University of Life Sciences in Lublin signed a cooperation agreement with the National Research Institute for the Control of Medicines and Feed Additives in Lviv. Its most important point is tightening of scientific cooperation and the mobility of academic staff. The document was signed by Prof. Zygmunt Litwińczuk, Rector of the University of Life Sciences in Lublin and Prof. Igor Kotsiumbas, director of the Ukrainian National Research Institute. The agreement on behalf of the Lublin university will be coordinated by Faculty of Veterinary Medicine, Faculty of Biology, Animal Sciences and Bioeconomy, and Faculty of Production Engineering.

School of French Law at the University of Gdańsk

2018-09-18

Recruitment is continued for the School of French Law at the University of Gdańsk. The course is addressed to all who want to deepen their knowledge of French and European law. Applications will be accepted until the end of September. The School of French Law course is addressed to students or graduates of higher education (in particular law, administration, economics, Roman philology and history), PhD students, apprentices and practitioners with a command of French, interested in learning about the French and European law system and wishing to study French legal terminology. Classes will be taught in French by lecturers of the University of Gdańsk and the University of Toulouse Capitole 1. School participants who successfully complete the course will receive a university diploma: «Certificat d'introduction au droit français et européen».

Students from Poznań win the European GOMAC 2018

2018-09-18

Students from the Adam Mickiewicz University and the University of Economics in Poznań took the first place in Europe in the international competition Global Online Marketing Academic Challenge (GOMAC) 2018. Mateusz Halicki, Dawid Śliwiński, Sebastian Jastrzębski and Aleksander Kempa prepared and conducted a 3-week marketing campaign integrating the Google Ads (AdWords), Facebook and LinkedIn platforms. The campaign was conducted for Ogarniamprad.pl - the first dedicated auction platform in Poland, allowing real-time bidding for purchase and sale of energy as part of group reverse auctions. The competition is organized by the international community of Global Online Marketing Academics, associating academic teachers specializing in digital marketing. After the victory in Poznań, Poznań students are still fighting for the title of Global Winner GOMAC 2018.

University of Opole signs a contract with Changchun University

2018-09-18

The University of Opole will cooperate with the Chinese Changchun University. The signed agreement assumes cooperation in the field of education, science, technology, culture, exchange of teachers and students. Experts and professors from both sides will participate in the demonstration and design of educational cooperation programs, and will create international cooperation programs. They plan to exchange educational and didactic materials, as well as delegate teachers in order to conduct didactic work. Universities will exchange students and provide training for foreign students on the basis of an agreed program, send students from their universities abroad to a partner university in order to learn a language, and conduct vocational studies or internships. The agreement also assumes the exchange of artistic teams and the joint organization of art exhibitions and cultural events.

University of Silesia invites pupils to the program First Steps in Science

2018-09-18

The Silesian Intercollegiate Center for Education and Interdisciplinary Research in Chorzów will implement the „First Steps in Science” tutoring program aimed at pupils providing the development of their interests and supervision of academic teachers. The recruitment will last until September 30. The program includes: the implementation of a scientific project under tutor's supervision, participation in workshops conducted by scientific and didactic staff as well as interdisciplinary scientific seminars. Young scientists will also be able to participate in selected lectures in mathematics, physics and computer science for first-year students. Participants will receive record books from the University of Silesia, they will use university's notebooks to implement a research project or during workshop classes. The project is co-financed by the Ministry of National Education under the „Program supporting the development of highly talented students”. More: www.smcebi.us.edu.pl

European School of Magnetism is underway in Krakow

2018-09-19

The European School of Magnetism will last until September 28, 2018. The event takes place at the Academic Center for Materials and Nanotechnology of the AGH University of Science and Technology in Krakow. 120 young scientists and 16 lecturers from 27 countries are participating in the European School of Magnetism. The main purpose of the event is providing specialized education based on Polish and European outstanding scientists and the newest research infrastructure. This year's theme of European School of Magnetism is «Magnetism by Light» - researching and controlling the phenomenon of magnetism by «light», i. e. by electromagnetic radiation in a very wide range of frequencies (from radio to gamma radiation). Draft regulation on the new method of distribution of funds for the university consulted

2018-09-19

A draft regulation of the Minister of Science and Higher Education on the new financial algorithm was submitted for consultation. The most important assumptions of the project are to adjust the algorithm to differentiated university missions, increase the stability of funding, and provide higher incentives to improve the quality of education. As emphasizes Jarosław Gowin, Deputy Prime Minister and the Minister of Science «a new way of distributing funds is proof that the promise to increase academic freedom in the Constitution for Science is just realized. This is another step towards the real autonomy of Polish universities.» The change in the method of dividing public money is to ensure stabilization of the budgets of individual universities. The draft regulation proposes three algorithms: for academic institutions, for vocational schools, and from 2020 for academic institutions that will be laureates of the competition «Initiatives of excellence - research universities». More: <http://konstytucjadlanauki.gov.pl/projekt-nowego-algorytmu-napisany-ze-srodowiskiem-akademickim-od-dzisiaj-w-konsultacjach>

Maritime University of Gdynia receives European Commission Certificate

2018-09-19

The Maritime University of Gdynia received the „Logo of HR Excellence in Research” certificate awarded by the European Commission to institutions that implement and apply the principles of the „European Charter for Researchers” and the „Code of Conduct for the Recruitment of Researchers”. Granting the HR Logo certificate is one of the activities of the European Commission performed within the framework of the Human Resources Strategy for Researchers aimed at increasing the attractiveness of working conditions of researchers in the EU, as well as standardizing procedures related to conducting scientific research. The granting of the

certificate is also aimed at confirming the institutions' readiness to apply and implement scientific projects on the national and international arena. The benefits of having the HR Excellence in Research include increasing the attractiveness of employment at the university, creating a friendly environment for scientific work and respecting transparent rules when recruiting employees. More: <http://www.umg.edu.pl/node/4564>

Cooperation between Gdansk University of Technology and Przechlewski Energy Cluster

2018-09-19

The Faculty of Electrical and Control Engineering of the Gdańsk University of Technology will cooperate with the Przechlewski Energy Cluster, one of three in the Pomeranian Voivodeship. The contract was signed in the Laboratory of Innovative Power Technologies and Integration of Renewable Energy Sources (LINTE ^ 2). Under the agreement signed, the Faculty of Electrical and Control Engineering became a partner of Przechlewski Energy Cluster, which was one of the first in Poland to receive the Pilot Energy Cluster Certificate awarded by the Ministry of Energy in 2018. The agreement provides that the parties will cooperate in solving technical and organizational problems that may occur in the realization of energy projects implemented by cluster participants. The cooperation will utilize the Faculty's technical and scientific potential - in particular, the research and implementation potential of the LINTE Laboratory ^ 2.

4th Days of Digital Accessibility in Katowice

2018-09-19

The University of Silesia invites participants from 26 to 28 September on the 4th Days of Digital Accessibility. The aim of the event is to promote and familiarize the subject of digital and social inclusion. The meeting will take place at the headquarters of the Regional Institute of Culture in Katowice. The theme of this year's event will be «Digital inclusion and accessibility to the world of culture and art». In the seminar, the participants will listen to lectures on standards of accessibility to the world of culture and art, the social dimension of digitization of cultural heritage, ways of accessing subtitles and accessibility of websites for people with disabilities. During the workshop, rules for creating available content on websites will be presented in accordance with the Web Content Accessibility Guidelines (WCAG) 2.0 recommended by the W3C Consortium. The participants will learn how to prepare the content of advertisements and events for people with disabilities in an accessible way. More: <http://www.unicat.us.edu.pl/>

National Academic Exchange Agency to launch Polish-Italian bilateral exchange program for scientists „CANALETTO”

2018-09-20

National Academic Exchange Agency (NAWA) has started call for applications for scientists under the bilateral exchange program between Poland and Italy „CANALETTO”. Applications for funding may be submitted by universities, scientific units of the Polish Academy of Sciences, research institutes and international scientific institutes operating in Poland. The aim of the program is to support the mobility of scientists carrying out research projects, agreed and conducted jointly by partners from Poland and Italy. Funding for projects is intended to cover the costs of travel and stays of researchers, excluding funding for the research itself, which must be guaranteed from other sources. The call covers exclusively the

following thematic areas: mathematics, physics, chemistry, space, agriculture, food and sustainable environment, nanotechnology and advanced materials, information and communication technologies, cultural heritage, medicine and health.

Scientific conference „Family - education - work in search of well-being”

2018-09-20

The Institute of Psychology of the Faculty of Educational Sciences of the University of Lodz organizes on 24-25 September 2018 a nationwide scientific conference „Family - education - work in the search for well-being”. The aim of the conference is to exchange research experiences concerning positive human functioning in the main spheres of its activity, that is in the family, education and work. Proposed topics include: Family and professional career - balancing or conflict of roles, The sense of well-being of career-oriented people, Women and men in family roles and professions related to education, Education at various stages of life and a sense of well-being and Inclusive education - the role of a parent, teacher and student. More: <http://www.rodzinaipraca2018.uni.lodz.pl/>

University of Rzeszów to launch Salon Maturzystów for graduates

2018-09-20

This year's Salon of Maturzystów (the club of graduates) will take place for the first time at the University of Rzeszów. All interested graduates are welcomed on September 24-25, 2018. They can participate in many events and exhibitions, workshops, inspirational lectures, expert advice from psychological and pedagogical clinics and employment offices, and professional predispositions research - informs Dr. Maciej Ulita, spokesman of the University of Rzeszów. During the event the graduates will be able to talk with representatives of various universities, learn everything about the directions and course of studies and employment prospects.

Science Festival in Warsaw

2018-09-20

From 21 to 30 September 2018, the Science Festival will take place in Warsaw. Established in 1996 at the initiative of the University of Warsaw, the Warsaw University of Technology and the Polish Academy of Sciences, the Science Festival in Warsaw was the first event of this type in Poland. Its main purpose is to provide knowledge about scientific achievements. The motto of the festival is: «Lack of investment in science is an investment in ignorance». The organizers prepared seven main debates, that focus on such issues as the 100th anniversary of Polish independence, artificial intelligence and climate. The University of Warsaw is the organizer of over 170 from 442 open lectures. More: <http://festiwalnauki.edu.pl/>

„Strategies in making decisions in conflict and cooperation situations” - a joint conference of three Universities of Technology

2018-09-20

Silesian, Wrocław and Gdansk Universities of technology invite participants to the conference „Strategies in making decisions in conflict and cooperation situations”, which will take place on 24-25 September 2018 in Ustroń. The conference is an annual forum for exchanging views and experiences related to the issues of making decisions and shaping strategies in organizations. The theme of the meeting is «Developing the potential of the organization». The organizers of this year's conference propose a discussion on the following issues: management in the era of Industry 4.0 - shaping economic and business relations; Smart City project - knowledge management for the improvement of the quality of life; managing the development of new products and innovations; decision support in management and economics; IT technologies supporting decision making and shaping strategies as well as quantitative models and methods in management and economics.

Academy of Diplomacy to be launched in October at the University of Silesia

2018-09-20

The University of Silesia in Katowice is launching the Academy of Diplomacy study under the patronage of the French Embassy in Poland. The offer is addressed to people interested in expanding knowledge in the field of diplomatic etiquette, international political and economic relations and foreign policy. The program includes workshops and classes on communication, international political relations, lectures combined with debates on the «round table» and classes on the diplomatic protocol. Meetings are conducted by specialists in the field of diplomacy, savoir vivre, business etiquette and communication. The condition of joining the recruitment process is the completion of the third year of studies. Recruitment will run until September 30. Detailed information is available at: www.akademiadyplomacji.us.edu.pl/rekrutacja

Conference in Bydgoszcz: "Critically with Foucault. Anarcheology of education and public space"

2018-09-20

Universities in Bydgoszcz, Gdansk and Lodz invite participants to a nationwide scientific conference: "Critically with Foucault. Anarcheology of education and public space". Anarcheology is the concept coined by Foucault in his lectures at Collège de France in 1980. He used the word game of «anarchy», «archeology» and «genealogy». Anarcheology is understood here as a characteristic, critical «theoretical-practical attitude» and a «rule» concerning the non-necessity of power and understanding of the orders of knowledge. The concept of anarcheology provides the analysis of truth, power, discourse and subjectivity / identity. The value of the conference is its interdisciplinary profile and disputable character. It is addressed to teachers, sociologists, psychologists, political scientists, philosophers and representatives of other scientific disciplines. The conference will take place on November 27-28, the applications should be submitted by September 23.

Lodz University of Technology to hold a seminar on paper physics

2018-09-21

On September 22-27, 2018, the Institute of Papermaking and Printing of the Lodz University of Technology organizes an international scientific seminar on paper physics - TAPPI Progress in Paper Physics Seminar. The Institute of Papermaking and Printing is the only scientific and didactic unit in Poland educating specialists in the field of paper physics. In the field of paper physics the scientists are researching on rheological properties of fibrous materials, their optical and chemical properties, and interaction with liquids and gases - says Dr Konrad Olejnik, director of the Institute of Papermaking and Printing at the Lodz University of Technology.

V International Conference of Thermal Spraying and Welding in Wroclaw

2018-09-21

Department of Materials Science of Strength and Welding of the Faculty of Mechanical Engineering of the Wrocław University of Technology invites participants from 26 to 28 September to the 5th International Conference of Thermal Spraying and Welding „Progress, applications and modern technologies”. It is the only monothematic regular conference devoted to technologies of thermal spraying in Poland and the largest such conference in Central and Eastern Europe. Its most important topics are new materials and technologies, properties of coatings and paddings produced by various methods and new industrial applications in various operating conditions. The organizers also promise to discuss problems related to training specialists, certification system and quality in thermal spraying and padding technologies. A session devoted to generative technologies of metallic materials is also planned, with particular emphasis on 3D printing.

Wroclaw University of Economics becomes an associate member of EDAMBA

2018-09-21

Wroclaw University of Economics has become an associate member of the European Association of PhD Programs in the field of management and business administration EDAMBA. EDAMBA is an international non-profit association currently operating in 26 countries. Its mission is to develop common ideas, values, evaluation criteria, standards and practices to evaluate and improve the quality of PhD education - through the exchange of experience and cooperation in a global network. Membership in the association allows access to information through the global academic network EDAMBA, publications and events, participation of students of PhD studies at the annual summer Academy of EDAMBA, participation of university staff and PhD students in the Consortium for Doctoral Candidates and the possibility of participating PhD students in the annual competition for the best diploma thesis.

Adam Mickiewicz University in Poznań to cooperate with the Kitami Institute of Technology

2018-09-21

University Adam Mickiewicz in Poznan will cooperate with the Kitami Institute of Technology in Japan. The cooperation agreement was signed by the Vice-Rector for Science and International Cooperation, Prof. Ryszard Naskręcki and the president of the Japanese university Prof. Soichiro Suzuki. The document provides for joint organization of consultations and reciprocal visits and lectures by representatives of both universities, it also assumes supporting the participation of young scientists in conferences and symposia, facilitating their activities, the exchange of scientists and students, and cooperation in the exchange of publications and scientific information. Kitami Institute of Technology is the northernmost university in Japan. His main fields of research are agriculture, renewable energy sources, IT and biomaterials. Due to the location of the local scientists, they also study ice, its structure and use. University of Silesia participates in the „European Association for International Education” conference

2018-09-21

Representatives of the University of Silesia in Katowice participated in the conference „European Association for International Education” (EAIE) - the largest branch conference in Europe concerning higher education. This year's event took place in Geneva and gathered over 5,000 participants. The conference was attended by researchers and specialists in international cooperation from European universities as well as state agencies and organizations involved in the internationalization process. The event was accompanied by educational fairs. University of Silesia presented its offer at the stand «Ready, Study, GO! Poland» prepared by the National Academic Exchange Agency. University representatives

also took part in meetings with partner universities from Spain, Sweden, the United States, Canada, Japan and Taiwan. The talks focused on strengthening existing cooperation and establishing new contacts.

Conversatorium of Atomic Spectrometry to be held at the University of Bialystok

2018-09-24

On September 24-26 at the Institute of Chemistry of the Faculty of Biology and Chemistry of the University of Bialystok, for the first time the Conversatorium of Atomic Spectrometry (KOSAT) will be held. According to Katarzyna Dziedzic, spokesperson at the University of Bialystok, it will be the 15th nationwide meeting of analytical chemists involved in spectral analysis. About 120 scientists will participate in the seminar, including guests from Monaco and France. Participants of the three-day meeting will have the opportunity to listen to over 30 lectures and present the results of their research. The most important event of the scientific meeting will be a special session during which Dr Emilia Vassilieva (International Atomic Energy Agency, Environment Laboratories in Monaco) and Prof. Henryk Matusiewicz (Faculty of Chemical Technology, Poznan University of Technology) will be honored with the special award of Dr Jerzy Fijałkowski for their contribution to the development of spectral analysis methods. More: www.kosat.pl

Warsaw University of Life Sciences to launch a new postgraduate study Car Fleet Management

2018-09-24

The Warsaw University of Life Sciences is launching a new two-semester post-graduate program at the Faculty of Economics - Car Fleet Management. The students will study the basic information regarding the functioning of transport, the car leasing market, fleet policy, rules of negotiation and contacts with contractors, methods of financing the transport fleet and conditions for its maintenance. Completion of studies will enable to acquire specialist knowledge

as well as practical managerial and operational skills in the field of fleet management in the industry of long-term Car Fleet Management, Rent a Car, as well as internal structures of transport, production and service companies. More: <http://flota.wne.sggw.pl/>

Documentary film of a student from the AGH University of Science and Technology about Polish missing locomotives in Lebanon

2018-09-24

Michał Bis, a student at the AGH University of Science and Technology in Krakow, made a documentary entitled „Praise from Beirut.” It presents the history of Polish locomotives produced in the 1970s in Poznań and purchased to the Lebanese Railways. Michał Bis started his film in 2012 and explored the history of three locomotives sold to the Lebanon Railways. Polish locomotives survived the civil war in Lebanon and remained in use until 1997. Over the next 20 years, however, the machines were missing. Michał Bis discovered them for the needs of his documentary. In 2015, the author flew to the capital of Lebanon, where he received permission to film the locomotives. Currently, the machines are located at the military base in Beirut. The film presents the history of machines from the moment of their transport to Lebanon, up to today. In the student's document AGH there are Lebanese railwaymen remembering SU45 locomotives, as well as former employees of the Polish Cegielski factory. The première of the film is scheduled for September 24 at 12.00 in the Main Auditorium of the AGH University of Science and Technology in Krakow.

Deputy Prime Minister Gowin signs the regulation on scientific disciplines

2018-09-24

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin has signed a regulation on scientific disciplines. Among 44 scientific and 3 artistic disciplines, astronomy was also included. Although astronomy was included in physical sciences in the OECD classification that we used as a model, we decided to meet the demands of the academic community - said Deputy Prime Minister Jarosław Gowin. At no stage, let alone at the stage of implementing the Constitution for Science and the publication of subsequent executive acts, we do not forget about scientists for whom, but also with whom we are realizing this reform of higher education and science in Poland - he added. According to the Ministry of Science, the new division of disciplines was developed primarily for the needs of conducting a fair assessment of the quality of scientific activities. Until now, within the evaluation, mainly faculties have been set up for assessment. Usually, they were not comparable in terms of the scope of the research. Evaluation in the new system is subject to scientific activity of the entire university in particular disciplines.

Gdańsk University of Technology develops a website about changes within the Act on Higher Education

2018-09-24

Gdańsk University of Technology begins adapting the university to the regulations related to the new Law on Higher Education and Science - so-called Act 2.0. Its special website is already available. There are basic legal regulations and schedules for implementing the provisions of the Act at the university. Information about the changes and a compendium of knowledge in the form of answers to the most frequently asked questions will also be posted. - We want Gdańsk University of Technology to be among the best European technical universities. The Act 2.0 creates a chance to bring us closer to this goal. It

will allow for accelerating changes in many areas of the university's functioning. (...) I am convinced that the transparency of our activities will enable to fully understand and convince members of the academic community to actively participate in this process - says rector of the University of Technology, Prof. Jacek Namieśnik. More: <https://pg.edu.pl/ustawa2.0>

Adam Mickiewicz University joins the signatories of Magna Charta Universitatum

2018-09-24

The Adam Mickiewicz University in Poznań joined the signatories of Magna Charta Universitatum. The act was signed by the rector of the University, Prof. Andrzej Lesicki, who participated in the celebrations of the 30th anniversary of the documentary and the Observatory of the Magna Charta Universitatum in Salamanca. Magna Charta Universitatum is an act signed on September 18, 1988 by 388 rectors and heads of universities. It contains the principles of academic freedom and institutional autonomy as a guide for good governance and self-discovery of universities in the future. Its aim is to cultivate university traditions and encourage strong ties between universities. The Observatory of Magna Charta Universitatum is an association of signatories of the document. It undertakes activities aimed at ensuring the integrity of intellectual and scientific work in institutions and society, thus strengthening confidence in the relations between universities and their closer and further communities.

Professor Anders Grubb awarded the title of doctor honoris causa of Gdansk University

2018-09-24

The Senate of the University of Gdańsk awarded the title of doctor honoris causa to Professor Anders Grubb, an outstanding scientist and doctor, a specialist in the field of clinical chemistry. The ceremony of awarding the title will take place on September 28 in the hall of the chemistry department in Gdańsk Oliwa. This is the highest academic distinc-

tion that Professor Grubb receives for outstanding achievements in the field of medical chemistry and the impact on the development of new research topics at the Faculty of Chemistry. Professor Anders Grubb is an internationally acclaimed specialist in clinical chemistry, in particular medical diagnostics and biochemistry. His research include studies on the structure and function of proteins and their use in medical diagnostics, in particular kidney diseases. For many years, Professor Grubb has been cooperating with scientists of the Faculty of Chemistry and he wrote almost 350 scientific works in collaboration with researchers from the University of Gdańsk.

University of Warmia and Mazury becomes leader of Universities for Future Work Skills 2020

2018-09-25

University of Warmia and Mazury became the leader of the project Universities for Future Work Skills 2020. It receives over a million PLN for its implementation. About 200 people (students, academic teachers and entrepreneurs) from 6 European Union countries will be involved in the project. The partners of the Olsztyn University are the Romanian-American University in Bucharest, the Main School of the Liège Province in Belgium, the University of Vigo in Spain, the Technological University in Porto in Portugal and the consulting companies from Greece and Spain. The aim of the project is to increase the chances of university graduates to gain employment by developing their soft skills and soft skills of their academic teachers. The project will end in February 2021.

Inauguration of the academic year for the Lane Kirkland Scholarship Program

2018-09-25

The University of Maria Curie Skłodowska (UMCS) in Lublin held the inauguration of the academic year 2018/2019 of the Lane Kirkland Scholarship Program. The main group of participants of the inauguration were 42 new Kirkland Program scholarship holders and four scholars of the Kirkland Research Program. The students come from eight countries: Ukraine, Belarus, Russia, Armenia, Georgia, Kyrgyzstan, Kazakhstan and Moldova. They are young leaders operating in their countries within public administration, academic, business, media and politics. The inauguration took place on September 21. Lane Kirkland Scholarship Program is a project of the Polish-American Freedom Foundation, whose mission is supporting democratic and free market changes in the countries of Central and Eastern Europe.

Warsaw University of Technology to participate in the Graphene Project of the European Union

2018-09-25

Warsaw University of Technology, represented by the Faculty of Physics, as the only Polish university joined the Graphene Project of the European Union implemented as part of the „New Technologies and Technologies of the Future” program. The aim of the project is the effective use of research conducted at the highest level in innovative material solutions based on graphene and related materials. The project will last until 2023. Warsaw University of Technology in September 2018 joined the project consortium, which consists of 158 partners from 23 European countries. For several years scientists of the Faculty of Physics have been conducting research on graphene and other sandwich materials in the field of new technologies of manufacturing, characterization and applications in electronics and other technical fields.

University of Opole organizes a conference on rock music

2018-09-25

The Institute of Slavic Studies at the Faculty of Philology at the Opole University invites participants to the 10th nationwide conference „Unisono in poliphony”. The meeting in Tułowice will bring dozens of scientists from all over Poland who are involved in rock music and close disciplines. The event will be held on September 28-29. The main topics of the meeting are primarily rock music and other genres, but due to the interdisciplinary nature of the conference, not only musicologists and musicians will participate in it. Also literary scholars, historians and visual artists designing album covers are invited. This year, one of lecturers will be a doctor who will talk about occupational diseases affecting musicians. The originator and co-organizer of the event is a linguist, Dr Radosław Marcinkiewicz. His scientific interests include onomastics, musical terminology, monolingual and translation lexicography, and research on key elements of phonographic works.

In 2019 Polish Government allocates PLN 1 billion 350 million for the development of higher education

2018-09-26

The government will allocate PLN 1 billion 350 million in 2019 for the development of higher education, - said Jarosław Gowin, the Deputy Prime Minister, Minister of Science and Higher Education, during a press conference at the State College of Information Technology and Entrepreneurship in Łomża. As emphasized Deputy Prime Minister Gowin, «the development of our universities means the development of Poland.» He added that he is convinced that good times are coming for higher education. «Both statutory solutions and some additional mechanisms for financial growth will be vital next year and they will provide the growth in the future. All this ensures the development of Polish universities and also the development of Poland,» said Gowin. During the conference, Deputy Prime Minister Gowin thanked the Rector of the Łomża

University, Dr. Dariusz Surowik for active and substantive participation in consultations on the new act. More: <https://www.pwsip.edu.pl/uczelnia/aktualnosci/956-wicepremier-jaroslaw-gowin>

Over PLN 7 million for Kraków students of Nursing

2018-09-26

Over PLN 7 million will be allocated for the support of students of Nursing and their professional development at the Jagiellonian University Collegium Medicum and the Frycz Modrzewski Krakow Academy. According to the portal Rynek Zdrowia, the best students who undertake nursing studies are to be paid the scholarships in the amount of PLN 800 per month since the second year of study. Graduates who will start working in the profession in health care institutions financed from public money will be able to receive two-year scholarships in the amount of PLN 1000 gross per month for their professional training. Funds for this purpose have been obtained from the EU program «Knowledge - Education - Development».

Müller: We raise the bar. We will appreciate important research

2018-09-26

- In many disciplines we have reasons to be proud. Polish science is a kind of export product and it is at a satisfactory level, but we have even more ambitions - said Piotr Müller, deputy minister of science and higher education. As emphasized Piotr Müller, the Ministry of Science he wants scientists to be able to focus on research relevant to them and the country. He admitted that the new law raises the bar. - There is a parametric criterion, we assess the level of citations, then the implementation criterion and then the socio-economic impact. Above all, the point is to focus on higher quality research. The ranking table will list publishers and magazines that have a real impact on science. This is a key change and many people are afraid of it. Those who really want to take up teaching and scientific challenges have nothing to fear - said Deputy Minister Müller and assured: «We will appreciate real, relevant scientific research. We will compare philosophers with philosophers and historians with historians. This will be assessed by experts from the scientific community».

XXI International Onomastic Conference „Onomastic terminology – Names Studies”

2018-09-26

The Faculty of Humanities of the Maria Curie Skłodowska University in Lublin in cooperation with the Linguistics Committee of the Polish Academy of Sciences and with the support of the Lublin Branch of the Society of Polish Language Lovers organizes the XXI International Onomastic Conference „Onomastic terminology – Names Studies.” The conference is scheduled for October 4 at the Creative Work House of the Association of Polish Journalists in Kazimierz Dolny on the Vistula. Onomastics is a branch of linguistics dealing with the study of proper names, including names of places, names, surnames. The conference will be attended by over 100 scholars representing academic centers from Poland, the Czech Republic and Slovakia, Russia,

Belarus and Ukraine, Lithuania, Croatia and Macedonia, as well as from Hungary and Italy.

Dr Mateusz Strzelecki from the University of Wrocław receives the Polityka Award

2018-09-26

Dr Mateusz Strzelecki from the Institute of Geography and Regional Development at the Faculty of Earth Sciences and Environmental Sciences of the University of Wrocław received the „Polityka” Weekly Award. The two-stage competition is addressed to young scientists. Firstly, the Chapter selects 15 finalists, and then five winners are selected who will receive scholarships 15.000 PLN. The winners will be presented during the gala on October 28. Dr Strzelecki is a polar geographer. He held his PhD title from the University of Durham, and worked in the UK, Norway and Germany. Currently, he is the head of the Stanisław Baranowski Polar Station at Spitsbergen, leader of Polish research teams on coastal evolution and the paraglacial transformation of the landscape in the High Arctic, as well as he is the youngest member of the Polar Research Committee of the Polish Academy of Sciences.

Digitalization of the Wrocław University of Technology collections

2018-09-26

Almost 280,000 various objects - technical magazines, architectural reports, photos and negatives will be digitized at the Center for Science and Technology of the Wrocław University of Technology. As part of digitization, Polish magazines issued since 1948 are scanned and recorded - including titles issued by the University of Technology, which are a valuable source of research and are an important element of national heritage, illustrating the development of Polish science over the years and its impact on world science. Digitization and development of the resource will ensure safe, long-term storage and further archiving in digital form. In the next stage, it will enable broad access to materials on the Internet - using the most modern Polish digital

libraries. The selected part of the collection will be developed in accordance with WCAG 2.0 standards, which will allow it to be accessible to people with disabilities. More: <http://pwr.edu.pl/uczelnia/aktualnosci/ocalic-od-wyrzucenia-kolejna-wielka-digitalizacja-na-pwr-10980.html>

Professor Jean Marc Lobaccaro to hold lectures at the West Pomeranian University of Technology

2018-09-26

The West Pomeranian University of Technology and the city of Szczecin invite participants to open lectures by Prof. Jean Marc Lobaccaro. The lecture will be delivered on 28 September at the Nanotechnology Didactic and Research Center, (lecture with simultaneous translation) and on 2 October at the Faculty of Biotechnology and Animal Breeding (lecture for PhD students). Professor Jean Marc Lobaccaro is an authority in physiology, endocrinology, as well as molecular biology of tumors. He is an employee of the University of Auvergne Clermont-Ferrand, recognized and very popular didactic teacher, as it was proved by numerous awards in competitions for the best academic teacher of his home university. The professor is a big fan of the Star Wars saga, which reflects the title of the lecture: „Prostate cancer and lipids: from dark spectrum to new hope”. The second lecture is also devoted to prostate cancer and is entitled „Network of nuclear receptors in prostate physiology”. More: <http://www.zut.edu.pl/zut-strona-glowna/informacje-biezace/article/gmina-miasto-szczecin-oraz-zut-w-szczecinie-zapraszaja-na-wyklady-otwarte-profesora-jean-marc-lobaccaro.html>

University of Lodz receives the record funding for research within the MINIATURA 2

2018-09-27

The University of Lodz has received a record amount of 13 research grants, which makes 10% of all funds submitted to Polish universities within the competition MINIATURA 2. - Science develops when the proper conditions are created. As the university, we attempt to create the best conditions for our scientists - said Professor Elżbieta Żądzińska, vice-rector of the University of Lodz for science. The Łódź University provides scientific support during the studies. Any student interested in research may apply for the grant from the University's own program - Student Research Grant. The application procedure is simplified, but it remains very similar to the applying for grants from the National Science Center. This prepares young researchers to apply later for such grants as MINIATURA 2.

Ministry of Science preparing salary increase for scientists

2018-09-27

The salaries of academic teachers can increase by 30 percent from next year. The Ministry of Science and Higher Education is preparing a program to increase the salaries of scientists. Deputy Prime Minister Jaroslaw Gowin underlined that the government will allocate additional funds to increase salaries for both the academic and the administrative staff. Next year's salary increase will not end the process of raising wages for academic staff. From January 2019, in accordance with the recently issued regulation of the Minister of Science and Higher Education, the regular professor's minimum salary will amount to PLN 6,410 (PLN 1,000 more than at present). A university professor will earn no less than 83 percent, and an associate professor will earn 73 percent of regular professor's salary.

Krakow University of Technology to join the Santander Universidades program

2018-09-28

Krakow University of Technology and Santander Bank Polska S.A. will cooperate in the implementation of academic, technological and scientific initiatives, programs and projects. The contract was signed by Prof. Jan Kazior, rector of the Krakow University of Technology and Wojciech Leśniewski, manager of the Santander Universidades program. Santander Universidades program includes more than 60 universities from Poland and over 1,000 higher education institutions from the world largest academic centers. The Krakow University of Technology and Santander Bank will develop academic cooperation between the university and academic centers in the countries where the Santander Universidades program operates. The implementation of selected technological, research, development and educational projects as well as supporting the mobility and entrepreneurship spirit of students, employees, PhD students and graduates of the University are also planned.

Dardziński: Scientists want to take on challenges

2018-09-28

-We want to change the universities and scientists who deal only with didactics - said Piotr Dardziński, Deputy Minister of Science and Higher Education in the radio program on „Constitution for Science”. - Scientists want to take on challenges, invent new technologies. This law is just encouraging students to learn through practice and together with entrepreneurs, - stressed Piotr Dardziński in the program of Radio dla Ciebie and added that thanks to the Constitution the heads of science institutions will also be responsible for the effects of research that should be more breakthrough and affect the socio-economic environment. The law will come into force on October 1, but that does not mean that universities will have to quickly adapt to all new solutions. The timetable for entering into force is included in the transitional provisions of the new law.

MOST Wiedzy by Gdansk University of Technology wins IT Future Expo

2018-09-28

The MOST Wiedzy (Bridge of Knowledge) is a project realized at the Gdańsk University of Technology. It received the „Cloud Computing - Cloud solutions” award in the IT Leaders competition 2018, organized as part of the IT Future Expo IT Fair. - MOST of Knowledge (Multidisciplinary Open Knowledge Transfer System) is a symbolic bridge connecting the world of science and business. The public platform collects constantly updated information on the latest scientific achievements, innovative solutions and directions of development of research topics in the academic units of the university. The system has built-in intelligence and mechanisms to understand the search context. It is an intelligent advisor, which automatically learns from search history, can suggest the content to users, recognizes users' groups, and matches results for them. The project is co-financed from the European Regional Development Fund under the Operational Program Digital Poland for 2014-2020. More: <https://mostwiedzy.pl/pl/>

University of Agriculture in Taiwan to cooperate with the University of Opole

2018-09-28

National Chung Hsing University in Taichung wants to expand cooperation with the University of Opole. Taiwanese University that specializes in agricultural sciences would like to create international research teams for exchanging students and lecturers. The University of Taichung originates from the earlier established agricultural university. The Center of Research for Agriculture and Agricultural and Food Industry, as well as agribusiness specialists of the Faculty of Economics, established at the University of Opole, could certainly benefit from cooperation with the leading agricultural science center in Taiwan. One of the interesting solutions at the Taiwanese University is the research center to assemble research teams, consisting of employees from various university units, to undertake specific topics. This enables cooperation of researchers representing humanities and experimental sciences.

Medical University of Silesia to train doctors using medical simulation techniques

2018-09-28

The Medical University of Silesia will receive almost PLN 10 million for postgraduate education of doctors using medical simulation techniques. As part of the project, in 2019-2022 1622 people will be trained. The aim of the project is to develop professional skills and qualifications of doctors and resident doctors by organizing trainings that include maps of health needs. The courses will include virtual simulation of laparoscopic techniques in pediatric surgery, enhancing practical skills in minimally invasive surgical techniques; course of virtual simulation of thoracoscopic techniques in thoracic surgery containing the science of manipulation, transfer, capture and preparation of tissues and a course of functional diagnosis of the bone-joint and muscular system with the use of modern technical solutions - with particular emphasis on the age of specialist doctors in medical rehabilitation. Start-Up Academy at the University of Bialystok

2018-10-01

The University of Bialystok invites primary school pupils of the 5th, 6th, 7th and 8th grades from the Podlasie Voivodeship to participate in the first „Start-Up Academy” project. The applications can be sent from October 1 to October 12, 2018 - informs Katarzyna Dziedzic, a spokesman of the Bialystok University. Classes will be conducted by scientists from two university faculties (economics and management as well as historical and sociological faculty), qualified trainers and entrepreneurs. The summing up of the project will be a gala, during which students will present their ideas of start-ups to business representatives, investors, innovation experts - says Dr. Magdalena Owczarczuk from the Faculty of Economics and Management, project coordinator. The project will last two years, in total 144 students are planned to take part in it. The University has received funding for its implementation - over 343,000. PLN within the program of the National Center for Research and Development «University of the Young Explorer».

More and more students from Ukraine choose Polish universities

2018-10-01

The Institute of Public Affairs has conducted research on the presence of Ukrainian students in Poland. It follows that young people from Ukraine are attracted to study in Poland by good career prospects and lower costs of living than in other countries. In the 2012/2013 academic year, 9,747 students from Ukraine studied at Polish universities, and in 2013/2014 this number increased to 15,123 people. According to data for the academic year 2016/2017, 35,584 students from Ukraine already studied in Poland. According to the Institute of Public Affairs, the survey showed that the reasons for which young people from Ukraine decide to come to

Poland are primarily: lower costs of living comparing to other countries (indicated by 39% of respondents), the prospect of studying without fees or with a reduction in fees (29%), easy access to university (28%), the prospect of finding a job in an area consistent with education (22%) and the quality of education at a given faculty or university (22% each).

Polish Innovation Award for the University of Life Sciences in Poznań

2018-10-01

The Center for Innovation and Technology Transfer of the University of Life Sciences in Poznan won the Polish Innovation Award. The prize was presented during the 6th Polish Congress of Entrepreneurship in Poznan. The award was granted for the project InnCOM_PULS- instruments for optimizing the commercialization processes, creating innovation, improving dialogue and increasing the effectiveness of cooperation between science and economy, in particular for developing IP_PULS applications - communication tools in managing intellectual property and commercialization processes and the InnCOM_PULS portal - an open innovation model as a place for making transactions, promotions and exchanging experiences”. The project is financed by the Minister of Science and Higher Education. The Polish Innovation Award is a program run by the Polish Agency of Entrepreneurship and the editors of the Entrepreneurship Forum in the newspaper Dziennik Gazeta Prawna.

Medical University of Katowice to support secondary school pupils

2018-10-01

The Public Health Department of the Medical University of Silesia in Katowice and the city of Siemianowice Śląskie are implementing the project „Better start into the future”. The subject of the project is the development of key competences necessary in the labor market of the pupils of grades 1-3 in three secondary schools in Siemianowice. The target group is 160 pupils and 10 teachers. Support and didactic classes in biology, chemistry, physics, math and English are planned. Pupils will also be supported with additional classes of self-presentation as well as group and individual career counseling. The project implementers also want to organize training for teachers in the field of working with a student with special educational needs. Pupils will take part in thematic workshops for students participating in the project - in cooperation with the Silesian Medical University in Katowice.

University of Wroclaw invites participants to meet Dr Fred Stern

2018-10-01

The guest of the University of Wroclaw will be Dr. Fred Stern, a psychologist and psychoanalyst from New York, who will tell about the history of his family that originates from Wroclaw. The protagonists of the story will be Dr. Catherine Stern, - his grandmother and Prof. Fritz Stern- his father. Catherine Stern (1894-1973) was the founder of the first kindergarten Montessori in Wroclaw. After emigration to the USA, in cooperation with Max Wertheimer, one of the creators of Gestalt psychology, she created a method for calculating and basics of mathematics for children in pre-school and early school age - Stern Math (Structural Arithmetic). Fritz Stern (1926-2016) was an outstanding historian, who for nearly 50 years was associated with Columbia University in New York. He researched and explained the history of Europe in particular Germany. He was a friend of Polish Wroclaw, he was awarded the title

of honored doctor of the University of Wroclaw. Fred Stern will visit Wroclaw on October 2 to participate in the receiving the Fritz Stern Professorship by a journalist Anne Applebaum.

Rzeszów scientists studying parks as a source of air pollution

2018-10-02

The interdisciplinary team of the Faculty of Biology and Agriculture at the University of Rzeszów is conducting a unique research on air pollution, sourced by parks. Researchers are studying Rzeszów parks and their allergenic potential character. According to estimates, as early as in 2025, half of the European population will suffer from an allergy and pollen allergens will cross-react with food allergens. - We have no assumptions that the park can be a source of air pollution. Meanwhile, based on Spanish research, such a statement is frequent in the scientific literature. It does not mean that the parks are bad, because their health benefits are indisputable and undeniable. The point is to manage reasonably them and not to create unnecessary health risks - said Agata Ćwik from the Department of Agrobiolgy and Environmental Protection of the Rzeszów university in an interview.

Scientific conference „People to bees, bees to people”

2018-10-02

On October 13, 2018 University of Agriculture in Krakow, Polish Academy of Sciences, Małopolska Agricultural Advisory Association, Board of the Provincial Union of Beekeepers in Krakow and the Beekeeping Society are organizing the scientific conference „People to bees, bees to people”. The aim of the Conference is to familiarize students with the current problems of wild and breeding bees and to mobilize them for a greater commitment to saving the environment in which bees live. During the event, the interactions between plants and bees and causes of disturbances in these interactions will be discussed as well as issues regarding the quality of products provided by the honey bees.

University of Warsaw receives nearly EUR 20 million for research within Horizon 2020

2018-10-02

The National Contact Point for Research Programs of the European Union summarized 576 calls of Horizon 2020 program. The University of Warsaw became the leader among Polish universities in terms of the number of projects implemented under the EU's Horizon 2020 Framework Program. The university has won almost EUR 20 million in calls and will implement 65 projects. The Warsaw University submitted as many as 396 applications for the Horizon 2020 program. 65 co-financed projects of the university were granted for a total sum of 19.96 million euros. The success rate is 16.5%. In 14 projects, the university acts as a coordinator. The University received also the most prestigious grants, awarded by the European Research Council (ERC).

Gowin: Our new law is a deepened evolution, not a chaotic revolution

2018-10-02

- The Constitution for Science has three pillars: dialogue, impulse for development and freedom. We are extending and strengthening the autonomy of the university. The new law is a deepened evolution, not a chaotic revolution,” - said Deputy Prime Minister Jarosław Gowin at a meeting of the rectors of Polish high schools in Warsaw. The event, which started the academic year 2018/2019, was attended by Prime Minister Mateusz Morawiecki, who stressed that «we are entering a new year with a new law on science and higher education, which will be a milestone in the development of Poland». In turn, Prof. Jan Szmidt, chairman of the Conference of Rectors of Academic Schools in Poland, stressed that the academic community felt responsible for the reform of science. - 100 years behind us and 100 years ahead of us. We scientists, teachers - we bring up those who will decide about Poland in the future. We feel like co-creators of the reform. We feel this responsibility. We want to implement it wisely - said Prof. Szmidt.

Gdansk University of Technology offers half a million PLN in the third civic budget

2018-10-02

From October 17, employees, PhD students and students of Gdańsk University of Technology will be able to submit their proposals to the third civic budget. The university authorities allocated half a million PLN for this purpose. Projects implemented in previous programs included mobile student workshop, elevator control and defibrillators. - Previous citizen budget programs were successful. I am glad that employees and students are involved in activities that make our campus more beautiful and contribute to the comfort of work and study - says Prof. Jacek Namieśnik, rector of the Gdańsk University of Technology. Projects that gain the most support in the voting will be entered into the PG budget and will be completed by the end of 2019. As for previous years, the budget amounts to half a million PLN, of which 350,000 PLN is allocated for employee projects, and 150,000 PLN for student projects.

Scientists of the University of Life Sciences among 30 Creative Persons of Wrocław

2018-10-02

PhD students Katarzyna Kornicka, Paweł Stępień and Prof. Krzysztof Sośnica from the University of Life Sciences in Wrocław joined the group of „30 Creative Persons of Wrocław” - a project distinguishing remarkable Wrocław residents. „30 Creative Persons of Wrocław” is an urban project that distinguishes important, bold Wrocław residents in the areas of culture and art, business and science. The creators come from Wrocław or have chosen this city for their home. Through their passions, dreams and initiatives Wrocław is more open to people, a friendly, good place to live, study and work. Katarzyna Kornicka is a PhD student at the Laboratory of Electron Microscopy and deals with stem cells. Paweł Stępień is a PhD student at the Institute of Agricultural Engineering, where he deals with research on alternative fuels. Professor Krzysztof Sośnica from

the Institute of Geodesy and Geoinformatics deals with satellite geodesy. More: http://www.glos.upwr.edu.pl/aktualnosci/48381/30_kreatywnych_wroclawia.html

Warsaw Medical University to receive PLN 740 thousand for an international scholarship exchange

2018-10-03

The National Academic Exchange Agency has awarded over PLN 740,000 to the Warsaw Medical University as part of the PROM Program - International scholarship exchange of PhD students and academic staff. The PROM program enables to improve the competences of PhD students and academic staff from Poland and abroad, including students from outside the European Union, through an international scholarship exchange. The National Academic Exchange Agency finances projects of universities and research units offering scholarships to cover the costs related to the participation of PhD students and academic staff in short forms of education (lasting from 5 to 30 days) of international character.

