of Finance Scientific Group operating at the Faculty of Applied Mathematics. The main goal of the conference is to expand knowledge in the field of the latest methods and mathematical models used on the financial market. The topics related to investments, the valuation of financial instruments and the implementation of mathematical models will be discussed. The conference is held mainly for students, which is why

the organizers stressed the practical application of theoretical scientific issues in the finances. It will include workshops to see how to implement mathematical models in practice.

VII Days of Old Books to be held at the Cardinal Stefan Wyszyński University in Warsaw

2019-04-01

On 8 - 12 April 2019, the Faculty of Humanities and the Main Library of the Cardinal Stefan Wyszyński University in Warsaw (UKSW) invite participants to the 7th Days of Old Books at UKSW. The theme of this year’s event is „Former school and academic book”. The exhibition will be presented in the lobby at the Auditorium of St. John Paul the Second on the campus at ul. Dewajtis 5. The opening of the exhibition will be accompanied by lectures by Dr Joanna Dimke-Kamola from the Adam Mickiewicz University in Poznań entitled «A difficult thing to show in the book. Actio as a subject of teaching in Italian textbooks for adepts of preaching (the second half of the 16th century - the first half of the 17th century)”. Prof. Andrzej Dąbrówka from the Institute of Literary Research of the Polish Academy of Sciences will present „The oldest Polish school textbook” and Dr Marta Wojtkowska-Maksymik from the University of Warsaw will talk on „Elementaria (1575) of Maciej Wirzbięta. From the primer to the textbook of good manners”.

University of Rzeszów to organize the scientific conference „Towards independence”

2019-04-01

On 4-5 April 2019, the Ignacy Łukasiewicz Museum of Oil and Gas Industry in Bóbrka is organizing the first scientific conference entitled „Towards independence” under the grant „Towards independence: Independent Poland and Free Poles in the 19th-21st century”. The organizer of the event is the Faculty of Sociology and History of the University of Rzeszów. As part of the conference the university provides 4 thematic sessions: Pending independence, Moderniza-

tion impulses in the Polish economy, Social changes at the turn of the century, Shades of Polish modernization. During the conference, the participants will listen to over a dozen lectures and presentations, including a lecture of Prof. Wojciech Morawski (Warsaw School of Economics) “Industrialization and modernization. Polish experiences”, and Prof. Piotr Franaszek (Jagiellonian University in Krakow) “The oil industry as a factor in the modernization of the economy and the Galician society”.

Night of the Humanists to be held on April 6 at the University of Wroclaw

2019-04-01

Archaeologists, anthropologists, historians, art historians, cultural scholars, musicologists, pedagogues and psychologists will take part in the 6th Night of the Humanists - 6 April at the University of Wrocław. The motto of this year’s meeting is: „Is this the world in which we want to live? Rebellion in culture.” The crisis of traditional forms of democracy, increase in social (especially economic) differences, global trade wars, fears related to migration movements, ethnic conflicts, shortages of irrigation and water, ecological catastrophes, safety as the chief quality and value of human life (instead of freedom), hatred in speech and widespread violence - these are just some of the threats and challenges facing the world today. Students from the Wrocław faculty of historical and pedagogical sciences, want to remind participants how important is the scientific truth and how important social role it has to play. More: <https://uni.wroc.pl/czy-to-jest-swiat-w-ktorym-chcemy-z%CC%87yc-bunt-w-kulturze/>

Poznan University of Technology participates in the „Hult Prize” competition

2019-04-01

The team of Poznan University of Technology students took part in the „Hult Prize” competition, where students from all over the world are trying to deal with the problems related to access to food, water, electricity and education. The subject of com-

petition is different in each competition, each time personally named by the former president of the USA, Bill Clinton. This year the subject is «Youth unemployment. How to change world with 1 million dollars.» The winners will be presented in September. The project of Poznan students, presented during the London convention, assumes the creation of a fund whose goal is to provide 10,000 jobs in food production in Iraq and in the Kurdistan region. The project is based on the relations of demand and supply that develop there, with particular emphasis on the economic crisis affecting the region.

5th National Scientific Conference „Ecology, logistics, transport”

2019-04-02

The Logistics Scientific Club operating at the Faculty of Economic and Legal Sciences of the University of Natural Sciences and Humanities in Siedlce is organizing the 5th National Scientific Conference „Ecology, logistics, transport” on 4 April 2019. The event is addressed to practitioners, scientists, PhD students and students dealing with the issues of logistics. During the conference, the organizers are planning speeches and lectures on the following topics: Conditions of supply chain operation, Optimization of procurement processes, Logistics of production processes, Client as a basic element of distribution logistics, Innovative solutions in logistics processes, Efficiency of transport activities.

National Genetic Conference „Genomica” to be held in Krakow

2019-04-03

The National Genetic Conference „Genomica” is an initiative of students of the Students’ Scientific Society of Biotechnology „Mygen” of the Jagiellonian University in Krakow, which operates at the Faculty of Biochemistry, Biophysics and Biotechnology of the Jagiellonian University. The symposium will be held in Krakow on 5-7 April 2019. „Genomica” is addressed to students of various degrees and directions just starting their adventure with science and

those who already conduct their own research and want to present them to others. The organizers are emphasizing, that this event is an excellent opportunity for beginning researchers to establish first scientific contacts, discuss topics of interest, as well as to gain experience and find a place in the scientific community. More: www.genomica.pl

Piotr Dardziński becomes President of the Łukasiewicz Research Network

2019-04-03

Piotr Dardziński became the president of the Łukasiewicz Research Network established on 1 April 2019, the third largest research organization in Europe. He will lead a group of 38 research institutes that will soon present a wide offer for entrepreneurs from start-ups, small and medium-sized companies and large corporations. Piotr Dardziński was previously the secretary of state in the Ministry of Science and Higher Education responsible for cooperation of science and business. He supervised the government agency National Center for Research and Development, the National Academic Exchange Agency and the research institute Information Processing Center. - The Łukasiewicz Research Network is the implementation of Polish aspirations for cooperation with European and world institutions. We are now an important partner for organizations such as the German Fraunhofer Association, the French Carnot or the Finnish VTT - said President Dardziński.

Conference „Alone together” in English York supported by the rector of the University of Szczecin

2019-04-03

English York St. John University and the University of Szczecin invite participants from 10 to 12 April to the international multidisciplinary conference „Alone together” dedicated to loneliness in the community. The conference will be held in York, United Kingdom under the honorary auspices of the rector of the University of York, Prof. Karen Stanton and the rector of the University of Szczecin, Prof. Ed-

ward Włodarczyk. - Our intention is to hold a global meeting of researchers and enthusiasts of loneliness, representing various disciplines (pedagogy, psychology, philosophy and cognitive science, theology, medicine, art and others). York St. John University is a university founded in 1841. It has 6,000 students, including 500 foreigners. Applications are accepted via the conference website: www.yorks.ac.uk/alonetogether

Debate on digging the Vistula Spit held at the University of Gdańsk

2019-04-03

The Academic Center for Culture in cooperation with the Department of Ecology and Vertebrate Zoology at the University of Gdańsk invites participants to the Auditorium C / 105 at the biology department on 4 April for the debate „Substantially on Digging the Vistula Spit”. In the opinion of the organizers of the debate, the plan of the excavation and the construction of the shipping channel as well as actions taken to implement the investment brought a lot of controversies. Also, unreliable and untested information appears around the subject. There is still lack of calm conversations, experts’ discussions that would allow the public to understand what is to be built, and what are the potential risks of it. The purpose of the meeting is to clarify the inaccuracies and gather reliable arguments for and against the planned digging. Organizers would like to discuss and compare the potential benefits and threats resulting from this investment, as well as refer to legal aspects related to the protection of nature in the area of the spit.

Summer School on Data Science wins the Polish part of European Charlemagne Youth Prize

2019-04-03

Summer School „Summer School on Data Science” conducted in the Information Systems Department of Wrocław University of Economics has been the winner of the Polish part of the European Competition of Charlemagne Youth Prize 2019. The final of

the competition will take place in Aachen on May 28. Data science and machine learning are rapidly evolving. They combine skills from various fields of knowledge - from the classic statistical analysis, through software development, data management, to knowledge of business. The Summer School at the University of Wrocław is led by Dr Ryszard Zygala and a team of graduates and students of the Department of Management, Computer Science and Finance: Karolina Sterc, Marta Jagoda, Katarzyna Walachowska and Paulina Zyskowska. European Award Charlemagne is awarded annually by the European Parliament and the Foundation of the International of Charlemagne in Aachen.

Warsaw University of Life Sciences to hold lecture on environmental pollution

2019-04-04

Department of Landscape Architecture, Faculty of Horticulture, Biotechnology and Landscape Architecture, Warsaw University of Life Sciences (SGGW) and US Embassy in Poland invite participants to an open lecture by Eben Schwartz on environmental pollution by plastics on 8 April 2019. Eben Schwartz heads the Marine Debris Program at the California Coastal Commission. This commission deals with the protection and regulation of the California coast. Schwartz is an expert there, advising governments at local and state level, NGOs and industry, what activities to run and what programs to implement to address the causes of sea and ocean pollution.

Student of the Wrocław University of Technology becomes a laureate of a competition organized by Siemens

2019-04-04

Aleksandra Chudzyńska, student of the electronics department of microsystems and photonics of the Wrocław University of Technology, won the competition organized by Siemens. She was awarded for her film „Engineer's work in response to the challenges of the modern world”. The competition was one of

the elements of the program for students of technical faculties «Female engineers 4.0». The program was performed in the form of specialist workshops on broadly defined Industry 4.0. It was organized by Siemens with support of the Perspektywy Educational Foundation and the Ministry of Enterprise and Technology. The scope of the workshop also included areas related to personal development in the labor market - communication, personal branding and mentoring. Thirty students from Poland participated in the classes. Their course included issues from «Virtual and augmented reality», «New production setup», «Robotization in the world of Industry 4.0» and «Designing innovation in the spirit of design thinking». The winning film: <https://www.youtube.com/watch?v=DrXq5Zjuj2E>

Parachute training to be held at the Rzeszów University of Technology

2019-04-05

On 10 April 2019, the Rzeszów University of Technology will host a parachute training show and a lecture entitled „The history of parachuting at the turn of the century and the use of Polish airborne troops during the Second World War.” The event is organized by Seven Rights, the owner of the Krak-Sky parachute school. The aim of the event is to familiarize students of the Rzeszów University of Technology with basic knowledge about parachuting and to present ways of using parachute equipment in airborne units. The classes will take the form of a multimedia lecture conducted by experienced instructors, former and current soldiers of airborne units and special forces.

4th National Symposium of Sociology PhD Students - Meanders of Methodology

2019-04-05

PhD students of the Institute of Sociology at the Catholic University of Lublin are organizing the 4th National Symposium of PhD Sociology - Meanders of Methodology on April 9-10, 2019. The keynote of this year's meeting is the presentation of various

methodological issues and a discussion on the use of social research methods that are used by sociology students in their research projects. During the symposium, the organizers provide lectures and presentations on the following areas: Interdisciplinarity and postdisciplinarity in scientific work; New research methods in social sciences; Paradigms and their application in sociological works; Ethics of social research; Analysis and presentation of results.

XIX Festival of Science, Technology and Art to be held in Lodz

2019-04-05

From 8 to 15 April 2019, the 19th Festival of Science, Technology and Art will take place in Łódź. The main organizers of the event are the Lodz Science Society and the Ministry of Science and Higher Education. As part of the festival, over four hundred lectures and other events will be delivered. The admission is open and free. The Faculty of International and Political Studies at the University of Lodz on April 9 invites participants to a lecture by Polish Ambassador Monika Herbst Chodorowicz «A woman in the residences. The world seen through the eyes of the wife of Ambassador». The lecture will be combined with a photography show and a discussion on Ambassador's life and activities in Africa, the Middle East and Israel. The Patent Information Center of the Lodz University of Technology will bring closer the patent issues on 11th April and the participants will learn what the invention is and what are the basic sins of the inventor. More: <https://program.festiwal.lodz.pl/site/index>

University of Białystok to hold a lecture on the periodization of the development of the Polish language

2019-04-08

Professor Stanisław Dubisz will be the guest of the next meeting from the series „Lectures of Masters” at the Faculty of Philology of the University of Białystok (UwB). On 10 April 2019, he will talk about the periodisation of the development of the Polish language, in particular after 1939. Professor Stanisław

Dubisz is an eminent Polish linguist, researcher of the old and present Polish language, editor-in-chief of the «Language Handbook» and the «Universal Dictionary of the Polish Language», co-author of renowned «Historical Grammar of the Polish Language». He is a recognized author of several hundred articles and many extensive works belonging to the strictest Polish canon, for example: «Between old and new years. Essays about language»; «Archaization in the 20th Century Polish Historical Novel»; «Language and politics. Sketches from the history of rhetorical style». He is an employee of the Institute of Applied Polish Studies at the University of Warsaw.

in relation to animals. Myths - stereotypes - prejudices.” The organizers want to research the complex human-animal relationship in its various aspects: cultural, ethical, philosophical, historical, religious, social, ethnographic - with particular emphasis on accompanying myths, stereotypes and prejudices about animals. The topics of the conference include: traditional ideas about animals; animals in contemporary communications; animal as a subject / object of scientific reflection and relation to animals in the past and today. The honorary guest of the conference will be Karol Darwin's great-great-granddaughter - Ruth Padel - poet, laureate of many prestigious awards, who is interested in natural sciences and ecology. Student of the Nicolaus Copernicus University in Toruń qualified for the BioLAB program

2019-04-08

Anita Kowalczyk, a student of biotechnology and molecular diagnostics at the faculty of biology and environmental protection at the Nicolaus Copernicus University in Toruń was qualified to the BioLAB Program of the Polish-American Fulbright Commission. During her trip to the United States, she will take a paid internship at the University of Chicago running her project «Role of bile acids in bacterial colonization and host immunity», which will be carried out in the laboratory of Prof. Bana Jabri in 2019-2020. Chicago University took 9th place in the latest Times Higher Education ranking - World University Rankings. Anita Kowalczyk qualified for the program by participation in the projects «Arbuscular mycorrhizal fungi as vectors of plant viruses (MYCOVIR)» and «BETAMIKRO - microbiome of sugar beet (*Beta vulgaris*) and its interactions with host», as well as participation in numerous conferences and other achievements.

State Higher Vocational School in Chełm co-organizing

University of Silesia to hold a conference „Man in relation to animals. Myths - stereotypes - prejudices”

2019-04-08

The Animal Studies Laboratory - Third Culture at the Faculty of Philology and the Institute of Philology of the East Slavic University of Silesia invite participants on September 26 and 27 to the 4th International Interdisciplinary Scientific Conference „Man

Świdnik Air Festival

2019-04-09

Dr Eng. Arkadiusz Tofil, rector of the State Higher Vocational School (PWSZ) in Chełm, signed a letter of intent regarding the organization of Świdnik Air Festival air shows. During the event, the PWSZ will be responsible for the organization of aircraft movements on earth. - We are representing a university that educates pilots of aircrafts and helicopters as well as flight mechanics and we offer students our knowledge, skills and experience in addition to the protection of the ground fleet of aircraft and technical support. We want our guests to take part in a unique air show, but above all we want to provide it safe and efficient - said the Rector of the PWSZ. Świdnik Air Festival is scheduled for June 8-9, 2019. The event will take place at the airport belonging to EPLB Lublin and WSK PZL-Świdnik SA.

Lodz University of Technology to launch Nationwide Student Seminar TEXTIL 2019

2019-04-09

The Faculty of Textile Technology and Design of the Lodz University of Technology invites participants on April 9, 2019, to the National Student Seminar TEXTIL 2019 „Young Fashion Design University of Technology”. The event is an opportunity for young people to present their creativity, show projects and to get acquainted with the potential and offer of the Faculty. The competition part of the TEXTIL 2019 seminar includes: fashion shows, model exhibitions and multimedia presentations. TEXTIL 2019 is also an opportunity to participate in 1.5-hour workshop classes, presenting modern textile technologies in the field of clothing, design, knitting, metrology and synthetic fibers as well as multimedia activities.

Students of the University of Warsaw receive gold medal in the Academic World Championships in Team Programming

2019-04-09

Students of the Faculty of Mathematics, Computer Science and Mechanics of the University of Warsaw (WMIM UW) took the fourth place and won a gold medal in this year's Academic World Championships in Team Programming, which took place in Porto. At the same competition, the 6th position and silver medal was received by the team of the University of Wrocław. The gold medals under the Championships are awarded to the four best teams. The winners of places from 5 to 8 are awarded with silver medals, while the bronze ones are awarded to teams that took places from 9 to 12. In the 43rd International Collegiate Programming Contest, 135 teams took part from the world. Students of the University of Warsaw University of Science and Technology Jakub Boguta, Konrad Paluszek and Mateusz Radecki solved eight out of eleven tasks prepared by the organizers. This year's world champion became a team from the Moscow State University before the Massachusetts Institute of Technology and the Tokyo University. See results: <https://icpc.baylor.edu/worldfinals/results>

Prof. Jarosław Włodarczyk to deliver a lecture on Shakespeare's Space: between the history of astronomy and digital humanities

2019-04-09

The Institute of Polish Philology of the Adam Mickiewicz University in Poznań invites participants to the Sniadecki Hall on the 10th of April for a lecture

by Prof. Jarosław Włodarczyk, „Shakespeare's Cosmos: between the history of astronomy and digital humanities.” Professor Jarosław Włodarczyk is an outstanding expert on the history of astronomy, director of the Institute of the History of Science of the Polish Academy of Sciences in Warsaw and a historian of astronomy. His research include issues of the history of astronomy, the links between the history of science and the history of culture, and the relationship between natural sciences and humanities. His publications comprehensively illuminate the relationship between astronomy, Polish literature and general literature, and one example of it are his books: «Moon in science and culture of the West»; «Wandering blue, or the Universe, not only for poets»; «Mystery of the Bethlehem Star»; «Sherlock Holmes and the code of the universe»; and «Astronomy. History, myths, secrets». More: <https://amu.edu.pl/wiadomosci/wydarzenia/kosmos-szekspira-miedzy-historia-astronomii-a-humanistyka-cyfrowa-wyklad-prof.-jaroslawa-wlodarczyka>

Programmers of the University of Wrocław receive the silver medal of the World Cup

2019-04-09

The team of programmers from the University of Wrocław (UW) won a silver medal during the World Team Programming Championships. The team of the University of Moscow won the competition. The teams from the Massachusetts Institute of Technology, the University of Tokyo the University of Warsaw also received golden medals. This year's finals took place on April 4 in Portugal. University of Warsaw team: Anadi Agrawal, Michał Górniak and Jarosław Kwiecień solved 8 tasks, which brought them sixth place and silver medal (4 medals of each colour were awarded). The World Team Programming Championships are the largest and most prestigious programming competitions. 50,000 students from 3,000 world universities fought for qualifiers to the finals. The competition consists of three-person teams that solve algorithmic tasks based on real IT problems, practicing cooperation, creativity and the ability to act under time pressure.

European workshops for young people from the Lublin region

2019-04-10

The Faculty of Political Science of the Maria Curie-Skłodowska University (UMCS) in Lublin, the European Documentation Center of the UMCS and the Regional Representation of the European Commission in Wrocław invite students from the Lublin region to take part in the European workshops (first time voters). Classes will be held in: Zamość, Chełm, Puławy and Lublin. The organizers invite students for whom the elections to the European Parliament in 2019 will be the first in their life and who want to learn the principles of functioning of the European Union in an interesting way. It will also be an opportunity for direct meetings and talks with lecturers from the Lublin university. European workshops for young people is an action within civic education about the European Union and the place of Poland in the processes of European integration on the fifteenth anniversary of Poland's accession to the EU. The project is financed from the Regional Representation of the European Commission in Wrocław.

Warsaw University of Technology students winning SAE Aero Design in California

2019-04-10

Students from the Interfaculty Scientific Circle SAE Aero Design, operating at the Faculty of Power and Aeronautical Engineering of Warsaw University of Technology, took the two first places, one second and three thirds in international SAE Aero Design competition for students involved in the design and construction of unmanned aircraft. Warsaw students took part in all three competition classes: Regular, Micro and Advanced. They were invincible in the Regular class - they won the general classification and classification of flights. In addition, they took the second place in the flight classification and the third place in the overall Micro class classification, and in the Advanced class they took the third place in the flights and the third in the total score.

The SAE Aero Design competition lasted from 5 to 7 April 2019 and took place in Van Nuys, California.

Dr Anna Foltyniak-Pękala becomes a laureate of the Maria and Kazimierz Brandys competition

2019-04-10

Dr Anna Foltyniak-Pękala from the University of Technology and Humanities in Bielsko-Biała becomes a laureate of the scholarship program of the Maria and Kazimierz Brandys in the International Center for Dialogue in Krasnogruda. Maria and Kazimierz Brandys scholarship is dedicated to the memory of its patrons and the whole generation they represent, and to the works of Kazimierz Brandys. It supports writers, scientists and translators dealing with the issues of cultures and nations, creating literature in the languages of Central and Eastern Europe, or translating. 11 candidates took part from Poland and abroad in the first of the Maria and Kazimierz Brandys program. The winner, Dr Foltyniak-Pękala wrote her PhD thesis devoted to the work of Kazimierz Brandys, one of the most interesting Polish writers of the 20th century a few years ago.

Polityka to launch 19th Science Awards

2019-04-11

By June 16, 2019, the Polityka journal accepts applications from young scientists to the 19th Science Awards. The list of 15 finalists will be published on September 18, and the winners will be announced on October 20 at the awards ceremony in the editorial office of the Polityka. The event is organized by the Polityka Foundation, which since 2001 has been running a scholarship program aimed at

young scientists „Stay with us!”. Since 2011, the program has been implemented under the name of the Political Science Awards. The competition is intended for young scientists up to the age of 35. Applications are subject to evaluation by the jury, which takes into account the age and scientific achievements of the candidate. More: <https://www.polityka.pl/tygodnikpolityka/nauka/nagrody naukowe/1515712,1,regulamin-pryznawania-stypendiow.read>

Researcher of the University of Gdańsk becomes the laureate of the Willi Paul Adams Award

2019-04-11

Dr Anna Mazurkiewicz, Prof. Associate of the history department of the University of Gdańsk has become this year's winner of the prestigious Willi Paul Adams Award granted by the Organization of American Historians (OAH) - the world's largest professional association dealing with researching American history. OAH awarded the book «Political refugees from Central and Eastern Europe in American Cold War Policy 1948-1954». The Commission appreciated the monograph for «impressively detailed investigation of the origin and dynamics of US involvement on behalf of refugees from Central and Eastern Europe in the early years of the Cold War.» The Willi Paul Adams Award is awarded every two years to the author of the best book on American history published in a foreign language. The prize (formerly the Foreign Language Book Prize) comes from Willi Paul Adams, who was an active member of OAH in Germany and a supporter of the internationalization of American history. Nationwide Mathematical Student Conference „OMatKo !!!” to be held in Wrocław

2019-04-11

Scientific groups operating at the Faculty of Mathe-

matics of the Wrocław University of Technology invite participants from the 12th to the 14th of April to the 6th National Mathematical Student Conference „OMatKo !!!”. The conference in the Congress Center of the Wrocław University of Technology is intended for students and PhD students of mathematics and related fields from all over Poland. This year, approximately 300 people have announced their participation. The meeting is guided by the idea of «students to students» and it is the participants who will present papers on their interests or the results of their own scientific research. In two independent thematic blocks 37 speakers will talk on theoretical and applied maths. The opening lecture entitled „Archimedes's Law. Is the mathematician also jumping out of the bathtub? „, will be given by Prof. Jacek Małecki. In addition, participants will have the opportunity to talk to partner companies, such as: McKinsey, Kruk, Credit Suisse and Aviva.

Wrocław robotics students win medals in Goeteborg

2019-04-11

Students from the scientific circle of KoNaR robotics operating at the Wrocław University of Technology won two gold and one silver medal at the international Robot-SM competition in Sweden. The trip to the competition was funded by the Ministry of Science and Higher Education from the grant The best of the best 3.0. During the competition in Göteborg, representatives of the KoNaR Robot Science Club won three medals with their robots. Once again, the technicians from the University of Technology showed the highest category in Sumo competition, winning gold medals in both mini and micro categories. They also added silver medal in the Linefollower competition, which consisted of driving on time on a well-defined route. Robot-SM competitions have been held since 2006 at the Chalmers Technological University in Gothenburg. The rivalry takes place in four categories: Sumo, Line Following, Folkrace and Freestyle.

Senate to launch competition for political scientists and lawyers

2019-04-12

-In 2019, we will celebrate the important anniversaries for the Polish parliamentary - the June elections of 1989 and the thirty years of restitution of the Senate of the Republic of Poland. In this jubilee the Chancellery of the Senate organizes a conference entitled „The role of the Senate in the system of the Republic of Poland - towards the future.” The Senate plans to receive the opinion of young scientists and students on the place, significance, role and future of the upper house in Polish system. The important part of this jubilee will be a student and doctoral panel, participated by the winners of the competition, who will take part and deliver their speeches. The conference is organized on May 30, 2019 in the Senate. The competition is open to students, graduates and PhD students of law or political science. More: <https://www.senat.gov.pl/konkurs-na-uczal-w-panelu-studencko-doktoranckim-/regulamin-konkursu/>

University of Lodz to hold a conference on religion and magic in culture

2019-04-12

The Scientific Club of the Enlightenment Lovers of the University of Lodz is organizing a nationwide scientific conference „Religion and magic in culture”, which will take place on 13 April 2019 at the Faculty of Philology of the University of Lodz. The organizers invite all representatives of the humanities and social sciences interested in the issue of

religion, magic, rituals in ancient and modern culture. During the conference, the participants will discuss the role of religion in past and contemporary communities; religious rituals, rituals and magical practices in literature, film and fine arts; religion and power; picture of a priest in culture; the social and political role of the priest in the past and modern communities; image of a deity in culture and pop culture; functioning of ancient mythology in contemporary culture.

Student from Kazakhstan wins the International Song Competition for the Rector's Award of the Krakow University of Technology

2019-04-12

Alya Appassova from Kazakhstan won the 10th International Song Competition for the Rector's Award of the Krakow University of Technology (PK). The event was organized by the International Center for the Education of PK. The participants of the competition performed one song in their native language and one in Polish. Bilguun Davakhuu from Mongolia took the second place in the competition, followed by Maria Jankowska from Belarus and the Indonesian duet - Riza Putri and Jeffrey Hanafie. Students from Indonesia also received Audience award. The organizer of the event was the International Center for Education at the Krakow University of Technology, whose tasks include preparing foreigners to study in Poland. The center was established in 1985 as an Urban Development Training Center for Developing Countries. In 2002, it was transformed into the International Center for Education and Urban Studies, and since 2007 it has been called the International Center for the Education of PK.

Polish universities present at educational fair in India

2019-04-12

A delegation of the University of Warmia and Mazury in Olsztyn (UWM) participated in international educational fairs in New Delhi, India. Participation in the fair was one of the tasks of the project «VENI

VIDI VICI - integrated foreign promotion of the University of Warmia and Mazury in India» funded by the National Agency for Academic Exchange. Its head is Dr Rakesh Jalali is Rector's Plenipotentiary for English-language studies and the Center Innovation and Technology Transfer UWM in Olsztyn. - The Indian higher education system is not able to provide places for all students and that's why many young Indians are studying abroad. In Poland, Indians are the third group of foreign students in terms of size, - explains Dr Rakesh Jalali. Apart from UWM, the Fair was attended by University of Social and Life Sciences in Lublin, Maria Curie Skłodowska University in Lublin, University of Silesia in Katowice, Krakow University of Technology, University of Life Sciences in Poznan.

„Tama” assessed the best student film at Go Short - International Short Film Festival Nijmegen

2019-04-12

The film „Tama” (Dam) directed by Natalia Koniarz, student of the Radio and Television Department at Silesian University in Katowice, won the award for best student film at Go Short - International Short Film Festival Nijmegen. Her documentary, which lasts for 22 minutes, tells the story of a father and his son who had previously broken contact but after meeting they decide to build the little dam on a mountain stream. The plot can be read in terms of the fight against weaknesses, a joint effort directed against prejudice and mutual grudges. Go Short - International Short Film Festival Nijmegen is the main festival of short films in the Netherlands presenting distinguished European productions. The film «Tama» previously won awards at the Koszalin Debut Film Festival «Youth and Film», the International Film Festival «Allowed to 21» and the International Film Festival «Etiuda & Anima».

VIII Interuniversity Conference Brain Day in Szczecin

2019-04-12

Department of Clinical Psychology and Psych-

oprophylaxis of the Institute of Psychology at the University of Szczecin, Department of Psychiatry of the Pomeranian Medical University, District Medical Chamber in Szczecin, Polish Neurological Society and Polish Psychiatric Association Branch in Szczecin and the Cogito Association invite participants to the VIII Inter-University Conference Day of the Brain. The Brain Day is a lecture on topics related to the functioning of this organ in an interdisciplinary perspective - from a medical, neurological and psychiatric point of view, and taking into account humanistic aspects. This year's performances will include: Imagination of music, Irrationality of our communication, Does art suffer?, or Who is art therapy for? and Diseases of the brain in the film. The conference is organized under the slogan „BRAIN - ART - CONTROVERSIA” and will take place on Saturday, 13 April, in the hall of the Faculty of Humanities of the University of Szczecin.

Student of the Silesian University of Technology becomes the laureate of the Siemens competition „Inżynierki 4.0”

2019-04-12

Marzena Sudoł, a student at the Silesian University of Technology, became one of the four laureates of the Siemens competition „Inżynierki 4.0”, which is

organized for female students of technical universities. Participants of the competition had to make a short film about the work of an engineer. The «Inżynierki 4.0» project supported by the Perspektywy Education Foundation and the Ministry of Entrepreneurship and Technology include specialized workshops and classes conducted by experts in industrial technology, digitization and communication. Its participants could also take part in the competition to receive the main prize: a trip to Hannover to the largest Hannover Messe 2019 industrial fair and to visit the German smart factory. The task was to create a movie illustrating the slogan: «The engineer's work is an answer to the challenges of the modern world». Film laureate: <https://www.youtube.com/watch?feature=youtu.be&v=xjqQSgrKqUc&app=desktop>

Dr Piotr Wesołowski from the Wrocław University of Science and Technology to present its project in China

2019-04-12

Construction project of Dr Piotr Wesołowski from the architecture faculty of the Wrocław University of Science and Technology was included in 32 works selected from over two thousand projects that were sent to the Zhengzhou International Sculpture Exhibition in China. Twenty-three competition works are installations of artists from China, and the other nine come from Spain, Japan, Belgium, South Africa, Bulgaria, Ukraine, Kosovo and Poland. Dr Eng. Piotr Wesołowski from the Department of Drawing, Painting and Sculpture at the Faculty of Architecture of the Wrocław University of Science and Technology presented his work «Sun, Peasant and Donkey». The work is now shown at an exhibition at the China Sculpture Institute. The constructions are assessed by the guests and by the jurors, who evaluate the creativity of works, their uniqueness and aesthetics, as well as the issue of strength, safety or environmental friendliness. The authors of the best projects will receive cash prizes, and above all their installations will be placed in the city sculpture park. University of Natural Sciences and Humanities in Siedlce to hold Conference on local self-government

2019-04-15

The Department of Public Administration and Management of the Faculty of Economic and Legal Sciences of the University of Natural Sciences and Humanities in Siedlce and the Scientific and Political Thought Society are organizing on 16 April 2019 a scientific conference entitled „Territorial self-government in political and legal thought”. The organizers are inviting not only political scientists and lawyers to participate in the conference, but also philosophers, sociologists and other representatives of social sciences and humanities interested in this subject. During the conference they are to discuss following issues: local government as a research problem of political science / legal sciences; territorial / local government - delimitation of concepts in the perspective of political thought; territorial self-government in relation to the basic problems and categories of political philosophy (power, legitimization, sovereignty, political matters).

International conference „Migration - ecumenism - integration”

2019-04-15

Faculty of Theology of the University of Silesia in Katowice, Facultatea de Teologie Universitatea Ovidius din Constanta in Romania and Czech Gréckokatolícka Teologická Fakulta Prešovská Univerzita v Presove, and Cyrilometodějská teologická fakulta Univerzity Palackého v Olomouci are inviting participants to the VIII International Ecumenical Conference entitled „Migration - ecumenism - integration”. The two-day meeting will be held in Katowice (April 25) and in Brenna (April 26). It gathers representatives of national research centers and scientists from Austria, Germany, Slovakia, the Czech Republic, Romania and Italy. The organizers are planning to discuss the following issues: migration

- ecumenism - integration; Lutheran service to migrants; Delphic Sentences as a source of openness to newcomers; migration and the perspectives of intercultural education and interreligious dialogue as well as cultural integration of immigrants as a bilateral process.

Conference „Multivariate and Mixed Linear Models” and „Big Data Analytics and Applications” symposium

2019-04-15

International Mathematical Center of Stefan Banach and the Institute of Mathematics of the Polish Academy of Sciences are inviting participants to the Center for Research and Mathematical Conferences in Będlewo for the international conference „Multivariate and Mixed Linear Models”. The conference will take place on 28. 04-4.05. It will be a summary of previous meetings of the research group in Będlewo commenced in 2009. Its aim is to bring together researchers interested in statistical procedures in multidimensional and mixed linear models and their applications in the economy, agriculture or engineering. Immediately after the conference there will be a one-day «Big Data Analytics and Applications» symposium on the analysis of large data sets. The main speakers will be Dr S. Ejaz Ahmed - professor of statistics at Brock University in Canada and S. Jazib H. Ahmed - analyst with the Canadian company FanXchange.

International competition for the prize of Lt.-Col. Jan Kowalewski

2019-04-15

Gdańsk University of Technology (PG) and the Museum of the Second World War in Gdańsk are organizing an international competition for the prize of Lt.-Col. Jan Kowalewski. Applications can be

submitted by the end of June. - Lieutenant Colonel Jan Kowalewski was a man of many talents: a mathematician and cryptologist, a graduate of a commercial and chemistry school, a specialist in several languages. Through his activity, he has repeatedly proved how important intelligence and detailed technical knowledge can be in the service of the homeland. Gdańsk University of Technology will disseminate knowledge about his outstanding achievements in the field of technical sciences in Poland and abroad - says the rector of the University of Gdańsk Prof. Jacek Namieśnik. The prize will be awarded in two categories: «Poland for the world», addressed to Polish representatives of various fields of knowledge, and «World for Poland», intended for foreigners whose actions, achievements and creativity are beneficial to the Polish state and nation. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGncmoQv7K0/content/miedzynarodowy-konkurs-o-%E2%80%9Enagrode-im-pplk-jana-kowalewskiego%E2%80%9D

Collegium Civitas to hold a conference on E-threats to the elections 2019

2019-04-16

The Information Analysis Center and the Center for Research on Terrorism at Collegium Civitas in Warsaw are organizing a conference on April 25, 2019: „E-Threats to elections 2019: Information as a weapon, manipulation, botocracy”. The conference will start with three introductions. Michał Boni, Member of the European Parliament, will try to answer the question: Can European law fight against misinformation? Martyna Bildziukiewicz from EEAS East StratCom Task Force will deal with the issue of disinformation in the European elections, and Dr Krzysztof Liedel, head of the Collegium Civitas Information Analysis Center, will hold the lecture «Information fight as an element of the hybrid conflict». Next, the organizers are planning two panel discussions on the disinformation threats for democracy that appear in electoral processes.

Institute of Aviation to hold a conference on the

development of missile technologies in Poland

2019-04-16

On Tuesday, April 16, 2019, Polish Space Agency and the Institute of Aviation will hold the conference „Development and application of missile technologies in Poland - a new opening”. The aim of the event will be to present the achievements and potential of national research and industrial entities associated with missile technologies and to indicate areas of interest of the Polish Army in this field. The conference is supported by the Ministry of Enterprise and Technology See the conference program: https://polsa.gov.pl/images/konferencja_rakietowa_2019/Pierwsza_konferencja_rakietowa-agenda.pdf

Prof. Rogatko to hold a lecture at the Maria Curie-Skłodowska University about the first photo of the black hole

2019-04-16

Professor Marek Rogatko from the Department of Astrophysics and Theory of Gravity of the Maria Curie-Skłodowska University (UMCS) in Lublin invites all interested students to an open lecture entitled „Darkness, I see darkness - the first photo of a black hole”. The lecture will take place on April 16 at 17:00 in the Hall of the Institute of Physics UMCS. For the first time in the history of high-energy astrophysics, we managed to take a photo of a black hole located in the center of the M87 galaxy, 55 million light-years distant from us. The black hole itself has a mass of about 6.5 billion solar masses. Photographs and data needed for them were provided by researchers from the Horizon Telescope of Event (EHT), belonging to the European Southern Observatory (ESO). The lecture will present issues related to the scenes and the possible consequences of taking this unique photography, which focused the attention of all global media.

„Vis Moot Team Silesia” joins

the prestigious arbitration competition in Hong Kong

2019-04-16

Students of the Faculty of Law and Administration of the University of Silesia participated in the prestigious commercial arbitration competition „The Willem C Vis (East) International Commercial Arbitration Moot” in Hong Kong. Agata Zwolankiewicz and Olga Marcinkowska joined the 32 best teams. 137 teams from around the world participated in this year's competition. Topics concerned international commercial arbitration and commercial law, with particular reference to the Vienna Convention on Contracts for the International Sale of Goods of 1980. The team «Vis Moot Team Silesia» was the only Polish representation and the first in the sixteen-year history of the competition. The team from the University of Silesia advanced to the final rounds defeating 105 teams from around the world and joined the prestigious group of 32 best representations of the universities. In the individual category, Agata Zwolankiewicz received the distinction «Honorable Mention for Best Oral Advocate».

Representation of the University of Economics in Katowice wins the Global Management Challenge Poland

2019-04-16

The team of the University of Economics in Katowice

„GoldenEye” won the national stage of the Global Management Challenge competition and will represent Poland during the competition for the World Championship in Business Management in Russia. The Global Management Challenge is the world's largest business simulation and an extensive strategic game based on gamification. Its participants are managers, specialists, students who play the role of a virtual company's board. Their task is to manage the company so that it reaches the best financial result on the virtual market. The project has been organized since 1980 in the form of nationwide on-line competitions in nearly 40 countries. In the world, the initiative gathered over half a million participants. In Poland, since 2000, it has already been attended by over 27 thousand people from companies and universities. Organized by BGRAM S.A. Polish competition is one of the largest in the world. More: https://www.ue.katowice.pl/no_cache/uczelnia/aktualnosci/article/reprezentacja-ue-katowice-zwycieza-global-management-challenge-poland.html

Scientists of the University of Life Sciences in Wrocław to examine the grave of the victims of the battle of Kunowice

2019-04-16

Researchers from the Anthropology Department of the Wrocław University of Environmental and Life Sciences will join the preliminary study of the mass grave of the victims of the battle of Kunowice run by Prof. Grzegorz Podruczny - a military historian from the Adam Mickiewicz University in Poznań. Kunowice is a small town near Słubice. In the middle of the 18th century, a battle took place there, in which 11,000 soldiers were killed. The Prussian army led by Frederick II and the allied Austrian-Russian army under the command of field marshal Piotr Sałtykow fought against each other. The battle was described at the beginning of the 20th century, but research run by Prof. Podruczny indicates that German historians have made mistakes, including designating the area on the battle. - Until now, there was a belief among military historians that in the 18th centu-

ry hand grenades were not used. But the research conducted in the area where the Battle of Kunowice took place denied that assumption - says Prof. Podruczny. More: http://www.glos.upwr.edu.pl/aktualnosci/49242/upwr_pomaga_w_badaniach_archeologicznych.html

Ignatianum Academy in Krakow to hold a conference summarizing the program „Polonia Restituta”

2019-04-17

The Ignatianum Academy in Krakow on 29 April 2019 will hold an international conference within the program „Polonia Restituta”. This will be the last of the meetings under „Decalogue for Poland on the 100th Anniversary of Independence” project. The originators of the Polonia Restituta program are the Ministry of Science and Higher Education and the Council for Social Affairs of the Polish Episcopal Conference. The Krakow conference will sum up the whole project, which consisted of 9 thematic conferences devoted to such issues as: family, work, entrepreneurship and social market economy, citizenship and patriotism, freedom, sovereignty and the rule of law, ecology, social solidarity and sustainable development, dignity and justice social, Europe and reconciliation, culture and identity, human personality, its rights and obligations. The event will be attended by Cardinal Peter Kodwo Appiah Turkson, Prefect of the Vatican Dicastery for Integral Human Development.

Students of the Wrocław University of Science and Technology to fly to the USA for the University Rover Challenge 2019

2019-04-17

Students of the Wrocław University of Technology

qualified for the races of the University Rover Challenge 2019 Mars rovers, which will take place in the USA at the turn of May and June. In the final they will compete with 35 teams from all over the world. Students will present their Scorpio X rover. The design has all-wheel drive, each powered by a separate engine. The rover's tires are made of cordura and filled with a special foam. This is the original solution of Wrocław constructors. The construction of the rover was made largely of light materials - aviation aluminium and polyamide. Scorpio X has a modular structure, which allows users to attach additional elements to it and modify any existing components. The University Rover Challenge has been organized for thirteen years and the rivalry takes place in the desert of Utah, at the Mars Desert Research Station. This is one of the largest and most important international races for Mars rovers. More: <https://pwr.edu.pl/uczelnia/aktualnosci/lazik-scorpio-na-zawody-w-usa-11163.html>

Koszalin University of Technology to hold a conference on the phenomenon of beauty in advertising

2019-04-17

Student Scientific Society „Badamy Reklamę” and the Department of Social Communication and Journalism of the humanities department of the Koszalin University of Technology are inviting participants to the scientific conference „Areas of advertising II. Beauty in advertising.” This is the second conference on various aspects of advertising activities, dedicated to the phenomenon of beauty in advertising. The meeting will be an opportunity to reflect on the harmfulness of broadcasters using promotional solutions based on beautiful, perfect images. This issue is important in the context of numerous manipulations in this area, which repeatedly led to the bans on broadcasting specific ads. The organizers invite representatives of various scientific fields, including anthropologists, cultural experts, linguists, philosophers, media experts, sociologists, pedagogues, biologists, art theoreticians and historians, and advertising communication practitioners to run their presentations.

Scientists from the Lublin University of Technology receive gold and silver medal at the exhibition of inventions in Geneva

2019-04-18

The adjusting mechanism of a single-screw extruder adjustable barrel and a mobile plasma device won medals at the 46th International Geneva Invention Exhibition, which took place in Switzerland on April 10-14, 2019. The adjusting mechanism of a single-screw extruder adjustable barrel was awarded a gold medal. This is the solution of scientists from the Lublin University of Technology and Portugal, developed as part of the Newex project. Prof. Joanna Pawłat and young scientists Eng. Michał Kwiatkowski and Eng. Piotr Terebun from the Department of Plasma Technologies and Renewable Energy at the Faculty of Electrical Engineering and Computer Science of the Lublin University of Technology constructed a mobile device for plasming for the needs of agriculture and the food industry. The invention won the silver medal.

23rd Scientific Picnic of

the Polish Radio and the Copernicus Science Center

2019-04-18

On May 11, 2019 at the PGE National Stadium in Warsaw, the 23rd Science Picnic of the Polish Radio and the Copernicus Science Center will be held under the slogan „Machines and us”. The Science Picnic of Polish Radio and the Copernicus Science Center is the largest popular science event in Europe. This year, the stadium's space will be divided into 7 thematic zones: Zone of the Future, Health Zone, DIY, Family Zone, Zone of Civilizations, Zone of Cult Experiments, Area of Foreign Guests, with almost 1000 shows. The picnic is addressed to all people interested in science and also who have not yet been fascinated with scientific discoveries.

Maria Curie-Skłodowska University in Lublin to hold International Earth Day

2019-04-18

The Faculty of Geosciences and Spatial Management together with the Artistic Department of the Maria Curie-Skłodowska University (UMCS) in Lublin for the twelfth time are organizing the International Earth Day connected to the National Geographic Day. The World Earth Day, taking place on April 26, 2019, is a worldwide campaign to promote ecological attitudes by events organized in spring in many places. The organizers prepared dozens of attractions for the viewers. Thanks to the lecture «Whose trace is this?», the participants will learn what traces are left by both animals and plants. The topics also include lakes and their greatest secrets, natural medicines and cosmetics as well as ordinary / unusual H₂O. More: www.dzienziemi.umcs.pl

PhD student from the University of Life Sciences in Wrocław receives a bronze medal in Geneva

2019-04-18

Ewa Kozłowska, PhD student at the University of Life Sciences in Wrocław, won a bronze medal and

a special prize of the University of King Abdulaziz from Saudi Arabia during the 47th International Exhibition of Inventions in Geneva. The laureate uses entomopathogenic filamentous fungi to biotransformation of steroid hormones to attack insects. The spore falls on the insect, germinating through the chitin armor, begins to grow and gradually kills the insect - says Kozłowska. The same fungi carry out complicated, cascade transformations of hormones: DHEA -prehormone, which is transformed in the human body into male and female sex hormones and has a big impact on the vitality, physical and mental condition of man and progesterone and estrone. As a result of biotransformation, the PhD student obtained the compounds that can be used in the treatment of autoimmune, cancer, allergic disease or organ transplantation. XIX Festival of Science and Art in Krakow

2019-04-19

On May 16-18, 2019, the 19th Festival of Science and Art will be held in Krakow. The motto of this year's event is „The future in science. Science in the future. „ The event organized by Kraków's universities together with the institutes of the Polish

Academy of Sciences is to provide the popularization of science and art, as well as the presentation of scientific and artistic achievements. The festival is also an opportunity to show the practical benefits of scientific progress and its impact on the quality of life. From 16 to 18 May at the Main Market Square in Kraków, the Festival Scientific Town will include shows, competitions, presentations and experiments. This year, for the first time, there will also be a „Scientific Cafe“, where all interested viewers will be able to listen to interesting lectures, meet with scientific figures, and take part in discussions and debates.

First Silesian Scientific Stand Up

2019-04-19

On 24th April Center for Popularization of Science of the Silesian University of Technology (CPN) invites participants to the Student Club Spirala on the First Silesian Stand Up. Eight scientists from the Silesian University of Technology, the University of Silesia and the Institute of Oncology in Gliwice will perform scientific stand ups. - Such events are organized in the world, in Poland the scientific stand up is just beginning to function in the awareness of popularisers. It requires not only a sense of humor, but also a great courage and distance to yourself. Can Silesian scientists do it? Let's check it out! - says Prof. Aleksandra Ziemińska-Buczyńska, director of CPN. The First Silesian Stand up in Science invited Dariusz Aksamit from the Faculty of Physics at Warsaw University of Technology, the winner of this year's Promotor of the Year award in the Animator category. The event will be hosted by Antoni Syrek-Dąbrowski - comedian, improviser and screenwriter from Stand Up Polska. University of Poznan to hold a scientific conference: Universities in search of excellence

2019-04-19

The Adam Mickiewicz University in Poznan (AMU) invites participants to the international scientific conference „Universities in search of excellence“ on May 6. The conference will be attended by eminent scientists and honorary doctors participating in the conference organized on the occasion of the 100th anniversary of the University. During the conference, outstanding personalities of science will talk about their path to excellence, including honorary doctors of Poznań universities, professors: Béla Bollobás, Cheong Byung-Kwon, Andrzej Dubas, Krzysztof Matyjaszewski, Peter Nijkamp, Maria Szymionowa and Hans Wolfgang Spiess. The program also includes awarding the UAM Foundation's Prize «Excellence in Science - Usability in Practice.» The competition was dedicated to all those who during the Jubilee Decade UAM 2009-2019, pursuing their research and scientific activities, actively and socio-economic benefit combined science with business.

„Level of masculinization as a signal of male antioxidant potential“ - a study by the University of Wrocław

2019-04-19

Researchers from the Department of Human Biology at the University of Wrocław are starting new research in the framework of the project „The level of masculinization as a signal of men's antioxidant potential“, financed by the National Science Center. The main goal of the study is to test whether facial and body characteristics in men, depending on the testosterone level, are related to the health and general condition of the body. Researchers are looking for healthy men, aged 30-40, willing to participate in the study. Both active men and those who do not engage in physical activity can take part in the project. Participating in the study is a great opportunity to get to know their bodies, check-up, perform a number of free tests and measurements, and help Wrocław scholars carry out interesting and innovative research in the field of evolutionary biology. State Higher Vocational School in Tarnów to organize a conference on entrepreneurship in the 21st century

2019-04-23

The Institute of Administration and Economics of the State Higher Vocational School (PWSZ) in Tarnów and the Student Science Club (SKN) The Manager invite participants to the 8th SKN scientific conference. The motto of this year's event is Entrepreneurship in the 21st Century. The conference will take place on April 24, 2019. The purpose of the meeting is to exchange views, present experiences and spread knowledge about the development of the sector of small and medium enterprises. - The conference is addressed to academic teachers, representatives of local government and government administration cooperating with vocational colleges, practitioners, and above all to students associated in scientific clubs and all persons interested in the development of the sector of small and medium enterprises - announces Barbara Partyńska-Brzegowy, coordinator for academic entrepreneurship.

International archaeological conference in Lublin

2019-04-23

The Institute of Archeology of the Maria Curie-Skłodowska University (UMCS) and the Lublin Museum are organizing on April 25-26, 2019, the XXXV international conference entitled „Archaeological research in Central and Eastern Poland,

Western Belarus and Ukraine”. The conference is a forum for the exchange of experiences of archaeologists and other specialists from other fields of science from Poland, Belarus, Moldova, Russia and Ukraine. They will present the latest results of archaeological, mostly interdisciplinary researches. During this year's event, three lectures will be delivered in the plenary session and over thirty papers in two (prehistoric and early-historical), sections and about twenty posters will be presented. The participants of the conference represent several dozen scientific institutions- universities, research institutes and museums from Poland and abroad.

University of Wrocław to hold a conference on the 100th anniversary of the Lower Silesian prison system

2019-04-23

The University of Wrocław, the Lower Silesian Prison Service and the Wrocław branch of the Institute of National Remembrance are inviting participants on 25 and 26 April to the conference „From isolation to resocialization. 100 years of prison history in independent Poland. Selected aspects .. The aim of the project is to commemorate the 100th anniversary of the Prison Service, which since the first days of Poland's independence has fulfilled an extremely important role in the state security system and propagation of knowledge about prisons, as well as exploring the history of the Prison Service and imprisonment. A common base that brings together practitioners and scientists are issues related to the history of penitentiary and execution of sentences in various historical approaches. Speakers will present issues related to the founding of prisons, their architecture, as well as a number of aspects regarding the treatment and fate of prisoners during the war as well as the years of Stalinism.

Student of the Warsaw University of Technology won the Stena Circular Economy Award

2019-04-23

Anna Kozieł, a bioeconomy student of the Faculty of Building Installations, Hydrotechnics and Environmental Engineering at Warsaw University of Technology (PW), won the Stena Circular Economy Award competition, promoting the idea of a circular economy. Her idea regarding education in the field of waste segregation was considered the best in the «Student» category. Her project «The missing mark on the packaging» assumes the creation of a system of product labels, which would help consumers to properly segregate waste. Symbols will be placed on the packaging informing to what waste container the waste should be placed. The competition is organized by Stena Recycling.

House of Polish Culture in Vilnius to hold the scientific conference „From the Union of Lublin to the European Union”

2019-04-24

From the 25th to the 27th of April 2019, the 6th International Interdisciplinary Scientific Conference entitled “From the Union of Lublin to the European Union” (historical, socio-political, legal and cultural aspects) will take place in the House of Polish Culture in Vilnius, Lithuania. The conference is organized by the Association of Lithuanian Poles Scientists (SNPL). The partners of the conference are Aleksander Gieysztor's Akademia Humanistyczna in Pułtusk, Faculty of Economics and Information Technology in Vilnius, University of Białystok, European Federation of Polonia Scientific and Technical Associations, House of Polish Culture in Vilnius. The conference aims to analyze the Lublin Union's conclusion 450 years ago and its impact not only on the development of the Polish-Lithuanian Commonwealth, but also on contemporary geopolitical relations in Europe. It will be attended by 120 participants from Poland, Lithuania, Germany, Great Britain, the Czech Republic, Italy, Ukraine and Belarus.

Professor Wiktoria Śliwowska becomes Doctor Honoris

Causa of the Jan Kochanowski University in Kielce

2019-04-24

On April 25, 2019, the Senate of the Jan Kochanowski University (UJK) in Kielce will award Professor Wiktoria Śliwowska with the title of Doctor Honoris Causa UJK. Wiktoria Śliwowska in the years 1949-1953 studied at the State Pedagogical Institute in Leningrad. In 1953, she started working at the Institute of History at the Polish Academy of Sciences in Warsaw, where in 1960 she wrote her PhD thesis entitled «Pietraszow's case», and in 1971 she received a postdoctoral degree. In 1994, Wiktoria Śliwowska received the title of professor of humanities. Professor Śliwowska has published several hundred publications, including books translated into Russian, German, English and Spanish. Her main current interests include the history of Russia in the nineteenth century, the «Polish Siberia», both in terms of the extermination of participants of the independence movements in the nineteenth century, and the times of the Stalinist gulags.

Criminologists from Cambridge to participate in European Legal and Pharmaceutical Congress in Bialystok

2019-04-24

On June 7, 2019 in Bialystok, Medical University of Bialystok, Medical University of Silesia in Katowice

and Institute of Criminology at the University of Cambridge are organizing the European Legal and Pharmaceutical Congress dedicated to the problem of falsification of medicinal products. The event will be attended by representatives of the United Nations, law enforcement and justice, the National Medicines Institute, the Euroregional Center of Pharmacy, as well as foreign and Polish universities. The issue of the conference is extremely current, especially in the situation of increasing crime related to falsification of medicines and dietary supplements. Every second drug purchased on the Internet is a fake. Forging medicines is a source of income for organized criminal groups and a serious threat to the life and health of consumers.

Researchers from the University of Silesia appreciated in Geneva

2019-04-24

The invention of scientists from the department of computer science and materials science at the University of Silesia in Katowice was appreciated during the 47th International Exhibition of Invention, Modern Technology and Products „Geneva Inventions”. Dr Paweł Janik, Eng. Michał Pielka and Dr Małgorzata Janik won a bronze medal awarded by an international jury, as well as a special award from the National Council for Scientific Research of Thailand for developing a broadcasting method for Bluetooth Low Energy transmitters. The invention was applied in the breath monitor - a multifunctional device allowing to control various parameters related to the respiratory system and locomotor activity, such as strength or frequency of the breath, as well as the pulse and the change of the child's body position, for which the whole system was created. «Geneva Inventions» is one of the biggest European events, during which inventors from around the world meet with representatives of industry and business.

20th competition for the Fiat Chrysler Automobiles Award

2019-04-24

PhD dissertation and 5 Master's theses of the stu-

dents of the Silesian University of Technology were awarded in the 20th Competition for the Fiat Chrysler Automobiles Awards. The gala ceremony took place in the Senate Hall of the Academy of Technology and Humanities in Bielsko-Biała. The jury rewarded Przemysław Snopiński's dissertation and master's theses of Jakub Hyla, Pola Gwiaździńska, Danuta Zajęc, Kamil Miesiączka and Krystian Molas. The awards were also received by 6 students from the Academy of Technology and Humanities. The first competition took place in 1997 as one of the activities of the framework agreement on scientific and technical cooperation and training between the Fiat Research Center - Fiat Polska and the Warsaw University of Technology as well as the Silesian University of Technology. In the second competition, in 1998, it was joined by the University of Technology and Humanities in Bielsko-Biała - at that time as a branch of the Lodz University of Technology. In the 20 competitions, a total of 358 works from all three universities were awarded.

Students of the Wrocław University of Technology developed a project of the Martian colony for the Mars Society competition

2019-04-24

Students and PhD students under research initiative „Space is More” and the Scorpio Project with the help of members of the MOS Scientific Circle and the LabDigiFab initiative of the Wrocław University of Technology have prepared a Mars base project for the contest announced by the Mars Society. The competition task was to create a Martian colony project for a thousand people. The designed housing estate must be economically self-sufficient. It should import as little as possible of goods from Earth, and at the same time produce goods for export, in order to have earnings. Wrocław constructors named their colony «Twardowsky». They have been working on it since October, and on the last stage of the work the whole group spent in the Lunares Research Base, where they elaborated their solution in the smallest details. The authors of the best projects will receive prizes - 10, 5, and 2.5 thousand dol-

lars. In addition, the top 20 works will be published in the book «Mars Colonies: Plans for Settling The Red Planet». More: <https://pwr.edu.pl/uczelnia/aktualnosci/studenci-pwr-opraca-projekt-marsjanskiej-kolonii-dla-tysiaca-mieszkancow-11173.html>

University of Lodz to hold the scientific conference „On the centenary of policy and sport relationships”

2019-04-25

The Team for Political Research on Sports in the Department of Political and Political Theory of the Faculty of International and Political Studies of the University of Lodz are organizing on May 6, 2019 an interdisciplinary scientific conference „On the centenary of policy and sport relationships”. What were the determinants of the links between sport and politics? Can the phenomenon of sport politicization be placed within a given geographic and temporal framework? How did politics affect sports in the past and how is it happening today? The participants will discuss those issues at the conference, which will take place at the Municipal Stadium in Łódź. Due to the interdisciplinary character of the conference, the organizers are inviting not only political scientists, but also representatives of other disciplines and specialties in the humanities and social sciences, as well as specialists in physical culture and sports journalists.

Polish government visited the National Center for Nuclear Research

2019-04-25

Receiving 3 of the 13 European Union grants in the Teaming for Excellence competition for the establishment of Centers of Excellence, including the NOMATEN project implemented by the National Center for Nuclear Research (NCBJ) in Świerk, was the

subject of a talk between Prime Minister Mateusz Morawiecki and Deputy Prime Minister Jarosław Gowin with management and scientists of NCBJ. The NOMATEN project aims to create a strong research center that will conduct research and prepare the production of top-class innovative materials useful for work in extremely difficult industrial conditions and complying with the highest medical standards, using the unique nuclear research structure and experience of scientists from Poland and other European countries. The project was prepared by an international consortium composed of: the National Center for Nuclear Research (NCBJ), Commissariat à l'Énergie Atomique et aux Énergies Alternatives (CEA, France); Teknologian Tutkimuskeskus VTT Oy (VTT, Finland).