Rector of the Cardinal Stefan Wyszyński University: We want to educate mission doctors

2018-10-03

- We want to educate mission doctors. We start with the assumption - which is obvious, but in practice this obviousness has been lost somewhere - that a doctor is not an ordinary profession. This vocation is connected with serving the other person - said Prof. Stanisław Dziekoński, rector of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw in an interview for the weekly journal „Do Rzeczy”. The rector of the CSWU also mentioned the Collegium Medicum, a new faculty that was established at this Warsaw university. As emphasized Professor Dziekoński «a patient can not be treated as a disease entity, but as a human being who needs help». - In the next two, three years, we want to develop a medical

department at CSWU, which will be part of the new quality of medicine. We also want to develop an IT school. This year, we established the Center for Digital Science and Technology with a separate module of digital medicine - added the Rector of UKSW.

Over 14,000 students start the new academic year at the Rzeszów University of Technology

2018-10-03

Rzeszów University of Technology has accepted over 3,800 students for the first year of studies. In total, over 14,000 students started the new academic year at the Rzeszów University. The recruitment results satisfied Prof. Tadeusz Markowski, rector of the University of Technology, who stated that it confirmed the high position of the university in the south-eastern Poland. Automation and robotics as well as logistics were the most popular studies. Eight candidates competed for one place in both courses. IT and management were also popular faculties. Seven candidates competed for one place in those courses. For electrotechnics, mechatronics, management and production engineering four candidates competed for one place. In the studies of mechanics and mechanical engineering, transport, as well as aviation and aeronautics, there were 3 candidates for one place.

Naval Academy in Gdynia becomes a partner of the FRONTEX agency

2018-10-03

The Naval Academy in Gdynia obtained the status of Partner Academy of the European Border and Coast Guard Agency - FRONTEX. The partnership agreement was concluded by the end of 2020. The signed agreement enables conducting scientific and research works for FRONTEX and training, as well as extending the cooperation network of the Academy with other academic units of the European Union. The agency was created in 2005 originally under the name «European Agency for managing operational cooperation at the external borders of EU Member States» - FRONTEX with its registered office in Warsaw as a response to the growing migratory pressure to Europe. In 2016, in response to the unprecedented migration crisis, on the basis of FRONTEX, the European Border and Coast Guard Agency was established, with the scope of expanded tasks, among others for conducting rescue operations at sea and the possibility of wider cooperation with other maritime institutions of the European Union.

Over foreign 1000 students at the Wrocław University of Technology

2018-10-03

In the academic year 2018/2019, 1050 foreign students will study at the Technical University of Wrocław. Over 600 students took part in the „Introductory Day”, during which they visited the university, campus and learnt the offer of science clubs operating at the University. Students were solemnly greeted by Prof. Andrzej Trochimczuk, Vice-Rector for Research and Internationalization - I want to assure everyone that we will do our best to make the time you spend here most enjoyable. In the next few hours you will receive from us a full information packet about the university, science clubs, the library, but also Wrocław. I believe that it will help you organize your stay in our city in the best possible way - said the vice-rector. In the summer semester there will be over 300 people from abroad who

will start their studies. Most of them are students from India, Turkey and Ukraine, but there are also young people from Iraq, Yemen, Colombia, Congo, USA or Zimbabwe. More: <http://pwr.edu.pl/uczelnia/aktualnosci/studiuja-u-nas-mlodzi-ludzie-z-calego-swiata-10988.html>

Opole's Fraunhofer design center receives additional financing

2018-10-03

The Fraunhofer Design Center for Advanced Light Technologies at the Opole University of Technology acquired further funds for research and implementation. The money comes from the Regional Operational Program and is the result of the extension of funding for science in the Opole region. The fund will be used to equip the IT laboratory, to provide research of innovative materials and their assessment in terms of impact on the environment (including by accelerating their aging). New devices on which researchers will develop light technologies will go to the University and the Opole Science and Technology Park. - The Fraunhofer Institute license attracts like a magnet - says the rector of the University of Technology, Prof. Marek Tukiendorf and adds that 90 companies are already interested in the project, and the creation of the center is the greatest achievement in the entire history of the university.

Universities from Bielsko-Biała and Nicosia to cooperate

2018-10-03

The Academy of Technology and Humanities in Bielsko-Biała will cooperate with KES College in Nicosia, Cyprus. The guests from Cyprus agreed the details of cooperation in the field of joint projects and exchange of students as part of apprenticeships and internships. The possibility of organizing a joint summer school was also discussed. The cooperation between KES College in Nicosia and the Faculty of Management and Transport at the Academy of Technology and Humanities will focus on creating a joint educational offer within the scope of International Management / International Business within the studies conducted in English. In addition, the

cooperation will also cover joint research and development projects in the field of management sciences, with particular emphasis on logistics as well as social responsibility of universities.

Podlasie Children's University to invite pupils soon

2018-10-04

Representatives of the local governments of Białystok, Siemiatycze, Bielska Podlasie, Hajnówka and Sokółka signed a cooperation agreement with the Białystok University of Technology. It will allow to invite pupils to the Children's University of Podlasie on October 16, 2018. During the classes, pupils of the fourth and sixth grades of elementary schools will learn the basics of programming, robotics, construction, urban space design, and also the secrets of radio journalism. The program is complemented by classes organized by project partners: Voivodeship Road Traffic Center in Białystok, Arsenal Gallery, National Bank of Poland - District Branch in Białystok, Office of Electronic Communications - Delegation in Białystok, Podlaskie Museum of Folk Culture. More: <http://pud.pb.edu.pl/>

Academy of Physical Education in Warsaw receives a check for nearly PLN 32 million

2018-10-04

- 90 years ago and today the Józef Piłsudski Academy of Physical Education in Warsaw has been a highly specialized university, providing services to people of all ages. Every year, many eminent graduates leave our university with a diploma of a trainer, instructor, pedagogue, physiotherapist, nurse, cosmetologist and occupational therapy specialist - said Prof. Andrzej Mastalerz, rector of the Academy of Physical Education, opening a new academic year. The inaugural lecture titled «Mountaineering – a strange sport» «was delivered by Dr Janusz Onyszkiewicz, former president of the Polish Mountaineering Association and two-time national defense minister. According to the university, during the ceremony, the delegation of the Ministry of Science and Higher Education handed over to the Rector of the University of Physical Education a check with a nominal value of PLN 31,925,000 in treasury bonds, which will increase the university's capital and will allow to finance investment tasks of the Warsaw Academy.

Letter of intent regarding the merger of the University of Warsaw and the Warsaw Medical University to be signed On October 16

2018-10-04

- The new law, the new Act on Science and Higher Education can bring significant and beneficial changes to universities. But it is also, especially in the first period of its validity, a huge challenge for them- said during the inauguration of the academic year at the University of Warsaw Prof. Marcin Pałys, rector of the university. In his inaugural speech Prof. Pałys also talked about plans for a merger with the Warsaw Medical University. A letter of intent in this matter will be signed on October 16, 2018 by the universities. The Rector of the University of Warsaw

also recalled the successes of the Warsaw University including the signing of agreements with the Charles University in Prague, the University of Heidelberg and the Sorbonne University on the creation of an alliance of 4 research universities - 4EU European University Alliance.

Prime Minister Morawiecki participates in the inauguration of the academic year at the Medical University in Lublin

2018-10-04

Prime Minister Mateusz Morawiecki took part in the inauguration of the academic year at the Medical University in Lublin. The university will educate over 6,900 students. «Financing Polish science must be increased every year to become a locomotive for the country's economic growth,» said the prime minister. He also appreciated the contribution of the University of Lublin in shaping the future elites. «It is here in Lublin, at your wonderful universities, the knowledge, achievements and future of Polish science are forged»- he added. The inauguration ceremony of the academic year 2018/2019 was accompanied by the opening of a new building of the Medical Simulation Center. Prof. Andrzej Drop, Rector of the Medical University of Lublin stated that «the presence of such an entity in the structure of the university is the current world standard of modern medical education».

Opole Center for Research and Innovation in Cardiovascular Diseases to receive additional funds

2018-10-04

The project of establishing the Center for Research and Innovation in Cardiovascular Diseases at the University Clinical Hospital in Opole received an additional PLN 6 million of EU funding. The value of the entire project is 27 million PLN, of which 18 million are external funds. The project of the Center for Research and Innovation in Cardiovascular Dis-

eases USK assumes the creation of a leading center for innovative modern technologies, establishing a common research space for USK units to deal with cardiovascular diseases. Establishing a center means creating an infrastructure to study the health problems of the Opole community, with particular emphasis on the aging population. Thanks to the center, it will be possible to establish a unit equipped with appropriate infrastructure and software, which will enable integration of specialists in various fields, as well as remote cooperation with specialists from Poland and abroad.

Interactive exhibition about sound and acoustics at the Center for Popularization of Science at the Silesian University of Technology

2018-10-04

From October 1 to December 30 pupils and students can visit an interactive exhibition dedicated to the sound and acoustics of „Highway of sound”. The exhibition is addressed to children and it is organized at the Center for Popularization of Science of the Silesian University of Technology. During the tour, students can make a trip to the magical world of acoustics. They will see and touch what they have just read in physics textbooks. Thanks to spectacular experiments with their own eyes and, above all, ears they will be able to check how unusual the phenomenon is sound. Knowledge gained during physics lessons will be consolidated and supported by experiments in which the visitors themselves will be able to take active part. The exhibition can be visited after prior booking at the Science Population Center by phone 32 237 18 54 or by e-mail: rjp6@polsl.pl.

Modern laboratory in the modernized part of the Maximum Auditorium of the Gdańsk University of Technology

2018-10-04

The Gdańsk University of Technology created a modern laboratory in the modernized part of the historic Auditorium Maximum building, where the program of the use and learning of the LabVIEW environment will be implemented. LabVIEW environment is one of the most modern programming platforms used by such centers as CERN or NASA. The new laboratory, as part of the teaching classes, will be used primarily by students of faculties related to physics - material engineering (specialty energy conversion) or nanotechnology. At their disposal there are most modern measurement systems including digital oscilloscopes, arbitrary multi-channel generators, prototype systems, located on 120 square meters. Laboratory groups will develop electronic circuits, using operational amplifiers, integrated digital circuits (microcontrollers) with a wide range of applications, and check the constructed systems at the functional level.

Gowin: In a few years, the level of student education will improve

2018-10-05

- This is the biggest reform in science since 1989. We showed in divided Poland that we can deeply reform the state in the atmosphere of understanding and respect for different opinions. The Act broadens the autonomy of the university, it introduces a number of mechanisms that in a few years will improve the level of academic education. The level of research will also increase. We have created a solid financial base for this law - said Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education, in his interview for Radio Krakow. He emphasized that the part of the funds will be allocated to the universities in the form of state treasury bonds and can be used only for investments. Out of nearly PLN 3 billion, more than PLN 400 million

will be received by the universities in Małopolska Region. - Universities are already attracting foreign students. The Act will start the process of the opening of Polish universities to lecturers from abroad. We have already teachers from France, Italy and Spain at our universities - added Gowin.

Rector of the Białystok University of Technology awarded for his activities for the development of cooperation between science and business

2018-10-05

Rector of the Białystok University of Technology Prof. Lech Dzienis was awarded by the Chamber of Commerce and Industry in Białystok. The Chamber appreciated the activity of Prof. Dzienis for the development of cooperation between science and business. - I am glad that my efforts have been appreciated in order to connect the business of Podlasie with our university. Białystok University of Technology is a strategic partner of the national key cluster of Metal Processing. We are also active in the Eastern Construction Cluster. We work effectively with many individual companies. We also co-create study programs with enterprises. The course of furniture engineering has just begun. Soon, we will sign contracts with companies and internships and specially prepared practical classes for electrotechnic students within dual studies will take place - said Prof. Dzienis.

Nicolaus Copernicus University in Toruń extends cooperation with Tianjin Normal University

2018-10-05

The Nicolaus Copernicus University in Toruń (UMK) will continue to cooperate with Tianjin Normal University (TNU). The agreement was signed by the rector of the Nicolaus Copernicus University, Prof. Andrzej Tretyn during his stay in Tianjin at the celebration of the 60th anniversary of the Chinese uni-

versity. In Tianjin, the rectors discussed the cooperation of the local Department of History and Art with the Faculty of Historical Sciences of the Nicolaus Copernicus University. Initial arrangements involved the exchange of academic staff and the admission of Chinese history students for semester courses in English. The Chinese side also expressed interest in East and Central European Studies conducted by the Faculty of Philology at the Nicolaus Copernicus University. During the visit, an annex to the partnership agreement was also signed, enabling 10 students of Tianjin Polish Philology from October 2018 to take up studies in the field of Polish philology as a foreign language, offered by the Faculty of Philology.

Talks about the challenges of the senior policy at the University of Silesia in Katowice

2018-10-05

The Faculty of Law and Administration of the University of Silesia in Katowice invites participants to the scientific conference „Challenges for a senior policy in the 21st century”. The purpose of the meeting is to discuss the consequences for the aging population. The conference, scheduled for October 11, is addressed to scientists dealing with the labor law and social security, as well as to employees of the Social Insurance Institution, marshal offices, government institutions and organizations of senior policy. Demographic changes require integrated activities covering many spheres of social life, both in the field of law and social insurance, as well as labor market policies and health care. The conference will inaugurate scientific cooperation between the University of Silesia and the Social Insurance Institution implemented under the agreement signed in 2017.

Polish-Japanese talks on cooperation at the Silesian Medical University

2018-10-05

Representatives of Toho University, during their visit to Katowice, talked with the authorities of the Medical University of Silesia on the possibilities of cooperation. The process of establishing cooperation between representatives of the Polish and Japanese scientific and medical communities are continued from this year's Forum of „Polish Medicine of the 21st Century” in Tokyo. Visitors from Japan visited the Center for Didactics and Medical Simulation in Katowice-Ligota, where they reviewed modern simulation equipment in the operating room and intensive care unit, as well as an ambulance and a virtual anatomical table. During a few-hour visit, the hosts and guests exchanged experiences in conducting research and teaching in Poland and Japan and discussed the possibilities of cooperation between universities, the exchange of students, employees and implementation of research and development projects.

Gowin: The task of our generation is to build a strong and efficient state

2018-10-08

- It is a special inauguration, on the anniversary of the events and the people who hundred years ago ensured an independent existence for our homeland and who sought for hundred years for this existence - said Prof. Jacek Semaniak, rector of the Jan Kochanowski University in Kielce during the inauguration of the academic year 2018/2019. There will be 11,600 students and 300 PhD students at the Kielce University of Technology studying in 49 fields of study. This group includes 560 international students from 22 countries. The Deputy Prime Minister Jarosław Gowin said that «the task for our generation is to build a strong and efficient state, create conditions for the modern economy, build a prosperous society». The condition for achieving these goals is to create great universities that will excellently educate the new generation and conduct

research constituting the flywheel of Poland's civilization development - added the Minister of Science.

Professor John Maxwell Coetzee becomes doctor honoris causa of the University of Silesia

2018-10-08

Professor John Maxwell Coetzee will receive the title of doctor honoris causa of the University of Silesia in Katowice. The award ceremony is scheduled for Tuesday, October 23 in the Hall 5 of the Faculty of Law and Administration. The Council of the Faculty of Philology applied for the title on behalf of Professor Coetzee. Professor John Maxwell Coetzee is one of the greatest contemporary writers, winner of the Nobel Prize for literature (2003), two-time winner of the Booker Prize in 1983 and 1999 - and other prestigious literary prizes. He is a laureate of the highest distinction of South Africa, professor of literature, honorary member of the research center of his name at the University of Adelaide and a respected literary scholar and translator.

PhD student at the Wrocław University of Technology receives scholarships from the Kościuszko Foundation

2018-10-08

Jędrzej Górski, PhD student at the Faculty of Mechanical Engineering at the Wrocław University of Technology, became a scholarship holder of the Kościuszko Foundation. He received a grant of 15 thousand dollars for a 5-month stay in one of the American research centers. - I am planning to go to the NASA Jet Propulsion Laboratory in California for five months. During my stay I will be helping in everyday lab work as well as collecting materials for my PhD thesis - says Górski. The Kosciuszko Foundation is an American-Polish cultural and educational institution founded in 1925. Grants scholarships are addressed to young people and scientists from Poland and the USA to provide information, popularization activities and scientific exchange in the field of Polish culture and science. The scholars can get

funds for scholarships and research grants for studies, research and internships in the USA. The scholarship will cover travel costs, housing allowance as well as health and accident insurance.

KONIK 2018 - Fair of Scientific Clubs and Student Organizations of the Warsaw University of Technology

2018-10-09

On October 24 and 25, 2018, the 15th Scientific Society and Students ,Organizations Fair of the Warsaw University of Technology KONIK 2018 will be held. The event is organized by the Scientific Clubs Council of the Warsaw University of Technology in cooperation with the Students' Association of the Warsaw University of Technology. According to the Warsaw University of Technology, 70 student clubs and organizations will be presented during the two-day fair. There will be aviation enthusiasts, game development specialists, the creator of a mechanical palm prosthesis, a team involved in the design of racing cars, as well as travellers and sailors. Everyone will be able to talk to them, get to know their goals and achievements.

Conference "Church, media, society" at the Catholic University of Lublin

2018-10-09

The Catholic University of Lublin together with the editorial staff of the „ Gość Niedzielny” invite participants to the national scientific conference „Church, Media, Society”. The event will take place on October 11, 2018 at the Lublin Center for Knowledge Transfer. The conference will include three panel discussions: An image of the Church created by the people of the Church; Faith in the media and Media about the Church. The conference takes place on the 20th anniversary of the Lublin edition of the „ Gość Niedzielny” and on the 100th anniversary of the Catholic University of Lublin. The Archbishop Stanisław Budzik, Metropolitan of Lublin, took the honorary patronage over the conference.

13th Researchers' Night of the Silesian University of Technology

2018-10-09

Center for Popularization of Science together with the city of Gliwice invite participants to the 13th Researchers' Night of the Silesian University of Technology. This year's event will take place on October 13. From 15 to 22 pm, nearly 120 presentations from the Silesian university are planned. The viewers are invited to play the games, to participate in laboratory demonstrations, scientific experiments, to learn about the issues from the world of exact sciences and humanities - including physical, chemical, electronic, mechanical and mining demonstrations, to take a part in unique dance lessons and to learn about German, English, Russian, French and Chinese culture. «Junior and senior» shows, prepared by specialized and qualified academic staff of the Silesian University of Technology will be presented on university campuses in three cities: Gliwice, Zabrze and Katowice. The honorary patronage over the event was taken by the Ministry of Science and Higher Education and the Board of Education in Katowice. More: <http://www.nocnaukowcow.com.pl/>

Higher schools from Bielsko-Biala and Maan in Jordan to cooperate

2018-10-09

The University of Technology and Humanities in Bielsko-Biala will cooperate with the Jordanian Al-Hussein Bin Talal University. The agreement was signed by the rectors of both universities - Prof. Najib Abou Karaki and Prof. Jarosław Janicki. The document, signed during the visit of the Polish delegation to Jordan, assumes in the first stage cooperation and acquisition of students for the Faculty of Mechanical Engineering and Computer Science, especially to the Department of Computer Science and Automation. In subsequent stages, didactic and research cooperation in other areas and joint projects are planned. The delegation of the Bielsko-Biala university was accepted by the Minister of Higher Education and Scientific Research in the Hashemite Kingdom of

Jordan, Prof. Adel Tweissi. The Polish delegation submitted all documents necessary for joining the universities authorized to cooperate with Jordanian partners. Information about the meeting was recorded by the Jordanian press.

International Communication in the Network Society conference in Wrocław

2018-10-09

The Department of International Communication at the Institute of International Studies of the University of Wrocław invites students to participate in the International Communication in the Network Society conference, which will take place on October 11-12 in Wrocław. The conference will be attended by scientists who in their research deal with the impact of new technologies on social communication. On the first day, the organizers planned a plenary session with the participation of scientists from Poland, Germany, the United States and Italy. The second day will bring panel sessions devoted to new phenomena in global communication, intercultural communication and human rights, political and network communication as well as international PR and marketing. The debate will be closed by a round table meeting, during which media and communication researchers from the leading Polish research centres will discuss the media issues. More: www.intcomm.uni.wroc.pl.

University of Economics in Wrocław to launch Bioeconomic Laboratory

2018-10-09

The Bioeconomic Laboratory of the University of Economics in Wrocław has received over 6.7 million PLN of EU funding for BioInLab project. Its implementation will contribute to strengthening the position of the Wrocław university as a center conducting high-quality research. The BioInLab bio-economic laboratory will provide research services for entities from the Lower Silesia in the field of physicochemical methods enabling the development of new products or technologies already existing on the bio-waste, bioprod-

ucts and high-quality food markets. The investment will require adapting one of the university buildings to the needs of the laboratory and purchasing the necessary equipment. The project will be implemented for two years - starting from January 2019.

Gowin: We have to rejuvenate Polish science

2018-10-10

- For sure, we need to rejuvenate Polish science, it is beyond any doubt. We have very talented young scientists - said Deputy Prime Minister Jarosław Gowin in an interview for Polish Radio Białystok. The Minister of Science and Higher Education noted that many young Polish scientists went abroad and this is a huge, irreparable loss. - Anyway, I am trying to get as many of them as possible back to Poland- said Gowin. First, the National Academic Exchange Agency was established. Its first program the «Returns» is to offer attractive jobs at Polish universities to these young super-talented scientists. I must say that it is sad that there is more interest in this program among the scientists abroad than the interest of the universities to accept these very talented young scientists - added Deputy Prime Minister Gowin.

PhD students' conference at the Warsaw University of Life Sciences

2018-10-10

PhD students of the Faculty of Production Engineering of the Warsaw University of Life Sciences and the Institute of Agrophysics of the Polish Academy of Sciences are organizing on October 25, 2018 the PhD Students' Conference entitled „Four Elements - Contemporary Problems in Life Sciences”. The purpose of the event is to exchange knowledge covering the fields of agricultural, forestry and veterinary, natural and technical sciences. The conference is addressed to PhD students who would like to present their scientific interest, the fragment of their own research or to share the insights from their scientific research in a wider group of PhD students. The event will be held under the patronage of Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education.

Grant for PhD scholarships for the University of Humanities and Natural Sciences in Częstochowa

2018-10-10

University of Humanities and Natural Sciences in Częstochowa is one of the beneficiaries of the „PROM” program - an international scholarship exchange of PhD students and academic staff. For its implementation, the university will receive over PLN 680,000 from the National Academic Exchange Agency. Thanks to the subsidy, it will be possible to finance the costs related to the participation of PhD students and academic staff in short forms of education of international character. «PROM» concerns both trips of representatives of the Polish university abroad, as well as visits of PhD students and academic staff from abroad. Scholarships may also be used for stays connected with acquiring materials for didactic or scientific work, acquiring the ability to operate unique research equipment or to increase skills related to the preparation of international grant applications.

Gdańsk University of Technology rebuilding the historic building into a multidisciplinary research centre

2018-10-10

Gdańsk University of Technology is renovating a historic building in the oldest part of the campus. After the reconstruction, it will become a modern centre performing the function of interdisciplinary research, museum of technology and art gallery. The building will include the special zones for students, employees and academic organizations as well as a meeting place for the science and business, a media library with a bookstore, a press room and a café connected to a club room. The university will invest PLN 14.2 million in renovation and reconstruction of the facility, including PLN 3.9 million from the Ministry of Science and Higher Education. Thanks to the subsidy, an interdisciplinary centre GUT Medi-

aLab will be created. It is planned as a space for the integration of research for teams from various faculties of the Gdańsk University of Technology. It will contain tools for two- and three-dimensional presentations in 4K resolution, electronic boards and automated systems for sharing research results and consultations. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGncmoQv7K0/content/budynek-%E2%80%99Ehydromechanika%E2%80%9D-zyska-nowe-oblicze

Gdańsk Medical University to receive Grant for Polish-Canadian research

2018-10-10

Dr Marcin Gruszecki from the Department of Radiological Informatics and Statistics of the Gdańsk Medical University received a grant as part of the MINIATURE 2 competition announced by the National Science Center. His research: «The influence of hypoxia on selected parameters of the brain and cardiovascular physiology» will be implemented jointly with Prof. Patrick Neara from the University of Regina in Canada. The aim of the search for scientists will be to obtain 30-minute records of blood pressure, ECG and oxygen saturation in hemoglobin chamber conditions. Hypoxia causes a number of changes in the brain, including increased perfusion, blood volume, blood-brain barrier permeability, up to a slight cerebral oedema. Better understanding of the interactions between blood pressure, heart and oxygen saturation level will contribute to a deeper understanding of the pathophysiology of high-altitude disease or sleep apnoea syndrome.

University of Economics in Wrocław gains 700,000 PLN for PhD students

2018-10-10

The project of the international scholarship exchange of PhD students and academic staff submitted by the Center for Scientific Research at the University of Economics in Wrocław received over 700,000 PLN financing support from the National Academic Exchange Agency. The implementation of

the project will enable the organization of consultations for PhD students and young scientists with foreign universities' academies, and organization of bilateral visits to conduct scientific research and obtaining data for PhD dissertations and grant applications, as well as publication in prestigious scientific journals. The money will allow to launch a summer school, to prepare joint publications and to develop and verify the concept of scientific projects. Thanks to co-financing, active participation of PhD students and academic staff in foreign conferences will be possible to present the results of research and to develop cooperation.

Student of the Silesian University of Technology wins a scholarship of New Technologies for Girls

2018-10-10

Nikola Beplik, student of the first year of biomedical engineering at the Silesian University of Technology, received a scholarship of the fourth „New Technologies for Girls” program, implemented by Intel and the Perspektywy Educational Foundation. The «New Technologies for Girls» program is a response to a minimal presence of female scientists in the area of new technologies. According to different approaches, the share of women in the IT industry is up to 15 percent. The creators of the program, the Intel company and the Perspektywy Educational Foundation, have decided to offer their female graduates and students a support program for their individual development. Scholarship holders will receive various substantive and financial support. They will be mentored by experienced Intel employees. They will also receive a scholarship of 12,000. gross PLN, which will cover part of their expenses during the studies. Talks about academic cooperation between Poland and Papua New Guinea

2018-10-11

Deputy Minister of Science and Higher Education Sebastian Skuza met Pila Niningi, head of the department responsible for higher education and science in Papua New Guinea. The topics of the talks were academic cooperation and the possibility of student exchange between Poland and Papua New Guinea. Ministers discussed the possibility of participating students from Papua New Guinea in the Ignacy Łukasiewicz scholarships. The National Academic Exchange Agency, which was established to facilitate scientific mobility, can help in this area. Minister Pila Niningi pointed out that Papua New Guinea is very interested in intensifying scientific and research cooperation as well as academic exchange with Poland. The minister also confirmed the willingness to invite Polish medical students to hospital practices in the field of tropical diseases.

Award for the Laboratory of Railway Movement of the Krakow University of Technology

2018-10-11

The Office of Rail Transport settled the contest „Safety culture in rail transport”. One of the awards was received by the Krakow University of Technology for launching the Laboratory of Railway Traffic Engineering. The Krakow laboratory is equipped with railway traffic simulators and enables practical learning of traffic management principles and actions in atypical situations. It was established at the Institute of Road, Railway and Transport Engineering at the Faculty of Civil Engineering at the Krakow University. It is equipped with 12 computer workstations, which reflect the work of the traffic dispatchers. The studio is used for all students of transport, including rail transport specialties. Ultimately, classes are planned for students of Construction with specialty railways.

Gdansk University of Technology receives a positive institutional assessment of the European University Association

2018-10-11

Gdańsk University of Technology (PG) has successfully completed the procedures of international institutional assessment by the European University Association (EUA) and obtained the right to use the prestigious EUA - Institutional Evaluation Program. The Gdańsk University is the third institution in Poland to receive this accreditation. The EUA evaluators visited the University twice. They met with the authorities, the university team preparing the self-assessment report, teaching staff and students as well as the university's environment. EUA assessed PG in terms of organization and management of the university. Committee members paid attention to the strengths of the PG and pointed out directions for further development. The members of the commission were impressed by the assessments of the students and graduates, in particular foreigners, who were proud about their choice of university.

University of Gdańsk to cooperate with China Ocean University in Qingdao

2018-10-11

The University of Gdańsk and China Ocean University in Qingdao have signed a cooperation agreement on the exchange of employees, students and PhD students and joint scientific research. The cooperation agreement, which will first comprise the Faculty of Oceanography and Geography, Faculty of Economics and the Faculty of Law and Administration, was signed by the rectors of both universities, Prof. Jerzy Gwizdała and Prof. Yu Zhigang during a delegation visit from China in Gdansk. One of the points of the visit was a meeting at the University Oceanograf research ship. The ship's crew presented the unit's research potential and its equipment. The Chinese delegation was very impressed with the modern solutions used in this floating research laboratory.

Ministerial scholarships for Toruń scientists

2018-10-11

Three researchers from the University of Nicolaus Copernicus in Toruń will receive scholarships from the Minister of Science and Higher Education awarded to scientists conducting high-quality research with an impressive scientific output. Dr Paweł Pomastowski is Associate Doctor at the Interdisciplinary Center of Modern Technologies. He graduated from master's and PhD studies at the Faculty of Chemistry. He deals with biocolloid chemistry and surface physicochemistry. Dr Michał Piechowicz is an Associate Professor at the Department of International and European Law. His research interests are focused on the issues of the decision-making process in the European Union, lobbying and representation of interests at the supranational level and new forms of communication. Dr Marta Pokrywczyńska is a biotechnology graduate from the Faculty of Medicine of Collegium Medicum. She defended her PhD thesis 'The role of mesenchymal stem cells in the remodeling of the reconstructed rat bladder wall' in 2011. More: <https://www.umk.pl/wiadomosci/?id=25687>

Lecture of father Leon Knabit at the University of Silesia

2018-10-11

On Saturday - October 20, Father Leon Knabit OSB - Benedictine of the Tyniec Abbey, author of articles and books, laureate of the Blog of the Year 2011 Award in the category of professional blogs will be the guest of the Faculty of Theology of the University of Silesia. In the faculty hall at ul. Jordana 18 in Katowice Father Leon Knabit will give two lectures: at 11:00 - «Knowledge and wisdom seek a covenant with holiness. Professor Saint John Cantius speaks today» and at 13:30 - «Faith is not moving away from the world.» Both lectures are free. Father Leon Knabit OSB was one of the editors of the «Cenobium» journal. He conducted television programs (including «Father Leon invites», «Salomon» and «Credo»), he was awarded the Knight's Cross of the Order of Polonia Restituta. He got also a Medal of Smile.

New program of the National Academic Exchange Agency for PhD students

2018-10-12

The Wilhelmina Iwanowska program of the National Academic Exchange Agency has begun. It includes foreign trips lasting from 6 to 12 months. The program is addressed to PhD students. As part of this new project run by the National Academic Exchange Agency, PhD students representing all fields of science will be given a chance to travel to the best research centers in the world. They may be accompanied by their spouses and children and, in the case of disabled persons, their caretakers. Beneficiaries of the program will be able to take part in PhD studies, implement the «PhD Implementation» program, conduct research, obtain materials for the dissertation or scientific publication. The first trips can be carried out from the beginning of September 2019. More: <https://nawa.gov.pl/naukowcy/program-im-iwanowskiej>

Tianjin delegation Polytechnic University visited the Jan Kochanowski University in Kielce

2018-10-12

The Chinese delegation, headed by Hong Zhao, vice president of Tianjin Polytechnic University, talked with the authorities of the Jan Kochanowski University in Kielce about widening the cooperation between universities. The Jan Kochanowski University has been cooperating with Tianjin Polytechnic University for 4 years. Universities conduct a student exchange, which mainly includes science and arts. This year, 27 students from Tianjin came to Kielce. They study law, environmental protection, physics, design, artistic education and fine arts. As the Kielce University informs in the near future, the cooperation is to be extended by systematic, several-week courses and study visits for students and university staff from Poland and China as well as by joint artistic events.

Agreement on cooperation between the State Higher Vocational School in Chełm and LOT Crew

2018-10-12

The State Higher Vocational School in Chełm has signed a cooperation agreement with LOT Crew Ltd a company specialized in pilot training and recruitment for LOT Polish Airlines. - There is a huge market demand for pilots whom we train. LOT Polish Airlines has asked us to create a special student group to support with additional training process dedicated to work at LOT Polish Airlines - said Prof. Eng. Arkadiusz Tofil, rector of the State Higher Vocational School in Chełm. Thanks to the agreement, students of the Aeronautical Engineering specialization and the Pilotage of Airplane specialization will be able to take their apprenticeships in Polish Airlines LOT. In this academic year, the group under the LOT Crew will have 15 students.

Dual studies of Electrical Engineering at the Białystok University of Technology

2018-10-12

Białystok University of Technology has signed a contract with 12 companies. Thanks to this, it was possible to run dual studies at the electrotechnical faculty. - We are starting a program that is new not only at the Białystok University of Technology, but also at most universities in our region - said prof. Lech Dzienis, university rector. For students, it will be a unique opportunity to get closer to practice already during their studies. On the other hand, entrepreneurs who have declared their participation in the project will have the opportunity to «educate» their future employees. The contact between students and enterprises will be much closer during these studies than in any other type of education - added the rector of the Białystok University of Technology. Twelve companies from the electrotechnical industry joined the dual degree project at the Białystok University of Technology.

University of Technology and Humanities in Bielsko-Biała receives PLN 10 million for improving the quality of education

2018-10-12

The University of Technology and Humanities in Bielsko-Biała received PLN 10 million for the implementation of the project „Ordering competences - Nursing from education to employment”. The agreement in this matter was signed by the rector of the university - Prof. Jarosław Janicki and Undersecretary of State in the Ministry of Health - Maciej Miłkowski. The aim of the project is to improve the quality of higher education in the field of nursing, which is expected to cause more interest of an additional number of graduates. The implementation of the project will allow to develop professional competences and qualifications of medical personnel corresponding to the epidemiological and demographic needs of the country. The goal will be achieved by organizing a series of medical vocational training for graduates.

Registration for the Laboratories' Night of the Medical University of Wrocław started

2018-10-12

Students can sign up for the Laboratories' Night of the Medical University of Wrocław. – On October 20, we will learn the unusual use of plants, see cell cultures, look at the pharmacy recipe, carry out diagnostic tests and isolate our own DNA - announced the organizers. Not available on a daily basis, the university's laboratories will be opened in two locations - on the campus of the clinics at Street Chałubińskiego and at the Faculty of Pharmacy with the Department of Medical Analytics. Participants will have the opportunity to hear the lecture of Dr Bożena Karolewicz, head of the Chair and Department of Drug Form Technology, on the subject of modern forms of medicine. In addition, a series of workshops will be provided concerning methods of determining paternity, bacteria and microworld around, diagnostic tests and natural medicines. Viewers will also be able to visit the University Medical Simulation Center.

Silesian University of Technology invites participants to the Silesian Science Festival in Katowice

2018-10-12

Until October 31, students can submit their applications for the 3rd Silesian Science Festival in Katowice, which will take place in January 2019. The event, scheduled for January 2019, is co-organized by the Silesian University of Technology. The festival is an opportunity to popularize knowledge in various forms: lectures, exhibition stands, exhibitions, workshops, experiments. Applications can be submitted electronically on the festival website. The organizers encourage to submit lectures and interactive demonstrations. As in previous years, the program of the 3rd Silesian Science Festival will be divided into six areas of knowledge: socio-human sciences, art, technical sciences, exact sciences, medicine and health sciences, and natural sciences. In addition,

the following zones will be available: space zone, sports zone, e-sport zone, children zone, as well as exhibition and lecture spaces. Last year, the event was visited by over 30 thousand people. More: <http://www.slaskifestiwalnauki.pl/>

Maritime University in Gdynia nominated for the Polish Intelligent Development Award

2018-10-12

Gdynia Maritime University was nominated for the Polish Intelligent Development Award 2018. Nomination in the University of the Future category was awarded for the project „Didactic infrastructure supporting practical training at the Faculty of Mechanical, Electrical and Navigation Maritime University of Gdynia - purchase of equipment for teaching laboratories (iMEN)”. As part of the project, the university modernized and launched 20 laboratories, which will allow to broaden and adapt the educational offer, among others to the needs of enterprises from the port-maritime, offshore and transport and logistics industries as well as land based maritime economy. The Innovative Development Award receives the most innovative solutions and innovative investments that are created in Poland. As part of the nomination, entities are identified that demonstrate their future-oriented activities and do not hesitate to undertake new challenges.

Attractions of the Laboratories Night at the University of Wrocław

2018-10-15

The University of Wrocław invites participants to the Night of Laboratories 2018, which will be held on October 20. Its employees prepared an evening full of scientific attractions for all visitors of the university. In the Documents Research Laboratory of the Department of Forensics at the Faculty of Law, Administration and Economics, students will be able to find out how to check the authenticity of documents, how to recognize counterfeit money, and learn how to verify identity cards, passports, driving

licenses and registration documents. The Faculty of Biotechnology invites viewers to three workshops within program „Discover the secrets of genes.” The guests will get to know the modified organisms, including their advantages and disadvantages and how they are created. There will also be attractions at the Faculty of Earth Sciences and Environmental Sciences, where scientists will explain what a geologist's job is about. It will also be possible to independently examine the surface of the rocks with the binocular loupes and the polarizing microscope.

Talks on the challenges and threats of national and international security

2018-10-15

The Department of International Relations of the Institute of Political Sciences and Journalism of the University of Silesia in Katowice and the Police Headquarters invite participants to the second national scientific conference „Challenges and threats to national and international security in the 21st century”. The aim of the conference is to try to identify the most important challenges and threats to internal and international security in the 21st century and formulate recommendations for policy-makers in Poland's security policy. The results of scientific research will be confronted with the experiences of people representing institutions whose main task is to ensure state security. The organizers announced the topics of human traffic and drug trade and the so-called designer drugs as a social problem and a security threat. Other problems of European and global internal security in the second decade of the 21st century will also be analysed.

Ecological agreement of the University of Economics and the Wrocław housing cooperative

2018-10-15

Wrocław University of Economics and Wrocław-Południe Housing Cooperative have signed an agreement, thanks to which the university will obtain energy self-sufficiency until 2030. The international Climate Reality Project is initiating and supporting the energy transformation. It has selected Wrocław's university as the future leader of changes in the field of renewable energy sources. The University will be a participant in this process through scientific research and didactics as well as through ecological investments on the campus. The Wrocław-Południe Housing Cooperative has launched the Wrocław Solar Power Plant - the only distributed power plant in Poland based on photovoltaic cells installed on the roofs of buildings. The researchers will conduct scientific research in the field of electricity production.

Medical University of Wrocław received over PLN 5 million

2018-10-15

The Medical University of Wrocław has received over PLN 5 million for the implementation of a project developing the practical postgraduate education of PhD students at the Medical Simulation Center. By June 2022, nearly 500 physicians from all over Poland will benefit from the project. High-specialist post-graduate courses, beyond the specialization program, will be prepared for the project participants. Their thematic scope concerns medical issues based on Evidence Based Medicine related to the development of medical skills in the field of general and pediatric surgery, chest surgery, vascular surgery, neurosurgery, orthopedics and traumatology of the musculoskeletal system, urology and pediatric urology. The project assumes the implementation of two courses: «European Trauma Course» and "Intensive Practical Course of Endoscopic Surgery in Children". Six simulation laboratories equipped with the necessary instruments will be launched within the project.

25 years of cooperation of the Krakow University of Technology with the University of Tennessee

2018-10-16

In Krakow, on October 15-16, 2014, a conference took place that summarized 25 years of cooperation between the Krakow University of Technology and the College of Architecture and Design at the University of Tennessee in Knoxville - one of the best public schools in the United States. The Tennessee program is the longest running exchange program offered to architecture students in the United States and Poland. To date, over 600 students have used the possibility of student exchange as part of the Tennessee Program. During the conference, Prof. Eng. Jan Kazior, rector of the Krakow University of Technology, handed jubilee medals to deans of partner schools. Professor Scott Poole, dean of the College of Architecture and Design, University of Tennessee and Prof. Jason Young, director of the Architecture Program, University of Tennessee presented their experiences related to their scientific and didactic work.

Lectures by Prof. Yoshida at the Academy of Mining and Metallurgy in Krakow

2018-10-16

By October 18, 2018, in the Energy Center of the AGH University of Science and Technology in Krakow, Professor Kazuya Yoshida from Tohoku University in Japan will hold a series of lectures. Professor Kazuya Yoshida is an outstanding global specialist in the field of construction of satellites and space robots. He also acts as CTO (Chief Technology Officer) in the company ispace realizing the project of the lander, which is to be soon delivered to the Moon. According to the organizer of the event, which is the Faculty of Mechanical Engineering and Robotics AGH, the Professor Kazuya Yoshida's lectures will be devoted to the following topics: orbital robots, planetary works, microsatellites and future issues.

Warsaw University of Technology opens the Central Laboratory of Technical Inspection

2018-10-16

Minister of Entrepreneurship and Technology Jadwiga Emilewicz took part in the opening ceremony of the Central Laboratory of Technical Inspection at Warsaw University of Technology. The laboratory was created for the purposes of destructive and non-destructive testing of construction materials used in advanced industrial and utility constructions. As emphasized the rector of the Warsaw University of Technology Prof. Jan Szmidi, this initiative strengthens the position of the university through close cooperation with the Office of Technical Inspection - the key institution for the Polish economy in the area of technical security. The cooperation expands the possibilities of the development of research and didactics carried out at the Institute of Manufacturing Techniques of the Faculty of Production Engineering - added the rector.

Academy of Physical Education in Wrocław implements the international project „Kid Move”

2018-10-16

The Academy of Physical Education in Wrocław is implementing the international project „Kid Move” devoted to physical activity of children and youth. The project is financed by the European Union through Education, Audiovisual and Culture Executive Agency. The project is devoted to the physical activity of children and adolescents, the factors determining physical activity and its role in maintaining the efficiency of cognitive processes. The project leader is the Metropolia University of Applied Sciences from Helsinki (Finland) and the partners - in addition to the Wrocław university - are Windesheim University of Applied Sciences at Zwolle (Netherlands), Masaryk University at Brno (Czech Republic) and sports clubs: AZS-AWF Wrocław, Special Heroes - Arnhem (Holland), Bulldogs Brno (Czech Republic), Icehearts of Helsinki (Finland) and Sportunion-Steiermark - Graz (Austria).

Second season of the Interdisciplinary Scientific Seminar of the Wrocław University of Technology starting

2018-10-16

Wrocław University of Technology begins the second series of meetings as part of the university Interdisciplinary Scientific Seminar. On Tuesday, October 23, the lecture „Historical coexistence of Poles and Jews and the challenge of reconciliation” will be given by Zeev Baran - architect and honorary consul of the Republic of Poland in Jerusalem. Zeev Baran was born in Vilnius in 1935. He survived the Holocaust thanks to the help of Helena and Bronisław Krzyżanowski. After the war he emigrated with his mother and brother to France, and in 1948 the family reached Israel. He graduated in architecture and urban planning at the Technological University in Haifa. He specializes in selective projects and in projects for developing countries and for minorities in Israel. For many years she has been involved in the promotion of Poland as well as dialogue and cooperation between our nations. The Interdisciplinary Scientific Seminar is a series of lectures for students, PhD students, academics and anyone interested in deepening knowledge of exact sciences.

University of Life Sciences in Poznań promoted in Asia

2018-10-16

The project Promotion of the educational offer of the University of Life Sciences in Poznań with the use of digital marketing instruments on selected Asian markets (# PULS4YOU) will be co-financed in the competition of the National Academic Exchange Agency. The aim of the project, addressed to recipients from Uzbekistan, China, India and Kazakhstan, is to increase the activity of the university in the promotion of areas of its activity using modern instruments. This goal is to be achieved through building awareness of the university's brand and increasing its recognition in the target markets, creating the desired image, promoting the offer and developing a digital campaign and video marketing. The com-

petition could finance integrated promotion and information campaigns, online activities in social media, website positioning, cooperation with bloggers, youtubers, adwords campaigns, e-learning, and promotional films and PR activities.