Jagiellonian University to hold XI Days of American Culture

2019-04-25

The Scientific Club of American Studies of the Jagiellonian University in Krakow in cooperation with the International Migration Club of the Jagiellonian University and the Institute of American Studies and Polish Diaspora of the Jagiellonian University are inviting participants to the XI American Culture Days - students and PhD students scientific conference. This year, the organizers are planning to focus on those parts of the history of the United States, which Americans prefer not to talk about, and history would prefer to forget. To understand the problems plaguing the USA, the participants of the conference will address uncomfortable, embarrassing pages of USA's history. The speeches presented at the conference are to deal with such issues as: consequences of American military interventions, criticism of American political culture, criticism of American culture, criticism of entertainment industry, problems of ethnic, racial and national minorities, problems related to social care and education.

Polish Academy of Sciences to organize the „ERC Mentoring Initiative” workshop in Vienna

2019-04-25

The Institute of Human Sciences (Institut für die Wis-

enschaften vom Menschen - IWM) and the Polish Academy of Sciences (PAN) are organizing the „ERC Mentoring Initiative” workshop in Vienna from 14 to 15 June 2019. The event is supported by the Ministry of Science and Higher Education. The workshops are aimed at researchers representing humanities and social fields who plan to apply for grants from the European Research Council (ERC) Starting and Consolidator, i.e. from 2 to 7 years and from 7 to 12 years after receiving the PhD title. The grants will be allowed to refine the concept of a research project that the researcher intends to present in the ERC project application. Candidates for ERC grants will have the opportunity to present the research idea and consult it with invited experts. The workshops will be conducted in English. Registration for the workshop is possible until May 19 via the online form available at: <https://forms.gle/GXvtSoY7rojHfhC4A>

Graduates of the University of Lodz awarded for the best macroeconomic analyzes

2019-04-26

Tomasz Koška, Karol Rybaczuk and Michał Zygmunt, graduates of the University of Lodz (UŁ) creating the Prognozy-gospodarki.pl team, won in the 11th competition for the best macroeconomic analytics organized by the journals Parkiet and Rzeczpospolita. - We have participated in this competition since 2012, as a member of the Student Scientific Society for Economic Analysis and Forecasting «4Future» at the Faculty of Economics and Sociology of the University of Lodz. - explains Karol Rybaczuk. - In 2016, after completing studies we decided to continue our participation. The competition for the best macroeconomic analytics has been organized since 2007. The competition is open to all who want to test their analytical skills: economists from financial institutions and research centers, independent experts, as well as scholars and students.

Researcher from the Maria Curie-Skłodowska University in Lublin receives the prize „Helion International 2019”

2019-04-26

Dr Magdalena Grabias from the Department of Visual Culture of the Maria Curie-Skłodowska University (UMCS) in Lublin has been awarded the „Helion International 2019” for her contribution to the development of science and culture. The International Association of Culture Helion is an organization established in Timisoara, Romania in 2010. It brings together writers and researchers of science fiction and fantasy subjects, and continues the thirty-year activity of the Helion Club. The Helion Cultural Association is the organizer of the annual scientific conferences entitled: «Frontiers of the Possible: Borders and Openings in Speculative Fiction», operating with the support of the City Council and the Western University of Timisoara.

University of Economics in Wroclaw to hold a conference „Shaping competences in the digital economy”

2019-04-26

The University of Economics in Wroclaw invites participants on May 8 to the conference „Shaping competencies in the digital economy” implemented un-

der the Open Eyes Economy on Tour 2019 program. The university is a co-organizer of the event. The conference will be devoted to the shaping of competences in the digital economy and the challenges posed by the current situation on the labor market. Digital transformation of enterprises brings enormous challenges for enterprises, transforming their business models, eliminating old professions and shaping new ones, as well as for universities, leading to building new competence profiles for future employees. The conference is addressed to research and teaching staff, students, representatives of labor market institutions and entities dealing with education, as well as to all people interested in how to adapt to the changes.

Silesian University of Technology to accept applications for the Stock Exchange School

2019-04-26

The Faculty of Organization and Management of the Silesian University of Technology together with the Warsaw Stock Exchange Foundation invite students interested in investing to the Stock Exchange Schools courses. The courses are addressed to beginners and intermediate students. Stock Exchange School is intended for people who are making their first steps on the capital market. It presents the market in a comprehensible, reliable and practical way. It shows that the stock exchange is also a great place to start long-term savings. The lecturers at the Stock Exchange School are practitioners and capital market specialists as well as academic employees. The courses will be organized on two levels: Fundamentals of investing on the stock exchange - May 11-12 and September 7-8, and the Stock Exchange for Intermediate - June 22-23 and September 28-29, 2019.

Poznań Foundation for Clean Energy to hold a conference on photovoltaics, electromobility, energy storage

2019-04-26

The Foundation for Clean Energy invites participants from 29 to 31 May to Poznan for the VIII Scientific and Training Conference „Photovoltaics, electromobility, energy storage - towards a new energy policy”. The conference will be devoted to good practices in the implementation and design of photovoltaic installations and the directions of changes in the Polish renewable energy sector. The organizers of the conference are the Institute of Electrical Power Engineering of the Poznan University of Technology, the Workshop of Energy Policy and Security of the University of Zielona Góra and the Faculty of Political Sciences and Journalism of the Adam Mickiewicz University in Poznań. The organizers are planning to discuss proper installation of solar installations, their marking, measurements, reception and safety; lightning and surge protection, presentation of technical solutions and storage of electricity from photovoltaic installations.

University of Silesia to hold a discussion panel on „Family mediation in the judiciary and practice”

2019-04-29

The Silesian Center for Arbitration and Mediation, operating at the Foundation of the Faculty of Law and Administration of the University of Silesia, „Facultas Iuridica”, invites participants on May 15 to the panel discussion „Family mediation in the judiciary and practice”. The event is organized as part of the nationwide project «Arbitration and Mediation Centers» coordinated by the Ministry of Justice. It is to provide the exchange of knowledge and experience between the judges of civil departments of the Katowice appeal and mediators and improve the course of mediation in family matters. Meeting in the Council of the Faculty of Law and Administration of the University of Silesia in Katowice, ul. Bankowa will take the form of an open discussion. Confirmation of participation can be submitted by May 6 via email: mediacje@us.edu.pl

Polish archaeologists discovered a mosque on the

Faylak island of Kuwait

2019-04-30

The Kuwaiti-Polish team of archaeologists led by Dr Agnieszka Pierkowska from the Center of Mediterranean Archeology of the University of Warsaw (CAŚ UW) discovered the ruins of a monumental mosque on the island of Faylak in Kuwait. According to their estimates, the building was erected in the late Islamic period (XVI-XIX centuries). During this year's excavations, the Kuwaiti-Polish archaeological mission found the remains of a monumental mosque in the north-eastern part of the large Faylak island in the Persian Gulf. Its outline is a square about 20 meters long. The building consists of a large courtyard (almost 200 m²) leading to the main hall with dimensions of 17 to 7 meters. In the hall, the scientists have discovered remains of four large pillars supporting the roof.

Steelworker's Day to be held the Academy of Mining and Metallurgy in Kraków

2019-04-30

On May 8-10, 2019, the AGH University of Science and Technology in Krakow will hold this year's celebration of the Steelworker's Day. As part of the ceremony, an international scientific conference

«Innovations in Metallurgy and Materials Engineering» and the 56th Conference of Students' Scientific Circles of the AGH UST Metallurgy Division will be held. The event will start on Wednesday, May 8 with a holy mass for the scholars and students of the Faculty of Metal Engineering and Computer Science AGH, and it will close with the celebration on Friday, May 10 will be a solemn meeting of the AGH UST Senate, followed by a metallurgical oath ceremony.

Films about human rights to be shown at the festival in Katowice

2019-04-30

The Scientific Association „ Włacznik” operating at the Faculty of Pedagogy and Psychology at the University of Silesia in Katowice invites participants on May 7 and 8 to the 17th WATCH DOCS Film Festival. Human Rights in the film”. The program includes screenings of films from around the world that deal with human rights. They will be accompanied by meetings with invited guests, discussions and lectures prepared by scientists from the University of Silesia in Katowice. The program includes a discussion panel on counteracting hate speech and workshops for students «On the trail of prejudices. Anti-discrimination workshops». The official opening of the festival will be attended by the university and faculty authorities, as well as the Ombudsman for Human Rights Dr Adam Bodnar and director of the WATCH DOCS International Film Festival, Maciej Nowicki, vice president of the Helsinki Foundation for Human Rights. The festival program is available at: www.wlacznik.us.edu.pl

Dr Eng. Andreas Glenz to receive award of Society of Friends of Silesia 2019

2019-04-30

Dr Eng. Andreas Glenz, a member of the first Council of the University of Silesia in Katowice, was awarded the Society of Friends of Silesia Prize. The distinction is awarded to people or institutions especially

meritorious for Silesia. Andreas Glenz is a doctor of technical sciences in the field of automation and robotics. He dealt with creating new measurement and research techniques in the field of nanotechnology and building individual scientific and research equipment for various institutes in the world. He cooperated with many scientists, including Nobel Prize winners. The prize of the Society of Friends of Silesia is «Ślązaczka» - a sculpture by Prof. Piotr Gawron, depicting a bust of a girl in a folk costume, with an apple in his outstretched hand. So far, the sculpture was awarded to Prof. Jan Miodek, Kazimierz Kutz, Wojciech Kilar, Krystyna Loska and the National Polish Radio Symphony Orchestra in Katowice.

Polish Society for Social Communication award Jakubowicz Prizes

2019-05-02

The Polish Society for Social Communication elected the winners of the second Karol Jakubowicz Prizes. The prizes were awarded to Dr Małgorzata Adamik-Szysiak from the Journalism Department of the Maria Curie-Skłodowska University in Lublin for the book „Strategies for communicating political subjects in Poland in social media” and Dr Maria Łoszevska-Ołowska from the Department of Media Law at the University of Warsaw for the work „Prohibition of publishing data and the image of public figures suspected or accused of a crime in the press”. Karol Jakubowicz Media and Democracy Prize has been granted since 2017 on the initiative of the Małgorzata Semil-Jakubowicz foundation with the support of the Polish Society of Social Communication. The aim of the Prize is to commemorate an outstanding researcher and media practitioner, an expert of the State Radio and Television Council, UNESCO, chairman of the Management Committee for Media and New Communication Services of the Council of Europe.

University of Silesia to hold seminar on the works of Edmund Niziurski

2019-05-02

On 15 May, the Department of Literary Theory of the Institute of Polish Literature, Faculty of Philology at the University of Silesia in Katowice and the Historical and Literary Commission of the Polish Academy of Sciences - Branch in Katowice invite participants to the scientific seminar „What’s left after Niziurski?”. Edmund Niziurski’s prose left a permanent mark on Polish youth literature. This popular author even in the gloomy communist Poland offered the young readers a lot of amazing adventures. However, the recognition for each writer lasts as long as people remember his works. Niziurski, who wrote from the mid-1950s to the mid-1990s, may turn out to be a writer who is out of date today. Hence the question mark is put in the title of the seminar. The seminar is supported by the Polish section International Board on Books for Young People and it is addressed to scholars, PhD students and students.

Wrocław University of Environmental and Life Sciences to hold ecology workshops

2019-05-02

Wrocław University of Environmental and Life

Sciences organizes specialized workshops as part of the project „People for Nature - Nature for People. Coexistence instead of competition in the Lower Silesian Natura 2000 areas.” The workshops will be conducted by experienced scientists, specialists and trainers. The aim of the project is to popularize and shape pro-ecological attitudes, raise public awareness of the need to protect the most valuable areas of biodiversity conservation, present the heritage and natural diversity of Poland on the example of the Lower Silesian Voivodship, as well as education in the areas of protected areas. The themes of the May workshops in Krośnice, Kowary and Bukowice are estimating the value of the environment using the concept of valuation of ecosystem services in the Natura 2000 areas and assessment of environmental impact within the Natura 2000 areas. More: <http://czlowiek-natura.upwr.edu.pl/>

Researchers to examine the health condition of the Wrocław inhabitants at the beginning of the industrial revolution

2019-05-02

The Department of Anatomy of the Department of Human Morphology and Embryology at Medical University in Wrocław has established a new laboratory. It will be run by Dr Paweł Dąbrowski, who has been involved in research at archaeological sites for over a decade. The studio was created for the implementation of a research project, as a result of which the health condition of Wrocław inhabitants at the beginning of the industrial revolution will be assessed. It will be possible thanks to the research of their bones. Applying appropriate research methods will allow to answer questions about the state of nutrition, professional activity, overload and living conditions of the former residents of the city. Dr Dąbrowski with his interdisciplinary scientific teams, studied teeth of representatives of the Homo neanderthalensis species from the Stajnia cave, thanks to which he knew what diseases they suffered from, how they cared about oral hygiene and what people were eating hundreds, thousands and tens of thousands of years ago. More: [https://www.umed.wroc.](https://www.umed.wroc.pl/gu-wez-moje-kosci)

Copernicus Science Center to launch # KochamNaukę - a nationwide campaign

2019-05-06

The Copernicus Science Center (CNK) in Warsaw is the initiator of the nationwide campaign # KochamNaukę. It invites scientists, science promoters, politicians, public figures and journalists, and ordinary people, to say for what they love science or what science is for them. The whole action is primarily about the role of science in Poland to grow and that more and more people have positive associations with it. In order to take part in it, it is enough to answer one of two questions with a short video or text: For what I love learning? What is science for me? The answer should be short, personal and simple. Recorded video, or post with text and photo, share on social media until May 11, 2019 with the note: # KochamNaukę. More: <http://www.kopernik.org.pl/projekty-specjalne/kochamnauke/>

Robot controlled by thoughts presented at the 23rd Science Picnic in Warsaw

2019-05-06

Participants of the 23rd Science Picnic, visiting the stand of the Polish-Japanese Academy of Information Technology (PJATK) on May 11, 2019, will be able to direct the robot with their thoughts or to produce traditional Japanese flip-flops in an eco-friendly manner. The Science Picnic is the largest scientific outdoor event in Europe. Representatives of around 200 research institutions, universities, research institutes, museums and cultural institutions, foundations related to education and student clubs will present their achievements and reveal the secrets of their everyday work. One of the organizers will be the Polish-Japanese Academy of Information Technology. It will also present two shows: «Analysis of brainwaves for the needs of robot arm control» and «Traditional Japanese weaving workshop» at the National Stadium in Warsaw.

Maria Curie-Skłodowska University in Lublin to hold meetings with business practitioners

2019-05-06

The Scientific Club of the Austrian School of Economics of the Maria Curie-Skłodowska University (UMCS) in Lublin is organizing a series of meetings with business practitioners to promote the idea of entrepreneurship and show that economics is useful in everyday life. Organizers want to show how to combine the theory of economics with practical aspects of the business on the example of well-known brands. The first meeting «Brewery as business» will be held on May 7, 2019 at the Faculty of Economics of UMCS. The meeting will be visited by Piotr Piekarski, president of the board of the brewery Browar Jastrzębie. During the event, the participants will learn how to run a brewery business, how the company managed to obtain capital for development, and learn about the current market situation of craft beers and the company's development prospects.

University of Lodz to hold the 6th International Conference on the Philosophy of Language and Linguistics

2019-05-06

The Department of English Linguistics and the General Institute of English Studies of the University of Lodz is organizing the 6th International Conference on Philosophy of Language and Linguistics (PhiLang2019) on May 10-12, 2019. The conference, organized every two years, is devoted to the philosophy of language and linguistics and is addressed to linguists, philosophers, logicians, cognitive scientists, researchers interested in argumentation and communication, as well as the philosophy of mind and literature. This year's leading topics will concern the philosophical foundations of semantics and pragmatics, names in language and fiction, negating and denying processes, the significance of the Lvov-Warsaw school for contemporary philosophy of language, as well as the question of progress and development of language philosophy.

Torun scientist publishes an article in the leading scientific journal

2019-05-06

Rector of the Nicolaus Copernicus University in Toruń, Prof. Andrzej Tretyn awarded scholarships for highly-ranked scientific publications. One of the scholarship holders is Prof. Bogusław Buszewski from the Faculty of Chemistry. His article was published in the Chemical Reviews, one of the four best magazines in the world. The awarded publication «Column characterization and selection systems in reversed-phase high-performance liquid chromatography» (Chemical Reviews, Vol. 119 No. 6 2019. S. 3674-3729) « has been indexed in the Scopus and Web of Science Core Collection databases. The Chemical Reviews is a peer-reviewed scientific journal published by the American Chemical Society. It publishes review articles on current research topics in the field of chemistry. The monthly journal is included in the Philadelphia List. Its Impact Factor ISI is 52,613, which places Chemical Reviews in fourth place among the world's magazines according to InCities Journal Citation Reports.

III Congress of the Polish Society of Cryotherapy to be held in Wrocław

2019-05-06

The Polish Cryotherapy Society, the University of Physical Education in Wrocław and the Medical University of Silesia in Katowice are inviting participants to Wrocław on May 16 to the Third Congress of the Polish Society of Cryotherapy. The Congress will take place on the 30th anniversary of the creation of the first cryogenic chamber in Poland in 1989 at the Institute of Low Temperatures and Structural Research of the National Academy of Sciences in Wrocław. The event program includes the topic of cryotherapy applications in modern medicine and physiotherapy, as well as the possibilities that in modern cryotherapy can develop bioengineering and physics achievements. The lecturers are outstanding figures of cryogenics and cryotherapy, who agreed to share their knowledge and experience with the participants of the meeting.

Wrocław University of Science and Technology to hold VIII Meet-up Top500 Innovators

2019-05-06

The Association Top 500 Innovators and the Wrocław University of Science and Technology are inviting participants to the VIII Meet-up Top500 Innovators & Polish-American Innovation Bridge (PAMI) - a three-day conference for people interested in the latest technologies. The program includes discussion panels with the participation of the CEOs of startups dealing with advanced technologies in the Space, Med Tech, Bio Tech, Industry 4.0 areas. The participants will listen to the presidents and representatives of VIGO Systems, Bioceltix, Pure Biologics, ToopLoox, NestMedic, SDS Optic, Space is More, NeuroSys, AlphaMoon, SAT Revolution, Kell ideas, Bioavlee, Captor Therapeutics, Nysa, InferMedica, eMedica or Microscope IT. From 8 to 10 May the participants will discuss the issue of development of research and development areas in the light of new legal regulations. There will also be workshops on the methodology of solving complex problems, TEDex public speeches, industrial design and legal aspects of the development of technology companies. Scientific conference „Divided cities, divided islands”

2019-05-07

The Department of European Studies of the Institute of Political Studies of the Polish Academy of Sciences and Collegium Civitas, in cooperation with the Department of Political, Historical and Regional Geography of the University of Lodz, on 17 May 2019, are organizing a scientific conference in Warsaw's Palace of Culture and Science „Divided cities, divided islands”. During the conference, the political, social and economic situation of selected islands and cities divided by the state border as a result of various historical processes will be analysed. The organizers are particularly interested in how the divided regions manage in the 21st century in a world where borders disappear or do not play a major role in personal traffic and trade. The list of proposed divided cities includes Gubin, Zgorzelec, and the islands: the Cyprus or the Uznam (Świnoujście-Heringsdorf).

been launched for the fourth time. The Academy looks for candidates who have already experience as leaders and want to develop their competences. The program is addressed to people actively working in the business sector, education, non-profit organizations, public administration, media, culture and sports or in the startups. Applications can be sent until May 20, 2019. One of the partners to participate in the Academy is the Foundation for Polish Science. Classes that will be held in Poland and will be led by the lecturers of Harvard University and London Business School. Leadership Academy for Poland is the only program based on the unique 4D-Experience Leadership method. Participants are developing leadership competences in the leadership in the organization, understanding the motivation of employees, building long-term teams, management of the complexity of the environment and self-improvement, sources of motivation and relation to other people and the world). Rector of the Warsaw Academy of Special Education to hold a lecture at the Płock State Vocational School

2019-05-07

On 9 May 2019, Prof. Stefan Kwiatkowski will hold a lecture on Competences of the future - school, university, job market at the State Higher Vocational School in Płock. Professor Stefan Michał Kwiatkowski is the rector of the Academy of Special Education (APS) in Warsaw. He is also the head of the Department of Occupational Pedagogy and Andragogy APS, and Doctor Honoris Causa of the Pedagogical University named after National Education Commission in Krakow. The Rector of the Warsaw APS is the author of over 500 articles, as well as the author, co-author, editor and co-editor of 82 books, including such as: Vocational education - challenges, priorities, standards; School and the labor market; Continuing education. Theoretical and practical dimension; Educational leadership in theory and practice.

University of Wroclaw to fold

a conference “Sociology of disposable groups. Between the theory of social sciences and practice”

2019-05-07

The Department of Sociology of the Distribution Groups at the University of Wroclaw invites participants on 9 and 10 May to the XXX international scientific conference “Sociology of disposable groups. Between the theory of social sciences and practice”. The conference, which for almost three decades has been a place of engaged discussion on developing new perspectives of cognition and description of social reality, is addressed to scientific communities, local government and government administration, public institutions and non-governmental organizations and business representatives providing public safety. Discussions of participants have always focused on security aspects (co-modalities) that shape the practices of our everyday lives. The main considerations undertaken by scientists are always «dispositional groups» located in more or less institutionalized social spaces.

University of Economics in Katowice comes the third in the FINSIM Academic League competition

2019-05-07

The Bank Robber\$ team representing the University of Economics in Katowice took the third place in the FINSIM Academic League competition in 2018/2019. The seventh competition gathered 18 bank teams with nearly one hundred students from 16 Polish universities. The FINSIM Academic League is a training event using a simulation game - financial management of a bank. Participants, as the boards of virtual banks, work out one of the macroeconomic scenarios, and finally, learn how their decisions are translated into bank share prices on the FINSIM virtual stock exchange. - Robber\$ Bank was distinguished by its active approach to the bond market, where it was able to earn on successful operations. The bank bet on a short-term CD, maintained a good rating and as the first bank

Leadership Academy for Poland launched

2019-05-07

Leadership Academy for Poland, one of the best leadership development programs in Europe, has

focused its own shares. Acquisitions and high profits resulted in the highest of all teams profit per share (EPS) at the level of 14.20.

Lublin Maria Curie-Skłodowska University to hold a scientific conference on political participation in the modern world

2019-05-08

The Department of Political Movements at the Faculty of Political Science of the Maria Curie-Skłodowska University (UMCS) in Lublin is organizing on 8-9 May 2019 a scientific conference entitled „Political Participation in the Modern World.” The conference will be devoted to various forms of citizens' participation in exercising power at the local and national level, in Poland and in the world. The speeches will concern electronic voting, the crisis of representative democracy, Brexit or the way of communicating with the voters by the US President Donald Trump. Over 60 speakers will participate in the event, including scholars from the University of Warsaw, University of Adam Mickiewicz in Poznań, the Jagiellonian University in Krakow and the Cardinal Stefan Wyszyński University in Warsaw.

XVII Podlasie Festival of Science and Art

2019-05-08

The organizers of the 17th Podlasie Festival of Science and Arts have prepared over 500 events. The Festival will start in Białystok on May 20, 2019 and

will be continued in Łomża, Suwałki, Kleosin and even Vilnius, where there is one of the faculties of the University of Białystok (UwB). The motto of the Festival is «Algorithms of reality». Prof. Izabela Świącicka from the University of Białystok, chairwoman of the organizing committee, emphasizes that algorithms are ubiquitous in our lives. They rule on Wall Street, manage medical devices, associate friends on the Internet, they can create information, but also spread disinformation. Algorithms also help to create a virtual world. The program of the Festival includes workshops, presentations, lectures, scientific conferences and discussions, as well as performances, competitions, exhibitions and music concerts. There will be outdoor events, outdoor activities, educational games, experiments, medical examinations and demonstrations.

Opole University of Technology to hold Polish-German seminar

2019-05-08

The Fraunhofer Design Center for Advanced Light Technologies at the Opole University of Technology together with the Technische Universität Chemnitz and the Science and Technology Park in Opole are inviting participants to the Polish-German seminar „Composite production and recycling”. The program includes speeches by scholars from Polish and German scientific institutions and representatives of enterprises. The topics of the seminar are including production and environmental assessment of hybrid composites and structures with recycled plastic for vibration damping; recycling of duroplastic composites and preparation of polymer composites. The seminar, scheduled for 14 May, is addressed to representatives of science, industry, local governments and other interested entities and students. It will enable the exchange of experiences, mutual popularization of Polish and German solutions, and the initiation of future research projects. More information at: www.fpc.po.opole.pl

Pole nominated for the European Inventor Award 2019

2019-05-09

The European Patent Office (EPO) has announced nominations for the 2019 European Inventor Award. Dr Marta Karczewicz is one of 15 nominees, who throughout her professional career strived to create a technology that allows thousands of video files to be compressed without noticeable deterioration of image quality. The Polish inventor is one of the three finalists in the category of «Lifetime achievement». Hundreds of her inventions contributed to the streaming of high-quality movies, video conferencing and the use of virtual and augmented reality on mobile devices. Marta Karczewicz completed PhD studies and after several years of work in Nokia, she moved to San Diego in the United States, where in 2006 she started working at Qualcomm. Currently, she is the vice president Qualcomm Technologies. The winners of the European Inventors Prize 2019 will be announced on June 20 during the ceremony in Vienna. More: <https://www.epo.org/learning-events/european-inventor/finalists/2019/karczewicz.html>

Academic and Scientific Book Day in Białystok

2019-05-09

Jerzy Giedroyc University Library in Białystok and the Białystok Cultural Center are organizing the 3rd Book Academic and Scientific Day on May 11, 2019. The purpose of the event, which will be held in the Forum cinema in Białystok, is the promotion and presentation of the regional publishing market of academic and scientific publications. The Academic and Scientific Book Days will include the regional book fair providing Białystok and Podlasie institutions with opportunity to present their publications. During the event, there will also be a fair of doublets and books withdrawn from the collection of the Jerzy Giedroyc University Library in Białystok.

Warsaw University of Technology to hold Science Festival „Vertigo Weekend”

2019-05-09

The Faculty of Mathematics and Information Science of the Warsaw University of Technology will hold

the 7th Science Festival „Vertigo Weekend”. The «Vertigo Weekend» Science Festival is addressed to Warsaw and Warsaw school pupils. Its aim is to interest young people and children in various fields of science, broaden their knowledge in an interesting, understandable way. The festival will provide short lectures tailored to the age and knowledge of the listener. The lectures are conducted by members of scientific groups from Warsaw universities: Warsaw University, Warsaw University of Technology, Warsaw School of Economics, Warsaw University of Life Sciences, Warsaw Medical University and Cardinal Stefan Wyszyński University. See the event promoting video: [http://skolowanyweekend.pl/wp-content/uploads/2018/03/film-promuj%C4%85cy.mp4?_=1](http://skolowanyweekend.pl/wp-content/uploads/2018/03/film-promuj%C4%85cy.mp4?_=)

University of Gdańsk to hold a conference on the challenges of transport in the 21st century

2019-05-09

The Faculty of Economics of the University of

Gdańsk in Sopot invites participants to the TranSopot Scientific Conference under the slogan „Challenges for the development of transport in the 21st century”. The conference will be held from 27 to 29 May and it is a continuation of meetings organized since 1992 dedicated to the directions of development of the transport sector. The aim of the event is to exchange views and discuss modern trends of transport development and to integrate scientific communities and business practitioners from the Transport and Shipping Logistics sectors. The program of the conference will include discussions within plenary and thematic sessions devoted to sustainable development of transport, economic aspects of innovation and technical progress in transport, conditions of survival of transport enterprises, prerequisites for their development and urban mobility. The organizers are also planning a debate with practitioners, panels for young scientists and a study trip to the Słowińskie Coast.

Polish scientists developed a technique for monitoring the migration of insects

2019-05-10

Dr Tomasz Suchan and Dr Michał Ronikier from the Institute of Botany of the Polish Academy of Sciences in Krakow in cooperation with scientists from the Institut de Biologia Evolutiva and the Universitat Autònoma from Barcelona developed a technique for monitoring insect migration routes. They identify the DNA of plants pollen that, for example, the butterflies carry on their body and on this basis the scientists learn the routes of insect migrations. Researchers described their technique in the prestigious journal «Molecular Ecology Resources». They analyzed the pollen deposits of 47 specimens of a painted lady butterfly, caught in the spring on the Mediterranean coast by co-workers from Spain. A short fragment of DNA from the pollen grains transported by butterflies was used as a molecular bar code to identify plant species visited by insects. By sequencing DNA from pollen collected from the body of a migrating insect, it was possible to determine which plants the individual touched. The analysis revealed the presence of 157 species of plants belonging to 23 orders, mostly from Africa.

Discovery Day - Interactive Knowledge Picnic

2019-05-10

On June 8, 2019, the Rzeszów University of Technology will hold the jubilee 10th Day of the Discoveries and the Interactive Picnic of Knowledge. The picnic is an extremely educational adventure popularizing science and technology in the form of outdoor fun for all young and adult explorers. During the Knowledge Picnic, participants will visit 4 thematic zones: Technology Passage, Science Passage, Culture and Art Passage and the Square of History. Over 300 participants from various institutions responsible for popularization of science and technology, including 20 scientific clubs of the Rzeszów University of Technology, will present their achievements. The scientific clubs of the University of Rzeszów and the Warsaw University of Technology will also be guests of the event. There will also be interactive demonstrations and workshops in physics, chemistry, robotics, industrial design, avionics, logistics, information technology, environmental engineering and biotechnology.

Great English Test „Challenge Accepted”

2019-05-10

The 4th Great Test of English „Challenge Accepted” is the largest initiative of this type in the Lublin Province organized by the Promotion Center and the Center for Foreign Language Teaching and Certification at the Maria Curie-Skłodowska University (UMCS) in Lublin. The participants will get the chance to test their language skills and knowledge of Anglo-Saxon culture. The test is addressed to secondary school students and university students from all over the country who are 16 plus years old and are not students, graduates and employees of English, American and Applied Linguistics, and related fields. The test include 60 test questions of a single choice at B2 / C1 level to be solved in 45 minutes. Participation in the test is free and the number of seats is limited (400 people). Three best participants will receive attractive prizes in the form of electronic equipment.

Dr Arkadiusz Gorzawski to hold a lecture at the University of Silesia

2019-05-10

The University of Silesia invites participants to a lecture by Dr Arkadiusz Gorzawski. A scientist working at the European Organization for Nuclear Research in Geneva will deliver an open lecture entitled „Aliens from Space. Mysterious traces of particles.“ The electromagnetic waves of particles of enormous energy that reach the Earth and accelerate to the velocity of light, bombard our planet continuously. About 90 percent particles falling into the atmosphere are protons, 9 percent are alpha particles and about 1 percent are electrons. There are also few nuclei of heavy elements. Despite the fact that primary radiation is absorbed in the atmosphere, a huge number of secondary particles reach the Earth's surface. These are mainly muons, which have a weak interaction with matter and are the most penetrating particles, even several hundred meters into the earth and very difficult to register neutrinos. During the lecture, Dr Gorzawski will show their traces and count the quantity.

University of Wroclaw to hold an international conference Media in the digital environment

2019-05-10

The Institute of Journalism and Social Communica-

tion of the University of Wroclaw invites participants on May 13 and 14 to the international media conference Media Studies and Perspectives. This year's conference will be held under the slogan „Media in the digital environment“. Specialists of media and communication from the most important academic centers in Poland as well as from foreign universities from the United States, Great Britain, Italy, Norway, Finland and Germany will take part in the event. The topics of the discussions include relations between digital media and the so-called traditional media; hybridization processes of contemporary media; changes in the way of communication related to access to digital media; journalism and journalists in the conditions of digital media; social changes caused by the digital character of the media, changes in the media ecosystem, changes in attitudes and social behavior.

Lodz University of Technology to hold Hackathon Bank Pekao

2019-05-13

The main prize in the Bank Pekao Hackathon is PLN 10,000. The event will take place on 7-9 June at the Technical University of Lodz. Hackathon Bank Pekao S.A. is a 23-hour interdisciplinary event dedicated to students and graduates up to 30 years of age who have knowledge and experience on the following areas: IT, big data, marketing, sales and business. The programming hackathon will take place at the Information Technology Center of the Lodz University of Technology. More: <https://www.pekaocoders.pl/lodz>

Vice-Rector of Collegium Civitas to receive the award of the Polish Academy of Sciences

2019-05-13

Professor Małgorzata Baran, Vice Rector for Strategic Development at Collegium Civitas in Warsaw, received the award of the Committee on Labor and Social Policy of the Polish Academy of Sciences PAN. The PAN competition rewards the best publications in the field of work, social policy and human resources management issued in 2018. Prof. Małgorzata Baran was awarded for the monograph «Determinants of the effectiveness of mentoring in the organization». The Committee on Labor and Social Policy of the Polish Academy of Sciences informed that «The works awarded in the competition are the outstanding monographs».

„Congress of the Two Union - From the Union of Lublin to the European Union“

2019-05-13

In Lublin from 13 to 15 May 2019, the „Congress of Two Union - From the Union of Lublin to the European Union“ will take place. It will be a series of international conferences, debates and meetings with the participation of Polish and foreign intellectuals, scientists, politicians and publicists. Congress will be inaugurated with the panel «The foreign policy. The Polish-Lithuanian Commonwealth a burden or an obligation?» « Prof. Waldemar Paruch in Lublin and head of the governmental Strategic Analysis Center, Dr Marcin Kędzierski, chief expert of the Center for Analyzes of the Jagiellonian Club, and Bartłomiej Sienkiewicz, former head of the Ministry of the Interior will deliver their speeches. On May 14, the Session of the European Heritage «The Feast of Two Unions - from the Union of Lublin to the European Union» will be held, gathering historians from Poland, Lithuania, Belarus, Ukraine and Great Britain. The event will be concluded the conference on «Community and self-government» at the Faculty of Political Science at UMCS.

Researcher of the University in Częstochowa becomes the vice-president of EPNOE

2019-05-13

Dr Janusz Kapuśniak, Prof. of the University of

Humanities and Natural Sciences in Częstochowa (UJD) became the vice-president of the European Polysaccharide Network of Excellence (EPNOE). Dr Kapuśniak, vice-rector for science and cooperation with the UJD abroad, was elected for a two-year term. He will be the vice president responsible for education at EPNOE. He is the only Pole in the board of the organization, its other members are scientists from Belgium, France, Portugal, Slovenia, Austria and Sweden. EPNOE deals with organizing research, testing new ideas and developing new products based on or containing polysaccharides. It is a platform enabling the integration of its members, transfer of knowledge and organization of research and development activities, as well as education. Częstochowa University has been a member of EPNOE for four years.

Professor Frédéric Dias to hold Interdisciplinary Scientific Seminar at the Wrocław University of Science and Technology

2019-05-13

The world-famous mathematician Prof. Frédéric Dias from University College Dublin will be the guest of the next meeting at the Interdisciplinary Scientific Seminar at the Wrocław University of Science and Technology. On May 14, the scientist will give a lecture on „The fascination of ocean waves”. Professor Dias is a mathematician and world leader in research in the field of fluid dynamics. He deals with the analysis of such topics as dispersal wave equations, tsunamis, wave impacts in objects and buildings or widely understood ocean energy. Meeting with Prof. Dias is open to all participants that apply for it via the [Evenea.pl](https://www.evene.pl) website. The lecture will be conducted in English and simultaneously translated into Polish. The Interdisciplinary Scientific Seminar is a program addressed to a wide range of recipients: students, PhD students, researchers interested in deepening knowledge of exact sciences. More: <https://pwr.edu.pl/uczelnia/aktualnosci/przed-nami/interdyscyplinarne-seminarium-naukowe-prof-frederic-dias-758.html>

Foundation for Polish Science launches Copernicus competition for outstanding Polish and German scientists

2019-05-14

The Foundation for Polish Science together with the German association Deutsche Forschungsgemeinschaft (DFG) invites participants to submit applications for the 8th Copernicus competition of outstanding Polish and German scientists. The aim is to distinguish outstanding scientists from Poland and Germany who have special merits for Polish-German cooperation and can demonstrate outstanding research achievements as a result of this cooperation. The prize is awarded to two scholars - one working in Poland and another working in Germany. The prize amounts to EUR 100,000 for each winner. More: <https://www.fnp.org.pl/oferta/nagroda-copernicus/>

University of Lodz to hold XVI Arab Days

2019-05-14

On 15-16 May 2019, the Department of Middle East and North Africa of the University of Lodz is organizing the conference „Days of Arabia. The Middle East in terms of the challenges and threats of modern times”. The conference is interdisciplinary. It is addressed to representatives of the humanities and social sciences from all academic centers, researching the Middle East region with its policy, culture and economy. The aim of the conference is to answer the question to what extent demographic, economic, political and cultural processes affect the prospects of development in the Middle East.

Success of students of the AGH University of Science and Technology in Krakow

2019-05-14

Students of the Academy of Mining and Metallurgy in Kraków (AGH) won the European qualifiers in two prestigious oil and gas competitions. They won individual SPE Europe Regional Student Paper Contest and team PetroBowl competition. As a reward, they will represent Europe in the world finals that will take place at the end of September and the beginning of October in Calgary (Canada) during the most important conference of the oil industry Annual Technical Conference and Exhibition (ATCE). In the team competition, students representing the Faculty of Drilling, Oil and Gas as well as the Faculty of Geology, Geophysics and Environmental Protection defeated other teams from European universities. In an individual competition, Michał Figiel from the Faculty of Drilling, Oil and Gas took the first place in the Undergraduate category for his work titled «Randomness of geophysical log data» on the use of fractal calculus and chaos theory for the quantitative description of irregularities in geophysical curves.

University of Warsaw to hold an attempt to balance the transformation of 1989-2019

2019-05-14

On May 21, 2019, the last academic seminar within

„8 lectures for the New Millennium” will be held at the University of Warsaw (UW). The first lecture “1989-2019 - a great transformation. Analysis attempt” will be delivered by Prof. Roman Kuźniar. Professor Kuźniar will analyze the changes that have occurred as a result of the transformation in the national political system in the international relations. Professor Roman Kuźniar is a political scientist specializing in international relations. He gained education at the Faculty of Journalism and Political Sciences of the University of Warsaw. Currently, he is the head of the Department of Strategic Studies at the Institute of International Relations of the University of Warsaw. In addition to research activities, he also performed important diplomatic functions. He was the director of the Polish Institute of International Affairs and advisor to the President of the Republic of Poland for international affairs.

Opole University to run philosophical projects for young people

2019-05-14

In May, the employees of the Institute of Philosophy of the Opole University ended up educational projects. They were addressed to the students of the former junior schools and secondary schools. Almost 500 students participated in them. The teachers conducted 30-hour elective courses, developing general competencies of critical, independent thinking, correct argumentation, logics and heuristics. Classes were mainly conducted by research and teaching staff of the Institute of Philosophy of the Opole university, who have experience in working with schoolchildren. During the classes, various methods were used to stimulate cognitive curiosity in students, improve analysis and synthesis skills, develop skills in correct inference and argumentation, develop the ability to ask questions and answer them, taking into account different points of view. More: <http://www.uni.opole.pl/page/2883/konczy-sie-projekt-logiczny-uczen>

Silesian University of Technology to hold a seminar on air pollution and monitoring its quality

2019-05-14

The problem of air pollution and its monitoring the quality of air will be the subject of a seminar organized by the Observatory of Urban and Metropolitan Processes. The meeting will be held on May 24 at the Education and Congress Center of the Silesian University of Technology. Introductory speeches will be delivered by: Prof. Eng. Jerzy Buzek - Member of the European Parliament; Izabela Domogała - a member of the Board of the Silesian Voivodeship; Prof. Eng. Janusz Kotowicz - Vice-Rector for Cooperation with the Socio-Economic Environment of the Silesian University of Technology; Dr Tomasz Pietrzykowski - prorector for international and national cooperation at the University of Silesia and Dr Eng. Jan Bondaruk - deputy director for environmental engineering of the Central Mining Institute. The seminar is part of the Local Government Academy promoting and supporting the development of cooperation between the local government and the science. The event will be accompanied by the exhibition „Stop! SMOG „.

AGH University of Science and Technology in Krakow to hold 2nd Cosmic Mining Conference

2019-05-15

The ISME Group (Ideas for Space Mining Engineering) is organizing the 2nd Cosmic Mining Conference on 16 May 2019 at the AGH University of Science and Technology in Krakow. The conference is devoted to space mining, the geological aspects, engineering of devices, vehicles and machines, as well as legal and economic problems that should be considered in order to implement this futuristic idea. The conference is divided into three sections: Mechanical Engineering, focused on technological, constructional and material issues, Mining and Geology, which takes into account geological aspects of exploitation of extraterrestrial resources and Law and Economics, dedicated to the analysis of economic aspects of Space mining, international regulations concerning the acquisition and exploitation of resources beyond the Earth.

Aleksander Kwaśniewski to deliver a lecture at the Jan Kochanowski University in Kielce

2019-05-15

Former Polish President Aleksander Kwaśniewski will give a lecture „15 years of Poland’s membership in the European Union” on 20th May 2019 at Kielce University of Jan Kochanowski (UJK). The 15th anniversary of Polish accession to the European Union is a perfect occasion of this event, organized by the Students’ Scientific Club of Law at UJK. Former President Aleksander Kwaśniewski actively participated in the process of integration of Poland with the European Union. He was developing a cross-party consensus for the accessing to the European Union, NATO and adopting the Constitution of Poland that is still valid today. The lecture will take place at 11.30 in the Center for Enterprise and Business of UJK in Kielce at ul. Świętokrzyska 21.

University of Lodz to hold Days of the National Center for Science

2019-05-15

On May 15-16, 2019, the seventh Days of the National Center for Science (NCN) will take place at the Faculty of Philology at the University of Lodz. Researchers from the region and from all over Poland will take part in a series of workshops and information meetings on the NCN contest offer. Days of the National Science Center take place every year in a different part of Poland that assures the wide range of scholars to be informed about its offer. This year, the event is hosted and organized by the University of Lodz and other Lodz universities: Lodz University of Technology, Medical University of Lodz, Academy of Music in Łódź, Academy of Fine Arts in Łódź and Film School in Lodz. Also, the Institute of Medical Biology of the Polish Academy of Sciences (PAN) and the Center for Molecular and Macromolecular Studies of the Polish Academy of Sciences joined the event.

2019-05-15

The Institute of English Language at the University of Silesia invites participants to the 31st conference from the series „Second Language / Foreign Language Acquisition”. The title of the conference is „From code-switching to translanguaging”. The event will be held from 16 to 18 May in Szczyrk. Code-switching means a change of language code and translanguaging, means using the language interchangeably in different contexts of verbal interaction consciously or not, pursuing various communication purposes. They relate both to the situation of natural and class interaction, in which case the teacher interchangeably uses a given language (first or foreign) to achieve specific educational goals. The program includes workshops for PhD students studying in the field of applied linguistics, as well as meetings and trainings with the participation of editors of prestigious academic journals. The university professors from Austria, Spain, Ireland, Hungary and Great Britain will participate in the conference. More: <https://www.us.edu.pl/xxxi-edycja-konferencji-pt-przyswajanie-jezyka-dru-giegoobcego>

Students of the University of Lodz won the International Faster Mind Challenge

2019-05-16

Szymon Jankiewicz and Anita Łęgówik, students of logistics at the Faculty of Management at the University of Lodz (UŁ) won the first place in the final of the Faster Mind Challenge International Competition organized by FM Logistics. It was the third competition under the slogan: «Show logistics a way to the greener world!» The students sought solutions for: reduction of the carbon footprint in the conducted activity, reduction of energy consumption, development of ecological offers for clients, ensuring health and safety of employees. The final took place in Paris, where the students from Lodz presented a project Vortex Bladeless generators to raise energy for the needs of logistics platforms. They overtook teams from France, Spain and Russia.

Kozminski Academy to hold

Open days for postgraduate Chinese Business studies

2019-05-16

On May 18, 2019, the Kozminski Academy in Warsaw invites participants to Open Days for postgraduate studies in Chinese Business. The meeting include three debates on the role of Poland on the New Silk Road and possible scenarios from perspectives of business, railways and experts. It will also be an opportunity for the participants of the event to learn more about the studies, meet lecturers and participants of the current postgraduate studies in Chinese Business as well as graduates. The event will start at 12.30 at the Kozminski Academy in Warsaw at ul. Jagiellońska 57.

Łódź Regional Scientific Festival E (x) plory

2019-05-16

On May 24, 2019, the Regional Science Festival E (x) Plory will take place in the Bionanopark in Łódź. The program includes demonstrations and scientific workshops, bringing the knowledge about how the world works. Regional Science Festival E (x) plory is a series of educational activities that are to inspire and encourage young people to explore scientific issues. The program includes Michalina Urbaniak's workshop on bone implants, a lecture by Adam Czyżewski on optical abilities in animals, or it provides a unique opportunity to examine strawberry DNA under a microscope. Participants of the Festival E (x) plory will be able to see also scientific projects that take part in the regional Scientific Competition E (x) plory.

University of Silesia to hold the XXXI conference „Acquisition of Second / Foreign Language”

Researcher of the Opole University of Technology joins the Migration Research

Committee of the Polish Academy of Sciences

2019-05-16

Dr Brygida Solga, Prof. Opole University of Technology became a member of the presidium of the Committee for Migration Research of the Polish Academy of Sciences in the term 2019-2022. She was elected for the third time as one of the best migration researchers in Poland, she is the only person from the Opole science community who has ever joined this prestigious team. The Committee for Migration Research is a committee undertaking interdisciplinary issues of migration processes, with particular emphasis on migrations experienced in Poland. In the current term, the scope of the Committee's activities will focus in particular on the promotion of research on the transformation of immigrant communities, attitudes towards immigrants and public discourse on this subject in Poland. Dr Brygida Solga heads the Chair of Regional Policy at the Opole university. She has been a member of the Migration Research Committee since 2011. Polish science in the interwar period - an exhibition

prepared by the Ministry of Science and Higher Education

2019-05-16

The exhibition „Polish science in the interwar period” presenting selected profiles of eminent Polish scientists who have made a significant contribution to the development of Polish and world science can be seen at the Pomeranian Academy in Słupsk. The opening of the exhibition was attended by the deputy minister of science and higher education, Piotr Müller. The group of 52 Polish scientists, inventors and discoverers includes Ludwik Hirszfeld, the author of blood group determinations, Eugeniusz Romer, creator of modern cartography, Gabriel Narutowicz, creator of the first European hydroelectric power plants, Stefan Bryła, creator of the first welded bridge and Rudolf Gundlach, inventor of the tank periscope. The project was created as part of celebrating the 100th anniversary of Polish independence. The exhibition, prepared by the Ministry of Science and Higher Education, will also be available at other academic centers throughout Poland.

University of Technology and Life Sciences in Bydgoszcz to hold Conference Contemporary problems of construction, Innovative solutions

2019-05-16

The Scientific Association for Building Project Management at the University of Technology and Life Sciences in Bydgoszcz is inviting participants on May 22 to the 5th International Scientific Conference Contemporary Problems of Construction, Innovative Solutions (Civil Engineering - Present Problems, Innovative Solutions CEPPIS). The conference is an opportunity to present the results of research, as well as to exchange experiences. The theme of this year's meeting is Circular Economy in construction. The main goal of the conference is to promote more efficient resource management in investment and construction projects based on the closed-loop rule. CEPPIS is a flagship event organized by the COMA Scientific Association for Building

Project Management. It is attended by scientists from around the world dealing with contemporary construction problems. The official language of the conference is English.

Maria Curie-Skłodowska University in Lublin to hold European Debate

2019-05-17

What is the significance of the participation of citizens in the European Parliament elections? This question will be answered by the participants of the European Debate, which will take place on 20 May 2019 at 18 at the Faculty of Political Science of the Maria Curie-Skłodowska University (UMCS) in Lublin. Project Platform Europe. The debate is the result of UMCS international cooperation with universities from Italy and Sweden (University Roma Tre and University of Gothenburg). Its purpose is providing European education, increasing the participation in the elections to the European Parliament, observation of communication activities carried out by election committees in all European Union countries, including Poland. The project is financed and supported organisationally by the European Parliament.

PhD student of the University of Gdańsk receives a special prize at the SCRIPT PRO 2019 competition

2019-05-17

Elżbieta Benkowska, PhD student at the Faculty of Philology at the University of Gdańsk, received the Special Award in the prestigious script competition SCRIPT PRO 2019. Reward of 10 thousand PLN was awarded to the script of the feature film „Orunia 4ever”. SCRIPT PRO is the most important Polish competition for screenwriters beginning of their careers. The submitting writer can send at most two full-length feature films made according to his texts. The integral element of the competition is the opportunity to develop the final texts in the Wajda School under the supervision of leading Polish filmmakers, screenwriters and consultants. The most successful scenarios include «Dancing's Daughters», «Gods»,

«Last Family», «Panic Attack» and «You're God».

University of Wroclaw to hold a conference on German phraseology and paremiology in contact and contrast

2019-05-17

The Institute of German Philology of the University of Wroclaw invites participants from 23 to 25 May for the second international scientific conference Deutsche Phraseologie und Parömiologie im Kontakt und Kontrast / German phraseology and paremiologia in contact and contrast. The conference will be attended by 87 participants, including 34 scientists from 17 European countries (Germany, Czech Republic, Slovakia, Slovenia, Croatia, Spain, Hungary, Austria, Ukraine, Greece, Kosovo, Switzerland, Russia, France, Norway, Poland) and the United States. They are recognized scientists from recognized German language centers in the world. The meeting is organized by the Department of Applied Linguistics. Its co-organizer is the Institute of Slavic Studies at the University of Leipzig. The conference is also supported by the Phraseological Section of the Linguistics Committee of the Polish Academy of Sciences. More: <https://uni.wroc.pl/o-niemieckiej-frazeologii-i-paremiologii-w-ifg/>

Science and Technology starts applications

2019-05-17

Students can apply for the Wroclaw University of Science and Technology until July 8. Over 7700 places for first and second degree studies are still available. - We have prepared 6814 places for regular studies and additional 915 places as part-time studies. Students can choose from over 50 fields of studies, including 14 in English. Last year the most popular study in terms of the number of candidates for one place turned out to be computer science in English at the Faculty of Computer Science and Management. There were over 7 candidates for one place here. Also, over 6 candidates applied for IT at the Faculty of Electronics. Computer science at the Faculty of Fundamental Problems of Technology (6 people for one place) and cyber security at the Faculty of Electronics (5.82 per one place) were also of considerable interest.

Young scientists to present Innovative ideas at the conference Science -Startup -Industry

2019-05-20

On 22-23 May 2019 years at the Academy of Mining and Metallurgy in Krakow will host the fifth conference „Innovative ideas of young researchers: -Startup - Science- Industry „ organized by the Institute „Highway of Technology and Innovation“. The event will take place as part of the Impact'19 congress. The conference is addressed to young researchers, graduate students, students and representatives of startups. Participants will be able to present papers on innovative product, process, social, organizational, and institutional marketing. The aim of the conference is to promote innovative solutions, which are created largely by young scientists and students. Organizers hope that the presentation of innovative solutions and promoting them among the partners of the Institute of Highway Technology and Innovation and industry will allow their faster implementation.

Lazarski University to hold the Law Day

2019-05-20

The Lazarski University in Warsaw is organizing the eighth „Law Day at the Lazarski University“ festival on May 25, 2019. During the event, participants will have the opportunity to take advantage of free legal advice provided by law firms and legal counsel. This year, 10 law firms represented by advocates and legal counsels who cooperate with the Lazarski University as often also its lecturers and graduates will offer their pro bono services to the guests of the festival. Specialists will help participants to interpret documents and solve legal complexities in all areas of law, including labor law, inheritance law, family law, administrative law, economic law, criminal law, consumer protection law or property law. Interested participants will also be able to learn how to conduct bankruptcy proceedings and submit an application for consumer bankruptcy.

29th international conference „Construction failures“

2019-05-20

Over 400 participants and about 20 construction companies have announced their participation in the 29th International Conference on Structural Failure, which will take place on 20 - 24 May 2019 in Międzyzdroje. One of the organizers of the event is the West Pomeranian University of Technology in Szczecin (ZUT). The event has been a forum for the exchange of views and experiences of scientists, investors, designers, contractors and construction managers responsible for the security of building structures for over 40 years. Above 100 papers were accepted for the conference. The topics include failure of reinforced concrete structures, geotechnical aspects of failure, failures of temples and historic buildings, failures of bridge and road objects, or even floor failures.

University of Warsaw to launch Polish-Spanish meetings

2019-05-21

On 21-22 May 2019, the Faculty of „Artes Liberales” of the University of Warsaw, the Spanish Embassy in Poland and the Cervantes Institute are organizing the second Polish-Spanish meetings. During the two-day international scientific conference, the participants will discuss the situation of Spain in the time of the Versailles treaty, Polish-Spanish parallelisms in art and the life of Poles in Madrid during World War I. Invited experts include: Prof. Alfonso Bullón de Mendoza from the University of San Pablo CEU in Madrid, writer and art critic Juan Manuel Bonet Planes, and Dr Jan Stanisław Ciechanowski and Prof. Jan Kieniewicz from the «Artes Liberales» Faculty of the University of Warsaw. Welcome speech will be given by Prof. Robert Sucharski, dean of the Faculty of «Artes Liberales» UW and Francisco Javier Sanabria Valderrama, Ambassador of Spain in Poland.

Science Picnic Explorations in Rzeszów

2019-05-21

Rzeszów Science Picnic Explorations will take place from 24 to 26 May 2019. The participants will have opportunity to meet the science in an attractive, simple and direct way. The main part of the event is an outdoor «science town», which will be erected near the Rzeszów Castle and a multimedia fountain on Saturday, May 25. There, enthusiasts of science, technology, interactive knowledge transfer will learn about the secrets of the world, achievements of the human mind, learn about what is nuclear physics about, why the plane flies and how human body functions. Visitors from the National Center for Nuclear Research will talk about atomic energy and radioactivity, and physicists from the University of Rzeszów and the Rzeszów University of Technology will demonstrate phenomena related to electricity and pressure.

Wroclaw University holds International Conference and Assembly of Students' Scientific Clubs

2019-05-21

Over 500 students and carers from all over Poland participated in the 24th International Conference and the 36th Meeting of Student Science Clubs organized by the Wrocław University of Environmental and Life Sciences. In 17 sections students presented 155 works on biology, animal husbandry, biotechnology, food and human food technology, geodesy, environmental engineering, veterinary science, basic sciences, agrotechnics, ecology and environmental protection and economics. The topics of presentations were very diverse. The students talked about the change of fashions on dog breeds, vegan foams - innovative products on the confectionery market, use of hemp and linseed oil to produce a yeast based food supplement, use of ultrasounds to support yeast dough preparation, ECG standards for sport pigeons, stimulating entrepreneurial thinking for students and hydroponics for growing lettuce. Gdańsk University of Technology to talk about on artificial intelligence

2019-05-21

Open University of Technology invites participants to the fourth meeting of the #CiekawiNauki series, which will take place on 29 May at the Gdańsk University of Technology. During the lecture, experts - Prof. Jacek Rumiński (Gdańsk University of Technology), Marcin Czajka (Kainos) and Łukasz Osowski (Lab4Life) will explain what artificial intelligence is, in what areas of our life it is currently applicable, and how it will develop in the perspective of 50 or 100 years. Speakers will answer the questions of how artificial intelligence will help us care for health and whether it is possible to prolong our lives. They will also discuss ethical barriers related to the implementation of artificial intelligence. Participants of the meeting are invited to participate in the dis-

cussion whether for several dozen years artificial intelligence will be an indispensable tool for people. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGNcmoQv7K0/content/-ciekawinauki---szuczna-inteligencja---wyreczy-nas-czy-zastapi

Students of the Wrocław University of Science and Technology win the Student Formula competition in the United States

2019-05-21

Young designers of the Wrocław University of Science Technology have won a special sponsorship award in the Student Formula competition in the United States. The PWR Racing Team PWR race car took 17th place in the general classification for 120 starting teams from around the world. Students presented the conceptual and technological perspective, a cost estimation and a business plan of their project to a potential car manufacturing company. In the practical part the car made the 22 km route (Endurance) and raced on time (Autocross). The final score also included the fuel consumption during the race (Efficiency), acceleration on a straight stretch of 75 m (Acceleration) and the passage of the car on a tight eight-track (Skidpad). The Student Formula competition has been organized for 40 years on the most famous tracks in the world - Hockenheimring, Silverstone, or Circuit de Barcelona-Catalunya. The jury include experts from large automotive concerns. More: <https://pwr.edu.pl/uczelnia/aktualnosci/udany-start-naszego-bolidu-w-michigan-11191.html>

Academy of Young Scholars and Artists to invite new members

2019-05-21

The Academy of Young Scholars and Artists is an initiative supporting interdisciplinary intellectual exchange and active development of young scientists and artists of Lower Silesian higher education institutions and scientific institutes. They can apply for Academy until May 31. The Academy is an initiative of interdisciplinary, inter-university and elite

character to be a stimulator of the development of the potential, boldness and unconventionality of young people and the process of so-called «Knowledge triangle». It helps shape the image of Wrocław as an ambitious academic and scientific center that is friendly to young people. The members of the Academy can be people up to 35 years of age, distinguished for their outstanding scientific or artistic achievements and sharing an interest in active cooperation with representatives of various fields of science and art. The term of the Academy member will last 5 years. More: <https://uni.wroc.pl/zglos-siedo-akademii-mlodych-uczonych-i-artystow/>

State Higher Vocational School in Zamość to organize the National Security Day

2019-05-22

The State Higher Vocational School in Zamość and the High School of the Military Schools of Zamosc are organizing on 26 May 2019 the National Security Day. The event will take place at the Great Market Square in Zamość. During the National Security Day, guests will see the equipment and armaments of the Polish Army, the Prison Service, the National Fire Service, Police, Border Guard and the National Fiscal Administration equipment, as well as robots used to disarm explosives or carry dangerous materials. The aim of the event is to promote the issues of national security for the pupils, students and residents of the region.

Lublin to hold „Day of students and PhD students with disabilities”

2019-05-23

The “Alter Idem” Association of Disabled Students and the Disabled People’s Service Team of the Maria Curie-Skłodowska University (UMCS) in Lublin are organizing on 24 May 2019 „Day of students and PhD students with disabilities”. The event is accompanied by a nationwide, interdisciplinary scientific conference with aim to exchange ideas, views and scientific experiences regarding the broadly understood functioning of people with disabilities at universities. The topics will include a wide range of problems that students with disabilities have to deal with in everyday life. Three thematic blocks are planned: legal problems of people with disabilities, psychosocial problems and professional activation of people with disabilities.