College of Ecology and Management becomes the laureate of the Polish Intellectual Development Award

2018-10-17

The College of Ecology and Management in Warsaw became the laureate of the Polish Intellectual Development Award 2018. The contest was held under the patronage of the President of the Patent Office of the Republic of Poland. The Warsaw University of Technology was awarded in the University of the Future category «for the highest quality education of students based on a modern didactic and scientific-research base». From 2016, the winners of the Award are organizations that show the future orientation in their activities. All projects, investments and ventures implemented by the winners are characterized by innovation and are the best examples of sustainable and intelligent development. The awards will be presented during the International Forum of Intelligent Development 3.0 Uniejów 2018, which will be held on October 18-20, 2018.

Visit of Deputy Prime Minister Gowin at the State Higher Vocational School in Chełm

2018-10-17

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin visited the State Higher Vocational School in Chełm. He visited the Center for Engineering Studies at the University of Chełm and met with the participants of the Polish-American Congress, which took place in Lublin from October 11 to October 14. Deputy Prime Minister Gowin also held talks with a senator and congressmen from the state of Wisconsin. The talks concerned the strengthening of Polish-American cooperation in the area of economy and science.

During the visit to the Engineering Studies Center of the State Higher Vocational School in Chełm, guests could see innovatively equipped laboratories and hold talks on scientific cooperation.

Exhibition „Polish aviation achievements in the 100th anniversary of Independence Recovery” held at the Warsaw University of Technology

2018-10-17

The Warsaw University of Technology on 22-23 October 2018 invites participants to the exhibition Polish aviation achievements in the 100th anniversary of Independence Recovery „Per aspera ad astra”. In the main building of the Warsaw University of Technology the viewers will be able to see the legendary Polish fighter - PZL P.11c and the world's first Polish moto-glider with electric drive AOS-71. The exhibition will be accompanied by a conference at which lectures will be given by representatives of the Air Force Institute of Technology, Institute of Aviation, Military University of Technology, General Electric, Airbus Defense and Space, Thales PL, Thales Alenia Space and student science clubs operating at the Warsaw University of Technology.

Students of Gdańsk University of Technology receive scholarships of the „New Technologies for Girls” program

2018-10-17

Six Gdańsk University of Technology female students received scholarships from the fourth „New Technologies for Girls” program. The winners will receive financial support, mentoring and the internship at the Intel Research and Development Center in Gdańsk. Scholarships were received by Justyna Dziarnowska (biomedical engineering), Barbara Kludel (automation and robotics), Angelika Konderak (IT), Julia Pacuła (IT), Katarzyna Wojdalska (nanotechnology), Joanna Woźna (IT). Students will receive support in the amount of 12 thousand PLN to cover part of expenses related to studies, mentoring by employees of Intel and the internship at the company's headquarters. The «New Technologies for Girls» program was created by Intel Technology Poland in cooperation with the Educational Foundation «Perspektywy». This is the first scholarship program in Poland designed exclusively for women who see their future in the IT area. More: <https://www.stypendiadladziewczyn.pl/pl/>

Researchers of the University of Life Sciences in Poznan receive A. P. Dekaban scholarships

2018-10-17

Two researchers from the University of Life Sciences in Poznań received the scholarship of the A. P. Dekaban Foundation. Researchers will take internships at the Canadian University of British Columbia in Vancouver. The grants were given to Dr. Joanna Helena Śliwowska (Faculty of Veterinary Medicine and Animal Sciences, Institute of Zoology) - Senior Dekaban Travel Award and Dr. Maciej Jarzębski (Faculty of Food Sciences and Nutrition, Department of Physics and Biophysics) - 5-month Post-doctorate research grant. Foundation of A. P. Dekaban was founded in the early 1980s by the eminent Dr Ana-

tol Dekaban and his wife Pamela Liddle-Dekaban. The aim of the Foundation is to offer new academic and technological achievements from the world to Polish academic scholars. Granted scholarships are intended for academic teachers who are 40 years old and have a PhD degree.

National Academic Exchange Agency to launch new program International Alumni

2018-10-18

The National Academic Exchange Agency (NAWA) is launching the International Alumni Program, whose main objective is to support universities and scientific units providing education in the development of long-term relationships with foreign graduates, using their knowledge and experience in educational processes and developing the brands of Polish institutions abroad. The program is addressed to the universities, scientific organizations of the Polish Academy of Sciences, research institutes and international scientific institutes established on the basis of separate regulations, and operating in Poland. Applications for the program can be submitted until December 14, 2018.

New electric motorcycle designed by students of the AGH University of Science and Technology in Krakow

2018-10-18

On Thursday, October 18, 2018, the presentation of the latest electric motorcycle constructed by students from the E-Moto AGH team will take place on the campus of the AGH University of Science and Technology in Krakow. The «Staszic» motorcycle is the second motorcycle designed by the team from AGH. During the presentation, students will present the possibilities of the motorcycle during a test drive and will talk about the parameters of their machine, comparing it to their previous design. The latest construction of AGH students took part this year at Red Bull Megawatt 111, the most prestigious competition for off-road motorcycles in Poland.

4th University Business Debate held at the University of Economics in Krakow

2018-10-18

At the University of Economics in Krakow, the 4th University Business Debate was held, during which the participants discussed subject of entrepreneurship and academic innovation as well as the model of cooperation between economic universities and employers. - Further development of the economy is possible only through knowledge-based development, which is an element of employees' qualifications and which brings technological and organizational progress through innovation - said Deputy Minister of Science and Higher Education Piotr Dardziński during the debate. The Ministry of Science and Higher Education undertakes legislative and program initiatives, aimed at bringing the world of science and business closer together - he added. During the discussion, the Minister emphasized that the implemented by the government Strategy for Responsible Development as the basis for the competitiveness of the Polish economy is indicated by the development of innovative companies implementing permanent mechanisms of cooperation with the world of science.

European Commission awarded the Warsaw School of Economics

2018-10-18

The European Commission awarded the Warsaw School of Economics (SGH) with the „HR Excellence in Research” prize awarded to institutions that implement the „Strategy for increasing the attractiveness of working conditions and career development of researchers” (The Human Resources Strategy for Researchers - HRS4R). By implementing the HRS4R strategy, the scientific units commit to provide favorable working conditions, career development, mobility and transparent recruitment processes for researchers. Thus, the university contributes to increasing the competitiveness of the European Research Area and the attractiveness of the European science system worldwide. The «SGH HR Action Plan and Strategy Plan» developed together with the application documentation developed at the Warsaw University was submitted for evaluation in July 2018. The prepared documentation has been positively evaluated by the European Commission. SGH will implement planned activities for the next two years. University of Life Sciences in Poznan to cooperate with the University of Lvov

2018-10-18

The Faculty of Veterinary Medicine and Animal Sciences at the University of Life Sciences in Poznan has established cooperation with the Lvov National University of Veterinary Medicine and Biotechnology. The cooperation agreement was signed by the dean of the Faculty of Veterinary Medicine and Animal Sciences, Prof. Piotr Ślósarz and rector of the Lvov university, Prof. Volodymir Stybel. The first stage of the joint activities will be the exchange of students from mainly veterinary and zootechnical courses as part of internships. The agreement also assumes joint scientific research, organization of bilateral seminars and cooperation of students within scientific circles and conferences. The signing of the

contract is the result of long-term contacts between the director of the University Center of Veterinary Medicine at the Poznań University Dr. Maciej Gogulski with the Lvov National University.

New laboratory at the University of Technology and Life Sciences in Bydgoszcz

2018-10-18

At the University of Technology and Life Sciences in Bydgoszcz, a new laboratory will be constructed to conduct testing of rail vehicle equipment. The cornerstone for the construction of a new research facility was laid on October 16. The results of the tests carried out in the new hall will be used to improve the reliability of rail vehicles manufactured by the Pojazdy Szynowe PESA Bydgoszcz. The main hall's user will be the Faculty of Mechanical Engineering of the Bydgoszcz University. The building is part of the project «Laboratories of technical and exact sciences dedicated to the development of research potential in the field of innovative solutions and technologies of key importance for the economy of the Kuyavian-Pomeranian Voivodeship». The aim of the project is to improve the quality and increase the possibility of conducting high-quality scientific research, including the implementation.

Graduates-innovators from the Gdańsk University of Technology awarded

2018-10-18

Gdańsk University of Technology for the 16th time awarded the Prof. Romuald Szczęśny Prizes to university graduates. The competition jury rewards student works characterized by a high level of innovation. The first award was received by Szymon Grocholski for the project «Platforms for the rehabilitation of children with cerebral palsy». Awards and financial prizes were also given to: Agnieszka Mikołajczyk for her work «The use of computational intelligence methods for diagnosis and classification of abnormal states - Selected applications in medicine»; Mateusz Bryk for «Analysis of the problems of rapid start-ups and withdrawals of high-power

turbines” and Mateusz Burtowy for „Antenna with controlled beam for V2X applications in the IEEE 802.11p standard”. Professor Romuald Szczęśny graduated from the Electronics Department of the Gdańsk University. His PhD thesis and pioneering research work focused on modeling and simulation of power electronics systems.

The Nicolaus Copernicus University in Toruń preparing a portal for students and candidates from abroad

2018-10-18

The Nicolaus Copernicus University in Toruń is preparing a portal for foreign students and candidates. The „Study in Toruń” portal will be a source of information about the possibilities of studying, social and scholarship offer, as well as the advantages of the University and the city. The portal will be run in English, Chinese and Russian language versions. It is aimed to encourage candidates from abroad to study at the University of Toruń. The recipients will find there information on the study offer and costs of living as well as information on the life of the university and the city. The website will inform about university successes, cultural events, communication and offers dedicated to foreign students. It will also be a recruitment tool integrated with the DreamApply platform. The blogs of foreign students will be also included. The project will be financed by the National Academic Exchange Agency as part of the «Modern Foreign Promotion» program.

University of Lodz invites participants to the conference „Aging with dignity”

2018-10-19

The Faculty of Philology and the Faculty of Economics and Sociology of the University of Lodz in cooperation with the Activus Foundation are organizing a scientific conference on October 25 entitled „Aging with dignity”. As part of the event, a dozen presentations were planned within two modules: «When does old age begin?» And «Senior project in danger - presentation of the effects of the project and involvement of the University of Lodz in the senior issues in the region of Lodz». Conference participants will try to find out how to deal with issues related to seniors in the world of challenges that society faces today and in the near future, in connection with demographic forecasts on social structure i.e. a dynamic increase in the share of older people in society.

Recruitment of students - volunteers to the Student Rescue Service starts in Białystok

2018-10-19

The University of Białystok has started recruitment for the Student Rescue Service. Students - volunteers who would like to help the pupils of socio-therapeutic day care centers with their homework, can apply until October 26. - In this semester, we would like to support 12 socio-therapeutic day care centers in Białystok, Supraśl, Sokółka and Kuźnica Białostocka, as well as a family orphanages. Work for children is an opportunity to gain invaluable experiences, strengthen interpersonal competences in contact with other people. The Student Rescue Service started in spring 2013. So far, several hundred students have been involved in the volunteering, mainly from the University of Białystok.

Krakov University of Technology to co-organize international conference in Beirut

2018-10-19

On October 19, 2018, the international conference „Post War Reconstruction: The Lessons of Europe” will be held in the capital of Lebanon, organized by the Lebanese-American University in Beirut with the Krakow University of Technology. The Beirut conference is to be a forum for the presentation of scientific papers that deal with the problems of rebuilding the country after the destruction caused by armed conflicts. Participants of the event will present and summarize various models of activities in this area that were undertaken after the end of World War II in Poland, Germany, France, Italy and Great Britain. The conference will be accompanied by an exhibition addressing the impact of architecture on the creation of Polish national identity in the interwar period.

Pomeranian Medical University in Szczecin to expand the didactic and clinical-research center

2018-10-19

The Pomeranian Medical University in Szczecin signed a letter of intent with the City of Szczecin regarding investments in the area of streets Unia Lubelska and Zimowski. The university wants to build there a modern didactic and clinical-research center for 15 academic units. The creation of modern research laboratories will enable large-scale research projects and the search for effective methods of cancer therapy. It will be possible to expand the educational offer with modern virtual reality technologies, medical e-learning platforms or expanding cooperation with medical simulation centers. - We know that the investment is serious, we believe that the rector will obtain the necessary funds. I believe that the government will send funds to Szczecin to improve the center, which can further develop and affect not only Poland but also our western neighbors - said Piotr Krzystek, mayor of Szczecin, during the ceremony of signing the document.

University of Toruń to receive 750 thousand PLN for the scholarship exchange of PhD students and academic staff

2018-10-19

The Nicolaus Copernicus University in Toruń will carry out the project „International scholarship exchange of PhD students and academic staff” and will receive 750 thousand PLN for its implementation from the PROM Program of the National Academic Exchange Agency. The aim of the project is to develop university internationalization and improve the quality of education at third degree studies. Within its framework, the participation of foreign PhD students and lecturers at the summer school in 2019 will be funded. The interdisciplinary subject of the school will include astrochemistry, quantum chemistry and precise spectroscopy - dynamically developing scientific fields. In addition, PhD students' trips to foreign conferences and research internships will be financed. There are also planned visits of PhD students from abroad. The beneficiaries of the project, selected through a competition, will be physicists, astronomers, chemists, mathematicians, computer scientists, cognitivists and psychologists.

Members of the Polish-Chinese academic consortium met at the Silesian University of Technology

2018-10-19

Representatives of Polish and Chinese universities met at the Silesian University of Technology as part of the Sino-Polish University Consortium, the first Polish-Chinese academic consortium that was established last year as part of the One Belt One Road initiative. The meeting was attended by representatives of several dozen Chinese and Polish universities, including Beijing University of Technology, North China University of Technology, Tianjin University of Technology, AGH University of Science and Technology, and Silesian University of Technology, Warsaw and Opole University of Technology. The participants discussed on the role of the university in strengthening Polish-Chinese relations. Sino-Polish University Consortium was established in March 2017. It is directed by the rectors of Beijing University of Technology, Chongqing Jiaotong University and Opole University of Technology. The consortium currently comprises 27 universities in Poland and China.

Wrocław University of Technology to launch Laboratories Night

2018-10-19

Researchers and students of the civil and water engineering and the geoenvironment, mining and geology faculties of the Wrocław University of Technology invite participants on Saturday, October 20 to the Laboratories Night. During this year's event students will be able to visit the Museum of Minerals and take part in chemical workshops. The history of bridge-making in the world and the specificity of Polish bridges will be described by Prof. Jan Biliszczuk - designer of the Rędziański bridge. Dr Bogdan Przybyła will take participants under the surface of Wrocław's streets and reveal what the Mobile Laboratory of Underground Infrastructure is dealing with. There will also be an opportunity to learn how the condition of concrete on construction sites and

in historical facilities is examined in a non-destructive way using a modern scanner. All lectures and classes will be held on the Grobla Campus. <http://pwr.edu.pl/uczelnia/aktualnosci/przed-nami/noc-laboratoriow-w-geocentrum-565.html>

University of Economics in Katowice to receive almost 5 million PLN for sustainable development

2018-10-22

The University of Economics in Katowice is implementing the project „Near - Internationally - Throughout life - a comprehensive program of sustainable development of the University of Economics in Katowice” as part of the Operational Program Knowledge Education Development. For this purpose, the National Center for Research and Development allocated almost PLN 5 million to the university. Thanks to the subsidy, three new education programs will be developed. Students will benefit from a series of trainings, workshops and project tasks as well as three paid internships. Teaching staff will take part in national and international internships, and the administrative staff will increase their competences through training and postgraduate studies. The project will also facilitate the use of the website and platforms that will be translated into English. It also provides for restructuring activities in the area of university management. More than 1000 students and nearly 300 employees will be supported within the project.

Opole University to support Lyceum in Garwolin

2018-10-22

The University of Opole has been supporting the Secondary School with Bilingual Departments in Gogolin. On the day of the 70th anniversary of the school, the rector of the university, Prof. Marek Masnyk and the school's director - Violeta Zajązkowska signed the agreement. The contract concluded for one and a half years assumes supporting and enriching the didactic process in the secondary school, as well as building the image of the Opole

university as an institution supporting the school facility with its scientific prestige and university base. The University decided to support biological-chemical classes preparing pupils to study at the medical school of the Opole university, participate in meetings with students, support school teachers in the field of their projects. One of the obligations of the school is to promote the Opole University to pupils as the first-class university.

Higher vocational schools from Płock and Ciechanów to cooperate in publishing the „Rocznik Towarzystwa Naukowych Płocki”

2018-10-22

Rectors of the State Higher Vocational Schools (PWSZ) from Płock and Ciechanów have signed a cooperation agreement in the field of edition, distribution and promotion of the „Rocznik Towarzystwa Naukowych Płocki”. The State Higher Vocational School in Płock plans its further development. – The cooperation with the PWSZ in Ciechanów will allow us to share a journal with new scientific receivers - said Prof. Maciej Słodki, Rector of the State Higher Vocational School in Płock. The PWSZ in Ciechanów will participate in the costs of publishing, and the representatives of Ciechanów will participate in the scientific and program council of the journal. - The combination of our academic environment through cooperation at the book is a chance to increase the region's scientific potential - said Prof. Leszek Zygnier, Rector of the State Higher Vocational School in Ciechanów.

Professor Timothy Snyder becomes honorary doctor of the Maria Curie-Skłodowska University

2018-10-22

The Maria Curie-Skłodowska University (UMCS) in Lublin awarded Prof. Timothy Snyder - American historian, professor Yale University, specializing in contemporary history of Central and Eastern Europe with the honorary doctorate of UMCS. The title of doctor honoris causa was awarded to Prof. Snyder by the UMCS Senate, at the request of the UMCS Humanities Faculty Council. Professor Timothy Snyder received the title in recognition of his outstanding contribution to understanding the history of the twentieth century and the courage to proclaim difficult truth, for constant reminding about the ethical dimension of the historian's work and social intellectual responsibility, for the exceptional ability to show Poland's history in a broader European perspective and for long-term and fruitful cooperation with the Maria Curie-Skłodowska University.

Meeting of the Conference of Rectors of Polish Universities devoted to the Constitution for Science

2018-10-22

Lublin Catholic University of John Paul II (Catholic University of Lublin) on 22 October 2018 will hold a meeting of the Conference of Rectors of Polish Universities (KRUP). The meeting will be attended by 20 rectors and vice-rectors representing all Polish universities, as well as representatives of the Ministry of Science and Higher Education, the National Science Center and PhD students. Rectors affiliated to the (KRUP) are invited to the Catholic University on the occasion of the 100th anniversary of the university to discuss the financial and practical aspects of the implementation of the new law on higher education and science. The Conference of Rectors of Polish Universities (KRUP) was established by the rectors of universities in 1989. It allows to develop and present opinions and positions on issues important for the development of Polish science, higher

education, culture and education, in cooperation with the Conference of Rectors of Academic Schools in Poland.

STER program to allocate over PLN 51m for PhD scholarships for foreigners

2018-10-22

The National Academic Exchange Agency (NAWA) has announced the STER Program - PhD Scholarships for foreigners. Applications in the program can be submitted by December 14, 2018. The internationalization of PhD studies in Poland is one of the weakest links in higher education in Poland. In the academic year 2017/18, for 41532 PhD students at Polish universities, only 1687 were foreign students. The aim of the program is to support Polish institutions providing PhD studies in activities for their internationalization. The NAWA directs it to public and non-public universities that hold the Erasmus Charter for Higher Education, scientific units of the Polish Academy of Sciences and research institutes. More: <https://nawa.gov.pl/institucje/ster-stypendia-doktorskie-dla-cudzoziemcow>

Silesian University of Technology to have more partner universities in China

2018-10-22

Silesian University of Technology will cooperate with other universities from China. Cooperation with Beijing Information Science and Technology University and Beijing University of Technology assumes, above all, exchange of students. As part of the agreement signed with Beijing University of Technology, a student exchange program will be conducted, which aims to enrich the cultural and educational life of both universities. Students will be able to leave the alma mater for a semester or the entire academic year. The framework agreement on cooperation with Beijing Information Science and Technology University will include also the exchange of academic staff, supervision over students during internships in companies and joint research programs. More: <https://www.polsl.pl/Lists/Aktualnosci/Uczelniane/Poka->

University of Bialystok to extend its cooperation with Isobar Polska

2018-10-23

The Faculty of History and Sociology of the University of Bialystok has signed a contract with Isobar Polska. It enables the extension of cooperation established by the company and the largest Podlasie university 4 years ago. Isobar is a global network agency of integrated marketing communications, a member of the Dentsu Aegis Network. The corporation is present on 40 markets around the world, including Poland. One of the branches of Isobar Polska, Digital Operations Hub, since 2010 has been located in Białystok and deals with the monitoring and moderation of social media, their content, design and customer service. Thanks to the cooperation, the best and most active students of sociology will be able to take regular and paid internships in the moderation and monitoring department at Isobar Poland.

European Center of the Maria Curie-Skłodowska University started its activity

2018-10-23

The scientific symposium „European integration and human rights”, which took place on October 22, 2018, officially started the scientific activity of the European Center of the Maria Curie-Skłodowska University (UMCS) in Lublin. The symposium was devoted to the issue of human rights in the context of European integration, in connection with the 25th anniversary of Poland's ratification of the European Convention on Human Rights. The establishment of the European Center of the Maria Curie-Skłodowska University was preceded by the signing of a cooperation agreement between UMCS, the University of Larnaca, the European Center in Nancy, the Institute of International Relations of the Kiev National University, the Chernovtsi National University, the Carpathian National University in Ivano-Frankovsk, the Municipality of Lublin and the City of Nancy. The Center is to conduct research and teaching activities in the field of European integration in an interdisciplinary perspective.

Gdańsk University of Technology opens a new auditorium and laboratories

2018-10-23

An auditorium with multimedia equipment, modern laboratories and special laboratories for corrosion research were ceremonially opened at the Gdańsk University of Technology in the extended and reconstructed building „Chemia C”. The building includes an auditorium with multimedia equipment for 135 persons, and laboratories: Energy Processing Technology; Surface Survey; Molecular Biology and Renewable Energy Sources, as well as a laboratory for classes about corrosion protection technology and electroplating as well as a laboratory for corrosion tests. The building is accessible to people with mobility disabilities. There are students' own workplaces, a cloakroom and a student bar. The value of the project, co-financed by the European Union from the European Regional Development

Fund as part of the Regional Operational Program for the Pomorskie Voivodeship, is almost PLN 11.5 million. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGNcmoQv7K0/content/nowo-wybudowane-audytorium-i-laboratoria-w-budynku-%E2%80%9Echemia-c%E2%80%9D-zostaly-officially-open

Adam Mickiewicz University in Poznań to examine the relations of the European Union with other countries

2018-10-23

The Adam Mickiewicz University in Poznan will receive 100,000 euro from the European Union's Education, Audiovisual and Culture Executive Agency. The agency awarded the university with the prestigious scientific grant of the Center of Excellence Jean Monnet. As part of the program, the faculty of political science and journalism will provide research on multidimensional external relations of the European Union with other countries. Researchers want to find answers to questions about the role and significance of the Union in the new international order, as well as about the shape and nature of its relations with the United States, China and Russia and the countries of South America, Central Asia and North Africa. The program is addressed to students and all people who do not deal with the problems of functioning of the European Union on a daily basis. In addition to the own events at the Faculty of Political Sciences and Journalism, the guest lectures will be held at other faculties of the University and at universities in Poland and abroad.

University of Silesia launches Intensive Workshops for Final Exams

2018-10-23

The team of the University of Graduates, operating as part of the Continuing Education Center of the Silesian university, is organizing Intensive Workshops for this year's secondary school graduates. The innovative educational project includes 60 hours of interesting classes and creative exercises

that will facilitate passing the final examination. The workshops are to prepare the pupils for the final examinations in Polish and mathematics at the basic and extended levels as well as history, knowledge about society, biology and chemistry at an advanced level. They will start on October 25. The classes will be run by trainers and lecturers specializing in preparing for the final examination. Qualified university staff and the best teachers from the region will use modern didactic methods and tools to prepare the best students for this year's final exams. The classes conducted in a group of ten persons guarantee intensive work tailored to the needs of the participants. More: www.maturzysta.us.edu.pl

Poznan University takes 172th place in The Nature Index Rising Stars

2018-10-23

University Adam Mickiewicz in Poznań, as the only university from Poland this year, was included in the Top 200 academic institutions list in The Nature Index Rising Stars prepared by Springer Nature. Poznan's university took 172th place in the ranking. Nature Index 2018 Rising Stars emphasizes the achievements of selected institutions, countries as well as individual scientists demonstrating an exceptionally large development in their contribution to the development of the highest quality research. The ranking refers to articles published between January 2015 and December 2017. In the global index of the Nature index referring to the publishing achievements for the period January 1 - December 31, 2017, the Poznań University is at 718 positions among over 4,000. listed universities. The Nature Index is a database referring to the publication achievements of individual countries and institutions in 82 prestigious scientific journals in the field of natural science, selected by an independent group of experts.

University of Technology and Humanities in Radom to educate medical personnel for the army

2018-10-24

Minister of National Defense Mariusz Błaszczak and Prof. Eng. Zbigniew Łukasik, Rector of the University of Technology and Humanities in Radom signed a letter of intent regarding the program of education of medical personnel for the needs of military health services, which will be implemented at the Faculty of Health Sciences and Physical Culture of the University of Radom. - I am glad that the University of Technology and Humanities will teach not only doctors, but also nurses and paramedics who will then take care of the health and life of the Polish army, and civilians. I am convinced that the University is the right place where we can carry out the defense capabilities of our Homeland - said Minister Błaszczak during the ceremony. Professor Eng. Zbigniew Łukasik mentioned that the Radom university is already cooperating with the Ministry of National Defense in the industry, but now it will start cooperation in the medical field.

Competition for diploma dissertation with the highest potential of commercialization or implementation

2018-10-24

Until October 31, the University Technology Transfer Center of the University of Warsaw is accepting diploma theses with the highest potential for commercialization or implementation. The winners of that competition will be awarded. The application can be submitted in three categories: bachelor's / engineering, master's thesis and PhD theses. The condition of participation is completing PhD thesis from 1 May 2016 to 31 October 2018. The winners of the competition will receive financial prizes funded by the AOMB Patent Attorneys' Chamber for PhD thesis: 5,000. PLN gross; for Master's thesis: 4 thousand PLN gross; and for BA / BA thesis: 3 thousand PLN gross. More: <http://www.uott.uw.edu.pl/kpd/>

Faculty of Biotechnology of the University of Wrocław to hold lectures on vaccination

2018-10-24

The Faculty of Biotechnology of the University of Wrocław invites participants to a series of lectures on vaccination. During the lectures will be discussed the mechanism of immunization and the formation of immunological memory, the risks of giving up vaccination, the most important facts will be given and the myths about vaccination will be explained. The lectures are open, they will be held on Saturdays at 9:30 and last 45 minutes. The first meeting - «Introduction to immunology» - is scheduled for October 27. During the lecture, Dr. Zdzisław Wróblewski will acquaint students with the basics of immunological knowledge, which are based on vaccination. The organizers announce the presentation of the concepts of antigen and antibodies, cells of the human immune system, as well as the methods of natural acquisition of immunity. The lecturer will also talk about immunological memory and individual immunity as well as population resistance and its importance for the health of the society.

Torun scientist receives a grant from the Japan Society for the Promotion of Science

2018-10-24

Dr Akiko Nishiyama from the Department of Atomic, Molecular and Optical Physics at the Faculty of Physics, Astronomy and Applied Informatics of the Nicolaus Copernicus University in Toruń received a prestigious grant from the Japan Society for the Promotion of Science. The grant awarded as part of the «Overseas Research Fellowships» competition is received for the project «Broadband and highly sensitive spectroscopy of free-radicals and short-lived molecules using an infrared frequency comb». Its aim is to study chemical reactions involving free radicals using broadband spectroscopy, based on the combining of optical frequencies. The project will be implemented from April 2019 in the Laboratory of Ultrafast Spectroscopy in cooperation with scientific units from Germany and Italy. The research results will help explain the forma-

tion processes of prebiotic molecules in the interstellar space - which is important for astrochemistry and the theory of life formation in the Universe.

Researcher from the Lublin University of Technology becomes „An innovative young science leader”

2018-10-25

Dr Eng Agnieszka Wozzuk from the Faculty of Civil Engineering and Architecture at the Lublin University of Technology has been awarded the Polish Intelligent Development Prize 2018 in the category „Innovative young science leader”. Dr Wozzuk was awarded for her project titled «The use of functional zeolite structures for the production of asphalt mixtures in asphalt foaming». The Polish Intellectual Development Award is a nationwide prize to appreciate the most innovative projects implemented with the participation of funds from EU and national programs.

Foundation act for the building of the Institute of Computer Science of the University of Gdańsk

2018-10-25

A foundation act was signed for a modern five-storey Institute of Computer Science of the University of Gdańsk, which is being built on the Baltic campus of the university in Gdańsk Oliwa. - I hope very much that the building of the Institute of Computer Science of the Faculty of Mathematics, Physics and Computer Science at the University of Gdańsk will prove to be a perfect response to the needs of the labor market, which is still insatiable with IT specialists - said Jerzy Piotr Gwizdała, the rector of the University of Gdańsk during the ceremony. The new building will include seminar and computer rooms, auditoria, didactic and scientific rooms as well as office and social rooms. The value of investments necessary to implement the project amounts to over PLN 39 million. The investment is co-financed under the Regional Operational Program of the Pomorskie Voivodeship for the years 2014-2020. Its completion is scheduled for the second half of 2019.

Academia Copernicana: an innovative and international PhD school in Toruń

2018-10-25

The Interdisciplinary PhD School „Academia Copernicana” at the University of Nicolaus Copernicus in Torun has started. The Torun University is the first in Poland to implement an innovative program of PhD education. «Academia Copernicana» provides a prestigious curriculum for young scientists. The best candidates will work under the supervision of international research teams. The program places emphasis on innovation, interdisciplinarity and internationalization and it is in accordance with the European Salzburg II Initiative. The aim is to prepare participants for research activities and academic and didactic at the academic level. Studies will be conducted in English. In connection with the growing importance of mobility of young researchers, all participants will have a compulsory three-month internship with a foreign tutor. Consultations with foreign tutors will also be held during summer schools organized in Toruń.

Anti-discrimination and anti-conflict workshops at the University of Warsaw

2018-10-26

In November, students of the University of Warsaw will take part in workshops during which they will learn how to respond to violence and unequal treatment due to their origin, nationality or skin color. «Anti-discrimination and anti-violent workshops for foreign and Polish students» is one of eleven projects that were selected as part of the first participatory budget of the University of Warsaw. During the four-hour workshop, students will be able to learn how to react to violence and unequal treatment. Meetings will take place at the University Volunteer Center and will be conducted in Polish, English and Russian.

Łódź University of Technology becomes laureate of the Polish Intellectual Development Award 2018

2018-10-26

Lodz University of Technology became the laureate of the Polish Intellectual Development Award 2018 in the „University of the Future” category. It was granted to the Łódź University for the implementation of the „Innovative Textile 2020+” project. The aim of the Innovative Textile 2020+ project is increasing the degree of commercialization and internationalization of applied research in the field of innovative and modern textile. The project leader is the Faculty of Materials Technology and Textile Design of the Lodz University of Technology, and it is coordinated by Prof. Izabella Krucińska. The consortium includes also the Institute of Safety Technology MORATEX, the Central Institute for Labor Protection - the National Research Institute, the Institute of Biopolymers and Chemical Fibers and the Textile Research Institute.

Wrocław University of Environmental and Life Sciences is implementing a pocket park project

2018-10-26

University of Life Sciences, City of Wrocław and Wrocław Agglomeration Development Agency are jointly implementing a pocket park project under the Horizon 2020 framework program „Demonstrating innovative nature-based solutions in cities”. 22 partners from nine countries take part in it, including three leaders from Manchester, Valencia and Wrocław. The innovative model of micro-green systems in Wrocław is to consist of pocket parks, green streets and walls, rain gardens and other green infrastructure solutions. As a result, local quality of life will be improved by increasing the availability of green public space and improving air quality. The aim of the project is to test the possibility of using «nature-based solutions» - enabling local use of rainwater, creating oases to protect against heat and providing shades and local temperature reduc-

tion. More: http://www.glos.upwr.edu.pl/aktualnosci/48484/naukowcy_z_upwr_i_sposob_na_smog.html

University of Silesia deepening its cooperation with the Beijing Technical University

2018-10-26

The University of Silesia extends cooperation with the Beijing Technical University. Among the planned initiatives is the establishment of a Confucian Class at the Silesian University. After the signing of the framework agreement, that was made during the visit of the Chinese delegation in Katowice, the implementation work of executive contract for running a student exchange program enabling the diplomas of both universities began. The academic exchange was initiated during the summer school of language, literature and Polish culture in Cieszyn. Both universities have been cooperating since 2017. At that time, together with the third partner the Opole University of Technology they announced the organization of a Chinese language course at the University of Silesia. Since January 2018, the Center of Chinese Language and Culture has been operating. This research and didactic unit conducts classes on Chinese language and culture, and undertakes numerous initiatives to promote countries of the Far East in Poland.

National Academic Exchange Agency to hold conference „Science: Polish Perspectives” in Oxford

2018-10-29

On November 16-17, 2018, the conference „Science: Polish Perspectives” will take place in Oxford. It is a meeting of the Polish scientific diaspora in Great Britain organized by the National Academic Exchange Agency (NAWA). The participants of the conference will have the opportunity to listen to many interesting lectures presented by a group of young scientists and take part in the workshops. Łukasz Wojdyga, NAWA Director will hold the presentation entitled „What are the latest news in Polish and higher education?” and will talk about the NAWA programs and the role of the Agency in the internationalization of science in Poland. More: <https://poloniumfoundation.org/spoxford2018/>

University of Silesia launches the „University of the Best” program

2018-10-29

The University of Silesia inaugurated the „University of the Best” program. The project aims to develop the interests of the most talented pupils from Katowice primary and secondary schools. It is also to present the educational offer of the University of Silesia and encourage pupils to take up studies in the capital of the Silesian Voivodeship. The organizers of the project are the University of Silesia, the City of Katowice, the Psychological and Pedagogical Counseling Center no. 5 and the Youth Palace in Katowice. The pupils will attempt to recognize their interests and predispositions and set the path of personal and scientific development with the support of a tutor, a research worker at the university. The solemn inauguration was attended by pupils and their tutors, as well as by Prof. Ryszard Koziółek - Vice-Rector for Education and Students of Silesian University and Waldemar Bojarun - Vice-Mayor of Katowice.

Two majors of Gdańsk University of Technology receive International accreditation AMBA

2018-10-29

The Faculty of Management and Economics of the Gdańsk University of Technology has been accredited by the prestigious AMBA institution for the Master's in International Management and the Master of Business Administration. Both directions have been granted an accreditation for 5 years, this is the maximum period possible. The AMBA accreditation required the faculty to meet high international quality standards in the area of education, including the degree of internationalization of students and teachers and providing for the plans for further career paths of graduates. The Master of Science (MSc) International Management program has gained this prestigious distinction thanks to its modern education program, highly qualified international staff of teachers, multicultural student groups and various education methods in areas ensuring skills expected by employers.

Students of the Academy of Physical Education in Poznan to deal with football scientifically

2018-10-29

Students of the Academy of Physical Education in Poznań associated in the scientific circle at the Department of Theory and Methodology of Team Sports Games will deal with scientific research on various aspects of football. Part of the research will be carried out in cooperation with representatives of the premier KKS Lech Poznań S.A. The newly emerging science club will investigate the trends of football development, the conditioning of the training process and the creation of statistical profiles in scouting. Students also intend to conduct an analysis of matches. Department of Theory and Methodology of Group Sports Games invites students of all studies to scientific cooperation. The matter of interest may cover all aspects related to team games, but the main academic goals are to be related to football.

Student of the University of Rzeszów received a scholarship from the King of Saudi Arabia

2018-10-30

Maciej Noga, the 3rd year student of engineering at Biotechnology at the University of Rzeszów, received a research grant funded by the King of Saudi Arabia for the implementation of the scientific project „Why it is so difficult to find potent drugs against cancer? - decoding the druggability of molecular target”. The project will be carried out under the direction of an outstanding scientist in the field of protein biochemistry of Dr. Łukasz Jaremko at the University of Science and Technology King Abdullah (King Abdullah University of Science and Technology) in Saudi Arabia. King Abdullah University of Science and Technology (KAUST) is a private interdisciplinary Saudi university founded in 2009 by the King of Saudi Arabia - Abdullah bin Abdulaziz Al Sauda. The student of the Rzeszów University will receive a monthly scholarship of USD 1000, accommodation in a dormitory, travel expenses and insurance.

Young Scientists’ Forum in Lublin

2018-10-30

The Maria Curie-Skłodowska University in Lublin and the Marshal Office of the Lublin Province in cooperation with the Institute of Agrophysics of the Polish Academy of Sciences on November 14 and 15 are organizing the Young Scientists Forum under the slogan 3xI: „Innovation - Interdisciplinarity - Interactivity”. The event is addressed to PhD students and young science employees from Lublin universities (up to 35 years of age), who conduct or would like to conduct interdisciplinary and innovative research and are focused on interactivity. The forum will include workshops on the following issues: Public appearances (self-presentation); Stress at the work of the scientist; Creating the image of a scientist and planning the career of a young scientist; Research project management and Researchers in business on the example of photonics. More: <https://www.umcs.pl/pl/fmn.htm>

Physicists of the University of Wrocław published on the supernova explosion mechanisms in Nature Astronomy

2018-10-30

Research results of Dr Tobias Fischer from the Faculty of Physics and Astronomy of the University of Wrocław together with an international group of researchers will help to solve one of the biggest mysteries of astrophysics. His article - «Release of quarks as a supernova explosion mechanism in the process of formation of massive blue supergiant stars» - was published in «Nature Astronomy». The existence of matter known as quark-gluon plasma has been speculated for a long time. Thanks to the results obtained, it will be possible to study it in the context of future galactic explosions. Supernova explosions are phenomena considered to be the most energetic explosions in the Universe. Thanks to Fisher's research, it was possible to show that the appearance of exotic particles under extreme conditions can lead to supernova explosion.

Silesian University of Technology begins cooperation with Henkel

2018-10-30

Silesian University of Technology has signed an agreement on cooperation with Henkel Polska Operations Ltd. Its aim is to use the experience and scientific achievements of the University and the potential of Henkel and its position on the market for activities serving the good of the parties and the development of the region. The agreement was concluded for an indefinite period and it assumes dealing with topics of research and development works, presenting and promoting achievements, providing cooperation with employing graduates, exchange of experience in knowledge management, as well as appointing a team of specialists for strategic technical and organizational solutions and cooperation in improving educational programs. Henkel has undertaken to present a list of proposed master's thesis topics to be used by students of the University

of Technology and it is to enable students to take up a diploma thesis on the topics indicated by the employer.

Poznan University of Technology is a co-founder of the Poznań Energy Cluster

2018-10-30

Poznan University of Technology signed a letter of intent with the City Hall regarding the creation of the Poznań Energy Cluster. Among the signatories of the agreement are also companies: Veolia, SUEZ Zielona Energia and municipal companies. The agreement concerns the generation, distribution and trading of energy from renewable sources within the distribution network. In short, the cluster's task is to create self-sufficient energy circuits. Thanks to the cluster, Poznań will become an energetic model for other Polish metropolises. Establishment of the Poznań Energy Cluster is the next big step in the direction of creating Smart City. The cluster is a very big challenge for Poznań local government officials as well as municipal enterprises. The implementation of the goals set will benefit all partners, but the Poznan inhabitants will benefit the most from it.

Students of the AGH University of Science and Technology in Krakow develop retractable footbridge

2018-10-31

Students of the AGH University of Science and Technology in Krakow created a retractable footbridge. This is the first project of this type implemented in Poland. The model developed by AGH students is the effect of searching for innovative solutions in architecture. The construction, measuring 3 m, 35 cm long and 50 cm wide, is powered by 14 electric motors. The inspiration for students was the Rolling Bridge in London. However, the AGH model is retracted in a completely different way than the London one as students used their original solutions. The creators of the footbridge are Eng. Michał Pyza and Eng. Piotr Roszkowski from the Scientific Circle

of Structural Mechanics «Axiom», which operates at the Faculty of Mining and Geoenvironment. The electronic equipment was developed by Tomasz Tatała from the Faculty of Mechanical Engineering and Robotics. See the video: <https://youtu.be/iNjIAEbrn5Y>

University of Lodz signed a cooperation agreement with Philips

2018-10-31

Professor Antoni Różalski, the rector of the University of Lodz and Krzysztof Fałara, member of the board of Philips Polska, signed a cooperation agreement between the University of Lodz and Philips - the world leader in the medical technology industry. The aim of the cooperation is to use the experience and scientific achievements of the University of Lodz and the potential and position of Philips Polska as an employer. Exchange of knowledge and experience will enable co-creation of didactic programs, classes and workshops, as well as organizing internships and reporting research problems. The contract was concluded for two years - until September 30, 2020. - We believe that students of the University of Lodz will gain valuable experience and will be able to test their skills in modern business areas related to medical technologies - said Krzysztof Fałara, member of the board of Philips Polska.

Students of the University of Warsaw win the Polish Academic Championships in Team Programming

2018-10-31

The team from the Faculty of Mathematics, Computer Science and Mechanics at the University of Warsaw (WMiM UW) composed of Jakub Boguta, Konrad Paluszek and Mateusz Radecki won the XXIII edition of the Polish Academic Championships in Team Programming. 51 teams took part in the competition, with 8 teams from the University of Warsaw. Another team from WMiM UW Maciej Hołubowicz, Dawid Jamka and Jan Tabaszewski took the second place. The Polish Academic Championships in Team Programming are the most important competitions for IT students in the country. The first competition took place in 1996 in Poznań. This year's championship was held at the University of Wrocław. More: <http://www.amppz.ii.uni.wroc.pl/>

Koszalin University of Technology receives grant for a modern library

2018-10-31

Koszalin University of Technology received 27 million PLN from the Ministry of Science and Higher Education. The money will be spent on investments, including the building of a modern twenty-first-century mediatheca- library. The library is to be constructed between the buildings at ul. Śniadecki and the Hall of Sports. There will be a place for a small conference center with technical facilities, the lecture hall and archive at the university, as well as a demonstratorium realizing the idea of the Foucault's Pendulum through the social and scientific education. The building will be connected with the remaining university buildings via overhead corridors. - One of the goals of reforming higher education is to implement the principle of sustainable development. We do not forget about universities located in smaller academic centers, extremely important for the future of regions - said Undersecretary of State in the Ministry of Science and Higher Education Piotr Müller after the transfer of subsidies.

University of Poznan to launch Geodetic - Cartographic and Geomatic Garden

2018-10-31

Adam Mickiewicz University in Poznań is launching the first in Europe Geodetic - Cartographic and Geomatic Garden. It will be used by young geodesists, cartographers, geomatists and geographers. There will be a pit located on a square measuring 15 by 20 meters for staking construction poles of the building and performing leveling measurements as part of the exercises related to the geodetic process of servicing construction investments. On the upper terrace there is a solar analematic clock installed, in which a person standing in the appropriate field of the month (gnomon) casts a shadow on the attached hours and thus indicates the local time. The garden was also equipped with a table of augmented reality with a model of the Faculty of Geographical and Geological Sciences printed in 3D technology. At the entrance the guests can see a replica of the border stone from 1653 with a triangle with the letters S-P-B symbolizing the border between Sweden - Poland - Brandenburg.

Center for Innovation and Technology Transfer of the Silesian University of Technology receives Golden Emblem of International Quality

2018-10-31

The Center for Innovation and Technology Transfer of the Silesian University of Technology was awarded the Golden Emblem of International Quality 2018 and became the winner of the Highest Quality program in the QI Services category. The award was received during the European Quality and Innovation Forum. The Center plays a key role in managing intellectual property of the Silesian University of Technology, in the commercialization of research results and in establishing and maintaining contacts with the business environment. The title Golden Emblem of International Quality and the certificate

signed by leading institutions are a confirmation that the university applies the highest standards, constituting a competitive advantage on the Polish and international market. The European Quality and Innovation Forum is an event addressed to the scientific, business and local government community. Its purpose is to exchange information and experiences and to integrate these environments.