Students of Kozminski Academy join the Model United Nations conference

2019-05-23

Students of the Kozminski Academy (ALK) in Warsaw took part in the United Nations Conference „Model United Nations” in Maastricht. During the simulated deliberations, they wondered how to improve the world of today. They received a distinction of the program. The United Nations (MUN) model is an international student initiative based on civic education by simulating United Nations works and debates. This a few-day event was run entirely in English, students worked in working groups, committees and councils, mirroring the structure of the United Nations.

University of Agriculture in Krakow to hold XVIII National Days of Insect

2019-05-23

From May 31 to June 2, 2019, the eighteenth National Insect Days will take place at the Faculty of Biotechnology and Horticulture at the University of Agriculture in Krakow under the slogan „Save the insects”. During the event, collections of live domestic and exotic insects, arachnids, predatory insects, parasitoids and nematodes will be presented. In addition, guests will be able to see plants and carnivorous animals, prepared insects, images from butterfly wings and photos about entomology. Kids can choose many attractions - «insect» tattoos, «insect» fairy, demonstrations of «insect» origami, as well as art classes. More: https://urk.edu.pl/zasoby/1/Program_Dni_Owada_2019_-_stan_na_21-05-2019.pdf

Bialystok University of Technology to hold congress of Erasmus Student Network Polska

2019-05-24

Representatives of the 35 largest Polish universities are participating in the congress of Erasmus Student Network (ESN) Poland, which will be held at the Białystok University of Technology (PB) on 23-26 May 2019. The event is organized by ESN PB. Erasmus Student Network Polska is part of the largest student organization in Europe. The main objective of the ESN is to support and promote mobility through international exchange programs, such as Erasmus +. For Polish students, the activity of ESN Poland and meetings with students from other countries are the opportunity to use a foreign language in practice, as well as making new contacts. More: <https://www.esn.pl/pl>

Delegation of the Chinese province of Henan visits the Jagiellonian University in Krakow

2019-05-24

On May 22, 2019, the Jagiellonian University (UJ) in Krakow was visited by a delegation from the Chinese province of Henan. The purpose of the meeting was to talk about the cooperation between the Jagiellonian University and Chinese universities, enterprises and cultural institutions. Cooperation of the Jagiellonian University with institutions from the Henan province will include joint activities in the field of education and entrepreneurship. In the coming days, Polish and Chinese parties will determine the scope of this cooperation, its timeframe and they will sign the agreement. The contacts with the Chinese side were possible thanks to the Confucius Institute - Center of Chinese Language and Culture at the Jagiellonian University, which gained the status of a model institute last week.

X International Scientific Coaching Conference to be held in Warsaw

2019-05-27

The Center for Coaching and Mentoring of the Kozminski University in Warsaw is organizing on March 27-28, 2019 the 10th International Scientific Coaching Conference under the slogan „Coaching - new perspectives and challenges”. Coaching is developing very dynamically in Poland and around the world. It has more and more applications and has already been established as a separate, socially recognized profession. New coaching concepts, approaches, tools and areas of specialization are emerging. The conference is addressed to trainers, mentors, supervisors, HR experts, HR-business partners, managers, entrepreneurs, students, PhD students interested in coaching and personal and professional development.

Team from the Silesian University of Technology wins the „Eureka! DGP”

2019-05-27

A team of scientists from the chemical department of the Silesian University of Technology won the 6th „Eureka! DGP. We discover Polish inventions”. Also a second team from the Silesian University of Technology, composed of researchers of the mechanical department reached the final of the competition. The project submitted by Prof. Jan Zawadiak's team «The method of processing waste laminated films separated in the refining process from multi-material packaging for liquid food of the Tetra Pak type» was awarded as the best from 54 solutions submitted for the competition. The top five of the laureates also included the project submitted by team of Prof. Marian Nowak from the mechanical engineering department. The invention «Nanostructured fibrous composite material with a polymer matrix with a reinforcing phase and a method for its production» has received an additional award.

University of Silesia to hold conference on the perception of mythology for centuries

2019-05-28

The Club of Young Classics operating at the Department of Classical Philology at the University of Silesia invites participants on May 31 to the nationwide scientific conference „Between myth and man. Perception of mythology for centuries.” The theme of the event will focus on the Greek, Roman and Scandinavian mythology and its reception in later times. The guests of the conference will be representatives of Polish research centers, including from Warsaw, Łódź, Kraków, Rzeszów and Lublin. Students from IV Secondary School in Sosnowiec are also invited to participate. The participants will discuss the following topics: problems of contemporary myth; Scandinavian vision of the end of the world; the reception of the myth about Icarus in Italian literature; various reflections of Narcissus and Egyptian religion as the meaning of human life.

Architect from the Gdańsk University of Technology publishes in „Nature”

2019-05-28

Dr Eng. Karolina M. Zielińska-Dąbkowska, assistant professor at the Department of Urban Architecture and the Cultural Department of the Faculty of Architecture at the Gdańsk University of Technology has published her article in the latest issue of journal „Nature”. In the text, the Gdansk scientist warns that skyscrapers, which number in modern metropolises has grown by 141% over the decade, deprive residents of access to natural light, posing a threat to health, well-being and sustainable development of cities. Such development will include new urban areas not only in Asia, but also in historic European cities. The price of development is limited access to natural light, which is important for our health and well-being. Researchers have proved that the lack of exposure to the sun's rays may contribute to deficiencies of vitamin D or myopia, which by 2050 is to affect half of the world's population.

Medical rescuers in Wroclaw trained in the virtual reality

2019-05-28

Students in the field of Emergency Medicine at the University of Medical Sciences in Wroclaw as the second in Poland launched a modern educational tool providing training opportunities in virtual reality. The possibilities of training paramedics virtually are now unlimited. Students begin training on a standard simulator and later start simulation wearing VR goggles. They must not only make the right decisions, but also perform the necessary activities recorded by the controllers. Each simulation is based on a predetermined scenario, created and supervised by the teacher, who later discusses the results with the students. The University of Medical Sciences in Wroclaw is the second university in Poland and one of the first in Europe using virtual reality technology to train students of emergency medical services - informs the university. More: <https://www.umed.wroc.pl/content/ratownicy-medyczni-szkola-si%C4%99-w-wirtualnej-wieczystosci>

Maria Curie-Skłodowska University in Lublin to hold 2nd Ukrainian Day

2019-05-29

On May 31, 2019, the Maria Curie-Skłodowska University (UMCS) in Lublin invites participants to the „2nd Ukrainian Day at UMCS”, which will take place at the UMCS Academic Center of Culture „Chatka Żaka”. The event «Ukrainian Day» will show contemporary Ukrainian culture in its various aspects and will bring closer the heritage and national wealth of Polish eastern neighbor. The event aims to integrate students and inhabitants of Lublin with representatives of the Ukrainian community, promoting Polish-Ukrainian dialogue and building friendships between both nations. During the event participants will be able to take part in artistic workshops with folk and folk singing. The program also includes tasting of traditional Ukrainian cuisine. The organizers also invite guests to a meeting with a young writer, Olesia Jaremchuk, who will present a collection of reportages titled «Nashi inshi» about minorities living in Ukraine.

5th National Conference of PhD Students of Life Sciences BioOpen 2019

2019-05-29

On May 30-31, the 5th National Conference of PhD Students on Life BioOpen 2019 will take place. This event is organized by PhD students of the Faculty of Biology and Environmental Protection of the University of Lodz. The event is addressed to PhD students, students and all young scientists who conduct research in the field of disciplines, referred to as life sciences. This year's BioOpen will cover issues including: biotechnology, biochemistry, biophysics, microbiology, medicine, nanotechnology, plant and human physiology, ecology, environmental protection and related sciences. The conference topics were grouped into four thematic sessions: Microbiology and immunology, Molecular and medical biology, Biotechnology and genetic engineering, Ecology and environmental protection. More: <http://acer.biol.uni.lodz.pl/~bioopen/>

Poznan Summer School of Living Latin and Greek

2019-05-29

The Adam Mickiewicz University in Poznan invites participants from July 29 to August 11 to participate in the next Poznan Summer School of Latin and Latin (Schola Aestiva Posnaniensis MMXIX). Classes in Latin will take place at 5 or 6 levels: Tirones I - classes for people who have never studied Latin; Tirones II - for those who have already learned the basics of Latin and Tirones III and Tirones IV. The organizers of the school are also planning the creation of a group for intermediate persons - Tirones proveciores and Veterani - for people with advanced knowledge of Latin. Greek classes will take place on three levels: Tirones - for people who have never studied Greek; Media tirones - for people who have studied Greek but do not speak and do not read fluently in this language without a vocabulary and Veterani - for people with advanced knowledge of ancient Greek.

BNP Paribas Bank to launch competition for the best master's thesis on agricultural development

2019-05-30

On the occasion of the 100th anniversary, the BNP Paribas Bank prepared the Jubilee Competition for the best master's or BA theses on the development of agriculture and agro-food processing. The graduates of all universities from 2018 or in 2019 may submit their works to the Competition. The issues must be related to the development of agribusiness, i.e. progress, innovation and development of farms, rural areas and other activities that bring added value to rural society, the natural environment, farms and agro-food industry. Competition works should be submitted by 20 September 2019. The Competition will be settled by October 15, 2019. Three winners of the Competition will receive financial prizes with a total value of PLN 10,000. More: https://bnpparibas.pl/100lattradycji/utills/pdf/REGULAMIN_KONKURS_PRACA_MGR.pdf

Historical Institute of the University of Warsaw to hold Scientific conference on the 30th anniversary of the first partly free elections in Poland

2019-05-30

On June 3, 2019, the Historical Institute of the University of Warsaw (IH UW) is organizing a scientific conference devoted to recalling the memory and circumstances of conducting the first partially free parliamentary elections in Poland on 4 June 1989. The so-called contractual elections took place on June 4 and 18, 1989. The rules of their organization were agreed within the so-called Round Table talks. As a result, candidates not from then ruling communist party and satellite parties applied for 35% of seats in the Sejm and for all Senate seats. These were the first free parliamentary elections in Poland after the Second World War. The participants of the event will include Dr Łukasz Niesiołowski-Spano, director of IH UW, Dr Paweł Kowal (Eastern European Studies at the University of Warsaw), Prof. Jan Skórzyński (Collegium Civitas), Prof. Andrzej Friszke (Institute of Political Studies of the Polish Academy of Sciences) and Prof. Tomasz Nałęcz (Academy of Humanities in Pułtusk).

Days of the University of Economics in Krakow

2019-05-30

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin took part in the Days of the University of Economics in Krakow (UEK) held on May 28, 2019. Opening the ceremony, the rector of the Krakow University Prof. UEK Dr Eng. Andrzej Chochół quoted Barack Obama: „Today, more than ever before, science seems to be the key to survival. Both for our world and for ourselves as a nation and for our well-being and security. The time has come for us to treat science as one of the most important areas of life.” During the speech, the rector also drew attention to the importance of science and inventiveness for the development of humanity. In his opinion, «though development is inscribed in human nature, it has never been as intense in contemporary history as it is today».

University of Silesia to hold the conference „Polish didactics and its teachings”

2019-05-30

The Faculty of Philology at the University of Silesia in Katowice invites participants on October 9 and 10 to the interdisciplinary scientific conference „Polish didactics and its teachings”. The participants will try to answer the following questions: what are the unused possibilities of Polish didactics in the use of other sciences, how to use the knowledge of particular sciences in Polish lessons in a methodologically aware, effective and responsible manner, which Polish language didactics can offer the didactics of other sciences and whether other disciplines are the auxiliary sciences of didactics of literature. The participants will watch a contemporary Polish short film and meet with directors, as well as participate in workshops devoted to interdisciplinary teaching: „Poland on screen. Contemporary short film on cultural and literary education”, „Games in the service of didactics” and „Muses’ door is open”, i.e. an interdisciplinary journey with a work of art.

University of Wroclaw invites participants to the fourth School of Spanish Law

2019-05-30

By June 10 students can apply for the 4th School of Spanish Law, organized by the Faculty of Law, Administration and Economics of the University of Wrocław and the law faculty of the Autónoma University in Madrid. Classes of the School will be implemented in Wrocław. The at least 50 hours of classes will start in October and will last two semesters. The lecturers will be the teachers of the Universidad Autónoma in Madrid. The program of the School of Spanish Law is addressed to students of law, economics and administration as well as Roman philology (Spanish profile) as well as practitioners in the above-mentioned fields. Graduates who obtain positive results from written examinations will receive a certificate issued by Universidad Autónoma and the University of Wrocław. More: <https://uni.wroc.pl/iv-edycja-szkoly-prawa-hiszpanskiego/>

Jan Kochanowski University in Kielce invites participants to CHEM-NIGHT

2019-05-31

In Kielce on June 7, 2019, CHEM-NIGHT festival will be held under the slogan „Unusual chemistry of ordinary things”, organized by the Institute of Chemistry of the Jan Kochanowski University (UJK) in Kielce. The goal of the event is to popularize science among the local community through participation in lectures, workshops and chemical demonstrations. Nine thematic laboratories will be available, in which participants will be able to carry out their own experiments. Under the supervision of the institute's employees and students, participants will discover «chemistry from the kitchen». They will find out where to find and how to identify some interesting substances and what phenomena are part of the everyday objects. Also, they will be able to prepare natural cosmetics, glycerine soaps and sparkling baths and learn about the composition of food.

Polish Academy of Sciences Family to hold scientific picnic in Olsztyn

2019-05-31

On June 8, 2019, scientists from the Polish Academy of Sciences (PAS) will organize a large laboratory in Olsztyn Old Town. Participants will be able to take a „selfie” using neural networks and examine the fuels of our brain. The Institute of Animal Reproduction and Food Research of the Polish Academy of Sciences in Olsztyn together with the Municipal Cultural Center are organizing a family picnic „Science is also art”. The organizers invited scientists from other institutes of the Polish Academy of Sciences who will reveal the secrets of their research. Visitors will make microscopic and macroscopic preparations of parasites, carry out experiments in an outdoor chemical laboratory and check the electrical activity of their brain. They will also learn how extraterrestrial minerals look, how the craters are created and whether we are threatened by space disasters. With the help of biologists, they will look closely at Masurian zooplankton, and archaeologists will reveal the

secrets of ancient civilizations. Everyone will be able to try their the ceramic-weaving «Rubik's cube».

Students of the Polish Naval Academy from Gdynia become finalists of the „NATO Debates Championships” competition

2019-05-31

Elżbieta Lubacha and Tomasz Dranicki, students of international relations at the Naval Academy in Gdynia, advanced to the finals of the international competition „NATO Debates Championships”. The finals will take place from 17 to 19 June in Brussels. The organizers of the competition are George Washington University and the Egmont Royal Institute for International Relations in Brussels. They invited dozens of universities from around the world to participate in the project. The task of the students was to prepare the film material on the subject: «Should the NATO allies commit to at least 2% of their GDPs on defense?» The jury chose best elaborated answers and invited students and staff from 7 universities to the finals. The finalists include the Naval Academy, Canadian Carleton University, French Ecole de Guerre, Belgian College of Europe and Ghent University, University of Bath from Great Britain, Italian University of Bologna and University of Macedonia.

Students and graduates of the University of Silesia receive an audience award at a conference in Brno

2019-05-31

The game „Weakless” created by students and graduates of the University of Silesia won the audience award at the „Game Access Conference” in Brno. This is another award for the Cubeish Games and Punk Notion teams. «Weakless» is a puzzle-adventure game depicting the relationship of two heroes: people with sight dysfunction and people with hearing impairments who, thanks to mutual help, can overcome obstacles. It was created thanks to

the support of the ARP Games accelerator, established by the Industrial Development Agency, Spin US, which is a special purpose entity of the university and the Cieszyn Poviast. The core of the game «Weakless» is solving logic puzzles and exploring the surroundings with the help of the characters' vision and skills. At any given moment, the player controls only one of the characters, which means that he can not simultaneously use the sense of sight and hearing. The game is distinguished by its own graphics, awarded in the Game Art Design category during the ANIWOW Animation Festival! in Beijing. Lublin Science Festival

2019-06-03

Professor Anna Halicka, vice-rector for cooperation with the socio-business environment and Dr Eng. Małgorzata Ciosmak from the Lublin University of Technology told the participants of the Lublin Conference Center about the biggest attractions of this year's Lublin Science Festival, which will take place on September 16-20, 2019. During the event there will be science picnic at Theatre Square in Lublin. Lublin universities and institutions will have their information stands there. Picnic visitors will be able to participate in outdoor science shows and in various competitions. Shows and scientific lectures will take place at the University of Lublin, as well as in Dęblin, Chełm, Zamość and Puławy. The organization of the Lublin Festival of Science 2019 is a task financed from the funds of the Minister of Science and Higher Education designated for disseminating science.

Conference of Rectors of Academic Schools in Poland

2019-06-03

The implementation of the Act 2.0, and in particular the financing of Polish higher education and science were the main topics of the plenary meeting of the Conference of Polish Academic Rectors (KRASP), which on 30-31 May 2019 took place at the University of Warmia and Mazury in Olsztyn. The conference began with the speech of Jarosław Gowin, deputy prime minister, minister of science and higher education. - We worked on the law for three years. It was well prepared and well received by the academic community. It is now implemented without major perturbations. But without ensuring a minimum increase in funding, the Act 2.0 will certainly fail. The expenditures for financing Polish science and higher education should grow as soon as possible. That is why I ask KRASP to support my efforts to increase funding. At the same time, I am asking KRASP for the adoption of the Act 2.0. This is an indisputable condition, assuring the trust of the scholar environment for the government's actions - said Jarosław Gowin.

Researcher of the University of Economics in Poznan receives the Award of the President of the Bank Guarantee Fund

2019-06-03

Dr Marcin Flotyński from the Department of Monetary Policy and Financial Markets of the University of Economics in Poznań received the Award of the President of the Management Board of the Bank Guarantee Fund for the best doctoral thesis. The jury emphasized the high level of the laureate's dissertation «The impact of macro-prudential regulation of long-term liquidity on the stability of commercial banks in Poland». The aim of the competition was to select the best doctoral dissertations in the field of deposit guarantee schemes, restructuring, orderly liquidation of financial institutions, regulatory infrastructure of the financial system, issues related to financial security of banks and financial stability.

Conference „Application of the Succession in the EU Member States”

2019-06-03

The Department of Civil Law and Private International Law of the University of Silesia is organizing a scientific conference „Application of the Succession Regulation in the EU Member States”. The agenda of the event includes a session devoted to the first experiences of European Union member states regarding the application of the inheritance ordinance. The meeting will be attended by: Prof. Maksymilian Pazdan (former dean of the Faculty of Law and Administration, rector of the University of Silesia in the years 1990-1996, doctor honoris causa of the University of Silesia), Prof. Andrea Bonomi (University of Lausanne) and Prof. Christian Kohler (University of Saarbrücken). On September 12, the Faculty of Law and Administration in Katowice is organizing also two discussion panels: «The delimitation of the inheritance bills set by the decree and other statutes» and «Jurisdiction and free movement of judgments and other instruments covered by the inheritance regulation”. More: <https://www.wpia.us.edu.pl/aktualnosci/ogloszenia/ogolne/12854-oczesdzynarodowa-konferencja-naukowa-application-of-the-succession-regulation-in-the-eu-member-states>

Researcher of the University of Silesia to receive Award of the Association of Polish Librarians

2019-06-03

Publication „Modeling of scientific information retrieval process. Strategies and interactions” authored by Dr Arkadiusz Pulikowski from the Institute of Library and Information Science of the University of Silesia won the academic prize of the Polish Librarians Association. The book, which was published by the university publishing house, was awarded in the category of theoretical, methodological and source works. Award of the Polish Librarians Association has been awarded since 1983 and aims to promote authors whose works are essential for the development of theory and improvement of library

and information practice in the librarian community. 11 publications in 4 categories were submitted for this year's competition, and awards were received during the Warsaw Book Fair.

Bank Pekao S.A. to hold a hackaton in Lodz

2019-06-04

On 7-9 June 2019, the Hackathon Bank Pekao SA will be held at the Technological University of Lodz. The awards amount to PLN 10,000. Hackathon Bank Pekao S.A. is a 23-hour interdisciplinary event dedicated to students and graduates of higher education institutions under 30 years of age who have knowledge and experience in IT, big data, marketing, sales and business. Hackathon participants will solve the tasks prepared by the organizers. One of them will be the way to use data from payment terminals. The programming marathon will take place at the Information Technology Center of the Lodz University of Technology. More: <https://www.pekaocoders.pl/lodz>

Wrocław Contemporary Museum to hold a conference „Sociologically of tastes”

2019-06-04

The Wrocław branch of the Polish Sociological Association, Wrocław Contemporary Museum (MWW) and Wrocław Culture Zone are inviting participants to the MWW on June 16 for a discussion „ There is no accounting for taste, taste and life styles through the eyes of a sociologist”. This is the last conference within the program „SocioPerception” this year. The organizers intend to discuss what can be learned about Polish society by looking at people's everyday consumption, free time and participation in culture. The event will be led by Dr Michał Cebula from the Institute of Sociology of the University of Warsaw. It will be attended by Agata Bachórz from the University of Gdańsk, author of a book on Polish tourism to Russia, co-author of studies on participation in Polish culture, researcher of eating practices and Aleksandra Drabina-Rózewicz - PhD student at the Institute of Sociology of the University of Warsaw, observer and pop culture researcher, author of publications on popular culture, gender and the labor market. Student competition Nobel completed

2019-06-05

Student Nobel Prizes were awarded in the competition, organized by the Independent Students' Association. The prize-winners are eight outstanding students representing various fields of science and art. 66 finalists were selected in 7 categories. And the winners in each category are: Medicine and Pharmacy: Dominik Tattera - Jagiellonian University - Collegium Medicum in Krakow IT: Kamil Książek - Silesian University of Technology Activist: Krzysztof Pszczółka - Krakow University of Technology Natural sciences and energy: Maciej Żołądek - AGH University of Science and Technology in Kraków Art: Michał Bylina - Academy of Music in Krakow Socio-economic Sciences: Weronika Wojturska - University of Warsaw Physics and Astronomy: Michał Lipka - University of Warsaw In addition, the Competition

Jury has also decided to award a special prize in the Physics and Astronomy category. It was received by Adam Tużnik - Jagiellonian University in Krakow.

International conference dedicated to intelligent transport systems

2019-06-06

Until June 7, 2019, Krakow University of Technology (PK) is holding the 6th International Conference on Models and Technologies for Intelligent Transport Systems. From June 5, 120 specialists from 52 scientific centers in the world will take part in the event. They will give over 100 papers prepared by 350 authors from 24 countries. The conference every two years brings together the most important global centers and scholars dealing with intelligent transport systems (ITS). It connects the environment of scientists dealing with this subject with the environment of transport system engineers. At the conference, researchers from leading universities propose innovative models of the modern ITS systems - announces Dr Andrzej Szarata, dean of the Civil Engineering Department of the Polish Academy of Sciences.

Lublin University to launch the 4th Test of English

2019-06-06

By June 10, 2019, participants can submit their entries to the fourth Test of English Challenge. It is the largest initiative of this type in the Lublin Province organized by the Promotion Center and the Center for the Teaching and Certification of Foreign Languages at the Maria Curie-Skłodowska University (UMCS) in Lublin. The test will be held on June 14 and is addressed to secondary school and university students from all over the country who are 16 years old and less and are not students, graduates and employees of English, American and applied linguistics, and related fields. The participants are to answer 60 test questions at B2 / C1 level in 45 minutes. Participation in the test is free, and the number of participants is limited to 400 people. More: <https://www.umcs.pl/pl/enqForm,iv-edycja-wielkiego-testu-jezyka-angielskiego-challenge-accepted-14-06-2019-r-formularz-zgloszeniowy,505.html>

University of Silesia to hold the fifth conference „Translation spaces”

2019-06-06

The Institute of Philology of the East Slavic University of Silesia and the Translation Commission at the International Committee of Slavists invite participants to the fifth conference „Translation spaces” on October 24 and 25. The conference will be an opportunity to meet translators representing numerous centers in the country and abroad. A broad approach to the subject, included in the conference title, will allow to take into account different methodological approaches. The subject will be both general issues, as well as detailed phenomena analyzed on the basis of translations of literature and specialist texts. The fifth program will include a new section devoted to the problem of the use of new technologies in the translation. The working languages of the conference will be Polish and Russian. The papers should be sent by 20 June by email to the following e-mail address: przekladu@us.edu.pl

Wroclaw students receive three medals at the competition in Tashkent

2019-06-06

Students of the Wrocław University of Technology won one gold and two bronze medals during the „Youth Innovation” competition held in Tashkent for the best scientific projects carried out by scientists up to the age of 25. The competition was part of the international Construction conference - The Formation of Living Environment organized in the capital of Uzbekistan (FORM-2019). The competition jury rewarded not only creative projects and solutions, but also the way young researchers conducted research (the level of computation and their methodology). The authors of the awarded projects: Grzegorz Nowak, Nikola Dudek and Piotr Prokopowicz are members of the scientific club «Mole» operating at the faculty of civil engineering at the Wrocław University.

Rzeszów University of Technology to hold an interactive knowledge picnic

2019-06-07

On June 8, 2019, the 10th Day of the Discoveries - Interactive Knowledge Picnic will take place at the Rzeszów University of Technology. This is a regular event whose aim is to popularize science and technology in the form of a family picnic. Rzeszów University of Technology is the main organizer of this event. The Explorers' Day is divided into the thematic sectors: the science passage, the technology passage, the culture and art passage, and the square of history. One of the attractions of the 10th Day of the Discoveries will be creating a comet. In an attractive way, viewers will learn about the structure of comets, where they «lived» when they were created and what role they played in the history of the Earth. The viewers will be able to see how solid cometary nucleus will be created from a few basic components. The organizer of this spectacle is Paweł Grochowalski from the Space Research Center of the Polish Academy of Sciences.

Kozminski Academy in Warsaw to organize the conference on electromobility

2019-06-07

Mercedes-Benz Poland and Kozminski Academy (ALK) in Warsaw in cooperation with the Polish Alternative Fuels Association are inviting participants to a conference dedicated to electromobility, which will take place on June 11, 2019 in the Main Auditorium of ALK. The conference is addressed to people who want to update their knowledge about the ongoing electrification processes. The program includes speeches of representatives of the Ministry of Enterprise and Technology, Ministry of Energy, Mercedes-Benz Poland, Polish Alternative Fuels Association, VSB Energie Renewable Poland, Tauron Magenta, Panek Carsharing. During the conference, the issues of the electromobile future and the development of smart cities will be presented. More: <https://www.kozminski.edu.pl/mercedes-benz/>

Lublin Institute of Cultural Studies to hold the Day of Cultural Studies

2019-06-07

The Maria Curie-Skłodowska University (UMCS) in Lublin is organizing the Culture Day on 11 June 2019. The main goal of the event is „a presentation of the role and importance of modern cultural studies for the development of a modern and open society”. The Maria Curie-Skłodowska University has prepared six thematic panels, including lectures, debates and workshops on computer animation, as part of the Cultural Day celebrations. The organizers also prepared meetings with creators and animators of culture as well as graduates of Cultural Studies at UMCS. The event will include artistic events prepared by students. The culmination of the Culture Day will be thematic walks in the Lublin Open-air Museum and on the Jewish Lublin route.

University of Bialystok to hold conference on celebrities and celebrity management

2019-06-07

The Inter-faculty Institute for Cultural Studies and Art of the University of Białystok (UwB) will inaugurate on June 12, 2019 a series of cultural lecturing guest lectures. The first will be delivered by Prof. Wiesław Godzic from the University of Humanities and Social Sciences in Warsaw. Professor Wiesław Godzic is a mediologist and cultural scientist. The title of his lecture is «Celebrities and us, or the management of fame». He announces his lecture: «Who are the main actors of today's media: who is on the stage? They do not watch tv, but they use it.”

Poznan University of Technology to hold the conference of Polish Scientific Networks

2019-06-07

Until June 14, students can register for the 4th Polish Scientific Networks (PSN) conference. The conference will be held at the Lecture Center of the

Poznan University of Technology from September 19 to 21. Participants of the event will discuss the relationship between science and technology as well as modern technologies and innovations in various areas of science - from social to exact sciences. The latest achievements in this area will be presented by scientists from Poland and abroad, in six thematic areas: energy, new materials, information technologies, health care, social media and a large research infrastructure. In addition to scientific sessions, the organizers will provide debates and discussion panels to allow participants to exchange ideas and experience. The conference is organized by the Academy of Young Scientists of the Polish Academy of Sciences, the Scholarship Club of the Foundation for Polish Science and the Ministry of Science and Higher Education.

Katowice Faculty of Philology to hold the conference on the disturbances in the communication process

2019-06-07

The Faculty of Philology and the Institute of the Polish Language of the University of Silesia, the Scientific Association of Young Speech Pathologists, AGERE AUDE - Foundation for Knowledge and Social Dialogue and the Scientific Information Center and Academic Library are inviting participants to a speech therapy conference „Dialogue without barriers. Effective communication in the context of EBP - evidence-based practice”. The event will be held in the Scientific Information Center and the Academic Library. The scientists will talk about issues related to the diagnosis and therapy of communication disorders, the role of contemporary technologies in communication and the relationship between the quality of interpersonal communication and the quality of life. The aim of the conference is to disseminate the achievements and research results in the field of communication science. Its recipients are theoreticians and practitioners in the field of speech therapy, linguistics, communication sciences and its disorders, as well as representatives of social sciences and health sciences.

Poznan scientist to chair the European Soybean Improvement Network

2019-06-07

Dr Jerzy Nawracała, Prof. University of Life Sciences in Poznań, head of the Department of Genetics and Breeding of the Poznan university, was elected chairman of the European Soybean Improvement Network (ESIN) - an organization that connects all who conduct research and deal with soy farming in Europe. The idea of establishing a platform connecting soy researchers and breeders was established in 2018. The first working meeting of ESIN was held in May 2019 in Poznań and was attended by scientists and breeders from Austria, Germany, Serbia, Romania, Moldova and Poland and representatives of the Donau Soya Association, an organization promoting the cultivation of non-genetically modified soy in Europe. In recent years, interest in soybean cultivation has increased in Poland and in Europe. In Europe, the growing area of this plant expands very rapidly - from 2.6 million hectares in 2012 to 4.4 million hectares in 2018. Therefore, in many European countries, programs for breeding new soy varieties have been started.

Program „A talented student - a great student”

2019-06-11

University of Lodz (UŁ) has completed the second program „A talented student - a great student”. 118 pupils from the entire Lodz region attended individual classes conducted by academic staff. The program «A talented student - a great student» provides the opportunity for secondary school students from the entire Lodz region can broaden their skills under the supervision of lecturers, use the university infrastructure and learn about the academic lifestyle even before the decision to choose a particular university. - We wanted to show our University as a place of realizing positive passions, as a great place for conducting research - said Prof. Tomasz Cieślak, vice-rector for student affairs of the University of Lodz, creator of the program. Submit an application to the program at: www.zdolnyuczen.uni.lodz.pl

PhD student of the Wrocław University of Technology to leave for Svalbard with the mission to clean up the Arctic

2019-06-11

Jędrzej Górski, a PhD student at the Faculty of Mechanical Engineering at the Wrocław University of Technology, joined the group of six people who set off for Spitsbergen as part of the Sorkapp Marine Litter Cleanup project. They intend to clean up a fragment of the island's shoreline, and after a year, check how much new trash came from the ocean. Six participants of the expedition will stay for a month on Svalbard - on Palffyodden, located at the entrance of the Hornsund fjord, in the southern part of the Spitsbergen island. During this time, they intend to clean the 23-kilometer stretch of the coast within the Sor-Spitsbergen National Park, stretching from Breineset to Höferpynten. Participants of the expedition are going to segregate the collected waste, separating it into plastic, nets and cables, rubber, glass, metal and hazardous waste, and then transport them to the capital of Svalbard, Longyearbyen to dispose it. The project is an initiative of the forScience Foundation co-financed by the Svalbard Environmental Protection Fund. More: <https://pwr.edu.pl/uczelnia/aktualnosci/doktorant-pwr-wyjezdza-z-misja-na-svalbard-posprzatac-kawalek-arktyki-11225.html>

Professor Jerzy Łuczka of the University of Silesia becomes a member of the editorial board of the journal Scientific Reports

2019-06-11

Professor Jerzy Łuczka, head of the Department of Theoretical Physics at the University of Silesia, became a member of the editorial board of the prestigious journal „Scientific Reports” belonging to the group Nature Research Journals. Professor Łuczka conducts research on classical and quantum statistical physics of non-equilibrium processes, physical basis of quantum information, nanophysics and

modeling of biological and Brownian molecular motors. He was awarded the university prize «Pro Scientia et Arte» for his outstanding achievements in exact sciences. From 2016, he has been a member of the Polish Academy of Learning, and from 2018 a member of the Council of the National Center for Science. «Scientific Reports» publishes the results of research in the field of natural sciences. The editorial team, which includes experts in clinical, biological, chemical, physical and earth sciences, manages the process of reviewing articles.

Lublin university to hold a conference „Innovations in the world of marketing and human resources management”

2019-06-12

The Scientific and Management Sciences Club of the Maria Curie-Skłodowska University (UMCS) in Lublin is organizing on June 14, 2019 the conference „Innovation in the world of marketing and human resources management”, which will be held at the Faculty of Economics of UMCS. This is the first nationwide conference, dedicated to people interested in changes, news, current and future trends in marketing and human resource management. The organizers address it mainly to students and PhD students. The aim of the conference is to exchange experiences, views and insights on development in the fields of marketing and human resource management.

State High School of Applied Sciences in Tarnów to hold 1st Science-Economy-Business Forum

2019-06-12

About 250 people, including students, scientists and representatives of business and the economy took part in the 1st Science-Economy-Business Forum organized by the State Higher Vocational School (PWSZ) in Tarnów. -Only through cooperation, we are able to create synergy for the economically needs of our region. I believe that the invitation we have issued to our current and future partners will result in specific solutions beneficial for students and their future employers - said the opening of the forum, the Rector of the PWSZ, Prof. Eng. Jadwiga Laska. The discussions, which took place on June 6-7, were divided in three panel groups: Students <competences and employers' expectations, Synergy of science and business - development perspectives and Practical education.

Students of the Wrocław University of Science and Technology win the Student Aerospace Challenge

2019-06-12

The model of the aircraft cabin for suborbital flights developed by students of Wrocław University of Science and Technology won the international Student Aerospace Challenge. The final jury evaluated 14 academic projects from all over Europe. Contest participants could choose from ten issues related to suborbital flights. The tasks concerned economic aspects of flight, aerodynamics and flight control, medical issues and aircraft control. Wrocław students, acting as the Innspace group, focused on problems related to the work of crew cabin and its equipment. Student Aerospace Challenge is an annual competition for students from member countries of the European Space Agency. It is organized by the French association promoting space tourism - Astronaute Club Européen. 36 teams applied for this year's competition. The top 14 presented their projects in the final in Paris. More: [https://pwr.edu.](https://pwr.edu.pl/uczelnia/aktualnosci/studenci-pwr-najlepsi-zwy-ciezyli-w-student-aerospace-challenge-11243.html)

University of Economics in Katowice to hold a conference on the protection of consumer interests

2019-06-13

On 16 to 18 June, the University of Economics in Katowice will host an international conference promoting the results of the didactic project „Enhancing Quality in Innovative Higher Education on Consumer Consciousness: Consume-aware.” The University of Economics is the leader of a consortium of 8 European universities implementing the project. The aim of the conference is the exchange of ideas, views and the latest research on the protection of consumer interests on the European market, as well as the integration of the scientific community from Poland and the world interested in consumerism, sustainable consumption and social economy. The project received funding through a competition announced by the European Commission under the Erasmus + Higher Education program in the Strategic Partnerships campaign. More: https://www.ue.katowice.pl/no_cache/uczelnia/aktualnosci/article/international-didactic-conference-on-enhancing-consumer-awareness.html

Polish participation in the Long Night of Science in Berlin

2019-06-13

On Friday, June 14, 2019, the Polish Institute in Berlin and the Ministry of Science and Higher Education are organizing a workshop supporting German-Polish cooperation in science and higher education on the occasion of the Long Night of Science held in the German capital next day. As the National Academic Exchange Agency (NAWA) informs, Long Night of Science is a highly popular event, during which scientific institutions in the largest German cities are opened to visitors who have the opportunity to become acquainted with exact sciences in the form of experiments, lectures or workshops. The

program of the event will include meeting with representatives of NAWA entitled Opportunities for international Scientific Cooperation within the Polish National Agency for the Academic Exchange.

Competition for the name of the star and its planet

2019-06-14

The International Astronomical Union (IAU) together with the Polish Astronomical Society (PTA) has launched a nationwide competition for names for the extrasolar planet and its stars. - The aim of the competition is to increase the awareness of our place in the Universe as the inhabitants of the planet Earth, living under one common sky. Everyone can make a small contribution to describing the cosmos by proposing a name or by voting the proposals - says Dr Krzysztof Czart, National Coordinator of the IAU on Popularization, managing the Polish part of the competition. The IAU offered Poland the name BD + 14 4559- the star and its planet. It is visible in the constellation of Pegasus. Proposals of names can be submit only through the contest website: www.iau100.pl/planety. The deadline is 31 July 2019.

University of Silesia to hold a lecture Extreme CERN - levitation and unusual properties of matter

2019-06-14

The University of Silesia in Katowice is inviting participants on June 15 to the third part of the open CERN lectures, which are to explain the problems studied in the world's largest laboratory. The meeting will start at. 14.00 in the auditorium Nicolaus Copernicus at the Faculty of Mathematics, Physics and Chemistry at ul. Bankowa 14. Lecture «Extreme CERN - levitation and unusual properties of matter» will be delivered by Dr Arkadiusz Gorzawski - a scientist associated with the European Organization for Nuclear Research (CERN) in Geneva and the University of Malta. Participants will be able to learn about the research of CERN. The organization uses the largest and most complex research devices in the world using superconductivity and unusual properties of matter at extremely low temperatures.

Professor Moncarz from Stanford University delivers lecture at the Krakow University of Technology

2019-06-17

On Friday, 14 June 2019, the guest of the Krakow University of Technology (PK) was Prof. Piotr Moncarz from Stanford University, specialist in the field of materials engineering, new technologies and international industry. Professor Moncarz gave a lecture entitled „Engineer and the Digital Revolution. Innovation = Science & Technology + Business „. Professor Moncarz is the director of the Top 500 Innovators program, as well as a co-founder and chairman of the US-Polish Trade Council, an organization supporting cooperation between the United States and Poland. He sits in the council of the National Center for Research and Development, he is a member of the Polish Academy of Sciences, the Russian Academy of Technical Sciences, in 2017 he was elected a member of the American National Academy of

Engineering (NAE). In his lecture, Prof. Moncarz raised the subject of educating future engineers and commercializing research results.

Copernicus Science Center to hold a conference about the exploration of the Moon in the past and today

2019-06-17

As part of the „Meeting with a scientist” series, the Copernicus Science Center in Warsaw is inviting participants on 18 June 2019 for a meeting entitled „Exploration of the Moon in the past and today”, whose guest will be Dr Agata Kołodziejczyk - director of scientific projects at the Analog Astronaut Training Center. Dr Kołodziejczyk is the initiator of the construction of the first in Poland base for simulation Lunares space missions in Piła and the coordinator of the world's first international scientific analogue moon missions and the first educational moon missions in the world. During her internship at the European Space Agency she co-organized the monthly workshops «Moon Village». Scientifically she is involved in the creation of synchronizing biological clocks for spacecraft and spaces isolated from sunlight.

Scientific conference „Treasures of Mexico” to be held in Krakow

2019-06-17

The Mexican Embassy in Poland, the Jagiellonian Library, the Mexican Center of the Jagiellonian University (UJ) in Krakow and the Mexican Center of the National Autonomous University of Mexico with a branch in Berlin are organizing on 19 June 2019 the scientific conference „Treasures of Mexico”. The event will include the presentation of manuscripts from the archive of Alexander Humboldt and objects from the collection «Manuscripta americana» from the former Prussian State Library in Berlin, which is kept in the Jagiellonian Library. The celebrations of the 250th anniversary of the birth of the eminent scientist and researcher, Alexander Humboldt will include the «Treasures of Mexico» conference that

will contribute to the scientific discussions about this great humanist and the history and conquest of Mexico.

University of Bialystok holds the National Conference „Environment-Science-Responsibility“

2019-06-17

On Friday, June 14, 2019, the National Conference on „Environment-Science-Responsibility“ was held at the Institute of Chemistry of the University of Bialystok (UWB). The organizers organized a conference promoting the latest solutions to improve the state of the natural environment. The purpose of the Conference was presentation of diagnoses and key problems concerning the environment in the world, in Poland and in the Podlasie Voivodship as well as presentation of the latest legal solutions regarding waste management in cities, communes and enterprises. Participants of the event also learned about the financial support for projects in the field of waste management and environmental monitoring.

Adam Mickiewicz University in Poznań to hold the IX Youth Ecophilosophical Conference

2019-06-17

The Adam Mickiewicz University in Poznan is inviting participants on June 18 to the IX Youth Ecophilosophy Conference. The meeting this year is organized under the slogan „Water, nature’s great tear“ and will take place in the hall of the faculty of political science and journalism of the Poznań university. As every year, the conference will provide a large amount of knowledge from such various fields as the humanities, social and natural sciences. It will also be an opportunity to have fun, and even to check the hydration of the body. The conference is addressed to secondary school and university students. It will include a photo competition «Expressed by a drop of water « and the collection of plastic caps through which the organizers want to help a handicapped girl.

2020 - year of Roman Ingarden

2019-06-18

The Polish Sejm adopted a resolution in which it sets 2020 as the Year of Roman Ingarden, one of the greatest Polish philosophers. Roman Ingarden was born in 1893 in Krakow. He studied mathematics and philosophy in Lvov and Göttingen, as well as in Vienna and Freiburg- Breisgau. The promoter of his doctoral thesis, defended in 1918, was Edmund Husserl. Roman Ingarden from 1933 was a professor at the Jan Kazimierz University in Lvov. After the WWII, he worked at the Nicolaus Copernicus University in Toruń and the Jagiellonian University in Krakow. He was also a member of the Polish Academy of Learning and the Polish Academy of Sciences. He published a total of 224 works, he wrote mainly in Polish and German. Many of his works have been translated into foreign languages. He made several translations into Polish (including Critiques of Pure Reason by Immanuel Kant). He died in 1970.

Competition for the best electoral poll

2019-06-18

The Center for Quantitative Research on Politics of the Jagiellonian University in Krakow for the 4th time settled the Pythian Cup Competition for the best electoral poll. This time it assessed the May elections to the European Parliament. The Silver Pythium Cup for the best poll was received by CBM Indicator for the poll of May 24, 2019 for the Wiadomości. The bronze medals were awarded to the Estymator for the poll from May 22-23, 2019 and the IBRIS for the poll from May 22-23, 2019, made for the Dziennik Gazeta Prawna, RMF FM and rmf24.pl. In addition, the Award Committee compared forecasts published before the elections and decided to award distinctions to: PARR and Badania.pro (co-authors of the forecast of the division of EU parliament seats for the Onet.pl portal) and individually to Marcin Palade.

Scientific conference on cybersecurity to be held in Warsaw

2019-06-19

On June 25, 2019 the Warsaw School of Management-University and the European Cyber Intelligence Institute are organizing an International Scientific Conference „The optimal model of cyber security for Poland and the coordination of services“. The conference is addressed to scientists, specialists, representatives of public administration and all institutions and persons interested in cyber security issues. The goal of the event is to analyze cybersecurity in the areas of management, new technologies, international relations and security. During the conference, the participants will discuss: Safety management at the enterprise and public administration level; Threats to the state in cyberspace: identification of sources and threats (activities of private and public entities); Comparative analysis of selected national cyber security strategies (Israel, United States, China, Russia, Great Britain).

TopMinds program assessed

2019-06-19

The training and mentoring program TopMinds has been assessed by the Ministry of Science and Higher Education. 43 participants selected from 185 candidates from 65 Polish universities took part in the program. The TopMinds program was created to support those students from Polish universities who need support in undertaking professional challenges and finding their own path to achieve goals. Such support is provided by experienced mentors - graduates of the Fulbright and Top 500 Innovators Programs, who since 2016 have been participated in this program. The organizers received the most applications from students from the University of Warsaw, Warsaw University of Technology, Warsaw Medical University, Wrocław University, Wrocław University of Environmental and Life Sciences and the Jagiellonian University.

Professor Janusz Bujnicki wins the Young Academy of Europe Prize

2019-06-19

Professor Janusz Bujnicki, head of the Laboratory of Bioinformatics and Protein Engineering of the International Institute of Molecular and Cell Biology in Warsaw, has been awarded this year's Young Academy of Europe Prize. He was nominated for the award by the Academy of Young Scientists of the Polish Academy of Sciences (PAN). Professor Bujnicki is a biologist by profession and one of the authorities in the field of bioinformatics in Poland. In his work he combines theoretical and experimental research. His research deals with the development of new algorithms and their implementation in the form of computer software, the use of these methods for the analysis of biological data and experimental research. He is the author of over 300 publications and a laureate of EMBO / HHMI Young Investigator Program and many other prizes and scholarships. In 2010 he received the prestigious ERC Starting Grant. In 2013, he won the national competition «Poles with verve» in the Science category.

Lodz University of Technology to launch National Team Competition for the Creation of Computer Games

2019-06-19

Students from all over Poland on 27-28 June 2019 will present their own computer games and virtual reality environments during the final of the 11th Polish Team Game Competition of Computer Games organized by the Faculty of Technical Physics, Computer Science and Applied Mathematics of the Lodz University of Technology (FTIMS Pł.). The teams will present original ideas for computer games and virtual reality environments. The jurors will verify to what extent the participants have been able to complete the roles and competences necessary to create a prototype of the project - said Radosław Bednarski from the Institute of Computer Science at FTIMS Pł. The competition is a unique forum in Poland that connects lecturers, students, school students and companies associated with the game industry. About 20 teams from Poland applied for the competition. The winners will be awarded with numerous prizes.

15. Philosophical Rally in Krakow

2019-06-21

The Institute of Philosophy of the Jagiellonian University in Krakow co-organizes the 15th Philosophical Rally, which will be held on 28-30 June 2019. The conference is organized annually by the Center for Philosophical Research together with one of the universities. This year, the Jagiellonian University is the co-organizer and host of the Rally. Philosophical Summit is a conference addressed to students, PhD students and researchers dealing with philosophy and related fields. The aim of the Rally is to present the state of the latest research conducted within the philosophy. The conference is also to promote the integration of participants with different experience levels and from different research centers. The lectures of students and PhD students are accompanied by the appearance of significant researchers.

VIII Congress of Metrology held in Augustów

2019-06-21

On June 9-13, 2019, the VIII Congress of Metrology took place in Augustów. The meeting was organized by the Faculty of Electrical Engineering and the Faculty of Mechanical Engineering of the Białystok University of Technology in cooperation with the Białystok Branch of the Polish Society of Theoretical and Applied Electrotechnics. The aim of the Congress of Metrology was to exchange views and experiences and present the results of research on the problems of modern metrology. The subject of unit measurement standards, service of measures, evaluation of measurement accuracy, measurement and data transmission systems, measuring transducers, signal processing methods and measurements of mechanical, electrical, geometric and chemical quantities were discussed. The Congress of Metrology is a scientific conference in which the majority of national centers dealing with metrology and its application take part. Scientific support over the Congress was taken up by the Committee of Metrology and Scientific Equipment of the Polish Academy of Sciences.

University of Wroclaw to launch a Campaign for clean air

2019-06-24

The Institute of Geography and Regional Development of the University of Wroclaw begins the project „Do you know what you breathe? - education and information campaign for cleaner air - LIFE-MAPPINGAIR / PL „. The project is financed from the European Commission funds under the LIFE financial instrument and the National Fund for Environmental Protection and Water Management. The project combines scientific and practical aspects to meet environmental and social needs, such as improving air quality or universal access to reliable information on air pollution in their places of residence. The subject of the project refers to the main research problems in Poland and is part of the assumptions of the EU environmental policy. The total project budget is over PLN 8.2 million. The venture partners include

Wrocław University of Science and Technology and Wrocław Network and Supercomputing Center and the City Hall of Bydgoszcz.

Institute of Engineering and Biomedical Materials and Institute of Materials to hold the Engineering Material Technologies Conference in Silesia'2019 in October in Zawiercie

2019-06-24

Institute of Engineering and Biomedical Materials and Institute of Materials Engineering of the Silesian University of Technology, Łukasiewicz Research Network, Institute of Non-Ferrous Metals and Institute of Ferrous Metallurgy and the Association of Graduates of the Silesian University of Technology and the Club of Materials Science and Engineering are inviting participants to the scientific conference Material Technologies in Silesia'01019. The organizers of the conference, planned from October 13 to 16, in Zawiercie, are planning to discuss the coordination of research and implementation of material technologies most economically important as well as the system of dual education and industry expectations in relation to the technical university graduate. Also, they intend to talk about the issue of product quality of planning and manufacturing technology, quality engineering of manufacturing processes, technological aspects of quality: material, design, product and laboratory tests. More: <http://mts.polsl.pl/>

Wrocław Technology Park to launch SurTec laboratories

2019-06-25

The SurTec company officially opened its office and laboratories in the Gamma building of Wrocław Technology Park (WPT). The symbolic ribbon was cut by the general director of Dr Karsten Grünke and Jochen Liebert, Global Manager Poland. SurTec develops, produces and supplies chemical preparations for metal surface treatment (cleaning, phosphatizing, galvanic coatings, preparation for paint). The areas of application include: industrial parts cleaning, metal pre-treatment, functional and decorative electrolysis. The company provides almost all services dealing with surface treatment in automotive, aerospace, construction and architectural, medical, electronic, renewable energy and mechanical industries.

Academy of Physical Education in Poznań to hold a lecture "Influence of flow on the player's success"

2019-06-25

The Academy of Physical Education in Poznań and the City of Poznań are inviting participants to an open lecture, delivered by Prof. Tony Morris from Victoria University in Melbourne: „Flow in Physical Activity: Research on a Positive Perspective for Sports Performers and Exercisers“. The lecture participants will talk about the phenomenon of the flow state, the possibilities of its recognition, experiencing, using it, in the sporting perspective. The flow state cannot be experienced „by shortcuts“ - it is necessary to meet the conditions based on delivering satisfying sensations and the ability to control consciousness. Professor Morris is an authority in the field of sports psychology worldwide. He is a honorary secretary of the British Association of Sport Sciences, the first chairman of the College of Sport Psychologists of the Australian Psychological Association and chairman of the International Society of Sports Psychology.

Researcher of the Nicolaus Copernicus University becomes the laureate of Stanisław Ossowski Prize

2019-06-26

Dr Katarzyna Suwada from the Institute of Sociology at the Nicolaus Copernicus University in Toruń (UMK) became the laureate of Stanisław Ossowski Prize, awarded by the Polish Sociological Society for the book „Men, Fathering and the Gender Trap. Sweden and Poland Compared“- comparing paternity in Poland and Sweden. The prize was established in 1973. It is awarded to the authors of the younger generation for outstanding sociological or from related disciplines. Dr Katarzyna Suwada is an adjunct at the Department of Life Quality Research at the Institute of Sociology at the Nicolaus Copernicus University. In the research work she deals with problems of fatherhood and masculinity, gender inequality, way of organizing care work, family sociology, family policy and an aging society. Shee is a member of the International Sociological Association, the European Sociological Association and the Polish Gender Society.

Researchers of the University of Gdańsk and the Forest Research Institute to the rescue of the oak alley

2019-06-26

The patented biological liquid created by the scientists of the University of Gdańsk and the Forestry Research Institute can save the oak alley at the provincial road near Pelplin attacked by nun moths. All attempts to save the avenue have been ineffective, and the use of chemicals in close proximity to farms and other vegetation - undesirable. Hence, in cooperation with the Voivodship Roads Authority, with the support of the Marshal's Office of Pomerania the alley was sprayed with biological liquid. The applied preparation contains a suspension of the biological pathogenic factor, which often causes massive extermination of caterpillars, which leads to the collapse of the pest gradation. Due to the lack of induction of resistance and high selectivity,

as well as complete safety for animals and humans, spraying a biological preparation is an opportunity to save a two-kilometer long alley. More: https://ug.edu.pl/media/aktualnosci/89271/szansa_na_ochrone_alei_debowej_dzieki_wynalazkowi_naukowcow_z_uniwersytetu_gdanskiego

Scientists of the Medical University of Poznan to receive Tanner Award

2019-06-26

Dr Piotr Rzymiski head of the Department of Environmental Medicine at the Poznan University of Medical Sciences, and his team received the Tanner's Award from the American Institute of Food Technologists. The award-winning work «Potential of cultivated *Ganoderma lucidum* mushrooms for the production of supplements enriched with essential elements» describes the method of cultivating yellow lacustrine on modified substrates leading to the production of food enriched with selenium, zinc and copper. The Institute of Food Technologists (IFT) grants the prizes to the authors of the best-quoted research papers published in the Journal of Food Science. The award was presented during the nineteenth international IFT convention, which took place in June in New Orleans.

Professor Janusz Bujnicki received the prize of the European organization Young Academy of Europe

2019-06-26

Professor Janusz Bujnicki, head of the Laboratory of Bioinformatics of the Faculty of Biology at the Adam Mickiewicz University in Poznan, received the prize of the European Youth Academy of Europe (YAE). YAE is a pan-European, bottom-up initiative of a group of recognized European young researchers for developing networking, scientific exchange and science policy. The André Mischke Young Academy Award for Prize for Science and Policy is awarded every year to young researchers in recognition of their outstanding achievements and contribution to key areas of YAE, including supporting science, shaping evidence-based policy and scientific communication. Janusz M. Bujnicki is a professor of biological sciences and head of the research group at the International Institute of Molecular and Cell Biology in Warsaw and at the Adam Mickiewicz University in Poznań. In his research he combines bioinformatics, structural biology and synthetic biology.

The fourth student competition „Make a bike of wood” completed

2019-06-26

The University of Life Sciences in Poznan completed the fourth contest „Make a bike of wood”. The competition was won by Michał Kasperski, a student of the wood technology department for his project „Lady Woodka”. The goal of the «Make a bike of wood» competition is to promote wood as a construction material and to promote technical culture and healthy lifestyle for young people. To be allowed to competition, the project must have at least a frame made of wood or wood-based materials. Other elements and accessories may be made of non-wood material. The bicycle must perform a transport function. Seven vehicles were submitted this year. The projects included various new solutions - from a bicycle having a gear transmission instead of a

chain to a 3-person bicycle with a length exceeding 3 meters. The winning vehicle was made of plywood and parts from an old bicycle.

Naval Academy in Gdynia hosts the 2nd Forum Vision of Development

2019-06-27

The Naval Academy in Gdynia will host the 2nd Forum Vision of Development. 24 and 25 June the forum will include one hundred debates commemorating the century of regaining independence. 5,000 participants and 500 authorities in over a dozen thematic blocks will visit the forum. The Forum is organized under the honorary patronage of the Prime Minister Mateusz Morawiecki, focuses on the most important challenges and issues currently facing the domestic economy: innovation, eco-mobility, energy, automation of enterprises, corporate social responsibility. The debates will concern investment, defense, research and development, health, culture and art and future technologies and marine economy and topics from the last Forum including so-called silver economy, or the use of seniors' knowledge, experience and professional potential.

Professor Dariusz Szostek from the University of Opole becomes a member of EUIPO

2019-06-27

Professor Dariusz Szostek from the Faculty of Law and Administration at the University of Opole became a member of EUIPO - the European Union Intellectual Property Office, which registers trademarks and community industrial designs. Professor Szostek specializes in the law of new technologies - legal aspects of blockchain, DLT artificial intelligence and also consumer law. He is an expert in the field of electronic identification and authentication methods. He participates in numerous scientific conferences and legislative works on legal regulations concerning new technologies. - We want consumers to not be cheated. We strive, for example, to easily verify if you are dealing with an original or counterfeit product. Already in July this year, a pilot pro-

gram is launched with the participation of European entrepreneurs interested in the protection of their goods and services - says the researcher.

Adam Mickiewicz University in Poznan to have its own asteroid

2019-06-28

Astronomers of the Adam Mickiewicz University in Poznań decided to put their Alma Mater in the centenary of the university in the stars. They contacted Czech colleagues who have discovered many asteroids and asked for giving the name of the university to one of them. The asteroid 96765, which will receive the name chosen by the University community during the competition, is a rock object with a diameter of approx. 3 km, in the shape reminiscent of the classic Poznań potato «pyra». A day on this planetoid lasts about 20 hours. It has no atmosphere, and the gravity is so small that the astronaut standing on its surface would have difficulty to walk, because each step would send him in a orbit. There is already a «university» object rotating around the Sun - the International Astronomical Union has given the asteroid 82937 the name «Lesicki», in honor of Prof. Andrzej Lesicki, rector of UAM. «Lesicki» has a diameter of about 7 km and a shape resembling a kiwi fruit. Voting link: http://www.astro.amu.edu.pl/linki/planetoida_dla_uam/

World Congress of Historians to be held next year in Poznan

2019-07-01

Poznań will be the host of the XXIII International Congress of Historical Sciences 2020. Agreement on cooperation in the organization of the congress was signed by: mayor of Poznań Jacek Jaśkowiak, rector of the University of Adam Mickiewicz in Poznań, Prof. Andrzej Lesicki and the president of the Poznań Local Tourist Organization, Jan Mazurczak. The organizer of the congress is the International Committee of Historical Sciences - an association of historians from around the world established in Geneva in 1926. The event takes place every five years in different parts of the world. The congress will include over 100 various thematic panels, specialist sessions and discussions on important issues from antiquity to the present day. The Poznań partners will launch the so-called Research Forum, during which universities, research institutes and foundations will present their research projects. The Congress will also be accompanied by the International Historical Book Fair. More: <https://amu.edu.pl/dla-mediow/komunikaty-prasowe/swiatowy-kongres-historkow-w-poznaniu>

Japanese prince's couple visiting the Jagiellonian University in Krakow

2019-07-02

The brother of Emperor of Japan Naruhito Prince Akishino and his wife, Princess Kiko, visited the Jagiellonian University (UJ). The couple visited the Jagiellonian University Collegium Maius Museum and signed in the memorial book. Their visit at the University of Krakow were part of the official visit of the Japanese heir to the throne in Poland on the occasion of a century of establishing Polish-Japanese diplomatic relations. The visit began with visiting the Jagiellonian Chamber and the treasury at the Collegium Maius. Then the guests went to Stuba Communis, where the rector of the Jagiellonian University Prof. Wojciech Nowak and the director of the Museum of the Jagiellonian University Prof. Krzysztof Stopka introduced the centuries-long history of the Jagiellonian University to the prince and

the princess. Prince Akishino received a replica of the 16th century Globus Jagiellonicus - the oldest globe in the world, showing the North and South Americas.

Dr Piotr Achinger receives the Medal of the Young Scientist of the Warsaw University of Technology

2019-07-02

Dr Piotr Achinger from the Mathematical Institute of the Polish Academy of Sciences received the Medal of the Young Scientist awarded by the Warsaw University of Technology for his breakthrough in research on the topology of algebraic manifolds and their applications. The Young Scholar Medal, established in 2007, is awarded for outstanding and recognized achievements in the field of science and technical innovation and other outstanding creative achievements. The medal is given by the rector of the Warsaw University of Technology at the request of the Medal Chapter to a scholar who is under 35 years. The distinction is to promote the achievements of young scientists characterized by the independence of creative concepts and the special dynamics of development. Dr Piotr Achinger is one of the four ERC Starting Grant 2018 winners. He received the grant of EUR 1 007 500 for the project about the acronym KAPIBARA (Homory Theory of Algebraic Varieties and Wild Ramification), which deals with the broadly understood topology of algebraic manifolds, with applications for arithmetic, mathematical physics and differential equations. „

Record flight of drone from Gdynia

2019-07-02

Students of the third High School Navy in Gdynia, together with the Pelixar engineers from the Pomeranian Science and Technology Park Gdynia, made the first in Poland documented drone meteorological and biological measurement at an altitude of 20.5 km. The drone was elevated to 20.5 km by the stratospheric balloon. There it disconnected and returned itself to the starting place. The launching of

a drone with a balloon solved the problem of lack of control over the place of landing of the research material and guarantees greater efficiency and better quality of measurements. The flight is part of a 3-SAT space project carried out by students of a high school in Gdynia together with partners. Apart from the help of Park companies, the youth could count on the support of the Civil Aviation Office, the Polish Air Navigation Services Agency and the Polish Army as well as experts from the Institute of Meteorology and Water Management and the University of Gdańsk.

Academy of Land Forces to hold conference on the training of officers in the Polish Army

2019-07-02

The Academy of Land Forces in Wrocław is holding a scientific conference entitled „Education of officers in the Polish Army - opportunities, challenges, barriers”. The speakers analyzed the education process of cadets carried out in military academies and discussed its effective optimization. In the opinion of the participants, the contemporary military activities require continuous expansion of knowledge, creativity, a sense of social responsibility and development of professional competences and skills from the commanders, and the current battlefield requires harmonious cooperation with local communities and counteracting the attacks of information war. The speeches also indicated the need to improve the recruitment and formation of commanders, professionals in command in modern military operations, with particular reference to hybrid wars. It is to training officers capable of counteracting cyberattacks, as well as using artificial intelligence in the process of command. Collegium Civitas organizes the first meeting of Concilium Civitas

2019-07-03

On 9 July 2019 in the Palace of Culture and Science the Department of Journalism and New Media Collegium Civitas in Warsaw is organizing the first meeting of the Concilium Civitas - an independent initiative of a group of Polish professors of social sciences working at foreign universities. Concilium Civitas, or civic council has organized by dozens of Polish professors of social sciences working at foreign universities. The initiators were Prof. Grzegorz Ekiert (sociologist, Harvard University), Prof. Anna Grzymała-Busse (political scientist, Stanford University), Prof. Jan Kubik (anthropologist, Rutgers University), Prof. Wojciech Sadurski (lawyer, University of Sydney) and Prof. Jan Zielonka (Europeanist, University of Oxford). On 9th and 10th July members of Concilium Civitas will gather for their first meeting in Warsaw to discuss the most important problems of Poland and the world. More: <http://www.conciliumcivitas.pl/>

Professor Grzegorz Kołodko becomes a member of the Europaea Academia

2019-07-04

Professor Grzegorz Kołodko was invited to be a member of the Academia Europaea group, an organization associating 4,000 scientists, including 72 Nobel Prize winners. He will be the first economist from Poland to join this organization. Professor Grzegorz W. Kołodko works at the Department of Economics of Kozminsky Academy (ALK) and manages the Research Center for Transformation, Integration and Globalization of TIGER affiliated with ALK. After completing public activities as deputy prime minister and minister of finance in four governments (in 1994-2003) he devoted himself to scientific activity. He is the author of several hundred scientific articles and 50 books. The trilogy „Wandering world” was translated into several languages and received the greatest publicity. The Academia Europaea organization was founded in 1988 in Lon-

don as the initiative of the Royal Society, the world's oldest scientific society founded in the 17th century and the Swedish Academy of Sciences. It brings together outstanding specialists from all fields of science.

Minister of Investment and Development awarded scholars for work in the geoinformation

2019-07-05

The Minister of Investment and Development, Jerzy Kwieciński has awarded scholars for diploma theses, PhD and postPhD dissertations, publications and innovative solutions in the field of geoinformation. In total, 19 diploma theses, 3 habilitation and PhD dissertations, 2 national publications and 4 innovative solutions in the field of geoinformation were submitted for the competition. In the category of engineering works, the awards were given to: Klaudia Hatzka and Paulina Syrokosz from the Faculty of Geodesy and Cartography of the Warsaw University of Technology and Dominik Niekurzak from the Department of Geodesy, Spatial Engineering and Construction of the University of Warmia and Mazury in Olsztyn. In the master's thesis category, the prizes were received by: Andrzej Szeszko, Anita Dylak, Magdalena Grudzień, Weronika Tulkowska and Monika Władyka from the Faculty of Geodesy and Cartography of the Warsaw University of Technology and Paweł Borek from the Mining and Environmental Engineering Department of the AGH University of Science and Technology in Krakow.

Scientists from the Koszalin University of Technology and the Maritime Fisheries Institute receive medal

2019-07-05

The research team from the Koszalin University of Technology and the Maritime Fisheries Institute - National Research Institute received the Mercurius Gedanensis medal at the 15th International Fair of Fish Processing and Products POLFISH 2019 in Gdańsk. Researchers were awarded in the tech-

nology category for designing a vacuum sweeper for whole or headless carps and other fishes. The design and prototype of the device were created as part of the research project «A comprehensive carp processing system for modern food and feed production». The project also brought other devices, including carp beheader and fishbones cutter for carp fillets. The devices are provided by the laboratory of the Department of Processes and Equipment of the Food Industry of the Koszalin university. They are used to educate students in the field of Food Technology and Human Nutrition and are made available for tests.

Foundation for Polish Science awarded Prof. Maciej W. Grabski prizes

2019-07-08

The Foundation for Polish Science (FNP) for the second time awarded Prof. Maciej W. Grabski prizes for scholars enhancing social understanding of science. This year's laureates were Fr. Prof. Michał Heller, director of the Center for Copernicus of Interdisciplinary Research in Kraków and Prof. Jan Madey from the University of Warsaw. The prize was established in 2016 to commemorate Prof. Maciej W. Grabski, president of the FNP in 1992-2005. It is awarded to people who promote and explain methods of scientific inference, present the influence of science and Poland's civilization development, presenting the results of research in an accessible way, educate the public to distinguish „good” and „bad” learning, that is, research based on a reliable method and rational application of research against those that do not meet these criteria, and disseminate verified scientific arguments in the public debate. The award is a cash prize of PLN 10,000.

Polish diaspora launches Choreography Study in Rzeszów

2019-07-09

Poles from Australia, Belarus, Canada, Germany, Russia, Ukraine, Great Britain, France, Kazakhstan, Hungary and Argentina arrived at Rzeszów, where for three weeks at the facilities of the Rzeszów University of Technology they will have classes for participants of the Polish Choreographic Study. Welcome concert titled «Polish Artists of the Nations» combined with awarding certificates to new students took place in the concert hall of the University of Rzeszów. Then, at the Rzeszów University of Technology (PRz), all the guests were greeted by Prof. Grzegorz Ostasz, Vice-Rector for International Cooperation PRz. -I am very happy that city of Rzeszów and Rzeszów University of Technology are once again the capital of folk dance for Polish diaspora teams. I wish you obtain the best experience during your stay in Rzeszów and develop your artistic passions and talents - said Prof. Ostasz. Rzeszów is the only place in the world educating choreographers of Polish folk dance. The Choreographic Study was established in 1998 on the initiative of the Rzeszów branch of the Polish Community.

Researcher of the University of Economics in Katowice received CARS 2019 Scientific Award

2019-07-09

Dr Marzena Czarnecka from the Department of Law and Insurance of the University of Economics in Katowice received the CARS award for outstanding scientific achievements in the field of competition protection economics and regulation of infrastructural sectors. She was awarded for the book «Information obligations and consumer behavior on the electricity market. Study of the law economy», published by C.H.Beck Publishing House. The CARS award is a distinction for outstanding scientific achievements in the three years preceding its granting. The selection of the laureate is decided by a specially appointed jury and the authors of works

in the field of law or economy of regulation of infrastructural sectors with at least a PhD degree in legal or economic sciences.

Government adopts a draft amendment to the Act on the Polish Academy of Sciences

2019-07-11

The Council of Ministers adopted a draft amendment to the Act on the Polish Academy of Sciences (PAN) and certain other acts. The amendment specifies the minimum salaries for researchers of the PAN institutes and the Łukasiewicz network, and gives the possibility to deduct 50 percent of the costs of obtaining revenues to the total remuneration. The government reported earlier, that «the purpose of the bill is to regulate the issue of minimum wages in respect of scholars of the Polish Academy of Sciences.» The Government Information Center informs that the introduction of minimum salaries for scientists of PAN institutes, research institutes, the Łukasiewicz research network institutes and the International Institute of Molecular and Cell Biology in Warsaw will provide the equal level of minimum salaries with the staff of state universities. More: <https://bip.kprm.gov.pl/kpr/form/r53523842833,Projekt-ustawy-o-zmianie-ustawy-o-Polskiej-Akademii-Nauk-oraz-niektorych-innych-.html>

Competition for the best master's thesis „Wood in Architecture 2019”

2019-07-12

Białystok University of Technology (PB) is inviting participants to take part in the nationwide competition „Wood in Architecture 2019”, for the best master thesis, which show the advantages of wood as a construction, building and ending material. The competition is the result of cooperation of the Architecture Department PB with Unibep SA and Danwood SA. The Podlasie region has always been associated with wooden architecture, and both companies, based in Bielsk Podlaski, belong to the largest producers of wooden dwellings in Eu-

rope. The works can be submitted from October 1 to October 22. Jury of the competition under the Dean of the Faculty of Architecture PB Dr Eng. Aleksandr Asanowicz will assess the works and award the following prizes: First Prize - PLN 8,000, Second Prize - PLN 6,000, Third Prize - PLN 4,000 and two equivalent additional prizes - PLN 2,000 each. More: <http://drewnowarchitekturze.pl/index.php/regulamin/>

Students of the West Pomeranian University of Technology reach the final of the international competition

2019-07-12

Students of the Faculty of Civil Engineering and Architecture of the West Pomeranian University of Technology have reached the final of the competition for the design of the Embassy of the Czech Republic in Addis Ababa, Ethiopia. The contest organized by the Ministry of Interior of the Czech Republic, the Architecture Department of the Czech University of Technology in Prague and the Inspireli Awards were received by 281 works from around the world. Anna Mierzyńska and Andrzej Chuchra - students of master's studies in the field of architecture at the Faculty of Civil Engineering and Architecture qualified for the final. The inspiration for the creation of their project has become a symbol of the Czech Republic a leaf of lime tree. The outline of the leaf has been transformed into forms of ceramic shapes, from which the characteristic openwork shutters were designed. The whole project is designed in a laterite inspired color, a local sedimentary rock that is characteristic for regions with a humid and hot climate.

Polish Television to launch again „Astronarium” program

2019-07-15

Polish Astronomical Society (PTA) and Polish Television S.A. (TVP) since Thursday, 11 July 2019 began broadcasting again series of „Astronarium”, a popular science television program about astronomy and space exploration. The new episodes will be broadcasted on the nationwide TVP 3, with premiere broadcasts every two weeks on Thursdays at 17:00 and with later repetitions. Shortly after the premiere of the television episodes will also be available on YouTube channel <https://www.youtube.com/AstronariumPL>. The «Astronarium» series premiered in 2015. So far, 77 episodes have been created, reaching the cumulative emission range (premiere plus replays) on tv, even with about a million viewers per episode. On YouTube, the total number of viewers exceeded 5 million. The new series of episodes will be realized in 2019-2020. The first episode of the new series is devoted to the recent scientific sensation - the first in the history image of the black hole.

Silesian University of Technology to examine the past and the future of industry

2019-07-15

The Laboratory of Research and Analyzes of Work Conditions in Industrial Professions will be created at the Silesian University of Technology. It is a joint initiative of the University of Gliwice and the Association of Tarnogórska Land Lovers, co-financed with the amount of PLN 1.5 million under the „Dialogue” program of the Ministry of Science and Higher Education. The laboratory will deal with extending interdisciplinary cooperation between representatives of the humanities and technical sciences, to deepen research on the working conditions of industrial professions in the past, present and future. The task of laboratory, which is part of the International Center for Interdisciplinary Research, will be to show how the industry in Silesia changed from the starting the first mines to the modern Revolution 4.0 in factories. The laboratory will be a unique place nation-

wide, which will take care of an in-depth description and study of industrial works in Silesia from pre-history through present times to futuristic visions. More: <https://www.polsl.pl/Lists/Aktualnosc/Uczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci&Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2782>

Professor Samoć awarded the French-Polish Scientific Award 2019

2019-07-16

Professor Marek Samoć received from the French Chemical Society (SCF) the French-Polish Scientific Award 2019. The prize was awarded for outstanding achievements in the field of non-linear optical properties of inorganic and organometallic compounds, conjugated polymers and quantum dots. Professor Eng. Marek Samoć in 2016 received the Award of the Foundation of Polish Science in the field of chemical sciences and materials for research on nanostructured materials for nonlinear optics. He is also the laureate of the WELCOME (2008) and MASTER (2013) programs. Marek Samoć started his scientific career at the Faculty of Chemistry of the Wrocław University of Science and Technology, where he received his PhD and postPhD title. In the 1980s he conducted research at Dartmouth College and at the University of Buffalo (USA). From 1991 to 2008 he worked at the Center of Laser Physics at the Australian National University in Canberra (Australia). Professor is a member of the National Science Center Council.

Team of the University of Economics in Katowice leads in the Global Management Challenge

2019-07-16

The team of the University of Economics in Katowice „GoldenEye”, is the first Polish representation for 9 years, which entered the international finals of the 39th Global Management Challenge - the largest business simulation in the world. A total of 19 teams from 17 countries participated in the world finals

in Yekaterinburg. The team «GoldenEye» of Damian Podgórski, Justyna Najda (students) and Marcin Szewczyk (graduate), finally took the 7th place. The Global Management Challenge is the world's largest business simulation and an extensive strategic game. The project has been organized since 1980. The initiative has already gathered over half a million participants worldwide. The participants of the simulation are managers, specialists, young talents, also students with an economic profile, who play the virtual company board, and their task is to manage the company to achieve the best financial result on the virtual market. Deputy Prime Minister Gowin announces the reform of the Polish Academy of Sciences

2019-07-17

- In this term, we reformed the universities. In the future, we need to reform the institution, where the great potential is accumulated, i.e. the Polish Academy of Sciences - said on July 15, 2019 Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin. He also drew attention to the need to improve the efficiency of the use of funds from the European Union by scientists. - We have been paying extra to the EU science budget so we are looking forward for the results. Recently, Polish scholars have received three grants in a prestigious competition. We have potential. The Ministry will support scientists in applying for these grants - assured the head of the Ministry of Science.

Białystok University of Technology to launch exhibition „Polish science in the interwar period”

2019-07-17

By July 19, 2019, the Białystok University of Technology (PB) will host an exhibition prepared by the Ministry of Science and Higher Education regarding Polish science and the most prominent scientists of the interwar period of 1918-1939. The 52 presented scientists include: the creator of modern cartography - Eugeniusz Romer, the author of the first European hydro power plants - Gabriel Narutowicz (the first president of the Republic of Poland), the constructor of the first welded bridge - Stefan Bryła, or Ludwik Hirsfeld, who determined the blood groups accepted all over the world. The exhibition also present pictures of the inventor of the tank periscope - Rudolf Gundlach, walkie-talkie co-founder - Henryk Magnuski and representatives of the Lvov School of Mathematics. In the inter-war period in Poland, there were 25 higher education institutions, including public schools: 5 universities and 2 technical universities. 48 thousand students were educated at these universities.

PhD student of the University of Wrocław reaches the final of the International Geopolitical Olympiad

2019-07-17

PhD student at the Institute of International Studies at the University of Wrocław, Aleksy Borówka, was promoted with the first result to the group of finalists of the 2nd International Geopolitical Olympiad. Borówka scored 54 points out of 60. It was the best score of 20 finalists from six countries: Poland, Great Britain, Hungary, Ukraine, Germany and Belarus. The success of the representative of the University of Wrocław is even greater because he won for the second time in the district final, and in the last year's national final he took third place. The International Geopolitical Olympiad is an initiative of the Polish Geopolitical Society addressed to young people interested in geopolitics - an inter-

disciplinary field of knowledge of political science, geography, international relations, military sciences and national security. The final of the competition will take place in November at the Congress of Polish Geopolitics.

Archaeologists of the University of Warsaw in autumn 2019 to start works in Ethiopia

2019-07-18

In the autumn of 2019, scientists from the Center of Mediterranean Archeology of the University of Warsaw (OŚ UW) will begin excavation works in a completely new area - in the Ethiopian region of Tigray, bordering Sudan and Eritrea under the joint program between the University of Warsaw and the University of Mekele. The project manager is the Italian researcher Dr Michela Gaudiello, who has experience in conducting archaeological research in Ethiopia, and her knowledge of archaeological material and historical issues will be crucial for selecting future research sites for the first Polish excavation project in Ethiopia. North-East Africa in antiquity and the Middle Ages, although divided into several political organisms was one cultural community. Speaking in different languages, the communities were in constant contact with each other by competing or cooperating. In certain moments in history, this region was a center of civilization for Europe, Africa and West Asia - says Dr Artur Obluski, director of the Central School of Warsaw University.

Researcher of the Wrocław University of Science and Technology joins the Academy of Young Scientists of the Polish Academy of Sciences

2019-07-18

Dr Mateusz Kwaśnicki from the Faculty of Mathematics of the Wrocław University of Technology joined the Academy of Young Scientists of the Polish Academy of Sciences. This is a group for people who are distinguished by outstanding research achieve-

ments and activities that popularize science. Dr Kwaśnicki's scientific interests include the theory of stochastic processes, the theory of potential, harmonic analysis and differential equations. He has been awarded many times, including prizes of the Polish Mathematical Society, the Start Scholarship Foundation of Polish Science and a scholarship for outstanding scientists from the Ministry of Science and Higher Education. The Academy of Young Scientists was established to promote scientific research and development works of prominent young representatives of Polish science. Its members are elected by the General Assembly of the Polish Academy of Sciences. At the time of selection, they cannot be more than 38 years old and must hold at least a PhD title.

Cieszyn to hold XXIX summer school of Polish language, literature and culture

2019-07-18

Almost 250 people from 35 countries will take part in the XXIX-year summer school of Polish language, literature and culture organized by the School of Polish Language and Culture at the University of Silesia. The summer course in Cieszyn will last from 1 to 29 August. This year's participants include scholars of the National Agency for Academic Exchange, the Senate of the Republic of Poland and students of the partner universities of the University of Silesia - from China, Singapore, Indonesia, Japan, Germany, France and Macedonia. Classes in the School have been held continuously for almost thirty years, and each year with a growing number of participants. Students will learn to speak, listen, write and understand in Polish. The lecturers will be teachers of various faculties of the Silesian university and other universities. The activities will include an evening cultural program, during which the participants will get to know the traditions, customs and customs cultivated in our country in an active way. More: <https://www.us.edu.pl/xxix-letnia-szkola-jezyka-literatury-i-kultury-polskiej-w-cieszynie>

Symposium of BioLAB graduates: Visiting Research Graduate Traineeship

2019-07-19

On July 26-27, 2019, the Faculty of Chemistry of the Warsaw University of Technology is holding the BioLAB graduates' Symposium: Visiting Research Graduate Traineeship - the first event of this type connecting graduates of the program lasting over 18 years. The National Academic Exchange Agency emphasizes that almost 300 students from Polish universities took part in it from the beginning of the program. For one year, they participated in research in the field of biological sciences in one of four American institutions: the University of Virginia, the University of Chicago, the Oklahoma Medical Research Foundation or the University of Texas: Southwestern Medical Center. The results of their research conducted during the internship repeatedly formed the basis for articles published in peer-reviewed scientific journals, such as „Nature”, „Proteins: Structure, Function, and Bioinformatics” or „Acta Crystallographica.” Participants of the event will take part in presentations and meetings during which they will share their knowledge, experience and achievements in the scientific and business environment.

University of Opole joins a consortium of laureates of the „European Universities” competition

2019-07-19

The consortium with the Opole University was included in the group of laureates of the European Commission's European Universities competition funded by the Erasmus + program. The University of Opole is part of the FORTHEM consortium whose leader is Johannes Gutenberg Universität Mainz (Germany) and its partners: Université de Bourgogne (France), Jyväskylä yliopisto (Finland), Università degli Studi di Palermo (Italy), Latvijas Universitāte (Latvia), Universitat de València (Spain). European Universities are transnational alliances of higher education institutions from across the Euro-

pean Union. The idea of creating them is aimed at significantly increasing the mobility of students and employees and supporting the quality, integration and competitiveness of European higher education. Each consortium can count on a three-year grant of up to 5 million euros. The funds will help joint research groups, technology transfer centers and libraries.

Permanent exhibition of the Małopolska Science Center Cogiteon to be opened in Krakow

2019-07-19

Until 2022, at the runway at Czyżyny in Krakow, in the vicinity of the Polish Aviation Museum, the modern headquarters of the Małopolska Science Center (MCN) Cogiteon will be built. The construction will resemble a flying plane. Its four buildings will be connected by a common elevation and underground corridor. Piotr Koziarz, spokesman for the MCN explained, that the heart of the facility will be a permanent exhibition, divided into five thematic sections and a space for temporary exhibitions. Next to it there will be six laboratories where viewers will learn about chemistry, physics, computers, DIY, botany. The garden will be created on the roof. On July 16, 2019, the permanent set design was presented, which was prepared by the Krakow's Koza Nostra Studio. On the walls of individual, differently colored rooms there will be decorations depicting images of neurons, entangled DNA strands, human tissue and electronic integrated circuit. Installations will be activated during the shows.

Wrocław University of Science and Technology to hold conference Modern Electric Power Systems in September

2019-07-23

The Department of Electrical Power Engineering at the Wrocław University of Science and Technology and the Institute of Electrical and Electronics Engineers are inviting participants from 9 to 12 September to the international conference Modern Electric

Power Systems. This is the sixth meeting of scientists and specialists of the electrical industry. They will present works in the field of electrical power systems concerning both theoretical and practical applications. The conference topics include system planning and management, electricity markets and energy finance, emissions trading, energy prices and load forecasting, energy policy, system stability analysis, distributed energy and renewable energy sources, intelligent networks, modeling and simulation diagnostics, application of artificial intelligence methods, information technologies and internet, as well as communication and cybersecurity.

University of Silesia to hold 46th international congress on technical history

2019-07-23

The Faculty of Social Sciences of the University of Silesia in Katowice will host the participants of the 46th Symposium of the International Committee of the History of Technology on July 27 (ICOHTEC). The congress concerns the relationship between technology and power. The congress, attended by about 150 scientists, is accompanied by workshops, meetings and trips to places associated with technology. An important element of the event is the summer school - a forum for young scientists, undertaking in their research issues related to the history of technology and its role for the development of societies throughout history. ICOHTEC was founded in 1968 in Paris, and its aim was to integrate scientific communities on both sides of the so-called iron curtain. Currently, members of the organization are scholars from Europe, as well as from the Americas, Japan, India and Australia. The Committee organizes regular conferences gathering a large group of researchers from around the world. More: www.katowice2019.icohtec.org

University of Bialystok competition „I met math on vacation”

2019-07-24

The Center for Creative Learning of Mathematics (CKUM) at the Faculty of Mathematics and Computer Science of the University of Bialystok (UwB) is inviting participants to take part in the competition „I met maths on vacation”. This is a competition for people who are able to search for mathematical aspects in the world around them, in holiday conditions - convinces Dr Anna Rybak, CKUM coordinator. Calculating the capacity of the backpack? Planning a budget for holiday expenses? Or maybe measuring the water velocity in the river or the frequency of rotation of the windmill wings? The competition work can be a text, but also an artistic or photographic presentation. Participants of the competition may include students of primary and secondary schools. The works will be evaluated in three age categories. The jury will take into consideration the aesthetics, ingenuity, originality, legibility of showing and explaining the relationship with mathematics. Regulations of the competition: http://matinf.uwb.edu.pl/documents/ckum/regulamin_konkursu.pdf

„Geographic and political atlas of Poland” awarded in Tokyo

2019-07-24

„Geographical and political atlas of Poland” prepared by Dr hab. Marcin Solarz, from the Department of Geography and Regional Studies of the University of Warsaw took third place in the category of atlas during the 29th International Cartographic Conference (ICC) in Tokyo. ICC is a cyclical event presenting the latest achievements in the field of cartography. This year the conference was held in the Japanese National Museum of Emerging Science and Innovation. During the event, works from over 30 countries and regions of the world were presented. They were divided into seven categories: maps, charts, atlases, digital products, digital services, educational cartographic products and other cartographic products (including globes and

touch maps). The award-winning publication of the University of Warsaw presents the geopolitical and economic position of Poland against other European and world countries, as well as data on the Polish economy and society. Information about Poland is included in about half a thousand colorful maps.

Researcher of the Wrocław University of Science and Technology awarded by the French Chemical Society

2019-07-24

Professor Marek Samoć from the Faculty of Chemistry of the Wrocław University of Science and Technology became the laureate of the French-Polish Scientific Award 2019. This prestigious award for scientists from various countries awarded by the French Chemical Society. The researcher from the Wrocław University of Science and Technology was recognized for outstanding achievements in the field of non-linear optical properties of inorganic and organometallic compounds, conjugated polymers and quantum dots. Professor Samoć is the head of the Department of Engineering and Modeling of Advanced Materials at the Wrocław University. He is a specialist in the field of physical chemistry, he deals with research on new materials for optoelectronics and photonics. For many years he has worked at the Center of Laser Physics of the Australian National University. He works with numerous research centers in the world. The Foundation for Polish Science appreciated his research, awarding him with the Polish Nobel Prize in 2016.

University of Silesia in Katowice to hold a seminar about the government public procurement market in the USA

2019-07-24

The University of Silesia in Katowice together with the Polish American Chamber of Commerce North East is inviting participants to the meeting inaugurating the series of seminars devoted to promoting

knowledge about the Polish and American public procurement market. The aim of the seminars is to disseminate knowledge about public procurement markets in Poland and the USA and to present the opportunities for entrepreneurs from both countries to participate in these markets. As part of the inaugural meeting, basic information about the government's public procurement market in the USA will be presented. The event was sponsored by the Polish-American Fulbright Commission. Seminars are addressed to people interested in legal regulations and the practice of public procurement and public-private partnership in the US and in Poland, including: entrepreneurs, representatives of chambers of commerce and economists, economists, lawyers, as well as students of legal and economic studies.

Polish scholar publishes in Reviews of Modern Physics

2019-07-25

Scientists from universities in Warsaw, Stuttgart, Amsterdam, Hamburg, Cologne and Maryland, under the direction of Dr Michał Tomza from the Faculty of Physics of the University of Warsaw, laureate of Start, Homing and First Team programs, have published a review article on cold hybrid ion-atom systems in the journal *Reviews of Modern Physics*. The article presents microscopic physics that governs interactions and dynamics in mixtures of cold atoms and ions, and discusses how these systems can be prepared in experiments. It also presents how «ultracold hybrid mixtures of atoms and ions can be used to study controlled chemical reactions to create and study cold molecular ion spectroscopy and to implement quantum physics simulations of many bodies». More: <https://journals.aps.org/rmp/abstract/10.1103/RevModPhys.91.035001>

Graduate of the Warsaw School of Economics wins the prize of the British think tank

2019-07-25

The British think tank Institute for Progressive Policy Research (IPRE) awarded the graduate of Warsaw School of Economics (SGH) in Warsaw Agata Makowska for her report „Decentralising Britain: The ‚big push‘ towards inclusive prosperity”. It deals with the state of the British economy and ideas for its faster development. SGH graduate team in the IPPR Economics Prize competition received the main prize (ex aequo) in the amount of 50,000 pounds. Agata Makowska, thanked the university: «I am proud to inform you about my recent achievement, which I owe largely to the education gained during the undergraduate studies in the direction of the MONTH (quantitative methods in economics and information systems) at the Warsaw School of Economics. As a several-time winner of the SGH rector's scholarship, I would like to thank my lecturers for their hard work and support that I received during my studies. «

Conference in Opole „Fashion in the mirror of culture. LANGUAGE - LITERATURE - CULTURE”

2019-07-25

The Faculty of Philology of the University of Opole is inviting participants to the national scientific conference, which will be held on 8 and 9 October, „Fashion in the Mirror of Culture. LANGUAGE - LITERATURE - CULTURE”. The conference is addressed to scholars, PhD students, graduates of higher education and students. The organizers of the event are proposing a twofold understanding of fashion - both in the context of the importance of fashion and changes in clothing, as well as in the identity and subject perspective. They are planning a multi-directional approach to the subject engaging researchers from various fields of the humanities - literary scholars, linguists, and cultural studies. The two-day meeting will also be devoted to considerations in the context of discourses on fashion in literature,

film, theater, visual arts, popular culture, media, as well as in the field of aesthetics, fashion studies and performance. More: www.mrzedzwierniadlekultury.pl

Radio telescope of the Astronomy Center of the Nicolaus Copernicus University to be renewed

2019-07-25

A radio telescope operating at the Astronomy Center of the Nicolaus Copernicus University in Piwnice, will undergo a major refurbishment. This complicated and very costly project will be financed entirely from the budget of the Ministry of Science and Higher Education. The Ministry of Science has given the University PLN 4 million, which consists of a three-year funding for the radio telescope and the resources needed for its refurbishment, which will start in the spring of next year. The Astronomy Center predicts that the radio telescope will be out of service for half a year. The radio telescope RT-4, which was created in 1994, is the largest radio telescope in our part of Europe. The so-called headlamp of the device is 32 meters in diameter, almost 900 square meters, and consists of 336 aluminum panels. The supporting structure moves on the set of 4 trolleys, which allows not only turning, but also moving the radio telescope. The device is part of the European and global VLBI interferometric network. More: <https://www.umk.pl/wiadomosci/?id=26253>

Competition for the Polish-French Scientific Award Maria Skłodowska and Pierre Curie

2019-07-26

Foundation for Polish Science (FNP) and the French Ministry of Higher Education, Research and Innovation (MESRI), in cooperation with the French Academy of Sciences, are launching a competition for the Scientific Award of Maria Skłodowska and Pierre Curie as part of the Polish-French Science Year 2019. The prize aims to highlight the benefits of Polish-French scientific cooperation. It will be awarded for the first time in the history to a pair of cooperat-

ing scientists from Poland and France in recognition of their joint research achievements, which have contributed to strengthening scientific cooperation between the two countries. Applications will be accepted until September 30, 2019. The announcement of the results and the award ceremony will take place at the end of the Polish-French Science Year at the end of 2019. More: <https://www.fnp.org.pl/oferta/polsko-francuska-nagroda-naukowa-im-marii-skłodowskiej-i-pierrea-curie/>

Professor of the University of Białystok to receive Medal of the Seimas of the Republic of Lithuania

2019-07-29

Dr Mieczysław Zdanowicz, Prof. of University of Białystok (UWB), dean of the Faculty of Economics and Informatics of the University of Vilnius in Vilnius, received the medal of the Seimas of the Republic of Lithuania, awarded by the Speaker of the Sejm of the Republic of Lithuania, Prof. Viktoras Pranckietis. Dr Mieczysław Zdanowicz is the dean of the Faculty of Economics and Information Technology of the UW in Vilnius since 2016. In connection with the completing his term of the dean's office, the Speaker of the Lithuanian Sejm, Prof. Viktoras Pranckietis emphasized: «We acknowledge Dr Mieczysław Zdanowicz's significant contribution to the development of the Branch of the University of Białystok in Vilnius, his responsible work in the process of organizing higher studies in Polish in the fields of computer science, economics and European studies. His responsible work has significantly contributed to the development of cooperation between the Lithuanian and Polish academic communities. I wish Dr Zdanowicz satisfaction with the accomplished works.»

Nationwide Sociological Congress in September to be held in Wrocław

2019-07-29

The Polish Sociological Association and the Institute of Sociology of the University of Wrocław are inviting participants to the seventeenth National Sociological Congress under the slogan: „Me, My, They? Subjectivity, identity, affiliation” which will start on September 11 and will last four days. The slogan of the event allows us to adopt a new view on integration and conflicts, on capital and values, on the various faces of multiculturalism and the consequences of contemporary migration, on social and life styles, on the identity and state of Polish sociology, on the role of sociologists in the modern world, for old and new social problems and for repealing or establishing different social boundaries. The invitation to the congress is addressed to representatives of local authorities and institutions interested in social development, as well as to doctoral students of various universities, high school graduates and those who would like to stimulate their sociological imagination, ie better understand their place in the world. More: <https://17zjazdpts.uni.wroc.pl/pl>

Lecturers of the Gdańsk University of Technology receive exceptional French distinctions

2019-07-29

Dr Magdalena Popowska from the faculty of management and economics, and architect Janusz Gujski from the architecture department of the Gdańsk University of Technology were awarded the Order of the Academic Palms. The honorable awards were granted by the decree of the Prime Minister of France and are honored to active members of the teaching community and people who contribute to the spread of French culture in the world. Dr Popowska was honored for her contribution and commitment to the development of French-Polish relations in Gdańsk, her contribution to promoting French language and culture through long-term cooperation with French honorary consuls and the

chairmanship of the Alliance Française Association in Gdansk. Architect of the Chamber of Architects of the Republic of Poland Janusz Gujski was awarded for significant contribution to the development of education within the Polish-French academic cooperation and encouraging students to «open up to the world through participation in prestigious international competitions, including competitions organized in France».

Collegium Medicum of the Jagiellonian University looking for people who can act as patients

2019-07-30

Collegium Medicum of the Jagiellonian University in Krakow is looking for candidates for simulating patients. It will help educate medical students. Anyone can become the patient. Of course, elementary acting skills are required. The accepted people will receive a scenario with a description of the different cases, depending on the goal we want to achieve, - said Łukasz Małecki from the Department of Medical Didactics of the Collegium Medicum of the Jagiellonian University. Volunteers can submit applications until August 10, 2019 to the following address: ciem.sp@uj.edu.pl

Deadline for submitting ideas for the name of the „Polish” planet is expiring

2019-07-30

Only until July 31, 2019, Poles can send ideas for naming an extrasolar planet and its star. The right is granted to Poland by the International Astronomical Union (IAU) as part of the IAU100 NameExoWorlds competition. The national part of the global competition is run by the Polish Astronomical Society (PTA). Everybody has the right to submit their idea, both individually and institutionally (schools, organizations, institutions, clubs or other entities). Applications are accepted via the form on the competition website: www.iau100.pl/planety. Along with the names for the star and for the planet, please send a short justification of the idea. The global IAU100

contest NameExoWorlds was launched on June 6, 2019. Under this program, each country was given the right to name one of the extrasolar planets and its star.

Conference „What’s new in new media. The future begins today” to be held in October in Katowice

2019-07-30

The Institute of Cultural Sciences and Interdisciplinary Studies at the University of Silesia is inviting participants to the national scientific conference on „What’s new in new media? The future begins today.” The subject of the conference was taken from the futurological perspective and is an invitation to reflect on what current trends, trends and communication behaviors form the foundations of what is new and unknown, announcing further changes in media culture determined by the media. Meeting at the Scientific Information Center and the Academic Library in Katowice will also be an opportunity to try to answer the following questions: what will be the future of new media, what devices we will use, what will be the future of mobile media or what form they may take. The invitation to participate in the event is addressed to theoreticians, researchers of contemporary culture, media experts, communicologists, and media anthropologists, as well as practitioners from the new media industry.

Professor of the Jagiellonian University appointed the director of the Wawel Royal Castle

2019-07-31

Dr Andrzej Betlej from the Jagiellonian University in Krakow, currently the director of the National Museum in Krakow (MNK) has been appointed the director of the Wawel Royal Castle, replacing Prof. Jan Ostrowski on this position. The head of the MNK will be Dr Andrzej Szczerski. All three scholars work for the History Department of the Jagiellonian University. The new directors will take over from the beginning of 2020. The Ministry of Culture and National Heritage informed about the changes. Professor Jan Ostrowski, outstanding museum worker, a long-time researcher of the Institute of Art History at the Jagiellonian University and a recognized international authority in the field of art history, decided to retire after 30 years of work at the Wawel. Dr Andrzej Betlej works at the Institute of Art History at the Jagiellonian University. His scientific works deal with modern art, especially on architecture and sculpture in the eastern territories of the former Polish-Lithuanian Commonwealth. On his initiative, a permanent Conference of Directors of the Institutes of Art History in Poland was created.

Contest „Innovator of Mazovia”

2019-07-31

Until August 19, 2019, the innovators from region of Mazovia can submit applications for participation in the program „Innovator of Mazovia”. The aim of this competition organized by the Mazowieckie Voivodeship is to select young talents developing and implementing innovative solutions. The topics of the competition include technical (product and process) innovations, organizational innovations, marketing and others with potential economic value that can be implemented or applied in everyday business practice. The competition is conducted in two categories: Innovative Company and Innovative Scientist. In November 2019, the jury officially will select and award the winning development and im-

plementation of innovations presented by scientists and companies from the sector of micro, small and medium enterprises. The total prize amount is 113 thousand PLN. More: <https://www.dropbox.com/s/ywkc39oabvh1h3v/REGULAMIN%20XI%20EDYCJI%20KONKURSU.pdf?dl=0>

Student Quality Forum to hold conference in Poznań on the internationalization of education

2019-07-31

The Student Self-government of the Adam Mickiewicz University in Poznań is organizing for the ninth time the national conference on the quality of education - the Student Quality Forum. The forum will be held from 11 to 13 October, its theme will be internationalization. During the conference, academic teachers, members of pro-quality bodies, students dealing with the quality of education and speakers from external institutions will lead panels regarding qualifications that are an important element of education. This year, participants of the Quality Forum will meet at the Morasko Campus in the building of the historical department at ul. Poznan University 7.

Researchers discussed transportation problems

2019-08-01

The problems of transport and transport infrastructure were discussed during the 11th International Scientific Conference „Transport Problems 2019” and the 8th Young Scientists Symposium. The symposium was held at the Faculty of Transport of the Silesian University of Technology, while the conference was also held in Katowice and Bochnia. The conference brought together a record number of participants - scientists from 23 countries, including several from Asia, Africa and South America, presented and published their scientific articles. The plenary session was attended by scientists from Bulgaria, Georgia, Azerbaijan and Poland, as well as representatives of the Police Traffic Department and the Provincial Road Transport Inspection. Participants of the conference and the symposium

showed presentations related to transport as well as to transport infrastructure and the change of the classification of scientific disciplines. Both events, complementing each other, have created a comprehensive offer of exchange of scientific ideas.

Minister of Digitization launches Virtual Department of Ethics and Law

2019-08-02

The Minister of Digitization Marek Zagórski inaugurated the activity of the Virtual Department of Ethics and Law, whose task will be to analyze and investigate the challenges of law and ethics in relation to Artificial Intelligence (AI) and its connections with other technologies. The Virtual Department of Ethics and Law will advise and propose to the government activities supporting the development and application of solutions using Artificial Intelligence. It's all about suggesting effective solutions and changes in the law that will allow to better develop artificial intelligence. The Virtual Department of Ethics and Law will be created by scientists representing: Polish Academy of Sciences, NASK National Research Institute, Krakow Academy of Sciences, University of Białystok, Cardinal Stefan Wyszyński University, University of Lodz, University of Opole, University of Silesia in Katowice, University of Warsaw and Warsaw University of Technology.

Architects from the MOA Masters of Arts receive Platinum A'Design Award

2019-08-05

The MOA Masters of Arts office housed in the Pomeranian Science and Technology Park Gdynia was awarded the A'Design Award & Competition - the world's largest competition for the best design, concepts, products and design services. MOA Masters of Arts operates on the design and exhibition market. It is an interdisciplinary design office providing business with clever and innovative solutions in the field of unique exhibition stands. Gdynia's Parkers returned from Italian Como with the prize in the Interior Architecture and Space Design category. The

main idea of the awarded stand designed for OKA (a German manufacturer of office furniture) was to capture the so-called a flash of design genius that appears in the minds of designers working on a new idea. In the case of OKA, it is a clean, well-thought-out design, which can be found in individual furniture exhibited at the stand. More: <https://ppnt.pl/platinum-adesign-award-dla-architektow-z-moa-masters-of-arts/>

First workshops of the Clubs of the Young Programmer completed

2019-08-05

The first series of workshops in the Clubs of the Young Programmer e.g. teaching children programming together with their parents, has finished. Clubs have been operating since last autumn in 16 Polish medium-sized cities. Over 20,000 people attended the classes for 9 months of Club performance. 97 percent participants would recommend classes to others, and 92% would like to take part again- say the surveys conducted with parents and participants of the classes. The questionnaires asked how the participants rate the location of Clubs, robots, educational materials and equipment. Locations where classes take place correspond to the expectations of 97%. parents, the same number is satisfied with robots, and educational materials correspond to the expectations of 96 percent respondents. Half of the respondents learned about the workshops from the Internet, nearly 25 percent from the school where their child attends, 18 percent. from family/friends, and 8 percent from a poster or leaflet.

University of Silesia in Katowice to co-organize the conference InterNanoPoland 2019

2019-08-05

The NANONET Foundation for Nanosciences and Nanotechnology Support and the Silesian Nano Cluster are inviting participants on 16 and 17 October to the InterNanoPoland conference - an international forum for scientists, entrepreneurs, business

environment institutions and students dealing with nanomaterials and nanotechnology. The scientific co-organizer of the event is the University of Silesia in Katowice. The conference will enable young scientists to present research and development projects and share research results. This is an opportunity to talk with practitioners dealing with the development of nanotechnology, finding an employer, employee or a scientific or business partner, as well as getting new practical skills. The topics of the meeting include European nanotechnology clusters, optoelectronics and photonics nanomaterials, 3D printing and nanotechnologies, nanomaterials in the environment - challenges and threats, nanomaterials in the energy sector and nanotechnology in cosmetology and medicine.

Wrocław University of Science and Technology to complete digitalization of collections

2019-08-06

The project of digitizing and developing a collection of library materials - technical magazines, architectural reports, photographs and negative films. Digitization will enable development of collections, secure, long-term storage and archiving of the resource in digital form and broad access to materials on the Internet. Part of the resource will be developed in accordance with WCAG 2.0 standards, which will allow the disabled people to share project results. Scanned and developed Polish magazines issued since 1948 are a significant element of national heritage, which illustrates the development of Polish science and its impact on world science. Other materials related to architectural and archaeological issues will create a unique documentation of Polish monuments with particular emphasis on Lower Silesia. More: <https://pwr.edu.pl/uczelnia/aktualnosci/na-pwr-dobiega-konca-kolejna-wielka-digitalizacja-11301.html>

University of Silesia in Katowice to talk on literature, documentary and humanistic education

2019-08-06

Department of Didactics of Polish Language and Literature and the Institute of Library and Information Science of the University of Silesia in Katowice are inviting participants to the scientific conference in October on „How to make facts understandable? Literature, document, humanistic education and (de) assembly of cultural representations of reality“. The conference will be an opportunity to reflect on beautiful literature as a narrative proposing various paradigms of reality description, a document like seismograph responsive to all changes and the shape and role of humanistic education incorporating this type of texts into school practice. The discussion topics will include literary texts, non-fiction literature, personal documentary literature as an attempt to give meaning to facts, non-fiction / personal documentary literature as an opportunity for the presence of important contemporary questions in school education (e.g. climate crisis, issues related to migration). More: <https://www.us.edu.pl/konferencja-pt-czynic-fakty-pojmowalnymi>

Pomeranian Academy in Słupsk to hold the 5th National PhD Students' Scientific Conference

2019-08-06

PhD students of the Institute of History and Political Sciences of the Pomeranian Academy in Słupsk are inviting students to participate in the 5th National Doctoral Conference of „Poland and neighbors over the centuries“. The conference will take place on 28 September. The theme of the fifth conference will be the processes taking place in Poland and in neighboring countries, as well as the mutual relations between Poland and its neighbors. This year's conference is part of the calendar of the Jubilee celebrations of the 50th anniversary of the Pomeranian Academy in Słupsk. The organizers are planning to discuss the following issues: multifaceted human activity in Polish and neighboring territories; everyday life of an inhabitant of Polish lands and its neighbors throughout history; skirmishes, wars, armed conflicts taking place on Polish and neighboring lands in history and issues of economic, social and political relations taking place in Polish and neighboring lands over the centuries.

Wroclaw Academy to launch Intensive International Military course

2019-08-07

The Academy of Land Forces in Wroclaw is implementing the international project of Strategic Partnership International Military Leadership Academy (IMLA). As part of the partnership, they have organized an Intensive Course to develop the leadership skills of students of the military academies of the European Union. During over 100 hours of training, carried out under the supervision of teachers and instructors from AWL, students of European and the USA partner universities (48 cadets from Greece, Portugal and Poland) took part in Stress Management, Motivation and Influence classes, Leadership in Communication and Crisis Management. Intensive Course IMLA is the most important training part of the project, whose main goal is to develop

modern mobility strategies for students of military universities in the European Union. Such solutions are intended to give future officers greater opportunities in acquiring new skills and competences.

Researcher of the University of Life Sciences in Wrocław receives Scholarship of the Foundation for Polish Science

2019-08-07

Dr Kamil Kaźmierski from the Institute of Geodesy and Geoinformatics of the University of Life Sciences in Wrocław became a scholarship holder of the Start Program of the Foundation for Polish Science, which supports the most talented young scientists. - The main subject of my work is to increase the accuracy of positioning using global satellite navigation systems (Global Navigation Satellite Systems, GNSS). I focus on real-time positioning using the PPP (Precise Point Positioning) technique. Over the past few years, I have been refining the positioning method using satellite observations from all global navigation systems: US GPS, European Galileo, Russian GLONASS and Chinese BeiDou - says Dr Kamil Kaźmierski. The Start Program is the largest scholarship program in Poland for the best researchers before age of 30 representing all fields of science. This year, for the 27th time, the Foundation chose 100 winners. More: http://www.glos.upwr.edu.pl/aktualnosci/49732/stypendium_fundacji_na_rzecz_nauki_polskiej_dla_dr_kazmierskiego.html

Success of the International Center for Quantum Technology Theory of the University of Gdańsk

2019-08-07

Two projects from the International Center for the Theory of Quantum Technology at the University of Gdańsk obtained grants in a competition for international research projects in the field of quantum technologies. This success strengthens the position of the university as one of the world leaders in the field of quantum physics. Thanks to co-financing, Gdańsk scientists, in cooperation with teams from

the Czech Republic, France, Spain and Germany, will carry out the project «ApresSF. Quantum super-resolution in spatial and frequency measurements ». Its results can be used in astronomy (finding distant planets), aviation technologies and spectroscopy. The second of the co-financed projects - «eDICT. Experimentally-oriented Device Independent Cryptography» is conducted jointly with scientists from Austria, the Czech Republic, Hungary and Switzerland and can improve the methods of secure data encryption. The competition is organized by the QuantERA consortium and coordinated by the National Science Center. RTX car of the Wrocław University of Science and Technology comes fifth in the Formula Student competition in Italy

2019-08-08

The students of the Wrocław University of Science and Technology developed the RTX car that took fifth place in the general classification of the Formula Student competition in Italy. RTX is the tenth car constructed by students of the Wrocław University of Science and Technology. Their work on the vehicle began at the end of September last year, in total nearly 60 people were involved in the project. The PWR Racing Team took the third place in the Business Plan Presentation competition. The jury appreciated the design solutions, aesthetics and professional preparation of the presentation. The car was also distinguished by the unique sound of the engine, which was often mentioned by commentators during the race. Young designers failed to be on the podium in dynamic competitions due to problems with the gearbox, but ultimately their results gave them the fifth place in the general classification.

Students of Adam Mickiewicz University in Poznań visit Spitsbergen

2019-08-08

A group of students of the Adam Mickiewicz University in Poznań began the expedition „PolarProject” to the AMUPS polar station in Spitsbergen. This is the northernmost Polish research station. The purpose of the expedition is to conduct research on the Arctic glaciers disappearing at an alarming rate. The research topics of the expedition include issues in the field of geology, meteorology, climatology, glaciology and the impact of anthropopressure on the landscape. During their research, young scientists will use modern measuring tools, such as drones with built-in devices for measuring temperature, humidity and wind speed, as well as simple, proven methods of measurement. The expedition is supported by the Polish Geographical Society. The media partner of the expedition is the travel monthly journal «Discover the World». Already in August the journal will publish the article about the expedition, and when students return, a more detailed report on their expedition.

Polish language teachers set off to the world

2019-08-09

From August 2-4, 2019, a group of teachers teaching Polish as a foreign language held a conference in Krakow. They were selected by the National Agency for Academic Exchange under the „Lectors” program. The event was attended by over 70 Polish language teachers who will teach Polish at universities from almost all over the world in the 2019/2020 academic year. The conference was a preparatory workshop for the trip and it was also an opportunity to meet for Polish language teachers who work in different parts of the world on a daily basis.

PhD student of the Wrocław University of Science and Technology returned from the mission at Svalbard

2019-08-12

Almost four tons of various wastes were collected by participants in the Sorkapp Marine Litter Cleanup project, cleaning a section of the shoreline of the island of Spitsbergen protected by a national park. Jędrzej Górski, a PhD student at the Wrocław University of Science and Technology participated in the expedition. Six people spent a month on Palffyodden, located at the entrance of the Hornsund Fjord, on the southern part of the island of Spitsbergen. They cleaned a section of the coast within the Sor-Spitsbergen National Park. When they left Poland for Svalbard, they planned to clean up 23 kilometers of land. Ultimately, they managed to take a 15-kilometer section, from where they collected 3.7 tons of garbage. Project members found fishing nets, ropes and buoys, plastic bottles for cosmetics, detergents and juices, medicine packaging, bulbs and even car wheels on the Svalbard coast. Clearing this part of the Arctic is part of the forScience Foundation's initiative, possible by funding from the Svalbard Environmental Protection Fund. More: <https://pwr.edu.pl/uczelnia/aktualnosci/miesiac-sprzatania-arktyki-jedrzej-gorski-wrocil-z-misja-na-svalbardzie-11302.html>

Students and PhD students of Poznań University join the internships in Oman

2019-08-12

Students and PhD students of the Faculty of Geographical and Geological Sciences of the Adam Mickiewicz University in Poznań participated in the international GEOpraktyka project. The fifth project was called „Around the deserts of Oman”. Participants conducted research on the rate and magnitude of potential and actual evaporation in a tropical climate, took samples from the surface levels of soils for the needs of the created database and theses, valorized tourist routes as well as potential and existing geo-sites constituting the development

of geotourism. In addition, they carried out the landscape research on one of the most characteristic elements of the landscape in this area - the valleys of periodic rivers (wadi). Students worked on developing research results, and from September they want to start promoting activities by organizing a series of lectures at universities, schools and cultural centers.

Krakov Society of Women to hold conference „Following the women in mathematics”

2019-08-13

On August 31 - September 2, 2019, the Polish Society of Women in Mathematics and the Faculty of Applied Mathematics of the AGH University of Science and Technology in Krakow are organizing a scientific conference „Following the women in mathematics - in Honor of Sofia Kowalewska”. The aim of the conference is to honor Professor Sofia Kowalewska, called the «princess of mathematics», her significant contribution to the development of mathematics, especially partial differential equations and their applications, and to emphasize Professor Kowalewska's contribution to the fight for women's rights and their equal access to education and work positions. The series «Following the women in mathematics» promotes the achievements and merits of women whose research, professional activity and publications have made a significant contribution to the development of science, mainly mathematics and related sciences.

XX Beacon Satellite Symposium to be held in Olsztyn

2019-08-13

On August 19-23, 2019, the XX Beacon Satellite Symposium will be organized in Olsztyn by the Center for Radio Diagnostics of the Space Environment, Faculty of Geodesy of Spatial Engineering and Construction at the University of Warmia and Mazury (UWM). The symposium is the largest conference organized in a three-year cycle by the International Radio Union Ionosphere Commission (URSI). For the first time this conference will take place in Poland. The Olsztyn university will host over 200 scientists, including from the United States, Canada, Germany, France, Great Britain, Italy, India, Russia, China, Taiwan, Thailand, Brazil, Argentina, South Africa and Nigeria. Established in 1972, the Beacon Satellite Studies Group focuses on the ionosphere monitoring using satellite radio techniques.

Students of Wrocław University of Science and Technology took the bronze in the Red Bull flight competition in Gdynia

2019-08-13

Students of the Wrocław University of Science and Technology took the third place in the „Red Bull Flight Competition 2019” competition in Gdynia. Their glider flew nearly 18 meters before it fell into the sea. The competition of 39 teams from all over Poland consisted of several stages. The first was a 30-second artistic performance, which was to go into a smooth start. Then the glider was accelerated on a 30 m long ramp and pushed into the water from the height of six meters. The flight distance was recorded until the machine first came into contact with water. The «Bulls from the University of Technology» team consisted of students working on a daily basis at the Academic Aviation Club, the Scientific Circle of Vehicles and Mobile Robots and the Scientific Club of Composite Materials. The inspiration for designers of the glider

were two planes: the popular F-16 fighter jet and one of the most popular aerobatic aircraft in the world, Zivko Edge 540.

Opole botanists published in the journal Land Degradation and Development

2019-08-13

The results of botanists' research describing the differences in the functional diversity of meadow vegetation above and below the earth's surface after translocation of the entire habitat have been published in the journal Land Degradation and Development. Researchers of the University of Opole, together with employees of the Polish Academy of Sciences and the Botanical Garden in Mikołów, have determined that the most sensitive type of vegetation in terms of changes in such features as seed weight, height, leaf size and architecture of underground parts of plants is the meadow community. Research was conducted on the meadows in Radzionków. The researches include monitoring of the species of meadows and heaths, after the construction of the second runway of the Katowice-Pyrzowice airport had to transfer over a hectare of valuable natural patches of plant communities. This was done using heavy equipment, and the method proved to be effective enough to be used in other cases.

Scientist of the University of Life Sciences in Poznań won the EAAP award

2019-08-13

Dr Marcin Pszczoła, assistant professor of the Department of Genetics and Fundamentals of Animal Breeding of the Faculty of Veterinary Medicine and Animal Sciences of the University of Life Sciences in Poznań became a laureate of the European Federation of Animal Science Young Scientists Award (EAAP). EAAP (European Zootechnical Federation) is an international non-profit association of scientists, practitioners and representatives of governmental administration related to zootechnical sciences from almost all European and some Mediterranean countries. Its purpose is to promote the improvement

of animal production through the use of scientific achievements. The Federation Award is granted to outstanding young scientists (under 38 years of age) who have demonstrated significant achievements in scientific activities with a European dimension.

International conference of enthusiasts of games and simulations in Warsaw

2019-08-14

The Kozminski University (KU) is organizing the jubilee 50th ISAGA (International Simulation and Gaming Association) conference in Warsaw on August 26-30, 2019. The leading theme will be games and simulations from various fields developed over the last five decades. The ISAGA conference is the annual gathering of gaming and simulation enthusiasts from around the world. The event aims to gather people from the gaming world, including from the gaming, facilitation (conflict resolution) or game design industries. This year's conference will be an opportunity to honor outstanding people who have contributed to the development of the above fields over the past half century. There will be retrospectives or panels on the ISAGA community heritage. The last two days of the conference will be devoted to the future of the organization. The list of speakers includes Prof. Eng. Sebastiaan Meijerl - deputy dean of the Royal Institute of Technology, Prof. Toshiyuki KANEDA from the Nagoya Institute of Technology, Prof. Ivo Wenzler from NHL Stenden University of Applied Sciences or Ann Coppens - Chief Game Changer at Gamification at Nation Ltd.

Professor Lasiecka receives the Richard E. Bellman Control Heritage Award

2019-08-14

Professor Irena Lasiecka, a graduate of the University of Warsaw (UW) received the Richard E. Bellman Control Heritage Award, an annual distinction awarded by the American Automatic Control Council. The Richard E. Bellman Prize is awarded to outstanding scientists who have significant research achievements in the field of control theory. It is considered the highest award of its kind for scientists from scientific institutions in the USA. Professor Lasiecka is a mathematician specializing in control theory, differential equations and applied mathematics. She is a graduate of the University of Warsaw, where she wrote her PhD dissertation in the applied mathematics. In 2012, the President of the Republic of Poland gave her the title of professor. She developed her scientific career first at the Institute of System Research of the Polish Academy of Sciences, and then at American universities.

Amateur inventors invited to Garage Inventions Review in the 4th Silesian Science Festival

2019-08-14

Until September 30, participants can apply to the Garage Inventions Review as part of the 4th Silesian Science Festival Katowice. During the event at the International Congress Center, amateur inventors, device constructors and engineers working out interesting technical solutions will have the opportunity to present the results of their work. All submitted proposals will be analyzed by an expert committee, which will assess them primarily in terms of practicality. The authors of the most interesting projects will be invited to participate in the Festival, and the best projects will be awarded by the festival audience, regional media readers and an expert commission. Review of Garage Inventions OFF Science is an initiative presenting the achievements of people involved in the popular science. The event is addressed to designers and inventors of all

ages, acting individually or in teams. Applications are accepted electronically. The registration form is available at: www.slaskifestiwalnauki.pl

Digitization of Municipal Cultural Centers - 550 institutions to train digital competences

2019-08-14

The Ministry of Digitization together with the Ministry of Culture and National Heritage implement a program of digitization of Commune Culture Centers. Its main goals are to connect all centers to broadband Internet, equip them with computers and organize training in digital competences. 550 institutions from all over Poland have applied for funding for annual digital competence training. - This is a great result and proof that local communities are waiting for such initiatives - says Minister of Digitization Marek Zagórski. The purpose of the training is to improve the competences of employees so that they can carry out trainings for children and youth independently. The applicants include non-governmental organizations, partnerships of non-governmental organizations with local government units, institutions running universities of the third age, public institutions in the field of science, culture, education and universities.