University of Torun plans deeper cooperation with Beijing International Studies University

2018-10-31

The Nicolaus Copernicus University in Toruń (UMK) plans to deepen the cooperation with Beijing's International Studies University (BISU). The authorities of both universities talked about extending the student exchange agreement signed in March 2018. The plans include increasing the number of Polish language teachers on BISU and Chinese studying in Toruń. Currently, 38 people from BISU are studying at the Studium of Polish Language and Language for Foreigners at the Faculty of Philology. They are students of Polish philology, which is a prestigious field at the Beijing University. There are talks about the inviting another 20 students for the full cycle of studies next year. The Chinese side is interested in a new field of study at the Faculty of Philology - Polish philology as a foreign language. Chinese students, after their graduation, could study in other Polish-language majors. The plan also includes the promotion of UMK in Beijing secondary schools.

Course towards MOOC – a call for courses on the Polish educational platform

2018-11-02

The National Center for Research and Development (NCBR) has announced a call - „Course towards MOOC” addressed to universities. It is to support creating new courses on the Polish educational platform MOOC. The courses can be developed in one of two categories: an educational course for students as an additional element of the education for students and a mass, open educational course available to all interested students. The contest's budget is 10 million PLN. The applicant of the project may be a public or private college (or a consortium) and applications for the competition should be submitted online from November 30, 2018 to January 25, 2019.

Ministry of Science and Higher Education launches Mooc Poland

2018-11-02

The Ministry of Science and Higher Education in cooperation with the Foundation of Young Science has launched an educational platform with open online courses that allows free lifelong learning. The Polish Mooc (massive open online course) is a virtual course created by Polish academic centers and institutions related to distance learning in cooperation with the business world and non-governmental organizations. - The technological revolution, also in the area of education, is happening before our eyes. Already today, over 80 million students in the world use platforms that offer MOOC courses. Over 800 universities provide such courses to students around the world. They support and supplement traditional forms of education, where the master-student relationship is the most important thing - said Piotr Dardziński, deputy minister of science and higher education during the inauguration of the project. More: <https://polskimooc.pl>

Over PLN 326 million allocated by the Ministry of Science within the „Regional Initiative of Excellence” program

2018-11-02

The Ministry of Science and Higher Education has granted a total of over PLN 326 million of financial support to 30 academic universities for the implementation of scientific research important for the region within the „Regional Initiative of Excellence” program. 12 million PLN of this amount will be received by the University of Warmia and Mazury (UWM) in Olsztyn. The university has submitted the project «Innovative high-quality food for the health of society and sustainable development - an integrated program for the development of scientific research and innovation in the field of agricultural and veterinary sciences at the University of Warmia and Mazury in Olsztyn». Support will be provided for: agronomy, fishing, food and nutrition technology, zootechnics and veterinary science. The UWM project is part of the «Strategy for socio-economic development of the Warmian-Masurian Voivodship by 2025», which emphasizes the development of an economy based on three smart specializations: water economy, wood and furniture, and high-quality food.

Hong Kong PhD Scholarship Program

2018-11-02

The Hong Kong Research Grant Board has prepared a PhD Scholarship Program that enables highly talented researchers from around the world to undertake PhD studies at world-class research universities in the city. In the academic year 2019/2020, 250 PhD scholarships will be awarded. The scholarship provides a yearly salary of HK\$ 240,000 (around EUR 26,400), a conference allowance and research travel amounting 10,000 HK\$ (about 1,100 euros) per year for each scholarship holder for up to three years. Candidates may submit applications via Internet Electronic System of the Hong Kong PhD Scholarship Program until December 1, 2018. More: <http://studyinhongkong.edu.hk>

University of Wrocław to launch the Center for Cognitive Research on Language and Communication

2018-11-02

The Center for Cognitive Research on Language and Communication is launched at the University of Wrocław. This is a joint project of scientists from the Institutes of Polish and English Philology at the Wrocław University. The aim of the Center is to conduct scientific research, organize methodological workshops, conduct didactic classes and dissemination activities in the field of cognitive linguistics, in particular: cognitive research on meaning, semantics and linguistic pragmatics; cognitive grammar; cognitive ethnolinguistics; cognitive research on bilingualism; assimilation of the second and inherited language; research on cognitive aspects of multimodal communication; cognitive corpus and statistic studies. The scope of interests of the Center team will include cognitive research works from semantics, grammar, bilingualism and ethnolinguistics.

Students of the Silesian University of Technology and architects design the Municipal Stadium in Katowice

2018-11-02

The project of an employee and students of the Faculty of Architecture of the Silesian University of Technology won the International Urban and Architectural Competition for the Municipal Stadium Project in Katowice. The construction according to the awarded project will start in two years. The jury awarded the prize for creating a homogeneous, integrated architectural group with minimalist architecture and an intimate scale, which naturally uses the topography of the area and its natural conditions. The authors of the project are Dr Eng Damian Radwański from the architecture department and Marius Schlesiona, jointly creating the RS-Architekci company. The project was co-created by students of the University: Jakub Kaprał, Karolina Rusek, Piotr Szenkowski and Marcin Woźnica. The stadium will be built near the A4 motorway, at the entry way to Katowice from Wrocław. The complex will consist of 6 training fields, a car park for 1.7 thousand cars, football stadium for 15 thousand fans, multifunctional sports hall for approx. 3 thousand spectators and other sports facilities. More: <https://www.polsl.pl/Lists/AktualnosciUczelni-ane/PokazWiadomosc.aspx?WebPartTitle=ListaWiadomosci&Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2445>

Latest QS World University Rankings published

2018-11-05

The Internet service TopUniversities.com has published its latest QS World University Rankings 2019, where the University of Warsaw was ranked 394th. Other Polish university, the Jagiellonian University in Kraków is 411th and the Warsaw University of Technology was ranked in the 601-650 university group. The first three in the world ranking are American universities: the Massachusetts Institute of Technology, Stanford University and Harvard

University. In the subranking of QS World University Rankings for Eastern Europe and Central Asia, the University of Warsaw was ranked 6th, Jagiellonian University is 7th and Warsaw University of Technology is 15th. The Lomonosov University in Moscow took the first position in this ranking. QS World University Rankings service TopUniversities.com has been run since 2012 and analyzes over 17 million research works. The ranking gathers opinions of over 85,000 scientists and 41,000 employers, it includes nearly 40 different scientific disciplines and it is the largest list of this type in the world. More: <https://www.topuniversities.com/university-rankings/world-university-rankings/2019>

Seminar „100 years of Independence” held at the Faculty of Political Science of the Maria Curie-Skłodowska University in Lublin

2018-11-05

Until 9 November, the Faculty of Political Science of the Maria Curie Skłodowska University (UMCS) in Lublin will hold a series of events organized for the 100th anniversary of Poland's independence. The seminar entitled «On the manifesto of the Provisional People's Government of the Republic of Poland» will take place on November 6. On November 7-8 a theatre drama will be performed presenting the disputes of the Provisional People's Government, which 100 years ago were held at the Lubomirski Palace - the current seat of the Faculty of Political Science at the UMCS. On November 8, two scientific conferences will take place: «People's vision of Independence. People's government in Lublin» and «Equality of women in Poland. Between theory and practice.» The series of events will be finalized by the National Academy of Stories «Unknown Heroes of our Independence».

Students of the Wrocław University of Technology to develop a solar boat for the competition in Monaco

2018-11-05

Students of the Wrocław University of Technology are constructing a boat powered by photovoltaic panels, with which they want to take part in international competitions in Monaco. The engine used in the project will have a power of about 5 kW, and the hull is to be made of carbon fiber. The project involves the construction of a single boat with a length of approx. 5.5 m, equipped with photovoltaic panels and hydrofoils - special bearing flaps mounted under the fuselage. Such solutions are used in hydrofoils, but in the case of solar boats it allows for more efficient use of engine power and panels. After getting the right speed they cause the hull to emerge from the water, thanks to which the resistance decreases and the boat can flow much faster. The competition in Monaco is the largest and most prestigious event of this type in the world. Students and professional teams of constructors compete in three competitions - acceleration, slalom and races. More: <http://pwr.edu.pl/uczelnia/aktualnosci/lodz-solarna-na-zawody-w-monako-11014.html>

University of Silesia invites participants to the conference „Polish Politics 1918-2018”

2018-11-05

The Institute of Political Sciences and Journalism of the Faculty of Social Sciences of the University of Silesia invites participants to the scientific conference „Polish Politics 1918-2018”. The partners of the event are: Society for Scientific Initiatives, Polish Political Sciences Society Branch in Katowice, Upper Silesia-Zagłębie Metropolis, Katowice Special Economic Zone. The organizers of the conference are planning a scientific debate summarizing the political processes taking place in Poland in 1918-2018. The debate will be held on 6 and 7 November in Wisła. Scheduled thematic panels are: 100 years of Poland in Europe and in the world; politics in Poland in the years 1918-2018; Poland in international relations, including foreign policy in the years 1918-2018; Central and Eastern Europe in the years 1918-2018; Polish media in the years 1918-2018 and Silesia as a region in Poland and Europe. More: www.inpidz.us.edu.pl

University of Bydgoszcz receives over PLN 11.5 million

2018-11-05

The Faculty of Natural Sciences of the University of Casimir the Great will receive over PLN 11.5 million under the „Regional Initiative of Excellence” program. The grant will allow the university to raise the level of scientific research conducted by biologists. The implementation of the project will bring tangible benefits not only to the academic staff, but also to the socio-economic environment of the university and students. The direct effect of the activities will be the improvement of the level of scientific research conducted by biologists from the University of Kazimierz the Great. It will happen through increasing the number of scientific publications, employing additional staff and its development, increasing the number of international agreements, increasing the participation of researchers in international exchanges, organizing international conferences, obtaining new scientific qualifications and developing research infrastructure.

Autonomous ship created at the Maritime University of Szczecin

2018-11-05

The Maritime University of Szczecin has completed the first stage of building an autonomous unmanned ship. The ship was developed by the Department of Ocean Engineering and Shipbuilding and passed the first tests on waters. Launching the ship completes the first stage of construction, from the design and construction of the model and equipping it with propulsors on the bow and stern to installing the power, remote control and telemetry systems. In the next stages of constructing, the autonomous ship will be provided with installation of sensors for measuring position, speed, course, distance from the wharf or other objects; development of a mathematical model for controlling the ship and its verification on the water; construction and installation of a computer system of autonomous control of the ship as well as development of algorithms and software for autonomous control of the ship and procedures for its communication with other units.

Dr Monika Bobako from the Adam Mickiewicz University becomes the laureate of the Długosz Prize

2018-11-05

Dr Monika Bobako from the Laboratory of Frontier Questions of the Adam Mickiewicz University in Poznań becomes a laureate of the 21st Competition for Jan Długosz prize. The award was received during the International Book Fair in Krakow for the book „Islamophobia as a technology of power. Study on political anthropology.” Professor Ryszard Nycz, in his laudation, said that the book written by Monika Bobako is the first attempt in the Polish humanities to deal with the phenomenon of Islamophobia, which is important in contemporary social life. - It can be said that this book is involved, and even interventionist, in the best humanistic sense of the term; it proposes an original study and solution of a socially important problem in a way that leads to a change in mental and social attitudes - said Prof. Nycz.

Fiat Chrysler Automobiles Award

2018-11-06

Until 15 November 2018 students can submit master's theses and PhD dissertations within the 20th competition for the Fiat Chrysler Automobiles Award (FCA). The competition is for students dealing with the issues devoted to the broadly understood Automotive subjects and who defended their theses at the Warsaw University of Technology in the academic year 2017/2018. The aim of the competition is to support young scientists interested in Automotive topics, including innovative construction solutions and research methods. The Competition for the Fiat Chrysler Automobiles Award is announced on the basis of an agreement on scientific and technical cooperation between the FIAT Research Center and the FCA companies that co-finance prizes and three Polish universities: Warsaw University of Technology, Silesian University of Technology in Gliwice and the Technical and Humanities Academy in Bielsko-Biała.

Talks on cybercrime at the University of Lodz

2018-11-06

The Faculty of Law and Administration of the University of Lodz held a meeting with Brian Schilling, one of the directors of ICANN, an organization dealing with control and management of the Network, which presented the participants of cybercrime and defense against cybercrimes. ICANN (Internet Corporation for Assigned Names and Numbers) is a global non-profit organization that manages the global Internet. Every day, it makes decisions about choosing the right to resolve disputes between Internet users. During the meeting Brian Schilling talked about his daily work and presented the most interesting, current legal challenges related to the functioning of the global network - from the issue of intellectual property protection to the prosecution of organized criminal groups.

Conference „Banking in the Age of Crisis of Civilization” planned at the Kozminski University

2018-11-06

The Kozminski University in Warsaw, the Polish Bank Association, and the ALTERUM Center for Research and Analyses of the Financial System invite participants to the conference „Banking in the age of civilization crisis”. The participants of the conference, which will take place on November 8 at the Kozminski University, will attempt to assess the most important events related to the financial sector that took place in 2018. They will also try to answer the following questions: Are we prepared for the next crisis? Regulations – do they inhibit or stimulate the innovation of the financial sector? New business models - evolution or revolution? The special nature of this event is highlighted by the fact that it is a joint venture between people of science and practitioners from the financial circles, giving an opportunity to exchange views and flow of information between those groups.

Student of the Jagiellonian University wins a competition for literary translation

2018-11-06

Barbara Bruks, a student of literary and cultural translation at the Faculty of Polish Studies at the Jagiellonian University in Krakow, won the translation contest, which took place under the patronage of the Association of Literary Translators during the 14th International Festival of Stories in Wrocław. 280 translations from English, German and French were sent to the competition. The jury awarded the first prize to Barbara Bruks for translating the « Wyspiarze z ronda » (« Die Verkehrsberuhigten ») story of the Austrian writer and musician Elias Hirschel into Polish. See the awarded translation: <https://polonistyka.uj.edu.pl/documents/41623/140847814/E.+Hirschl+Die+Verkehrsberuhigten+-+t%C5%82um.+B.+Bruks.pdf/f92bbe75-1b21-440f-aa94-ee867c705ab9>

University of Szczecin to receive over PLN 10 million for improving research

2018-11-06

The University of Szczecin will receive over PLN 10 million for the implementation of the project „Improving the quality of scientific research in economic sciences with a special focus on the services sector”. The money is allocated by the Ministry of Science and Higher Education as part of the Regional Initiative of Excellence program. The project will be implemented in 2019-2022 by the faculties of economic sciences and management as well as management and economics of services of the University of Szczecin in the group of disciplines: economics, finance, management sciences and commodities. Funds will be allocated for training and study trips for employees, financing publications, monographs in reputable publications, supporting initiatives aimed at intensifying cooperation with the socio-economic environment, developing scientific infrastructure (building a laboratory system supporting professional research) and supporting scientific research with new didactic methods.

Memorandum on cooperation between Jan Długosz University and Zhengzhou University of Light Industry

2018-11-06

Jan Długosz University of Humanities and Natural Sciences in Częstochowa and the Chinese Zhengzhou University of Light Industry have signed a memorandum, which will allow for better cooperation in language teaching, vocational education and cultural exchange. The signatories of the document declared their will to organize more higher short-term courses, paid traineeships, as well as cultural events that would allow students to get to know the partner’s academic environment, the region and the country. The agreement also assumes the organization of more frequent visits by scientists in Poland and China. The memorandum was signed during the visit of the Chinese delegation in Częstochowa. The main interest of the Chinese side was the opportu-

nity to participate in PhD studies and to prepare a PhD dissertation with the participation of two promoters (Chinese and Polish). Zhengzhou University of Light Industry has existed since 1977. It is a leading university in Henan province, with over 22 thousand students studying there.

Students of the Silesian University of Technology awarded for the electric motorcycle „Elektra”

2018-11-06

Student Scientific Circle of the Silesian University of Technology - PolSI Racing received the Internet users award in the KoKoN Scientific Circles’ Competition for the project „Construction of an electric motorcycle PolSI eRacing” Elektra”. The KoKoN competition is addressed to students of technical universities operating in scientific circles. It is to encourage students to take part in scientific and social activities and to help integrate the student community and build dialogue between technical universities in Poland and external companies. The prizes were awarded in six categories: engineering project; conferences; research; innovation and new technologies; IT and Internet users’ award. The organizer of the nationwide KoKoN competition is the Technical Universities Forum, which is made up of students’ self-governments of Polish technical universities. 46 projects were submitted to the competition for the Internet users’ award, with over 3.5 thousand Internet users voted.

University of Natural Sciences and Humanities in Siedlce to educate doctors

2018-11-07

The University of Natural Sciences and Humanities in Siedlce is checking whether it can start educating doctors in the near future. For now, the university is analyzing the possibilities of developing a didactic base and acquiring qualified staff. The authorities of the University of Natural Sciences and Humanities set up a commission that checks if the university will be able to provide facilities necessary for the planned project. The application for permission to start medical education would be submitted at the end of April 2019. The medical course could be launched in two years. 30 students would be accepted in the first course. It would be the third medical course, after emergency care and nursing, at the Siedlce university.

Muller: Implementing the Constitution for Science is more important than writing it

2018-11-07

The implementation of the Constitution for Science is more important than writing it - said Piotr Muller, deputy minister of science and higher education at the meeting with spokespersons and employees of the promotion offices of Polish universities. As Muller pointed out, spokespersons play an extremely important role in their communities. They are the first source of information for scholars and students. In his opinion, the implementation of new statutory solutions depends not only on the university authorities but also on employees who deal with promotion and information. - That is why we have launched important instruments to help implement the Constitution for Science, such as: help desk or information meetings with experts. We will also soon issue a guidebook of the reform - announced Deputy Minister Muller.

Students of the Wrocław University of Technology to receive a modern flight control simulator

2018-11-07

Students of the Wrocław University of Technology gained access to a modern simulator of traffic management at airports. The agreement on this matter was concluded by the rector of the university, Prof. Cezary Madryas, Andrzej Bisek, head of the Bisek company and a representative of the Lubin commune, where the university aerospace center is located. The simulator enables mapping the appearance and functioning of each Polish airport. - At the moment, we are the only university in Poland that educates aviation engineering and will have such a modern and unique simulator at its disposal - says Prof. Cezary Madryas. Simulator training will be available to aeronautical engineering students. In addition, they will be able to use the area of the airport in Lubin, where the airport center is located. There are plans to conduct didactic classes there and to start using laboratories with aerodynamic tunnels and technical workshops.

University of Humanities and Natural Sciences in Częstochowa receives one million PLN

2018-11-07

University of Humanities and Natural Sciences in Częstochowa received over PLN 1 million in funding for the project „Learning through practice the key to professional teaching practice. Comprehensive education of students of the faculties with the UJD teaching specialization. „ The aim of the project is to develop and implement teacher education programs adapted to socio-economic needs at the university. The project will be implemented on the faculties realizing the teaching specialty, the target group are students of the Częstochowa university. Development of teacher education programs within the framework of the project and implementation of studies using innovative education methods, in cooperation with schools providing personalized

training in apprenticeships, will contribute to raising the competences of students necessary on the labor market and responding to social needs.

Nicolaus Copernicus University in Toruń promoted in the QS ranking

2018-11-07

The Nicolaus Copernicus University in Toruń was advanced by 19 places in the QS Emerging Europe and Central Asia ranking. In the classification conducted by one of the three most prestigious ranking organizations, the university was in the 88th place. The place in the QS Emerging Europe and Central Asia ranking shows the strong academic position of the University and a large promotion confirms the effectiveness of changes introduced at the university and the ambition to obtain the status of a research university in the near future. At the lead of the QS Emerging Europe and Central Asia ranking were Russian universities - Lomonosov State University and Novosibirsk State University. The ranking has been published since 2004 by the organization Quacquarelli Symonds dealing with the issue of teaching at a higher level. Its most important goal is to enable candidates to make the rational choice of university and to popularize the idea of studying outside their home country.

University of Zielona Góra to launch Laboratory of Materials Testing Engineering

2018-11-07

The University of Zielona Góra will receive almost PLN 12 million to create a Laboratory for Materials Research Engineering. The money comes from the Ministry of Science and Higher Education as part of the Regional Initiative of Excellence program. The research in the Laboratory will be carried out in the field of nanotechnology; the effect of vacuum and radiation on the properties of materials; methods of coating materials, properties of materials and metamaterials (including strength); research on optical methods of meta, micro and nanomechanical systems. The project is to be used to increase the research potential of current research groups, to further develop international cooperation in the field of science, to develop methods of increasing innovation and greater effectiveness in obtaining funds for research. It is also intended to prepare young research staff to work in interdisciplinary teams.

International Scientific Conference „Debuts of Mickiewicz. Debuts of the Romantics” at the University of Białystok

2018-11-08

Under what circumstances did the „Urban Winter” appear- the first piece by Adam Mickiewicz published in 1818 in the Tygodnik Wileński? What were the beginnings of the Romantism poets from Poland, Europe and even America? These are just some of the topics of the conference, which will take place in Białystok from 9 to 10 November. The conference will take place in the 200th anniversary of the poetic debut of Adam Mickiewicz. The event will inaugurate the cycle of national Mickiewicz Anniversary. The organizers of the Białystok event are the Department of Philological Studies «East-West» (Faculty of Philology of the University of Białystok), Polish Academy of Learning and the Podlasie Library.

„Polish Returns” – Polish scientists from abroad moving to the Wrocław University of Technology

2018-11-08

Three scientists who have carried out their research so far in the USA, Spain and Italy, will move to the Wrocław University of Technology. Everyone received research grants in the program of the National Agency for Academic Exchange „ Polish Returns”. Dr Jacek Herbrych from the University of Tennessee (Knoxville, USA) received a grant of PLN 1.1 million and will work for the Department of Theoretical Physics). Dr Eng Grzegorz Pasternak from the University of Trento (Italy) received a grant of PLN 1 million and will work at the Polymer and Carbon Materials Department, and Dr Eng Sabina Rosiek-Pawłowska from the University of Almeria (Spain) received a grant in the amount of PLN 1.6 million and will work for the Department of Structural Fundamentals and Flow Machinery. Program «Polish Returns» allows scientists working abroad to return and take up scientific work in Poland. Thanks to the program, Polish universities and scientific units will acquire specialists with international experience and knowledge about the latest research trends.

Mathematical educational game created at the University of Technology and Humanities in Bielsko-Biała

2018-11-08

The University of Technology and Humanities in Bielsko-Biała will develop an educational game to facilitate the study of mathematics. The university has received funding under the „mPotega” grant program for the project addressed to primary school students from rural areas. The aim of the project is to create a universal educational game, aimed at facilitating the study of mathematics for primary school pupils. The didactic help will be tested by fifth grade students from five primary schools from the Małopolskie and Śląskie Voivodships for 10 weeks. The impact of innovation on students' competences will be checked

by a specially prepared mathematical skill test. The ending and summary of the project will take place at the Technical and Humanities Academy in December 2018. The event will be accompanied by additional attractions - the game Clever Maths tournament, lectures and mathematics workshops. The best players will receive valuable prizes.

Silesian University of Technology with other twenty universities to become a research university

2018-11-08

Silesian University of Technology is in the group of twenty Polish universities that can become a research university. The university has gained 700,000 PLN for the project „Development of an action plan ensuring continuous growth of indicators of scientific excellence at the Silesian University of Technology as a research university”. The University's development plan is to increase the international recognition of scientific activities, strengthen research cooperation with highly renowned research centers and improve the quality of education of students and doctoral students - especially in the fields of study and in scientific disciplines related to priority research areas. The detailed objectives of the project include searching for and surrounding the care of scientific leaders, developing mechanisms for technology transfer, increasing the number of projects and scientific-research work within key specializations, as well as preparing young scientists with high research potential and raising the university's position in rankings.

Fourth season of Perceptus IT Security Academy launched at the University of Zielona Góra

2018-11-08

The fourth season of Perceptus IT Security Academy started at the University of Zielona Góra. The Academy consists of a series of open lectures and practical classes. Classes in the faculties of computer science, electrical engineering and automation are run by experts-practitioners from the IT security industry. The Academy will cover issues related to cyber security. This year's fourth course will focus on network security, creating network projects and monitoring server infrastructure. The three courses of the Academy were very successful. They attracted not only students but also pupils for whom a special workshop group was created. In this year's, lecture classes can be attended by all interested students but practical classes are held for a narrow group of listeners, due to their character and limited number of participants.

Ministry of Science to launch new anti-plagiarism program

2018-11-09

Piotr Dardziński, Deputy Minister of Science and Higher Education, informed that the Ministry of Science is launching a new anti-plagiarism program that will apply to all scientific works. At present, only master's theses are checked by the anti-plagiarism system. - We are creating a database of all diploma theses: bachelor's, master's, PhD's, and all publications, including the Polish Internet, which will be updated every month. The system will search all of these databases and check whether any work is not a result of plagiarism - explained Dardziński. The deputy minister assured that the system would be very effective and would also prevent „more intelligent methods to make plagiarisms“ because it contains AI elements.

University of Bialystok to receive almost PLN 9 million from the „Regional Initiative of Excellence“ program

2018-11-09

University of Bialystok received funding PLN 8,791,222 under the „Regional Initiative of Excellence“ program from the Ministry of Science and Higher Education. The money will be spent on developing the research potential of two disciplines: linguistics and literary studies. The main goal is to support linguistic and literary studies conducted at the University of Bialystok. The funds obtained will allow for the implementation of research projects, the publication of monographs and scientific articles, financing of researchers' trips to library and archival queries as well as conducting surveys. The university also intends to employ young researchers and thus increase their participation in the employment structure in developed disciplines – additional calls for PhD students and PhD holders are planned.

University of Lodz to hold conference „Tourism in nature“

2018-11-09

The Institute of Urban Geography and Tourism of the Faculty of Geographical Sciences of the University of Lodz is organizing on November 16-17, 2018 a scientific and didactic conference for upper secondary school teachers entitled „Tourism in nature“. The goal of the organizers is to familiarize participants with resources and natural values in tourism. - We would like to encourage you to deepen your knowledge of the peculiarities of animate and inanimate nature and the possibility of getting to know them through tourism, as well as the participation of tourism in its protection. We will pay attention to the following issues: nature protection in the context of tourism development, changing relations between tourism and the natural environment, nature perception, landscape aesthetics, natural environment absorption, development and use of natural resources to renew and improve human psychophysical forces.

Deputy Prime Minister Gowin awards 80 scientists with the Diamond Grants

2018-11-09

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin awarded 80 young scientists with prizes in the 7th competition of the Diamond Grant program. The goal of the Diamond Grant program is to select the best of the best Polish young scientists, creating an accelerated path of career for young researchers with unique scientific achievements. Each of the winners received up to 220,000 PLN for the implementation of its first independent research projects lasting from 12 to 48 months. During the project implementation, they will be able to receive a remuneration of up to PLN 2,500 per month. - For several years, our country has been implementing a development plan, a plan to rebuild the Polish economy. Modern strong economy can only be built on the work and research of scientists. That is why we have been building a bridge between Polish science and business for several years - said Deputy Prime Minister Gowin.

University of Silesia to hold 9th conference „Past for the Future“

2018-11-09

The Department of Special Education at the Faculty of Ethnology and Educational Sciences of the University of Silesia and the Regional Center for Social Policy of the Silesian Province invite participants to the conference „Past for the Future“ on November 14th. This year's, ninth conference refers to events related to the 100th anniversary of regaining independence and the 100th anniversary of women's electoral rights in Poland. The first part of the conference will deal with historical aspects, and the deputy Konstanty Wolny, who was one of the first Silesian deputies to the Sejm. In the second part, a panel discussion «Activity - prevention and health» is planned with the participation of scientists, doctors, politicians and seniors. Co-organizers of the conference are the Academic Association of Social Assistance, the Association of Active Silesia, and Universities of the Third Age in Cieszyn and Wodzisław Śląski.

Conference on women fighting for social advancement 1700-1918 at the University of Wrocław

2018-11-09

The Historical Institute and the Institutes of Roman and English Philology from the University of Wrocław invite participants to the international conference „Freedom, equality ... for everyone?. Women in the fight for social advancement 1700-1918”, which will be held on November 20 and 21. The topic of the conference refers to the flagship postulates of the French Revolution and its democratic aspirations changing the world order. These demands are also valid today - on the hundredth anniversary of the end of the First World War, what largely contributed to the fuller implementation of Enlightenment slogans, through to the electoral rights granted to women and the introduction of gender equality in most European countries. The organizers of the conference will focus on the «long ages» of the eighteenth and nineteenth century. It was the time of political, economic and, above all, mentality transformations that preceded and enabled the twentieth century breakthrough.

Rzeszów University of Technology to hold Open Days and IV Night Meetings with Science

2018-11-12

On Thursday and Friday, 22 and 23 November 2018, the Rzeszów University of Technology will host Open Days and the 4th Night Meeting with Science. On the first day, representatives of all departments of the Rzeszów University of Technology as well as students from scientific circles and student organizations will participate in the physics and chemistry shows, listen to lectures prepared by university staff and students. On November 23, Rzeszow University of Technology organizes the 4th Night Meeting with Science. The event will last from 5 pm to 10 pm. The main event will provide the opportunity to visit the Rzeszów University of Technology laboratories, which usually are available only to the students and the employees.

Krakow University of Technology to hold Career and Mobility Days

2018-11-12

Krakow University of Technology launches Career and Mobility Days as part of the Project Scientist. The offer is addressed to young scientists. The event will take place on November 20-21 2018 at the Krakow University of Technology. On the first day, young researchers will be able to meet representatives of agencies and research funding organizations who will present the offer of Polish and international grants for young researchers. The second day will be devoted entirely to training and workshops on writing effective scientific publications, relations and conducting negotiations in the science and business sectors or in the career planning.

University of Białystok to cooperate with Asseco Data Systems

2018-11-12

The University of Białystok has signed a cooperation agreement with the company Asseco Data Systems S.A., which deals in creating, developing and maintaining IT systems and specialized services, mainly for enterprises and local government administration. The agreement provides for the organization of student and graduate internships, cooperation in the writing diploma thesis and PhD thesis in the computer science and company involvement in the implementation of a scholarship program for students and PhD students of the University of Białystok. The Asseco Data Systems and the University of Białystok also plan to implement scientific and IT projects, as well as jointly apply for co-financing from European Union or national funds.

Warsaw School of Economics wins in the „Rzeczpospolita” newspaper ranking

2018-11-12

The Warsaw School of Economics is the best economics school in Poland. The country's best economic faculty is the Faculty of Economic Sciences at the University of Warsaw. These are the results of the third ranking of universities and economic faculties of the „Rzeczpospolita” newspaper. In the category of best universities, the second place was taken by the Kozminski University in Warsaw and the third by the University of Economics in Poznań. In the category of the best economic faculty, the second position was taken by the Faculty of Management and Social Communication of the Jagiellonian University in Krakow and the third by Faculty of Applied Sciences of the WSB Academy. The ranking was prepared with the support of the Information Processing Center - National Research Institute. More: <https://www.rp.pl/Biznes/311079957-Najlepsze-uczelnie-ekonomiczne-w-Polsce-SGH-poraz-trzeci-kroluje-na-podium.html> <https://www.rp.pl/Biznes/311079962-Najlepsze-wydzialy-ekonomiczne-w-Polsce-Dobre-studia-nie-boja-sie-nizu.html>

Medical University of Gdańsk to launch Welcome Center

2018-11-12

The Medical University of Gdansk (GUM) has received over a quarter of a million PLN from the National Academic Exchange Agency as part of the Welcome to Poland competition. That money will allow the university to implement the „Welcome Center” project. The university will provide students and foreign staff with an information and contact point - so-called Welcome Center. A special website for students and teachers from abroad will also be created, and study visits at partner universities will allow to learn good practices in this area. The goal is to increase the level of internationalization by developing interpersonal, cultural, linguistic and professional skills of national and foreign employees dealing with students on a daily basis. As part of the project, trainings, workshops and seminars will be carried out to improve the qualifications of employees and to support of the foreign guests.

Dick Helm at the University of Gdańsk to hold a lecture The leadership is about ...

2018-11-12

The Center for Physical Education and Sport of the University of Gdańsk invites participants to an open lecture by Dick Helm - a graduate of the prestigious Wheaton College, teacher, lecturer and coach in NBA teams. The lecture „The leadership is about ...” will take place on November 16. Dick Helm graduated from Wheaton College in 1955. Until the mid-1980s, he served as a trainer and sports director at Judson College and at Wheaton College. After completing his university-level work, he was offered a job as a scout trainer for the Seattle Supersonics NBA team. For the next 15 years, Helm served as the first assistant to Seattle Supersonics, Cleveland Cavaliers, Atlanta Hawks, Toronto Raptors and New York Knicks. His career in the NBA enabled him to conduct coaching workshops and give lectures on coaching aspect, leadership, personal development, management and motivation.

Students of the Wrocław University of Environmental and Life Sciences receive Diamond Grants

2018-11-12

Karolina Tkacz and Igor Turkiewicz from the department of biotechnology and food sciences at the University of Life Sciences in Wrocław won the „Diamond Grants” of the Minister of Science and Higher Education. Karolina Tkacz wants to develop a product based on sea buckthorn - a plant containing many biologically active compounds that can be used in functional foods that can positively affect the body. The aim of Igor Turkiewicz's research is to identify and use the bioactive potential of quince fruit by creating microcapsules with its polyphenolic fraction. This will reduce its degradation in the human body and increase bioavailability. Both laureates within their joint part of the project are planning to build a simulated human digestive tract. This in vitro model will allow to study the bioavailability and absorption of bioactive compounds in

juices. More: http://www.glos.upwr.edu.pl/aktualnosci/48528/diamentowe_granty_dla_studentow_upwr.html

III Real Education Forum in Lublin

2018-11-13

On November 16-17 the Competence Development Office of the Maria Curie Skłodowska University (UMCS) in Lublin, together with the Center for the Development of Real Schools at the Bednarska Real School, organizes the 3rd Real Education Forum „Let's school the world!” This year's forum is organized under the slogan: How today's education deals with the challenges of the real world. The meeting is designed for people interested in broadly understood education and adapting schools to the realities of the modern world. The III Real Education Forum is time for meetings with enthusiasts of youth work, presentations of innovative, alternative educational methods, discussions and workshops. The invitation to the Third Real Education Forum is directed in particular to teachers, parents, students, university staff involved in the development of education as well as employers and local government.

Researchers from the Collegium Medicum of the Jagiellonian University to investigate the influence of the electromagnetic fields

2018-11-13

Researchers from the Department of Biophysics Collegium Medicum of the Jagiellonian University (CM UJ) in Krakow have started a multidirectional research project „The influence of electromagnetic fields on the human body”. - Electromagnetic fields are ubiquitous and cannot be avoided. Field sources are present in our natural environment, but their intensity is millions of times smaller than the intensity of electromagnetic fields originating from artificial sources, created by our civilization - said Prof. Eugeniusz Rokita from the Department of Biophysics, Department of Physiology, Faculty of Medicine, CM UJ. Krakow scientists want to investigate whether

the fields of electromagnetic frequencies used in wireless communication have an impact on our health. The research is to focus both on checking the subjective assessment of the influence of electromagnetic fields on the body based on questionnaire studies and on conducting a series of clinical tests.

Ministry of Science reports on the results of enrollment for studies in the academic year 2018/2019

2018-11-13

The Ministry of Science and Higher Education published a report on the results of recruitment for studies in the academic year 2018/2019. The data show that technical universities are the most popular choice. According to the data from the Ministry of Science, universities most often chosen by candidates (four and more candidates' applications per one place -) for first-cycle full-time studies include: 1. Gdańsk University of Technology 8.8 2. Warsaw University of Technology 7.2 3. Poznan University of Technology 6.9 4. Wrocław University of Economics 6.0 5. Lodz University of Technology 5.7 6. University of Warsaw 5,0 The most popular trends are: IT, management, psychology, economics and law. More: https://www.gov.pl/documents/1068557/1069061/20181109_WYNIKI_rekrutacji_2018-2019.pdf/062edfe7-a801-8b4e-6139-d4f42e64e624

Feast of Exact Sciences - Days of Prof. Antoni Hoborski to be held at the AGH University of Science and Technology

2018-11-13

From 14 to 18 November, the AGH University of Science and Technology will hold the Feast of Exact Sciences - Days of Prof. Antoni Hoborski. Since 2017, this event is a statutory university ceremony, the aim of which is to popularize the development of exact sciences and awareness of their proper teaching. The aim of the Feast of Sciences is to pay attention to the problems associated with teaching basic subjects. It is also a commemoration of the Professor Antoni Maria Emilian Hoborski - an outstanding Polish mathematician, the first rector of the Mining Academy and dean of the Mining Faculty. The event will include the Conference of Students' Scientific Clubs of Prof. Antoni Hoborski and a scientific conference presenting selected achievements of the Faculty of Computer Science, Electronics and Telecommunications, Faculty of Materials Science and Ceramics, Faculty of Power and Fuels, Faculty of Physics and Applied Computer Science, Faculty of Applied Mathematics and AGH University of Science and Technology.

Researchers from the University of Warsaw examine addiction to the network

2018-11-13

Researchers from the Faculty of Journalism, Information and Bibliology of the University of Warsaw studied in Poland the FOMO (Fear of Missing Out) phenomenon, i.e. fear of being disconnected from the network. Research on a representative group of Polish Internet users (up to the age of 15) was set on a very extensive, scientific basis. The effect of the work was not only calculating the FOMO indicator in Poland, but also getting acquainted with the scale of this phenomenon. Dr. Anna Jupowicz-Ginalska, initiator and coordinator of the study emphasizes that «thanks to the obtained data, we know that high FOMO syndrome concerns 16% Polish Internet users over 15 years of age. This is a large group,

because it means that several million Poles may have problems with disconnecting from the Internet and smartphone. « See the test report: <https://www.wdib.uw.edu.pl/attachments/article/1992/FOMO.%20Polacy%20a%201%C4%99k%20przed%20od%C5%82%C4%85czeniem%20%20z%20raport%20bada%2084.pdf>

Archaeological computer game from the University of Gdansk

2018-11-13

Almost a million times players from around the world played in Excavate - an archeological computer game that was created as part of a popularizing project carried out at the Faculty of History of the University of Gdańsk. In the game «Excavate», the player becomes the archaeologist who conducts the excavation research at the historical Evangelical cemetery in Nowy Młyn. The game is based on real scientific research that was carried out in 2014-2015 by MA Waław Kulczykowski from the Historical Department of the University of Gdańsk. The game was made by Mateusz Sokalszczuk as part of the Archeologia Live & Online project funded by the Foundation for Polish Science. You can participate in virtual excavations here: <https://armorgames.com/play/17843/excavate>

Silesian Medical University to build the Silesian Medical Platform eCareMed

2018-11-13

Almost PLN 67 million will be awarded to the Medical University of Silesia in Katowice (SUM) for the Silesian Medical Platform eCareMed. The project was created in response to the needs of patients in early diagnostics of oncology, cardiology and neurology diseases. Implementation of the project «Silesian Digital Medical Platform eCareMed - Telemedicine and exploration of medical data» will allow minimizing waiting time for diagnostics, treatment and rehabilitation. It will also increase the access of doctors to the results of patient tests. The platform will allow the use of information and

communication technologies in the area of e-health. The project led by the SUM, will be implemented by partners: the Silesian Center for Heart Diseases in Zabrze; Beskidzkie Centrum Onkologii, Municipal Hospital of John Paul II in Bielsko-Biała; Center of Oncology - Maria Skłodowska-Curie Institute in Gliwice, University Clinical Center and Upper Silesian Medical Center SUM. More: <https://sum.edu.pl/uczelnia/wiadomosci-z-zycia-uczelnia/9024-niemal-67-mln-zl-dla-slaskiego-universytetu-medycznego-w-katowicach-na-slaska-platforme-medical-ecaremed>

Prof. Herta Flor to hold a lecture at the University of Wrocław

2018-11-13

The University of Wrocław and Academia Europaea Wrocław Knowledge Hub invite participants to the lecture of Prof. Herta Flor „From acute to chronic pain: the role of learning and cerebral plasticity”. Professor Flor, a world-renowned specialist in the field of neuropsychological research on chronic pain, will talk about short-term and chronic pain, its impact on the body and quality of life, and how neuropsychology can help in coping with suffering. Herta Flor is a professor of neuropsychology at the University of Heidelberg and the director of the Cognitive and Clinical Neuroscience at the Central Institute of Mental Health in Mannheim. She also deals with the process of learning and memorizing in the context of neurology, treatment of psychological disorders such as depression, anxiety or substance abuse and neuropsychological rehabilitation.

Welcome to Poland! Over 100,000 funding for the University of Opole

2018-11-13

The University of Opole has obtained over 100,000 PLN for the program of the National Academic Exchange Agency „Welcome to Poland”. The „Welcome to UO” activity includes training for university employees in the field of service and integration of foreign students and the translation of documents and regulations. The university will also be enriched with information plates in English for better orientation of foreigners in the university. The library will receive a database of over 100,000 digital books of the disciplines in which foreign students are educated. Integration activities are also planned within the «Tastes of the World» program as a platform for presenting the cultures of students of several nationalities as well as within «International weekends» - meetings of employees and students in private homes. In the academic year 2018/2019, about 100 foreigners from all over the world took up studies in English at the University of Opole, and as part of exchange programs, another 200 foreigners will come to the university.

University of Economics in Poznań receives PLN 3 million for the development of research potential

2018-11-14

The Poznań University of Economics received PLN 3 million for the implementation of the „Economy in the face of the New Economy” program. The money comes from the Ministry of Science and Higher Education, as part of the Regional Initiative of Excellency competition. The aim of the project is to develop the research potential of the University of Economics in Poznan in the field of economics, finance and management sciences as well as to increase the academic activity of university staff internationally. The received funds will be used to implement internal research projects, finance publications, and organize and participate in conferences.

Medical University of Silesia in Katowice receives co-financing of the scholarship exchange

2018-11-14

The Medical University of Silesia in Katowice received funding from the National Academic Exchange Agency for the implementation of the PROM Program - International scholarship exchange of PhD students and academic staff. The aim of the project is to enable PhD students and academic staff to improve their professional skills through gaining or broadening knowledge about available modern research techniques, learning and the method of analyzing the obtained data. The implementation of the project will allow determining the appropriate direction of research conducted by the PhD student or will enable to obtain the necessary materials for the doctoral / scientific work, and thus to implement the topic of the PhD dissertation / scientific work or publication of a scientific article / obtaining a certificate confirming the acquired skills.

University of Nicolaus Copernicus in Torun receives AMBA accreditation

2018-11-14

The Executive Master of Business Administration study program of the Faculty of Economic Sciences and Management at the Nicolaus Copernicus University in Toruń has been accredited by the Association of MBAs (AMBA) - one of the leading authorities in the field of business education. AMBA accreditation confirms the highest level of achievement in business education and it is awarded only to the best management studies. Only 2 percent the best business schools in the world have AMBA Master of Business Administration, Master of Business Management and PhD Business Administration programs. In Poland, AMBA is accredited to the Leon Koźmiński University, Gdańsk University of Technology, Warsaw School of Economics, University of Economics in Poznan and Warsaw University. The University of Toruń is the only public university in Poland offering accredited courses both from the

Association to Advance Collegiate Schools of Business and AMBA.

Students from China to learn at the University of Bialystok

2018-11-15

18 students from Luoyang Normal University and North University of China started their studies at the University of Bialystok (UwB). Guests from China will spend the semester at the University of Podlasie and will participate in classes conducted in English in five faculties: biological and chemical, economics and management, physics, pedagogy and psychology, and law faculty. Internationalization is one of the priorities of the University of Bialystok, which concerns both science and didactics - says Dr Mariusz Popławski, Vice-Rector for Development and International Cooperation. China is a strategic direction for us, because more and more students from this country are going to exchange and study abroad. We are intensively striving for cooperation with local universities and, as you can see, it is starting to bring results - adds the vice-rector of the University of Podlasie.

9th National Student-Inventor Competition

2018-11-15

The 9th National Student-Inventive Competition 2018/2019 has started. The competition has been organized since 2010 by the Kielce University of Technology. It is addressed to students, PhD students and graduates who during their studies became creators/co-founders of the invention or utility/industrial design protected by an exclusive right or submitted for the Patent Office of the Republic of Poland or an appropriate office for industrial property abroad. Five winners of the main prizes will present their solutions at the 47th International Exhibition of Inventions in Geneva in April 2019. The organizer will finance the costs of the exhibition stand, travel and stay of the laureates in Geneva. Recruitment of applications for the competition will last until January 25, 2019. More: <https://tu.kielce.pl/start/badania-i-nauka/centrum-ochrony-wlasnosci-intelektualnej/>

Poland in Space - cosmic November

2018-11-15

- We have talented, ambitious students who are passionate about space technologies. Warsaw University of Technology is a leader in this field. Thanks to the PW-Sata mission and, I hope, the successful PW-Sat mission2, it will be possible to activate other academic centers in Poland - said Grzegorz Brona, president of the Polish Space Agency, in an interview for Space24. Grzegorz Brona announced that in the second half of November 2018, apart from launching the Polish student satellite PW-Sat2 into space, launching the Finnish-Polish satellite observation Earth ICEYE-X2, launching the satellite of the European Space Agency with a telecommunications system prepared in Poland, launching the test Polish suborbital rocket to the height of 15 km and Mars landing of the NASA InSight probe with the Polish mechanism are planned. The events will be promoted by the campaign under the slogan «Poland in Space - cosmic November» implemented with the support of the Polish Space Agency and the Ministry of Enterprise and Technology.