Scientists from the Polish Academy of Sciences studying changes in the Polish countryside in 1918-2018

2019-08-16

Researchers from the Institute of Rural and Agricultural Development of the Polish Academy of Sciences (PAN) collected memories describing the fate of rural families. They will share the conclusions during the conference 'One Hundred Years of Polish Village Development', organized on October 10 and 11, 2019 in Warsaw. During the event participants will be able to see an exhibition of the diaries. The beginning of the program was the competition «One hundred years of my farm». It was announced by the Institute of Rural and Agricultural Development

of the Polish Academy of Sciences (IRWiR PAN) together with the Polish Agricultural Publishing House. 55 people shared their private stories and unique photos. The collected material describes personal experiences and events creating the image of the Polish village over the last century. Pre-war poverty, wandering due to displacement during World War II, difficult returns after 1945 are just some of the topics in the diaries. Conference «One hundred years of Polish village development. Interdisciplinary inter-generational dialogue» will be the culmination of a research project implemented by the IRWiR PAN, whose theme was the development of the Polish country in 1918-2018.

Academy of Youth Diplomacy to be held at the University of Silesia

2019-08-16

Until September 20, students can apply to the Youth Diplomacy Academy - a new initiative within the Open University of the University of Silesia in Katowice. Classes are open for the secondary school students over 16 years of age. Participation in the project will allow participants not only to develop their passions and interests, but also become an opportunity to take the first steps in diplomacy, politics or administration. Students will have the opportunity to participate in training in etiquette, *savoir-vivre*, diplomatic skills and social competence. The goal of the Academy is to increase the level of activity of young people in the civic and organizational sphere, as well as to familiarize them with the principles of conducting discussions respecting other people and managing their emotions and the interlocutor. More: <http://akademiyadplomacji.us.edu.pl/akademia-dyplomacji-mlodziezy>

Warsaw University of Technology to hold the 62nd Scientific Congress of the Polish Chemical Society

2019-08-19

On September 2-6, 2019, the Warsaw University of Technology will hold 62nd Scientific Congress of the Polish Chemical Society on the campus of the University. The event will be held under the patronage of the Polish President Andrzej Duda in the 100th anniversary of the Polish Chemical Society (PTChem). The main organizer, the Warsaw Branch of PTChem, is planning to organize the event as the cooperation between representatives of numerous Warsaw academic and research institutions dealing with chemistry. The Congress program was co-created by a team of chairmen of plenary sessions and 18 thematic sections, selected from the group of the best Polish specialists in various fields of chemistry. The organizers obtained confirmation of participation of foreign scientists in the event, including Nobel laureates in chemistry.

In September Kielce to hold the European Mars Rover Competition

2019-08-19

The 5th European Rover Challenge will take place from 13 to 15 September in Kielce. The Świętokrzyskie Voivodship donated 100,000 PLN to their organization as well as to the scientific and business conference. 40 teams from 15 countries have qualified for participation in the Mars rover competition. The finalists include representatives of Germany, Canada, Great Britain, Poland, Turkey, India and Australia. Last year's winner- the Kielce University of Technology will be also present. During the event, there will be 40 stands on the campus of the Kielce University of Technology, where the companies will present the use of space technologies including the Polish space sector companies participating in space missions of the European Space Agency and NASA. Presentations and workshops on robot construction and hologram simulations.

Ministry of Digitization announces a competition for municipalities "Internet for everyone"

2019-08-19

The Ministry of Digitization will allocate PLN 120 million for the „Internet for everyone” project. Hot-spots - points with free WiFi will appear in parks, squares, stations, cultural centers and libraries. The initiative is addressed to rural and urban-rural communes from all over Poland. Municipalities can apply for funding for the construction of public hotspots in their area. The maximum amount of individual funding is PLN 64 368. The subsidy will cover the costs of installing hotspots, but maintaining the infrastructure and capacity will be the task of municipalities. Thanks to the competition, each of them will be equipped with at least 10 points with WiFi at a speed of 30 Mb / s. Thanks to this initiative, 19,000 new Internet points with free WiFi will appear in Poland. The call for proposals in the competition, organized jointly with the Digital Poland Design Center, will start on September 7. The call will be conducted continuously until the end of June 2020.

Poznań University to hold the Congress of the International Union of Anthropological and Ethnological Sciences

2019-08-19

About 800 scientists will participate in the congress of the International Union of Anthropological and Ethnological Sciences, which will be held in Poznań on August 27-31. Scientists from 75 countries around the world will meet at the Collegium Historicum of the Adam Mickiewicz University in Poznan. The theme of the congress is «World Solidarities». The concepts of compassion, community and solidarity are now particularly important at a time when global warming and social inequalities are forcing entire populations to migrate and causing the growth of exclusion ideologies. Participants in the event include many prominent representatives of science: Prof. Chris Hann from the University of

Cambridge, director of the Max Planck Institute in Halle in the field of social anthropology, who will give an inaugural lecture, and Prof. Alisse Waterston from the City University of New York - former president of the American Anthropological Association. More: <https://www.iaaes2019.org/>

Wrocław University of Science and Technology students win in the „Grab Big Data” competition

2019-08-19

Students of the Wrocław University of Science and Technology have developed a system for classifying customers and generating promotions, which was rated highest in the „Grab Big Data” competition organized by the Żabka Polska. As a reward, they will go to Silicon Valley. The competition task was to use Big Data, i.e. large, variable and various data sets in practice. Three-person teams took part in the competition, which at the very beginning could choose one of eight research problems - including the analysis of customers of the Żabka application. The last issue interested students from the IT and management faculties - Paweł Kunicki, Adam Dłubak and Bartłomiej Lisiek. According to the jury, their project «A system for customer segmentation and generating personalized promotions based on: current transactions, existing supply and external conditions» proved to be the most innovative, profitable and functional. More: <https://pwr.edu.pl/uczelnia/aktualnosci/wygrali-konkurs-big-data--w-nagrode-zobacza-doline-krzemowa-11309.html>

Pole nominated for Tech Leaders Awards

2019-08-20

Roman Mazur, director of strategic development of the Polish University Abroad, was nominated for the Tech Leaders Awards 2019, granted every year in London during the Tech Leaders Summit. Tech Leaders Summit is the UK's largest summit of new technology leaders, bringing together specialists in the areas of Artificial Intelligence, Cloud Leadership, Diversity Leadership and Security Leadership. They meet every year to discuss the challenges and market opportunities that arise in the most sensitive areas of the innovative economy. Roman Mazur is not only passionate about artificial intelligence, but also he is a specialist in social innovation within Smart-City and a member of the Royal Society for Africa in London. He is the author of the «MimiKazi» trading platform for self-employed sellers of everyday goods in Africa.

Lublin to hold Portuguese literary competition

2019-08-20

The Portuguese Language Center / Camões at Maria Curie Skłodowska University (UMCS) in Lublin is inviting participants to take part in the fifth Portuguese literary competition. The purpose of the competition is to commemorate the 500th anniversary of a sea voyage around the world of sailor Ferdinand Magellan by creating a literary text in Portuguese on travel topics in the form of a chronicle or fictional story. The competition is directed to people for whom Portuguese is not a native language. It is open, which means that people from all non-Portuguese speaking countries can participate and it is not limited to Polish citizens only. Works should be sent by November 30, 2019. More: <https://phavi.umcs.pl/at/attachments/2019/0731/143937-regulamin-pl-v-konkurs-literacki-2019.pdf>

Scientists investigating the Piast monuments on the bottom of Lednickie Lake

2019-08-20

Researchers from the Center of Underwater Archeology at the Nicolaus Copernicus University in Toruń together with researchers from the Jagiellonian, Warsaw and Gdańsk Universities are conducting research on the bottom of the Lednickie Lake. In this area probably the first baptisms of dignitaries from the surroundings of Mieszko I were performed. The Center of Underwater Archeology has continued its research on the islands of the Lednickie Lake conducted since the 1980s by the Department of Underwater Archeology UMK. The island of Ostrów on Lake Lednickie was one of the most important centers of the state of the epoch of the early Piasts. It was here that Bolesław the Brave was probably born, and the stone chapel next to the palatium was the place of baptism of the entourage of Mieszko I, and maybe himself. This year, researchers focused mainly on the bridge from Ledniczka island discovered 2 years ago, which in the time of Mieszko I connected the knight's watchtower to the mainland. Although only wooden fragments of the structure were left, it was possible to create its digital reconstruction. More: <https://www.umk.pl/consciou-sosci/?id=26280>

Applications for the Scientific Award of the Mayor of Wrocław can be still submitted

2019-08-20

Until September 13, students and scholars can apply for the Scientific Award of the Mayor of Wrocław for scientific research integrating the academic environment in the city. Leaders and outstanding representatives of the Wrocław academic community are invited to submit the applications. We will know the winner of the award during the Environmental Inauguration of the Academic Year. Applications for the Wrocław Scientific Award should contain a description of the candidate's scientific achievements and their interdisciplinary activities, as well as a descrip-

tion of merits for the integration of the Wrocław academic / scientific / artistic community. The form of the application, taking into account the above conditions, is optional. Recognizing interdisciplinary research as the source that can be used in a special way as a model of joint work of academic and artistic communities for the common good, which is the development of the city, President Rafał Dutkiewicz established the Scientific Award for research integrating the academic environment.

US students attended the Summer School at Collegium Civitas

2019-08-21

From the end of May to the beginning of August, the Collegium Civitas implemented a Summer School program for 44 students from the USA who took part in five thematic courses on security and history. Summer School students at Collegium Civitas came to Warsaw from various American universities, including: University of Texas, University of Texas El Paso, University of Pittsburgh, University of Tennessee, Stetson University, Eckerd College, University of South Carolina, Miami University, Union College. The Warsaw university organized the following courses: «Security Issues in Central and Eastern Europe», «CEE: Road to Democracy», «Terrorism and Hybrid Warfare» under the patronage of the Center for Research on Terrorism, «Between Hitler and Stalin» organized in cooperation with the Museum World War II in New Orleans and Jewish Heritage.

Astronomical Observatory of Adam Mickiewicz University to launch Popular-science lectures

2019-08-21

The Astronomical Observatory Institute of the Adam Mickiewicz University in Poznań is inviting participants to a series of popular science lectures. The observatory's scientific staff will introduce interested astronomy subjects. The next lecture „Does space debris threaten our civilization?” will be delivered on October 4 by Prof. Edwin Grandson. The next lectures are: November 8 - «What's up on the red planet?» – by Dr Wojciech Dimitrow and 6. December - «Are space flights under threat?» - by Dr Krzysztof Kamiński. After each lecture, a tour and telescope show is planned and, in case of favorable weather, sky observations. The whole program will last about 1.5-2 hours (45-60 minutes lecture, 45-60 minutes watching telescopes / sky show). Lectures are held once a month, twice a day. Admission is free, but prior reservation is required. Registration is available on the observatory's website and will be expire exactly 6 days before the lecture date.

Wrocław University of Science and Technology to hold exhibition and discussion about modernism - „Concrete monsters”

2019-08-21

„Concrete Monsters” is an exhibition of 18 original posters depicting Eastern European stadiums, which over time grew into the landscape of their cities. The exhibition will be available for viewers from August 23 at the Wrocław University of Science and Technology. The event will be accompanied by a discussion panel with the participation of artists, scientists, sports journalists and musicians. Until recently, buildings made of concrete constituted the main element of the landscape of Polish cities and towns. Today they are slowly becoming a thing of the past, but 30 years ago many of Poles grew up in this space. One of the most important facilities of those

days were stadiums, which gathered crowds of people supporting their beloved team every weekend. On August 23, invited artists, scientists, sports journalists and musicians will discuss the concrete relics of the past, their feelings and memories related to them, as well as the history of modernism in the world on August 23, in Wrocław, Poland or the world. 16th Lublin Science Festival

2019-08-22

The 16th Lublin Science Festival „Science - technology - innovation” will take place from 16 to 20 September 2019. The main organizer of the event is the Lublin University of Technology. Festival guests will have the opportunity to participate in workshops, presentations, lectures, discussions, experiments, as well as shows, competitions, exhibitions and performances. There will be outdoor events, meetings with authors, educational games and concerts. Universities are inviting participants to visit their laboratories. Festival events are a journey through engineering and technical sciences, medicine, psychology, philosophy, pedagogy and fine arts and theater - says Prof. Anna Halicka, Vice-Rector for cooperation with the socio-business environment of the Lublin University of Technology.

Scholar of Poznan University of Technology receive Polish Hercules 2018

2019-08-22

Professor Tomasz Błaszczński from the Poznań University of Technology became a laureate of „Polish Hercules” - a prestigious prize in the construction industry, awarded to presidents, managers and owners of construction companies, as well as outstanding Polish architects and leaders of construction education. Professor Tomasz Błaszczński is a certified constructor with royal international powers, European powers and full Polish powers, a construction expert from the Central List of the Chief Inspector of Building Control, head of the General Building Laboratory at the Construction Plant, asso-

ciate professor at the Poznań University of Technology. He lectured in Singapore, China, USA, Great Britain, Portugal, Spain and Germany. Polish Hercules was awarded to him for his outstanding scientific, didactic and expert activities for the education of young construction engineers and for the development of modern construction in Poland.

Researcher of the Nicolaus Copernicus University in Toruń to receive Prize and Medal of Krzysztof Ernst

2019-08-22

Professor Grzegorz Karwasz from the Department of Didactics of Physics at the Nicolaus Copernicus University in Toruń received the Medal of Krzysztof Ernst awarded him by the Polish Physical Society. It was granted for his long-term popular science activities, significant contribution to EU and national international projects, and all his scientific activities. Professor Karwasz is the author of books and articles, radio programs and popular didactic films. He has been involved in the creation of interactive exhibitions and web content. He is also a well-known and respected lecturer. One of the most important goals of the Polish Physical Society is to popularize science, including Polish physics at all levels - among schoolchildren, students and adults. The Medal of Krzysztof Ernst has been awarded since 1993 for merits related to the promotion of physics and achievements in the field of scientific research.

Over 300,000 articles available in the Library of Science

2019-08-23

The Library of Science already has over 300,000 articles from 1,000 Polish scientific journals. - We want to treat this achievement as an opportunity to summarize the long-term activities of the University of Warsaw ICM team for openness in science and meetings with publishers and editors of scientific journals, thanks to which it is possible to develop open science resources. On October 21, 2019, the Practical Perspectives of Scientific Publishing workshop will be held at the University Library in Warsaw, addressed to publishers and editors of scientific journals. During the event, the organizers will talk about the current situation of journals in Poland, in particular the needs and expectations of publishers and editorial staff related to open access. They also want to consider how to ensure openness and meet the challenges arising from changes in the area of the law and scientific policy of the state. See the Library of Science website: <http://yadda.icm.edu.pl/yadda/search/general.action?cid=00ae41d8-e724-4f8e-b3f8-35ec5dd97b38>

Success of the publishing house of the State Higher Vocational School in Kalisz

2019-08-23

Published by the State Higher Vocational School in Kalisz, the English-language Journal of Health Inequalities (JHI) has been included in the ministerial list of scientific journals published by the Ministry of Science and Higher Education. JHI is a peer-reviewed, international open access scientific journal that publishes papers on public health, medicine, and related fields. It publishes articles on health promotion, health education, disease prevention and health policy. JHI places particular emphasis on researching inequalities in access to health and the causes of differences in health between regions, countries and groups of people. The publishing house has been developing consistently since 2015. In 2019 it qualified to the «Support for scientific journals» program, thanks to which it has a chance to strengthen its position in inter-

national scientific circulation. More: <http://www.pwsz.kalisz.pl/index.php/sukces-czasopisma-journal-of-health-inequalities>

Gdańsk University of Technology to hold III Pomeranian Open Science Conference and Focus on Open Science workshops

2019-08-23

The Library of the Gdańsk University of Technology and the IT Services Center are inviting participants to the 3rd Pomeranian Open Science Conference: Open Data for Science and Society on October 9-10. The conference will be preceded by an international Focus on Open Science workshop, organized on October 8 in cooperation with Scientific Knowledge Services, the Association of European Research Libraries and the University College London Press. As part of the conference, the participants will present their works regarding repositories of open scientific resources, publishing Open Access as well as open research data and their practical use. Focus on Open Science workshops will be devoted to the issues related to Open Science - the challenges posed by the implementation of Plan S in Europe, an international initiative whose goal is to openly publish publications created under grants. The concept of Civic Science will also be presented. The workshops will be conducted in English.

Success of a student at the University of Silesia in the Zbadaj.to competition

2019-08-23

Dominika Respondek, a student at the University of Silesia in Katowice, has won the Zbadaj.to competition, organized by the Polish Society of Market and Opinion Researchers and the Organization of Opinion and Market Research Companies. The competition finalists took part in the Boot Camp - a three-day research and strategic workshop, during which they learned the secrets of the consumer intelligence industry, and also faced the task prepared by the partner of this year's competition. Four win-

ners of the competition selected in Boot Camp will participate in the Congress of Researchers, industry trainings and paid internships. The Polish Society for Market and Opinion Research and the Organization of Opinion and Market Research Companies are the two largest organizations in the consumer intelligence industry gathering marketing and business professionals who use knowledge of the needs and behavior of consumers in their work.

University of Warsaw to hold European Symposium on Fluorine Chemistry

2019-08-26

From 25 to 31 August 2019, the European Fluorine Chemistry Symposium will be held at the University of Warsaw (UW). Its participants will be chemists, physicists, biochemists and business representatives from around the world. As part of the event, on August 30, Professor Roald Hoffmann from the American Cornell University, Nobel Prize winner and an outstanding specialist in theoretical chemistry will give an open lecture. Professor Hoffmann is the author or co-author of approximately 700 articles published in leading chemical journals. He also conducts active dissemination activities. He participated in the production of the television program «The World of Chemistry.»

Poznań Science and Technology Park to hold Picnic with Imagination in September

2019-08-26

The Poznań Science and Technology Park of the Adam Mickiewicz University Foundation is inviting participants to the next Picnic with Imagination on 7 September. This is Poznań's largest popular science event for children. The idea of the Picnic is primarily to popularize science - biology, physics, mathematics and robotics. Through experiments, shows and various types of workshops, children play, and most importantly, they find fascinating and intriguing fields of science. This year, Picnic with Imagination will be an event included in the Centenary of the Poznań University. The program includes: sensory, manual, language workshops and obstacle courses, floristic and artistic workshops as well as educational games and field games.

University of Silesia to hold a conference „ Science Beyond Disciplines”

2019-08-26

The Faculty Council of the Doctoral Self-government at the Faculty of Mathematics, Physics and Chemistry of the University of Silesia in Katowice is inviting participants to the VIII conference for young scientists „Science Beyond Disciplines” on September 19th and 20th. This year, for the first time, the conference will have an international character. During the conference at the Silesian Intercollegiate Center for Education and Interdisciplinary Research in Chorzów, students, PhD students and young doctors will be able to present the results of their research in the field of exact and natural sciences, engineering and technical sciences, and medical sciences. The meeting will also be an opportunity to discuss research and establish cooperation between scientists. The event program also includes a seminar entitled «Contemporary Theory of Solving Innovative Tasks - effective creation of new products and technologies», led by Dr. Sergey Yatsunenکو from Novismo.

Population in cities to decrease

2019-08-27

In the last two decades in Poland, the population of cities is decreasing, despite the increase in their number, and as a result the so-called urbanization rate, i.e. the percentage share of urban residents in the total population is also decreasing. Such conclusions can be drawn from the report: „New cities in Poland in the 21st century” presented by Professor Piotr Szukalski from the Institute of Sociology at the University of Lodz. After reaching its maximum level in 1997 (61.89%), this ratio is slowly decreasing and at the end of 2018 the share of urban population was only 60.05%. The pace of decline in recent years suggests that this year or 2020, the level will become below 60%. The changes are mainly the result of suburbanization, consisting in depopulation of the center and the development of the suburban area. It is associated with the development of means of communication, which facilitates daily commuting from a distance of up to several dozen kilometers and the development of tele jobs.

Jubilee Congress of Polish Mathematicians in Krakow

2019-08-27

On September 3-7, 2019, the Jubilee Congress of Polish Mathematicians will be held in Krakow on the occasion of the 100th anniversary of the founding of the Mathematical Society in Krakow, which later became the Polish Mathematical Society. The congress will be an opportunity to meet Polish mathematicians from Poland and abroad, also mathematics teachers and representatives of other disciplines related to this field of knowledge. As part of the Congress, eminent scholars will deliver lectures on the state of mathematical sciences in Poland. The Congress in Krakow has the chance to become a unique event and give impetus to the further development of mathematics and popularize it to a wide audience.

Polish research station to be created in the Colombian jungle

2019-08-27

The Polish Biodiversitatis foundation has just bought 30 hectares of mountain forest in the Sibundoy Valley in the northern Andes (southern Colombia). At an altitude of over 2000 m a.s.l. the „La Palma” research station will be established. - After two years of efforts by Polish scientists, we collected money to buy 30 hectares of forest in southern Colombia. This will allow to establish a nature reserve there, and in the future - the first Polish tropical research station – said Dr Marta Kolanowska, biologist from the Department of Geobotany and Plant Ecology, Faculty of Biology and Environmental Protection, University of Lodz, head of the foundation. The research station in the middle of the Colombian jungle will give botanists unlimited research opportunities. In total, about one-tenth of all plant species ever discovered worldwide exist in Colombia.

17th National Sociological Congress to hold the conference on immigration and environmental protection

2019-08-27

The Polish Sociological Association and the Institute of Sociology of the University of Wrocław are inviting participants from 11 to 15 September to the 17th National Sociological Congress. The leading topics of the conference will be immigration and environmental protection. The congress «Me, We, They? Subjectivity, identity, belonging” allows for the active participation of representatives of all sociological subdisciplines and related sciences. This conference also allows to take a new look at integration and conflicts, capitals and values, the various faces of multiculturalism and the consequences of contemporary migrations, the battles for social order and lifestyles, the identity, the condition of Polish sociology, the role of sociologists in the contemporary world, old and new social problems, the repeal or setting various boundaries, and finally - at the complexity of the entire modern world. University of Gdańsk to hold World Deans of Law Forum and the International Association of Law Schools conference

2019-08-27

On September 18-22, the Faculty of Law and Administration of the University of Gdańsk will host the Global Law Dean's Forum and the annual conference of the International Association of Law Schools (IALS). This is the first such congress organized in Poland. IALS is a prestigious academic association of science and higher education institutions providing legal education. During the Global Law Dean's Forum, the deans of law departments will discuss strategic visions and standards for global legal education, and issues related to the role of universities and the judiciary system in shaping legal

reasoning. After the Forum, guests will participate in the annual IALS conference to discuss the problems of methodology of law teaching, selected issues related to specific areas of law as well as interaction of law with business, culture and new technologies.

Conference in Krakow: Sport and tourism in the perspective of social sciences

2019-08-28

Academy of Physical Education (AWF) in Krakow, 2-4 of September 2019, is organizing the 9th National Scientific Conference of the Polish Society of Social Sciences about Sport „Sport and tourism in the perspective of social sciences: tradition and the presence”. The aim of the conference is to present research and theoretical reflection on cultural and social determinants of sport and tourism. The result of the debates will be the publication of a reviewed scientific monograph. The topics of the conference will focus on the broad social horizon of physical culture. Various conceptual approaches to physical culture in the field of sociology, philosophy, history and management sciences will be discussed in the context of both tradition and contemporary challenges in Poland and the world. Social sciences about physical culture strive to place sport, recreation and tourism in the broader horizon of values constituting the foundation of cultural, social and national ethos.

University of Warsaw to hold archaeological exhibition on Easter Island

2019-08-28

Until November 9, 2019, the MAPSE Rapa Nui Museum on Easter Island will hold an exhibition of archaeological works from the University of Warsaw (UW) entitled „The Third Dimension of Archeology”. The visitors can see copies of monuments made in 3D holoprojection and 3D printing, as well as take part in a virtual walk around a cave full of cave paintings. The exhibition is of multimedia and interactive character. The exhibition is directed to the local community and tourists. Visitors have the oppor-

tunity to take part in a virtual walk around the cave Ana Kai Tangata - one of the most famous caves on Easter Island, the only one where cave paintings have been preserved. Currently, the cave is not available to tourists, so a virtual walk is the only opportunity to explore its interior. The organizer of the exhibition is Dr Maciej Sobczyk from the Center for Pre-Columbian Research UW. The exhibition was created thanks to funds from the Ministry of Science and Higher Education.

Academies of Sciences of Poland and Belarus set up a council for the Białowieża Forest

2019-08-28

The Polish Academy of Sciences (PAN) and the National Academy of Sciences of Belarus (NASB) have established a council for the Białowieża Forest. The goal is to protect fauna and flora and reduce the effects of climate change in the forest. President of the Polish Academy of Sciences Prof. Jerzy Duszyński and Prof. Marek Konarzewski took part in the meeting of the NASB Presidium, where the scientific council was appointed. Their experts will prepare recommendations for the protection of biodiversity in the Białowieża Forest. The decision was announced by NASB chairman Vladimir Gusakov. - The solutions to the typical problems facing our countries are particularly relevant. First of all, it concerns the preservation of the Białowieża Forest, the national heritage of Belarus and Poland. Also the climate change will affect the Forest - said Prof. Jerzy Duszyński.

ERNAPE conference "Parent Engagement as Power. Empowering Children, Schools and Societies"

2019-08-28

The Faculty of Social Sciences, the Institute of Pedagogy of the University of Gdańsk, the Foundation for the Development of Gdańsk University and the European Research Network About Parents in Education (ERNAPE) are inviting to the 12th international ERNAPE conference „Parent Engagement as Power: Empowering Children, Schools and Societies” from 18 to 20 September. The aim of the conference is to exchange the experiences of researchers who combine their scientific interests with parents and their multidimensional understanding of «being in education» (including their own formation experiences, participation in the education of their own children and the life of the schools they attend, cooperation of parents with schools and other educational institutions). The conference is a meeting of the ERNAPE research network, which brings together researchers related to the subject of school, family and local community cooperation from Europe and beyond. The three-day meeting will be an opportunity to present the latest research, exchange experiences and establish scientific cooperation.

PhD student of the Warsaw University of Technology becomes the world champion in solving chess problems

2019-08-29

Piotr Górski, PhD student at the Faculty of Physics at the Warsaw University of Technology (PW) became the world champion in solving chess problems. The competition took place in Vilnius during the Congress of the World Federation of Chess Composition. The competitions in solving chess problems consist of 6 rounds divided into 2 days. During each round, participants face 3 tasks of the same type. For example, the first 3 rounds include: mats in 2 moves, mats in 3 moves and chess studies (i.e. tasks such as «whites start and win» or «whites start and draw»). At the World Championships, Piotr Górski

scored 70.3 points, fulfilled the grandmaster norm, exceeded the required ranking and thus became the fourth Polish grandmaster in history.

Conference „We're running kids" to be held at the Scientific Medical Information Center in Wroclaw on September 5

2019-08-29

The Medical University and the University of Physical Education in Wroclaw, together with the Wroclaw City Hall are inviting experts, doctors, teachers and parents to the conference „We're running kids”, on September 5 at the Scientific Medical Information Center. - Scientists, doctors, experts will share the research, which will interest the scientific community and they will do it in such an accessible way that the parents in the room will also take useful information from the meeting - says the main organizer of the meeting, Prof. Tomasz Zatoński from the Medical University of Wroclaw. The program contains many interesting issues, from analyzing the nutritional status and growth of children, to reflecting on whether sugar is actually an enemy and how bacteria can affect obesity. Much attention will be devoted to physical activity - especially in the context of how sport interests can translate into actual physical education lessons.

University of Silesia to hold conference „Unequal education. Forum for the exchange of thoughts and experiences"

2019-08-29

On November 20 for the Faculty of Ethnology and Education Sciences of the University of Silesia is inviting participants to the international scientific conference „Unequal education. Forum for the exchange of thoughts and experiences”. The event will interest representatives of schools, kindergartens, special education institutions, third-century universities, local government institutions, NGOs and

trade unions. The conference issues include gender inequality in relation to education; people with disabilities in educational practice; opportunities and barriers in the education of older people; ethnicity and educational opportunities and achievements of students. The organizers are also planning the following topics: people of different sexual orientation in educational institutions; believers and non-believers at school; improving educational opportunities in villages and in small towns, and the role and opportunities of local governments in implementing equal and equitable education.

18th Congress of European Mycologists to be held in Warsaw and Białowieża

2019-08-30

The Polish Mycological Association together with the European Mycological Association are organizing the 18th Congress of European Mycologists, which will take place in Warsaw and Białowieża on September 16-21, 2019. It will be a scientific event comprehensively covering the role of fungal biodiversity in various environments. The aim of the congress is to present the latest achievements of mycology and to promote applied mycology, biotechnology and the latest methods of studying mushrooms. One of the events accompanying the congress will be the lecture „Mycology: the latest weapon in the crime arsenal”, which professor Patricia E.J. Wiltshire, lecturer and researcher at the University of London, specializing in palynology, mycology and microbiology will give at the Copernicus Science Center in Warsaw on September 17.

Silesian University of Technology starts the Stock Exchange School in September

2019-08-30

Silesian University of Technology is inviting participants to the Stock Exchange School. This is an educational program organized in cooperation with the Warsaw Stock Exchange Foundation, providing with two basic and intermediate courses. Each course includes 5 weekend lectures given by university lecturers, practitioners and experts in financial instruments and markets. Participants will receive information materials prepared by the Warsaw Stock Exchange Foundation and a certificate of completing the course. The «Fundamentals of investing» course covers key and most practical issues for beginner stock investors. The lectures present information on the principles of investing, selecting and assessing companies, the use of financial information and the principles of managing a portfolio of securities. The «Intermediate Stock Exchange» helps to systematize and deepen knowledge about derivatives. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListaWiadomosci&Page=1&WebPartTitle2=Wiadomosc&Filter1Field2=Identifier&Filter1Value2=2810>

University of Wrocław to launch regional stage of Falling Walls Lab

2019-08-30

Share your scientific, business, social or artistic idea and win a participation in the Falling Walls international conference, held every year in Berlin on the anniversary of the fall of the Berlin Wall. Participants can apply to the regional stage of competition at the University of Wrocław until September 9. Falling Walls Lab is an international competition accompanying the prestigious Falling Walls conference, which is attended by scientists including Nobel laureates and businessmen and politicians from around the world. The conference is a unique opportunity to exchange ideas and inspiration, as well as to es-

tablish professional contacts. The events take place as part of the Berlin Science Week. The competition is held under the slogan: «Great minds, 3 minutes, 1 day». Its formula bases on short, three-minute speeches in English, presenting scientific research, business project, artistic or social initiatives. Participants can be students, PhD students, doctors and young professors. More: <https://uni.wroc.pl/wez-udzial-w-falling-walls-lab-2019/>

University of Zielona Góra to hold Congress of Deans of Law Faculties of Public Colleges

2019-08-30

The Faculty of Law and Administration of the University of Zielona Góra will host the Congress of Deans of the Law Faculties of Public Colleges on September 4-6. The meeting will be accompanied by the scientific conference „Science and law teaching in the light of Act 2.0. First experiences and perspectives.” The choice of the topic of the conference was dictated by the urgent need to exchange views and experiences and to discuss the effects of new solutions as the provisions of the so-called Constitution for science are a novelty for the entire academic community, including lawyers representing legal sciences and teaching young lawyers. The leading introductory papers for the discussion will be given by eminent members of the bodies appointed on the basis of the new Act - the Scientific Excellence Council and the Scientific Units Evaluation Committee. The assessment of the practical effects of the higher education reform and its impact on each of the scientific centers represented in the Congress is also expected. More: <http://www.infoserwis.uz.zgora.pl/index.php?wydzia-prawa-i-administracji-uz-gospodarzem-zddzie-dzieskanow-wydziaow-prawa-uczelni-publicznych>

Olsztyn University to hold the 39th Congress of the Polish Astronomical Society

2019-09-02

On September 9-12, 2019, the 39th Congress of the Polish Astronomical Society (PTA) will be held at the University of Warmia and Mazury (UWM) in Olsztyn. The congress is organized by the Center for Radio Diagnostics of the Space Environment UWM and the Polish Astronomical Society in cooperation with the Olsztyn Planetarium and Astronomical Observatory. The honorary patronage over the congress was taken by the Minister of Science and Higher Education. The UWM is planning 8 scientific sessions. The speakers will include winners of the PTA Youth Award, the Włodzimierz Zonn Award for the dissemination of knowledge about the Universe, and the Paczyński Medal, the highest distinction granted by the Polish Astronomical Society for outstanding achievements in astronomy and astrophysics.

Scientist of the Nicolaus Copernicus University in Toruń becomes the president of the Bernoulli Society

2019-09-02

Professor Adam Jakubowski from the Faculty of Mathematics and Computer Science of the Nicolaus Copernicus University in Toruń became the president of the International Bernoulli Society. The selection took place during the 62nd ISI World Statistics Congress. The Bernoulli Society for Mathematical Statistics and Probability was founded in 1975. It deals with supporting the development and dissemination of the achievements of mathematical statistics and probability theory. It supervises highly valued professional journals and coordinates the organization of several annual scientific conferences. Professor Jakubowski studied theoretical mathematics at the Nicolaus Copernicus University in Toruń. He became interested in the theory of probability in 1975, undertaking cooperation with Dr Andrzej Kłopotowski. In 2011-2014 he was the deputy chairman of the Mathematics Committee of the Polish Academy of Sciences. In 2009 he received the prestigious title of Fellow of the Institute of Mathematical Statistics. More: <https://www.umk.pl/consciousoci/?id=26289>

University of Wrocław to hold General Conference of the European Political Research Consortium in September

2019-09-02

The Institute of Political Science of the University of Wrocław is organizing from 4 to 7 September the prestigious General Conference of the European Consortium for Political Research (ECPR). The conference will attract scientists from all over the world, representing all sub-disciplines. The program of the event is divided into sections, which consists of 3 to 8 panels. The sections are organized as seminar on common topics and research questions. The opening ceremony and plenary lecture will be held on September 5 at the National Forum of Music in Wrocław. The lecture will be given by Prof. Grzegorz

Ekiert from Harvard University. The European Political Research Consortium was founded in 1970. It is an independent scientific association of 350 member institutions from around 50 countries. The first ECPR General Conference was held in Canterbury, UK in 2001.

PhD students of the University of Szczecin to participate in a conference at the Harvard Faculty Club in Boston

2019-09-02

PhD students of the Faculty of Economics and Management of the University of Szczecin presented their scientific achievements during the International Scientific Conference „WEI International Academic Conference on Business, Economics, Management and Finance” at the Harvard Faculty Club in Boston. Martyna Kostrzevska prepared the presentation «Customer satisfaction in the e-service market», in which she assessed the level of e-service customer satisfaction by identifying gaps between customer expectations and their fulfillment by online service companies. Daria Wruckowska in her presentation «Educating the elderly people on the use of information and communications technologies in the field of e-health” analysed the global aging process. Their participation in the conference was possible thanks to the international program of scholarship exchange of PhD students and academic staff of the PROM National Agency for Academic Exchange.

Professor of the Jagiellonian University becomes a member of the board of the European Sociological Association

2019-09-03

Dr Kaja Gadowska, head of the Institute of Sociology of the Jagiellonian University became a board member of the European Sociological Association (ESA) for the 2019-2021 term. The choice was made during the congress of this organization, which was held in Manchester. The main area of her research interests is the dysfunction of the publics. An im-

portant part of her scientific and research activity concerns the restructuring of hard coal mining in Poland. Dr Gadowska was also a visiting professor under the bilateral exchange programs and Erasmus + at the University of Tel Aviv, the University of Heidelberg, Charles University in Prague, Tamkang University in New Taipei, Jordan University in Amman and the International University in Rabat.

Poles receive eight medals at the unofficial world championship in mathematics

2019-09-03

Eight medals including four gold and four bronze medals were won by Polish representatives in the final of the International Mathematical and Logical Games Competition. The competition, called the unofficial world championship, was organized by the Paris Diderot University. The Polish team was selected by the May qualifying rounds, which took place at the Wrocław University of Science and Technology. Almost 400 people from all over the country took part in them. The youngest participant was seven years old, the oldest are already retired. Earlier, young mathematicians went through two online stages in January and March. The International French Championship in Mathematics and Logic Games has been organized in Paris since 1987. The Polish team has been participating in them since 1992 with many successes. The Organizing Committee has already announced a change of venue for the competition, which will take place next year in Switzerland - in Lausanne. Educational comics by the scientist of the Polish Academy of Sciences delivered to Podlasie schools

2019-09-04

„Save Mother Earth” is a comics written by Dr Tomasz Samojlik from the Mammal Biology Institute of the Polish Academy of Sciences (PAN) in Białowieża. The book will be delivered to children from schools in the Podlasie Region in September. It will also be available in its electronic version. It shows in a light and funny way how we can take care of the environment. The heroes of the story set off to help the Mother Earth and discover that small changes in everyday life can contribute to saving our planet. The publication set also contains puzzles related to ecology, including saving water and energy, sorting garbage and choosing the least harmful means of transport. Soon the electronic version of the comics will be available on the website of the Institute of Mammal Biology PAS: <https://ibs.bialowieza.pl/>

10th conference from the series Education in Dialogue and Perspective to be held in Augustów

2019-09-04

Nearly 100 scientists from scientific centers from all over Poland will discuss the changes in education and the challenges facing education. The 10th conference of the Education in Dialogue and Perspective series will take place on September 9-10, 2019 in Augustów. Its organizer is the Department of General Didactics of the Faculty of Pedagogy and Psychology at the University of Białystok. Scientists will discuss about the impact of social and cultural and labor market changes on education. The conference program also includes issues related to academic didactics, the position and role of teachers, and new technologies used in school. A solemn plenary session is also planned, devoted to the 90th birthday of Professor Jerzy Niemiec - initiator, creator and guest of honor of Augustów Scientific Meetings.

University Scientific Town to be launched on the campus of the University of Silesia in Katowice

2019-09-04

From 9 to 27 September the University of Silesia in Katowice will launch the University Scientific Town on its campus. The project is aimed at popularizing science and is addressed to primary and secondary school pupils. The program includes presentations, scientific experiments, as well as lectures on pop culture and artificial intelligence. Classes and lectures will be conducted by scientists representing the University of Silesia for Children, the Unibot group and graduates from the University of Silesia. The following thematic panels are planned: «Singularities of the World of Physics» - the lecture will present electric charges and fields and fire as a destructive element, which becomes an irreplaceable source of energy; «Biorobotics» - lecturers will introduce the brain physiology as an inspiration to create an IURO robot as well as the structure and possibilities of using DNA in medicine, and «Amazing history of humanity» - answering the question how to deal with history, pop culture and ... thinking.

University of Economics in Katowice to become a partner of Impact mobility rEvolution'19

2019-09-04

The University of Economics in Katowice becomes a partner of Impact mobility rEvolution'19 - the largest event in Poland dedicated to mobility, transport industry and advanced technologies. The meeting will be held on October 9 and 10 in Katowice and will bring together key players from the world of automotive, transport, smart city and state administration sectors. Participants will discuss new ways of thinking about transport, how to use technology and data to connect people and places, as well as how to increase transport efficiency without harming the environment, maintaining safety. Business, science, administration and startup leaders, who are changing current business and social models

will participate in the program. Discussions will take place under 5 thematic panels: e-mobility, financing and investment (including public-private partnership), urban mobility, mobility as a service, and clean and sustainable transport. More: <https://impactcee.com/mobilityrevolution/2019/>

University of Lodz to launch BioNinja Challenge 2019

2019-09-05

The Biobank Laboratory of the University of Lodz (UŁ) is organizing the BioNinja Challenge 2019-bioinformatic hackathon. Its goal is the integration of biologists and IT specialists and bioinformaticians. The organizers want to show that it is possible to cooperate, and very creative solutions are created by bringing together different areas of knowledge. This is the second goal of the event - to develop (in competition form) new solutions to problems affecting modern bioinformatics. The event will take place at the Faculty of Biology and Environmental Protection at the University of Lodz on October 4-6, 2019. During hackathon, in addition to coding, there are planned presentations of experts of the analysis of biological data. This event is to connect people associated with the academic and business community.

State Higher Vocational School in Sanok to hold the conference „On the border of cultures and nations. Society - Economy - Culture”

2019-09-05

The State Higher Vocational School (PWSZ) in Sanok is organizing the 7th International Scientific Conference „On the border of cultures and nations, on September 12-14, 2019. Society - Economy - Culture. „ The conference aims at meeting and dialogue between researchers on historical, social, cultural and artistic issues, especially in the context of border phenomena. The event will be attended by researchers from Poland and abroad interested in socio-economic and cultural problems. During the conference, participants will discuss the following topics: ways to identify the group, community, individual in relation to the «other» and «their» - conflicts or tolerance; social and cultural relations on the borderlands and at the interface of ethnos, denominations, cultures, nations; diffusion of cultures on the borderlands; value system (and anti-values) of borderland residents; sense of national identity and national minorities on the border; transformations of folk culture in the borderland; folk artist in the local community; forms of religiosity: between continuity of tradition and secularization; economic and social dilemmas of border areas; tourism as a branch of the economy of the border regions.

European Commissioner for Budget and Human Resources visits Poland

2019-09-05

Günther Oettinger- the European Commissioner talked Directions of support for the area of research and science in the years 2021–2027, Multiannual Financial Framework, increasing Europe’s competitiveness on the global market and strengthening the innovation of the economy. Jarosław Gowin, Minister of Science and Higher Education, Minister of Entrepreneurship and Technology Jadwiga Emilewicz, Undersecretary of State at the Ministry of Science and Higher Education Wojciech Maksymowicz,

President of the Research Network Łukasiewicz Piotr Dardziński and Ambassador Andrzej Sadoś participated in the meetings with the EU Commissioner for Budget and Human Resources.

Researcher of the Poznań University of Economics joins the jury of the EMAS Awards

2019-09-05

Dr Eng. Alina Matuszak-Flejszman, Associate Professor of Poznań University of Economics, became a member of the international jury in the EMAS Awards competition. During this year’s competition, the jury will award achievements of organizations that demonstrate a long-term holistic vision of their development in accordance with the principles of sustainable development. The Eco-Management and Audit Scheme (EMAS) is an EU environmental certification system. The European EMAS Award is the most prestigious prize awarded by the European Commission to organizations involved in environmental management. Dr Eng. Alina Matuszak-Flejszman is deputy dean of the Faculty of Commodity Science at the Poznań University. She deals with quality management, environmental management and occupational health and safety management, as well as methods and techniques for solving problems in the system approach to management.

10th anniversary of Postgraduate Studies in Floristry to be held at the University of Agriculture in Krakow

2019-09-06

On Tuesday, September 3, 2019, the Faculty of Biotechnology and Horticulture of the University of Agriculture in Krakow (URK) was holding a conference entitled „10 years of Postgraduate Studies in Floristry”, combined with an exhibition of flower arrangements created by graduates of the Postgraduate Studies in Floristry. The purpose of the event was to exchange views and experiences in the field of ornamental horticulture and floristry. Conference participants learned about the differences between

floristry and bouquet making, and also had the opportunity to participate in specially prepared workshops on subjects related to the plant reproduction in vitro, to taste wines from the university vineyard, observe plants in the university garden, learn about gardening tools, biblical plants, garden roses and about dyeing plants for dry compositions. For 10 years, 169 graduates mainly from south-eastern Poland, but also from the Czech Republic, England, Switzerland and Italy completed the postgraduate studies in Floristry.

5th anniversary of the Leonardo da Vinci Science Center

2019-09-06

On September 7 and 8, 2019, the Copernicus Science Center, Experiment Science Center, EC1 - Łódź, Mill of Knowledge in Toruń and the Energy Science Center will jointly celebrate the fifth birthday of the Leonardo da Vinci Science Center in Podzamcze near Chęciny. The Centre - Mill of Knowledge in Toruń is inviting participants to watch its interesting activities, such as nature observations of sand or playing educational puzzles. Copernicus Science Center will also offer many interesting shows including the «Mind Caught» scientific event. In turn, the EC1 Science and Technology Center from Łódź will present the Rubens tube, which is a hot combination of music, fire and physics. The viewers will find that flames can dance for them as they wish.

Congress of Polish Mathematicians in Krakow

2019-09-06

Celebrating the centenary of the founding of the Polish Mathematical Society (PTM) began on September 3, 2019, with the Jubilee Congress of Polish Mathematicians in the auditorium Maximum of the Jagiellonian University. The meeting included presentation of the scientific achievements of Polish mathematicians. The conference will last until September 7. - The theme of this congress should be Roger Bacon's words: «Mathematics is the door and the key to learning. Whoever disregards the achievements of mathematics is harmful to all science, because those who do not know mathematics cannot know other exact sciences and cannot know the world»- said Prof. Stanisław Kistryn, Vice-Rector of the Jagiellonian University. Dean of the Faculty of Mathematics and Computer Science of the Jagiellonian University Prof. Włodzimierz Zwonek read a letter sent to the organizers and participants of the congress by the Minister of Science and Higher Education Jarosław Gowin. The deputy prime minister wrote that «as an educated philosopher, he pays homage to one of the most beautiful phenomena that the human mind knows and practices - pure mathematics, which feeds only with truth, science and beauty, without any utilitarian motivation.»

Scientist of the University of Wrocław participates in international dipterological workshops

2019-09-06

Dr Marcin Kadej from the University of Wrocław was invited to participate in specialist international dipterological workshops under the auspices of the European Association for Forensic Entomology. Dr Kadej is the head of the Laboratory of Forensic Biology and Entomology. He is one of 12 participants, specialists in the field of so-called forensic science, representing forensic medicine and forensic entomology. Other experts of the workshops come from Belarus, South Korea, Germany, South Africa, Romania, Switzerland, Great Britain and Italy. The

participants are improving their skills in identifying key species of flies relevant to forensic entomology. Exercises will allow them to learn the morphological features necessary for proper taxonomic identification at the level of both juvenile (larva) and adult forms. This is of great importance for further reasoning, for example, about the post mortem intervallum (PMI).

Poznań University of Technology to hold the Researchers' Night

2019-09-06

Poznań University of Technology scientists are preparing many attractions for everyone who visits the university on September 27 - at Researchers' Night. Researchers are inviting guests to their laboratories and studios to see their fascinating work. During the Researchers' Night viewers will be able to meet charismatic physicist conducting the Women Show Physics show and see a team of crazy chemists who will lead guests to the magical land of volcanoes and ice. - In the Cold laboratory you will see how to freeze water in a few seconds, you'll find that polytechnic robots have a lot in common with the latest medical operations, meet the students who team have developed 5 racing cars, check if you have the strength of a kick like Ronaldo, build models robots and visit the virtual factory- say the organizers. Researchers' Night is an event taking place on the same day throughout Europe. Researchers are moving away from their serious projects to play with the audience. More: <https://www.put.poznan.pl/pl/aktualnosc/noc-naukowcow-2019>

Scientists from around the world participate in the 4th Polish Congress of Mechanics in Krakow

2019-09-09

Over 500 world-famous specialists dealing with the mechanics and physics take part in the 4th Polish Congress of Mechanics, which takes place in Krakow on September 8-12, 2019. The event is linked to the 23rd International Conference on

Computer Methods in Mechanics. The main organizers of the events are the Krakow University of Technology, AGH University of Science and Technology in Kraków and the Jagiellonian University in Kraków. The aim of the Congress is to present the current state of research in the discipline of Mechanical Engineering, as well as to analyze the relationship between the technical sciences and the economy. The organizers emphasize, that the event promotes the internationalization of Polish science by creating a platform for participants from different countries to be helped in establishing contacts and discussing important scientific problems. The event is attended by over 500 scientists from around the world, including: Prof. Leszek Demkowicz (University of Texas at Austin, USA), Prof. Fionn Dunne (Imperial College London, Great Britain), Prof. Shaker Meguid (University of Toronto, Canada), Prof. Franz G. Rammerstorfer (Technical University of Vienna, Austria), Prof. Jerzy Pamin (Krakow University of Technology).

Lublin University to hold the 30th Congress of the Polish Soil Science Society

2019-09-09

Almost 200 scientists debated in Lublin during the 30th Congress of the Polish Soil Science Society. The event was organized under the slogan „Soil as a source of life” and was held on September 2-7, 2019. The congress was attended by almost 200 participants from Polish and foreign scientific centers, including scientists from Egypt, Russia, Germany, Lithuania, Hungary, Belgium, Ukraine and Mexico. During plenary sessions, they presented research results showing the importance of soil as a natural resource conditioning life on Earth and its impact on the functioning of ecosystems and societies, especially in the economic dimension. There were also two poster sessions with 95 works were presented. The event was organized by the Maria Curie-Skłodowska University in Lublin, the University of Life Sciences in Lublin, the Institute of Agrophysics of the Polish Academy of Sciences (PAN) in Lublin, the Institute of Cultivation of Fertilization and Soil Science - National Research Institute in Puławy and the Roztocze and Polesie national parks.

Secondary School graduates exhibition Perspektywy 2019

2019-09-09

Until September 27, 2019, the Perspektywy 2019 Secondary School Graduates' exhibitions will be held in 16 of the largest Polish academic centers. High school graduates' exhibitions are very needed because they allow future students to compare offers of many universities and fields of study. - I wish assembled secondary school graduates to make only good choices - said Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin during the inauguration of the event in Krakow. The Exhibition of High School graduates is visited each year by thousands of high school students who take part in the presentation of regional universities' offers and lectures conducted by experts of the Regional Examination Boards. During the Exhibition, secondary school graduates find the opportunity to talk with representatives of university applying departments and students. They will take part in stress management workshops, and will also learn what mistakes they should avoid at the final exams.

V Polish-French Forum on Science and Innovation

2019-09-09

The French Embassy in Poland and the Ministry of Science and Higher Education are inviting participants to the 5th Polish-French Forum for Science and Innovation, which will take place on November 19, 2019. The Forum's task is to strengthen Polish-French cooperation in the field of research and innovation, including within the bilateral exchange program of PHC Polonium scientists. The leading theme of the event will be the cooperation of research teams with the innovative industry as well as the creation and role of international research centers in Europe. The forum is addressed to scientists, university employees and institutes, officials, innovators and students. More: <https://www.institutfrancais.pl/pl/evs/v-forum-nauki>

V4 Training for research project managers

2019-09-09

The Polish Academy of Sciences is inviting participants to a free training for research project managers, organized by the Science Promotion Office of the PolSCA PAN in Brussels together with the Visegrad Group (V4). The autumn V4 Training will take place on November 18-20 in Brussels. It is addressed to the employees of the institutes of the Polish Academy of Sciences, universities and research institutes from Poland, who deal with project management on a daily basis under the European Union's framework programs. Lectures and workshops (in English) will be conducted by officials and specialists from the European Commission and institutions working for research and innovation. Experts will tell the participants about the Horizon 2020 and Horizon Europe programs.

Scientist of the University of Life Sciences in Poznań receives Wageningen Academic Publisher Award

2019-09-09

Dr Marcin Pyszczola from the Department of Genetics and Fundamentals of Animal Breeding of the Faculty of Veterinary Medicine and Animal Sciences of the Poznań University of Life Sciences received the 'Wageningen Academic Publisher Award' for the best performance of a young scientist. The young scientist was awarded for the lecture «Verifying the existence of second litter syndrome in pigs» delivered at the session «Innovative approaches to pig production and pig research» during the jubilee 70th Congress of the European Federation of Animal Science (70th Annual Meeting of the European Federation of Animal Science EAAP 2019) in Belgian Ghent.

Nicolaus Copernicus University in Toruń International biologists' conference to hold International biologists' conference

2019-09-09

The 9th International Conference of the Polish Society of Experimental Plant Biology will last until September 12 at the Nicolaus Copernicus University in Toruń. The event is co-organized by the Faculty of Biology and Environmental Protection at the University of Toruń. The conference topics will cover many aspects of experimental basic research in plants - generative reproduction, genomics, proteomics and metabolomics, biotic and abiotic interactions as well as biotechnology and plant tissue culture issues. The purpose of the meeting is to present the latest research achievements of its participants and to create a platform for direct contact of Polish scientists including students, PhD students and young researchers with outstanding foreign scientists. The event also serves the international promotion of Poland, in particular the Toruń plant biologists and the university, the city and the region. More: <https://www.umk.pl/consciousosci/?id=26293>

Medical Research Agency with pharmaceutical companies in Poland focuses on the innovation of medicine

2019-09-10

During the XXIX Economic Forum in Krynica, the Medical Research Agency (ABM) signed a letter of intent declaring cooperation with representatives of key pharmaceutical companies in Poland in the development of innovation in Polish medicine. The agreement concluded between ABM and pharmaceutical companies concerns supporting enterprises in conducting and developing innovative activities in the field of medical sciences, health sciences and interdisciplinary projects in health care, with particular emphasis on artificial intelligence, and also includes joint actions focused on the development of new technologies and scientific research. in health care. As part of cooperation, the parties envisage joint organization of workshops, conferences, seminars and trainings, as well as the creation of initiatives at the expert level in the form of think tanks. The letter of intent with the Medical Research Agency was signed by 12 pharmaceutical companies, members of the Pharmaceutical Committee of the American Chamber of Commerce, including Amgen, AstraZeneca, BMS, Janssen, Medtronic, MSD, Mylan, Novartis, Pfizer, Roche and Takeda.

Scientists of the Wrocław University of Environmental and Life Sciences join the list of 30 Creative persons of Wrocław

2019-09-10

Professors Agnieszka Noszczyk-Nowak and Wojciech Niżański from the Faculty of Veterinary Medicine of the Wrocław University of Environmental and Life Sciences joined the 30 Creative Persons of Wrocław - important, brave and successful people in the areas of culture and art, business, society and science. Every day they build a positive brand of Wrocław in their close area, in Poland and abroad. Wrocław, which is open to people, is a friendly,

good place to live, study and work, arises from their passions, dreams and initiatives. Professor Noszczyk-Nowak specializes in animal cardiology, dilated cardiomyopathy in dogs, a genetic heart disease that generally affects large breed dogs. Professor Niżański manages the Department of Reproduction and the Farm Animals Clinic. He is a veterinarian who focuses primarily on the treatment of dogs and cats, and his team deals with the reproduction of endangered animal species using in vitro techniques. Lecture by Prof. Robert Novak to be held at the Astronomical Observatory of the University of Wrocław

2019-09-10

The Space Research Center of the Polish Academy of Sciences and the Astronomical Institute of the University of Wrocław is inviting students interested in the latest space research to a guest lecture by Professor Robert Novak, one of the world's leading methane researchers on Mars. Professor Novak works at Iona College in the USA, and conducts his groundbreaking research at the famous Mauna Kea observatories in Hawaii. His work has been published many times in the prestigious journal Science. The lecture «Measuring the Atmosphere of Mars by Using Ground Based Telescopes» will be conducted in English, but is addressed to a wide audience, especially pupils and students. The lecture will take place on Wednesday, September 11 at 14.30 at the Astronomical Observatory in Wrocław at ul. Mikołaja Kopernika 11.

AGH University of Science and Technology started cooperation with Cisco

2019-09-11

Vice-Rector for Cooperation of the AGH University of Science and Technology in Kraków Prof. Jerzy Lis and the general director of Cisco in Poland Przemysław Kania signed a letter of intent regarding cooperation between AGH and Cisco. Both sides

declared cooperation in increasing the effectiveness of education for AGH UST students and staff, joint development of innovative projects, applying for them financed from external sources, organizing internships for AGH UST students in Cisco branches and organizing job fairs, workshops, seminars and conferences. - We are very pleased with the closer cooperation between AGH and Cisco. We believe that science and business should always complement each other and in this case it will be of mutual benefit. It is especially important for us that our students will be able to practically broaden their skills acquired during classes. After all, our goal is to educate in line with the expectations of the labor market - emphasized the Vice-Rector for Cooperation of AGH Prof. Jerzy Lis.

“Learning organization 2019” competition

2019-09-11

The Voivodship Labor Office in Białystok and the Białystok University of Technology are inviting employers from the Podlasie Voivodeship to participate in the fifth „Learning Organization 2019” competition. The winners of the Competition will be selected in three categories: micro and small enterprises (employment up to 49 employees), medium and large enterprises (employment from 50 employees), and public sector. The aim of the competition is to promote employers from the Podlasie Voivodship who invest in the development of employees' competences, are knowledge-oriented and develop their own personnel strategy, organizational culture and implement investments to increase the efficiency of their organization, while supporting the learning of employees and business partners.

University of Warsaw to hold a debate on the 30th anniversary of the government of Prime Minister Tadeusz Mazowiecki

2019-09-11

On the occasion of the 30th anniversary of the establishment of the government of Prime Minister Tadeusz Mazowiecki, the University of Warsaw is holding a debate with the participation of former Polish presidents: Bronisław Komorowski and Aleksander Kwasniewski on September 12, 2019. The meeting is open to the public. The meeting is organized by the Department of Tadeusz Mazowiecki of the University of Warsaw. The event is co-organized by the City of Warsaw. The debate will be devoted to the relevance of the message of Prime Minister Mazowiecki and his government. Panellists will try to indicate what is important and current about the heritage of Prime Minister Mazowiecki today. The debate will be led by Prof. Mirosław Wyrzykowski, chairman of the Council of the Chair Tadeusz Mazowiecki.

Conference on the future of Polish economic universities

2019-09-11

The University of Economics in Krakow is inviting participants to a conference summarizing the project „Paths to adapt economic universities to changes in the system of science and higher education” on September 12. Dr Jarosław Gowin, Minister of Science and Higher Education, announced his participation in the event. The «Paths to adapt economic universities to changes in the higher education system» project is funded under the DIALOG program of the Minister of Science and Higher Education and implemented as part of a partnership with major economic universities in Poland, which includes economic universities from Kraków, Katowice, Poznań and Wrocław and the Warsaw School of Economics. The conference will be an opportunity to get acquainted with the diagnosis of the situation at Polish economic universities and their challenges in connection with the need to adapt

to changes. More: https://www.ue.katowice.pl/no_cache/pracownica/nauka-i-biznes/article/konferencja-nt-przyszlosci-polskich-uczelnii-ekonomicznych.html

Scientists from Europe to come to Szczecin for the 11th Congress of Societas Humboldtiana Polonorum

2019-09-11

From 12 to 15 September, the 11th Congress of Societas Humboldtiana Polonorum - „Science in the age of globalization - will be held at the West Pomeranian University of Technology in Szczecin. It will be attended by over 140 researchers from research centers from all over Europe. The idea of the Congress is to discuss the latest achievements of science and its role in creating and creating the future in the era of globalization with outstanding scientists. The Congress is intended to be interdisciplinary and will be devoted to various aspects of the development of science and its impact on the world around us. Foundation of Alexander von Humboldt was established in Berlin in 1860 to commemorate the outstanding naturalist and traveler, diplomat and statesman - Alexander von Humboldt, who was called the last universal scholar of Europe. The number of scholarship holders and research award winners of various Foundation programs exceeds 28 thousand. Vote for the name for the Polish planet

2019-09-12

Only until the end of October 2019 Poles can vote for the name for the Polish planet in the competition of the International Astronomical Union (IAU). The competition was organized on the occasion of the 100th anniversary of the IAU. Each country can name one planet and one star. Poland received the gas giant BD + 14 4559 b, located in the constellation Pegasus, about 160 light-years from Earth. In June and July Internet users submitted over 2.8 thousand

ideas. The jury then selected the best suggestions. List of selected names (in order: star name, planet name): • Geralt and Ciri - characters from the saga about the Witcher by Andrzej Sapkowski. • Jantar and Wolin - the former Polish term for amber, Wolin is a Polish island on the coast of the Baltic Sea. • Piast and Lech - characters from legends about the beginnings of the Polish state. • Polon and Radium - names of chemical elements discovered by Maria Curie-Skłodowska. • Solaris and Pirx - novel title and character from Stanisław Lem's books. • Swarog and Weles - deities from Slavic mythology. • Twardowski and Boruta - characters from the legend of Twardowski. Vote on: <http://www.iau100.pl/planety/wyberz>

State Higher Vocational School in Nysa to receive record funds for international cooperation

2019-09-12

The State Higher Vocational School (PWSZ) in Nysa received for 2019-20 record funds for international cooperation. In the national ranking, due to the total amount of funds received in the Erasmus + Program, it was ranked first for the State Higher Vocational Schools in Poland. Students from Nysa can go abroad for up to 12 months and gain international experience in Cyprus, Greece, Turkey, Spain, Norway, Italy and Portugal. The State Higher Vocational School in Nysa will also cooperate with partners from countries such as: USA, India, China, Mexico, Indonesia, Ukraine, Albania, Bosnia and Herzegovina, Montenegro and Kosovo. While partners from India, Ukraine, Mexico and the Balkan countries are already regular guests of the university, China, Indonesia and other universities in the United States are new, valuable directions of cooperation.

Second Polish-British scientific forum: Women in STEM

2019-09-12

The Polish Embassy in London, the Ministry of Science and Higher Education, the British Embassy in Warsaw and the UK Science and Innovation Network will jointly host the Second Polish-British Science Forum: Women in STEM. The event aims to present the most important aspects of scientific cooperation between Poland and Great Britain. The Second Polish-British Science Forum: Women in STEM, which will be held on September 20 at Senate House in London, will gather the best scientists who will talk about the challenges and opportunities for women in science, technology, engineering and mathematics (STEM). The forum's goal is to deepen and strengthen relations between Poland and Great Britain in the field of science, research and innovation. This year's forum will be a platform for guest officials, researchers, teachers and university lecturers, as well as entrepreneurs to exchange experiences and knowledge. They will also discuss the impact of new technologies, namely artificial intelligence (AI) and machine learning, on society and gender equality.

President Duda: We want the links between science and industry to become stronger in Poland

2019-09-12

- We are proud that this Congress is a proof of the bonds connecting the international community of scientists and engineers - specialists in mechanics, guided by a common research passion and jointly concerned about the future of civilization - said Polish President Andrzej Duda to participants of the 4th Polish Congress of Joint Mechanics taking place in Krakow with the 23rd International Conference on Computer Methods in Mechanics. - It is very important to us that the links between science and industry in our country are getting stronger and deeper to increase Polish innovation and competitiveness and contribute to the success of our native companies and their expansion into global markets,

- said the president. Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin emphasized that no country is able to ensure the prosperity of its citizens and the economic security without a strong industry. He highlighted that the challenge is to reconcile respect for the natural environment with the rapid and dynamic development of the economy.

Gdańsk University of Technology to receive PLN 4.5 million for scientists under the Leader competition

2019-09-12

Three projects of scientists from the chemical faculty of the Gdańsk University of Technology received funding under the competition Leader of the National Center for Research and Development. The allocated funds total almost 4.5 million PLN. Funded projects include: «New diagnostic tests for the detection of anti-Toxoplasma gondii antibody in animal sera based on recombinant chimeric proteins», «Development of technology for the production of foamed polyurethane-rubber composites for use as suppressive materials» and «Integrated prototype of photo-supercapacitor for storage electricity obtained from the conversion of solar radiation». The goal of the Leader program is to expand the competences of young scientists in independent planning and management of research teams during the implementation of scientific projects whose results can be implemented in the economy.

Poznań scientists join the National Ethics Committee for Animal Experiments

2019-09-12

The Minister of Science and Higher Education Jarosław Gowin appointed Prof. Krzysztof W. Nowak and Prof. Dariusz Skarżyński from the Poznań University of Life Sciences to the members of the National Ethical Committee for Animal Experiments. Both professors are scholars of the Faculty of Veterinary Medicine and Animal Sciences of the Poznań University. They were appointed to the commission for

a four-year term of office 2019-2023. The National Ethical Committee is an opinion-forming, advisory, methodological and information body which plays an important role in creating and passing good practices in planning and performing procedures, applying the principles of replacement, reduction and refinement, as well as alternative methods used in animal testing. It also plays an important role in contacts with the European Commission.

University of Silesia to hold a seminar about opportunities and barriers to the implementation of new legal regulations in Polish universities

2019-09-12

The Research Center for Public Policy and Regulatory Problems of the University of Silesia is inviting participants on September 16 to the seminar „University 2.0 - opportunities and barriers to the implementation of new legal regulations in Polish universities“. The theme of the meeting which will be held at the Faculty of Radio and Television in Katowice at ul. St. Paweł 3, there are opportunities and barriers to implementing new legal regulations in universities in the context of the reform of higher education in Poland. One of the lecturers will be Dr Anna Budzanowska, Director General of the Ministry of Science and Higher Education, who will deliver the paper «Act 2.0 - and what next?». The seminar also provides for three discussion panels: Act 2.0 and changes in public and private universities; A new university model and publishing habits and strategies as well as University councils in practice.

Faculty of Management of the University of Lodz to launch Innovation Night

2019-09-13

On Saturday, October 5, 2019, in the evening, the Faculty of Management of the University of Lodz (UŁ) will organize the Innovation Night, as part of the nationwide Festival of Digitization. The program includes workshops on robots, smart cities, a computer game and a seminar. One of the newest courses in the offer of the Faculty of Management in Lodz is Digitization and Data management in business, and this subject will mainly be discussed at the Innovation Night. The events are addressed to everyone, regardless of age. The lecturers are the members of the international Center for Research on Artificial Intelligence and Cyber Communications, which operates at the Faculty of Management of the University of Lodz. The areas of the Centre's scientific activity include the research on the impact of artificial intelligence on management and organizations, management of a digital enterprise and virtual team, cybersecurity.

International University Fair QS in Warsaw

2019-09-13

On October 3, 2019, the Warsaw „Bristol“ hotel will host the QS International University Fair. This is the most prestigious series of international fairs devoted to MA and PhD studies. Students, graduates and young specialists interested in postgraduate studies and career development with a MA title will have the opportunity to apply for the best universities in the world and gather information on a wide selection of postgraduate programs in various subjects. Over 20 universities from the USA, Great Britain, Canada, Germany, Spain, Switzerland and Italy will participate in the fair, including London Business School, HEC-Paris, University of Glasgow, University of St. Gallen, Politecnico di Milano, University of Toronto, Hochschule Darmstadt, KU Leuven and Warwick Business School. More: https://www.topuniversities.com/events/qs-world-grad-school-tour/europe/warsaw?utm_source=Eurostudent_pl&utm_medium=Link&utm_campaign=World-Grad-School-Tour_F19_Warsaw&partnerid=2565

II World Forum of Polish Science Beyond the Borders

2019-09-13

Until September 14, 2019, the Second World Forum of Polish Science Beyond the Borders will take place in Pułtusk under the slogan „Science, innovation, competitiveness, or how to be a scientist abroad“. The main goal of this year's Forum is to create a co-creating common space for scientists of Polish origin operating outside the country, supporting their scientific and research relations, networking and knowledge sharing. In addition, the organizers want to promote Polishness and Poland on the international scientific arena, Polish diaspora and compatriots in the country, as well as they want to care about improving the image of Poles and Poland in the world - informs the Association «Polish Community».

Wrocław University of Science and Technology graduates reach the final of the international competition for the factory of the future

2019-09-13

„ReFactory“, a student project of a factory that converts electronic waste into raw material for 3D printers by Patrycja Czechowska and Katarzyna Winkler from the architecture department of the Wrocław University of Science and Technology reached the final of The 4. Annual Inspireli Awards. The project was created as part of the «Architectural Design» classes. The students were to create the concept of a factory of the future that could function in about ten years. They decided to place their plant in the Wrocław city port of Kleczków. Inspireli Awards is an international competition for students of architecture held under the auspices of the well-known and prestigious ArchDaily website. 887 projects from 86 countries were submitted for competition. The jury selected 30 finalists in the following categories: architecture, urban planning and interior design. The winners will be announced on October 10 at a gala at the Czech Technical University in Prague. More: <https://pwr.edu.pl/uczelnia/aktualnosci/fab->

Scientist of the Poznań University of Economics becomes Vice President of the Program at APRIA

2019-09-13

Dr Piotr Manikowski, Prof. Associate of the Poznań University of Economics, was elected Vice President of the Program at the Asia Pacific Risk and Insurance Association (APRIA) for the 2019-2020 term. The main task of the scientist from the Insurance Department of the Poznań university will be dealing with the program of the New York conference WRIEC 2020 - the most important scientific event in the field of insurance. This is another year of work of Prof. Manikowski in the authorities of APRIA. In the 2018-2019 term, he was the Secretary in the Executive Committee, and in the years 2014-2017 he was a member of the Scientific Council of this organization. APRIA was founded in 1997. It is one of the three most important international insurance associations, which brings together scientists from almost all continents. They meet at annual conferences to present the results of the latest research and discuss current events in the field of insurance and risk management.

One hundred game developers meet at the Wrocław Technology Park over the weekend

2019-09-13

From Friday to Sunday the Wrocław Technology Park have a competition „Fifty-Fifty Game Jam”. The event will be attended by over a hundred game developers who will work on their own projects for three days in the Wrocław Technology Park. One of the goals of the event is to draw attention to the still insufficient presence of women in the gaming and IT industry. The competition is directed to both people who create games in a professional way and people who create games as amateurs. As part of the competition, participants are required to create a working computer, board, card or other game. Games can be created individually or by teams of up to 5 people. The prizes will be awarded in 2 categories: «The Best Game to Him 2019» and «Fifty-Fifty». In the first category, all games created during the event will be assessed, while in the «Fifty-Fifty» category, games created by a team of women and men will be rated.

University of Szczecin and Provincial Police Headquarters in Szczecin against the hate in the Internet

2019-09-13

The University of Szczecin and the Provincial Police Headquarters in Szczecin will implement a project to counteract hate and hate speech among the West Pomeranian youth - „#donthejt”. The project assumes conducting preventive workshops in 20 secondary schools of the voivodship and 10 schools in Szczecin and creating a «room of secrets» - a specially designed place of education where groups of young people will be able to find out what means hatred online and how to defend against it. As part of the project, there will be „stand up” workshops «laugh hate», during which the organizers will try to show that the use of hatred should have legal consequences. There will also be a film spot warning about the effects of hatred on the internet and its

consequences for a young person, a photo exhibition and simulation of the criminal trial «sentence hatred for hatred».

University of Warsaw to hold a conference on the 100th anniversary of Polish-American relations

2019-09-16

On October 4, 2019, the Faculty of Political Sciences and International Relations at the University of Warsaw and the Jan Karski Foundation are organizing the conference „The Great Power and Poland 1919-2019 in Warsaw. 100 years of Polish-American relations. „ The event will consist of two thematic panels. The aim of the panel «Transatlantic relations: a community of values and interests» is to assess the condition of the transatlantic community that appeared in the last years of World War II and has faced external threats, coped with differences and internal tensions. What are the challenges facing them today? What factors threaten its coherence and what do they serve for? The second panel «Atlantic Community in the world of power politics» will be devoted to the liberal international order that the Atlantic community formed. Currently, this order is going through a crisis and maybe even twilight. Is this an irreversible process? Does the return of power politics serve the US and Europe? The conference’s speakers will include: Daniel Fried, former US ambassador to Poland, Stephen D. Mull - Vice Rector for International Cooperation at the University of Virginia and James P. Seevers - Director of Studies and the Georgetown Leadership Seminar program at the Institute of Diplomacy Studies at the School of Foreign Service at Georgetown University in Washington.

AGH University of Science and Technology in Krakow to celebrate 100th anniversary of physics

2019-09-16

On September 16, 2019, the AGH University of Science and Technology (AGH) in Krakow is holding the event „100th anniversary of physics at AGH”, which

is organized as part of the 45th Congress of Polish Physicists. Outstanding scientists will give plenary lectures on the history of physics at AGH and the applications of this science in medicine, finance, technology and the environment. Special parallel sessions will be devoted to particle physics, complex systems physics, environmental physics, medical physics and the use of physics in the field of nanotechnology and innovation in industry. The 45th Congress of Polish Physicists is organized by the Krakow Branch of the Polish Physical Society and will take place on September 13-18, 2019. The congress is attended by about 500 people representing leading domestic and foreign universities and representatives of companies conducting research and development in enterprises.

Pomeranian University in Słupsk to hold a conference „Poland and its neighbors over the centuries”

2019-09-16

PhD students of the Institute of History and Political Sciences of the Pomeranian University in Słupsk are inviting participants to the 5th National Scientific Conference of PhD Students „Poland and its neighbors over the centuries’. The conference will take place on September 28 at the Academy’s headquarters. The theme of the fifth conference remains the subject of processes in Poland and neighboring countries, as well as Poland’s mutual relations with its neighbors. This year’s conference is part of celebration of the 50th anniversary of the Academy. The organizers are planning a discussion on: Multifaceted human activities on Polish and neighboring lands; Everyday life of a resident of Poland and its neighbors throughout history; Skirmishes, wars, armed conflicts taking place in Polish and neighboring territories in history, and issues of economic, social and political relations that have taken place in Polish and neighboring territories over the centuries.

17th Olsztyn Days of Science and Art

2019-09-17

The University of Warmia and Mazury (UWM) in Olsztyn is organizing the Olsztyn Science and Art Days for the seventeenth time. From 25 to 27 September participants will be able to feel like a student, researcher and scientist. The guests will be able to participate in the lectures, laboratory shows, workshops, trips, competitions and exhibitions. All attractions are divided into 7 thematic groups covering all areas of knowledge: from the humanities, through exact sciences, biological and medical sciences, to economics, social sciences and art. The event is financed by the Ministry of Science and Higher Education and by the Olsztyn City Council. The main sponsor is Polskie Górnictwo Naftowe i Gazownictwo. More: <https://dninauki.uwm.edu.pl/>

Lublin to hold XX Universal Congress of Polish Historians

2019-09-17

From 18 to 20 September 2019, the jubilee 20th Universal Congress of Polish Historians under the National Patronage of Andrzej Duda, the Polish President, will take place in Lublin. Particular items of the program of the 20th Universal Congress of Polish Historians will take place at the Center for the Meeting of Cultures, Lublin Conference Center and the Arena Lublin, as well as in the Council Hall of the Faculty of Humanities at the Maria Curie Skłodowska University (UMCS) and at the Catholic University of Lublin (KUL). The organizers are planning that the event will bring together over 800 scientists, teachers and students from Poland and abroad. The program of this year’s Congress includes debates and discussions of scientists in nine sections and five thematic panels as well as a poster session for PhD students. Panels include the seminar dedicated to the Union of Lublin with the participation of only foreign participants, a debate on the history of Poland told from the perspective of women and a panel about what history is needed by Poles today.

Academy of Fine Arts in Wroclaw completed the project „University of Young Explorers”

2019-09-17

The Academy of Fine Arts in Wrocław has completed the implementation of the „University of Young Explorer” project. 126 people aged 6-16 took part in the classes at the three faculties of the university. The project was co-financed by the European Union from the European Social Fund. As part of the project, programs for children and youth were developed and implemented in the form of workshops and theoretical / demonstration classes at the painting and sculpture, the ceramics and glass, and the graphics and media arts departments. Participants had the opportunity to cooperate with artists and learn the secrets of work in the scientific and artistic environment. The kids created the amazing works including from stained glass and installations in public space to art books and audiobooks. Teachers and school staff from Wrocław, Wołów, Sobótka and Żarów and the „Made in Brochów” foundation cooperated with the artists from the Wrocław Academy of Fine Arts.

University of Economics in Katowice to hold a conference about the problem of wealth and poverty

2019-09-17

The Department of the History of Economic Thought of the Department of Economics of the University of Economics in Katowice is organizing a national scientific conference from 19 to 21 September in Ustroń XII: „The problem of wealth and poverty in socio-economic theories”. The discussion will concern the issue of wealth and poverty in economic thought and social sciences, the problem of social inequalities, the role of the state in preventing and reducing poverty, and measuring wealth and poverty. The proposed research areas do not exhaust a wide spectrum of issues related to wealth and inequality. The organizers are inviting historians of economic thought, representatives of other scientific

disciplines interested in this subject, and economic practitioners to the conference.

3rd Podkarpackie Science Festival

2019-09-18

The 3rd Podkarpackie Science Festival will take place on 20-21 September 2019 at the G2A Arena in Jasionka near Rzeszów. The program includes a science picnic, lectures, shows, popular science lectures, interactive exhibitions, attractions for children and a special festival evening. The originator of the event is the Education Support Foundation of the Aviation Valley Association, which sets itself the goal of popularizing science and education. On the first day of the Podkarpackie Science Festival, the organizers are planning international final of the Learn & Fly competition, organized as part of the project of the same name. The finalists from Spain, Portugal and Poland will compete with the best aircraft model and their longest flight. On the second day viewers will be able to visit the picnic and exhibition zone with virtual reality simulators and take part in scientific shows taking place throughout the G2A Arena. The event will end with a festival evening.

Prof. Tadeusz Domański to receive Lublin Scientific Award of the Polish Physical Society for 2019

2019-09-18

Professor Tadeusz Domański from the Department of Theoretical Physics of the Institute of Physics at the Maria Curie-Skłodowska University (UMCS) in Lublin was awarded the Scientific Award of the Polish Physical Society for 2019. The award was granted for examining the topological stability of the superconducting phase and Majorana quasi-particles in magnetic chains and hybrid structures with quantum dots. In his scientific work he deals with analysis of the properties of high-temperature superconductors, super-liquid boson and fermionic atoms, a description of correlation phenomena in solid materials and nanoscopic heterostructures, and a description of electronic transport. He is also interested in using new methods of quantum field theory to describe highly correlated systems. The prize was awarded during the 45th Congress of Polish Physicists in Krakow.

Conference and meeting of the Religious Language Commission and the International Congress of Slavists

2019-09-18

The Institute of Polish Studies and Cultural Studies and the Institute of Slavic Studies of the Opole University are inviting participants to an international scientific conference „Religion and style” on September 19 and 20. As part of the conference, the organizers are planning a meeting of the Religious Language Commission at the International Congress of Slavists. The program includes speeches by 30 lecturers - linguists, literary scholars, culture scholars and theologians from five foreign centers (China, Czech Republic, Russia, Serbia, Slovakia) and several Polish centers (Kraków, Lublin, Opole, Toruń, Warsaw). An important part of the conference will be the meeting of the Religious Lan-

guage Commission at the International Congress of Slavists. The Committee is a 37-member body of specialists that will define the framework and specific goals of joint research on the varieties of individual national languages that support the sphere of religion-related culture. More: <http://www.uni.opole.pl/page/3057/miedzawodowski-konferencja-naukowanireligia-i-styl>

Wroclaw University of Science and Technology prepared almost 300 events for the Lower Silesian Science Festival

2019-09-18

Nearly 300 events were prepared by the Wroclaw University of Science and Technology as part of the 22nd Lower Silesian Science Festival, starting this Friday. The program includes lectures, workshops, experimental demonstrations, as well as the Oxford debate and meetings with enthusiasts of various fields of science. The theme of the event is the saying of Hugo Steinhaus - an outstanding mathematician and humanist - „Mathematics mediates between spirit and matter”. In this way, the festival is part of the celebration of the Jubilee Year of Mathematics. Wroclaw universities, institutes of the Polish Academy of Sciences and non-university environments will participate in it. During the event scientific organizations will present their achievements, biomedical engineering, nanotechnologies and space projects. Participants will also be able to see closely fiber lasers and unusual energy sources. Admission is free, registration is required for some events.

Finalists of the 19th Polityka's Scientific Awards selected

2019-09-19

The Polityka weekly journal selected 15 finalists for the 19th Polityka Science Awards. Five scientists will receive major scholarships. The main goal of the POLITYKA Scientific Awards program is to identify the most talented scholars. Thus the members of the Professor and Social Juries can accentuate that science is important and the scientists are often

charismatic figures with amazing achievements already at an early stage of their career. On October 20, during the gala ceremony, five winners will receive scholarships in the amount of 15,000. PLN, the other finalists will receive PLN 5,000. To date, 302 people have been received the Science Scientific Awards. Thanks to partners and readers of the weekly journal, who paid 1 percent. income tax to the scholarship fund they allocated almost 6.5 million PLN. List of finalists: <https://www.polityka.pl/tygodnikpolityka/nauka/1924774,1,nagrody-naukowe-polityki-finalisci.read>

Nicolaus Copernicus Astronomical Center of Polish Academy of Sciences to hold Open Day

2019-09-19

On Sunday, September 22, 2019, an Open Day will be held in Warsaw at the Nicolaus Copernicus Astronomical Center (CAMK) of the Polish Academy of Sciences (PAN). The lectures will be accompanied by outdoor events and workshops for children. The lectures will start with a speech by Marek Abramowicz, devoted to the first ever black hole photos. Then Krzysztof Nalewajko will give a lecture entitled «The Spectrum of the Universe» and Michał Bejger will present the astrophysics of gravitational waves. Wojciech Pych will present a lecture entitled «Polish Observatory in Chile». CAMK PAN employees will invite children to search for astronomical knowledge through art games. - We will build lunar craters of salt mass, explore the lunar surface by arranging magnetic puzzles and building the lunar phase clock. If you join us, you will also learn the signs of the zodiac, and also make a plasticine model of the Solar System. For the young researchers, we suggest a trip to the moon, unique astronomical puzzles, riddles and rebuses.

New Wroclaw Philosophy University launched

2019-09-19

The Wrocław Philosophy University is inviting participants to open meetings which will provide philosophical reflection on vital problems originating from the heritage of Western philosophy. Each meeting will consist of a lecture / debate and discussion. Until the end of the year, the Institute of Philosophy of the University of Wrocław, Secondary School No. IX in Wrocław and the Wrocław branch of the Polish Philosophical Society are planning the following topics: October 7 - How is the world without war possible ?; November 4 - Is the idea of the university still valid ?; December 2 - Are animals slaves of man? To participants who will be present at least at 6 of 9 planned meetings, the organizers will offer certificates confirming their participation in the project. All meetings will take place in the assembly hall of the Secondary School No. IX.

University of Silesia summarizes the project „Jupyter @ edu”

2019-09-19

The University of Silesia is inviting participants to a conference summarizing the project „Jupyter @ edu - infrastructure for cloud-based system education: a scalable implementation of the Jupyter notebook system for scientific research”. Jupyter Notebook is an online interactive computing environment for creating documents containing text and programming language code. This system can be used in both research and education. The conference «Notebook Jupyter in education and research» will be held on September 23 at the Silesian Intercollegiate Center for Education and Interdisciplinary Research in Chorzów. The project «Jupyter @ edu was implemented as part of the Erasmus + Strategic Partnerships program by a consortium of the University of Silesia, the German University of Augsburg, the Portuguese Universidade Portucalense Infante Dhenrique-Cooperativa De Ensino Superior Crl in Porto and the Cypriot European University Cyprus in Nicosia.

University of Lodz to celebrate 25th anniversary of the Faculty of Management

2019-09-20

On Tuesday, September 24, 2019, the Faculty of Management at the University of Lodz (UŁ) will celebrate its 25th anniversary. The ceremonial meeting of the Faculty Council will be combined with naming the auditorium A3 after Prof. Zofia Mikołajczyk, who co-founded the Polish school of management sciences. Professor Zofia Mikołajczyk was head of the Department of Organization and Management for many years, and then she ran Department of Management at the University of Lodz, member of the Committee of Organization and Management Sciences of the Polish Academy of Sciences, she was a co-founder of the Polish schools of management sciences, an outstanding expert in the field of management methods and techniques as well as change management. The highlight of the jubilee will be the gala combined with the solemn meeting of the Faculty Council. Currently, the Faculty includes nine departments and it educates nearly four thousand students in eighteen fields of study. For 12 years it has had the scientific category A. The Faculty of Management is also one of the faculties most often chosen by candidates for studies at the University of Lodz.

Industrial Technology Forum in the Science and Technology Park of the University of Zielona Góra

2019-09-20

Science and Technology Park of the University of Zielona Góra, Western Chamber of Commerce and Industry, Nestle and Kostrzyńsko-Słubicka Special Economic Zone are inviting companies to participate in the second Lubuskie Forum of Industrial Technologies. During the Forum, on October 29 and 30 at the Science and Technology Park in Nowy Kisielin, representatives of participating companies will try to answer how to reduce production costs, what investments will help generate greater profit, where to raise funds for the development of the compa-

ny, how to increase efficiency and work safety of employees, how to increase their competitiveness in the market and what benefits will bring investment in new technologies. The forum is addressed to both managers and technical employees. Participation in the event was announced by representatives of the following companies: KUKA, Siemens, Schunk, MPLAB, Oberon 3D, Kyocera, 3M, Mercury Tools, DMG MORI and TTPSC.

University of Lodz announces the finalists of the Competition for the Professor Kotarbiński

2019-09-23

The University of Lodz announced a final list of books under the Competition for the Award of First Rector Prof. Tadeusz Kotarbiński of the University of Lodz for an outstanding scientific works in the field of humanities. The first prize amounts to PLN 50,000. The list of the fifth competition includes: «Herbert. Biography And Anxiety. Biography II Mr. Cogito « by Andrzej Franaszek,» Kol isze - the voice of women in Yiddish poetry (from the sixteenth century to 1939)» by Joanna Lisek, «City in Action. Warsaw Housing Cooperative - a common good in the modern era» by Magdalena Matysek-Imielińska, «Constructing social representation of borrowings until the end of the 18th century» by Zuzanna Zbóg and Piotr Zbróg, and «Cruel self-immolation theater. Suicide protests on fire and their echoes in contemporary culture» by Grzegorz Ziółkowski. The winner of the competition will be announced on November 24, 2019 during a gala ceremony that will take place in Łódź.

InnoSHARE UNiversity to take place in Warsaw

2019-09-23

On October 10, 2019, the Copernicus Science Center (Copernicus Science Center) will host innoSHARE UNiversity participants. It is an international event organized for innovators, enterprising scientists, PhD students and students, deep tech startups, employees of research and development companies, investors and representatives of innovation ecosystems from various parts of the world. The event will be attended by 450 participants, and the discussions will be led by over 40 speakers from Poland and abroad, who will present following topics: universities of the future, new fuels and energy, drones, city of the future, new food, healthcare, biotechnology, chemistry and new materials, photonics and Human Tech. One of the special guests will be Arno Meerman - co-founder and General Director of the global University Industry Innovation Network (www.uin.org), who will tell guests about the universities of the future and cooperation between science and business.

Polish Sociological Congress in Wroclaw to talk about the most important social problems

2019-09-23

Over a thousand scientists from Poland and abroad, including the presidents of global sociological societies Prof. Sari Hanafi from ISA, Prof. Marta Soler Gallart from ESA, Prof. Christine Williams from ASA and sociologists from the Czech Republic, Slovakia and Ukraine, participated in the 17th National Sociological Congress in Wroclaw. At twelve symposia in more than 90 thematic groups, sociologists discussed the most important contemporary social problems and the role of sociology and sociologists here and now. The research community notes that many burning social issues like the negative consequences of migration processes, climate disaster, social injustice are not resolved, and political mechanisms are blocking rather than supporting the processes of dealing with problems. This pro-

notes a sense of helplessness and irrational reactions observable at the individual and collective level. More: <https://uni.wroc.pl/xvii-ogolnopol-ski-zjazd-socjologiczny-za-nami-z-zobacz-fotorelacje/>

Scientist of the University of Life Sciences in Poznań becomes the president of the Polish Entomological Society

2019-09-23

Dr Eng. Paweł Sienkiewicz from the Department of Entomology and Environmental Protection of the University of Life Sciences in Poznań was elected the president of the Polish Entomological Society. The choice was made during the 51st Congress of the Society in Urszulin, in the Poleski National Park. The Society's board also includes scientists from other centers: Dr Tomasz Pyrcz from the Jagiellonian University (vice president), Dr Rafał Ruta from the University of Wrocław (Treasurer), Dr Dawid Marczak from the Kampinos National Park for the new three-year term. Dr Miłosz A. Mazur from the University of Opole, Dr Agnieszka Soszyńska-Maj from the University of Lodz, Dr hab. Katarzyna Golan from the University of Life Sciences in Lublin and Dr Karol Szawaryn from the Museum and Institute of Zoology of the Polish Academy of Sciences in Warsaw became members of the Board.

Warsaw University of Technology to hold the Little Man Science Festival

2019-09-24

Over 30 attractions are included in the program of this year's Little Man Science Festival, which will take place on September 29, 2019 at the facilities of the Warsaw University of Technology (PW). Festival events will take place in four locations: at the Faculty of Physics, Faculty of Mathematics and Information Sciences, at the Faculty of Power and Aeronautical Engineering and at the campus near the Faculty of Physics. Little Man Science Festival is an ideal opportunity to awaken the scientific passions of children and youth. Prepared attractions will ex-

plain the problems and phenomena of the world around in an accessible way, they will arouse curiosity and show the practical dimension of science. The festival is organized by the Faculty of Physics at the Warsaw University of Technology and co-organized by the Faculty of Mathematics and Information Sciences of the Warsaw University of Technology.

Second Polish-British Science Forum takes place in London

2019-09-24

The Second Polish-British Science Forum took place at the Polish Embassy in London. It was a meeting of Polish and British agencies operating in the field of research, innovation, science and mobility. The meeting was also attended by representatives of the National Science Center, the National Agency for Academic Exchange, the National Center for Research and Development, the National Contact Point for European Union Research Programs, the Foundation for Polish Science and representatives of the British agencies: British Council, Medical Research Council, Innovate UK, UK Research and Innovation, Universities UK International, British Academy, Royal Society. The meeting was moderated by Dr Aleksander Dańda - director of the Department of Science at the Ministry of Science and Higher Education. The meeting participants discussed how the United Kingdom and Poland support the development of national research, innovation and academic mobility, as well as the possibilities of cooperation between Polish and British scientists and higher education institutions.

Maria Curie Skłodowska University to hold Congress of Eastern Europe Initiatives in Lublin

2019-09-24

In Lublin, until September 24, 2019, the Congress of Eastern European Initiatives will be held by the Center for Eastern Europe and the Faculty of Political Sciences at the Maria Curie Skłodowska University (UMCS), the Institute of Central Europe and the Institute of Political Sciences and International Affairs of the Catholic University of Lublin (KUL). This year's VIII Congress is dedicated to unique events and their role in our modern reality. The events include the 450th anniversary of the conclusion of the Polish-Lithuanian Union, known as the Lublin Union, the 15th anniversary of Poland's accession to the European Union, the 20th anniversary of NATO membership and the 30th anniversary of democratic changes in the region of Central Europe. This is an excellent starting point for discussions about the future of modern Europe, its identity, challenges to be faced and the need for deeper integration and cooperation. Panels devoted to economic relations, regional partnerships, transnational and regional cooperation are also an important element of the Congress.

GameIT: Summer School to be held at the Philological School in Wrocław

2019-09-24

The GameIT: Gamestorming for Innovative Teaching project, which is a part of the Planet Hexagon board game and RPG game has been implemented at the University of Philology in Wrocław. A Summer School will be held in Wrocław until September with 27 with students and academic teachers from partner universities involved in the project - University of Ljubljana (Slovenia), «Vasile Alecsandri» University of Bacău (Romania) and Western Norway University of Applied Sciences (Norway). During the meeting, Wrocław students and foreign colleagues will have the opportunity to test the latest version of the board game and for the first time and they can

take part in tests of four RPG games prepared by each partner university and promoting the culture of their countries. The GameIT: Gamestorming for Innovative Teaching project is funded by the Erasmus + Strategic Partnerships program.

Call for applications in the Fulbright Specialist Program

2019-09-25

On October 1, 2019, the Polish-American Fulbright Commission will start the call for proposals under the Fulbright Specialist Program for hosting American specialists. Specialists should represent such scientific fields as: Americanism, anthropology, archeology, public administration, library science, journalism and social communication, education, economics, physics, computer science, engineering training, biological science, chemical sciences, political sciences, mathematics, environmental protection, peace and conflict resolution, social assistance, law, agriculture, sociology, urban planning, management, public / global health. The Fulbright Specialist Program is addressed to institutions that develop a project based on the most important areas for their growth and development, and the goal of the project with the participation of an American Specialist is based on the needs of the host institution. Universities, research institutes, scientific units of the Polish Academy of Sciences, international scientific institutes and other scientific units, educational institutions, governmental, cultural and medical institutions as well as governmental and non-governmental research organizations in Poland may apply for a Fulbright specialist's visit. More: <https://fulbright.edu.pl/specialist/>

University of Wrocław Arboretum awarded for creating the Polish Millennium Garden

2019-09-25

The Botanical Garden of the University of Wrocław, Arboretum in Wojsławice received the Honorary Green Laurel awarded for the creation of the Polish Millennium Garden. The award was presented

in Warsaw during the 27th International Exhibition „Green is Life”. The Polish Millennium Garden is an unusual and the richest collection of cultivars - cultivated varieties of ornamental and fruit plants, grown by man and not found in the wild, obtained by Polish gardeners. - Many Polish varieties have been successful internationally, praising our country in the farthest corners of the world. Others, once very popular, have been forgotten due to historical turbulence. The Polish Millennium Garden restores many of them. It presents the achievements of Polish gardening, popularizes Polish varieties for hundreds of thousands of guests visiting the Arboretum every year.

Researcher of the Silesian University of Technology joins the board of the Academy of Young Scholars of the Polish Academy of Sciences

2019-09-25

Dr Monika Kwoka, deputy dean for science and international cooperation, faculty of automation, electronics and computer science, assistant professor of the Institute of Electronics was elected deputy chairman of the Academy of Young Scholars of the Polish Academy of Sciences for the 2019-2021 term. Professor Kwoka in the previous term also served as deputy chairman of the Academy. Areas of her scientific interest are nanotechnology of electronic materials and surface research methods in semiconductor nanotechnology. The Academy of Young Scholars was established in 2010 at the Polish Academy of Sciences to promote scientific research and development work carried out by outstanding young representatives of Polish science. The tasks set for the Academy of Young Scholars include activating the environment of young scientists and disseminating ethics standards among young scientists.

8th European Mammalogical Congress to be held in Warsaw

2019-09-26

The 8th European Mammalogical Congress will last in Warsaw until September 27, 2019. The event began on September 23 and is devoted to the ecology and protection of mammals in a changing world. The congress is organized by the Mammal Biology Institute of the Polish Academy of Sciences (PAN) and the Committee on Environmental and Evolutionary Biology of the Polish Academy of Sciences. Invited plenary lecturers of the Congress include: Dr. Francesca Cagnacci from Italy, dealing with the migration of mammals on a large spatial scale, Nils Chr. Stenseth from Norway, investigating the role of wild mammals in the spread of pathogens dangerous for humans, Heikki Henttonen from Finland, conducting works in ecology and parasitology, Dr Matthew Kauffman from the United States, who is looking for causes and patterns of migration of ungulate mammals, and Marek Konarzewski from Poland, specializing in research on ecophysiology and evolutionary ecology. The European Mammalogical Congress is held every four years. It involves scientists studying various aspects of mammalian biology, including in the field of evolutionary biology, ecology, behavioral biology and genetics.

Researcher of the Nicolaus Copernicus University in Toruń receives a prestigious award

2019-09-26

Dr Violetta Wróblewska, Prof. of the Nicolaus Copernicus University in Toruń from the Faculty of Philology of the university is a winner of the „Literature in the World” Award - one of the most important Polish literary awards. A researcher from the Department of Cultural Studies received the award for the scientific edition of the «Polish People's Fairy Tale Dictionary», published by the Nicolaus Copernicus University in Toruń. Dr Violetta Wróblewska is the head of the Department of Cultural Studies and the Department of Folklore and Popular Literature at the philological department of the University of Toruń. Her scientific interests include traditional and contemporary folklore, children's and popular liter-

ature and culture. She loves folk and literary fairy tales and detective stories. She has over 100 own publications. She participates as an expert in many national and international scientific conferences.

Scientist of the University of Gdańsk is a finalist in the Polityka Science Awards

2019-09-26

Dr Agnieszka Gajewicz-Skrętna from the Faculty of Chemistry of the University of Gdańsk became a finalist of the nineteenth Polityka journal Science Awards. She is nominated in the field of exact sciences in chemistry. The Scientific Awards of the weekly Polityka are awarded to exceptional scientists who conduct interesting, non-standard research and have impressive scientific achievements. The main goal of the program is to identify the most talented scholars. The organizers of the competition emphasize promoting a valuable career model in spite of pop-culture trends, emphasizing intellect and diligence, which imperceptibly became secondary values. Dr Gajewicz-Skrętna's focuses on the development and application of machine learning methods, statistical and chemometric methods supporting the process of computer chemical safety assessment. More: https://ug.edu.pl/media/aktualnosci/90613/dr_agnieszka_gajewicz-skretna_ws-rod_finalistow_nrody_naukowej_polityki

Extension of the deadline for submission of the applications for the Off Science Garage Inventions Review

2019-09-26

Until October 30, participants can apply for the „Off Science” Garage Inventions Review as part of the 4th Silesian Science Festival Katowice. The decision to extend the application process is a result of numerous requests from people interested in the competition - informs the University of Silesia. Review of Garage inventions „Off Science” is an initiative presenting the achievements of people who are involved in science non- professionally. Amateur inventors and designers creating devices and inter-

ested in technical solutions will be able to present their projects during the 4th Silesian Science Festival Katowice - January 26, 2020 at the International Congress Center. The organizers are planning the festival to become once again an opportunity to show the effects of hard work, which usually do not go beyond private workshops, garages, attics and basements. To submit a project, please complete the registration form available on www.slaskifestiwal-nauki.pl in the 'OFF Science' tab.

Meeting of Polish and Chinese scientists in Warsaw

2019-09-27

Vice President of the Polish Academy of Sciences (PAN) Prof. Paweł Rowiński hosted a delegation from the Chinese Academy of Sciences. During the meeting in Warsaw, both institutions discussed ongoing projects carried out jointly by researchers from both countries. The Chinese delegation included vice president of the Chinese Academy of Sciences Prof. Zhang Yaping, representatives of the Chinese Academy of Sciences, scientists from the institutes of the Chinese Academy of Sciences and Guo Dongbo and Zhang Lin from the Chinese embassy in Warsaw. During the meeting, both institutions presented the scope of their scientific activities. They also discussed current projects carried out jointly by Polish and Chinese researchers and the topics of further cooperation in the form of exchange programs, grants, projects and scholarships. Participants also discussed the possibility of organizing joint workshops and conferences on climate change, hydrology and sustainable development.

Łódź University to hold a scientific conference Young Scientists Research

2019-09-30

The 2nd Interdisciplinary Scientific Conference „Knowledge - Inspiration - Passion” under the program Research of Young Scientists will be held in Łódź on October 4-5, 2019. The conference is mainly addressed to students and PhD students from Poland and abroad, and its main goal is to exchange views, share knowledge and experience in the field of own scientific research. The organizers want to create an opportunity for young scientists to present their research in three fields: humanities, social sciences, exact sciences and natural sciences. The event is a summary of the 2nd Student Research Grants - an innovative project of the University of Lodz, which aims to finance research conducted by young scientists.

University of Gdańsk researcher awarded during EUROBIOTECH in Krakow

2019-10-01

Karolina Pierzynowska from the University of Gdańsk won the „Best Poster Award” competition during the 7th Central European Congress of Life Sciences EUROBIOTECH in Krakow. Congress's scientific program focused on two areas of biotechnology - 'Red Biotechnology' and 'Green Biotechnology', i.e. personalized medicine and agrobiotechnology. The subject of the young researcher's work concerned personalized medicine and was associated with patent applications «Medical use of 5,7-dihydroxy-3-(4-hydroxyphenyl)-4H-1-benzopyran-4-one in the treatment of Huntington's disease and a pharmaceutically acceptable form of the drug». The prize was awarded by Katarzyna Pierzynowska for the innovation of the presented research results and its potential for a broad impact on society, as research conducted by the UG scientific team may revolutionize the treatment of Huntington's disease, which belongs to genetic neurodegenerative diseases for which no effective medicine has yet been invented.

10th Night of the Institute of Aviation in Warsaw

2019-10-02

The Institute of Aviation, which belongs to the Łukasiewicz Research Network is inviting participants to an educational night event - 10th Night of the Institute of Aviation. The leitmotif of this year's event will be the secrets of space. The event will take place on October 11, 2019 at the Institute of Aviation in Warsaw. The special guest of the event will be Artur Chmielewski, Polish engineer, space mission manager, working at the California Jet Propulsion Laboratory - NASA. He will share the details of his work as part of the famous Rosetta project and the Galileo, Ulysses and Cassini-Huygens missions, as well as current missions organized by the American Space Agency. The event will provide enthusiasts from student scientific clubs, technical universities and many institutions, such as the Polish Space Agency, the Space Research Center of the Polish Academy of Sciences and the Copernicus Science Center with possibility to show the Polish contribution to space exploration and the successes of Polish engineers, including in the design of rockets, Mars rovers or space probes. Seminar „Seniors and the Silver Economy - opportunities, challenges, perspectives”

2019-10-02

The Observatory of Urban and Metropolitan Processes is inviting participants to the seminar „Seniors and the Silver Economy - opportunities, challenges, prospects”, which will take place on October 21 at the Faculty of Natural Sciences of the University of Silesia in Sosnowiec. The subject of the seminar focuses on the diagnosis of the elderly population in the Silesian Voivodeship and issues of senior policy, which due to current demographic trends is one of the key public policies in Poland and Europe. The event is part of the project called the Local Government Academy, which aims to promote professional knowledge and build lasting cooperation of local

government representatives with the world of science. The observatory is a facility established by the University of Silesia. One of its main tasks is to gather information and expand knowledge in the field of social, cultural, political and economic processes taking place in the Silesian conurbation.

Scientist of the University of Silesia becomes the chairman of the scientific council of the Polish Academy of Sciences station in Paris

2019-10-02

Professor Wiesław Banyś from the philological department of the University of Silesia will act as the chairman of the scientific council of the Paris station of the Polish Academy of Sciences (PAN). At the same time he was elected a delegate to the council of all scientific stations of the Polish Academy of Sciences in the world. The PAN Scientific Station in Paris is a scientific unit with over a hundred years of tradition. The beginnings of its activity date back to 1893. It cooperates with such centers as the French Academy of Sciences (Académie des Sciences de l'Institut de France), Center National de la Recherche Scientifique and UNESCO. The most important tasks of the station are the promotion of Polish science, organization of conferences, symposia, seminars, lectures, meetings, exhibitions and other scientific events, development of cooperation and scientific and cultural contacts between Poland and France and Francophone countries, assistance to scientists and trainees, scholarship holders, students coming to France for research or educational purposes.

Polish Academy of Sciences to hold „Climate change in Poland” conference

2019-10-02

The Polish Academy of Sciences (PAN) and the United Nations Information Center (UN) in Warsaw are inviting participants to the conference „Climate change in Poland”, which will take place on October 23, 2019 at the University of Warsaw Library. The participants will try to answer the questions: What threat is the global warming? How does it affect our health? How will it translate into migration? Will rivers dry in 30 years? Will we have something to drink? How will nature change? What do politicians and business say about it? Introduction to the conference will be made by prof. Szymon Malinowski from the Faculty of Physics of the University of Warsaw, who will present the issues of global warming. Panel discussions will include: Henryk Kowalczyk, Minister of the Environment, Jadwiga Emilewicz, Minister of Entrepreneurship and Technology, Dr Michał Kurtyka, Deputy Minister of the Environment, Rafał Trzaskowski, President of Warsaw, Dr Paloma Cuchi, Director of the Office of the World Health Organization (WHO) in Poland.

Researcher from the Warsaw University of Life Sciences receives Award for the best popular science book

2019-10-02

The Golden Rose 2019 Award for the best popular science book written in Polish was received by Dr Urszula Zajączkowska from the Warsaw University of Life Sciences (SGGW) in Warsaw for the book „Patyki, Badyle”, which was published by Marginesy Publishing House. Scientific interests of Dr Urszula Zajączkowska from the Department of Forest Botany SGGW focus on the analysis of plant growth and movement using time-lapse photography, plant biomechanics, plant geometry and shapes, and plant regeneration after injury. The Golden Rose Award, established by the editors of the New Books monthly, the Book Institute and the Science Festival in Warsaw is awarded to the best popular science

book written in Polish, which serves the purpose of reliable dissemination of scientific knowledge and is distinguished by an outstanding literary form.

Wrocław Technology Park to launch the Night of Laboratories

2019-10-03

The Wrocław Technology Park together with the Pro Mathematica foundation are inviting participants to workshops during the Night of Laboratories on October 19. Young explorers will learn the basics of robot programming and find out what substances provide the jelly with the right consistency. The organizers are providing the mechanical laboratory, where enthusiasts of mechanics and technology will have the opportunity to see water jet cutting equipment and a four-roller hydraulic sheet rolling machine. This year the participants will have the opportunity to visit the Experimental Plant - a technologically advanced production installation that is unique in the country. It enables providing tests, up-scaling and optimization related to the life science industry. The participants will also be able to run a rally simulator on motion platforms equipped with VR glasses and visit the Amplicon biotechnology laboratory.

Dr Piotr Mysiak becomes a member of the Assembly of the Mission Commission for Adaptation to climate change

2019-10-03

Dr Piotr Mysiak, Vice Dean the quality of science and quality of education at the Faculty of Law and Administration of the University of Zielona Góra became a member of the Assembly of the Mission Committee of Adaptation to climate change. The assembly is an auxiliary body of one of the five main European research and innovation missions that are part of the Horizon Europe program. This is the result of the works of the EU Commissioner for Research, Science and Innovation, Carlos Moedas, who during the informal Council of Ministers for Research announced which mission boards will be created. In

the perspective of the Horizon Europa program, mission boards are to look for and develop solutions to problems in the expert field - global challenges such as cancer, climate change, healthy oceans, climate neutral cities and healthy soil and food.

Warsaw University of Technology to organize the International Students Talent Show

2019-10-04

Warsaw University of Technology is organizing a competition for foreign students of Warsaw universities to present unique ideas, original performances and funny ideas. The first International Students Talent Show is organized under the auspices of the International Festival of Warsaw. The purpose of the event is to promote a variety of cultures and to encourage foreign students to undertake non-scientific activities. People who can boast of extraordinary skills can submit their applications by October 18, 2019. The finalists will be selected by October 23, while the qualifying rounds will be held on November 16. A special prize for the winner is a stay in a luxury hotel in the mountains or at the Polish seaside. More: <https://www.facebook.com/events/528903644542672/>

Scientist of the Wrocław Medical University becomes the finalist of the Polityka Science Awards

2019-10-04

Dr Piotr Donizy, a scientist of the Department of Pathomorphology and Oncological Cytology of the Medical University of Wrocław became one of the finalists of the 19th Scientific Awards of the weekly journal Polityka. The Awards are given to „the most talented specialists” in individual fields of science. Dr Piotr Donizy conducts research on the mechanisms of progression of a rare malignant Merkel's cancer and an extremely rare variety of mucosal melanoma. He is also a member of an international team of doctors, including from Japan, Spain, Taiwan and the USA, whose project concerns new prognostic markers and molecular disorders responsible for the development of mucosal melanoma. Research of the Wrocław scientist will help learn new mechanisms of the formation of extremely rare malignant tumors and may result in the discovery of new gripping points for molecularly targeted therapies, which in the future could significantly improve the results of treatment. More: <https://www.umed.wroc.pl/content/dr-hab-piotr-donizy-w-finale-nagr%C3%B3d-naukowych-polityki>

University of Silesia to launch the Education Congress Katowice 2019

2019-10-04

The Open University of the University of Silesia and the city of Katowice are inviting participants on 26 October to the Silesian Museum in Katowice for the fifth Congress of Education Katowice. The slogan of the jubilee edition of the event is „School - a learning community”. Congress participants, thanks to the Bullerbyn Foundation and the Element Publishing House - the organizers of the Creative Education Conference in Warsaw, will have the opportunity to listen to a lecture by Sir Ken Robinson, who will take part in the symposium organized in Poland for the first time and will talk about the revolution in education through live streaming. The second part of

the meeting will be held in the Open Space Technology way. Some of the topics will be proposed by the organizers, but the majority will be decided by the event participants. It will be an opportunity for free exchange of reflections, ideas, knowledge, experiences and specific plans. After the congress, participants will receive reports summarizing their work in each discussion and seminar group. More: <http://kongresoswiaty.us.edu.pl/>

Festival of Catholic Social Science in Warsaw

2019-10-07

The third Catholic Social Science Festival will be held on October 18 and 19, 2019 at the Primate's Palace in Warsaw. The purpose of the event is to promote the social teaching of the Church to the people actively participating in local and economic life, and in the areas of social economy and education. The program of the Catholic Social Science Festival will include expert debates and thematic workshops. The first of the debates, entitled «Torch or muzzle of education?», will take place on Friday, October 18. The participants will be Fr. Prof. Piotr Mazurkiewicz from the University of Cardinal Stefan Wyszyński (UKSW) in Warsaw, Jan Wróbel (Radio TOK FM), Małopolskie Region's education superintendent Barbara Nowak and discussion moderator - Jan Pospieszalski. On Saturday, October 19 in the second debate entitled «Made in Poland. Label or stigma?» will be attended by: Fr. Prof. Krzysztof Kietliński (UKSW), president of the Polish Economic Society Tomasz Janik, president of the Republican Foundation Marek Wróbel and vice president of the board of INCO S.A. Dr Andrzej Pawlak. The discussion will be moderated by Michał Szuldrzyński from the Rzeczpospolita paper.

Warsaw, Płock and Olsztyn hold scientific conference „Man, spirituality, education”

2019-10-08

„Man, spirituality, education” was the subject of a three-day international scientific conference that took place at the Cardinal Stefan Wyszyński University in Warsaw, the Mazovian Public University in Płock and the University of Warmia and Mazury in

Olsztyn. The aim of the series of lectures on the essence of Christian education was to determine what serves deep human development. The guest of all meetings was the well-known German Benedictine and theologian, Father Anselm Grün, who pointed that the values were an authentic and reliable source of communication in the work of a teacher and educator. - We don't have to copy others, but look for sources, inspirations and images as well as moral experiences in ourselves. Values give strength and heal, so let's ask what place in our message bring: justice, courage, moderation and wisdom - said Father Grün.

Success of scientists from the Faculty of Earth Sciences of the University of Silesia in the „Geology 2019“ competition

2019-10-08

Scientists from the Faculty of Earth Sciences of the University of Silesia became winners of the „Geology 2019“ competition organized by the Ministry of the Environment. In the achievements category and fundamental discovery, the award for achievements was received by Dr Michał Zatoń from the University of Silesia, and for a fundamental discovery - Dr Mariusz A. Salamon, also from the University of Silesia for the collective work «Documenting the oldest terrestrial plants». In the category of popularization of geology and geoenvironment, the Polish Society of Friends of Earth Sciences - the Upper Silesian Branch was awarded for the project entitled «Popularization of geology and geoenvironment by the Museum of the Faculty of Earth Sciences of the University of Silesia». «Geology 2019» is a competition aimed at promoting innovative services and solutions, sustainable management of environmental resources, supporting scientific development and popularizing knowledge about geology.

Warsaw students to hold Scientific conference ‚Different faces of spatial management 2019‘

2019-10-09

The Students' Scientific Association of Spatial Management at the Warsaw University of Life Sciences (SGGW) in Warsaw is inviting participants to a conference on interdisciplinarity of spatial management. The main goal of the conference is to present the achievements of 200 years of spatial management at the Warsaw University of Life Sciences - SGGW and 15 years of activity of the Student Scientific Association of Spatial Management. Plenary sessions will consist of speeches of experts, graduates of the spatial economy and students from spatial management scientific clubs. The event will support the exchange of valuable experience between representatives of universities and industry. The program also includes workshops in small groups and competitions with prizes. The conference will take place on October 25, 2019 in the building of the Faculty of Forestry of Warsaw University of Life Sciences - SGGW.

Interactive exhibition Exploratory of the University of Rzeszów

2019-10-09

The University of Rzeszów (URz) is inviting students, teachers and parents to the ceremonial start of the interactive exhibition, which will take place on Saturday, October 12, 2019. The opening ceremony of the interactive exhibition will take place at 8:45 in the A0 building at ul. Professor Stanisława Pigonia 1. This event will be preceded by the inauguration of the academic year for students of the Little University of Rzeszów. At the exhibition viewers will be able to see how new exhibits bring closer knowledge of nature (the mysterious life of mammals and birds) and ecological methods of waste management. They will also be able to perform experiments using augmented reality technology.

Scientist from the University of Lower Silesia in Wrocław published in the American Educational Research Journal

2019-10-09

Dr Sławomir Krzychała, Prof. of the University of Lower Silesia in Wrocław published an article in one of the most prestigious educational magazines in the world - American Educational Research Journal. His article analyzes the development of the school in the context of teachers' involvement in new educational practices. It presents the author's theoretical model in which changes at school can be interpreted as a process of creating and transforming pedagogical knowledge (orientation model). The American Educational Research Journal publishes articles that develop an empirical, theoretical and methodological understanding of education and learning. There are analyzes covering the area of educational research in all sub-areas and disciplines. The works reflect the highest quality in a wide range of perspectives, topics, contexts and methods. More: <http://www.dsw.edu.pl/aktualnosci/aktualnosc/news/kolejne-sukcesy-naszyc-wykladowcow-prestizowanipublikacja-prof-dsw-slawomira-krzychala/>

Jewelry of a design student from Koszalin University of Technology to be presented in Milan

2019-10-09

Hanna Kowalska's jewelry will be presented for the second time at the exhibition in Milan. This student of the second year of studies in design will show in Italy two brooches made of textiles and silver. Kowalska went to Finland in 2016, where she was fascinated by Scandinavian culture and goldsmith's art. Since then, she has been experimenting using various materials in her work: sand, resin, amber, glass and even moss. In February, as the only person from Poland, she presented her work at the world jewelry exhibition Artistar Jewels 2019 in Milan. The event was a part of the famous Fashion Week. There, she presented two brooches, which she prepared as part of a bachelor's program at the Koszalin University of

Technology. Photos and description of Hanna Kowalska's jewelry were included in a special album, which was available in bookstores, galleries and branded boutiques.

Krakow Institute of Landscape Architecture to hold a scientific conference on conservation and ecological aspects in landscape protection

2019-10-10

The Institute of Landscape Architecture of the Faculty of Architecture of the Cracow University of Technology (PK), the Association of Monument Conservators and the Polish Academy of Sciences Krakow Branch are organizing the XXVI National Scientific Conference in the field of garden art and historical dendrology. The theme of the event, which will take place on October 24-25 is „conservation and ecological aspects in landscape protection”. The main purpose of the conference is to popularize knowledge in the field of landscape protection, as well as to raise awareness and shape ecological attitudes. The conference will be divided into thematic blocks dedicated to: landscape ecology in the light of architectural and landscape regionalism, ecological aspects in shaping contemporary green areas, ecological aspects related to garden art, landscape protection in the light of ecological values of the natural environment, protection of cultural landscape and its aesthetic values as heritage national and environmental assessment subject.

University of Gdańsk to hold „Memorials-history-tourism” conference

2019-10-10

The Laboratory of Touring and Historical Tourism of the Institute of History of the University of Gdańsk and the Historiographic Society are inviting participants on 17 and 18 October to the international tourist and sightseeing and historiographic scientific conference „Memorials - history-tourism”. 29 representatives of various scientific disciplines will participate in the conference, including history, art history, literary studies, archeology issues. Guests will represent the most important scientific Polish and abroad centers from Poznań, Lublin, Warsaw, Toruń, Vilnius, Lviv, Kiev and Kharkiv. The leading theme of the meeting is to make issues related to memorial sites, their history and their impact on tourism. The organizers emphasized that basing on the achievements of science and appreciating the contribution of many scientists, they want to expand the research area, link research from various disciplines and areas and give them a more complementary dimension.

Czech scientist becomes the winner of the regional stage of Falling Labs in Wrocław

2019-10-10

Daniel Kopkane from the Czech Republic won the regional stage of the international Falling Walls Lab competition organized by the University of Wrocław. The winner will perform on November 8 during the final conference in Berlin. Competition participants, young scientists and entrepreneurs, talked about their ideas regarding climate change, obtaining renewable energy and creating modern tools for scientists, businessmen as well as teachers and children. The idea of Falling Walls Lab is to disseminate information on current research, establish scientific and business cooperation, and expand research horizons. The winners of the regional editions go to the final conference in Berlin, organized under the slogan «Great minds, 3 minutes, 1 day», where they explain in simple and concise words what about are

their projects and what benefits they can bring to the modern world. More: <https://uni.wroc.pl/daniel-kopkane-pojedzie-do-berlina/>

Scientist receive awards of the National Science Center

2019-10-11

Dr Dawid Pinkowicz, Dr Roman Szczęsny and Dr Michał Wierchoń received the prestigious awards of the National Science Center (NCN) for special scientific achievements in the field of basic research. The winners received cash prizes in the amount of 50 thousand PLN. The aim of the NCN Award is to support the most outstanding scientists conducting research in the field of basic research in Polish scientific units. Established in 2013, the prize is awarded to researchers under the age of 40 and is awarded in three research areas: humanities, social and art sciences, life sciences and exact and technical sciences. - I am pleased that the extremely prestigious award of the National Science Center, has been presented today for the seventh time. I congratulate the young scientists here for their outstanding scientific achievements. - said Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education at the National Science Center Awards Gala.