Deputy Prime Minister Gowin indicates the pillars of the Constitution for Science

2018-11-15

- Increasing the autonomy of the university, replacing donations with subsidies, strengthening the rector's position, treating the university as a single body, not a loose federation of faculties, selecting research universities, new evaluation rules, linking the power to award academic degrees with real scientific achievements, replacing inefficient PhD programs with interdisciplinary PhD programs. These solutions are essential for the new law - said Deputy Prime Minister Jarosław Gowin. The Minister of Science and Higher Education revealed that the cost of consulting the Constitution for Science amounted to over PLN 5 million. They were the largest consultations after 1989. About 7,000 people took part in them. They lasted two years and were recognized as a model consultation by the European Commission. - Effective communication on such a scale required

resources, but every Polish zloty was spent for the right purpose. Expenditures on the implementation of the act include primarily the cost of trainings, awaited by the academic community and they are completely covered from the PO WER project - explained Deputy Prime Minister Gowin.

Adam Mickiewicz University in Poznań to undergo the evaluation of the European University Association

2018-11-15

The University of Adam Mickiewicz in Poznań will submit the application for the external evaluation of „European University Association EUA Evaluation” in the academic year 2019/2020. This is the first Polish university that will attempt to gain this internationally recognized international accreditation. - As a result of a positive evaluation, we will receive an accreditation that will strengthen the position of our university in negotiations with foreign partners, such as colleagues from American universities who ask for international accreditations to run joint educational projects. It is also intended to strengthen our position in negotiations regarding various European initiatives - says Vice-Rector for Education, Prof. Beata Mikołajczyk. EUA or the European University Association is a prestigious organization-member of the register of all associations studying the quality of education in Europe and in the world. It includes more than 800 universities and academic organizations.

Center of Modern Technologies of the University of Toruń allowed to operate commercially

2018-11-15

The interdisciplinary Center for Modern Technologies of the Nicolaus Copernicus University in Toruń was allowed for the economic use of research infrastructure. It means the possibility of conducting commercial activities in the field of basic research, industrial research and development. Non-profit research activities were launched at the Center in

2013. Due to the fact that the construction of the unit was co-financed from the European Regional Development Fund, commercial works have so far been excluded due to the lack of appropriate regulations. Now the Center will be able to commercially use its infrastructure to 20 percent of its total annual performance. It will be able to offer paid research services and to rent its laboratories for research and development works financed by R&D institutions, business and individuals.

University of Silesia to cooperate with the Institute of Organic Industry

2018-11-15

University of Silesia in Katowice signed an agreement of cooperation with the Institute of Organic Industry - Branch in Pszczyna (IPO). The document was signed by the Vice-Rector for international and national cooperation, Dr Tomasz Pietrzykowski and the head of the IPO branch Dr. Przemysław Fochman. The cooperation assumes the implementation of joint projects, promotion of entrepreneurship in the academic environment, supporting the projects of university students, organization of student internships for full-time and part-time students, and organization of internships for the best students and graduates of the University. Representatives of the Institute will participate in consultations regarding education programs and diploma theses at the university. The purpose of the contract is also to animate and create cooperation networks to use the scientific and human potential of both organizations. The Institute will also help in the expansion of the University's laboratory infrastructure.

Ericsson designs the 5G network for the Lodz University of Technology

2018-11-16

The international IT concern Ericsson informed that it designed the 5G network for the campus of the Lodz University of Technology. This is a new generation of the Internet, allowing to transfer data up to 20 times faster than in the existing LTE network. The CEO of the Office of Electronic Communications, Marcin Cichy, who stayed in Łódź, explained that tests of the new Internet may be conducted in a number of locations in Poland, and the government agencies are expecting the best initiatives of various cities. One of these initiatives is also the cooperation of Ericsson and the Lodz University of Technology. Marek Zagórski, minister of digitization declared a month ago that the Lodz University of Technology will receive PLN 8 million for 5G network tests in 2018-2019. The University wants to test new 5G laboratory and lighting control systems.

Catholic University of Lublin to hold Conference for Spanish language teachers

2018-11-16

Foreign Languages Center of the Catholic University of Lublin (KUL), Spanish Language School „Diálogo” and the Development Foundation of the Catholic University of Lublin are organizing a conference for Spanish language teachers Expertos ELE on November 17-18, 2018. The goal of the event is to promote Spanish and to present prototype solutions supporting the didactic process in the field of foreign language teaching. During the conference, participants will take part in workshops conducted by experts from Spain, professionally active Polish teachers and representatives of scientific publishing houses. More: <http://www.expertosele.com/>

School of Law and Chinese Culture at the University of Silesia

2018-11-16

Until November 30, students can sign up for the School of Law and Culture of China at the Faculty of Law and Administration of the University of Silesia. The project is carried out in cooperation with two renowned Chinese universities: the Beijing Foreign Studies University and the Northeastern University in Shenyang. The program will cover issues related to business contacts and Chinese law in the field of starting and conducting business in China - administrative procedures, labor law, elements of criminal law, principles of concluding and performing contracts. Participants will also learn about the language, traditions and customs of China. Each session will be conducted by specialists - professors from partner Chinese universities. The school is a venture addressed to students and entrepreneurs interested in cooperation with China and to people fascinated with the culture of this country. Classes will begin in January 2019. University of Szczecin to hold conference on unconventional power engineering

2018-11-16

The Faculty of Earth Sciences of the University of Szczecin together with the Marshal's Office of the Westpomeranian Region invite participants to the conference „Unconventional energy in Western Pomerania - potential, problems, perspectives”, which will be held on November 20th. The main topics of the conference are energy security, energy planning in local governments, environmental protection, use of renewable energy sources and social acceptance for RES investments. The participants will also learn about the principles of operation of local energy clusters. During the conference participants will be able to see the research on the use of diatoms for biofuels production, which have been conducted for years at the Faculty of Earth Sciences. One of the conference panels will be devoted to legal issues

- including spatial planning and regional energy policy. More: <http://usz.edu.pl/dla-srodowiska-i-dla-energii/>

Nicolaus Copernicus University in Toruń applying for the status of a research university

2018-11-16

The Nicolaus Copernicus University in Toruń will receive PLN 1 million for the implementation of the project „Nicolaus Copernicus University in Toruń - a vision of research excellence” as part of the program of the Ministry of Science and Higher Education „Strategy of Excellence - University of Research”. The main tasks of the program are raising international recognition of universities, strengthening research cooperation with centers of high international reputation, improving the quality of education of students and PhD students, attracting the most talented candidates from the country and abroad, and improving the quality of university management. One of the basic goals set in the university development strategy for 2019-2025 is to obtain the status of a research university. Implementation of the project «Nicolaus Copernicus University in Toruń - a vision of research excellence» will help to achieve this goal.

Ceremonial opening of the Medical Simulation Center at the Medical University in Poznań

2018-11-16

Medical Simulation Center was officially opened at the Medical University of Poznan. This modern, multi-profile center will operate in a new university building –Adam Wrzosek Collegium. The project has received over PLN 16.5 million from European funds. The Center consists of eight high fidelity halls together with control rooms, the operating department, two intensive care rooms, the hospital room of the emergency department; a carriage simulator, delivery room and two nursing rooms. In addition, there are also six rooms of low fidelity and ten didactic rooms - including a room for practicing with standardized patients. Exercises with the participation of standardized patients - actors professionally prepared to play the history of the course of a given disease will be a novelty at the Poznan university. <http://www.ump.edu.pl/universytet/unia-europejska/centrum-symulacji-medycznej>

University of Gdańsk to examine the social activity of Polish migrants in Germany

2018-11-16

The University of Gdańsk will implement the project „Areas of social activity of Polish migrants in Germany. Comparative study of Berlin and Hamburg „. The money for its implementation comes from the Polish-German Foundation for Science. The project aims to determine the nature of the presence and social activity of Polish immigrants in urban space and to compare social behavior and forms of participation in the public life of Poles living in Berlin and Hamburg. The result of the project will be scientific publications in Polish, German and English. The project partners will take part in international conferences devoted to migration in the contemporary world, they are also planning submission of applications for the main call of the Polish-German Foundation for Science, expanding the spatial scope of the study - by including cross-border migration on the Polish-German border.

3rd International Latin American Conference in Lublin

2018-11-19

The Faculty of Political Science of the Maria Curie Skłodowska University in Lublin, the Polish Academy of Sciences, the Branch in Lublin and the editorial staff of the scientific journal „Anuario Latinoamericano - Ciencias Políticas y Relaciones Internacionales“ are organizing the III International Latin American Conference on November, 21 and 22. The event is an interdisciplinary forum and international debate on Latin America and the Caribbean, during which the participants will present the results of their research on the conditions, role and change of the region's position in international relations in the 21st century. The event will be attended by political scientists from Polish and foreign research centers and representatives of the diplomatic corps of Latin American countries in Poland. During plenary sessions, lectures in Spanish will be given by guests from Argentina, Brazil, Colombia, Mexico, the Czech Republic, Spain, Lithuania, Germany and the United Kingdom. 4th Conference for leaders of the university management LUMEN 2018

2018-11-19

Practical aspects of the implementation of the new Act on Science and Higher Education, including change of universities management, will be the topic of the fourth Conference for the leaders of the university management LUMEN 2018, which will be held on November 27, 2018 in Warsaw. The conference is supported by the Ministry of Science and Higher Education, the Polish Rectors Foundation, the Main Council of Science and Higher Education, the Conference of Rectors of Academic Schools in Poland, the Polish Accreditation Committee, and the Patent Office of the Republic of Poland. The organizers proposed two themes: Strategic Management, which will be a debate on practical aspects of the implementation of the Act and will take place with the participation of eminent academic representatives and IT Management addressed to peo-

ple involved in computerization of universities - IT directors, administrators, system users, rectors and vice-rectors for informatization. More: <http://www.lumen.edu.pl/>

Technical University of Lodz to hold a conference on the world of consumption

2018-11-19

Dr. Joanna Mysona-Byrska, professor of the Papal University in Krakow will deliver a lecture „Attempt to escape from the world of consumption“ within the meeting organized by the Faculty of Management and Production Engineering of the Lodz University of Technology as part of the series of Open Scientific Seminars „Man-Business-Technologies“. During the meeting, Dr Mysona Byrska will bring closer the characteristics of the world of consumption, its rules and principles, impact on society and the political system. She will attempt to answer the questions whether people may not be a consumer and whether it is possible to escape from the world of consumption. The meeting is scheduled for 22 November 2018 at 4 pm on the campus of the Lodz University of Technology at ul. Wólczańska 215, in building B-9, room 418.

University of Opole to launch Virtual Academy of Astronomy

2018-11-19

The University of Opole for the sixth time launched the Virtual Academy of Astronomy. The inaugural lecture „Why is it worth observing the sky” was given by Grzegorz Sęk from the Youth Astronomical Observatory in Niepołomice. Virtual Academy of Astronomy supports the work of schools in the implementation of additional classes on astronomy and physics. Scholars of the Opole University conduct lectures, workshops and astronomical observations. Classes are held at school or at the University of Opole. During the classes students acquire competences in the field of computer science, physics and astronomy. Joint observations and team work allow to mobilize students to cooperate with colleagues. An additional motivation is the «Discoverer of the Worlds» competition, organized during the school year, while young people can compete in the following areas: literature, art and photography, and in the most prestigious category - the best research work.

Adam Mickiewicz University in Poznań receives one million PLN for the research university status

2018-11-19

University Adam Mickiewicz in Poznań received almost PLN 1 million for the project „Strategic dimensions of functioning of the University of Adam Mickiewicz in Poznań as a research university” realized within the competition „Strategy of Excellence - University of Research” organized by the Ministry of Science and Higher Education. - The awarded funds will allow us to receive expert opinions and analyses that are to help the university in working out useful solutions in order to apply for the status of a research university next year - says prof. Ryszard Naskręcki, Vice-Rector for Science and International Cooperation. Within the ministerial program, universities can obtain funds to support research and analyses aimed at developing the objectives and assumptions of a long-term development plan for a research university.

University of Wrocław organizes the exchange of scientific circles

2018-11-19

Students' scientific circles at the University of Wrocław presented their activities during the Scientific Circles Exchange. The event was organized for students who would like to get involved in additional activities, and for students of Lower Silesian schools planning to study at the University of Wrocław. 40 scientific circles participated in the event. The «Przybysz» Circle of Biotechnologists presented the basic techniques of genetic engineering and the Judaism experts from the «Sznirele Perele» circle showed how to write their name in Hebrew and Yiddish. At their stand, the guests could listen to the latest hits of Israeli music performers, as well as foretell future with aid of the Talmud. The Scientific Circle of Military Historians showed historic military equipment, and the Ancient Dance Group presented their skills through the renaissance, baroque and English counter-dance dances.

Gdańsk University of Technology becomes again the leader in the ranking of the most popular universities

2018-11-19

For the second time, Gdańsk University of Technology (PG) took first place in the ranking of the most popular universities, prepared by the Ministry of Science and Higher Education. The ranking published by the Ministry is a summary of the results of recruitment to higher education institutions in the academic year 2018/2019. It shows that the Gdańsk University of Technology received the highest number of applications, as many as 8.8 applications per one place. The second position in the ranking was taken by Warsaw University of Technology, with 7.2 graduates for one place. A total of 29.5 thousand students applied for studies at PG. The students were mostly interested in the faculty of Management and Economics: economics (33 people per place), management in English (28.8) and economic analysis (22.5).

Rector of the University of Warsaw to award best teachers

2018-11-20

The Rector of the University of Warsaw on November 21, 2018 will give didactic awards to the best academic teachers working at the Warsaw university. The didactic award of the Rector was established in 2015, and a year later it was given for the first time. It is awarded in three areas: natural and exact sciences, social sciences and humanities. This year, the award will be received by Dr Danuta Solecka from the Institute of Experimental Biology and Biotechnology of Plants in the field of natural and exact sciences; Dr Agata Komendant-Brodowska from the Institute of Sociology in the field of social sciences, and Dr. Filip Kawczyński, from the Institute of Philosophy, who will receive a didactic award in the area of humanities.

Professor Michael Piechowski visiting the State Higher Vocational School in Płock

2018-11-20

Professor Michael Piechowski, an American specialist in transpersonal psychology, will be the guest of the Faculty of Humanities and Social Sciences of the State Higher Vocational School in Płock this Thursday, November 22. Professor Piechowski specializes in the study of «levels of development of talented and talented people, self-fulfillment, moral, emotional and spiritual development of the individual and increased mental excitability belonging to the development potential». He was a lecturer at the University of Illinois, Northwestern University and Northland College. In Płock, he will give a lecture for students entitled «Theory of Positive Disintegration. Examples of a high level of development» and will conduct a seminar for university employees „Talent development and the development of a person”.

Gowin: Reform of research institutes to accelerate

2018-11-20

- Not everyone is an enthusiast of reforming research institutes,- said Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. The Ministry of Science, however, has a plan to accelerate the reform. Last year the Ministry of Science and Higher Education presented a plan to merge all research institutes in Poland into one network, which would be one of the largest institutions of this type in Europe. In the opinion of Deputy Prime Minister Gowin, the network is to build a bridge between science and the economy and to be an effective technological and intellectual background for public administration. The head of the Ministry of Science announced that work on this solution has been accelerated and the entire reform will be carried out by April 2019.

University of Technology and Humanities in Bielsko-Biała to launch Polish-Czech-Slovak project

2018-11-20

The Department of Science and External Cooperation, the International Exchange Center and the student government of the University of Technology and Humanities in Bielsko-Biała are implementing a project regarding the social responsibility of the university. The partners of the Academy in the project are the Czech Technical University of Ostrava, the Slovak Alexander Dubcek University of Trencin and the Hungarian Szent István University. The project is financed from the Visegrad Fund and targets to draw attention to the involvement in social actions. The project will last until July 2019. Its purpose is to exchange experience in conducting activities that promote the shaping of social and civic attitudes, collect ideas and create a handbook that inspires further social initiatives. The project will end with conferences in all four countries, where the idea of social responsibility will be spread among the local communities.

Gdańsk University of Technology to launch a new specialty in January

2018-11-20

In January 2019, the architecture faculty of the Gdańsk University of Technology will start a new specialty Integrated coastal zone management within Spatial Management department. This type of specialization has not been so far implemented at any Polish university. Students of the new course will learn the principles of planning and spatial development in the areas where land and sea meet. They will acquire knowledge in the field of urban and spatial planning, port areas management and port and industrial structures, and also learn the natural foundations of planning, with particular emphasis on the principles of ecosystem protection between land and sea. Graduates of integrated coastal zone management will find work in governmental and local government institutions involved in spatial planning, as well as in institutions related to maritime affairs or operating in the coastal zone.

University of Life Sciences in Poznań joins the SmartAgriHubs project

2018-11-20

University of Life Sciences in Poznań is one of 108 partners involved in the SmartAgriHubs project, which is to accelerate the digital transformation of the European agricultural and food sector. The project has a budget of 20 million euros co-financed by the European Union and aims to create a broad, Europe-wide network of digital innovations (Digital Innovation Hubs). The implementation of the project began on November 1, 2018. The coordinator of the work is the Dutch University Wageningen. SmartAgriHubs aims to create a mutually connected ecosystem where stakeholders work together at different stages of innovation from early research to farm applications. It is expected that over 4 thousand farms will be involved within 2 thousand experiments that are to adapt the process of digitization to the specific needs of farmers.

Universities from the province Kuyavia- Pomerania creates a consortium to build a laboratory base

2018-11-20

Public universities of the province Kuyavia- Pomerania created a consortium for the project „Laboratories of technical and exact sciences dedicated to the development of research potential in the field of innovative solutions and technologies of key importance for the economy of the Kuyavian-Pomeranian Voivodeship”. The consortium consists of the University of Kazimierz the Great in Bydgoszcz, the University of Nicolaus Copernicus in Toruń and the University of Technology and Life Sciences in Bydgoszcz (leader). The modern laboratory works in the field of exact and technical sciences financed under the project will be focused on the search and promotion of innovative ideas, products and services. The first informative meeting was devoted to the new scientific and research infrastructure of the project and the prospects of economic development of the technical industry in the province Kuyavia- Pomerania.

Warsaw universities create the best conditions for PhD students

2018-11-21

Warsaw University of Technology and the University of Warsaw took ex aequo the first place in the eleventh competition for the Most ProPhD University in Poland - PRODOK. The second position was taken by the Jagiellonian University, the third position was taken by the Warsaw Medical University and the Gdańsk University of Technology. The PRODOK competition is organized by the National PhD Student Representation. Its aim is to select a university that creates the best conditions for studying for PhD students and to promote good practices in PhD studies, basing on the evaluation of several categories,. More: https://krd.edu.pl/2018/11/19/wyniki-konkursow-prodok-i-propan-2018/?fbclid=IwAR1QyT2Y-jbxH0XPaa1ChqIfqX7IY1SWuviANI43Pv0_EnN5Y-wik33TG3z64

Professor Grzegorz Kołodko becomes Honorary Professor of the University of Corvinus in Budapest

2018-11-21

The Senate of the University of Corvinus in Budapest awarded Prof. Grzegorz Kołodko the title of Honorary Professor for outstanding achievements and scientific works in the field of economics and economic policy. Grzegorz Kołodko is a professor of economics and a lecturer at Kozminski University in Warsaw. In the years 1994-1997 and 2002-2003 he was the Minister of Finance and the Vice-President of the Council of Ministers. He has published many books and publications on economics and politics. He is considered to be the author of the theoretical trend of economics called New Pragmatism. He is a member of the European Academy of Science, Arts and Letters and the Scientific Council of the Foundation for European Progressive Studies.

Joint competition of the Wrocław University of Technology and The Bank of New York Mellon

2018-11-21

Jonas Al-Hadad, PhD student at the Faculty of Mathematics, won joint the Wrocław University of Technology and The Bank of New York Mellon competition for the best master's thesis in applied mathematics. The competition is the first effect of the cooperation agreement that the bank and the university signed in 2017. The jury consisted of representatives of the university, associated with the Hugo Steinhaus Center and representatives of the New York bank, who evaluated the submitted works in terms of the originality of the idea, mathematical correctness and the possibility of applying the solution proposed by the students in practice. The main prize was received by Jonas Al-Hadad, a graduate of Applied Mathematics, for «Pricing of American options: single and double continuation region». The laureate is currently a PhD student at the Faculty of Mathematics and participates in the project «InterDok - Interdisciplinary Programs of

PhD Studies at the Wrocław University of Technology». More: <http://pwr.edu.pl/uczelnia/aktualnosci/praca-doktoranta-pwr-wyrozniona-11030.html>

3rd Gala of University Laurels

2018-11-22

The Forum of Polish Universities and the Students' Self-Government of the Jagiellonian University (Jagiellonian University) in Krakow invite participants to the Auditorium Maximum of the Jagiellonian University for the 3rd Gala of University Laurels on 30 November. The idea of University Laurels is to indicate initiatives, people and organizations that support students' activities. The prizes will be awarded in the following categories: university science project, university didactic project, university cultural project, university sports project, perspective university, student mentor. University Laurels Gala will take place as part of the Congress of the Polish Universities Forum in Krakow - an autonomous agreement of student self-governments associated in the Conference of Rectors of Polish Universities.

Professor Saloni to hold a lecture as part of the „Master Lectures” at the University of Białystok

2018-11-22

Professor Zygmunt Saloni will be the guest of the next meeting from the series „Lectures of Masters” at the Faculty of Philology of the University of Białystok. On November 22, 2018 at 15:00 he will tell the listeners about a century of independence and „fixed” Polish spelling. Professor Zygmunt Saloni is an outstanding linguist, honorary member of the Polish Linguistic Society and an honorary member of the Society of Polish Language Lovers. His research interests are focused on Polish grammar and lexicography. He is the author or co-author of many fundamental and repeated works: „Syntactic features of the Polish verb”, „Introduction to Polish conjugation”, „Polish verb: variation, dictionary”, academic textbook „Syntax of contemporary Polish language” and a grammar dictionary of the Polish language.

Consortium of Gdańsk universities to carry out the BIONANOVA project

2018-11-22

The consortium of Medical University of Gdańsk, University of Gdańsk (leader), Gdańsk University of Technology and INNOVABION Ltd will implement the project „New generation systems for the delivery of bioactive molecules in chemically synthesized and genetically engineered nanobiomaterials (BIONANOVA)”. The results of the BIONANOVA project will be used to develop new unique methods of drug delivery and to create innovative nanobiomaterials for the treatment of diseases of various etiology. The research will be carried out using advanced cell culture techniques, immunology, molecular biology and genetics. The proposed budget for the project is over PLN 25 million. The money for the project's implementation is allocated by the TECHMATSTRATEG program of the National Center for Research and Development. The goal of the Program is to stimulate the growth of innovation and competitiveness of the Polish economy.

Park of Space Technologies in Zielona Góra will be launched soon

2018-11-22

The administration of the Lubuskie voivodship announces a call for the implementation of the „Park of Space Technologies in Zielona Góra” project. The park is to be built on a plot in Nowy Kisielin belonging to the University of Zielona Góra. The concept of the Park assumes that the basis for its activities will be modern and professionally equipped laboratories, devices and test stands as well as data processing centers, whose profile will correspond to the directions of research and implementation work expected by companies operating in the innovation and space area. The park is to increase the innovativeness of the region. The Letter of Intent confirming the will to cooperate for the implementation of the project was signed in April by the Lubuskie Voivodeship, the Space Research Center PAS and the University of Zielona Góra. The partner is the HERTZ Systems Ltd. More: <http://www.infoserwis.uz.zgora.pl/index.php?rusza-konkurs-na-budow-parku-technologii-kosmicznych>

1st Mining and Metallurgy Beer Festival in Krakow

2018-11-23

The AGH University of Science and Technology (AGH) in Krakow, the ACADEMICA AGH UST Students and Graduates Foundation and the Studio Club are organizing the First Mining and Metallurgy Beer Festival on November 24th. The event is addressed to those people, who are interested in science and technology within the brewing industry. During the Festival, the participants will be able to listen to speeches and shows of enthusiasts as well as outstanding specialists and experts on brewing topics. The participants will also receive presentations of technologies and raw materials for home brewers and they could taste the craft beer. Speakers include representatives of the Krakow Brewing School operating at the University of Agriculture in Krakow - Dr Eng. Aleksander Poreda and Dr Eng. Marek Zdaniewicz, as well as a group of certified brewers, who will tell participants about beer from a scientific and practical point of view.

Prince from Malaysia visits Polish universities

2018-11-23

Prince Tuanku Syed Faizuddin Putra Jamalullail, ruler of the state of Perlis in Malaysia and the chancellor of the technical university of Malaysia Perlis (UniMAP) is visiting universities in Poland. He met the authorities of the Jagiellonian University in Kraków, the Lodz University of Technology and the University of Warsaw. During their stay at the Lodz University of Technology, a delegation from Malaysia visited the campus of the university, met the rector of the Lodz University of Technology Prof. Stanisław Wiak and signed the cooperation agreement. It assumes student exchange as part of the Erasmus program.

Silesian University of Technology to launch Final of the Three Minute Thesis contest

2018-11-23

Center for Science Popularization and the University Council of the PhD Students of the Silesian University of Technology invite participants on Saturday, November 24 to the Three Minute Thesis final - a global competition in science communication licensed by the University of Queensland in Australia. The young popularizers of science will try to prove in their presentations that the complex topic of scientific research can be presented in an interesting way, within three minutes only. From the presentation held at the Mrowisko Student Culture Center students will be able to find out whether plants can have complexes, what is the concrete of the 21st century and whether chemical compounds have potential. Three Minute Thesis competition was first held in 2008 and so far it was organized by 600 universities and institutions in 59 countries. The winner of last year's final held at the Silesian University of Technology, Małgorzata Krystek from the building department, was invited to the nationwide final of the contest FameLab.

Inauguration of the program „Great Questions in Science” in Rzeszów

2018-11-26

On 5 December 2018, the University of Information Technology and Management in Rzeszów and the „Tygodnik Powszechny” Foundation are organizing the third conference „Great Questions in Science”. The event will be attended by Prof. Jerzy Bralczyk and journalist and columnist Michał Ogórek. Within the meeting entitled «The Art of Conversation» Prof. Bralczyk and Michał Ogórek will advise listeners how to master the art of conversation, how to make the conversation a pleasure and how important is the ability to listen, apart from the ability to express their thoughts efficiently.

Inventions of researchers from the University of Warmia and Mazury awarded at the fair in Croatia

2018-11-26

Researchers from the University of Warmia and Mazury (UWM) in Olsztyn won medals from Inova inventor's fair - Budi Uzor 2018, which took place in Croatian Zagreb. During the Croatian fair, Prof. Robert Wójcik from the UWM Institute of Civil Engineering received a gold medal for a pneumatic-vibratory feeder for mortar injection. PhD students from the Faculty of Technical Sciences of the UWM - Mateusz Pietkiewicz and Andrzej Ostrowski received a silver medal for a prototype of a breakwater producing electricity. Eliza Popławska-Jodko, director of the Center for Innovation and Technology Transfer of the University of Warmia and Mazury in Olsztyn emphasized, that the UWM has been at the forefront of Polish higher education institutions in terms of the number of patents and innovations.

Researchers from Japan visited the Lublin Technological University

2018-11-26

On November 23, 2018, the Lublin Technological University hosted Japanese scientists as part of the Erasmus + program. Professor Narumol Matsuyama of Saga University and Professor Nobuya Hayashi of Kyushu University gave a series of lectures on the generation and diverse applications of low-temperature plasma as well as water resource management and hydropower. During their stay in Lublin, scientists from Japan also took part in the meeting of the Institute of Electrotechnics and Electrotechnology, where they presented their research results. Dr Joanna Pawłat, MSc. Michał Kwiatkowski, MSc. Piotr Terebun and the guests conducted joint research on the applications of a non-thermal plasma for the treatment of plant material in the Department of Plasma Technologies and Renewable Energy.

Universities from Gdańsk and Szczecin developing a technology for acquiring and exploring gravity data

2018-11-26

Consortium of Gdańsk University of Technology, Maritime University of Szczecin and GEOPARTNER will carry out the project: „Development of technologies for the acquisition and exploration of gravity data offshore of Polish marine areas and its coasts” (MORGAV). The aim of the project is to develop technology for the acquisition and exploration of gravity data from the coasts of Polish maritime areas and its coast for the needs of the harmonization of offshore altitude measurements with the EVRS (European Vertical Reference System). The developed technology for acquisition and exploration of high precision offshore gravity data will fill a significant information gap in the research of Polish Exclusive Economic Zone. The results of the research will allow the introduction of automated methods for monitoring marine areas into the practice, will also enable multi-aspect analyzes of spatial data.

Automotive laboratory at the West Pomeranian University of Technology

2018-11-26

The Faculty of Computer Science of the West Pomeranian University of Technology in Szczecin has launched the GlobalLogic Automotive Lab, dedicated to the automotive issues. Students will acquire knowledge and practical skills in the field of hardware and software for the automotive industry and embedded systems. GlobalLogic has equipped the laboratory with the necessary equipment. Each single workshop has an infrastructure that reflects processing the part of the on-board electronics of the vehicle and software functioning in modern cars. Students will have the opportunity to learn programming electronic car systems with an example of implementation of various types of sensors (e.g. proximity sensors, temperature), and a simple multimedia system controlled by a simulated and real steering wheel. They will also learn in practice the protocols used for communication between various electronic components.

Intercultural year at the Poznan University of Technology

2018-11-26

The Department of Continuing Education and International Poznań University of Technology (PP) obtained over 200,000 PLN funding from the National Agency for International Exchange (NAWA) for the implementation of the project „ The PP around the world - intercultural year” The project emphasizes the integration of the university’s academic environment with students and foreign employees, exchange of experiences and shaping attitudes of openness and tolerance in the academic environment. Within its framework, the university is planning to conduct trainings aimed at increasing the communication and intercultural competence for 100 administrative employees of the PP having daily contact with foreign students. In addition, the plan includes 15 meetings of an intercultural cafe for students and employees of the Poznan University

of Technology and many accompanying activities. The main event of the year will be the fair combined with a conference on the internationalization of universities with the participation of diplomats from the students’ countries of origin.

Researcher from the University of Białystok receives Award of the Polish Physical Society for a PhD dissertation

2018-11-27

Dr Krzysztof Szerenos from the Faculty of Physics, University of Białystok (UwB) was awarded by the Polish Physical Society (PTF) for his PhD dissertation „Ultrafast nonthermal photo-magnetic recording in dielectrics”. Dr Szerenos in his dissertation described a new method of ultrafast photomagnetic recording in thin dielectric layers. The supervisor of the work is Dr Andrzej Stupakiewicz, Prof. of Białystok University. This is not the first award for Dr. Krzysztof Szerenos. The researcher from Białystok received this year’s Prime Minister Award for the best PhD dissertation. In April, he received the Medal of a Young Scientist awarded by the Warsaw Technological University.

Day of the Young Engineer at the Krakow University of Technology

2018-11-27

The Krakow University of Technology together with the Builder journal, as part of the „Builder for the Young Engineers” educational program, is organizing the Day of the Young Engineer on November 29, 2018. The participants of the event will take part in lectures divided into two thematic blocks. The first will be devoted to solutions and technologies in modern construction. The second one will discuss engineering challenges based on specific examples of completed investments. The lectures will be conducted by outstanding engineers representing the largest companies from the construction industry. More: <http://buildercorp.pl/2018/11/14/dzien-mlodego-inzyniera-krakow-29-11-2018/>

Professor Czerny from the University of Warsaw becomes doctor of honoris causa at Colombian Universidad de Manizales

2018-11-27

Professor Mirosława Czerny from the Faculty of Geography and Regional Studies of the University of Warsaw received the honorary doctor degree of Universidad de Manizales in Colombia. Prof. Czerny deals with development geography, socio-economic geography of Poland and spatial urban development models. The researcher is the author and co-author of numerous publications - mainly in Polish and Spanish. During the ceremony of awarding the title of doctor honoris causa, which took place on November 20, 2018 at the Colombian university, a distinguished researcher from the University of Warsaw gave a lecture «Desarrollo sostenible y sus aplicaciones para la ciudad de Manizales» (Sustainable development and its application in the city of Manizales).

Wroclaw University of Technology participates in the project „Professional Lower Silesia”

2018-11-27

Almost 2.5 thousand students from 44 schools and educational institutions took part in the project of the self-government of the province Lower Silesia „Professional Lower Silesia”. The University of Technology was one of the main partners of the program. The project was supposed to improve the competitiveness of vocational students in the following professions: freight forwarder technician, logistic technician, digital graphic process technician, electrician technician, IT technician, mechanic technician and machine tool operator. Nearly 2.5 thousand students from 44 schools from the Lower Silesia province participated in the project. One of the main points of the program was laboratory workshops organized by the Wrocław University of Technology and joint classes of interest groups

from vocational schools and student science clubs. The program involved thirteen poviats and four municipalities from all over Lower Silesia. The value of the project, co-financed by the European Social Fund, is over PLN 4 million. More: <http://pwr.edu.pl/uczelnia/aktualnosci/pwr-wspiera-szkolnictwo-zawodowe-11037.html>

Nicolaus Copernicus University in Toruń to implement a modern IT system

2018-11-27

The Nicolaus Copernicus University in Toruń has signed an agreement with the company SIMPLE SA, which will provide and implement an IT system supporting the university management process - System Integrating Science, Didactics, Research and Administration (SINDBAd). The new tool will cover the areas of finance and accounting, HR and payroll, planning and analysis, purchasing, education and science and projects. Its implementation will reduce the need to repeat the same data into the IT system and enhances the effects of the processing of this data. SINDBAd will also allow electronic introduction of many processes - especially the circulation of accounting documents. The SINDBAd system will be implemented as part of the Universitas Copernicana Thoruniensis In Futuro project - modernization of the Nicolaus Copernicus University as part of the Integrated Program of the University. The project also provides training dedicated to administration employees.

Scientists of the University of Life Sciences in Wrocław receive scholarships of the Minister of Science

2018-11-27

Three scientists from the University of Life Sciences in Wrocław received scholarships from the Minister of Science and Higher Education for outstandingly talented young scientists. Dr Tomasz Hadaś from the Institute of Geodesy and Geoinformatics deals with the use of GNSS satellite navigation systems,

such as American GPS, Russian GLONASS, European Galileo and Chinese BeiDou, in real time. Dr Paulina Nowicka from the Department of Fruit Technology, Vegetable and Nutraceuticals of the Faculty of Biotechnology and Food Sciences focuses on the analysis of the content of a number of compounds in plant raw materials and determining their health-promoting activity using modern analytical techniques. The third scholarship holder is Dr Błażej Poźniak from the Department of Pharmacology and Toxicology of the Faculty of Veterinary Medicine, who deals primarily with pharmacokinetics - including the study of what is happening with anti-bacterial and anti-inflammatory drugs in chickens and turkeys. More: http://www.glos.upwr.edu.pl/aktualnosci/48642/stypendia_ministra_dla_wybitnych_mlodych_naukowcow.html

Rectors of Poznań universities signed the Charter of Academic Traditions of Poznań

2018-11-27

The rectors of all Poznań universities and presidents of the Polish Academy of Sciences in Poznań and the Poznań Society of Friends of Sciences (PTPN) solemnly signed the Charter of Academic Traditions of Poznań. The ceremony took place in the PTPN meeting room on the centenary of the establishment of the Organizational Committee of the Polish University in Poznań. The jubilee is an opportunity to confirm the values that guided the creators of the Poznań University and set the directions in which the Poznań scientific community should follow, and the Charter commemorates the most important events and people, as well as the ideas that preceded the establishment of the university in 1919. - We treat the legacy of the creators of Wszechnica Piastowska (Poznań University) and the later academic environment of Poznań as a challenge and duty for all of us, sharing the faith in the importance of science development, the importance of academic education and the mission we have to fulfill, exceeding the divisions and paving new paths of modern Universitas- emphasized rectors in the Charter.

Awards for the best student science clubs in Poland

2018-11-28

During the congress of the scientific movement IKO-NA 2018, jury of the StRuNa competition awarded the most interesting projects implemented by Polish scientific clubs. The event was attended by Piotr Muller - deputy minister of science and higher education. In the category of the Scientific Circle of the Year 2018, the first prize was received by the Psychological Research Club «Experior» from the University of Gdańsk. The first prize in the Scientific Guardian of the Year category 2018 was received by Dr Monika Jakubek-Raczkowska for supporting the Students' Association of Middle Ages from the University of Nicolaus Copernicus in Toruń. The Students' Scientific Club of Reconstructive and Oncological Orthopedics from the Medical University of Warsaw won the first prize in the category Debut of the Year 2018. The Intercultural Education Scientific Circle from the Adam Mickiewicz University (UAM) in Poznań won the first prize in the category of Expedition of the Year 2018 for the project: «Students UAM without borders- Madagascar».

Delegation from Rzeszów University of Technology visits Great Britain

2018-11-28

From November 21 to 22 Delegation of the Rzeszów University of Technology (PRz), chaired by the Vice-Rector for Education, Dr Eng. Grzegorz Masłowski visited two universities in the United Kingdom: Surrey University in Guildford and University Degrees in the Football and Sports Industry (UCFB), whose headquarters are located at the Wembley stadium in London. During the visit, the Rzeszów University of Technology signed the cooperation agreement with Surrey University in the field of research in the field of 5G telecommunications networks and material engineering. During the visit to the University Degrees in the Football and Sports Industry, the delegation of the Rzeszów University presented plans to launch the field of sports management at the Faculty of Management and the specialty of sports engineering within medical engi-

neering faculty. Representatives of both universities expressed their willingness to cooperate in the exchange of students and joint projects.

Rector of the Cardinal Stefan Wyszyński University becomes doctor honoris causa of the University of Lutsk

2018-11-28

Rector of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw, priest Prof. Stanisław Dziekoński received the title of doctor honoris causa of the Lesia Ukrainka Eastern European National University in Lutsk. - The act of granting me an honorary doctorate of this University is a special sign of building a bridge between our Universities and, consequently, bringing the Ukrainian and Polish people together by developing fraternal cooperation in the wider educational field. The history of the university in Łuck dates back to 1940, when the State Pedagogical School was established. Currently, the Eastern European National University has 7 institutes, 9 faculties and 76 departments with 14,000 students.

Adam Mickiewicz University implements a student mental health support program

2018-11-28

The Adam Mickiewicz University in Poznań joined the program of mental health support for students of „SOS Digital - Providing Support to Students in Distress”. The leader of the project is University do Minho from Portugal, and it is implemented by the University of Santiago de Compostela from Spain and the University Degli Studi Di Trento from Italy. As part of the project, an online platform «SOS Digital» will be created, which will contain informational materials on mental disorders, coping with emotions and difficult situations, and advice for university staff. It also has a space where students could ask for professional psychological help. The authors of the project will also create a «Manual of procedures». It will include a report on good practices in supporting people with mental health problems, analysis of the current situation of supporting

people in a mental crisis at the university, in Poland, in European countries and in the world, as well as conclusions and recommendations.

Tale of the 21st Century Concrete won the 3MT Three Minute Thesis competition

2018-11-28

Natalia Paszek, PhD student from the Faculty of Civil Engineering of the Silesian University of Technology, won in the university final of the 3MT competition - Three Minute Thesis by telling the jury her three-minute long story about the concrete of the 21st century. The final of the competition was organized by the Center for Popularization of Science and the University Council of PhD Students. 10 PhD students from several faculties of the Silesian University of Technology qualified to the final. Each of them had to stand up at the Student Cultural Center «Mrowisko» and tell the audience about their scientific research. The participants had 3 minutes for this and they had to do it in an interesting and accessible way for non-scientists recipients. This year's competition was won by Natalia Paszek with the presentation «Geopolimer - concrete of the 21st century» concerning the construction material created mostly from waste. She also won the audience award.

Opole University and the State Medical University of Applied Sciences in Opole to merge

2018-11-28

From the beginning of next academic year, the University of Opole (UO) and the State Medical School of Higher Education in Opole (PMWSZ) will merge in one university. This will result in establishing the Collegium Medicum, an organizational unit that brings together didactics and science in medical sciences, health sciences and physical education. All fields of studies, previously conducted at the University of Silesia and the PMWSZ will be administered and organizationally assigned to Collegium Medicum. At the extraordinary session of the Senate, the rector of the PMWSZ Dr Tomasz Halski emphasized - I promise hard work and I assure that the PMWSZ team is prepared for the merger. We have considerable scientific potential, scholars with great scientific achievements. I am glad that we will contribute a lot into the university's structure, including discipline of health science. More: <http://www.uni.opole.pl/page/2561/senat-uo-za-wlaczeniem-pmwsz-w-struktury-uniwrsytetu>

Works of young architects from Vienna presented at the exhibition of the Wrocław University of Technology

2018-11-28

Until December 2, the exhibition „YoVA 4 Young Viennese Architects and Landscape Architects” - „Young Viennese architects and landscape architects” - can be visited at the Center for Knowledge and Science and Technology Information of the Wrocław University of Technology. The exhibition presents the works of young architects from the 11 Vienna design offices, selected for a competition organized by Vienna authorities. Only those partners that have their headquarters in Vienna could take part in it, provided they implemented at least one project in Vienna, and the age of the studio owner does not exceed 45 years. The YoVA 4 is the fourth Young Architects competition, and the catalogue of

the companies present at the exhibition is a collective portfolio of the young generation of Viennese architects. The exhibition was organized in cooperation with the Austrian Consulate in Wrocław.

University of Casimir the Great in Bydgoszcz to launch the conference on anti-state ideas

2018-11-28

The Institute of Political Sciences of the Casimir the Great University in Bydgoszcz invites participants to the scientific conference „Against the State: Anti-State Ideas and Political Activities.” The subject of the conference, scheduled for December 6 at the Main Library of the University of Casimir the Great, will be the institution of the state and reflection on what role in the process of evolution and formation of state institutions are fulfilling ideas, concepts, attitudes and political behaviors of anti-state character. The organizers are planning a discussion about the model of the state that can be considered socially beneficial in the era of the fourth industrial revolution, the power of transnational corporations, the rise of individualistic attitudes in the world, the revival of nationalisms and growing populism. More: https://www.ukw.edu.pl/strona/aktualnosci/aktualnosci/37318/ogolnopolska_konferencja_naukowa_przeciw_panstwu_antypanstwowe_idee

Canadian Ambassador to Poland to be a guest of the Rzeszów University of Technology

2018-11-29

The possibilities of research and development cooperation between Canadian and Polish aerospace research centers were the subject of talks that Leslie Scanlon, the Canadian ambassador in Poland, conducted with the authorities of the Rzeszów University of Technology. The participants discussed business development opportunities of Canadian companies in the aviation industry, as well as research and development cooperation between Canadian and Polish aerospace research centers. Both

Rzeszów University of Technology and the Center of Advanced Technologies AERONET - Dolina Lotnicza have a great potential to initiate or join research and development projects with Canadian researchers. Professor Jarosław Sęp, dean of the aviation and mechanical engineering department at the Rzeszów University of Technology emphasized that cooperation with Canada has enormous potential and development prospects, and the effects of the meeting will be visible in the near future.

Student of the Lodz University of Technology becomes the chairman of the Student Parliament of the Republic of Poland

2018-11-29

Dominik Leżański, a computer science student of the Faculty of Electrical Engineering, Electronics, Computer Science and Automation at the Lodz University of Technology, was elected the chairman of the Students' Parliament of the Republic of Poland in the term 2019-2020. The election was made during the XXV Congress of Student Parliament of the Republic of Poland, which took place on November 24, 2018. Dominik Leżański will replace Tomasz Tokarski from the Catholic University of Lublin, who had been managing the organization since 2017. - As the Student Parliament of the Republic of Poland in the coming term, we will have a significant impact on solving the situation at universities. Our attention will be focused mainly on the defense of students' rights. The coming years will be particularly important due to the amendment to the Law on Higher Education and Science. The role of the Students' Parliament will be to submit comments and give opinions on proposed changes - stated Dominik Leżański.