Rector's lecture of Professor Oded Galor at the Nicolaus Copernicus University in Toruń

2019-10-11

The Nicolaus Copernicus University in Toruń is inviting on October 17 to a lecture by an outstanding economist - Professor Oded Galor from the University of Brown, the seventh oldest university in the US. The lecture will be held in the historic building of the Artus Court, in the heart of the old city. The subject of the lecture given in English will be the biogeographic roots of the wealth of nations. The accompanying event will be a piano concert performed by Prof. Tadeusz Trzaskalik from the University of Economics in Katowice. Scientific interests of Prof. Galora focuses on the topics of economic growth and development, relationships of economics with population development, demography, evolutionary economics and socio-economic geography. He

is the author of the «Uniform Theory of Economic Growth» and the editor-in-chief of «Journal of Economic Growth», a journal included in the TOP10 best economic magazines in the world.

Lublin universities to hold Polish National Interdisciplinary Scientific Conference NeuroAkademia

2019-10-14

On November 28, 2019, the Lublin University of Technology, the Maria Curie-Skłodowska University in Lublin and the Medical University in Lublin are organizing the 1st National Interdisciplinary Scientific Conference „NeuroAkademia - a platform for the exchange of knowledge between young neuroscientists”. The event is addressed to students and PhD students conducting research in the field of broadly understood neuroscience – to both active and passive participants. The organizers hope that the exchange of information from various fields of knowledge will enable conference participants to find inspiration and make contacts that will result in new research projects as well as creating new interdisciplinary research teams. The organizers are providing two prizes for two best participants.

Over 300 scientists participate in the 2nd Scientific Conference of Polish Sea Researchers in Gdańsk

2019-10-14

Over 300 sea researchers from all over Poland participated in the 2nd Scientific Conference of Polish Sea Researchers organized by the faculty of oceanography and geography of the University of Gdańsk together with the Sea Research Committee of the Polish Academy of Sciences. The main goal of the conference was the integration of the environment of Polish sea and ocean researchers representing all aspects of oceanographic research (biology, chemistry, marine physics and geology, issues of marine hydrotechnics, protection of the marine environment and socio-legal aspects. The conference was also dedicated to representatives of administrations at all levels managing the sustainable development of the marine environment. The participants presented 93 papers and 112 poster presentations. As part of the event, Young Sea Researchers had panel session, where they fought for the prize of the Chairman of the Sea Research Committee of the Polish Academy of Sciences.

Marek Górlikowski receives the Jan Jędrzejewicz's Award for the best Polish book on the history of science and technology

2019-10-16

Marek Górlikowski received the Jan Jędrzejewicz's Award for the book „Nobel Prize holder from Nowolipki. Józef Rotblat's war for peace” in the competition for the best Polish book on the history of science and technology. The competition is organized jointly by the Committee on the History of Science and Technology of the Polish Academy of Sciences (PAN), Józef Mianowski's Science Support Foundation and Płońsk self-government. The awarded book is an extraordinary story of a forgotten physicist from Warsaw's Muranów. Józef Rotblat was 36 years old when he was working out an atomic bomb

within a secret Manhattan project. He was Polish and refused to accept British citizenship - he was therefore suspected of espionage for the Soviet Union. When he developed the most terrible weapons of mass destruction in the US, his family in occupied Poland fought for survival. Half a century later, the scientist received the Nobel Peace Prize for his activities in favor of atomic disarmament.

Professor Żukowski becomes again the president of the Polish Society of Political Sciences

2019-10-17

The General Congress of the Polish Society of Political Sciences (PTNP) held at the Faculty of Political Sciences and International Studies of the University of Warsaw chose the president and members of the main board. For the second term of 2020-2022, Prof. Arkadiusz Żukowski, director of the Institute of Political Sciences of the University of Warmia and Mazury (UWM) in Olsztyn became the president of PTNP. The Polish Society of Political Sciences was founded in November 1957. It associates approx. 500 members organized in 20 national branches and 12 science sections. It is a member of the Central European, pan-European and world organization of political scientists including Central European Political Science Association, European Confederation of Political Science Associations and International Political Science Association, as well as the European research consortium European Consortium for Political Research.

Scientific conference „Adventures of the mind. (Un)power subjects in STEM education”

2019-10-17

On November 21-22, 2019, the Copernicus Science Center in Warsaw will hold the international scientific conference „Adventures of the Mind. (Un)power subjects in STEM education”. The conference will be attended by outstanding scientists and practitioners, whose speeches will initiate a discussion on the

role of material objects in learning. The conference will be opened by: Robert Firmhofer, General Director of the Copernicus Science Center and Dr Margaret Honey, General Director of the New York Hall of Science. The organizers that the conference, «Adventures of the mind» will include not only inspirational lectures and creative discussions, but also great opportunities to make new contacts and get acquainted with innovative educational solutions. The conference program includes lectures of specialists and interactive sessions with their participation, as well as the BADNIGHT event, during which scientists will talk about their biggest research failures. More: <http://www.kopernik.org.pl/en/special-projects/konferencja-przygody-umyslu/>

University of Silesia to hold conference „Design and Fashion Law. Product creation”

2019-10-17

The Center for Design, Fashion and Advertising Law at the University of Silesia in Katowice and the Institute of Intellectual Property Foundation based in Katowice, with the participation of the Law Firm Pawełczyk and the Law Firm Kulikowska and Kulikowski, are organizing the conference „Law of Design and Fashion. Product creation.” The conference will be held on November 22, 2019 at the Faculty of Law and Administration of the Silesian University. The conference issues were divided into two thematic blocks: protection in the field of intellectual property law and valuation of goods and intellectual property rights. The conference is addressed to designers, fashion designers, clothing entrepreneurs, cosmetics industry entrepreneurs, jewelry companies, as well as to attorneys, legal advisors, patent attorneys and judges who are increasingly dealing with design and fashion law.

University of Lodz to grow its own species of orchids

2019-10-18

Heteranthodium universitas-lodziensis is a newly discovered species of orchid, named after the University of Lodz (UŁ). The orchid was discovered by Prof. of UŁ, Dr Marta Kolanowska from the Faculty of Biology and Environmental Protection of the University of Lodz and her colleagues during works carried out in Ecuador in 2018. *Heteranthodium universitas-lodziensis* is an endemic taxa, currently known only from the province of Morona-Santiago, where it grows at an altitude of about 1350 m a.s.l. This Andean orchid produces a very long inflorescence composed of numerous brown-yellow flowers. The name of the new orchid is an expression of recognition for the effort made by the authorities of the University of Lodz for the development of Polish tropical research. The intensification of their scientists' activities in areas characterized by enormous biodiversity is particularly important in the context of the increase of the rate of species extinction and the rapid deforestation observed in the equatorial zone - said Prof. Marta Kolanowska. The article with a description of the new species was published in the journal *Phyton*: <http://www.uni.lodz.pl/plik/11200/967f66d057654f32ea8528493bafa83f>

Silesian University of Technology to hold a conference „Silesian science without borders” with the participation of experts of the European Commission

2019-10-18

The Regional Contact Point, Silesian University of Technology are inviting participants to the „Silesian science without borders” conference on October 21-22. Experts from the European Commission and the Ministry of Science and Higher Education, as well as implementers of international projects, confirmed their participation in the event. The conference, which will be held in Hall D of the Education and Congress Center aims to provide participants with a wide range of research funding options in

national and international programs, new rules for parametric assessment of units, the best path to build their own scientific careers and the assumptions of funding institutions for the next 2021-2027 budget perspective. The event will be an opportunity for scientists from Silesia and the Opole region to learn about new possibilities of obtaining funds from various sources, including: European programs and international programs financed by national institutions.

VI International Scientific Conference „Tourism in valuable natural areas”

2019-10-21

Over 100 experts from Poland and abroad participated in the 6th International Scientific Conference „Tourism in valuable natural areas”. This joint venture of the Institute of Forest Sciences of the Faculty of Construction and Environmental Sciences of the Białystok University of Technology and the Kronenberg Institute took place on October 17-18 in Białowieża. The meeting was held at the headquarters of the Białowieża National Park and was attended by scientists, specialists in the field of protection of natural and cultural heritage, foresters, planners, entrepreneurs, local government officials and representatives of the diplomatic corps. This year's discussion concerned such topics as: tourism in regional development strategies, digitization and new technologies in tourism, tourism in sustainable forestry, quality in tourist services. Legal issues of protection of valuable natural areas and international solutions in tourism were also presented.

Silesian University of Technology launches Polish-Chinese Art & Design Competition 2020 „Mind & Senses in Art & Design”

2019-10-21

The Silesian University of Technology in cooperation with the University of Silesia are the hosts of the second Art & Design Competition 2020: „Mind & Senses in Art & Design” organized as part of the

Chinese-Polish University Consortium. The applications can be already submitted. The competition is addressed to students and employees of universities associated in the Consortium. The theme includes individual interpretations and references to the tradition and modernity of everyday life of the partner countries, which can become a contribution to mutual knowledge about cultures and their promotion. Competition entries should be submitted to the Faculty of Architecture of the Silesian University of Technology, The first competition, which took place at the Beijing University of Technology in China, enjoyed great interest of participants and proved to be an extremely valuable platform for promoting dialogue between universities in China and in Poland, as well as economic partners from both countries.

2020 - Year of Physics

2019-10-22

The Senate adopted a resolution establishing 2020 as the Year of Physics. Its purpose is „to honor Polish physicists and their achievements, as well as to appreciate the civilizational significance of this field of science.” The resolution of the upper house of the Polish parliament states that «The Senate of the Republic of Poland is celebrating 2020 as the Year of Physics, the 100th anniversary of the establishment of the Polish Physical Society. At the same time, the Senate would like to emphasize the merits of Polish physicists for world science and recall the extraordinary development of Polish physics that took place after Poland regained independence in 1918». Senators emphasized that they want the «Year of Physics to bring even greater recognition in our society to the role of science, in particular physics and its contribution to the development of the economy and impact on our daily lives. Physics is an extremely interesting experimental science, translates into an increase in skills in this area for subsequent generations. The scientific and professional activity undertaken in this area is particularly important during the construction of the information society and knowledge-based economy.»

Bialystok University of Technology and University of Bialystok exploring the possibilities of merging universities

2019-10-22

Both universities are planning to make a special report by March 2020, which will examine the possibilities of merging the Bialystok University of Technology and the University of Bialystok. On the basis of the report, universities will be able to make a possible decision on whether and in what form to merge. Over 900,000 PLN will be allocated to prepare a detailed analysis of the effects and benefits of a possible merger of two universities. The funds were obtained by the Bialystok University of Technology and the University of Bialystok as part of the project of the Ministry of Science and Higher Education «Supporting university consolidation processes». -We should consider the topic thoughtfully, seriously, but without prejudice. Interdisciplinarity is the future of science and those who will be prepared for it will win - said the rector of the Bialystok University of Technology, Prof. Lech Dzienis.

We know the winners of the 'Polityka' Scientific Awards

2019-10-22

For the 19th time, the editors of the Polityka weekly journal have selected the winners of the Polityka Awards Scientific Awards. Five outstanding scientists received grants of 15,000 PLN. In the Humanities category, the winner was Dr Olga Śmiechowicz, an assistant at the Theater and Drama Department at the Faculty of Polish Studies of the Jagiellonian University. Her monograph on how theatre was used as a political tool in antiquity, will be base for her postdoctoral thesis. Dr Ewa Zawojska, assistant professor of the Department of Microeconomics at the Faculty of Economic Sciences of the University of Warsaw became a laureate in the Social Sciences category. In the Life Sciences category, the scholarship was received by Andrzej Zieleziński, who is an assistant professor of the Institute of Molecular Biology and Biotechnology at the Faculty of Biology

at the University of Adam Mickiewicz University in Poznan. Dr Iwona Chlebicka has won the prize in the exact science category. She is an adjunct of the Institute of Applied Mathematics and Mechanics at the Faculty of Mathematics, Computer Science and Mechanics of the University of Warsaw. In the category of technical sciences the winner was Dr Eng. Mariusz Ptak, assistant professor of the Department of Machine Design and Testing at the Faculty of Mechanical Engineering of the Wrocław University of Science and Technology.

Scientific Council of the European Research held in Poland

2019-10-23

On October 21, a three-day plenary meeting of the European Research Council (ERC) started in Krakow. The Scientific Council consists of 22 outstanding European scientists, representing various scientific disciplines. It usually provides plenary sessions at the ERC headquarters in Brussels five times a year. This time the meeting is hosted by the Jagiellonian University in Krakow, in cooperation with the Ministry of Science and Higher Education. During the plenary session, the Council will discuss with scientists and the public about the issues of ERC communication and steps taken in connection with the new Horizon Europe framework program. The members also address the open access to publications and data from scientific research, as well as summarized results of work of individual working groups. On Thursday, October 24, the Council will hold a meeting for representatives of the ERC Scientific Council and Polish scientists. The meeting will be attended by Deputy Prime Minister Jarosław Gowin, president of the Polish Academy of Sciences Prof. Jerzy Duszyński, chairman of the Main Council of Science and Higher Education Prof. Zbigniew Marciniak and ERC chairman Jean-Pierre Bourguignon.

University of Warsaw to hold the conference „Climate change in Poland“

2019-10-23

On October 23, the University of Warsaw (UW) is holding a conference entitled „Climate change in Poland“. It will be attended by scientists and representatives of Polish ministries and non-governmental organizations. Participants will talk about the impact of climate change on human life. In four panels the participants will discuss the impact of climate change on migration and refugees, human health, food security, the state of waters, and Polish fauna and flora. The debate will also address issues of the forecasted course of climate change in Poland, the responsibility of decision makers for climate change, and the impact of business activities on the environment. It will be attended by scientists from the University of Warsaw, the Polish Academy of Sciences, the Warsaw University of Life Sciences, representatives of the Ministry of the Environment, the Ministry of Entrepreneurship and Technology and non-governmental organizations such as: Polish Smog Alarm, International Organization for Migration, WHO, Youth Climate Strike, Greenpeace, UNEP / GRID-Warsaw Center, WWF.

University of Warmia and Mazury to hold VII Polish Congress of Entrepreneurship

2019-10-23

On October 24-25, the 7th Polish Congress of Entrepreneurship will take place at the University of Warmia and Mazury (UWM) in Olsztyn. The event is organized by the Polish Agency for Enterprise and the European Enterprise Development Fund. The program of the Polish Congress of Entrepreneurship includes almost 30 discussion panels on the most important issues of the Polish and European economy. The issues include innovation, development of regional and local governments, modern business services, foreign expansion, higher education, energy, medicine and industry 4.0. The participants can attend the B2B meetings to establish relationships with representatives of France, Lithuania, Ukraine, the United States, the Czech Republic and Slovakia, who declared their participation in the event.

Dieter Schenk to talk about a 1939 murder trial at the University of Lodz

2019-10-23

„Polish Post in Gdańsk. History of German Judicial Murder“ is the title of the lecture that will be given on October 23 by Dieter Schenk, a criminologist and writer, and also a former director of the German criminal police and researcher of the history of national socialism. The event will take place at the Institute of History of the University of Lodz (UŁ). 38 Polish Post Officers, who defended the Polish Post Office building in Gdańsk against German invasion on September 1, 1939, were sentenced to death by a German military court, which recognized them as «criminal partisans». Dieter Schenk influenced modern court of the Federal Republic of Germany to recognize this conviction as a judicial murder through his book, which echoed in the world of historians and lawyers. His book presents the historical and legal aspects of jurists' criminal liability for this crime. The lecture will be translated from German into Polish. In 2017, Dieter Schenk received the title of doctor honoris causa of the University of Lodz.

Wiki Science Competition launched

2019-10-24

From November 4 to December 15, 2019, the Wiki Science Competition will be launched. This is an international competition for the best photo documenting the world of science. The authors of the most interesting photographs will receive prizes. The Wiki Science Competition is an international competition with aim to collect photos of the world of science e.g. photographs documenting scientists at work, objects and effects of research, and research equipment. It is also intended to encourage creation, creativity and most importantly - to present creativity related to science. The competition is divided into several categories: science people, microscopic photos, non-photographic media, photo sets, nature and general category. The competition is open to everyone. Each of the submitted photographs will go to the Wikimedia Commons collections and will illustrate articles in every language version of Wikipedia. The best works will be also qualified for the international part of the competition. More information about the competition can be found at: https://commons.wikimedia.org/wiki/Commons:Wiki_Science_Competition_2019_in_Poland

Report on the mobility of young scientists

2019-10-24

German Academic Exchange Service (DAAD) has prepared a report entitled „Information and mobility behavior. A worldwide survey of international junior scientists“, which was based on a survey of 8,422 people. The Foundation for Polish Science (FNP) was a partner of this project. The aim of the study was to gain comprehensive knowledge on the motivation of young scientists related to mobility, to determine decision-making factors, ways of obtaining information and the needs of current and potential international young scientific researchers. The study focused on eight countries that are important research partners of Germany: Great Britain, India, Israel, Mexico, Poland, South Korea, South Africa and the United States. The results of the report show that decisions regarding mobility and interest in the

country of departure and the destination institution are mainly determined by professional issues. The good reputation of the faculty, great research freedom or career prospects have a relatively large impact on the choice of destination. Financial security also plays an important role in making decisions. More: https://www.fnp.org.pl/assets/Factsheet_Polen.pdf

University of Warmia and Mazury to hold Eastern Partnership seminar

2019-10-25

The Poland-East Cooperation Association and the Institute of Eastern Slavic Studies of the University of Warmia and Mazury (UWM) were the organizers of the seminar „Eastern Partnership - developing contacts and cooperation between societies”. The Olsztyn university hosted the ambassadors of Armenia, Kazakhstan and Belarus as well as representatives of Russia. The seminar program included a plenary session with speeches by embassy representatives and three discussion panels devoted to business, culture and tourism as well as regional cuisine. Diplomats presented opportunities for economic cooperation; presented the tourist offer for tourists from Poland and discussed the issue of electronic visas to the Russian Federation. The third panel presented the attractions of the culinary heritage trail of Warmia, Mazury, Powiśle and was combined with tasting of traditional Warmian products.

Professor Mariusz Malinowski becomes president of the IEEE Industrial Electronics Society

2019-10-25

The scientist is the head of the Industrial Electronics Department at the Institute of Control and Industrial Electronics at the Faculty of Electrical Engineering of the Warsaw University of Technology. It is the culmination of his many years of work and activity at the Institute of Electrical and Electronics Engineers (IEEE), which one of the branches is IEEE IES. Professor Mariusz Malinowski was elected for the position of president-elect in 2020-2021 and he will be the president of the IEEE IES in the years 2022-2023. The selection was made during the last IEEE IES board meeting that took place on October 18, 2019 in Lisbon. Professor Malinowski was the editor-in-chief of «IEEE Industrial Electronics Magazine» and an assistant editor at «IEEE Transaction on Industrial Electronics» and «IEEE Transaction on Power Electronics». He co-organized over 20 international IEEE conferences. Currently, he is the chairman of the Polish Section of IEEE and the vice president of publications in the IEEE Industrial Electronics Society. He holds the highest title in IEEE marked as IEEE Fellow, which is awarded for special technical and organizational achievements.

Jagiellonian University holds conference on Polish-Brazilian scientific cooperation

2019-10-25

The Jagiellonian University (UJ) in Krakow held the international conference „Brazil-Kraków. A Bridge to South America” devoted to the development of scientific and academic cooperation between Brazil and Polish universities. The event was attended by the Brazilian ambassador to Poland Hadil Fontes da Rocha Vianna. Plenipotentiary of the Rector of the Jagiellonian University for internationalization Prof. Adam Jelonek emphasized that Brazil is one of Poland's most important foreign partners in Latin America. He noted that the excellent basis for Polish-Brazilian cooperation is created by the fact that there is a very large (about two-million) com-

munity of people of Polish origin in this country. The hundredth anniversary of the establishment of diplomatic relations between Poland and Brazil next year is an opportunity to strengthen mutual partnership. Professor Jelonek expressed the hope that the meeting at the Jagiellonian University will significantly contribute to achieving this goal, especially in the field of scientific research and higher education.

Deputy Prime Minister Gowin: All Europe is one area of scientific freedom

2019-10-28

The topics raised during the plenary meeting of the European Research Council, which took place in Krakow included increasing the participation of women in grants of the European Research Council (ERC), innovation and cooperation with the economy, conflicts of interest and violation of ethical principles in conducting research. - We are proud that today Krakow can be a meeting place for an institution setting directions for scientific excellence, and thus - for the development of Europe. It is a great distinction and very clear support for us. By choosing our city, ERC confirms that all Europe is one area of scientific freedom and a source of scientific excellence - said Deputy Prime Minister Jarosław Gowin during a meeting with Council members. - The patterns and successes of grant recipients established by the ERC help us convince the public that investing in science is important and brings measurable benefits – continued Jarosław Gowin.

Rzeszów University of Technology to hold a historical conference

2019-10-28

On October 23-25, Rzeszów University of Technology together with the Department of Historical Research Office of the Institute of National Remembrance in Rzeszów organized a scientific conference entitled „Power once acquired ... The beginnings of the communist system in Poland 1944-1947”. -We try to present historical elements related to our identity and recent history to students or to propose

such scientific events. This is not the first initiative of this type with our participation - said during the inauguration of the event Prof. Grzegorz Osasz, Vice-Rector for International Cooperation at Rzeszów University of Technology. The conference was attended by: Bogusław Buda, Chairwoman of the NSZZ «Solidarność» Regional Section of Education and Upbringing; Beata Michałusko, Director of the Provincial Pedagogical Library in Rzeszów and Colonel Mariusz Stopa, Chief of the Provincial Military Staff in Rzeszów.

University of Silesia in Katowice to hold conferences „Sources of European culture”

2019-10-30

The humanities faculty of the University of Silesia in Katowice will hold lectures for secondary school students. Every month meetings under „Sources of European Culture” will concern a different topic. The program begins with a lecture «Ethical aspects of medical experiments involving people.» The other topics of subsequent meetings in the auditorium at ul. Bankowa 11 also include: «Law as one of the sources of European culture»; «Ecphrase - between tradition and modernity»; «The diversity of ecosystems and the quality of human life» and «Media image of the world» and «From Załęże to Paris Saint-Germain - symbols of Christianity in Europe alive.» Scientists from the Silesian University will also tell the youth about philosophical advisers and will try to answer the question «Is it true that there is no truth? The idea of truth as the foundation of Western civilization. «

Officers of the Academy of Land Forces in Wrocław were the fastest in the exercise „Cambrian Patrol”

2019-10-30

The team of the Land Forces Academy in Wrocław won the silver medal of the „Cambrian Patrol” patrol exercise in central Wales. Officers from the Combat Action Section completed their operations in a record time of 42 hours and were the fastest of all the teams. This year's 60th exercise, organized by The 160th Welsh Brigade in Brecon was participated by over 130 teams from 34 countries. Wrocław Land Forces Academy for 2 days competed with other teams in the area of very demanding Cambrian mountains in central Wales. Teams carried out tasks in 8 steps. Each team had to cover a 60 km route with tactical equipment weighing 35 kg and a SA-80 gun. During the competition, cadets coped with such tasks as: crossing a contaminated zone, performing full decontamination, crossing a secured bridge, penetrating into the opponent's position, recognizing the object and preparing a report from the information obtained. Rzeszów University to launch Traveling Film Festival „WATCH DOCS Human Rights in Film”

2019-11-06

For the 13th time WSPiA Rzeszów University is organizing the Traveling Film Festival „WATCH DOCS Human Rights in Film”. The five-day event, which began on Wednesday November 6, will last until Sunday, November 10 2019. This year, the best documentary films about violations of human rights in various parts of the world will appear at the Festival. Productions from Poland, Russia, USA, the Netherlands, Canada, Great Britain, Czech Republic, Austria, Australia, Croatia and France will be presented in Rzeszów. It is the largest Traveling Film Festival organized in Poland. The Helsinki Foundation for Human Rights and the Social Film Institute are

co-organizers of «WATCH DOCS Human Rights in Film». More: <http://www.facebook.com/pg/Watch-DocsRzeszow/events>

Prof. Joanna Tokarska-Bakir wins the Yad Vashem International Book Prize 2019 competition

2019-11-06

Monograph „Under the Curse. Social portrait of the Kielce pogrom ...” whose author is Prof. Joanna Tokarska-Bakir from the Institute of Slavic Studies of the Polish Academy of Sciences (PAN) won the prize of the Israeli institute Yad Vashem and the Długosz Award for the best publication in the field of humanities. The two-volume monograph on the Kielce pogrom took first place in the Yad Vashem International Book Prize 2019 competition. The award ceremony will take place on November 28 in Jerusalem - informs the Institute of Slavic Studies PAS. At the end of October Prof. Joanna Tokarska-Bakir received the Długosz Award for the best humanities publication published in 2018. The competition accompanied the International Book Fair in Krakow. The work of prof. Joanna Tokarska-Bakir is also nominated for: Giedroyc Award; Moczarski Award and the Prize of Józef A. Gierowski and Chony Shmeruk for the best scientific book publication in the field of Jewish history and culture in Poland.

Krakow University to hold a conference on the relations between politics and the media in the light of scientific research

2019-11-06

The Faculty of Social Sciences of the University of Economics and Humanities in Warsaw and the Institute of Journalism and Social Communication of the Pontifical University of John Paul II in Krakow organize the National Scientific Conference „Politics and the media. Media and politics in Poland in the 20th and 21st century”. The event will take place on November 14 in Krakow. Prominent political sci-

entists, media experts and historians will take part in the deliberations and discussions. The meeting will be an attempt to answer the question about the obvious and long-standing relations of politics with the media in the light of scientific research. The first part of the conference along with the discussion will be led by the editor Bernard Margueritte. The conference will begin with a lecture by prof. dr hab. Rafał Habielski from the University of Warsaw entitled «Media and politics. The case of Radio Free Europe».

Rzeszów University to launch Traveling Film Festival „WATCH DOCS Human Rights in Film”

2019-11-07

For the 13th time WSPiA Rzeszów University is organizing the Traveling Film Festival „WATCH DOCS Human Rights in Film”. search. The first part of the conference along with the discussion will be led by the editor Bernard Margueritte. The conference will begin with a lecture by Prof. Rafał Habielski from the University of Warsaw entitled «Media and politics. The case of Radio Free Europe”.

Foundation for Polish Science granted Awards 2019

2019-11-08

Professor Marcin Drąg, Prof. Andrzej Kossakowski and Prof. Andrzej Wiśniewski became the winners of the Foundation for Polish Science Award 2019. Professor Marcin Drąg from the Faculty of Chemistry of the Wrocław University of Technology received the Award in the field of chemical and materials sciences for developing a new technological platform enabling the production of biologically active compounds, in particular proteolytic enzyme inhibitors. This platform can be used to develop new therapies, medicines or diagnostic methods. Professor Andrzej Kossakowski from the Institute of Physics of the Nicolaus Copernicus University in Toruń received the Award in the field of mathematical, physical and engineering sciences for developing the theory of open quantum systems. This theory forms the basis of the rapidly growing scientific field - quantum information theory. Professor Andrzej Wiśniewski from the Faculty of Psychology and Cognitive Science at the University of A. Mickiewicz in Poznań received the Award in the field of humanities and social sciences for developing the concept of inferential logic of questions.

National Agency for Academic Exchange to hold a conference „Internationability of Polish Science and Higher Education” in Warsaw

2019-11-08

On November 26, 2019, the National Agency for Academic Exchange (NAWA) is organizing the conference „Internationability of Polish Science and Higher Education”. The aim of the conference is an environmental reflection on how to develop inter-

national cooperation in Polish science and higher education, and how to show science in Poland to interest the best foreign centers in cooperation with Polish universities and research units. The conference will consist of six thematic sessions: Cooperation across borders, The global scientific community in Polish laboratories, From an idea to implementation, Teraz Polska! (session on the decision to continue scientific career in Poland), International science promotion, Exchange of good practices.

Lublin researcher honored with the Award of the Prime Minister

2019-11-08

Dr Agata Starosta from the Department of Molecular Biology at the Maria Curie-Skłodowska University (UMCS) was the only scholar from Lublin honored with the Prime Minister's Awards for the postdoctoral dissertations. The researcher was recognized for research of fundamental importance for understanding the process of protein synthesis or translation. This is a central process for the functioning of every living cell. Dr Agata Starosta is the head of the Gene Expression Laboratory at ECOTECH-COMPLEX, where she and her team look for factors potentially determining „regulation of protein biosynthesis at the translation level“. It implements grants under the First Time program of the Foundation for Polish Science and EMBO Installation Grant - European Molecular Biology Organization.

Prof. Ewa Pałasz-Rutkowska receives Japanese Foundation Award

2019-11-12

Professor Ewa Pałasz-Rutkowska from the Department of Japanese Studies of the Faculty of Oriental Studies of the University of Warsaw (UW) received the Japan Foundation Award for her contribution to the development of mutual relations between Poland and Japan. The award ceremony took place on November 7 in Tokyo. Professor Ewa Pałasz-Rutkowska is one of the leading Polish specialists in the field of Japanese history and culture, as well as mutual relations between this country and Poland. In her research, she focuses on issues of imperial house history or intercultural relations. Every year, the Foundation distinguishes people and organizations that promote friendly relations between individual states and Japan through its scientific, artistic or other activities related to Japanese culture. This year, winners were honored with the awards for the 47th time. The Japanese prize was also given to the poet Shuntaro Tanikawa and the Association of Indonesian Alumni From Japan (PERSADA).

Lublin University of Technology to organize Ukrainian Days

2019-11-12

On November 12-15, 2019, Lublin University of Technology is organizing Ukrainian Days for the third time. The purpose of the event is to present the culture of our eastern neighbors. This is even more important as over 600 students from Ukraine are studying currently at the Lublin University of Technology. This year, the organizers decided to divide Ukrainian Days into 4 thematic blocks. Each day will give students the opportunity to present their talents in the field of literature, music and even culinary arts.

Marshall Nawara Foundation to launch competition for bachelor's, master's and doctoral dissertations on local government

2019-11-12

Marshall Marek Nawara's Foundation has launched the 3rd competition for the best doctoral, master's and bachelor's theses in the Malopolska Region concerning the system and activities of local government, as well as presenting the main characters of the local government. The dissertations may also be focused on specific topics on the cooperation of local governments and universities, for example, problems and issues commissioned by local governments, important in the practice of the functioning of these institutions. The purpose of the competition is to reward people who make a significant intellectual contribution to developing Poland as a state that respects the principle of subsidiarity in relation to local government. Diploma theses from 2017, 2018, 2019 can be submitted to the competition. The deadline for submitting papers is November 25, 2019. The competition is launched under the auspices of the Lesser Poland Voivode. More: https://www.malopolska.pl/_userfiles/uploads/REGULAMIN_2019%20r%20_III%20edycja%20konkursu.pdf

Toruń University to launch Polish center of knowledge about Hubble's successor

2019-11-12

Dr Agata Karska from the Nicolaus Copernicus University in Toruń is one of 18 scientists selected by European Space Agency to create regional knowledge centers on the James Webb space telescope - the successor to the Hubble telescope. The only center of knowledge about «Webbie» in Poland will be created by the team Toruń Astrophysics, theoretical Spectroscopy, and Quantum Chemistry. The first task will be the organization of international workshops that will be used to transfer knowledge about the instruments onboard «Webb» and how to use them to study protostars, extrasolar planets

and small bodies of the Solar System and nearby galaxies. Dr Karska is a researcher of the Institute of Astronomy at the faculty of physics, astronomy and applied computer science and the rector's plenipotentiary for scientific excellence. She completed her doctoral studies at the International Max Planck Research School in Garching in Germany, and delivered her PhD thesis at the Dutch University of Leiden. More: <https://www.umk.pl/wiadomosci/?id=26388>

University of Silesia to hold conference „Image of the Silesian Uprisings and plebiscite in education, historiography, culture and public space”

2019-11-12

The University of Silesia in Katowice, the Archdiocese of Katowice and the Museum of Silesian Uprisings in Świętochłowice are inviting participants to the conference „Image of the Silesian Uprisings and plebiscite in education, historiography, culture and public space” on 18 November. The event will be held under the patronage of the President of the Republic of Poland Andrzej Duda. Participants of the meeting organized as part of the celebration of the 100th anniversary of the Silesian Uprising will present the history of Silesia by presenting the most important figures related to the areas of politics, education, culture, sport, industry and the sacred issues. The conference is part of the University of Silesia project «Upper Silesian Pantheon - scientific research», implemented as part of the Dialogue of the Minister of Science and Higher Education. The goal of the initiative is to create a multimedia exhibition in the basement of the Cathedral of Christ the King in Katowice, thanks to which the participants will be able to learn about the history of Upper Silesia.

How to raise funds for research projects in the „Space” programs?

2019-11-13

On 13-14 November, the University of Warsaw (UW) will hold „International Information Day and brokerage meetings in the field of Space”. The meeting will be devoted to the possibilities of obtaining funding under Horizon 2020 competitions. The purpose of the event is to present funding opportunities for projects under the recent Horizon 2020 Space competitions, the EU's largest research and innovation program. The competitions' budget is EUR 223 million. The organizers of the International Information Day include National Contact Point for EU Research Programs, COSMOS2020plus (SPACE Contact Points Network) and the University of Warsaw. During the event, experts will present the rules of competitions and the initial assumptions of the new EU framework program Horizon Europe, which will replace Horizon 2020.

Jan Długosz University in Częstochowa to hold a conference on the role of tears in literature

2019-11-13

The Institute of Literature at the Jan Długosz University in Częstochowa is inviting students on November 14-15 to participate in the national scientific conference „Tears in literature. Transfer - Reception - Translation (Polish, Austrian, German and Swiss literature).” The research goal of the meeting will be an attempt to diagnose the differences and similarities in the forms of transfer, translation and reception of literary depictions of crying and tears (prose, poetry, drama, essay, children's literature, popular literature) in contemporary German and Polish literature (20th and 21st century) in Polish, German, Austrian and Swiss cultures. The organizers want to search the phenomena studied in the context of socio-historical and cognitive conditions. At the same time, they will assume a multi-faceted perspective of viewing literary phenomena, starting from the interdisciplinary nature of literary science

and comparative research. The conference languages are Polish and German. More: <http://www.ujd.edu.pl/news/view/instytut-literaturoznawstwa-zapkuje-do-udziau-w-konferencji-zy-w-literatura>

Professor Andrzej Nowak received the Order of the White Eagle

2019-11-14

Professor Andrzej Nowak, who manages the works of the Department of History of Eastern Europe at the Institute of History of the Jagiellonian University in Krakow and the Department of History of Eastern Europe and Studies on the Empires of the 19th and 20th Century at the Institute of History of the Polish Academy of Sciences, was awarded the Order of the White Eagle. President Andrzej Duda awarded Prof. Nowak with the highest Polish distinction in recognition of his outstanding merits in disseminating historical knowledge and propagating patriotic values, for achievements in the field of humanities and social sciences, and for popularizing Polish science in the world. Professor Nowak is a member of the Council of the College of Eastern Europe, as well as the Polish-Russian Historical Commission; The Central European and East European Commission of the Polish Academy of Arts and Sciences. Since 2016, he has been a member of the College of the Institute of National Remembrance.

Specialists to apply for the 43rd polar expedition to Spitsbergen

2019-11-14

The Institute of Geophysics of the Polish Academy of Sciences has begun the applying process of the crew for the Polish Polar Station Hornsund within the 43rd polar expedition to Spitsbergen. The expedition organizers specially sought for: geophysicists, meteorologists, IT specialists, mechanics, conservators, technical workers, station administrators and cooks. The candidates should have motorboat patents, completed medical courses (e.g. in first aid or rescue), field experience (especially winter mountain), permissions related to the operation of elec-

trical installations and mechanical devices, welding licenses, technical skills and knowledge of foreign languages (especially English). Applications should be sent by November 25, 2019 to rekrutacja43@igf.edu.pl More: <https://www.igf.edu.pl/kariera.php>

Propaganda as a tool of war

2019-11-14

Collegium Civitas Center for Research on Terrorism, Collegium Civitas Institute for Information Analysis and House of Meetings with History are inviting participants to the first meeting of the „Propaganda - disinformation - manipulation: history and modernity” series entitled „Propaganda as a tool of war”. The event will take place on November 21, 2019 at the headquarters of the House of Meetings with History in Warsaw. The meeting will concern the use of information, psychomanipulative, propaganda and social engineering tools in classic armed conflicts and in contemporary conflicts «below the threshold of war». The meeting will be attended by: Anna Wojtacha, war correspondent, Prof. Daniel Boćkowski, historian, security specialist, Brig. Marek Dukaczewski, former Head of Military Information Services and Jerzy Smoliński, former spokesman for the Minister of National Defense and adviser to the President of the Republic of Poland.

Students of the Wrocław University of Technology to reconstruct the historic bus

2019-11-14

Students of the Wrocław University of Technology will reconstruct the historic Jelcz 043 bus, called the „cucumber”. A multimedia museum will be created there to show the latest history and the creation of Wrocław’s „Solidarity”. On August 26, 1980, at 4.30 a.m., Tomasz Surowiec blocked a bus leaving the depot. It was the beginning of the strike, which was an expression of solidarity with other Polish workers. He put a portrait of John Paul II, bunch of red and white flowers on the windshield and the inscription «21 times YES». There were 21 postulates of striking workers, including the creation of free trade unions, compliance with the constitution, civil rights and freedoms, and the improvement of society. The Jelcz 043 bus, colloquially called the «cucumber» because of its round appearance, was produced in the years 1959-1986 and was a variation of the Czechoslovakian Skoda bus. The Jelcz bus was driven in Wrocław for some time and it was painted in white and red colors and the museum bus will also be restored in such colors. Polish Nobel Prize received by researcher at the Nicolaus Copernicus University in Toruń

2019-11-14

Professor Andrzej Kossakowski from the faculty of physics, astronomy and computer science at the Nicolaus Copernicus University in Toruń became a laureate of so called the „Polish Nobel Prize” - Award of the Foundation for Polish Science, recognized as the most important scientific distinction in Poland. Professor Kosakowski is one of the founders of the Toruń school of physics. He received an award in the area of mathematical, physical and engineering sciences for developing the theory of open quantum systems. This theory forms the basis of the rapidly growing scientific field - quantum information theory. The Awards for the Foundation for Polish Science have been awarded

since 1992 for special scientific achievements and discoveries that push the boundaries of cognition and open new cognitive perspectives, make an outstanding contribution to the civilization and cultural progress of our country and provide Poland with a significant place in addressing the most ambitious challenges of modern the world.

AGH University of Science and Technology to hold 17th International Conference on Coal Science & Technology in Krakow

2019-11-15

AGH University of Science and Technology in Krakow, Institute of Mineral and Energy Research of the Polish Academy of Sciences, IEA Clean Coal Center with the support of the Central Mining Institute and the Institute for Chemical Processing of Coal are the organizers of one of the world’s leading conferences on coal and energy. The 17th International Conference on Coal Science & Technology (ICCS & T2019) will be held on November 24-28, 2019 at the ICE Kraków Congress Center. The event takes place every two years in a different country, under the auspices of the International Energy Agency based in London and gathers several hundred delegates representing the academic community, industry and governments from around the world. The conference will be conducted by Prof. Janusz Gołaś from the AGH University of Science and Technology and Dr Eng. Magdalena Wdowin of Institute of Mineral Raw Materials and Energy of the Polish Academy of Sciences.

University of Gdańsk researchers won the Polish Intelligent Development Award

2019-11-15

Researchers of the University of Gdańsk: Dr Anna Aksamann from the Department of Plant Physiology and Biotechnology and Prof. Hanna Mazur-Marzec, head of the Marine Biotechnology Department

became the laureates of the Polish Intelligent Development Award 2019 in the 'Scientist of the Future' category. Dr Anna Aksmann was awarded for the projects «The role of ELIPs (early light induced proteins) in the acclimatization of Chlamydomonas cells to anthropogenic pollution of the aquatic environment» and «Synchronous cultures of Chlamydomonas reinhardtii as a tool in the study of toxicity of anthropogenic pollution». Professor Hanna Mazur-Marzec was awarded for the projects «Peptides produced by Baltic cyanobacteria - from identification to choice of the leading compound (from hits to leads H2L)» «BOLigopeptides produced by cyanobacteria - from ecology to biotechnology» and «Small molecule metabolites of the Baltic Sea cyanobacteria as potential inhibitors microRNA function. https://ug.edu.pl/media/aktualnosci/91981/badaczki_ug_laureatkami_polskiej_nagrody_inteligentnego_rozwoju

Researcher of Adam Mickiewicz University receives the Foundation for Polish Science Award

2019-11-15

Professor Andrzej Wiśniewski from the faculty of psychology and cognitive science of the Adam Mickiewicz University in Poznań received the Foundation for Polish Science Award 2019, which is recognized as the most important scientific distinction in Poland. Professor Wiśniewski received an award in the humanities and social sciences for developing the concept of inferential logic of questions. Solutions proposed by Prof. Wiśniewski can be used in machine learning, the development of artificial intelligence, the improvement of internet search engines or effective analysis of databases. The Foundation for Polish Science Prize is awarded for special scientific achievements and discoveries that push the boundaries of cognition and open new cognitive perspectives, make an outstanding contribution to the civilization and cultural progress of our country and provide Poland with a significant place in addressing the most ambitious challenges of the modern world. The prize is 200,000 PLN. More: <https://amu.edu.pl/consciousosci/aktualnosci/pracownica/naukowiec-z-uam-zdobyl-najwazyszne-polskie-wyroznienie-naukowe>

„One and a half degrees. Science fights for climate”

2019-11-18

Professor Paweł Rowiński, Vice President of the Polish Academy of Sciences (PAN), hydrologist and hydrodynamics specialist will conduct an open lecture on November 21, 2019 at the Institute of Geophysics of the Polish Academy of Sciences, entitled „One and a half degrees. Science fights for climate.” Professor Rowiński will try to answer the questions: Why is the Arctic warming faster than other regions of the world? Will we be suffering from floods? Are we at risk of a shortage of drinking water? Is it possible to stop climate change? The symbolic slogan «one and a half degrees» often appears in discussions about global warming.

The lecture will introduce the benefits of halting the rise in average temperature at this level (relative to pre-industrial times). The lecture begins with the long-term Edu-Arctic project. Its goal is to present the successes of Polish science and the challenges it faces, primarily those in the field of polar research.

Deputy Prime Minister Gowin visits the National Science Center

2019-11-18

Participation of Polish scientists in programs financed from European funds was discussed on November 14, 2019 at the meeting of the board members of the Council of the National Science Center (NCN) with Jarosław Gowin, deputy prime minister and minister of science and higher education. The discussion focused on ways to support researchers working in Polish organizations in applying for funding in ERC competitions and in other programs implemented under Horizon 2020. The possibilities of Horizon Europe (another European Union investment program in the field of research and innovation) were also discussed. Participants of the meeting agreed that it is important to support scientific organizations and individual researchers in applying for funding for research from EU funds, both from the Ministry of Science and Higher Education and from executive agencies, including the National Science Center.

Professor Kaja Gadowska becomes the vice president of the European Sociological Association

2019-11-18

Dr Kaja Gadowska, Prof. of the Jagiellonian University (UJ) in Krakow of the Institute of Sociology of the Jagiellonian University became the vice president of the European Sociological Association (ESA) for the years 2019-2021. Prof. Marta Soler-Gallart from the University of Barcelona was elected the president of this organization. ESA has over 2,800 members. The society supports scientific and didactic initiatives. It is also a platform for the exchange of experience

between sociologists and researchers from other fields of knowledge. Dr Kaja Gadowska is the head of the Department of Sociology of the Jagiellonian University. The main area of her research interest is the problems of public sphere dysfunction, including the restructuring of hard coal mining in Poland.

Polish scientist joins the Council of Advisors for Science and Technology of the US President

2019-11-19

Professor Dorota Grejner-Brzezińska will join the US presidential Council of Advisors for Science and Technology - said the White House. The Polish scholar specializes in geomatic engineering, including GPS algorithms and mobile mapping. Professor Grejner-Brzezińska is a graduate of the University of Warmia and Mazury in Olsztyn, and has lived in the USA for over 20 years. She is a Fulbright scholarship holder. At Ohio State University, she is a professor and head of the department. The Polish researcher has published over 300 articles, technical reports and other publications on GPS and navigation. She is also a member of the Institute of Navigation (ION), a member of the Royal Institute of Navigation (RIN).

University of Economics to hold „Polish Economic Development Forum” - a scientific conference in Krakow

2019-11-19

On November 21-22, 2019, the Student Institute of Economic Analysis of the Krakow University of Economics (UEK) is organizing the 2nd National Scientific Conference „Polish Economic Development Forum” addressed to students, PhD students and doctors. The aim of the conference is to exchange views on the economic situation in Poland and to expand knowledge of economic sciences. The conference will provide time for discussion and integration. The thematic scope of the conference includes such issues as: social inequalities; entrepreneurship and innovation; climate and green economy; international relations; demography; finances, tax system and fiscal and monetary policy.

XXI Scientific and Technical Conference „Geosynthetics and technical textiles in construction and environmental protection”

2019-11-19

The Faculty of Materials, Construction and Environmental Engineering of the University of Technology and Humanities in Bielsko Biala is a co-organizer of the 21st Scientific and Technical Conference „Geosynthetics and technical textiles in construction and environmental protection”. The conference and training workshops «Application of geosynthetics and technical textiles in engineering facilities» will be held from November 20-22 in Ustroń. The purpose of both events is to present research results, the latest scientific and technical achievements in geosynthetics, fibers and technical textiles used in environmental engineering and construction. The conference should interest producers, investors, designers, contractors, researchers and students interested in issues related to the use of geosynthetics and technical fibers and textiles in construction and environmental engineering.

University of Rzeszów to hold lectures on humanities

2019-11-19

The University of Rzeszów (UR) is inviting participants to a series of lectures on history, archeology, culture, literature and language, philosophy, art. A series of lectures in the field of humanities is organized by the Institute of History together with the Institutes of Archeology, Philosophy, Polish Studies and Journalism and Art, as part of the College of Humanities of the University of Rzeszów, in the academic year 2019/2020. Lectures organized by the University of Rzeszów are of great interest to the students of secondary schools of the region. Participation in the first meeting was confirmed by 525 participants. The ceremonial inauguration of the new lectures will take place on November 21, 2019. On this day the following lectures will be held: Dr Andrzej Niemczuk, - «The sense of human freedom», Dr Jan Pisuliński, - «Freedom and human rights», Dr Bożena Taras, - «Freedom of speech as a testimony to human maturity».

Monument by architect from the Wrocław University of Science and Technology selected from 2,000. proposals in China

2019-11-20

Dr Piotr Wesołowski's monument „Sun, peasant and donkey” can be seen in Xiliuhu Park in the capital of Henan Province of China. The project of the architect and artist from the Wrocław University of Science and Technology was one of 2,316 proposals sent to the second Zhengzhou International Sculpture Exhibition. They were evaluated by the jury, which selected the 32 most interesting works, taking into account their creativity, uniqueness and aesthetics, as well as issues of durability, safety and environmental friendliness. 20 works were finally selected for implementation, including the work «Sun, Peasant and Donkey» by Dr Eng. Piotr Wesołowski. His sculpture is a kind of loose metaphor of the relationship between man and nature, sustainable humanities, understood as a field ac-

tively involved in sustainable development focused on a common future. More: <https://pwr.edu.pl/uczelnia/aktualnosci/w-chinach-stanela-praca-architekta-z-pwr-wybrano-ja-sposrod-2-tys-propositions-11396.html>

University of Wrocław to hold an exhibition „What does the Earth hide”

2019-11-20

Until March 8, 2020, the Museum of the University of Wrocław (UW) is inviting for the exhibition „What does the Earth hide? Geology, mineralogy and paleontology at the University of Wrocław”. The exhibition was organized in cooperation with the Geological Museum of Henry Teisseyre, Mineralogical Museum of Kazimierz Maślankiewicz and the Department of Paleozoology at the Institute of Environmental Biology. It contains historical collections (e.g. from the collection of Henrik Steffens or Ferdinand Roemer) and specimens obtained as a result of the work of Polish researchers after 1945. The history of geology, mineralogy and paleontology at the University of Warsaw dates back to 1812, when Prof. Karl von Raumer founded the Mineralogical Cabinet. His collection included minerals, petrographic and paleontological specimens and was systematically expanded in the nineteenth and first half of the twentieth century. During World War II and after it was dispersed. Part of the mineralogical collection returned to Wrocław and became the basis for the Mineralogical Museum that is still operating today. More: <https://uni.wroc.pl/co-kryje-ziemia-geologia-mineralogia-i-paleontologia-na-unipitadem-ic-wroclawskim-otwarcie-wystawy/>

Maria Curie-Skłodowska University in Lublin to launch Day of Internationalization

2019-11-21

On November 25, 2019, the University of Maria Curie-Skłodowska (UMCS) in Lublin, together with Santander Bank Polska and the National Agency for Academic Exchange, are organizing the 1st Internationalization Day, devoted to the issue of internationalization of higher education in Poland. The theme of the event will be internationalization of higher education, and «environmental reflection on the development and improvement of activities for internationalization». The meeting will also be an excellent opportunity to present good practices in this area. An expert of the European Association for International Educators (EAIE) - Dr Uwe Brandenburg, a recognized international authority in the field of internationalization will deliver an open lecture entitled „Why internationalisation? Rationales and future trends”.

Polish-French Scientific Award awarded for the first time

2019-11-21

Dr Marcin Szwed, Prof. Laurent Cohen and Prof. Jakub Zakrzewski and Dr Dominique Delande received the first Polish-French Scientific Award of Maria Skłodowska and Pierre Curie. Cognitive scientist Marcin Szwed from the Institute of Psychology of the Jagiellonian University and neurologist Laurent Cohen from the Institute of Brain and Spinal Cord Research (Institut du Cerveau et de la Moelle épinière, ICM) have been awarded for innovative research on brain processes during reading. Physicists Jakub Zakrzewski from the Faculty of Physics, Astronomy and Applied Computer Science of the Jagiellonian University and Dominique Delande from the National Center for Scientific Research in France (CNRS) received the Award for achievements in physics of quantum-mechanical systems. The Polish-French Scientific Award is granted for outstanding scientific achievements resulting from cooperation between scientists from both countries. It was established in 2019 by the Foundation for Polish Science, the Ministry of Higher Education, Science

and Innovation (MESRI) in France, and the French Academy of Sciences.

Inauguration of the Podlasie Children’s University

2019-11-21

On Saturday, November 23, Białystok University of Technology (PB) will inaugurate the new academic year of the Podlasie Children’s University. Thanks to the financial support of six self-governments, children from Białystok, Augustów, Bielsko Podlaski, Hajnowka, Siemiatycz and Sokółka will participate in classes at the Białystok University of Technology. During the first classes, the youngest students of the Białystok University of Technology will receive transcripts and listen to the inaugural lecture «Can you walk? But do you know how you do it? », which will be delivered by Dr Eng. Szczepan Piszczatowski, Prof. PB from the Faculty of Mechanical Engineering. The Podlasie Children’s University is a project directed to primary school students, whose main goal is to popularize science and show that learning knowledge does not have to be boring and difficult. 15 thematically diverse meetings are planned in the 2019/2020 academic year. More: <https://pb.edu.pl/pud/>

Polish scientist receives the Award of the International Union of Forest Research Organizations

2019-11-21

During this year’s XV World Forest Congress in Curitiba (Brazil), Prof. Piotr Paschalis-Jakubowicz, retired employee of the Department of Forest Utilization of the Faculty of Forestry of the Warsaw University of Life Sciences (SGGW) in Warsaw, received the International Union of Forest Research Organization (IUFRO) Award for outstanding research achievements. IUFRO rewards unawarded earlier achievements related to the dissemination of knowledge related to forest research, forestry and forest sciences. Only one such award was granted during the World Forest Congress in Brazil. The International Union of Forest Research Organizations

(IUFRO) was established by several European and North American countries in 1892. It is an international cooperation network of many organizations of over 15,000 scientists from nearly 700 member organizations in over 110 countries.

University of Wrocław to hold a conference about mythical beasts

2019-11-21

The Institute of Geological Sciences of the University of Wrocław is inviting participants to a program „Secrets of the Earth and the Universe”. On Saturday, November 23, Jolanta Muszer will deliver a lecture „Mythical beasts and fossils, or about a grain of truth”. Who has not heard myths and legends about dangerous dragons, brave griffins, powerful giants or cyclops? Or stories about unicorn, devil nails, Tengu claws and many other beasts. In Poland, there were also beliefs about lightning stones and devil's footprints. The lecture will present examples of mythical creatures and deities from around the world. The lecturers will consider the origins of these stories and by what they could have been inspired. They will try to answer the question whether myths and legends are only the result of the wild imagination of travelers, or whether they are based on found fragments of fossils, whose presence could not be explained in the past.

Andean Research Center of the University of Warsaw to launch exhibition

2019-11-22

From November 20 to December 21, 2019, a multimedia exhibition will be available at the Kazimierzowski Palace of the University of Warsaw (UW) presenting archaeological works carried out in Machu Picchu by the Andean Research Center of the University of Warsaw in Cusco. The exhibition entitled «Beyond visible. Remote sensing and laser scanning in Polish-Peruvian-Italian research in Machu Picchu» presents extensive archaeological work in Machu Picchu conducted by scientists from the Center of Andean Research of the University of Warsaw in Cusco. Archaeologists from the University of Warsaw have been conducting research in this area since 2008 as part of cooperation with the Peruvian National Archaeological Park Machu Picchu. The exhibition guests will see three-dimensional holographic models of various buildings, including the Inca observatory in Mirador de Inkaraqay or the main buildings of Machu Picchu. The exhibition also includes films, documentary and archival materials, as well as the latest photos from the sites.

Four Polish researchers became the most cited scientists in the world

2019-11-22

Four Polish scientists have been included in the latest Clarivate Analytics ranking - a prestigious list of the most cited scientists in the world. The Clarivate Analytics Highly Cited Researchers 2019 ranking (formerly Thomson Reuters) is an updated list of the most-cited scientists of the world yearly. The list is created as a result of the analysis of the number of citations, which is one of the measures of the publication's value and shows how much the scientific work of individual researchers supports and inspires other scientists around the world. This year only four Poles were included in the ranking: chemist Prof. Jacek Namieśnik, the rector of the Gdańsk University of Technology who died in June and three cardiologists: Prof. Piotr Ponikowski, head of the Depart-

ment of Heart Diseases, Faculty of Health Sciences, Medical University of Silesian Piasts in Wrocław, Prof. Adam Torbicki, head of the Department of Pulmonary Circulatory, Thromboembolic Diseases and Cardiology CMKP at the European Health Center in Otwock and Prof. Michał Tendera from the Cardiology and Structural Heart Clinic of the Medical Faculty of the Silesian Medical University in Katowice.

University of Economics in Katowice invites participants to the Fifth Nobel Colloquium

2019-11-22

The Department of Political Economy of the University of Economics in Katowice is inviting participants to the 5th Nobel Colloquium „Without destination. On the network of Douglass C. North institutions”. The speaker of the meeting will be Dr Sławomir Czech, who will present the profile and scientific achievements of Douglass C. North, winner of the Bank of Sweden Award of Alfred Nobel in economics in 1993 (together with Robert Fogl) awarded for «contribution to the renewal of economic history through the application of economic theories». The subject of Douglass North's research were institutions understood as «rules of the game in society» or «man-designed limitations that structure interactions between people.» In his works, North, as an economic historian, referred to the question that gave rise to economics as a science, i.e. why some societies became rich and others could not break out of the low-growth trap. More: https://www.ue.katowice.pl/no_cache/uczelnia/aktualnosci/article/zapyszne-na-piate-kolokwium-noblowskie.html

Professor Hołyst reveals the riddle of life on Earth

2019-11-25

November 28, 2019 at 17.00 at the Museum of Evolution of the Institute of Paleobiology of the Polish Academy of Sciences (PAN) in the Palace of Culture and Science in Warsaw, Professor Robert Hołyst from the Institute of Physical Chemistry of the Polish Academy of Sciences will talk about the randomness of life processes delivering a unique

open lecture will take place. -I will tell participants about creating order in living cells, randomness of life processes, as well as their synchronization. I will also show that evolution occurs extremely quickly when living organisms are subjected to strong stress - promises Prof. Robert Hołyst. The time that appears in my lecture (from nanoseconds to hours) is far from the time scale that is interesting for paleobiologists. But I really hope that my research will be inspiring for the people attracted by the riddle of the existence of life on Earth - adds the scientist. Professor Hołyst lectured at renowned universities in the USA (including Harvard, Yale, Princeton, MIT), in Europe, as well as in Canada, China, Japan, Russia and South Korea.

Students of the Nicolaus Copernicus University join the national competition StRuNa

2019-11-25

Students of the Nicolaus Copernicus University in Toruń won many prizes in the national competition StRuNa, summarizing the scientific activity of student associations and organizations. Young scientists won the main awards in three categories. In category of the Scientific Club of the Year 2019, the Interdisciplinary Scientific Club of Geriatrics from the Faculty of Health Sciences of the Collegium Medicum won the main prize, in the StRuNa-Art 2019 category the Scientific Club of Conservation and Restoration of Works of Art Students for the implementation of the project „Conservation and Renovation of the Henry Draper Astrograph from the Astronomical Observatory Nicolaus Copernicus” took the first place. In the category of StRuNa-Human 2019, the Students’ Scientific Electoral Law Society „Elektor” won the prize for the project „Participation of first time voters in European Parliament elections”, the distinction was awarded to the Scientific Association of Medieval Art Historians for the project „Burgess and princes. Culture and art of the Burgundy Netherlands. „

Lublin TYGIEL Foundation to hold scientific conference „Analysis of Polish society”

2019-11-26

The TYGIEL Foundation for the Promotion of Science and Development is the organizer of the 3rd National Social Scientific Conference „Analysis of Polish Society”, which will take place on November 29, 2019 in Lublin. The aim of the conference is to attempt to capture and describe changes, tensions and dilemmas about modern society. The dynamic development of society causes the interpenetration of many fields of science. Global phenomena affect local social life and interpersonal relationships. The awareness of growing connections and dependencies is increasing, intensifying the need to find ways to understand, predict and control them. During the conference, five thematic blocks will be discussed: media and public life, law and economics, social policy, psychology and social sciences as well as anthropology and ethnography.

Professor Piotr Ponikowski among the most cited scientists in the world

2019-11-26

Professor Piotr Ponikowski- rector of the Medical University of Wrocław is one of four Poles on the list of the most influential scientists in the world created by Clarivate Analytics. The list has been created every year. It includes most often quoted scientists worldwide by the academic environment. This year, it includes representatives of 1,200 institutions from over 60 countries, including 23 Nobel Prize winners. Professor Ponikowski is a specialist in internal medicine and cardiology, head of the Department of Heart Diseases of the Faculty of Health Sciences of the Medical University of Wrocław and the Center of Heart Diseases of the University Clinical Hospital. From February 14, 2019, he has been the rector of the Wrocław university. The list includes Prof. Ponikowski and two Polish cardiologists Prof. Adam Torbicki and Prof. Michał Tendera, and a chemist, the late rector of the Gdańsk University of Technology, Prof. Jacek Namieśnik.

Danish prince couple to visit the University of Warsaw

2019-11-27

On November 25-26, the University of Warsaw (UW) was holding a conference celebrating the 100th anniversary of the re-establishment of Polish-Danish diplomatic relations. On that occasion, the university was visited by the heir to the throne of Denmark, Prince Frederick and Princess Maria. Prince Frederick took part in the ceremonial opening of the conference on relations between countries. Inaugurating the conference, University of Warsaw Rector Prof. Marcin Pałys talked about scientific cooperation between the University of Warsaw and Danish universities, also about within the 4EU + Alliance. -We have great hopes about the 4EU + Alliance, which obtained the status of the European University by the decision of the European Commission in June this year. The alliance connects six research universities from different countries, including the University of Warsaw and the University of Copenhagen, - said the rector.

University of Rzeszów to celebrate 20 years of archeology

2019-11-27

-It’s no secret that thanks to the discovery of Grodzisk Scytyjski Scythian town in Chotyniec Rzeszów became a bright spot on the archaeological map of Poland. Of course, this is not the only important discovery of recent years. The history of archeology in the Podkarpackie region immerses much deeper - says Dr Maciej Ulita and reminds that this year the Institute of Archeology UR celebrates its 20th anniversary. On this occasion, UR is launching a series of events related to the jubilee. On December 2-3, it will organize a scientific conference - «Outskirts of cultures – cultures of outskirts. From research on archeology in Central and Eastern Europe from the younger Stone Age to the early Iron Age». Many prominent researchers from Poland and abroad have announced their participation in the conference. On December 4, the honorary doctor title will be received by Prof. Aleksander Koško. He is an archaeologist who managed numerous field research

in Poland, primarily in the Kujawy, but also in Pomerania and Greater Poland regions. He is the creator and editor-in-chief of the «Baltic-Pontic Studies» yearbook and a co-editor of the «Archaeologia Bimaris» series.

Conference „Folklore in art, music, literature and theater”

2019-11-28

The Institute of Polish Philology at the Maria Curie Skłodowska University (UMCS) in Lublin, the UMCS Student Ethnolinguists Scientific Club, the UMCS Academic Culture Center „Chatka Żaka”, „Folk Writing” and the Association of Folk Animators are organizing a national scientific conference entitled „Folklore in art, music, literature and theater.” The event will take place on November 29, 2019 at the UMCS Academic Culture Center «Chatka Żaka» and will be part of the XXIX International Folk Music Festival «Mikołajki Folkowe». During the conference, participants will discuss the following topics: the genesis and manifestations of folk art in music, art, literature and theater; folk artistic style; folk art yesterday and today: between folklore, folklorism and folk; art in the service of the «people» - folk art, folk groups, socialist realism; folk inspirations in contemporary art - ethno-design, folk music, ethno-movement; peasant literature and literature about the peasantry and the folk vision of the world in art.

Professor Zbigniew Blocki re-elected member of the Governing Board of Science Europe

2019-11-29

Director of the National Science Center (NCN) Prof. Zbigniew Blocki was elected for the third time for a 2-year term as a member of the Governing Board of Science Europe (SE) - an international organization associating 37 European scientific institutions conducting or funding research activities. The aim of the Science Europe organization founded in 2011 is to support the activities of member organizations by increasing their impact on shaping pan-European science policy. Science Europe is also a platform for contacts between scientific institutions from Europe and abroad, as well as between the scientific community and representatives of national and European authorities. It cooperates with the European Research Council (ERC), universities, European international science organizations and the European Commission.

European Forum: Biomedical Engineering from Research to Commercialization to be held in Warsaw

2019-11-29

The European Forum: Biomedical Engineering from Research to Commercialization will take place from December 2-4 in Warsaw. The event will be hosted by the Institute of Biocybernetics and Biomedical Engineering of the Polish Academy of Sciences (IBIB PAN). The forum is addressed to scientists and entrepreneurs from the medical technologies sector. Participants will talk about the results of the latest scientific research, especially those that can be commercialized or implemented in clinical practice. The topics also include cooperation between research centers and companies from the medical technology sector, and good practices in obtaining projects and grants. The meeting will be chaired by Dr Eng. Ratko Magjarević from the University of Zagreb, president elect International Federation for Medical and Biological Engineering (IFMBE) and Dr Eng.

Piotr Ładyżyński, Prof. of IBIB PAN, director of the International Biocybernetics Center.

Jan Kochanowski University in Kielce to hold meeting with Polish intelligence officers

2019-12-02

The Jan Kochanowski University (UJK) in Kielce is inviting students to a meeting with „experienced officers of the Foreign Intelligence Agency” entitled „Do you have the intelligence gene in you?”. The organizer of the meeting is the Academic Career Office of the Jagiellonian University. The visit of Polish intelligence officers at the Kielce University will take place on December 4. During the meeting, participants are to learn the «typical intelligence agent profile» and the requirements that this service places on future officers. The application method, general working conditions and professional career will also be discussed. In addition to listening to the lecture, they will have the opportunity to participate in the discussion and obtain information on the specifics of intelligence work.

Scientific conference ‚Albert Einstein and the structure of the universe’

2019-12-02

The Department of Philosophy of Nature of the Pontifical University of John Paul II (UPJPII) in Krakow is organizing on 4-5 December 2019 the scientific conference ‚Albert Einstein and the structure of the universe’. The organizers' intention is to create an opportunity to meet students, graduate students and PhD students at the faculties of philosophy and the faculties of exact sciences, whose researches focus on the thoughts of Albert Einstein and the structure of the universe around us. The organizers aim to assure participants the opportunity to present their current research in the framework of master's theses, bachelor's theses or PhD dissertations in the field of nature philosophy and natural sciences. The conference will be held in the auditorium of the Faculty of Philosophy of the Pontifical University of John Paul II at 3 Bernardyńska Street in Krakow.

11th International Conference X-Ray Investigations of Polymer Structure - XIPS 2019

2019-12-02

The Institute of Textile and Polymer Materials Engineering of the University of Technology and Humanities in Bielsko-Biala, in cooperation with the chemistry department of the University of Leuven and the Committee on Materials Science of the Polish Academy of Sciences, are inviting participants from 3rd to 6th December to the 11th International Conference X-Ray Investigations of Polymer Structure - XIPS 2019. The conference is a forum known in the European and national scientific community for presenting the latest achievements in the field of structural polymer research and the promotion of research methods based on x-ray scattering. It will be attended by scientists from Belgium, Denmark, Japan, France, Germany and Poland - from the AGH University of Science and Technology in Krakow, the Lodz University of Technology and the Center of Molecular and Macromolecular Research of the Polish Academy of Sciences in Lodz, Wroclaw University of Science and Technology, Maria Curie-Skłodowska University in Lublin, Adam Mickiewicz University in Poznań and the SOLARIS National Synchrotron Radiation Center in Krakow.

Scientists implant bison embryos in cows

2019-12-03

A month ago, five bison embryos were implanted into five black and white cows. Three of them have been just confirmed to be pregnant. The embryo transfer to surrogate mothers was carried out by a team of scientists led by Dr Anna Duszewska, Prof. of Warsaw University of Life Sciences (SGGW) from the Institute of Veterinary Medicine. Despite the successful transfer, the scientists will learn about the final success of the experiment only in about 8 months, when the first bison will be born by a representative of another species, i.e. domestic cattle. These activities are carried out to protect the species and ensure the future exchange of genetic material between herds - said Prof. Wanda Olech, project coordinator and director of the Institute of Animal Sciences SGGW. There is also the Bison Gene Bank in SGGW in Warsaw storing tissues, DNA, spermatozoa, oocytes and embryos of the bison at low temperatures. The DNA collection includes about 3500 individuals from Poland and other European countries.

„Science in Poland in 34 Snapshots”

2019-12-03

The National Agency for Academic Exchange (NAWA) has published a book presenting and promoting Polish science in 34 „photographic snapshots”. «Science in Poland in 34 Snapshots» is a publication that describes the achievements of scientists in various fields of science. It also presents research infrastructure. The book also includes essays presenting Polish scientific schools. Polish scientists are constantly contributing to the world science. They solve scientific problems individually or in research teams, often with an international support, in modern laboratories, using large research infrastructure and in their own offices, universities and research institutes spread all over Poland dedicated to various fields and specializations of science – wrote Łukasz Wojdyga, director of NAWA. «Science in Poland in 34 Snapshots» is an invitation to meet the fascinating, multi-colored world of Polish

science and researchers, observing their genuine passion. See the publication: https://nawa.gov.pl/images/zdjecia/ResearchinPoland/Science_in_Poland_v1.25a-www.pdf

Scientific conference on religious education

2019-12-03

On December 6, the Institute of the History of Science of the Polish Academy of Sciences (PAN) is organizing the conference „Religious education and its impact on the socio-cultural life of the state and the regions in the 20th century”. The aim of the conference is to draw attention to the history and contribution of confessional education of various religions to the education and socio-cultural life of selected countries and regions in the 20th century. Conference organizers will focus on approaching the problem both in macro- and micro-scale: general sketches, history of selected educational institutions and schools, characteristics of educational environments, managerial and teaching staff, teaching and upbringing programs, description of organizations supporting the functioning of denominational education institutions of individual churches and associations religious organizations. PAN informs, that the end result of the undertaking will be a scientific publication in the form of a collective work.

Bialystok University of Technology to hold International Training Week

2019-12-03

17 representatives of 11 universities from 9 countries will participate in the International Training Week taking place at the Bialystok University of Technology (December 6). The meeting for partner universities in the Erasmus + Program is organized by the PB International Cooperation Office. The participants of the International Training Week include academic teachers and employees of international cooperation offices from 11 world academic centers. Guests have the opportunity to learn about the Bialystok University of Technology, participate in meetings at faculties, as well as conduct classes for students. University representatives from Alba-

nia, Algeria, Malaysia, Moldova, Nepal, Paraguay, Russia, Serbia and Tunisia also hope to establish cooperation with teachers and academic staff of the Bialystok University of Technology.

University of Wrocław to hold conference on narrative strategies in culture

2019-12-03

The Center for Interdisciplinary Research on the Relationships between Oral and Literature Culture at the University of Wrocław is inviting from 4 to 6 December to the international interdisciplinary scientific conference „Changes in Narrative Strategies in Context of the Specificity of the Oral and Written Tradition”. The conference will be devoted to interdisciplinary considerations on narrative strategies in oral culture and writing culture. Prominent world researchers will take part in the event. Particularly interesting for researchers are the issues of mutual relations at the interface of both cultures, e.g. in the liminal phase observable in ancient and medieval literature. The manner in which the narrative is conducted and its meanings also lead to reflection on the interaction between recipients and the author of the message.

Professor Leszek Kaczmarek becomes the president of the European Molecular Biology Conference

2019-12-04

Professor Leszek Kaczmarek from the Institute of Experimental Biology Polish Academy of Sciences (PAN) was elected the president of the European Molecular Biology Conference (EMBC). The European Molecular Biology Conference was founded in 1969. It brings together 30 countries, mainly members of the European Union. Poland joined the EMBC in 1999. The organization's task is to support European cooperation and to finance the education and career development of researchers in the field of molecular biology. Professor Leszek Kaczmarek heads the Laboratory of Molecular and Cell Neurobiology at the Institute of Experimental Biology of PAN. He is a member of the Polish Academy of Sciences and Academia Europaea.

Polish Academy of Sciences to launch Polar University

2019-12-05

How does global warming change the Arctic? How fast can glaciers move? And what does Christmas look like at home at the North Pole? All questions can be answered through online lectures organized by the Institute of Geophysics of the Polish Academy of Sciences (PAN). The Polar University has been just started under the Edu-Arctic project. The first online lecture took place on November 26. The Vice president of the Polish Academy of Sciences Prof. Paweł Rowiński talked about climate changes. In December, two more lectures on the Christmas will be delivered. In order to participate one can click edu-arctic.pl and take part in the selected lecture. Live connections with Polish polar stations are also planned. December 6 (Friday) at 10.00 and 16.00 students can listen to the lecture «The whole truth about the magic of reindeer», and on December 17 and 18 «Holidays of the polar explorers» by Joanna Perchaluk-Mandat from the Polish Polar Station «Hornsund» on Spitsbergen. More: www.edu-arctic.pl

Copernicus Science Center to seek dark matter

2019-12-05

The Copernicus Science Center (Copernicus Science Center) in Warsaw is inviting participants on December 12 for another „Meeting with a scientist”. The guest of the Copernicus Science Center will be Dr Sebastian Trojanowski, who will talk about „what elementary particle physicists can say about dark matter and the prospects of discovering its traces”. Dr Sebastian Trojanowski is currently working for with the National Center for Nuclear Research (NCBJ) in Świerk and the University of Sheffield in Great Britain, where he conducts research on the border between theoretical particle physics, cosmology and particle astrophysics. One of his main specialties are issues related to dark matter and attempts to understand its microscopic nature. He is interested in both the theoretical description of the possible interactions of dark matter, as well as the analysis of the perspectives of its experimental discovery. He is one of the four originators of the FASER experiment planned at the Large Hadron Collider (LHC) near Geneva.

Cardinal Stefan Wyszyński University to hold a conference on digital technologies

2019-12-05

The Center for Digital Science and Technology of the Cardinal Stefan Wyszyński University (CNT UKSW) in Warsaw is inviting participants to the conference „Direction Innovations. Science for the digital economy of the future” which will take place on December 5. This year's conference will be devoted to the development and implementation of digital technologies. The employees of the Digital Science and Technology Center will present the progress of the UKSW «Multidisciplinary Research Center» project, as well as the strategy and achievements of the UKSW CNT. In addition, conference participants will learn about the artificial intelligence, Big Data issues, or digital solutions for anthropology. The speakers will show what is visual analysis in medi-

cine, explain modeling, visualization and advanced data analytics, design materials for 3D printing and work in extreme conditions, and also present how intelligent diagnostic systems for urban infrastructure work.

Researcher of the University of Gdańsk elected to the European Data Protection Supervisor

2019-12-05

Dr Wojciech Wiewiórowski from the Department of Information Technology of the Faculty of Law and Administration of the University of Gdańsk was elected to the position of European Data Protection Supervisor. This is the highest position for a Pole in the bodies of the European Union, filled not by parity (i.e. due to each member state) but from an open competition. The European Data Protection Supervisor (EDPS) is an independent supervisory body of the European Union whose main task is to ensure that European institutions and bodies respect the right to privacy and data protection when they process personal data and develop a new policy. The EDPS advises EU institutions and bodies on matters related to the processing of personal data and related policy and legal areas. He deals with complaints and investigates. He also works with national authorities in EU countries, monitors new technologies that may affect data protection. More: https://ug.edu.pl/media/aktualnosci/92725/dr_wojciech_wiewiorowski_wybrany_europejskim_inspektorem_ochrony_danych

Professor Ryszard Horodecki receives the Prize of the Physics Committee of the Polish Academy of Sciences

2019-12-05

Professor Ryszard Horodecki, a correspondent member of the Polish Academy of Sciences (PAN) from the International Center for Theory of Quantum Technologies of the University of Gdańsk becomes a laureate of the Prize of the Physics Committee of the Polish Academy of Sciences. The prize was awarded for outstanding contribution to the theory of quantum computing and the development of this field. A team of scientists led by Prof. Horodecki developed an effective, economic method of detecting a new resource called entanglement, and discovered the so-called States with associated entanglement - black holes in quantum information, and also made a significant contribution to the field of quantum channel theory and quantum information processing. Professor Horodecki is a co-creator of the avant-garde field of science, which is quantum computing. Together with his sons Paweł, Michał and Karol and in cooperation with Prof. Robert Alicki and Prof. Marek Żukowski created a quantum computer science center in Gdańsk, which became a famous global research center in this field.

Catholic University of Lublin to hold Peruvian Day

2019-12-06

The Department of the Spanish World, Politics and International Relations of the Catholic University of Lublin (KUL), the Spanish-Polish Club at KUL, the Honorary Consul of Peru in Lublin and the Mediterranean High School in Lublin are inviting participants to „Peruvian Day”, which will take place on December 12, 2019 at the Transfer Center Knowledge in Lublin. The event will start with the speech of Alberto Salas Barahon, Peru's ambassador to Poland. Then there will be delivered lectures on Peru, Polish-Peruvian relations and Spanish language. KUL Hispanic students will tell guests about Spanish in America and will present «Peruvian ABC». Dr Maciej Karkut from the Department of the Spanish

World will share «memories of the transatlantic expedition». Father Walter Corsini will give a lecture entitled «Missionary from Europe among Peruvian Indians.» The event will end with a competition about Peru for secondary school students.

University of Warsaw inaugurated program Cátedra México

2019-12-06

The „Cátedra México” program was inaugurated by the University of Warsaw (UW). This is a series of lectures given by Mexican scientists. This year the lectures was delivered by physicist Dr Mauro Napsuciale Mendivil. This year's guest, Dr Mauro Napsuciale Mendivil, is the Dean of the Faculty of Physics at the University of Guanajuato. During the inauguration of the series he gave a lecture entitled «Dark Matter: Facts And Myths». Also, Alejandro Negrín, Mexico's ambassador to Poland, took part in the meeting. The program „Cátedra México” includes lectures for students. The multidisciplinary program is also an opportunity for cooperation between Polish and Mexican scientists representing humanities, social sciences, natural and exact sciences. The program is implemented in cooperation with the Ministry of Foreign Affairs of Mexico.

Foundation for Polish Science grant Awards 2019

2019-12-06

The Foundation for Polish Science (FNP) for the 28th time granted its Awards, recognized as the most important scientific distinction in Poland to Polish scholars. During the gala ceremony at the Royal Castle in Warsaw, the FNP Awards were received by three eminent professors - Marcin Drąg from the Chemical Faculty of the Wrocław University of Science and Technology, Andrzej Kossakowski from the Institute of Physics at the Nicolaus Copernicus University in Toruń and Andrzej Wiśniewski from the Faculty of Psychology and Cognitive Science. -I cordially congratulate the professors receiving these extremely honorable awards. I would also like to congratulate the Foundation for Polish Science for disseminating the science in Poland and raising the

banner of scientific excellence. I want to say that my activity for the past four years as a minister was conceived as an attempt to create a systemic framework to support the approach to science that FNP represents from the very beginning - said Deputy Prime Minister and Minister of Science and Higher Education, Dr Jarosław Gowin during the ceremony. The Foundation's prizes have been awarded since 1992 for outstanding scientific achievements and discoveries in four areas: life and earth sciences (this year the prize has not been awarded), chemical and materials sciences, mathematical, physical and engineering sciences as well as humanities and social sciences.

Researchers of the Warsaw School of Economics implementing a project devoted to European Union assistance to Africa

2019-12-09

Dr Magdalena Proczek, Prof. Associate of the Warsaw School of Economics (SGH) and Ewa Osuch-Rak are implementing a three-year project (2019-2022) entitled „The Jean Monnet Module on The European Union Multidimensional Strategy for Tackling Africa's Challenges (EU4AFRI)” as part of Jean Monnet Erasmus Plus 2019 activity. The project is devoted to European Union development assistance for Africa, with particular emphasis on the role of other international organizations and Poland in these processes. As part of the module, the team will implement thematic classes, scientific seminars and workshops for students using the Design Thinking method. The project also includes a number of activities involving students and the academic community, including an annual competition for project-related infographic and a conference closing the project. Professor Proczek is a graduate of the Faculty of Foreign Trade at the Warsaw School of Economics, major in Foreign Trade Policy and Postgraduate Education Improvement at the Warsaw School of Economics. She is a research and didactic employee of SGH and the National School of Public Administration.

AGH University of Science and Technology to hold seminar „City and energy transformation”

2019-12-09

The AGH University of Science and Technology (AGH) in Krakow, on December 12, 2019, will hold the seminar „City and energy transformation”, which aims to familiarize participants with examples of good practices in the involvement of Polish cities in energy transformation and to develop recommendations for actions to facilitate the dissemination of the best solutions. In the first part of the seminar representatives of cities of various sizes and specificities will present their motivations and the way to engage in local energy initiatives. These modes of action will be compared with solutions adopted in Swedish cities. The second part of the event will include a discussion aimed at developing a set of recommendations for Polish cities interested in faster implementation of the energy transformation. The seminar is organized by members of a consortium implementing the project «Development of distributed energy in energy clusters (KlastER)» - AGH University of Science and Technology, Ministry of Energy (currently the Ministry of State Assets - consortium leader) and the National Center for Nuclear Research.

University of Lodz to hold „Saint Nicholas dictation”

2019-12-09

On December 9, the Linguistic Science Club of the Contemporary Polish Language Department of the University of Lodz (UŁ) and the „wKóło Języka” Research Club operating at the Department of the History of Polish Language of the University of Lodz will organize „Santa's Dictation”. Previous competitions for the correct Polish language gathered about 150 participants every year, who were writing texts read by well-known personalities: Tomasz Boruszcak, Tomasz Zimoch, Mirosław Henke, Paweł Śpiechowicz and Magdalena Michalak. This time, Radosław Popłonikowski, actor and film lector, will read the text. The dictation will take place on December 9 at

17:00 in hall A3 at the Faculty of Philology of the University of Lodz at ul. Pomorska 171/173 in Łódź.

Prof. Błędowski delivers a lecture “Old age has a future” at the University of Lodz

2019-12-10

The social dimension of old age, the new perspectives of the elderly people were the issues of the lecture by Prof. Piotr Błędowski, a Polish economist and gerontologist, who was a guest at the Faculty of Economics and Sociology of the University of Lodz (UŁ). Professor Błędowski talked about barriers and obstacles from that elderly people can suffer everyday life. -Older people no longer limit their aspirations, as they did in the 1980s. Their professional activity is increasing more and more. There are more and more benefits. I would not like to be a second-class citizen in my old age, but I want to have the same rights to benefits as others, provided that such benefits are available- emphasizes Prof. Błędowski. Professor Piotr Błędowski is a long-time chairman of the Main Board of the Polish Gerontological Society (PTG), and currently the chairman of the PTG Audit Committee and a member of the Labor and Social Policy Committee of the Polish Academy of Sciences.

University of Warmia and Mazury to hold seminar on strategic concepts of maritime security in Poland in Olsztyn

2019-12-10

The Institute of History and International Relations and the Department of Strategic Studies and Military Studies of the University of Warmia and Mazury (UWM) in Olsztyn are inviting participants on December 12 to a scientific seminar entitled „Strategic concepts of maritime security of the Republic of Poland”. The event will take place at 15.00 in the hall of the Faculty of Humanities at the UWM in Olsztyn. During the seminar, the organizers provided the following papers: Commander Prof. Andrzej Drzewiecki from the Naval Academy of Bohaterów Wes-

terplatte „Polish presence at sea. Questions about the future of the navy and maritime policy of the state”, Dr Grzegorz Kała - „Strategic thought and the future of Polish maritime policy and navy” and Bartłomiej Drzewiecki „Information war as a tool of influence on Polish maritime policy”.

Polish-Japanese Academy of Information Technology to launch exhibition of works by Japanese artists

2019-12-10

Until December 18 at the Medium Gallery at the Faculty of New Media Arts of the Polish-Japanese Academy of Information Technology (PJATK) participants can see an exhibition of works by Ryosaku Miyasaka and Eri Suenaga. Ryosaku Miyasaka and Eri Suenaga are contemporary middle-generation artists specializing in painting, and their work fits very well with modern trends in Japanese culture. Ryosaku Miyasaka, began his art education at the Faculty of Fine Arts of the University of Nihon in Japan. In 1972 he went to study at the California Institute of Arts (CalArts) in the USA. He has participated in many group and individual exhibitions in Los Angeles, New York, Hawaii, Tokyo and Nagano. The collection of his works can be viewed at the Chino City Museum of Art. Eri Suenaga graduated from the Tokyo University of Arts, the oldest and most prestigious art college in Japan, with a master's degree in oil painting.

General Assembly of the Polish Academy of Sciences to grant Scientific Awards

2019-12-10

During the 140th session of the General Assembly of the Polish Academy of Sciences (PAN) in Warsaw, the president of the Polish Academy of Sciences Prof. Jerzy Duszyński awarded five researchers for outstanding achievements in 2019. The scientific awards of the President of the Polish Academy of Sciences were granted to: Professor Janusz Reykowski, a correspondent member of the Polish Academy of Sciences for research achievements in the field of political psychology for his monograph „Disenchantment with democracy” published by Oxford University Press. Dr Tomasz Sulej, Prof. of Institute of Paleobiology of the Polish Academy of Sciences for the outstanding research of the Triassic mammal-like reptiles, published in the prestigious scientific journal Science. Professor Tadeusz Januszkiewicz, a correspondent member of the Polish Academy of Sciences for exceptional scientific results, in particular for the use of advanced methods of algebraic geometry allowing to obtain new information on classic issues, i.e. topology and theory of interpolation approximation. Professor Tomasz Kapitaniak, a correspondent member of the Polish Academy of Sciences for his contribution to the development of mechanics, especially through groundbreaking research on the synchronization of nonlinear systems and mechanisms of the formation of chimeric states. Professor Edmund Przegaliński, a real member of the Polish Academy of Sciences for research into the mechanisms of depression and addiction.

Physicist of the Nicolaus Copernicus University in Toruń receives the prize of the Polish Academy of Sciences

2019-12-10

Dr Eng. Mateusz Borkowski from the faculty of physics, astronomy and computer science at the Nicolaus Copernicus University in Toruń received the scientific award of the Polish Academy of Sciences (PAN). The

prize is awarded annually by the III PAS for significant scientific achievements in the field of physics. Dr Borkowski from the Institute of Physics received the award for „Theoretical proposal of the world's first optical molecular clock based on ultra-cold molecules in optical networks”. The article about creating such a clock was published in the prestigious journal Physical Review Letters in 2018. The clock would measure the position of molecular passages at an unprecedented level of accuracy - potentially below 1 Hz, which would allow for searching for new fundamental interactions or even detecting the presence of dark matter through slow oscillations of physical constants caused by it. More: <https://www.umk.pl/wiadomosci/?id=26458>

Anna Budzanowska: Poles want clean air

2019-12-10

Representatives of the world of science and international institutions working for environmental protection met at the Autonomous University of Madrid at the symposium Climate Law and Governance Day. The conference was attended by the director general of the Ministry of Science and Higher Education Dr Anna Budzanowska, presenting the perspectives of scientific policy in relation to climate challenges. Poland, as a country, has caught up with newest trends and the problem of climate change has become one of the most important policies of the new government. Poles want clean air, want to protect the environment and are willing to make commitments related to it - said Anna Budzanowska during the expert panel Climate Protection Problems and Policy Directions from a Post-COP24 Polish Perspective summarizing last year's Climate Law and Governance Day, which took place in Katowice. -There is no single recipe for climate neutrality. Different conditions of individual countries mean that we have to look for a path that will be optimal. Scientists make a very significant contribution in this area, because their researches set out directions for climate protection - emphasized Dr Budzanowska.

Students to apply for 10th Polish National Student-Inventor Competition

2019-12-11

Until January 25, 2020, students can apply for the 10th Polish Student-Inventor Competition. The competition is addressed to students, doctoral students and graduates who became the creators / co-creators of an invention or utility / industrial design protected by exclusive rights or submitted for protection at the Patent Office of the Republic of Poland or the relevant industrial property office abroad. Inventions and utility models which were created as part of international cooperation, whose co-authors are students of foreign universities, may also be submitted to the competition. Five winners of main prizes will take part in the 48th International Exhibition of Inventions in Geneva. The organizer will finance the costs of the exhibition stand and the travel and stay of the winners in Geneva. In addition, the winners of the Competition will present their solutions during the International Warsaw Invention Show IWIS 2020.

Groundbreaking discovery of Toruń astronomers

2019-12-11

Astronomers led by Dr Gracjan Maciejewski, Prof. of Nicolaus Copernicus University from the Institute of Astronomy of Toruń University observed tides on the star WASP-12, which is hundreds of light-years away from Solar system, caused by a massive planet orbiting it. Discovered 12 years ago, the WASP-12 system consists of a star slightly hotter than the Sun and a planet almost twice as large as Jupiter. The planet orbits the star in a very tight orbit, with just over 26 hours for full turn. - Three years ago I discovered that the planet is gradually falling on the star. All indications are that the tides that the planet evokes on the star are responsible for this. It turned out that these tidal waves are so strong that we are able to detect their movement and determine their height - says Prof. Maciejewski. The observations were made with a world-class HARPS-N instrument installed on a 3.5 m Galileo Telescope located in the Canary Islands. More: <https://www.umk.pl/consciousosci/?id=26472>

PGE Capital Group to launch hackathon Energy HackOn in Krakow

2019-12-11

PGE Energia Ciepła and PGE Nowa Energia, companies of the PGE Capital Group are organizing hackathon Energy HackOn „Optimization of heat and electricity production”. The event will take place on December 13-14, 2019 at the Energy Center of the AGH University of Science and Technology in Kraków. The participants' task will be to create a prototype of the application used to optimize coverage of heat demand. The data provided by the Polish Energy Group (PGE) will be used for programming tasks. Participants can apply as teams of 2-3 persons. Awards for the two best projects amount 18 thousand PLN. The winners will also have an opportunity to cooperate with PGE experts and even implement their solution. Hackathon Energy HackOn is supported by the Rector of AGH Prof. Eng. Tadeusz Słomka. The scientific partner is the Department of Energy Systems and Environmental Protection Devices at the Faculty of Mechanical Engineering and Robotics AGH.

Professor Janusz Kacprzyk becomes a member of the Royal Flemish Academy of Belgium of Science and Art

2019-12-11

Professor Janusz Kacprzyk was elected a foreign member (in the class of technical sciences) of the Royal Flemish Academy of Belgium of Science and Art (KVAB). He is the only Pole in this Academy. Professor Janusz Kacprzyk is a member of the Polish Academy of Sciences (PAN) and an international class scientist who specializes in artificial intelligence tools. His interests relate to fuzzy logic and its application in databases, decision support systems, fuzzy methods of information representation and processing, control and decision making in conditions of uncertainty and lack of precision, evolutionary programming and neural networks.

Nicolaus Copernicus University in Toruń to promote the Polish language in Kaliningrad

2019-12-11

Dr Małgorzata Gębka-Wolak, Prof. of The Nicolaus Copernicus University in Toruń received a grant from the National Agency for Academic Exchange in the competition „Promotion of the Polish language” for the implementation of the project „Polish Language Days in Kaliningrad. Art and philosophy”. The project aims to promote the Polish language and knowledge of Polish history and culture in the Russian-speaking environment by organizing popularizing events taking place during the week in Kaliningrad, which will thematically refer to the artistic and scientific heritage of two patrons of the year 2020 appointed by the Sejm of the Republic of Poland: the painter Teodor Axentowicz and philosopher Roman Ingarden. The result of the program will be to deepen knowledge of Polish culture and encourage students to study Polish at the Nicolaus Copernicus University. The project will contribute to developing a positive image of Poland in a neighboring country and will support the quality of teaching Polish at a partner university. More: <https://www.umk.pl/consciousosci/?id=26468>

Collegium Civitas receives certificate Journey to Changemaker

2019-12-13

Collegium Civitas in Warsaw received the prestigious Journey to Changemaker certificate awarded by the international Ashoka organization. In this way, the university joined the largest network of „enterprising and socially engaged” universities, bringing together over 65 scientific and educational units from around the world. The Journey to Changemaker certificate is addressed to universities focused on global education, open to synergistic cooperation with other members of the network and working to ensure the highest educational standards, which in turn are reflected in the practical achievements of their graduates. -The positive result of the certi-

fication process has allowed us to join the group of universities from around the world associated with the #MillionsofChangemakers idea. We want to show our students the opportunities and areas that can influence positive changes in the world, and equip them with the necessary competences in this area, i.e. changemakers' skills. „- said Prof. Małgorzata Baran, Vice Rector for Strategic Development of Collegium Civitas.

Chinese minister of education awards the rector of the Jagiellonian University

2019-12-13

The Minister of Education of the People's Republic of China Tian Xuejun honored the rector of the Jagiellonian University (UJ) in Krakow Prof. Wojciech Nowak with the special award for his contribution to the creation and continuous support of the Jagiellonian University Chinese Language and Culture Center „the Confucius Institute in Krakow”. The ceremony took place during the International Chinese Language Education Conference. This year's conference was attended by representatives of all world Confucius Institutes and took place in Changsha - the capital of Hunan province. The Rector of the Jagiellonian University represented the oldest Polish university at the meeting of the Program Council of Confucius Institutes and as the only member of this body he was asked to deliver the prizes to representatives of outstanding units.

PhD student of the University of Wrocław becomes a laureate of the II International Geopolitical Olympiad

2019-12-13

Aleksy Borówka, a PhD student of the Institute of International Studies of the University of Wrocław, took second place in the final of the Second International Geopolitical Olympiad organized by the Polish Geopolitical Society (PTG). In this year's competition representatives of five countries Poland, Great Britain, Hungary, Ukraine and Germany advanced to the finals and the best of them were awarded the Geopolitics and Geostrategy Badges. Aleksy Borówka received the Golden Badge and the title of Olympiad Laureate. He obtained 22 out of 30 points possible to get in three rounds of: written, oral, practical types of tasks. The International Geopolitical Olympiad is a PTG initiative addressed to young people interested in geopolitics - interdisciplinary field of knowledge including political science, geography, international relations, military sciences and national security.

Bielsko-Biała Academy to hold a conference 'Science-Innovations-Business'

2019-12-16

The Academy of Technology and Humanities in Bielsko-Biała is organizing the „Science-Innovations-Business” conference for the fourth time. It will take place on Monday, December 16. The event organizers emphasize, that this is a unique conference nationwide, because «on the one hand, it is a place to listen to lectures delivered by specialists, but also a place to exchange views and ideas between scientists and the business world.» One of the goals of the conference is to inspire local entrepreneurs and scientists to think about the development of innovation and increase the efficiency of implementing new technologies. One of the main points in the agenda will be speeches on research network activities and research funding on an international scale.

Cardinal Stefan Wyszyński University holds conference on ethics in public relations

2019-12-16

The Cardinal Stefan Wyszyński University (UKSW) in Warsaw on December 13, held the first conference „Ethics of public relations”. Researchers and industry experts discussed the ethics and standards of professional PR. The conference focused on the development of «Professional Public Relations Standards», and the participants discussed in detail the issues of ethical behavior and the importance of professionalism in the PR industry. In addition, they worked out a glossary of terms related to public relations. «Standards» have been developed by the Social Team of PR Experts. Professionalism and ethics are inextricably linked, especially in areas that affect human decisions, such as PR. We want to remind that public relations are to reconcile the interests of principals, the media and society groups, remain in line with ethical standards and refer to values- said experts.

University of Silesia researchers wins the competition for the best publication in the field of fuzzy logic

2019-12-16

Scientists from the University of Silesia won the EUSFLAT 2019 Best Student Paper Award of the European Society for Fuzzy Logic and Technology. The awarded publication is „Some Remarks on the Generalized Scheme of Reduction to Absurdity and Generalized Hypothetical Syllogism in Fuzzy Logic”. The prize was awarded to scientists of the Institute of Mathematics of the Silesian University: PhD student Katarzyna Miś, Dr Michał Baczyński, Prof. of University of Silesia and Dr Piotr Helbin. The EUSFLAT Association brings together scientists who deal with fuzzy logic topics in their research. One of the activities of this organization are scientific conferences organized every two years, during which the results of their analyzes are presented by scientists from many academic centers around

the world. The main topic of this year's conference was the theory and applications of computational intelligence, fuzzy systems, as well as so-called soft calculations. More: <https://us.edu.pl/publikacja-naukowcow-z-us-doceniona-podczas-konferencji-eusflat-2019/>

University of Silesia in Katowice receives Global Leadership Award

2019-12-16

The University of Silesia in Katowice won the Global Leadership Award by the Climate Law and Governance Initiative in recognition of the excellent organization of the Global Law Conference Climate Law and Governance Day 2018. The conference was held as part of last year's COP24 climate summit in Katowice. The award is an expression of appreciation for the university participating in international discussions on threats resulting from global climate change and commitment to activities related to ecology and legal protection of animals. It is also a form of appreciation of the institutions cooperating with the university constantly and supporting the organization of last year's Climate Law and Governance Day 2018 conference - the Supreme Bar Council, the District Bar Association, the GZM Metropolis, the Provincial Fund for Environmental Protection and Water Management in Katowice and Silesian Trams. More: <https://us.edu.pl/global-leadership-award-dla-unipitu-slaskiego/>

Students can apply for the INTERSTUDENT competition until January 7

2019-12-16

Until January 7, applications for the 10th INTERSTUDENT competition for the best foreign student in Poland can be submitted. The organizers want to select and reward those students who enriched the Polish academic environment. At present, over 80,000 foreigners are studying at Polish universities. The jury will select the best foreigners studying in public and private universities, in the undergraduate, graduate and doctoral studies. The competition is organized by the Perspektywy Educational Foundation. The condition of participation in the competition is activity in the local student community, in cultural, social, environmental, sports and good academic performance, as well as participation in interesting research projects. Candidates can be nominated by their professors, tutors, university authorities, foreign cooperation offices, student governments, as well as other students.

Scientist of the Medical University of Wrocław awarded the Iuvenis Wratislaviae 2019 prize

2019-12-16

Dr Błażej Misiak from the Medical University of Wrocław received the Iuvenis Wratislaviae 2019 Award funded by the Wrocław Branch of the Polish Academy of Sciences for outstanding scientific achievements in the field of life, exact and technical sciences. The prize is awarded once a year and is intended for scientists under 37 years of age who hold a PhD title and work permanently in the Lower Silesia region. Dr Błażej Misiak received it for research on the clinical and genetic determinants of discrete metabolic disorders in the first episode of psychotic disorders in the circle of schizophrenia. The distinction is also awarded for achievements in the field of humanities, social sciences and arts. This year's laureate in this category was Dr Aleksandra Kubas-Kruk from the vocal department of the Music Academy in Wrocław.

Graduate of the Opole University becomes a laureate of the competition 'Rising Stars Lawyers - leaders of tomorrow 2019'

2019-12-17

Dr Piotr Łebek, a graduate of the University of Opole, won a special prize in the competition „Rising Stars Lawyers - Leaders of Tomorrow 2019” organized for the eighth time by Wolters Kluwer and Dzienik Gazeta Prawna. It selects young lawyers who implement the highest standards of legal services, through their knowledge, entrepreneurship and social attitude. The competition criteria included creativity and the ability to sense new market trends, knowledge, the ability to combine a professional career with academic work, pro bono or social activity, as well as other successes of the candidate. The laureate works in one of Opole law firms. He is the initiator of the largest nationwide anti-doping campaign „Gramy Fair” and combines extensive knowledge of sport law with knowledge in the field of finance and management in sport. Piotr Łebek successfully combines practice with science and sport. Warsaw School of Economics discusses about actions to eliminate discrimination against women

2019-12-18

On December 18, 2019, the Warsaw School of Economics (SGH) in Warsaw together with the Warsaw local administration organized a conference to eliminate all forms of discrimination against women. The conference was opened by the mayor of Warsaw Rafał Trzaskowski, Vice-Rector for cooperation with the SGH environment Prof. Hanna Godlewska-Majkowska and the Ombudsman Adam Bodnar. The discussion at the conference focused on three thematic areas: research results on leveling the wage gap in Poland and worldwide; good practices in the

field of equalizing opportunities implemented in companies associated with the SGH Partner Club, i.e. Ernst & Young, Bank Millennium, Mastercard Europe, Santander; women's participation in public life - achievements and challenges in the assessment of the Ombudsman's Office.

Deputy Prime Minister Gowin: Fight against smog over political divisions

2019-12-18

-It is high time that we began to consistently, over departmental and party divisions, to fight smog that damages the health of Poles, which causes deaths of several dozen thousand people a year and is a source of many financial losses - said Deputy Prime Minister and Head of the Ministry of Science Jarosław Gowin after the meeting devoted to the fight with smog in the Krakow agglomeration. Representatives of the government, local government and the National Fund for Environmental Protection and Water Management have debated on comprehensive measures to combat smog in Lesser Poland. Individual ministries and agencies offer various anti-smog programs. One of the main achievements of the Polish government in reducing low emissions, Minister of Development Jadwiga Emilewicz mentioned the regulation on the quality of heating boilers, the Act and the regulation on the quality of solid fuels and the so-called thermo-modernization act, which will allow the start of thermo-modernization pilotage program in the most smog polluted cities.

University of Opole signs contract with the European FORTHEM consortium

2019-12-18

The University of Opole has signed a partnership agreement with the European FORTHEM consortium. It includes Johannes Gutenberg Universität Mainz (Germany), Université de Bourgogne (France), Jyväskylän yliopisto (Finland), Università degli Studi di Palermo (Italy), Latvijas Universitāte (Latvia), Universitat de València (Spain). - Belonging to the European University network, participation in the FORTHEM consortium is a great job, but also a great prestige for our university, a prestige that obliges. I am glad that our employees from the Faculty of Political Science and Social Communication managed to obtain such an important and prestigious grant - says the rector of the Opole University, Prof. Marek Masnyk. Project activities under the consortium include students and employees mobility, as well as co-creation with partners of a consortium of seven multidisciplinary research laboratories (FORTHEM Labs), in which students, employees and experts are main participants. Polish scientists discovered and tested an unknown effector protein

2019-12-19

Researchers from the Warsaw University of Life Sciences (SGGW) in cooperation with scientists from the University of Texas Southwestern Medical Center in Dallas in the USA and the Institute of Biochemistry and Biophysics of the Polish Academy of Sciences have discovered and tested an unknown effector protein. They published the article about the achievement in the journal Cell. It all started about 4 years ago, when Marcin Gradowski with Dr Krzysztof Pawłowski from the Department of Biochemistry and Microbiology of the Institute of Biology, Warsaw University of Life Sciences searched for effector kinases among „Gammaproteobacteria”. He then discovered the effector protein HopBF1

from „Pseudomonas syringae” (plant pathogen), which was slightly similar to known kinases. Dr Krzysztof Pawłowski, the tutor of M. Gradowski's master's thesis, showed the discovered protein to Dr Vincent Tagliabracci from the University of Texas Southwestern Medical. They with Prof. Jacek Henning from the Institute of Biochemistry and Biophysics of the Polish Academy of Sciences developed a protein research project.

One of the greatest Polish climbers visits the Maria Curie Skłodowska University

2019-12-19

The Polish Geographical Society, Lublin Branch, Faculty of Earth Sciences and Spatial Management, Maria Curie Skłodowska University (UMCS) in Lublin and the High Mountain Club Lublin are inviting participants to a meeting with Leszek Cichy – a climber and mountaineer. Leszek Cichy has been climbing continuously since 1969. On February 17, 1980, together with Krzysztof Wielicki, as the first climbers conquered Mount Everest in the winter. Cichy was also a participant in the first winter expedition to K2, and the first Pole who won the Crown of the Earth. The meeting is related to the 40th anniversary of the first ever winter climb Mount Everest. During the event, he will promote the last book by Leszek Cichy, Marek Kamiński and Julia Hameria, entitled „Three poles. Touch the impossible. „ The event will take place on December 19, 2019 at 17.15 in the assembly hall of the Faculty of Earth Sciences and Spatial Management of the Maria Curie-Skłodowska University.

Polish-Chinese Art & Design Competition 2020 „Mind & Senses in Art & Design”

2019-12-19

The Silesian University of Technology and the University of Silesia together with Chinese universities Beijing University of Technology and Chongqing Jiaotong University are inviting students to participate in the prestigious Polish-Chinese artistic and design competition Art & Design Competition 2020

„Mind & Senses in Art & Design“. The theme of the competition is „Individual interpretations and references to the tradition and modernity of everyday life of the Consortium’s partner countries, which can become a contribution to mutual knowledge and bringing cultures closer together and their promotion.“ Its participants may be students and staff of universities associated in the Chinese-Polish University Consortium. The organizer of the competition is the architecture department of the Silesian University of Technology. The deadline for submitting applications is 30 January 2020.

Zielona Góra Public Library to launch „Lubuski Science Laurel” competition

2019-12-19

Provincial and Municipal Public Library in Zielona Góra is inviting participants to the Lubuski Science Laurel competition. The purpose of the competition is to promote scientific and popular science books dealing with issues related to the Lubuskie province - in the literary, historical, social and natural dimension. The formal condition urges that the entry submitted to the Lubuski Science Laurel has a full scientific workshop (footnotes, bibliography and reviews). Works that do not meet all of the above requirements may be nominated in the category for the Best Popular Science Book. The jury of the competition will award the Silver Pen together with a cash prize for the laureate of the Lubuski Science Laurel and the Small Silver Pen for the Best Popular Science Book. The jury may also award a diploma for editorial qualities to Lubuskie region publishers of the books submitted for the competition. The deadline for receiving applications is 17 January 2020.

Polish scientists to solve the climate crisis

2019-12-20

The Scientific Council of the Institute of Nature Conservation of the Polish Academy of Sciences (PAN) in Krakow called for actions based on scientific knowledge to reduce the global climate and ecological crisis and adapt to the effects of these changes. Further neglecting the crisis and maintaining current trends in greenhouse gas emissions will result in an increase in the Earth's average temperature by 2050 by 2-4 ° C above pre-industrial levels. Such a significant increase in temperature and further unrestrained exploitation of the Earth's resources will have catastrophic consequences for biodiversity and civilization, as aptly summarized Robert Watson (IPBES President): «the foundations of our economies, livelihoods, food security, health and quality of life around the world will be undermined». The researchers expressed support for the postulates of the Youth Climate Strike of September 26, 2019, the postulates adopted by the participants of the conference «It started from the Tatra Mountains' of November 23, 2019 and the initiative "World Scientists' Warning of a Climate Emergency". Graduate of the Naval Academy in Gdynia receives Award of the Polish Forensic Society

2019-12-20

A graduate of the Naval Academy in Gdynia, Emilia Szymczak, won the 20th competition for the Work of the Year in the Field of Forensics. The awarded BA thesis: «Methods of identifying people and biometric security as tools to ensure security in Poland» was written in the 2018/2019 academic year at the department of command and naval operations of the Gdynia university. The competition is organized by the Polish Forensic Society. The jury of the competition was guided in particular by their scientific level, opinions of reviewers and promoters, the topicality and novelty of the subject matter presented,

as well as their particular significance for forensic practice. Works containing the empirical part and conclusions resulting from the conducted research were highly rated.

Foundation for Polish Science launches Council for the Program of International Research Agendas

2019-12-23

The Foundation for Polish Science has launched the International Research Agendas Program Council (IRA). The world-class scientists - foreign experts and directors of MAB units and representatives of FNP met at the headquarters of the Foundation for Polish Science (FNP). The IRA Council is a body appointed by the Foundation for Polish Science, aimed at ensuring the quality of implementation of the International Research Agendas project, financed by EU structural funds under the Intelligent Development Operational Program. The Council recommends, consults and issues recommendations to the FNP Board in relation to the IRA units and the program itself, and controls the maintenance of standards conducive to the scientific excellence of the IRA program. The Board reports to the FNP Board and its meetings takes place once a year. The chairman of the Council was unanimously elected Prof. Andrei Lupas, director of the Protein Evolution Department at the Max Planck Institute for Developmental Biology.

Authors of the best scientific papers on intellectual property receive prizes

2019-12-23

The Patent Office of the Republic of Poland (UP RP) has awarded the authors of the best scientific papers on intellectual property for the 17th time. Annually contested scientific work contests are of the ever-growing interest of creative environments and contribute to the consolidation and development of a culture of intellectual property protection in Poland. This sphere requires the widest and systematic dissemination of knowledge using various forms

of communication addressed to many groups of recipients. In the «Doctoral dissertation» category, the first prize was awarded to Marcin Jan Stępień (University of Szczecin) for his doctoral dissertation «Copyright property rights in Polish and Russian law. Comparative law analysis. « In the «Master's thesis» category, the 1st prize was received by Aleksandra Piechota (Jagiellonian University in Kraków) for the master's thesis «Bestselling clause».

Merry Christmas and Happy New Year!

2019-12-24

One of the most important holidays in Poland - Christmas is celebrated on the 25th of December. Just like in most other European countries, in Poland Christmas trees, streets and houses get decorated for the occasion. This is supposed to be done on Christmas Eve, which has a special meaning for Catholics: December 24 is the day of Adam and Eve, and the fir tree decorated with baubles symbolizes the fruit tree of paradise. Gifts are also usually given on December 24th, Christmas Eve. It is believed that St. Nicholas (Santa Claus) brings gifts to children, however the character is portrayed differently depending on the region: in Western Poland it is Gwazdor (Polish Starman), in Lesser Poland it is an angel, in southwestern Poland it is a little star, in Silesia it is Baby Jesus. Nowadays, Christmas is more a family event and it has far less religious character. On December 24th, relatives and friends gather for a joint meal, which precedes the ritual of breaking the wafers. Christmas wafer is a thin rectangular unleavened bread that resembles a waffle. The practice of family members breaking off small pieces from each other's wafers symbolizes unity and reconciliation, and also reminds Christians of the sacrament of the Eucharist. The tradition is so important that relatives who cannot attend the party are often sent a piece by mail. By breaking and biting the wafer, relatives and friends wish each other health, happiness and success. On that note, we wish you, our readers, all the very best.

University of Warsaw to launch Biologists' Night 2020

2019-12-27

Global environmental changes are the topic of the next Night of Biologists at the University of Warsaw (UW). The event is organized by the Faculty of Biology and the Center for Biological and Chemical Sciences. Lectures, workshops, shows and other attractions will take place on January 10, 2020. Biologists' Night is a annual popular science event addressed to all nature enthusiasts - adults, youth and children. The idea for his organization appeared at the University of Adam Mickiewicz University in Poznan. Currently, it takes place in thirty-four scientific centers throughout the country. The Biologists' Night at the University of Warsaw is prepared by the Faculty of Biology and the Center for Biological and Chemical Sciences. The ninth such event will take place on January 10 at 17.00-23.30. The program includes many lectures, workshops, demonstrations and other attractions on one topic: global environmental changes.

National Agency for Academic Exchange completed Bekker Program

2019-12-27

The National Agency for Academic Exchange (NAWA) informs that the second call for proposals within the Bekker Program has been completed. Scholarships covering the costs of staying in renowned research centers abroad will be received by 126 best applicants. The applications selected for funding include the researchers in natural sciences (43), social sciences (29) and engineering and technical sciences (28). 13 scientists will implement projects in the medical sciences and also 13 in the humanities. The most popular destinations are the United States (29), United Kingdom (16), Germany (15), France (7) and the Netherlands (7). The aim of the Program is to support scientists and academic teachers employed in Polish universities and research units to master their scientific results and undergo a post-doctoral internship, conduct scientific research or obtain materials for scientific work in renowned foreign centers on a scholarship

basis. More: <https://nawa.gov.pl/images/users/629/Lista-rankingowa-Bekker-2019.pdf>

Collegium Civitas to offer transcripts in the competition for secondary school graduates

2019-12-30

Concilium Civitas is inviting this year's secondary school graduates to participate in the contest, where they can write and submit an essay, article or reportage on the topic 'I, Poland, Europe, World - 2040'. The prizes include transcripts for a selected field of study at Collegium Civitas in Warsaw. Concilium Civitas is a group of Polish social science professors of Collegium Civitas also working at leading foreign universities. They decided to find out what future is expected by young Poles and announced a competition for an essay, article or report on the subject «I, Poland, Europe, World - 2040». The deadline for submitting competition entries is 15 January 2020. The competition is organized by the Collegium Civitas Foundation and the Polish Teachers Association.

Three centers of scientific excellence Dioscuri established in Warsaw

2019-12-30

Scientists Paweł Dłotko, Gracjan Michlewski and Bartłomiej Waclaw will head new centers of scientific excellence in Warsaw. They were selected from 24 world scientists in the second Dioscuri competition organized jointly by the National Science Center (NCN) and the German Max Planck Society. Selected leaders of Dioscuri centers will start creating their research groups in the second half of 2020. Paweł Dłotko will found the Dioscuri Center in Topological Data Analysis at the Mathematical Institute of the Polish Academy of Sciences (PAN). The second Dioscuri Center will be led by Gracjan Michlewski, a RNA biologist. This Dioscuri Center for RNA-Protein Interactions in Human Health and Disease will be established at the International Institute of Molecular and Cell Biology in Warsaw. Bartłomiej Waclaw,

Photo by Anthony from Pexels

a theoretical physicist by profession, will set up the Dioscuri Center in Physics and Bacterial Chemistry at the Institute of Physical Chemistry of the Polish Academy of Sciences. More: <https://ncn.gov.pl/dioscuri/dioscuri3/>

University of Lodz to launch Talking China and Talking Japan programs

2019-12-30

The Asian Affairs Center of the University of Lodz started a series of short discussions in English on China and Japan entitled Talking China and Talking Japan. Professor Mierzejewski will talk about China and Dr Marcin Socha will introduce Japanese issues. In Talking China broadcasts the participants will discuss the issues of the development of local China and its participation in China's foreign policy. In Talking Japan broadcasts, the participants will discuss Japan's energy policy and the meanders of Japanese foreign policy. The University of Asia (UŁ) Center is the first university think-tank in Poland to monitor and analyze political and economic changes in East and Southeast Asia. Discussions will be published on average once a month on the Soundcloud platform: <https://soundcloud.com/unipitet-lodzki> in English.

Warsaw Cardinal Stefan Wyszyński University to hold the scientific conference 'Modern technologies in law. Theory and practice'

2019-12-30

The Scientific Club of Criminal Procedural Law of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw is organizing the National Scientific Conference „Modern technologies in law. Theory and practice”. The event will take place on January 8, 2020 at the Auditorium Maximum UKSW. The aim of the conference is to analyze legal regulations regarding new technologies. Recently, a significant increase in the use of new technologies and their impact on human life should be observed. New technologies will affect socio-economic development. They can be used in many areas of life. Their introduction creates many opportunities and allows people to increase their efficiency and availability of services. New technologies can also be a threat. The intensity of introduced changes and technological progress mean that the legislator is currently facing normative challenges in the aspect of new technologies. The conference proceedings will be an opportunity to reflect on the prospect of further development of legal regulations in this area.

Scientists of the University of Szczecin receive Minister's Award

2019-12-30

Scientists from the University of Szczecin received the award of the Minister of Science and Higher Education for conducting international research and a scientific monograph entitled „The Sustainable Marketing Concept in European SMEs: Insights from the Food & Drink Industry”. The monograph published in Great Britain was recognized as an outstanding and innovative scientific achievement. It is the result of a research project implemented thanks to winning the «Harmony» competition, organized and financed by the National Science Center. The research concerned the concept of sustainable marketing and its application on selected European markets,

diversified in terms of socio-economic development. They were implemented jointly with Leeds Beckett University (United Kingdom), University of Zagreb (Croatia), Ural Federal University (Russia), Eberswalde University for Sustainable Development (Germany) and University of Leon (Spain).

Researcher of the University of Life Sciences in Poznań received the Michał Oczapowski Medal

2019-12-31

Professor Monika Kozłowska from the University of Life Sciences in Poznań received the medal of Michał Oczapowski - the highest distinction of the 2nd Department of Biological and Agricultural Sciences of the Polish Academy of Sciences. The reason for awarding Prof. Kozłowska were her achievements in the development of plant physiology at the home university, participation in the promotion of young scientific staff, in promotion proceedings and in the development of design research, as well as scientific, didactic and organizational achievements. Her expert input and activity in science and higher education institutions were also taken into account. Medal of Oczapowski is awarded to commemorate the precursor of agricultural sciences. It is awarded to individuals and institutions for outstanding contributions to the development of agricultural and applied biological sciences in Poland. In addition to Prof. Kozłowska also Prof. Bożena Patkowska-Sokoła from the University of Life Sciences in Wrocław and Prof. Jerzy Lipiec from the Institute of Agrophysics of the Polish Academy of Sciences received the medals.

Białystok University of Technology to hold the conference on the internationalization of innovation

2019-12-31

Białystok University of Technology (PB) will host the international event called „More Entrepreneurial Universities, International Staff Training Week”,

which will take place on January 15-17, 2020. The conference, organized by the PB Information Technology Department and the PB International Cooperation Office, is addressed to all representatives of the academic and business community who are interested in developing an innovation ecosystem based on internationalization. Participants will exchange experiences and best practices regarding the tools for developing international academic entrepreneurship and discuss strategies for building a network of innovation ecosystem internationalization of innovation. More: <https://meu.wi.pb.edu.pl/>

Professor Piotr Mickiewicz wins the Polish Geopolitical Society award

2019-12-31

Professor Piotr Mickiewicz, political scientist and historian of recent history, working for the Lower Silesian University was awarded the Polish Geopolitical Society prize for scientific achievements in the field of geopolitics. The Oscar Żebrowski's Award was presented during the congress of the Polish Geopolitical Society Prof. Mickiewicz received it being a member of this scientific society. The laureate's main research interests include the issues of using the military potential in the politics of states and the political and military impact of states and non-state actors on maritime waters. Professor Mickiewicz is a graduate of the Naval Academy and the University of Gdańsk. In the years 1990–1997 he was an officer of the School Ship Group, and then an academic lecturer. He is the editor-in-chief of the „Yearbook of International Security” and chairman of the regional committee of the Olympics Knowledge about Poland and the Contemporary World.