Applications for the next TopMinds program

2018-11-29

The process of applications for 2019 of TopMinds will be continued until December 2, 2018. It is a training and mentoring program that was initiated by the Association of Top 500 Innovators and the Polish-American Fulbright Commission. The TopMinds initiative is addressed to students of Polish universities who after graduating, need support in choosing the right career path. As part of TopMinds, mentors and experts, graduates of the Program Top 500 Innovators financed by Ministry of Science and Higher Education and Fulbright Program will support participants in finding their own career path, help in developing interpersonal competences, and indicate ways to strengthen the sense of professional and personal value. More: www.topminds.pl

Dr Bertrand Piccard becomes doctor honoris causa of the Silesian University of Technology

2018-11-29

Dr Bertrand Piccard, the first man who circled the globe with a plane powered exclusively by solar energy, extraordinary innovator will receive the title of doctor honoris causa of the Silesian University of Technology on 5 December. The ceremony will start at 11.00 in Hall A of the Education and Congress Center of the Silesian University of Technology at ul. Konarskiego 18B in Gliwice. Dr Piccard devoted his professional life to science. He is a doctor specializing in psychiatry, but he is best known for his achievements in the field of modern technologies. He travelled twice round the globe, firstly with a balloon and then with a plane of his own idea, powered exclusively by solar energy. His achievements show that flying without a drop of fuel, with no harm to the environment is possible. After the awarding of the title, an interdisciplinary scientific conference «Innovative activities of the Silesian University of Technology for the protection of the climate and the environment» will begin.

Students' science club of the Wrocław University of Technology wins the Pro Juvenes competition

2018-11-29

The „Robocik” Scientific Association of Automation and Robotics won the Pro Juvenes competition organized by the Students' Parliament of Poland. Students of the Wrocław University of Technology were appreciated for their creative activities and innovative projects. The main project of the young constructors is the autonomous underwater robot. In August 2018, it took part in the RoboSub competition in California, reaching the semi-finals and winning a special prize for the best computer simulation in the Unity environment. Students announce the construction of a new version of the robot to fight for top positions in the competition. The «Robocik» has been operating at the Faculty of Mechanical Engineering since 1997 and is one of the oldest at the university. The student projects included sorting industrial robot using artificial neural networks, a vision system for work, as well as an autonomous vehicle model.

Opole vocational education support project is the best in Europe

2018-11-29

The project „Opole Vocational Schools closer to the Labor Market2” implemented in the partnership of the Opole University of Technology with the Regional Education Support Team, the Opolskie Center for Economic Development and the Opole City Office was recognized as the best in Europe in the category „European funds for excellence”. As part of it, preparatory courses for technical studies for technical secondary school students and classes for vocational school students took place at the university - including programming lessons using ArduinoUNO circuits, AutoCAD support, programming using Lego Mindstorms EV3 and 2D and 3D computer graphics. The project also included workshop activities in the combustion engine laboratory, aerodynamics and hydrodynamics laboratory for machines, devices and

building structures, and the reverse engineering automation and reflexology laboratory and a teacher training course «3D graphics modeling and animation of objects in the Blender».

Cooperation agreement between the University of Gdańsk and the STARTER Business Incubator

2018-11-29

The University of Gdańsk will cooperate with the STARTER Business Incubator. The agreement signed by both institutions is the beginning of long-term cooperation on many levels. STARTER organizes industry conferences where specialists meet the representatives of the business, education, start-ups and the port and logistics industry - Signing a contract is a crucial step in the life of our university - says its head Dr Jerzy Piotr Gwizdała. Thanks to it, students will be able to take part in many interesting projects, gain experience and practical skills, and lecturers will receive new development opportunities. The agreement provides for joint organization of scientific conferences, symposia, as well as various forms of knowledge transfer and mutual inspiration in the implementation of relevant research, technology transfer and commercialization of research results.

Mural competition for the 100th anniversary of the AGH University of Science and Technology in Krakow completed

2018-11-30

The winner of the mural competition for the 100th anniversary of the AGH University of Science and Technology in Krakow is Anna Wardęga, a student at the Krakow Academy of Fine Arts. The painting of mural is planned for the early spring of 2019. The mural presents various fields of science that are developed at the university, including geodesy, space science, acoustics and renewable energy. Anna Wardęga, the author of the winning work, comes from Krakow and is a third-year student of the Faculty of Painting at the Academy of Fine Arts in Krakow. Her other project won in 2018 a mural competition for one of the walls of the dormitory in Wrocław.

20 years of the Technology Transfer Center of the University of Warsaw

2018-11-30

The spin-off company of the Warsaw University Warsaw Genomics, which specializes in conducting genetic tests as well as a research team that discovered a method of obtaining sustained mRNA for develop innovative anticancer vaccines, were awarded at the 20th anniversary of the Technology Transfer Center of the University of Warsaw. During the ceremony, Prof. Marcin Pałys, rector of the University of Warsaw explained that the best universities do not only conduct edge-cutting research and ensure the quality of education. They also have a strong impact on the environment, including the commercialization of the results of research and the support of entrepreneurship of employees, PhD students and students. The Central European Startup Awards distinguished the spin-off company Warsaw Genomics in 2017 as the best biotechnology start-up in Poland.

Polish graduates receive the Scholarship of the Faculty of Law of the University of Ottawa

2018-11-30

The Law Department of the University of Ottawa has started recruiting on the Scholarship of Edward Barry McDougall. The scholarship is intended for students who have graduated from law at a Polish university. It enables to participate in the annual program of study on a chosen subject at the Faculty of Law of the University of Ottawa in Canada. The formal scholarship requirement is to be a Polish graduate of Polish law studies. Students can apply for a scholarship while they are still in the fifth year of the law, provided that they receive their master's degrees in law before they start studying in Canada. The scholarship covers most expenses related to traveling, living and studying in Canada. The deadline for submitting documents is February 1, 2019. Opole receives over 14 million PLN for modern ICT solutions

2018-11-30

Over PLN 14.3 million will be allocated to 47 companies from the province Opole, which intend to implement modern ICT solutions. Subsidies could be obtained for modern customer service systems or IT and communication systems to improve the operations of enterprises. The ideas that have received funding include design of a microprocessor production, casting line monitoring system, sales platform and IT system supporting the recruitment company. This is the second call in which Opole Center of Economy Development supports modern solutions. In the first call it supported mobile training platform, virtual trade fair system, videolearning platform, implementation of a specialized online sales system and an IT system for automating internal processes and innovative laboratory software.

University of Silesia to hold symposium „Safeguarding our Climate, Advancing our Society“

2018-11-30

The Polish Academy of Sciences, the Pontifical Academy of Sciences and the National Center for Scientific Research invite you to the seminar „Safeguarding our Climate, Advancing our Society“ at the Faculty of Law and Administration of the University of Silesia in Katowice. The seminar program includes a panel discussion and three thematic sessions devoted to the results of the latest research on climate change and the challenges resulting from these changes in the technological, economic and social dimensions. One of the speakers will be Prof. Jacek Jania from the Faculty of Earth Sciences at the Silesian University - chairman of the Center for Polar Studies. The event supported by the Rector of the University of Silesia will be part of COP24 climate summit organized in Katowice. More: www.institution.pan.pl

Prof. Rita Felski to hold a lecture at the University of Wrocław

2018-11-30

The Literature Department after 1989 at the Institute of Polish Philology at the University of Wrocław invites participants to a lecture by Prof. Rita Felski (University of Virginia), „Hooked. Art and Attachment“, based on a new, unpublished book by this outstanding American critic and theoretician of literature. The lecture will be delivered on December 7 in the Nehring Room (library reading room) at the Institute of Polish Philology at Nankier Square 15. The organizers provide simultaneous interpretation. Rita Felski was born in Birmingham, in a family of emigrants (father was a Pole, mother was a Czech). She worked at universities in Australia, the United States, and recently in Denmark. She deals with feminist criticism, concepts of modernism, postmodernism and avant-garde, a phenomenon of reception of literature and literary criticism. Her latest book, *The Limits of Critique*, deals with suspicion as the basic feature of reading in its today's critical reception.

Innovative method of modelling tree growth developed at the University of Agriculture in Krakow

2018-12-03

The team of Prof. Jarosław Socha from the Faculty of Forestry University of Agriculture in Krakow developed an innovative method of modelling tree growth with use of the results of aerial laser scanning. - Until now, the estimation of tree growth in large areas of the country was imprecise and based on obsolete models. We have shown as the first in the world that repeated aerial scanning allows to work out the tree growth models and observations of trees on tens of thousands of hectares or even throughout Poland. Previously, this was impossible due to logistical reasons - says Prof. Socha. The new method was developed thanks to funds obtained from the National Center for Research and Development.

International scientific conference „University as the center of intellectual culture of the nation”

2018-12-03

The Faculty of Social Sciences of the Warsaw University of Life Sciences (SGGW) and the Faculty of Historical and Social Sciences of the Cardinal Stefan Wyszyński University, in cooperation with the National Center for Culture are organising an international scientific conference „University as the center of intellectual culture of the nation”. The honorary patronage over the conference was taken by the President of the Republic of Poland, Andrzej Duda. The conference on the occasion of Poland's independence will take place on December 6, 2018 in the WULS SGGW's Crystal Hall. The organizers of the conference are planning the debate on the importance of the university as a center of intellectual culture of nations in the past and nowadays. The issue of the conference will concern the place of the university and scientific knowledge in social life.

University of Bialystok promotes the book „Not only about science. Conversations with Professor Sir Leszek Borysiewicz”

2018-12-03

On Monday, December 3, 2018 Prof. Sławomir Presnarowicz will promote his book „Not only about science. Conversations with Professor Leszek Borysiewicz”. The main character of the publication, Professor Sir Leszek Borysiewicz, is a world-renowned British biologist and a doctor of Polish descent. He invented a vaccine against a virus that causes human papilloma cancer, for which he was knighted from Queen Elizabeth II. In 2010-2017 he was the Vice Chancellor of the University of Cambridge. In February 2018 he was awarded the title of doctor honoris causa of the University of Bialystok. Author of the book, Dr hab. Sławomir Presnarowicz is a scholar of the Department of Public Finance and Financial Law at the Faculty of Law of the University of Bialystok. He is also a judge of the Supreme Administrative Court in Warsaw.

University of Warmia and Mazury established cooperation with the Liaoning Technical University

2018-12-03

Professor Ryszard Górecki, Rector of the University of Warmia and Mazury (UWM) in Olsztyn and Xing Baojun, Rector of the Liaoning Technical University in China (LNTU), signed an agreement on cooperation on 29 November 2018. The document assumes cooperation in the scope of exchange of employees and students, undertaking joint research and publications, participation in seminars and scientific meetings, exchange of scientific materials and publications, creation of short-term scientific programs and joint research activities. This agreement on behalf of the Olsztyn university will be carried out by the Faculty of Geodesy, Spatial Engineering and Construction.

Researchers of the University of Silesia receive Bekker grants

2018-12-03

Five scientists from the University of Silesia received Bekker grants awarded by the National Academic Exchange Agency Program. Bekker grants allow the researchers employed in Polish universities and scientific organizations to apply for the best research centers in the world. The aim of the Program is to increase the international mobility of scientists and academic teachers employed at Polish universities by enabling them to conduct research or teaching in renowned foreign centers around the world. Trips may last from three months to a year. The laureates of the program are Dr Monika Jagielska from the Faculty of Law and Administration; Prof. Przemysław Marciniak from the Faculty of Philology; Dr Łukasz Pawlik from the Faculty of Earth Sciences, Dr Anna Świtlicka and Dr Anna Maroń from the Faculty of Mathematics, Physics and Chemistry.

Talented students of the University of Gdańsk receive over 415 thousand PLN

2018-12-03

The Office for Quality of Education at the University of Gdańsk will implement the „School of Eagles” project, whose aim is to support highly talented students by using the tutoring method in the education processes. The university's task will be to recruit exceptionally talented students - winners of the contest, as well as students achieving the best results in the first year of studies and the implementation of their education process using the tutoring method at first degree studies or the first seven semesters of regular master studies. The University will receive funds for co-financing scholarships for students and covering additional costs, including teaching aids and remuneration for academic teachers conducting classes using the tutoring method. Over 415,000 PLN is allocated from the Operational Program Knowledge Education Development co-financed from the European Social Fund.

Agreement on cooperation between the Adam Mickiewicz University and the Malian university in Bamako

2018-12-03

Adam Mickiewicz University in Poznań (UAM) will cooperate with l'Université des Sciences Juridiques et Politiques de Bamako in Mali. The cooperation agreement was signed by Prof. Ryszard Naskręcki, Vice-Rector of UAM for science and international cooperation and Prof. Moussa Djire, Rector of the University of Bamako. Cooperation between universities was initiated by the Law and Administration Department of UAM during the recent XV World Congress of Agricultural Law in Poznań. The signed document provides for the exchange of experiences, visits, lectures as well as the development of joint research.. The University of Bamako is one of the largest universities in Mali and an important element of the scientific and didactic system in West Africa, maintaining international contacts with entities from the USA, France and the Netherlands.

Maria Konopnicka Schools in Pyskowice supported by Silesian University of Technology

2018-12-03

Silesian University of Technology has signed an agreement on cooperation with the Maria Konopnicka Schools in Pyskowice. The aim of the agreement is to extend the university's broadly understood scientific support of the Pyskowice school. The University of Technology committed to provide a didactic base and enable school pupils to participate in lectures, blackboard, laboratory and science classes, and to promote the opportunity for students to work with a talented pupils as part of extracurricular activities. Students of the Silesian University of Technology will be able to hold subject-methodical and pedagogical apprenticeships at the Pyskowice school. The agreement also allows to promote the educational offer of the University among pupils of the Pyskowice schools. Pupils will be able to take part in events organized by the Silesian University.

Santander Universidades Digital Day to launch in Lublin, Gdańsk, Łódź and Warsaw

2018-12-04

Santander Universidades Digital Days with free conferences and workshops will take place will be held on December 5 in Lublin, at the Maria Curie-Skłodowska University, on December 6 in Gdansk, at the Gdańsk University of Technology, on December 11 in Lodz, at the University of Lodz and on December 13 in Warsaw, at the Warsaw School of Economics. All students can participate in the events, regardless of the university and the field of their studies. During the conference, participants will listen to lectures on trends and requirements of the labor market. The Google representatives will hold lectures on the impact of digital technologies on a career in each city. Participants will learn how to take care of their digital competences in the modern labor market and how to plan their professional development and maximize their strengths. More: <https://santander.pl/santanderuniversidades-pl/digitalday.html>

XIV Polish-German Student Metallurgy Seminary in Krakow

2018-12-04

The 14th Polish-German Student Metallurgy Seminar will be held on December 6-7, 2018 at the AGH University of Science and Technology in Krakow. The event is organized by the Student Scientific Society of Metallurgy of Steel and Steel. The seminar has been organized for 13 years and is held alternately in Krakow and in Freiberg in Germany. It is the result of cooperation between two friendly faculties: Faculty of Metal Engineering and Computer Science, AGH and Institut für Eisen - und Stahltechnologie TU Bergakademie Freiberg. The seminar will also be attended by representatives of the Silesian University of Technology, the Częstochowa University of Technology and students from the Czech Republic, Japan, China and Ukraine.

Lecture on Saint Nicholas at the University of Wrocław

2018-12-04

The Institute of English Philology at the University of Wrocław invites participants to a lecture of Prof. Leszek Berezowski „All you need to know about Saint Nicholas and Santa Claus”. The Santa Claus meeting will take place on December 5 at the Marianum Oratorium. Professor Berezowski will talk about how the image of St. Nicholas and related customs and how his doppelgangers were created - for example English Father Christmas or American Santa Claus. «All you need to know about Saint Nicholas and Santa Claus» will be illustrated with pictures, poems, advertisements, photos, postage stamps, dispatches of news agencies, and even military communications regarding Saint Nicholas and his doppelgangers. The lecture is especially addressed to secondary school pupils and will be conducted in English.

Center for Genetic Engineering established at the University of Environmental and Life Sciences in Wrocław

2018-12-04

The Center for Genetic Engineering equipped with modern and unique research infrastructure was opened at the Faculty of Veterinary Medicine at the University of Life Sciences in Wrocław. The creation of the center cost nearly PLN 5.5 million. The Center's equipment allows students to breed and conduct biomedical basic and preclinical research in vivo on small animal models, in an environment free of specific pathogens and in the conditions of good laboratory practices (GLP). The Center will also be a place for training students and PhD students. Scientists of the University of Life Sciences in Wrocław have many years of experience in the application of genetic engineering techniques to create genetically modified cells and animal research models. Currently in cooperation with the Wrocław Medical University it conducts research on the molecular mechanisms of resistance to chemotherapy of breast cancer cells. Silesian University of Technology awarded „For merits for inventiveness“

2018-12-04

The Silesian University of Technology was honored the award „For merits for inventiveness“ by the Patent Office of the Republic of Poland. The award was received by the vice-rector for student affairs and education, Dr Eng. Tomasz Trawiński, during the ceremony at the Royal Castle in Warsaw. The award ceremony was part of the celebrations of the jubilee year of the centennial of the establishment of industrial property protection and the Patent Office of the Republic of Poland and the profession of patent attorney. The Patent Office of the Republic of Poland, established on December 28, 1918 by the decree of the head of state Józef Piłsudski, was one of the first state institutions established after regaining independence. The honorary medal „For merits for inventiveness“ was awarded for the first time in 1993-2000 and again from 2003, to individuals, institutions, organizations and associations distinguished by achievements in the development and popularization of inventiveness.

Poznan University of Technology receives almost 500,000 PLN from the National Agency for International Exchange

2018-12-04

The Center for Languages and Communication at the Poznan University of Technology will implement the project: „Developing communication and language skills in English in the academic environment of the Poznan University of Technology“. The project includes EMI (English Medium Instruction) courses for research and teaching staff who conduct classes in English and communication courses in a multicultural environment for research and teaching staff. Thanks to a subsidy of almost 500,000 PLN the university will also provide Polish language courses for foreign employees and students, communication and language competence courses at the dean's offices, and study visits at the University of Cambridge

and the University of Viadrina. The culmination of the project will be the international conference «English Medium Instruction at European Universities».

„Financial Times“ publishes ranking of European business schools

2018-12-05

The daily newspaper Financial Times published a ranking of European business schools. The Kozminski University from Warsaw was placed on the 43rd position of all universities in Central and Eastern Europe. The Warsaw School of Commerce was ranked 71th. The ranking top- universities are from Western Europe: London Business School, HEC Paris and Insead. The best ones are focused on MA special studies and on MBA programs. The Universities in Central and Eastern Europe are catching up to universities from the west of the European Union, however their representation is still small. Russia, the Czech Republic, Hungary, Slovenia have only one such university each, and Poland – two universities in this prestigious group. See ranking: <http://rankings.ft.com/businessschoolrankings/european-business-school-rankings-2018>

Cooperation between the Jagiellonian University and the Palacký University in Olomouc

2018-12-05

Vice-Rector for Research and Structural Funds Prof. Stanisław Kistryna of the Jagiellonian University in Krakow visited the Palacký University in Olomouc. The aim of the talks with Czech partners was to strengthen scientific and didactic cooperation between both universities and to intensify mutual contacts in terms of future projects in the field of exact sciences, biotechnology and Asian studies. The Jagiellonian University delegation also visited the Regional Center for Advanced Technologies and Materials, the Science and Technology Park of the Palacký University and the Center of the Haná Region with the Department of Biophysics.

9th INTERSTUDENT competition for the best foreign student in Poland

2018-12-05

Until December 12, candidates for the 9th INTERSTUDENT competition for the best foreign student in Poland can be nominated. The organizers want to award foreign students who build cooperation between cultures and enrich the Polish academic environment. The competition is organized as part of the «Study in Poland» program. The condition of participation is the proved activity in the local student cultural, social, ecological, sports environment as well as obtaining good results in science and participation in interesting research projects. Candidates may be nominated by their professors, guardians, university authorities, foreign cooperation offices, student self-governments as well as other students. More than 70,000 foreign students are currently studying at Polish universities. The Competition Jury will select the best foreign students studying at Polish public and non-public universities from the undergraduate, graduate and PhD studies. More: <http://www.studyinpoland.pl/interstudent/>

University of Gdańsk opens Laboratory of simulation of television recordings and film documentation

2018-12-05

University of Gdańsk launched a modern simulation laboratory for television recordings and film documentation. The laboratory is interdisciplinary and first of all it will serve students from two practical faculties - journalism and social communication as well as knowledge about film and audiovisual culture. This is one of the most modern film laboratories in Poland. For its creation, the University received funding under the Regional Operational Program of the Pomorskie Voivodeship for the years 2014 - 2020 in the amount of over PLN 4 million, while over PLN 1 million is own contribution. During the opening ceremony, a live program was recorded and the laboratory's possibilities could be assessed. The guests listened to information from the University of Gdańsk, conducted by spokeswoman Dr Beata Czechowska-Derkacz and weather forecasts, presented by the university's chancellor Dr. Mirosław Czapiewski. https://ug.edu.pl/media/aktualnosci/80613/uroczyste_otwarcie_laboratorium_symulation_nagran_telewizyjnych_i_dokumentacji_filmowej_uniwersytetu

Researcher of the University of Silesia looking for better forms of barley

2018-12-05

Dr Agata Daszkowska-Golec from the Department of Genetics of the University of Silesia is looking for forms of barley that are more tolerant to long-term water shortages. The researcher analyzes the mechanisms of action of two genes: CBP20 and ERA1. Dr Daszkowska-Golec investigates defense mechanisms against drought stress in barley and Arabidopsis (*Arabidopsis thaliana*) based on the analysis of their genetic code - I am involved in the identification of genes related to plant response to long-term water deficiencies and how mutations of these genes contribute to improvement tolerance to drought - says the biologist. Barley, which occupies

the fourth place in Poland in terms of cultivated area, is primarily used as fodder and material for the production of malt, flakes, groats or sprouts. Researchers are looking for new, better varieties of this grain, characterized by good fertility and high resistance to stress factors. More: <http://www.us.edu.pl/w-strone-elitarnej-odmiany-jemienie>

University of Zielona Góra to hold EXPO Conference Medical Simulation - Challenges of the Future

2018-12-05

The Faculty of Medicine and Health Sciences of the University of Zielona Góra invites participants to the EXPO Conference Medical Simulation - Challenges of the Future. As part of the two-day meeting on December 6 and 7, the organizers are planning lectures, discussion panels and workshops. Medical simulation is becoming a standard of education in medical majors. It has opened a range of hardware options for undergraduate and postgraduate education. The Zielona Góra conference is to be a place for discussion and exchange of experiences related to the implementation of the didactic program in order to learn about the latest technologies and available solutions in teaching the methodology of medical simulation. The organizers are planning to talk about design, organization and management of the Medical Simulation Center. More: <http://www.exposymulacjamedyczna.pl/>

Scientists of the University of Life Sciences in Poznan to participate in Bekker scholarships

2018-12-05

Scientists from the University of Life Sciences in Poznań were two of 156 winners of the Bekker scholarships competition funded by the National Academic Exchange Agency. Dr Anna Kubicka received the scholarship for the project «Analysis of directional asymmetry in the lower limbs of hunter-gatherers, farmers and urbanized populations» which will be carried out at the Museum National

d'Histoire Naturelle in France. Dr Eng Daniel Gebler was awarded for the project «Utilizing big data from river monitoring in freshwater ecological research» developed at the Universidade de Lisboa in Portugal. The goal of the Bekker Program is to increase the international mobility of Polish scientists and academic teachers by enabling them to conduct research or teaching in the best foreign centers around the world. The most popular destinations are the United States, Germany, Great Britain, Italy and Australia.

Researcher from the University of Białystok to conduct research at the University of Alaska

2018-12-06

Dr Julita Sadowska from the University of Białystok (UWB) will conduct research for a year at the University of Alaska (Anchorage, USA) within the scholarship, which Dr. Sadowska obtained from the Bekker program carried out by the National Academic Exchange Agency. The research object of Dr Sadowska from the Department of Animal Ecology at the Institute of Biology will be the arctic ground squirrel. Alaska is one of the places where these animals live. The researcher from Białystok received PLN 156 thousand for the implementation of her project. The goal of the Bekker Program is to increase the international mobility of Polish scientists and academic teachers by enabling them to conduct research or teaching in the best foreign centers around the world.

Awards of the Minister of Science and Higher Education for 2018

2018-12-06

One of the most prestigious awards of Polish science, the Awards of the Minister of Science and Higher Education for 2018, were received by the 69 best Polish scientists. The award is granted for outstanding scientific achievements, individual and collective didactic achievements and organizational successes in the past year. The winners are Dr Aleksandra Wesołowska from the Faculty of Health Sciences of the Medical University of Warsaw, who received the award for outstanding scientific achievements in the category of research for the benefit of society, Prof. Maciej Nowak from the Faculty of Physics, Astronomy and Applied Computer Science of the Jagiellonian University in Krakow, awarded for outstanding scientific achievements in the category of research for economic development and Prof. Przemysław Juszczynski from the Institute of Hematology and Transfusiology in Warsaw, who received the award for outstanding scientific achievements. More: <https://www.gov.pl/web/nauka/nagrody-ministra-nauki-i-szkolnictwa-wyzszego-2018-rozdane?fbclid=IwAR3-e16tbIfvkmM1oy-J1nE8zfUAqSLBC7RvceRhkVeQIXg4DXs11o7bwJNl>

National Academic Exchange Agency becomes a member of the Academic Cooperation Association

2018-12-06

During the conference of the Academic Cooperation Association (ACA), which was held in Vienna, the National Academic Exchange Agency (NAWA) was admitted as a member of this organization. ACA is a think tank operating in the field of international cooperation in higher education, whose activities include research and analysis, evaluation, consulting and publications. At the same time, it is also a networking platform associating 22 institutions that are NAWA equivalents. As part of regular meetings, ACA members exchange information on changes in the area of science and higher education that take

place in their countries, present new programs implemented by their organizations and present the main directions of promotion of higher education abroad.

Symposium „Law day for climate protection and climate management 2018” at the University of Silesia

2018-12-06

On 7th December the Faculty of Law and Administration of the University of Silesia in Katowice invites participants to the scientific symposium entitled „Law day for climate protection and climate management 2018” („Advancing Law & Governance Contributions to Climate Action under the Paris Agreement”), which is one of the events accompanying the climate summit. The symposium will be attended by world-renowned representatives of science and international institutions working for climate protection. During the conference, prizes for the best student essay on legal climate protection will be presented. The organizers announce a discussion on ensuring synergy for capacity building and cooperation in the field of climate change research and exchange of knowledge, ideas and experiences between specialists representing various areas of law and management - so that it will be possible to develop an effective implementation model of the Paris Agreement.

University of Gdańsk of Technology to launch Power of dispersed sources - interdisciplinary studies

2018-12-06

The University of Gdańsk and the Gdańsk University of Technology will create a joint interdisciplinary and unique field of study - Energy of dispersed sources. Both universities have signed an agreement on this matter. Establishing this new field of study is a response to the needs of the development of a modern state. In the opinion of experts, the dispersed power industry provides much more security to the state's energy security than the centralized

one. At the same time, the role of conventional energy is decreasing, while the share and importance of renewable energy sources are growing. The new field of study will be run by both universities, a joint program will also be prepared. Access to the best specialists as well as laboratories of the University of Gdańsk and the Gdańsk University of Technology will ensure a high level of education quality.

Nicolaus Copernicus University to cooperate with the Vatican Foundation

2018-12-06

The Nicolaus Copernicus University in Torun has concluded a cooperation agreement with the Joseph Ratzinger - Benedict XVI Vatican Foundation. One of the most important goals of joint activities is the establishment and awarding of the international scientific prize „Ratio et Spes”. The prize will be awarded every year in a different area of study. Each year, the Scientific Council will appoint an international jury of recognized specialists in the area. The award ceremony will be held during the University Day - February 19. As part of the cooperation, it is also planned to create the Joseph Ratzinger Research Center at the Faculty of Theology a university, which will promote the ideas and teachings of Joseph Ratzinger, and jointly organize scientific and popularizing events.

University of Adam Mickiewicz in Poznan awarded university Laurels

2018-12-06

Four projects of students of the University of Adam Mickiewicz in Poznań (UAM) won first places in the University Laurels competition organized by the Polish Universities Forum. During the award ceremony of the University Laurels in Krakow, the Students' Self-Government Parliament of the University of Adam Mickiewicz and students from the Academic Scientific Society of Spatial Management won the contest in all four nominated categories. The awarded projects are: Great Grilling of Adam Mickiewicz University, Poznań Map of Barriers, Anvil 2.0 and Student Quality Forum. University Laurels Gala is one of the most important events organized by the Polish Universities Forum, where the best and most creative ideas realized by the student community are rewarded. In the last year's contest, the Battle of Academics - one of the projects of the Students' Self-government of the UAM won the competition.

Call „Third University Mission” completed

2018-12-07

Over 200 university projects from all over Poland received funding from the National Center for Research and Development as part of the „Third University Mission” call. The projects selected in the competition are addressed to various groups of recipients and each of them is an example of social responsibility of the university. - Over 170 million PLN, which we are allocating for the implementation of these projects throughout Poland, is an opportunity to develop competences and support specific people, and at the same time it is an investment in the future of us all - said Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin during the announcement of results. The aim of «The Third University Mission» call is to develop and implement educational programs and didactic activities, courses or trainings in cooperation with education entities, local government or non-governmental organizations. List of projects: https://www.nibr.gov.pl/fileadmin/POWER/03.01...3MU_18/

Cardinal Stefan Wyszyński University focuses on cooperation with business

2018-12-07

Cardinal Stefan Wyszyński University (UKSW) in Warsaw, through the „Direction Innovations” project has opened the cooperation with entrepreneurs. - We are presenting a new project of our University, which is focused on innovation and new technologies. In the development project, we have planned the construction of the third campus - the Multidisciplinary Research Center. The project of Digital Science Center is the result of the dynamic development of the university - says the Rector of UKSW, Prof. Stanisław Dziekoński. «Direction Innovations» is a practical meeting of science and business. Both scientists and entrepreneurs can meet and implement joint ideas in the Multidisciplinary Research Center. The first teams of scientists and entrepreneurs will start cooperation on the third campus of UKSW in Dziekanów Leśny as soon as in July 2020.

Research on the impact of building heating on air quality in Wrocław

2018-12-07

Researchers from the architecture and environmental engineering faculty at the Wrocław University of Technology will examine the impact of building heating on air quality in Wrocław. The study will be financed by the Municipal Office in Wrocław. This big problem facing Polish cities is so-called low emissions related to the combustion of solid fuels as hard coal, lignite, wood, eco-pea coal or biomass for heating buildings. Scientists from the University will start this year's several-stage research to determine the density of heat sources for solid fuels depending on the characteristic parameters of buildings. Researchers will check the actual operation of the heating installation, the area heated by a single source, the dynamics of the current changes in the

method of housing heating and social attitudes towards the planned changes. In addition, field tests are to show the percentage of units equipped with smoke / carbon detectors. More: <http://pwr.edu.pl/uczelnia/aktualnosci/wspolne-badania-nad-poprawa-jakosci-powietrza-we-wroclawiu-11041.html>

Poznań Science and Technology Park runs a genomic laboratory

2018-12-07

The Poznań Science and Technology Park of the Adam Mickiewicz University Foundation opens a genomic laboratory. A modern equipped lab will conduct research in the field of molecular biology. The laboratory's tasks will include processes aimed at preparation of sequencing material, mainly DNA / RNA isolation from the supplied material and its purification, e.g. isolation of genetic material from contaminated culture or from a fragment of tissue. The laboratory will conduct research, development and commercial research. In the case of genetic crosses and transgenic plants, DNA sequencing and reading of the genetic code can be used to select individuals with a characteristic that can be transferred to the next generation. It speeds up the research process of introducing new varieties of useful plants, recognizing bacterial species, and exploring the mechanisms of genetic diseases.

Electric cars and charging stations on the campuses of the University of Silesia

2018-12-07

Electric cars and charging stations will be available on the campuses of the University of Silesia. It will be possible thanks to the cooperation of the university with the company GreenGoo Ltd, a local car-sharing operator and the owner of electric car charging station. The company will install charging stations in Katowice, Sosnowiec, Chorzów and Cieszyn, and will provide several dozen electric cars on a car-sharing basis for the academic community, residents and tourists. Users will be able to drive the vehicles by renting them for minutes using the mobile application. The charging station for electric vehicles is already commissioned on the premises of the Chorzów campus. In the near future, investments will be completed in subsequent locations.

Academic Choir of the Warsaw University of Technology wins Grand Prix of Polish Choral Competition

2018-12-10

The Academic Choir of the Warsaw University of Technology won the Stefan Stuligrosz Grand Prix of the Polish Choral. Before Polish choral teams competed in one of the six oldest Polish choir competitions. The Academic Choir of the Warsaw University of Technology won the main prize this year at the Feliks Nowowiejski International Festival of Choral Music in Barczewo. This award allowed the choir to participate in the Polish Grand Prix. During the event, the choir conductor, Dr Dariusz Zimnicki received the award for the best conductor of the competition. See the fragment of the performance: <https://youtu.be/Z30r25Qy5no>

Prof. Piotr Sztompka to hold an open lecture at the Jagiellonian University

2018-12-10

The Department of Contemporary Culture Research at the Institute of Sociology at the Jagiellonian University in Krakow invites participants to a lecture by Prof. Piotr Sztompka „On the notion of culture once more: The classical concept of culture in a new, original approach”. The meeting will take place on December 11 at the Institute of Sociology. Piotr Sztompka is a retired professor at the Jagiellonian University and an active professor at the Father Józef Tischner Higher European School in Krakow. He is a member of the Polish Academy of Sciences and the Polish Academy of Learning, Academia Europaea (London) and the American Academy of Arts and Sciences (Cambridge, Massachusetts). In the years 2002-2006 he was the president of the International Sociological Association (ISA). He is a laureate of the New Europe Prize (1995), the Foundation Award for Polish Science (2006) and twice the prizes of the Prime Minister of the Republic of Poland. Professor Sztompka is a doctor honoris causa of four universities: in Moscow, Stockholm, Krakow and Warsaw. He is the author of 30 books and over 300 scientific articles that were published in 15 languages.

Researchers from Georgia visit the Cardinal Stefan Wyszyński University

2018-12-10

Cardinal Stefan Wyszyński University (UKSW) in Warsaw hosted representatives of Georgian scientific institutions. The Rector of CSWU Prof. Stanisław Dziekoński met Prof. Zviad Gabisonia - director of the Shota Rustaveli Foundation for Science, Prof. George Ghavtatis, Rector of Akaki Tsereteli University in Kutaisi and scientists from Georgian academic centers. During the meeting, a cooperation agreement was signed regarding the implementation of research and scientific projects devoted to the role of the state and religion in building a democratic state. The document also provides for cooperation in conducting conferences and seminars.

Lodz University of Technology starts cooperation with Wielton S.A.

2018-12-10

Lodz University of Technology has started cooperation with the Polish company Wielton S.A. - the largest manufacturer of semi-trailers, trailers and car bodies in Poland. Wielton is one of the largest manufacturers in the world. The letter of intent regarding cooperation was signed by Prof. Sławomir Wiak, rector of the Lodz University of Technology and Mariusz Golec, President of the Board of Wielton S.A. In the signed document, the parties expressed their willingness to undertake joint activities in the field of cooperation between the academic community and the Wielton company by educating students for meeting the needs of an economic partner, creating a dual degree program, providing internships in the company. The cooperation will also concern joint research and cooperation in gaining funds for project financing.

Researcher of the Medical University of Gdańsk received the Bekker scholarship

2018-12-10

Dr Marlena Zyśk, assistant professor of the Department of Molecular Medicine at the Department of Clinical Biochemistry at the Medical University of Gdańsk, received the Bekker scholarship from the National Academic Exchange Agency. The scholarship will allow the scientist from the Gdańsk university to spend 12 months at the University of Uppsala (Sweden) to implement the project «The role of immune-reactive astrocytes in the progression of Alzheimer's disease». Dr Zyśk will conduct research together with a team of Prof. Anna Erlandsson (Molecular Geriatrics / Rudbeck Laboratory). The research project is a continuation of scientific cooperation between Dr Zyśk and Prof. Erlandsson launched in 2016 during her first research scholarship at the Molecular Geriatrics. Part of the study was published as «The A β protofibril selective antibody mAb 158 prevent accumulation of A β in astrocytes and rescues neurons from A β -induced cell death» (Sollvander et al, 2018).

Program Preludium 15 offers grants for PhD students of the Wrocław University of Environmental and Life Sciences

2018-12-10

PhD students of the Wrocław University of Environmental and Life Sciences have received over 400,000 PLN for their research. Their projects will be financed from the Preludium 15 call of the National Science Center. Katarzyna Godlewska will implement the project «The mechanism of action of novel plant extracts and their effect on Arabidopsis thalian stress resistance». 210 thousand PLN will be used to examine the possibility of using higher plants for the production of biostimulants for arable crops. Grzegorz Bury received 196 thousand PLN for «Determination of precise orbits of GNSS satellites based on combined laser and microwave solutions». For the determination of orbits, the Global Navigation Satellite System (GNSS) data is used as standard system. The PhD student developed a methodology for their determination with the use of the laser technology. The project will analyze errors of measurements to suggest one solution for both types of observations.

Silesian University of Technology receives the Elsevier publishing prize

2018-12-10

Silesian University of Technology was awarded the Elsevier Research Impact Leaders prize in the category of social sciences. The prize is awarded to universities, whose publications had the greatest impact on the perception of Polish science in the world. The award was received by the Vice-Rector for Science and Development, Prof. Eng. Marek Pawełczyk. The award was result of the very high share of publications in the highest-cited magazines and the related citation rate. Special attention of the jury was attracted by primarily publications in the field of restructuring. The Elsevier Research Impact Leaders prize, awarded for the first time in 2016, is part of the Elsevier global initiative to support

research and the development of science. The intention of the Elsevier Award is to identify and grant universities whose latest scientific works have the greatest impact on the image of Polish science in the world.

Students from developing countries receive scholarship to study in Poland

2018-12-11

73 students from developing countries received scholarships as part of Ignacy Łukasiewicz program to study in Poland. The largest number of scholarship holders are interested in studying at faculties such as IT and electronics, construction, food and nutrition technology, and chemistry. Ignacy Łukasiewicz Scholarship program has been implemented since 2015 by the Ministry of Science and Higher Education, the Ministry of Foreign Affairs and also by the National Academic Exchange Agency. It is addressed to students from developing countries such as Indonesia, Angola, Myanmar, Ethiopia, Philippines, India, Indonesia, Kenya, Colombia, Mexico, Nigeria, Palestine, Peru, Senegal, Tanzania and Vietnam.

Platform to combine science and business

2018-12-11

The University of Warsaw has held a conference dedicated to the Universality platform, which is an intelligent system supporting the improvement of competences in the new or unique technologies among students, combining learning with business. It provides for direct contact between companies and academic staff. - Solutions such as Universality can make lecturers and universities look at the teaching process differently than before. The platform shows us in which direction teaching could go - said Piotr Dardziński, deputy minister of science and higher education during the conference. The main goal of the project is to train competencies for business needs. Entrepreneurs, students and universities benefit from this solution. The platform is already used by 13 universities from all over Poland and nearly 1,000 students. Currently, 14 companies have established cooperation, including Microsoft.

Delegation from Indonesia visits the Warsaw University of Life Sciences

2018-12-11

The Warsaw University of Life Sciences (SGGW) hosted a delegation of representatives of universities and journalists from the Indonesian province of West Nusa Tenggara. The delegation included the rectors of five Indonesian universities: University of Nahdlatul Ulama, Health Science School, University of Muhammadiyah, University of Mahasaraswati and Hamzanwadi University. Guests from Indonesia met the rector of WULS-SGGW Prof. Wiesław Bielawski, The topic of the talks were the possibilities of cooperation between SGGW and universities from this province. From the academic year 2019/2020, the University of Warsaw will recruit students from Indonesia to study the following programs in English: Engineering Infrastructure, Restoration and Management of Environment, Horticulture, Economics and Organization of Enterprises, Big Data Analytics and Organic Agriculture and Food Production.

Collegium Civitas to hold a debate „Will democracy regress?“

2018-12-11

On the anniversary of the imposition of martial law in Poland, on December 13, 2018 at 5:00 PM the Collegium Civitas in Warsaw is holding a debate entitled „Will democracy regress?“. The event is based on the book by Steven Levitsky and Daniel Ziblatt „How Democracies Die“, also recently published in Polish. The participants of the debate will try to compare the mechanisms limiting democracies on the example of countries with a different history and political culture. The debate will be attended by: Prof. Bohdan Szklarski - political scientist, Americanist, Dr Piotr Łaciński - political scientist, specialist in the policy of South American countries, Dr Dominik Hej, a political scientist, specialist in Hungarian politics.

Professor Jerzy Marian Brzeziński becomes honorary doctor of the Maria Curie-Skłodowska University in Lublin

2018-12-11

On Wednesday, December 12, 2018, the Maria Curie-Skłodowska University (UMCS) in Lublin is holding the ceremony of awarding the title of doctor honoris causa UMCS to Prof. Jerzy Marian Brzeziński - a psychologist, professor of the Adam Mickiewicz University in Poznań. Professor Brzeziński is a psychologist, specializes in methodology, psychological diagnosis and ethics of scientific research. He is a member of the Polish Academy of Sciences. For many years he has been the dean of the Faculty of Social Sciences, director of the Institute of Psychology and head of the Department of Psychological Research at the University of Adam Mickiewicz in Poznań. Professor Brzeziński is a member of the Central Commission for Degrees and Titles. He published many scientific papers, including: «Methodology of psychological research» and «Experimental research in psychology and pedagogy».

University of Zielona Góra receives Elsevier Award

2018-12-11

The University of Zielona Góra received the Elsevier Research Impact Leaders award in 2018 in the Engineering and Technology category (engineering and technical sciences) for publications and citation in the field of material engineering. - The competition was really high in the Engineering and Technology category. Small differences in results of the competitors proved that the level is very balanced not only among the nominees, but generally, among all universities in the country. The winners' publications were cited at 117% of the world average. The citation rate is, apart from the increase in the number of publications in the most prestigious scientific journals, and publications with the participation of foreign co-authors, the most important evaluation criterion. The award promotes high quality research and internationalization, and identifies and distin-

guishes universities whose research work has the greatest impact on the visibility of Polish science in the world.

University Adam Mickiewicz University in Poznan to hold a lecture on randomness in music

2018-12-11

University Adam Mickiewicz and the Academy of Music. Ignacy Paderewski in Poznań invite participants on December 13 for the lecture „Randomness in music”, which in the Hall of Lubranski at the university Collegium Minus will be given by Prof. Jarosław Grytczuk from the Warsaw University of Technology. The lecture is addressed to high school students and within the program «Mathematics in music and music in mathematics». It will be devoted to the broadly understood randomness that many composers use in their works. Randomness provides the performance of a musical piece depending on the toss of coin. Professor Grytczuk is a specialist in the field of discrete mathematics and theoretical computer science. He conducts active scientific activity, and he is also a great popularizer of mathematics among a wide audience. He is also interested in the phenomenon of uniqueness in combinatorial structures used in contemporary music.

Catholic University of Lublin to hold a conference on culture and identity

2018-12-12

The Catholic University of Lublin (KUL) is holding a conference within the program „Polonia Restituta. The Decalogue for Poland on the 100th Anniversary of Regaining Independence „, dedicated to culture. -It is necessary to repeat after Pope John Paul II: Man lives a truly human life thanks to culture. His life is culture and he cannot live without culture. He is a creator of culture, it expresses him and he is confirmed in it - said Jarosław Gowin, deputy prime minister, minister of science and higher education. The participants of the event discussed the importance of national culture and Polish patri-

otism during the period of the partitions, and then occupation and Soviet domination. The conference was accompanied by the exhibition „KUL University of Independent Poland”, an exhibition of postage stamps „Fathers of Independence” and an exhibition of the Baroque sculptures from the collections of the Museum of the Catholic University of Lublin. More: <https://polonia-restituta.pl/>

National PhD Student Representation elects a new chairman

2018-12-12

Łukasz Kierznowski, MA of the Law Faculty of the University of Białystok (UW) became the chairman of the National PhD Students' Representation (KRD) for the period from 1 January 2019 to 1 January 2020. MA Łukasz Kierznowski is employed at the Administrative Proceedings Department at the Law Faculty of the University of Białystok. He is also a PhD student and he scientifically specializes in the law of higher education and science. He has extensive experience in student activities; he was a chairman of the Faculty Council of the Student Government and vice-chairman of the KRD. The National Representation of PhD Students is a nationwide representation of PhD students. It has the right to express opinions and present conclusions regarding matters concerning all PhD students, including opinions on their normative acts.

AGH University of Science and Technology becomes a leader in the competition „Modern material technologies - TECHMATSTRATEG”

2018-12-12

The National Center for Research and Development has announced the results of the second competition as part of the strategic research and development program „Modern material technologies TECHMATSTRATEG”. Half of the 12 projects recommended for financing will be carried out by the consortia with the participation of the AGH University of Science and Technology in Kraków.

The TECHMATSTRATEG program covers five strategic areas: construction materials technologies, technologies of photonic and nanoelectronic materials, technologies of functional materials and materials with designed properties, waste-free material technologies and technologies of biodegradable engineering materials and material technologies for energy storage and transmission. TECHMATSTRATEG is to stimulate the growth of innovation and competitiveness of the Polish economy. The total budget of the program is approx. PLN 200 million.

II Ignacy Domeyko Latin American Congress

2018-12-12

On 15 and 16 December, the Department of Latin American and Comparative Studies at the University of Lodz and the Main Board of the Polish Association of Latin American Studies are organizing the Second Ignacy Domeyko Latin American Congress. The Congress, combined with the celebrations of the 40th anniversary of the Society and the 100th anniversary of Poland's independence, will be an opportunity to analyse the Polish presence in Latin America, summarize Polish scientific accomplishments in the field of Latin American issues and continue dialogue on the possibilities of its further development. The meeting will start with a session with honorary guests representing Polish-American scientific communities in Latin America, followed by Polish-Amer-

ican, cultural, political, archaeological and anthropological thematic panels. More: <http://kslip.uni.lodz.pl/aktualnosci-4/246-ii-kongres-latynoamerykanistyczny.html>

Researchers from Gdansk University of Technology awarded by the Minister of Science and Higher Education

2018-12-12

Professor Piotr Dominiak from the Faculty of Management and Economics, Vice-Rector for Internationalization and Innovation of the Gdańsk University of Technology and Prof. Eng. Zbigniew Krzemiński from the faculty of electrotechnics and automation became the laureates of the Minister of Science and Higher Education Awards for 2018. Scientific interests of Prof. Krzemiński are primarily modelling of power electronic systems and converter drive using DSP processors. The scientist promoted 15 PhD holders, 5 of whom hold a postdoctoral degree. He is a reviewer of numerous publications, including monographs and 90 publications in domestic and foreign science magazines. Professor Dominiak focuses on the economics of the small and medium enterprise sector and the role of entrepreneurship in the economy. He is the author of over 120 original scientific papers. He promoted 19 PhD students, six of whom hold a postdoctoral degree.

University of Gdańsk ranked fourth in the Polish Times Higher Education ranking

2018-12-12

The University of Gdansk ranked fourth in the category of Polish classical universities in the latest Times Higher Education World University Ranking. In the general list of Polish universities, the University took the sixth place. In the category of classical universities, Gdańsk universities have overtaken the Jagielloński, Warsaw and Adam Mickiewicz Universities. In the general ranking of Polish universities, the University of Gdansk was also ahead of the Krakow AGH University of Science and Technology and the Warsaw University of Technology. The Times

Higher Education ranking is a global list of more than 1,250 entities with different profiles, which are subject to qualitative assessment in terms of implemented missions and activities of universities. The quality assessment indicators have been divided into five areas: teaching, research, citation, international university perceptions and participation in the economy - knowledge transfer.

Deputy Minister Piotr Müller: The reform to effect already after the new year

2018-12-13

From the new year, academic staff will receive pay rises - said Piotr Müller, deputy minister of science and higher education. Müller stressed in the program «Polityka w górach» that higher payments are due to the reform of the system. The effects will come from January 1. Now, universities have time until September 30, 2019 to adopt their statutes. After the New Year, the pay rises for academic teachers will come into force. They will be particularly important for higher education institutions located in smaller cities - highlighted Müller. It was reminded that the Constitution for Science came into force on October 1. According to its provisions, universities are guaranteed a greater autonomy. It also assumes a new model of PhD education and support for regional universities.

Innovative product created by scientists of the Jagiellonian University strengthens the resistance of fish

2018-12-13

An innovative product created by researchers from the Jagiellonian University (Jagiellonian University) in Krakow strengthens the immune system of fish. Since imported fish have to endure the inconvenience of a long-term transport, breeders prophylactically give them antibiotics, which may also have side effects - explains Dr Wojciech Fiałkowski. Meanwhile, the new product, patented by scientists from the Jagiellonian University: Dr Wojciech Górecki, Dr Wojciech Fiałkowski, Dr Łukasz Pijanowski and Dr Eng. Monica Komorowska strengthens the immune system of fish and antibiotic therapy is not necessary. The product is used externally, it is mixed with the water in which the fish are transported. It is absorbed through the skin and digestive system. This is a completely innovative way of administering this type of drugs.

Medical University of Gdansk examines Polish seniors

2018-12-13

The Medical University of Gdańsk is carrying out research on the health condition of Poles aged over 60 and its social background. The PolSenior 2 project involves 6,000 respondents aged 60 -100 years drawn on the basis of the PESEL number by the Ministry of Digitization. The study will allow not only to assess the health of older Poles, but also, through the comparison with the results of the PolSenior survey carried out 10 years ago, will indicate beneficial and unfavorable health trends in one of the fastest-growing European societies. The main research tools are questionnaire surveys, laboratory tests, geriatric tests as well as anthropometric and blood pressure measurements. The conclusions of the research results will allow to define the needs of the population of present and future seniors, as well as adjusting the system activities of public institutions to social changes awaiting us over the next dozen or so years.

Scientists from Torun seek dark matter in the Universe

2018-12-13

Scientists from the Faculty of Physics, Astronomy and Applied Computer Science of the Nicolaus Copernicus University published their article in the prestigious scientific journal Science Advances. The text describes the operation of the Earth's sensor network aimed at detecting dark matter. The network is based on the four most precise atomic clocks in the world located in the United States, Japan, France and Torun in Poland. The publication is the result of work of an international team of scientists, including the researchers from the Department of Atomic Physics, Molecular and Optical Institute of Physics of the University of Toruń: Dr Piotr Wcisło, MSc. Piotr Ablewski, Dr Eng. Sławomir Bilicki, Dr Marcin Bober, Dr Eng. Piotr Morzyński, Prof. Roman Ciuryło, Beata Zjawin and Dr Michał Zawada. The research was financed from the resources of the Foundation for Polish Science. More: <https://www.umk.pl/wiadomosci/?id=25832>

Project „Save the World!” becomes a part of the UN climate summit

2018-12-13

University of Silesia Children in cooperation with Katowice City of Gardens - Krystyna Bochenek Institution of Culture, Theater Bonn and Save The World invite inhabitants of Silesia to participate in the project „Save the World!” on December 14th. This is one of the events accompanying the UN climate summit. As part of the event, the University is planning lectures, theatrical and dance performance «The Little Prince», a concert of pop music and instrumental concert of the classical guitar. The event is addressed primarily to children and youth. The lectures and classes are to promote international cooperation between academic environments, cultural and educational institutions and self-government units, expanding knowledge about ecological problems and the possibilities of counteracting their negative effects, promoting cognitive, pro-ecological and pro-social attitudes, as well as stimulating passion and scientific and artistic passion.

Students of the Wrocław University of Technology designed the reconstruction of the Senior House in Görlitz

2018-12-13

Students of the architecture faculty of the Wrocław University of Technology have developed a project for the extension of the Zentralhospital Senior House in Görlitz. The university established cooperation with the local City Hall. The project was created as part of the course „Residential architecture for the elderly people”. The architects will take care of the facility built in 1863 as a hospital for the elderly people. Currently, however, it requires expansion and adaptation to the needs of people with disabilities. The main guidelines include the creation of 6 modules with 12-14 single rooms and a common space with a kitchen, a communal dining room and a common room. The rooms were to be equipped with kitchenettes and bathrooms. The participants of the course presented their works at a special show in Zentralhospital with the participation of representatives of local authorities, investor and lecturers of the Brandenburgische Technische Universität from Cottbus. Currently, student projects can be viewed at the City Hall of Görlitz.

Poznan professors awarded for inventiveness

2018-12-13

Three professors from the University of Adam Mickiewicz in Poznań were awarded the Honorary Medal for Merit for Inventiveness. Medals were awarded as part of the 100th anniversary of the Patent Office and the system of protection of industrial property in Poland. Professor UAM Jacek Guliński specializes in organosilicon chemistry and issues related to the transfer of innovation and technology, innovation policy, relations of science with economy and commercialization of research results. Professor Hieronim Maciejewski deals with technologies of preparation of organosilicon compounds, synthesis and modification of inorganic polymers, catalysis of hydrosilylation processes. Professor Stanisław Sołtysiński is a member of the national correspondent of the Polish Academy of Arts and Sciences, author of scientific publications in the field of commercial and inventive law, co-author of a four-volume commentary to the Commercial Code issued by C.H. Beck. More: <https://amu.edu.pl/wiadomosci/aktualnosci/pracownicy/profesorowie-zwiazani-z-uam-odznaczeni-za-zaslugi-dla-wynalazczosci>

Medals of the 25th anniversary of the Faculty of Political Science at the Maria Curie-Skłodowska University in Lublin

2018-12-14

On December 14, 2018, the 25th anniversary of the Faculty of Political Science at the Maria Curie-Skłodowska University (UMCS) in Lublin will be held. During the event, the medals of the 25th anniversary will be awarded for long-term cooperation with the Faculty. Individual medals will be received by Krzysztof Żuk - Mayor of Lublin, Piotr Franaszek - director of the Center for the Meeting of Cultures in Lublin, Małgorzata Piasecka - Editor-in-Chief of the Polish Radio Lublin, Zbigniew Sobczuk - Art curator and President of the Society for the Encouragement of Fine Arts in Lublin and Katarzyna Kępa - director of the Municipal Labor Office in Lublin. Awards

will also be given to the following institutions: NN Theater, Cultural Center, Homo Faber, Misericordia, Center for Eastern Europe and editorial offices of the Gazeta Wyborcza, the Kurier Lubelski, Radio Centrum, the Dziennik Wschodni and TVP Lublin.

Tax relief for students studying at private universities in progress

2018-12-14

The Ministry of Science and Higher Education plans to introduce a tax deduction for full-time students at non-public universities. According to the initial proposal of the Ministry of Science, a working student, his parents or legal guardians would be able to deduct part of the expenses for the study at a private university to a predetermined amount from the tax base. According to Katarzyna Zawada, a spokesman for the Ministry of Science, the ministry assumes that the limit will amount to PLN 2,000. The new solution is to facilitate access to higher education for people who are not able to study at a public university, due to their economic situation or place of residence.

PLN 50 million for the Information Technology Center

2018-12-14

The IT Championship Center is starting a grant project funded by the Digital Poland Project Center to provide IT classes for over 12,000 particularly gifted primary and secondary school students. As part of the project of 1,500 mentors including teachers, medallists and finalists of IT competitions, with the support of five technical universities: Lodz University of Technology, which is a project leader and a technical university from Wrocław, Gdańsk, Warsaw and the Krakow AGH University of Science and Technology will work out curricula and implement them through organized IT clubs activities. The project will be also supported by associations: Coding Masters, I Love Math and the Foundation for the Development of Electronic Education. Digital Poland Project Center has allocated nearly PLN 50 million for the implementation of the project.

Researcher at the University of Life Sciences in Wrocław receives one million PLN from the Leader program

2018-12-14

Dr Paulina Nowicka from the University of Life Sciences in Wrocław will receive almost PLN 1 million from the program of the National Center for Research and Development 'Leader' for scientists under 35 of age, who want to gain experience in managing research projects and in building a team. With this financing, Dr Nowicka will carry out research combining natural sciences in the field of food and human nutrition technology as well as biological sciences. She wants to develop innovative healthy and tasty snacks for kids. - I plan to use our native fruits and vegetables (e.g. cherry, apple, pear, kamchatka berry, sea buckthorn, kale, spinach, tomato) characterized by high pro-health potential. I will also use herbs and edible flowers. The plan is to expand the range of products available on the market with health-promoting features that are not only healthy, but also tasty, and thus increase the demand for Polish vegetables and fruits. More: http://www.glos.upwr.edu.pl/aktualnosci/48742/lider_dla_dr_pauliny_nowickiej_z_upwr.htm

Students of the University of Zielona Góra Polish become champions in surgical sewing

2018-12-14

Students of the medical faculty of the University of Zielona Góra won the Polish Surgical Sewing Championship. Zielona Góra University organized competition for 80 medical students from 20 teams from all over Poland. The competition included 4-person teams from medical universities, clubs and student associations from all over the country. The two-day competition was divided into two parts. In the first, theoretical part, the lectures were held to prepare participants in terms of content. The second practical part consisted in checking the skills acquired on the first day. Students from Zielona Góra defended the title from last year. The second place was taken by the team from Wrocław, and the third by the students from Lublin. The main goal of the championship is to raise the knowledge and skills of medical students in the field of surgical stitching techniques, knowing modern suturing materials and the integration of medical universities from Poland.

Researchers of the University of Economics in Poznan awarded at the Capital Market Congress

2018-12-14

Researchers at the University of Economics in Poznan (UEP) took first place (ex aequo with researchers from the University of Szczecin) in a competition for a scientific paper during the 7th Capital Market Congress. The jury of the competition also awarded two distinctions - both for researchers from the Poznań university. The authors of the award-winning paper «Using the market width to predict rates of return from domestic and industry stock indices» are: Prof. Andreas Karathanasopoulos (University of Dubai), Dr. Przemysław Grobelny, Mateusz Mikutowski and Dr Adam Zaremba from UEP. The competition awards were also received by Dr Paweł Śliwiński, Prof. Associate of UEP and Maciej Łobza MA for the article «Can socially responsible investing be financially sound» and Dr Paweł

Śliwiński, and Dr Piotr Zygmantowski for «Indicators for measuring the development level of companies qualified for the NewConnect Focus segment».

Adam Mickiewicz University in Poznan to implement the „Third University Mission”

2018-12-14

Projects of the University Adam Mickiewicz University in Poznań received more than 8 million funding in the competition of the National Center for Research and Development „Third University Mission”. Co-financing was granted to the following projects: «Adam Mickiewicz University in Poznan, a forge of Wielkopolska talents»; „The future of Wielkopolska in the hands of the University of Adam Mickiewicz in Poznań”; „Adam Mickiewicz University in Poznan cares about the development of the Wielkopolska”; „University of Youth Competence Development”; „Discoveries of chemistry - Discover, Check, Use” and “UAM Collaboration - Training program for the inhabitants of the region”. The aim of the competition is to develop and implement programs and didactic activities together with entities acting for education - self-government units and non-governmental organizations. Thanks to it, universities was able to prepare educational programs, courses and trainings addressed to recipients from outside the academic environment.

Gdańsk University of Technology project to receive over PLN 2.2 million

2018-12-14

Gdansk University of Technology in cooperation with the Municipality of Gdańsk and the Kashubian People's University implements the project „Technological University of Many Generations”. The initiative has obtained over PLN 2.2 million in funding in the competition of the National Center for Research and Development „Third University Mission”. The Gdańsk University of Technology will prepare a training program for 1500 people of all age groups, in which the emphasis will be put on practical, workshop and laboratory classes. Their subject area will

include exact and technical sciences: mathematics; physics; chemistry; electrical engineering; shipbuilding and programming as well as socio-economic sciences. The University of Technology will make its laboratories, equipment, classrooms and sports facilities available to listeners. The subject of the classes was chosen by the residents in a special survey. There will be such issues as the presence of harmful chemicals in everyday products or mobile applications that allow participants to train their mind and prevent the development of Alzheimer's disease.

Totalizator Sportowy to offer 100 for 100 scholarships for students

2018-12-17

One hundred scholarships for one hundred talented students were funded by the LOTTO Foundation and Totalizator Sportowy. Prime Minister Mateusz Morawiecki attended the ceremony of awarding scholarships in Warsaw. Halina Konopacka and Ignacy Matuszewski Scholarship program „100 for 100” was a part of the celebration of the 100th anniversary of Poland regaining its independence. - Poland would not regain its independence 100 years ago, without the great effort of activists, writers, athletes, propagators of various attitudes in society - said Prime Minister Morawiecki during the ceremony. The „100 for 100” program is aimed at students who are distinguished by their attitude, commitment and academic performance. The scholarship is awarded for one year as monthly payments of PLN 1.250 gross. Funds from the scholarship may be used for further development and deepening the student's knowledge, for courses, trainings, sports equipment, musical instruments, educational trips, sports or language camps.

Students of the Silesian University of Technology present the Quarado car

2018-12-17

Students of the Silesian University of Technology presented their latest vehicle - the Quarado car, which will take part in the Formula Student competition in the summer. The vehicle has a capacity of 95 hp, weighs only 220 kg and accelerates to a hundred km per hour in 3.5 seconds. The work of young engineers from the Student Scientific Club PolSI Racing is an improved and lighter version of the SW-01 car. The goal of the modification was to improve the performance results of the car. This was achieved by reducing the weight of the vehicle, modifying the drive and the chassis. The «revised» car weighs 220 kg, its engine power was increased from 75 to 95 hp. It is lighter than the original by 60 kg, which also translated into better acceleration. SW-02, the Quarado car, reaches a speed of 100 km / h in 3.5 seconds with one second less than SW-01. Currently, the car will pass necessary tests, then the drivers will have training to improve their skills for the competition. The next stage will be implementing the modifications.

Scientist of the Medical University in Wrocław creates an innovative wound treatment workshop

2018-12-17

The scientist of the Medical University of Wrocław is creating an innovative wound treatment workshop to use ESW - Extracorporeal Shock Wave. The project will be implemented as part of the Mozart program 2018/2019. The leader of the project «Decumed: Organization of an innovative workshop for treating chronic wounds with shock waves» is Dr Robert Dymarek from the Department of Nervous System Diseases. The aim of the project is to shorten the duration of therapy, reduce pain and exudate from the wound, as well as reduce the stress associated with impaired healing, minimize the occurrence of complications, and improve the quality of life. The Mozart - Municipal Program of Supporting Partner-

ship for Higher Education and Science and the Economic Activity Sector is a program adopted in 2012 by the City Council of Wrocław. Its aim is to support the Wrocław labor market by enabling companies to access the intellectual potential of scientists. Scientist from the University of Białystok awarded statuette of the 70th anniversary of Polish Information Technology

2018-12-18

Dr Eng. Wiesław Półjanowicz from the Faculty of Mathematics and Computer Science at the University of Białystok received the statuette of the 70th anniversary of Polish Information Technology. The honorable prize is granted by the Main Board of the Polish Information Processing Society to persons and institutions especially deserving for the development of computer science in Poland. In addition to scientific and didactic work, Dr Eng. Półjanowicz participated in the implementation of the project «Modern and effective education in cooperation with entrepreneurs» (2009-2011). Its effect was the implementation of an e-learning platform at the University of Białystok.

Record year in the history of the Aeronautical Center of the Rzeszów University of Technology

2018-12-18

In 2018, 30 people completed the total air training for a plane pilot license in the Aeronautical Center of Rzeszów at University of Technology. This is the best result in the 40-year history of the center. The year 2018 marks the record in the history of the pilotage of the Rzeszów University of Technology. In total, 114 students spent 6 156 hours in the air, which is an exceptional result to compare with 2017,

when it was 3 839 hours. In 2018, 11,107 take-off and landing operations were carried out - said Mieczysław Górak, director of the Aviation Training Center at the Rzeszów University of Technology. Rzeszów University of Technology has been training civil aviation pilots for over 40 years, and since 2007 it trains also aviation mechanics. Rzeszów University has educated over 780 pilots of civil aviation.

Delegation of the University of Silesia visits Beijing University of Technology

2018-12-18

The delegation of the University of Silesia (UŚ) visited the Beijing University of Technology (BJUT). During the visit, agreement for student exchange was signed, and further development of cooperation between universities was discussed. The cooperation agreement was signed in Beijing by the vice-rector for international and national cooperation, Prof. Tomasz Pietrzykowski. It regulates issues of students' stay as part of part-time studies and trips to Polish and Chinese summer schools. During the visit, the promotion and development of Polish-Chinese higher education and the organization of the academic forum in 2019 were also discussed. BJUT and UŚ are associated in the Polish-Chinese academic consortium, and the cooperation between them is dynamically developing. The Chinese Language and Culture Center has been operating at the University since January, and several dozen Chinese students took part in this year's summer school of language, literature and Polish culture organized in Cieszyn.

Researcher of the University of Zielona Góra to take an internship at the University of California

2018-12-18

Dr Eng. Remigiusz Wiśniewski from the University of Zielona Góra will carry out the project „Modelling of cyber-physical systems with the use of the interpreted Petri network - scientific internship at UC Berkeley”. The internship at the University of California is financed within the call Miniatura of the National Science Center. The scientist will hold a scientific internship at the University of California in Berkeley with Prof. Edward A. Lee, an eminent specialist in the field of cyber-physical systems. During the stay, the author of the project is planning to conduct basic research in terms of the possibility of using the interpreted Petri network in the modelling of cyber-physical systems (Cyber-Physical Systems, CPS). Petri nets enable graphical representation of the system, and their greatest advantage is to take into account the concurrency relationships taking place in a given system. In addition, they offer a wide range of analysis and decomposition methods that support modelling and verification of the designed system.

Researchers of the Wrocław University of Environmental and Life Sciences receive grants worth PLN 4 million

2018-12-18

Scientists of the University of Life Sciences in Wrocław received grants in the call of the National Science Center - Opus 15. Their total value is almost PLN 4 million. Dr Beata Łabaz from the Institute of Soil Sciences and Environmental Protection will deal with black earth soils in Poland against the climate change and the impact of settlement and human activity from the beginning of the Neolithic period. Prof. Krzysztof Marycz from the Department of Experimental Biology as the first in the world describes the influence of metabolic syndrome in horses on the functionality, steatosis and inflammation of the liver. Professor Krzysztof Sońnica will set global geo-

detic parameters using the Galileo satellite system, Dr Jarosław Waroszewski will study erosion and soil development in the loess landscape of the Wzgórza Trzebnickie, and Prof. Aneta Wojdyło from the Department of Fruit, Vegetable and Nutraceuticals Technology will develop a model drink with pro-health properties focused on the prevention and therapy of civilization diseases. 6th program „Corporate Readiness Certificate” held at the Silesian University of Technology

2018-12-18

The 6th program of the „Corporate Readiness Certificate” (CRC) has been launched under the auspices of Accenture, IBM and ING Tech Poland in cooperation with the Silesian University of Technology. The program provides students with the basics of practical knowledge in the IT area, gets to know the business environment from the inside, allows to find an internship and their dream job faster. The CRC program enables students to develop faster, acquire practical knowledge, and develop functional skills in a complex, modern business environment. The best will receive an offer of internships or apprenticeships in partner companies. The organizers also aim to change the attitude of students to large corporations and present their work in a different light. The schedule of the program provides for entrance examinations in March 2019. Classes will last until June and will end with exams. The end of the program is scheduled for July 2019.

Consortium with the participation of Krakow universities to develop a model of a welfare farm

2018-12-19

Consortium of the Ministry of Agriculture and Rural Development (leader), Agricultural Advisory Center (CDR) in Brwinów, Jagiellonian University and Agricultural University in Krakow, signed a contract with

the National Center for Research and Development to fund the GROWID project „Welfare farms in rural development against demographic challenges”. The project will be implemented as part of the strategic program of scientific research and development work „Social and economic development of Poland in the conditions of globalizing markets” GOSPOSTRATEG. The main objective of the project is to develop a welfare farm model and to prepare a system of implementation in the form of a development strategy of the care farms. It is to eliminate development barriers in Poland: inequalities between cities and rural areas in access to social services, insufficient coordination of public services at the local level and low quality of social capital.

In January scientists from the University of Warmia and Mazury to start microbiological research in Antarctica

2018-12-19

Professor Aleksander Świątecki and Dr Dorota Górniak from the Department of Microbiology and Mycology at the University of Warmia and Mazury in Olsztyn set out in January 2019 for Antarctica, where they will conduct microbiological research in the Polish Antarctic Station for 4 months. - We will investigate the bacteria in Antarctic lichens. This is an interesting topic, so far we know little about these microorganisms - says Dr Dorota Górniak. Scientists hope that some Arctic microorganisms have biochemical potential and can be used in medicine - for the production of antibiotics or in the production of biopolymers.

Cardinal Stefan Wyszyński University received the right to education in nursing

2018-12-19

The Polish Accreditation Committee has positively examined the application of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw for granting the Faculty of Medicine Collegium Medicum the right to conduct education in nursing. The consent applies to first level studies with a practical profile. The course will start in February 2019. The uniqueness of the educational offer of the Warsaw university is Polish or English language of the course. This is the only study of this type in Warsaw. Nursing in English at CSWU can be studied both by foreigners and Poles. Importantly, 3-year full-time studies are free of charge for every student. This is a huge benefit for students as foreign language studies at most Polish universities are paid.

State Higher Vocational School in Zamość opens a laser shooting range simulator

2018-12-19

The State Higher Vocational School (PWSZ) in Zamość has opened a national security studio, equipped with a laser shooting range simulator. The laser shooting range was created to familiarize students with the basics of shooting training. It includes learning of shooting attitudes, learning to handle weapons and aiming. It is to prepare students for shooting with combat ammunition. - We introduce innovative solutions that aim to improve the quality of education and preparation of young people who will graduate. We are constantly developing and improving our didactic base. The moment has come that we are opening a modern workshop, which includes a laser shooting range and other elements related to the sphere of security for the faculty of national security - said Prof. Andrzej Samborski, Rector of the State Higher Vocational School in Zamość.

Researcher at the University of Technology and Humanities in Bielsko-Biała wins the Quarry Life Award

2018-12-19

Dr Damian Chmura prof. Academy of Technology and Humanities in Bielsko-Biała (ATH) in cooperation with Dr Tadeusz Molenda of the University of Silesia won the Quarry Life Award for the work „Environmental determinants of succession in mineral aggregate mines as the basis for their reclamation”. The authors based on the conducted botanical and hydrological studies and presented the concept of restoring the natural value of the «Wójcice» mineral aggregate mine after possible discontinuation of operation. Their work was awarded in the category of biodiversity management and research on habitats and species. The Quarry Life Award is a science and didactic contest aimed at promoting the diversity of local flora and fauna, raising awareness of the biological value of mining areas and seeking ways to increase their biodiversity. In the fourth contest 6 of over 20 projects were selected for funding and 4 of them were awarded.

Ten scientists from the University of Wrocław receive scholarships from the Bekker program

2018-12-19

Ten scientists from the University of Wrocław received scholarships for trips to the best foreign research centers as part of the Bekker program carried out by the National Academic Exchange Agency. Scholarships for conducting research or teaching in renowned foreign centers have been awarded to: Dr Piotr Sula from the Institute of Political Science; Dr Mateusz Strzelecki from the Institute of Geography and Regional Development; Dr Adam Pomorski from the Faculty of Biotechnology, Dr Rafał Jan Topolnicki from the Institute of Experimental Physics, Daniel Hoffmann - a graduate of the Institute of Mathematics; Prof. Dagmara Ewa Jakimowicz from the Faculty of Biotechnology; Dr Marek Szykuła from the Institute of Mathematics; Dr Katarzyna Tryczyńs-

ka from the Faculty of Philology and prof. Eugeniusz Zych and Dr Sylwia Kostera from the Faculty of Chemistry will participate in the program. Scholarships cover expenses related to a researcher's stay at a foreign host center and a mobility allowance.

Katowice conference discusses the legal and economic aspects of cooperation with China

2018-12-19

The Interfaculty Scientific Circle of Chinese Culture and Law invites participants to the conference „Legal and economic aspects of cooperation with the People's Republic of China”, which will take place on February 15 at the Faculty of Law and Administration of the University of Silesia. This is the first conference on the subject of law and business in Silesia in relations with the People's Republic of China. The goal of the event is to interest the academic community of China. The conference is addressed to students, scholars and business representatives, including small and medium-sized enterprises. Passive participation is free and does not require registration. The deadline for sending abstracts is January 7, 2019. Detailed information: <https://konferencjeiny.wixsite.com/info>

Wrocław University of Environmental and Life Sciences to participate in the international project RUBIZMO

2018-12-19

University of Environmental and Life Sciences in Wrocław, together with 15 partners from 10 European countries will implement the RUBIZMO rural development project. Project participants are to identify and select 50 successful business cases and 20 new business models to analyze replication conditions and develop tools: a virtual business case library; guidance on creating favorable conditions for the implementation of innovative business models; a set of tools for creating clusters and development of networks in rural areas and tools for support for transformation. The aim of the project is to contribute to the creation of new jobs and development in very diversified rural areas by stimulating and implementing innovative business models based on the value chains biology, environmental protection and the idea of sustainable development. More: http://www.glos.upwr.edu.pl/aktualnosci/48758/rubizmo_nowoczesna_gospodarka_wiejska

Professor Matthias F. Melzig becomes doctor honoris causa of the Warsaw Medical University

2018-12-20

Professor Matthias F. Melzig from the Free University of Berlin received his honorary doctorate from the Warsaw Medical University (WUM) during the 11th Scientific Conference of the Faculty of Pharmacy with a Division of Laboratory Medicine. Professor Matthias F. Melzig, associated with the German university conducts research and scientific relations with scientists from the Warsaw Medical University since the 1960s. As emphasized Prof. Piotr Wroczyński, dean of the Faculty of Pharmacy, the result of this long-term joint work is not only the scientific development of the Medical University, but also the education of future generations of scien-

tists and students. The special title of the WUM was gained by Prof. Matthias F. Melzig for researching plants as a source of new drugs.

University of Lodz appoints the University Council

2018-12-20

Roman Wieczorek became the chairman of the university board of the University of Lodz. It was composed of seven people, including three from outside the university and the chairman of the students' self-government. The establishment of such a body is required by the Law on Higher Education and Science. The Law on Higher Education and Science assumes that from the next academic year, at each public university in Poland, a new university council will appear, whose tasks include monitoring financial management and university management, as well as indicating candidates for rector. The Council is also to give opinions on the draft statute and strategy of the university and reports on the implementation of the university's strategy. According to the regulations, the university council consists of 6 or 8 people, appointed by the senate. In the case of the University of Lodz, a six-person team was elected. The seventh person automatically included in this body is always the chairman of the students' self-government.

University of Physical Education in Wrocław to carry out projects for children and seniors

2018-12-20

Two projects of the Wrocław Academy of Physical Education received funding under the call of the National Center for Research and Development 'Third University Mission'. The total amount of funding is over one million PLN. Teachers of the Department of Human Biology and the Department of Physiotherapy at the Faculty of Physiotherapy, under the supervision of Prof. Krzysztof A. Sobiech will carry out the project «Children's competences in the field of lifestyle for 5». The project will be implemented in selected primary schools of Wrocław in

the years 2019-2021. Dr Jarosław Fugiel and Dr Krystyna Chromik from the Department of Physical Anthropology will carry out the project «Senior activity is their efficiency and health», which assumes the preparation and implementation of an exercise program for the elderly people. Classes will be conducted in the form of lectures and exercises to increase the level of physical activity. The project will be attended by 240 people aged 60+ and will be implemented in 2019-2021.

Students of the University of Wrocław to participate the world championship in team programming

2018-12-20

Students of computer science at the University of Wrocław, Jarosław Kwiecień, Michał Górniak and Anadi Agrawala, qualified for the World Team Programming Championships. They were promoted by taking 4th place in the championship of Central Europe. Academic Team Programming Championships are organized by the Association for Computing Machinery. They are the oldest, the most prestigious and the biggest in terms of the number of participants competitions of this type. Representatives of universities from all over the world take part in them. During the competitions, participants receive several programming tasks to solve and only one computer. Effective cooperation is extremely important in this situation, especially since every second counts - the classification takes into account both the correctness of the tasks performed and the time of solving them. And there are so many tasks that team members work on them separately, but the solutions are to write in computer files.

Stock Exchange School of the Warsaw Stock Exchange is launched at the Silesian University of Technology

2018-12-20

The Faculty of Organization and Management at the Silesian University of Technology is launching the Exchange School courses - the program of the Warsaw Stock Exchange Foundation (WSE) in cooperation with Polish universities. The aim of the initiative is to provide universal education in the field of trading in securities and other financial instruments. During the course the students will be able to learn how the WSE works, how to evaluate the effectiveness and investment risk, what instruments to choose and how to create an investment portfolio, how to conduct a technical and fundamental analysis and how the economic environment affects the financial market. As part of the Stock Exchange School, two courses are organized: «Basis for investing on the stock exchange» and «Exchange for intermediates». Classes are conducted in the weekends. Participants receive professional information materials prepared by the Warsaw Stock Exchange Foundation and a certificate of completion of the course.

Day of the Young Architect held at the College of Ecology and Management

2018-12-21

The Builder magazine held the Young Architect's Day at the College of Ecology and Management (WSEiZ) in Warsaw. The event was attended by architecture students from various universities and students of two architectural and construction schools from Warsaw. Participants of the Young Architects Day had the opportunity to participate in lectures, workshops conducted by outstanding architects and in industry consultations with representatives of several companies. Participants of the event were welcomed by the rector of the University of Economics, Dr Monika Madej, Dean of the Faculty of Architecture Dr Eng. Małgorzata Leszczyńska-Domańska and Marek Zdziebłowski, publisher of the «Builder» magazine. The inaugural lecture «Specification of

the design of medical facilities» was given by Dr Eng. Michał Grzymała-Kazłowski, lecturer at WSEiZ and owner of the Archimed architectural studio.

Archaeologists of the University of Warsaw receive nearly PLN 2 million from the program Dialogue

2018-12-21

The Center for Mediterranean Archeology of the University of Warsaw received a grant of almost PLN 2 million as part of the Dialogue program of the Ministry of Science and Higher Education. The money is allocated to the project „ArcheoCDN. Archaeological Center of Scientific Excellence „. The grant will allow Warsaw archaeologists to create archaeological center of scientific excellence for 2 years, which will use the most modern methods of work and the resources accumulated over several decades of research in North Africa and the Middle East. A modern repository will be created with wide access to archaeological documentation collected over decades. This will not only allow scholars to present visual collections, but also allow them to share.

Rzeszów University of Technology launches dual studies

2018-12-21

Rzeszów University of Technology (PRz) launches dual studies with a practical profile, under which full-time students will combine learning and gaining professional experience. This model will educate students of mechanical engineering for the aviation industry at the Faculty of Mechanical Engineering and Aeronautics, as well as automation and robotics at the Faculty of Electrical and Computer Engineering. The system of dual studies is just gaining popularity among Polish universities. It is a good example of the synergy of the activities of universities and employers - believes Dr Eng. Grzegorz Masłowski, Prof. PRz, Vice Rector for Education at the Rzeszów University of Technology. The aim of dual studies is to raise key competences and practical qualifica-

tions of students of the Rzeszów University of Technology. Dual studies will include 72 people and will be conducted as part of the second-cycle studies.

PhD student of the University of Life Sciences in Poznan becomes finalist of the Science Promoter competition

2018-12-21

Mateusz Kęsy - PhD student at the Department of Insects Breeding of the Institute of Zoology at the University of Life Sciences in Poznań became a finalist of the 14th Science Promoter contest. The young scientist will compete for the victory in the Animator category. Mateusz Kęsy popularizes knowledge related to zoology and protection of the natural environment among children and adults. He conducts scientific workshops in kindergartens and schools, open lectures and classes with students. During many journeys around the world, he gains nature collections, which he then uses during scientific workshops. He is the author of many publications on nature conservation, participant and co-organizer of scientific conferences in Poland and abroad. He was a scholarship holder of programs for young scientists and a finalist of numerous competitions. He was awarded many times for scientific and educational activities. The final of the competition is organized by the Science in Poland service and the Ministry of Science and Higher Education and will take place in January.

University of Economics in Katowice to receive additional funds for development

2018-12-21

The University of Economics in Katowice (EU) in 2019 will receive almost PLN 29 million to increase the basic fund - says the letter of the Deputy Prime Minister, Minister of Science and Higher Education - Jaroslaw Gowin, addressed to the rector of Dr. Robert Tomanek. Min. Gowin said that funds in the form of two-year government bonds will be transferred in 2019. The nominal value of government bonds, for which the Minister of Science and Higher Education applied to the Minister of Finance for the University of Economics in Katowice is PLN 28.825 million. Providing additional money for university development was one of the key demands in the discussions of the university authorities with the Ministry of Science and Higher Education during the work on the reform. As a result, the Law on Higher Education and Science, i.e. the Constitution for Science guarantees a constant mechanism for the increase of expenditures on research and higher education as well as an increase in minimum wages in universities. More: https://www.ue.katowice.pl/no_cache/uczelnia/aktualnosci/article/ue-katowice-otrzyma-dodatkowe-srodki-na-rozwoj.html

Biologists' Night at the University of Szczecin

2018-12-21

For the 8th time the University of Szczecin invites viewers to take part in the Biologists' Night. On January 11, employees and students of the biology department prepared interesting lectures, demonstrations and workshops as well as laboratory classes. The themes of the Biologists' Night will be related to the world of plants, immunology, biochemistry, cell biology and genetics. The organizers prepared electric bioimpedance demonstrations and workshops as well as laboratory classes during which participants will be able to analyze your body composition - fat, muscle and body water. They will also be able to isolate and view their

own DNA, find out how animals communicate with each other and what tricks flowers use to attract pollinating insects. It will also be possible to find out what plants are gathered at home and find out if bacteria are our enemy or ally and why laughter helps to loose weight and heals. More: <http://usz.edu.pl/wp-content/uploads/0.-P-R-O-G-R-A-M-NB-2019-zbi%C3%B3r.pdf>

Silesian Science Festival to be hold from January 12 in Katowice

2018-12-21

From January 12 to 14, Katowice will host the 3rd Silesian Science Festival. The program included more than one hundred and fifty exhibition stands, dozens of lectures and presentations from various areas of science as well as workshops and meetings with interesting people. The largest scientific event in southern Poland is organized by the University of Silesia along with the City of Katowice. The slogan of the event is „Energy”. The official inauguration of the festival is scheduled for Saturday, January 12 at Teatr Śląski in Katowice. It will be led by Dr Tomasz Rożek - a graduate of the University of Silesia and one of the most recognized scientific journalists in Poland. The inauguration program provides for a conversation with a special guest - astronaut NASA Nicole Stott, a musical-visual presentation of the project CallTrain MO4 / HG4 prepared by Prof. Marian Oslislo from the Katowice Academy of Fine Arts and accompanying musicians, as well as presenting Silesian Academic Awards. More: <http://www.us.edu.pl/3-slaski-festiwal-nauki-katowice>

Deputy Prime Minister Gowin: The expenditures on education and the salaries of academic teachers to increase

2018-12-24

Deputy Prime Minister, Minister of Science and Higher Education Jaroslaw Gowin announced that by 2021 wages of Polish scientists will increase by 30 percent compared to the ending 2018. - Their earnings at universities are still significantly low-

er from the real worth the work of academic lecturers and scientists - said Deputy Prime Minister Gowin. The Ministry of Science estimates that wage increases will affect almost 41 thousand academic teachers. The cost will increase the expenditures of the state budget by PLN 916.5 million. According to the government budget assumptions for 2019, expenditures on science and higher education are to amount to PLN 26.5 billion and will be higher by PLN 2 billion compared to the current year.

President of the Polish company is usually a graduate of the Warsaw School of Economics

2018-12-24

The daily Rzeczpospolita has analyzed the profiles of 570 presidents of the largest Polish companies. The list prepared by the newspaper shows that most of them studied at the Warsaw School of Economics. In the ranking the second place was taken by the Warsaw University of Technology and the third position by the AGH University of Science and Technology in Kraków. In total, almost one of five presidents of the largest companies in Poland has a diploma of one of these three universities. And here are the top ten ranking: 1. Warsaw School of Economics 2. Warsaw University of Technology 3. AGH University of Science and Technology in Krakow 4. University of Warsaw 5. Silesian University of Technology in Gliwice 6. Wrocław University of Technology 7. University of Economics in Poznan 8. Cracow University of Economics 9. University of Economics in Katowice 10. Lodz University of Technology

Kozminski University signed a contract with the French ESSCA - School of Management

2018-12-24

Kozminski University (ALK) in Warsaw has signed an agreement on the Master in Finance and Accounting program with the prestigious French university ESSCA - School of Management. It allows students of ALK to study in Angers in the second year of their studies. Both universities have triple accreditation (EQUIS, AMBA, AACSB) and occupy high places in the international rankings of business schools made by the «Financial Times». The agreement with the French university opens new opportunities for finance and accounting students. Students of the Corporate Finance specialization within the Master in Finance and Accounting program at ALK have the opportunity to study for two semesters (3rd and 4th semester) at Essca School of Management, in Angers in France. Graduates of this joint program will receive the following titles: Master in Finance and Accounting at Kozminski University and Master in Corporate Financial Management- Essca School of Management.

Polish scientists and engineers to take part in the study of Jupiter's moons

2018-12-24

Polish scientists and engineers from the Astronika company and the Space Research Center of the Polish Academy of Sciences will take part in the JUICE mission (JUperiter ICy moon Explorer) implemented by the European Space Agency. In 2022, a space probe will be sent to Jupiter, which will investigate four of its moons: Io, Europe, Ganymede and Callisto. The probe is to conduct a search for liquid water under the surface of these objects, in terms of the possibility of life occurring on them. - Missions like JUICE have a taint of great geographic discoveries. Climbing to the heights of technological possibilities, we take up challenges that exceed our imagination. In the 15th and 16th centuries, overseas expeditions were sponsored by kings, today this function was

taken over by modern governments. This function was also taken by the Polish government, noting the role of space projects in the Strategy for Responsible Development and adopting the Polish Space Strategy - said Deputy Prime Minister Jarosław Gowin.

Academy in Gorzów Wielkopolski to launch the physico-chemical laboratory and integrated data security center

2018-12-24

The Academy in Gorzów Wielkopolski opened a physicochemical laboratory with an integrated data security center. The facility will work for government and self-government institutions as well as the socio-economic environment. The mission of the laboratory and the Data Security Center will be implementing innovative solutions and services in the field of chemical technologies and information security and business continuity in accordance with the applicable legal status and specialist standards for the needs of government, self-government and socio-economic institutions. The students of the Academy's technical faculty will use the laboratories. In addition, thanks to cooperation with the socio-economic environment, research conducted in the laboratory will contribute to designing and creating solutions that will satisfy the needs and requirements of enterprises.

Wrocław students to carry out the project in cooperation with the European Space Agency

2018-12-24

Students of the Medical University of Wrocław will be the first Polish academic team in history that will conduct research in the field of medicine and astrobiology in cooperation with the European Space Agency. The ARES team project has been accepted for implementation under Spin Your thesis! 2019. The project is an experiment on the functioning of cancer cells in changed gravity. In the

device Large Diameter Centrifuge will be carried out experiments on samples that will be exposed to acceleration from 1 g to 20 g. Participation in the competition is part of the project «Research on the protection of biological material for the needs of space missions» financed by the Ministry of Science and Higher Education as part of the competition «The best of the best! 3.0.» It is attended by students of the Medical University of Wrocław, the University of Wrocław and the Wrocław University of Technology.

International study program based on practice developed at Gdańsk University of Technology

2018-12-24

The Faculty of Mechanical Engineering at the Gdańsk University of Technology launched a training program based on the Work-based learning (WBL) formula. Studies modelled on Austrian researches will be conducted first of all at the Technical University in Gabrovo in Bulgaria. In addition to the study program, a cluster of practices will be created - an electronic platform for companies to advertise vacancies and for students to apply and work on the basis of real industrial situations. In addition, e-workshops will be introduced, i.e. trainings for company mentors and academic teachers. There will also be a discussion forum devoted to the exchange of ideas, experience and best practices. The aim of the project is to create a new partnership structure that promotes effective cooperation between technical universities and production companies, supported by local authorities and social partners. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGNcmoQv7K0/content/na-wydziale-mechanicznym-tworzony-jest-miedzynarodowy-program-studiow-opartych-na-praktyce

Scientist of the Adam Mickiewicz University in Poznan receives the prize of Prof. Hofmoki

2018-12-24

Professor Jacek Pyżalski from the Adam Mickiewicz University in Poznań received the prize of Prof. Tomasz Hofmoki in the „Information Society” category. The award was presented during the gala on the occasion of the 25th anniversary of the Scientific and Academic Computer Network - the National Research Institute (NASK). Professor Jacek Pyżalski works at the Faculty of Educational Studies of the Poznań university. He is the author of numerous publications, a member of scientific networks and a coordinator of many research projects, a coach in communications and difficult behaviors. His research interests include: electronic aggression, new media, communication at school, health promotion and cyberbullying among young people. Professor Tomasz Hofmoki was the creator and first director of NASK, a research institute supervised by the Ministry of Digitization, which for 25 years has been working on the development of the information network and society in Poland.

University of Technology and Life Sciences in Bydgoszcz to study photovoltaic panels

2018-12-24

University of Technology and Life Sciences in Bydgoszcz (UTP) has signed a cooperation agreement with the company dealing with the processing of plastics and the production of photovoltaic panels by the company Hanplast Ltd. Hanplast is the world's first manufacturer of new generation solar modules in SmartWire Connection Technology (SWTC). According to the agreement, the efficiency of the panels will now be tested in the university's laboratories. An automated production line is based on SWTC technology and operates in the plant located in the Bydgoszcz Technological Park. In this technology, cell connections are applied at a lower temperature (140 ° C) than the soldering process in traditional stringer (230-300 ° C) photovoltaic modules used in

buss-bar or multi wire technology. As a result, SWCT induces lower thermo-mechanical pressure on the solar cell, reducing its brittleness and ensuring a longer service life.

Bialystok University of Technology signed cooperation agreements with Iranian universities

2018-12-27

Bialystok University of Technology (PB) has signed cooperation agreements with three Iranian universities: Tarbiat Modares University from Tehran, Islamic Azad University from Tehran, and Zirab Science and Technology Campus, New Technologies and Engineering Faculty from Mazandaran province. The Iranian partners are interested in exchanging staff, sending young researchers to Poland, participating in conferences and undertaking common research topics. Tarbiat Modares University plans to cooperate with the Białystok University of Technology as part of the Erasmus + project. - We are enhancing the internationalization of the Białystok University of Technology. I am glad that Iranian universities have joined us to cooperate with other 140 our partner universities- says PB Rector, Prof. Lech Dzienis.

Students from the University of St. Thomas to take part in an educational program at the Catholic University of Lublin

2018-12-27

The Open University of the Catholic University of Lublin from 4 to 30 January 2019 will host a group of students from the University of St. Thomas (Minnesota, USA), who will participate in the educational program John Paul II in His Polish Context. The main axis of the program is the analysis of the activity, philosophy and teaching of Karol Wojtyła - Pope John Paul II in the socio-cultural context. Outstanding specialists, mainly employees of the Catholic University of Lublin, will present issues related to the history and culture of Poland of Pope John Paul II. In addition, participants will visit Zamość, Kozłówka, and Warsaw and go on a tour around places

closely related to John Paul II. They will see Krakow, Czestochowa and Wadowice. The four-week education program will be completed with exams.

Researchers from the University of Warsaw to participate in EIT Food projects

2018-12-27

Researchers from the faculties of psychology, mathematics, computer science and mechanics and management at the University of Warsaw (UW) will participate in 19 projects financed by the Knowledge and Innovation Community in the area of EIT Food. EIT Food is part of the European Institute of Innovation and Technology - an institution of the European Union that supports innovation and entrepreneurship in Europe. EIT Food is a Knowledge and Innovation Community dealing with the modernization of the food sector. It is composed of 50 partners from 13 countries. These include universities, research units and enterprises, among others: University of Warsaw, University of Cambridge, Hohenheim University, Technical University of Munich, Bosch, Nestlé, PepsiCo, Siemens, Sodexo and Polish Maspex. The projects of the scientists from the University of Technology will be implemented in 2019 and concern education, innovation and communication.

Polish-English-Dutch project at the University of Zielona Góra

2018-12-27

The University of Zielona Góra, together with the English University of Nottingham and the Dutch University of Twente, are carrying out the research project „Smart Cities EMC Network for Training (SCENT). The project's budget is almost 2.4 million euros. The main objective of the project is to create a network offering training for PhD students in specific issues related to electromagnetic compatibility (EMC) intelligent cities. The project is developed as part of the European research program HORIZON 2020: 1.3 - Excellent science / Marie Skłodowska-Curie (MSCA). EMC is necessary for the reliable operation of systems containing electronic, telecommunications and energy systems. It is also a legal requirement for the introduction of the product to the European Union market.

Music Integrative Children's University held at the University of Casimir the Great in Bydgoszcz

2018-12-27

The Department of Music Education at the University of Casimir the Great in Bydgoszcz (UKW) will receive over 700,000 PLN from the National Center for Research and Development for the implementation of the project „Music Integrative Children's University”. The project will be implemented in 2019 - 2021. As part of the project, children and youth from the Special Education and Care Center for Weak Seeing and Blind Children and Youth in Bydgoszcz and from the First Degree Public Music School in Górska will participate in music integration activities at the UKW music education department. The classes will be run by academic teachers from the University of Bydgoszcz. The project also includes visits and workshops in the cultural institutions of Bydgoszcz, an integration camp, and the recording and release of the CD.

University of Silesia to implement the project „ProspectUS - the concept of strengthening the research position”

2018-12-27

The project of the University of Silesia (University of Silesia) „ProspectUS - the concept of strengthening the research position” has received over 910 thousand PLN from the call of the Minister of Science and Higher Education „Strategy of Excellence - a research university”. The money will be used to carry out R&D to develop a long-term university strategy. The activities will serve to increase the international recognition of the university's academic activities, develop research cooperation with foreign research centers, improve the quality of education of students and PhD students, as well as manage the university and increase the number of obtained grants for research. The aim of research and analysis is to identify areas that will strengthen the status of the University of Silesia as a research university. On this basis, a development concept will include the deepening of cooperation with the economic and social environment of the university and strengthening the potential of the university and the newest changes - for example the new law on higher education and science.

Scientists from Białystok discovered the unusual properties of Heterobasidion annosum

2018-12-28

Researchers from the Medical University of Białystok (UMB) and the Białystok University of Technology filed a patent application on the use of Heterobasidion annosum pine to treat colorectal cancer. This is the result of research on the use of fungi found in the Białowieża Forest in the treatment of cancer. At the beginning of 2018, scientists reported the creation of a bank of extracts of over 150 fungi occurring in the Białowieża Forest, which is located at the Science and Research Center of the Faculty

of Forestry at the Białystok University of Technology in Hajnówka. The properties of the Heterobasidion annosum were first tested on physiological cells and colon cancer cells grown in the laboratory, and then on laboratory mice. The patent application concerns a new application of this fungus that stops the development of colon cancer cells - informed Prof. Halina Car, head of the UMB experimental pharmacology department.

Professor Paul H. Dembiński becomes the honorary doctor of the Warsaw School of Economics

2018-12-28

Rector and Senate of the Warsaw School of Economics invite participants on 16 January 2019 to participate in the awarding Prof. Paul H. Dembiński, director of the think-tank of the Financial Observatory in Geneva, professor at the University of Freiburg in Switzerland with the title of doctor honoris causa. Professor Dembiński is also the director of the Eco Diagnostic Institute of Economic Research and the president of the International Association for Christian Social Teaching and a member of the Scientific Council of the Vatican Foundation, Centesimus Annus. He published in Polish, among others. «Finances after a heart attack. From financial euphoria to economic order» and «Economic crisis and crisis of values»(together with Simona Beretta).

National Academic Exchange Agency invites Polish universities in 2019 to participate in educational missions

2018-12-28

National Academic Exchange Agency (NAWA) as part of the campaign „Ready, Study, GO! Poland” invites universities and higher education institutions to participate in Polish educational missions in 2019. NAWA in 2019 organizes over a dozen missions. The first one will take place on February 22-23. The International Education Fair will take place in these days in the capital of Georgia, Tbilisi. A month later, on March 25-29, at the Malaysian capital, Kuala Lumpur, NAWA will actively participate in the Asia-Pacific Association for International Education (APAIE) fairs and conferences. The year 2019 will end with the organization of an educational mission in Ukraine, which will take place in November. Registrations for fairs and conferences, which take place in the first half of the year, will be opened before January 11, 2019.

KomPlasTech 2019 - the 26th international conference organized by the AGH University of Science and Technology

2018-12-28

The Faculty of Metal Engineering and Computer Science of the AGH University of Science and Technology in Krakow, in consultation with the AGH UST AGH UST Academics and Graduates Foundation, organizes the 26th International Conference „Computer Methods in Materials Technology - KomPlasTech 2019” from 13 to 16 January in Zakopane. The event is part of the 100-year anniversary of the AGH. The aim of the conference is to present scientific achievements and exchange experiences in the field of representatives of science and industry in the field of IT applications in various fields of metal processing, as well as industrial processes management. More: <http://www.komplastech.agh.edu.pl/index.php>

Scientist of the University of Gdańsk receives Wiktor Kemula Medal

2018-12-28

Professor Piotr Stepnowski from the University of Gdańsk became this year's laureate of the Medal of Wiktor Kemula. The award was granted for outstanding scientific achievements in the field of analytical chemistry. Professor Stepnowski is the head of the Department of Environmental Analysis at the Faculty of Chemistry and Vice-Rector for Science and International Cooperation at the University of Gdańsk. He is a recognized global authority in the field of research and environmental protection. In recent years, his research focuses on the detection and assessment of the effects of residues of pharmaceuticals in the natural environment. Wiktor Kemula Medal is a distinction awarded by the Polish Chemical Society and the Committee of Analytical Chemistry of the Polish Academy of Sciences for outstanding achievements in the field of analytical chemistry. The patron of the award was a chemist considered to be the founder of the Polish school of polarography, the electrochemical analytical method. Professor Kemula was the inventor of the electrode with a hanging drop of mercury.

Student of the University of Opole receives a scholarship from the Lotto foundation

2018-12-28

Nela Lejczak, a fifth-year law student of the University of Opole received a scholarship under the „100 in 100” program, announced by the LOTTO Foundation supported by the Prime Minister. The program is tailored for students who were distinguished by their attitude, commitment and academic performance. 1815 candidates were nominated, of which the top 100 were selected. In addition to the high average of grades, scientific or artistic achievements, it was necessary to demonstrate actions taken to strengthen civil society and the local community. Nela Lejczak is actively involved in associations and volunteering for the sick and people in need from her neighbourhood. For several years

she has been a volunteer and a donor within the program of Noble Parcel and willingly devotes her time to such initiatives.

International projects developed at the University of Silesia in Katowice

2018-12-28

The University of Silesia obtained co-financing of international projects from the National Academic Exchange Agency program: two of them will be carried out with partners from the Czech Republic - Palacky University in Olomouc and Masaryk University in Brno, the third project with the Universidade de Évora in Portugal. The program is to support the mobility of researchers in order to carry out joint research projects. Co-financing is intended to cover the costs of personal exchanges as part of the partners' academic cooperation. The Silesian University with Czech universities will carry out projects: «The role of criminal law in the protection of children's rights in a European perspective with special regard to Polish and Czech legislation» and «Contemporary challenges for international and European law. The Czech and Polish perspectives». Together with the Universidade de Évora in Portugal, the University of Silesia will realize the project «In search of mysticism - new dimensions of spirituality in music, the fine arts and new media of the 20th and 21st century».

Researcher at the University of Wrocław to examine the role of invasive species in the epidemiology of tick-borne diseases

2018-12-28

Dr Joanna Hildebrand from the Institute of Genetics and Microbiology of the University of Wrocław received a grant from the Miniatura program of the National Science Center for the project „Invasive species as hosts of pathogens transmitted by ticks and <dilution effect>”. Thanks to the subsidy, Dr Hildebrand will examine the role of invasive species - the raccoon and Asian raccoon in the epidemiology of tick-borne diseases. Pathogens transmitted to the human body and animals through tick bites cause Lyme disease, babesiosis, anaplasmosis and rickettsiosis. One of the results of research on factors influencing the spread of pathogens is the hypothesis called the „dilution effect” - the incidence of pathogens in the biotope decreases with the increase in the number of animal species that are hosts of ticks and also the reservoir of microorganisms. In this light, a question arises about the assessment of the role of invasive species in the pathogen-vector-host system.

MBA studies for the IT industry at the Polish-Japanese Academy of Information Technology

2018-12-31

The MBA program for the IT industry is a new initiative of the Polish-Japanese Academy of Information Technology (PJATK) in Warsaw and company Microsoft. Applications will be accepted until March 1, 2019. MBA studies for the IT industry of the Polish-Japanese Academy of Information Technology in cooperation with Microsoft, aim to broaden, supplement and systematize knowledge about the IT market in Poland and in the world. The studies are to provide students with modern knowledge in management, company development strategy, analysis and methodology of solving business problems based on the

specifics of the IT industry. The MBA program for the IT industry is addressed to the middle and top management. The condition of participation is completed studies and several years of professional experience. More: <https://mba.pja.edu.pl/>

Professor Alojzy Z. Nowak joins the elite group of economists

2018-12-31

Professor Alojzy Z. Nowak, dean of the Faculty of Management at the University of Warsaw, became a member of the Scientific Council of the Institute of New Structural Economics at the University of Beijing. Professor Nowak joined to 22 outstanding scientists from around the world, with four Nobel Prize winners in the field of economic sciences Prof. Edmund S. Phelps from Columbia University, Prof. Michael Spence from New York University, Prof. Roger Myerson from the University of Chicago and Prof. Christopher Pissarides from the London School of Economics. The Institute of New Structural Economics at the University of Beijing was founded in 2015 on the initiative of Prof. Justin Yifu Lin, former vice president and chief economist of the World Bank, who acts as the leading adviser to the President of China on economic matters. See the Council: <http://www.nse.pku.edu.cn/en/Department/index.html?type=Advisory>

Conference „Foreign students in Poland 2019”

2018-12-31

The annual conference „Foreign students in Poland 2019” will be held on 17-18 January 2019 at the Warsaw University of Life Sciences. The conference will be devoted to current issues of internationalization of Polish higher education, development of mobility of students and researchers as well as promotion of intellectual potential of cities and regions. The organizers of the event are the Conference of Rectors of Academic Schools in Poland, the Warsaw University of Life Sciences and the Perspektyw Educational Foundation. They invite rectors, vice-rectors, deans, directors and specialists from international cooperation offices and promotion offices, as

well as representatives of municipal and provincial self-government authorities to participate in the conference. Conference program: <http://www.studypoland.pl/konferencja2019/program>

University of Medical Sciences in Katowice looking for methods of warming patients in hypothermia

2018-12-31

The University of Medical Sciences in Katowice will implement the project „Assessment of warming efficiency using continuous renal replacement therapy - seeking an effective method of extracorporeal warming of the victims in deep hypothermia”. The research will be financed by the National Science Center as part of the call Miniatura 2. Effective warming of patients in hypothermia is a basic condition for their survival. In Poland, every year, 300-600 people lose their lives due to hypothermia, often in local hospitals and without access to advanced in vitro warming methods. A large part of these facilities, however, have intensive care units and the possibility of continuous renal replacement therapy (CRRT - Continuous Renal Replacement Therapy). The effect of the research is to determine the maximum possibilities of heating patients in severe hypothermia using CRRT devices, determining the optimal heating scheme, as well as reducing the mortality of patients in hypothermia.

Nicolaus Copernicus University in Toruń to receive money for the development

2018-12-31

Over PLN 34 million will be received by the Nicolaus Copernicus University in Toruń for the development of its potential in the field of education programs, raising the competences of employees and students, internship programs, PhD studies and university management. The project «Universitas Copernicana Thorunensis in Futuro II - modernization of the Nicolaus Copernicus University as part of the Integrated Program of the University» assumes adapting education programs to socio-economic needs, organiz-

ing high-quality internship programs and increasing the competitiveness of graduates in the labor market, and creating a pilot model of interdisciplinary PhD studies under the name of the Toruń School of Social Sciences, Education, Science and Technology. As part of the improvement of its management, the university has planned to improve the managerial competences of 2000 teachers, managerial and administrative staff. Money for the implementation of tasks is allocated by the National Center for Research and Development. More: <https://www.umk.pl/wiadomosci/?id=25859>

Student of the AGH University of Science and Technology in Krakow created model of the campus from LEGO pieces

2019-01-02

Maciej Kocot, an IT student at the electronics and telecommunications informatics department of the AGH University of Science and Technology in Krakow, built a model of the AGH campus at the scale of 1: 1250 from LEGO pieces. Maciej Kocot composed the model himself. He worked on the project from April to December 2018. He started with the most recognizable main building (A-0) and the headquarters of the Department of Computer Science (D-17), the building where he spent the most time. Then the Center of Energy was established. The author measured individual campus buildings and calculated their dimensions into blocks, decomposed all segments, changed them to make the effect more accurate and stable. The final building, consisting of several thousand pieces, is placed on a 27 x 81 cm board. See the model of the AGH campus: <http://zbudujmy.to/2018/12/10/agh/>

Jagiellonian University and the University of Lisbon to examine the similarities and differences between Poland and Portugal

2019-01-02

Researchers from the Jagiellonian University in Krakow and the University of Lisbon will study the convergence and differences between the two countries on the example of Poland and Portugal: the citizenship of the European Union (EU), migration issues, populism and the rights of LGBT people. They received a grant of the National Academic Exchange Agency. The project submitted by Dr Ewa Karamad from the Faculty of International and Political Studies at the Jagiellonian University is based on the assumption of some structural similarities between Poland and Portugal, such as the peripheral position in the EU, the role of Catholicism or relatively recent experience of authoritarian governments and significant differences as belonging to Central-Eastern or Southern Europe, the experience of colonialism and the nature of dictatorships in each country. The project will be implemented in the form of seminars with the participation of Polish and Portuguese researchers.

Fokker D.VII aircraft recreated at the Poznan University of Technology

2019-01-02

Aviation enthusiasts from the Poznań University of Technology reconstructed three Fokker D.VII planes. Flying replicas of aircraft captured by Wielkopolska insurgents in December 1918 at the Ławica airport in Poznań were one of the attractions of the picnic on the occasion of the 100th anniversary of the Greater Poland Uprising. In December 1918, Polish insurgents captured 300 German machines in Poznań, which later became the beginning of the interwar Polish aviation and took part in the Polish-Bolshevik war. Aircraft replicas weigh about 400 kg (the original weighed 540 kg). They differ in the covering materials - the originals were made of impregnated flax, a replica is made of polyethylene

material. Airplanes were equipped with electronics, avionics and engines based on Volkswagen elements, and also machine-gun mimics. The propellers have been ordered from a specialist manufactory. The machines form the Greater Poland Squadron of Freedom. It is a project supported by the Poznan University of Technology, the voivodship self-government, and the Polish Motosport Association.

University of Silesia in Katowice to implement the project „One University - Many Opportunities Integrated Program”

2019-01-02

The University of Silesia in Katowice has received over PLN 39 million from the National Center for Research and Development for the project „One University - Many Opportunities. Integrated Program „.. The implementation of the project will contribute to the development of the university - including by implementing changes in the management of the educational and organizational process, and thanks to the multifaceted activities planned under the project, it will strengthen the professional, communication, analytical and language competences of students. The project will allow to increase the competences of the academic and teaching staff as well as the administrative and managerial staff, it will also give the opportunity to implement IT management tools or create open educational resources. Thanks to co-financing, the university plans to include valuable lecturers from abroad in conducting classes, as well as organizing study visits and internships for students and research and teaching staff.

Wrocław University of Technology to invite students

2019-01-02

Until February 9, Wrocław University of Technology continues winter recruitment for studies. Over 3.5 students can apply for places in 56 programs, including 19 in English courses. A new course is Big Data Analytics in the Department of basic technical problems. It is an interdisciplinary and unique in Poland course combining physics, computer science and mathematics. Graduates will be prepared to work in teams dealing with the analysis of big data resources. Candidates who choose environmental protection technologies at the environmental engineering faculty will have the opportunity to study a new specialty - environment biotechnology. The studies will provide practical use of bioengineering achievements in environmental protection, ensuring comfort and high quality of life by respecting nature. More: <http://rekrutacja.pwr.edu.pl/>

„Partnership for Innovation” conference to be held at the Krakow University of Technology

2019-01-03

The Technology Transfer Center of the Krakow University of Technology together with the American Chamber of Commerce in Poland invites participants to the conference „Partnership for Innovation” on January 15. The conference is to summarize the «Incubator of Innovation +» project, under which 16 pre-implementation works were selected at the Krakow University of Technology in spring 2017 within the TRL + competition. The Investment Committee of representatives of science and business chose projects with the highest implementation potential. The event will also be an opportunity for scientists from Krakow to establish direct contacts with representatives of American and Polish companies interested in the commercialization of their solutions.

Foundation for Polish Science settled the competition for external scholarships

2019-01-03

The Foundation for Polish Science has settled the next competition within the program „Outbound Scientific Scholarships” (WSN) - an additional offer for the laureates of the MASTER program. The scholarship may be used for a trip to a prestigious foreign research center in order to conduct research work for up to six months. This time, the winners in the competition for a visiting scholarship are Prof. Leszek Koczanowicz from the Wrocław Branch of the Faculty of Social Sciences and Humanities at the University of Humanities and Social Sciences in Warsaw, who will travel to Uppsala University. Department of Government in Sweden and Prof. Maciej Ogorzałek from the Faculty of Physics, Astronomy and Applied Computer Science of the Jagiellonian University in Krakow, who intends to leave for a 6-month research stay to the Swiss Federal Institute of Technology Lausanne in Switzerland.

Program developed at the Warsaw School of Economics helps to make decisions

2019-01-03

The SilverDecisions program developed in the Decision Support and Analysis Department of the Warsaw School of Economics (SGH) was included into the Innovation Radar program by the European Commission. The SilverDecisions program is used to support decision making using the decision tree method and is a graphical presentation of the relationship between successive actions and the possible consequences of these actions, and enables the analysis of uncertainty accompanying the decision-making process. Today the program is used by law firms in the US to translate the potential results of various activities to clients and doctors to illustrate possible treatment scenarios for patients. The software is also used at universities for scientific and didactic purposes. The user community has exceeded 60,000 in over 150 countries. Currently, it is the only fully free and

open software of this type in the world with such advanced functionality. More: <https://www.innovationradar.eu/innovation/29875>

Wrocław University of Technology to launch two new laboratories

2019-01-03

Two new laboratories have been created in the department of basic problems of technology at the Wrocław University of Technology to conduct cancer cell research. The Biopharmaceutical Laboratory in Nanoscale will run microscopic examination of tissues and biomaterials, research on cancer cells and changes of DNA under the influence of physical and pharmacological factors. The laboratory has been equipped with an atomic force microscope, which allows obtaining an image with a resolution of the order of the dimensions of a single atom and to test single DNA strands. The Laboratory of Biomedical Measurement Techniques will allow for research related to the use of optical techniques for measuring various types of objects. In the laboratory the scientists will use a confocal microscope to determine cellular parameters by fluorescent methods in living and fixed cells. More: <http://pwr.edu.pl/uczelnia/aktualnosci/nowoczesny-sprzet-i-stozwojowe-badania-nowe-laboratoria-na-w11-11061.html>

University of Silesia in Katowice receives almost 700,000 PLN from the Welcome to Poland program

2019-01-03

The University of Silesia will implement two projects under the program „Raising the competences of academic staff and the potential of institutions in accepting people from abroad - Welcome to Poland“. The projects are to contribute to increasing the level of internationalization, improving the competences of project participants, as well as creating an open space, accessible and friendly to students. The first project of the «University of Silesia - facilitating navigation at the University of Silesia for foreigners» is addressed to people directly involved in foreigners' service, as well as students and foreign staff coming for teaching, educational or scientific purposes. The objective of the second project - «Preparation of the administrative staff for the implementation of an effective process of adaptation of foreign students at the university» - is shaping the attitudes of openness and organizational preparation of the university to increase accessibility among administrative officers. More: <https://www.us.edu.pl/prawie-700-tys-na-instytucjonalne-przygotowanie-uczelnia-do-przyjowaniem-studentow-i-kadry-z-zagranic>

Scientific Award of the Polish Academy of Sciences for a Poznań scientist

2019-01-03

Dr Michał Klichowski from the Adam Mickiewicz University in Poznań received a scientific prize from the Faculty of Humanities and Social Sciences of the Polish Academy of Sciences (PAN) for the book „Learning in CyberParks. A theoretical and empirical study“. - The considerations in the book revolve around constitutive concepts for the idea of learning in CyberParks. Theoretical analysis, however, led to a surprising discovery: one of the latest concepts of neuroscience, the concept of double-task costs, suggests that this type of learning may not only be inefficient, but also in some way dangerous for stu-

dents. To clarify this issue, I carried out two experiments in the paradigms of cognitive neuroscience, whose assumptions and results were presented in the second, empirical part of the book. The PAN scientific prizes are awarded for outstanding and creative works published in the four years preceding their granting.

National Academic Exchange Agency to launch the Lektor Program

2019-01-04

The National Academic Exchange Agency (NAWA) has launched recruitment for the Lektor Program. NAWA is planning that lectors will contribute to the promotion of Poland through the teaching of Polish language. The Agency invites all teachers of Polish as a foreign language who are interested in working in a foreign academic centers to participate in the program. As part of the program, the lector prepares and conducts courses of the Polish language as a foreign language; prepares and conducts classes to disseminate knowledge about Poland, its culture and history; maintains contacts with Polish diplomatic missions, cultural institutions and business representatives and other entities in order to offer the participants of the classes the broadest possible and most attractive set of activities enabling to learn about Poland and the Polish language. More: <https://nawa.gov.pl/images/users/629/Regulaminy-Programu-Lektorzy-2019-20.pdf>

Seminar on Crisis, Migration and Affective Tuning in Iceland to be held at the University of Lodz

2019-01-04

On Thursday, 17 January 2019, the Institute of Ethnology and Cultural Anthropology of the University of Lodz invites participants to the seminar „Crisis, migration and affective tuning in Iceland“. The seminar will be led by Dr Marek Pawlak, anthropologist at the Institute of Ethnology and Anthropology of the Jagiellonian University in Krakow. He will present changes in the Icelandic political economy and

the socio-cultural transformations of the country, triggered by neoliberalism. The participants of the meeting will also learn how the newly created subjectivity of the 90s prepared a fertile ground for the crisis in 2008 and its consequences.

„ Week of Law State at the Jagiellonian University“

2019-01-04

From January 14 to January 25, 2019, the „ Week of Law State at the Jagiellonian University“ will take place in Krakow. Organizers of the event will answer the following questions: Is the idea of the rule of law necessary for the functioning of a democratic state? What is the Polish dispute over the rule of law? How is the idea of the rule of law changing in other countries and in the European Union today? On January 14, participants will listen to the lecture of Prof. Andrzej Grabowski entitled «The theory of a constitutional state of law: a paradigm shift?». The last of 6 lectures will be a paper of Prof. Fryderyk Zoll «Can civil law fulfil its role without a state of law?» which will be delivered on January 25.

Silesian University of Technology to announce a competition for the application of computational techniques in thermal technology

2019-01-04

The Institute of Thermal Technology of the Silesian University of Technology together with industrial partners announced a nationwide competition for the best master's thesis on the application of calculation methods for the simulation of thermal processes. The aim of the competition is to promote students' achievements in the field of application of computational techniques in the wider thermal technology. This year's competition is limited for the master's theses and outstanding engineering works defended between 1 January and 31 December 2018. The theses can be written in Polish or English. The deadline for applying is 30 January. The winner of the competition will receive approx. 3 thousand PLN, the second place - 2 thousand PLN, and next three places will be rewarded with the amount of approx. PLN 1,000. Thanks to the presence of representatives of industry and software companies in the jury, information about the best works and their authors will be shared with potential employers. More: <http://www.itc.polsl.pl/index.php?lang=en>

University of Gdańsk joins the consortium „European University of the Seas”

2019-01-04

Representatives of the University of Gdańsk and five other European universities have signed a declaration of participation in the „European University of the Seas” initiative (SEA-EU), which aims to obtain funding for the creation of a European university. The SEA-EU consortium, along with the University of Gdańsk, includes: Universidad de Cádiz (Spain) - leader; Sveučilište u Split (Croatia); Université de Bretagne Occidentale (France); Christian-Albrechts-Universität zu Kiel (Germany) and L-Università ta Malta. The idea of establishing European univer-

sities has been initiated by member states of the European Union (EU), the Council and the European Commission. By 2024, about twenty European universities are to be established, which will form a basic university network in the EU, enabling students to obtain academic degrees by combining studies in EU countries and thus contributing to the increase of international competitiveness of European universities.

Polish and Austrian scientists to investigate the use of drones in agriculture

2019-01-04

Researchers from the Koszalin University of Technology and the University of Natural Resources and Life Sciences in Vienna will explore the using drone in the application of pesticides and fertilizers. The partners obtained co-financing from the call for bilateral exchange of the National Academic Exchange Agency. The project concerns the benefits of the use of agricultural drones in the application of pesticides and fertilizers. The Koszalin scientists conduct research together with partners from the University of Natural Resources and Life Sciences in Vienna. The Austrian university specializes in the sciences of agriculture, wood and natural fibers, forest management, hydrology, spatial management, environmental protection and landscape architecture.

100th anniversary of AGH University of Science and Technology to be celebrated in Krakow

2019-01-07

In 2019, the AGH University of Science and Technology in Krakow celebrates the 100th anniversary of the university. The Krakow academy has prepared many events to mark the jubilee. The charity concert «Together for children - 100 years of AGH-UST» will be held on February 7. On April 8, an exhibition on the history of the founding of the Mining Academy will be opened. Exactly that day in 1919, the Council of Ministers of Poland adopted a resolution on the establishment of the Mining Academy in

Krakow. In May in the Silesian Beskid Mountains, the 100th AGH Anniversary the Stars Ride and the Brainstorm will take place to show the most interesting student projects awarded in contests. From June 13 to 15, the 4th World Congress of Polish Engineers is planned, and on October 18-19 the Main Celebrations of the Jubilee and the World Congress of AGH UST Graduates will take place.

Conference „Fear of strangers and hostility”

2019-01-07

The conference “Fear of strangers and hostility” will take place on 11 January 2019 at the University of Warsaw. The main topic of the conference will be relationship of Polish students to foreigners studying at universities in Poland. The meeting is to show positive aspects of cooperation between people of different cultures, as well as encourage openness and establish friendly contacts with foreign students. Co-organizers of the event are the Commission for Communication and Social Responsibility of the Conference of Rectors of Academic Schools in Poland and the Marek Dietrich Institute for the Problems of Contemporary Civilization. Conference programme: <https://uksw.edu.pl/images/konferencje/program-konferencji-lekprzedobcymi.pdf>

Largest universities in Poland to receive almost PLN 300 million

2019-01-07

In total, nearly PLN 300 million will be received by 10 largest academic centers in Poland from the National Center for Research and Development. Funds granted under the third Integrated University Programs are to be used to improve the level of education at Polish universities - said Deputy Prime Minister and Minister of Science and Higher Education Jarosław Gowin. The Integrated University Programs consists of three calls, so-called paths with estimated total budget amounting to PLN 1 billion. In the results of the «third path» the largest universities have been eligible for receiving the funding. The best assessment in the call was received by the University of Lodz for its project «Student's Power - a comprehensive university development program». It will cover a total of approximately 4,300 people, including 130 representatives of university staff.

Warsaw University of Technology begins the construction of the PW-Sat3 satellite

2019-01-07

- We are currently commencing the construction of the PW-Sat3 satellite at the Faculty of Power and Aeronautical Engineering of the Warsaw University of Technology. It will be developed by the next generation of students - announces the deputy coordinator of the PW-Sat2 project, Dominik Roszkowski. Within 4 weeks the PW-Sat2 satellite carried out all the planned tasks. The success of the mission proves that the technology of the deorbitation sail developed by students from Warsaw can help solve the problem of space debris that may damage probes, ships, as well as the International Space Station. The unfolding of a deorbiting sail made of a mylar film 10 times thinner than the human hair was the main task of the satellite. During the mission, it was also possible to take the first Polish satellite image of the Earth. The photograph shows southern Sweden, clouds over Norway, a

fragment of the North Sea and the Baltic Sea. See photos from the PW-Sat2 satellite: <https://radio.pw-sat.pl/gallery>

PhD student at the University of Rzeszów becomes a laureate of the International Competition „Current Science”

2019-01-07

PhD student at the Institute of History at the University of Rzeszów, MA Piotr Olechowski took the second place in the 11th International Oleg Ken's Competition „Current Science”. He was awarded for the work „Beginnings of activity of the Consulate General of the Republic of Poland in Kiev after the Second World War (1947-1949)”. International Oleg Ken's Competition «Current Science» has been organized for 11 years by the Polish Institute in St. Petersburg, the local History Institute of the Russian Academy of Sciences, and the Center for Polish-Russian Dialogue and Understanding in Warsaw. The competition is addressed to students, PhD students and young scientists from academic units from Poland, Russia and other countries, researching issues related to the Soviet Union. Piotr Olechowski is the only Polish winner of this year's competition. Researchers of the Adam Mickiewicz University awarded by the Prime Minister

2019-01-07

Two scientists from the Adam Mickiewicz University in Poznań received the Prime Minister's prizes for outstanding artistic, scientific and technical achievements and PhD dissertations. Professor Zdzisław Wąsik received an award for his contribution to the development of the theory of knowledge about

language as a sign system functioning in discursive conditions. He deals with the epistemology of linguistics, the issue of sign and meaning in nature and culture. His scientific achievements include dissertations in the typology of Indo-European language syntax. Dr Adam Paweł Gorczyński received the award for «New self-organizing metalosupramolecular networks». The work concerns the design and synthesis of functional metalosupramolecular networks, can be used in solving global problems by their magnetic, electrochemical or biological properties.

University of Bydgoszcz to carry out the project „In good terms with nature”

2019-01-07

The Faculty of Natural Sciences of the University of Kasimir the Great (UKW) in Bydgoszcz will receive over 600,000 PLN for the implementation of the project: „In good terms with nature”. The money is allocated from the call of the National Center for Research and Development. As part of the project, educational classes will be conducted in the laboratories and lecture halls of the faculty of natural sciences at the university as well as in the UKW Botanical Garden for pupils from 7th and -8th classes of elementary and post-primary schools. During the implementation of the project, the Faculty will host a total of 450 pupils, also from the Louis Braille school in Bydgoszcz. In addition to classes in specialized laboratories, the Garden of Herbal Plants will be established in the Botanical Garden, which will be specially designed with selected species of plants to experience the nature with many senses.

Word „Konstytucja” wins in the plebiscite on „Word of the Year”

2019-01-08

The noun „Konstytucja” (Constitution) won the internet voting on the competition for the „Word of the Year” organized by the University of Warsaw and was also selected by the jury of linguists. As much as 69.02 percent Internet users voted for the word „Konstytucja”. The second place was taken by the noun «dane»(data) with 5.71 percent of votes, and the third - independence (4.26 percent). «The Constitution was not the most popular word of any of last months, but the graph of the key characteristics of this word from January 1 to December 31, 2018 indicates that it was an expression present in the public discourse throughout all that time” – comment the scientists from the University of Warsaw.

Online application for studies at the Krakow University of Technology to begin

2019-01-08

Online registration for full-time and part-time studies at the Krakow University of Technology (PK) and part-time first-cycle studies at the Mechanical Department of the CP will be launched, on January 21, 2019. This year, Krakow University of Technology for the first time gives the opportunity to apply online for part-time first-cycle studies offered by the Faculty of Mechanical Engineering. Candidates will be able to choose such majors as: automation and robotics, energetics, security engineering, production engineer, mechanics and machine construction as well as transport. Internet application will start on January 21 and will last until February 4. More: <http://rekrutacja.pk.edu.pl/>

Szczecin scientist to receive Award of the Minister of Science and Higher Education

2019-01-08

Dr Andrzej Potemkowski, Prof. University of Szczecin (US) received the award of the Minister of Science and Higher Education for the organization of „Inter-

university Conference Day of the Brain”. The conference has been organized by the Department of Clinical Psychology and Psychoprophylaxis of the Institute of Psychology, together with the Department of Psychiatry of the Pomeranian Medical University, the Regional Medical Chamber, Szczecin's departments of the Polish Neurological Society and the Polish Psychiatric Association and the Cogito Association from 2012. It includes the series of lectures and research in the field of neuroscience. The Minister of Science awards are granted annually for outstanding scientific results, individual and collective didactic achievements and organizational successes made in the past year. 69 representatives of the universities received them in the competition this year.

Maritime University of Gdynia to receive almost PLN 12 million

2019-01-08

Gdynia Maritime University has been the laureate of a pilot call of the Ministry of Science and Higher Education „Regional Initiative of Excellence”. The university obtained a grant of PLN 11.87 million under the decision of the Minister of Science and Higher Education - Jaroslaw Gowin. Thanks to the funding, the university will carry out the project «Development of the research base and scientific achievements of the employees of the Electrical Department of the Maritime University in Gdynia» from January 1, 2019 to December 31, 2022. The project will provide academic teachers with trainings, access to scientific databases, instrument grants, small research grants, conference grants, professor subsidies, habilitation scholarships and employment financing for new research workers.

Popular science lectures to be held at the Astronomical Observatory of the Adam Mickiewicz University

2019-01-08

The Institute of Astronomical Observatory of the Adam Mickiewicz University in Poznan invites participants to a series of popular science lectures in

2019. Interesting issues in the field of astronomy will be delivered by university scientists. The lectures will be held once a month, twice a day. Admission is free, but advance booking is required. After each lecture, the visit the Observatory is planned to use the telescopes and observe the sky. Proposals and dates of lectures for the first half-year: on January 18 - 100 years of the Astronomical Observatory in Poznań; February 15 - About women looking at the sky; March 15 - A giant among giants; April 12 - About baobabs and the Little Prince, or what hides the asteroid; May 10 - Solar eclipse in 1919. a General Theory of Relativity and June 14 - «A small step for man, but a big leap for humanity» More: <http://www.astro.amu.edu.pl/popularyzacja/wo/>

Lublin University of Technology to support high schools in the Balkans with education on road safety

2019-01-09

Researchers from the Lublin University of Technology together with scientists from 15 universities from European Union countries will help high schools in the Balkans. Cooperation concerns road traffic safety, reducing the number of accidents and the number of people injured and killed on the roads. It will be possible thanks to the development of an appropriate transport education program. - It is a great honor for us. Our achievements in educating specialists in the field of modern land transport were appreciated - says Prof. Paweł Drożdźiel, project coordinator at the university, head of the Transport Department at the Lublin University of Technology. Our scientists will act as experts in the field of transport engineering, traffic engineering and analysis of transport systems - adds Prof. Drożdźiel.

Agreement between Collegium Civitas and the Mikromakro Institute Foundation

2019-01-09

Collegium Civitas in Warsaw and the Mikromakro Institute Foundation have decided to combine their activities within Collegium Civitas Research Center (OBNP) in order to draw public attention to the necessity of substantive debate about civilization, environmental changes and taking up challenges related to them. The center will investigate factors that change the world in human perception, affect the natural environment and shape technological megatrends. The motto of OBNP is: human - environment - technology. Sławomir Kosieleński, the president of the board of the Mikromakro Institute Foundation, became the director of the Center.

New international projects of the Warsaw University of Life Sciences

2019-01-09

In December 2018, scientists from the Warsaw University of Life Sciences received funding for four international projects. Two projects «Effective and sustainable supply of agro-environmental and climatic public goods through European Union agriculture» and «Innovative system of processing food on a reduced scale» have received financing under the Horizon 2020 program. Also, under the ERA-NET program, the project «Using potato-microbial interaction for the development of sustainable breeding and production strategies» was co-financed. Within the framework of bilateral cooperation between Poland and South Africa, project «Application of phylogeographical and metagenomic methods in estimating the impact of invasive Australian acacia species on the rhizobium community in the Mpumalanga and KwaZulu Natal Provinces in South Africa» received financing.

Researchers of the University of Life Sciences in Wrocław to participate in the Mozart program

2019-01-09

Two scientists from the University of Life Sciences in Wrocław - Prof. Agnieszka Noszczyk-Nowak and Prof. Michał Dzięcioł - will carry out projects within the Mozart project together with Wrocław companies. Professor Noszczyk-Nowak together with a veterinary clinic Neovet will deal with the development and implementation of cardiological examination schemes in dogs and cats undergoing chemotherapy. Professor Dzięcioł and the company Inter Technologie will conduct joint research on the possibility of using chemical and semiochemical volatile substances in modulation of human behavior. The Municipal Program of Supporting the Partnership for Higher Education and Science and the Business Activity Sector «Mozart» connects Wrocław scientists and the companies. The company gets the opportunity to benefit from the intellectual potential of the researcher and use its specialist knowledge for the development of the company, and the scientist gets the opportunity to work in a business environment and use knowledge in practice. More: http://www.glos.upwr.edu.pl/aktualnosci/48837/mozart_wspolpraca_naukowcow_z_wroclawskimi_firmami.html

Students of the Silesian University of Technology advanced to the second stage of the Global Management Challenge

2019-01-09

The team of students of the Silesian University of Technology „Golden Eye” advanced to the second stage of the 19th largest business simulation in the world - Global Management Challenge 2018/2019 (GMC). In GMC, teams of three to five people run companies competing on the virtual market. In the first stage of the simulation, 155 teams took part. They competed for five weeks for the highest invest-

ment result of their companies. 60 teams qualified for the next stage. In the advanced training program GMC uses gamification- the use of mechanisms from computer games in business. The simulation gives the opportunity to take on the role of the board of directors and conduct the company for the next quarters in the virtual market. GMC is the only competition in Poland in which students compete with employees of companies in management. It has been organized since 1980 in the form of nationwide on-line competitions. The initiative has already gathered over half a million participants worldwide.

Adam Mickiewicz University in Poznan is the greenest university according to the „Green Metric” ranking

2019-01-09

University Adam Mickiewicz in Poznań for the second time was recognised as the best Polish university in the international ranking of World University Ranking „Green Metric”. The Poznań University took 160th place for 719 higher schools in the world. The list takes into account the educational programs and infrastructure investments, the issue of waste management, including toxic ones, water and energy saving solutions, space management - including green innovations and development of paths for pedestrians and cyclists on campuses. Poznań University also took a high - 70th place in the category of city campuses. The world leaders are the Dutch University of Wageningen, University of California Davis, and English universities: Oxford University, Nottingham Trent University and University of Nottingham. More: <http://greenmetric.ui.ac.id/overall-ranking-2018/>

Forum of Polish Universities at the University of Bialystok

2019-01-10

Members of the Polish Universities Forum will meet on 11-13 January at the University of Bialystok (UWB). The congress is organized by the Student Parliament of the largest university in the Podlasie region. The topic of the discussion will include reform of higher education and the role of students in the process of implementing the Law on Higher Education and Science. The Forum of Polish Universities is an autonomous organization of the student self-governments of universities associated in the Conference of Rectors of Polish Universities. It is a commission of the Students' Parliament of Poland. The discussions will be held on the campus of the University of Bialystok. The most important point of the congress will be the selection of the new authorities of the Polish Universities Forum.

University of Toronto to offer scholarships to humanities students

2019-01-10

Polish Language and Literature Program conducted by the University of Toronto offers the call for applications for short-term scientific internships. As the National Academic Exchange Agency informs, during the Canadian trip scholars will have the opportunity to use the library resources of the University of Toronto, as well as take part in the intellectual life of the university. Joanna DeMone's scholarship is addressed to humanists who are completing their PhD or master's studies at Polish universities. Until February 28, they can submit applications for a 12- or 24-week stays. The visit may take place from mid-September 2019 to mid-May 2020. The offered scholarship covers the cost of living, university fees, including health insurance. The amount of the scholarship will depend on the length of stay. More: <https://nawa.gov.pl/images/users/629/JoannaDeMone-IVGS-Ogloszenie.pdf>

Center of Information Technology to offer new opportunities for talented IT specialists

2019-01-10

The Center of IT is starting a grant program financed by the Digital Poland Project Center, under which IT classes will be created for over 12,000, especially gifted primary and secondary school students. As part of the Information Science Center, 1,500 mentors, teachers, medallists of school competitions and finalists of IT competitions will create curricula and implement them during the activities of IT circles. The Center of Information Technology will facilitate the economic development and the creation of innovative solutions for the economy. The goal of the project is to build a permanent system of identifying IT talents. This will be served by creation an advanced program for raising the knowledge and competences of people conducting classes. The project is supported by the Technical University of Lodz (Lead Partner of the Project), Wrocław, Gdańsk, and Warsaw Universities as well as the Krakow AGH University of Science and Technology.

Researchers at the Adam Mickiewicz University in Poznań to research the Indian film industry

2019-01-10

University researchers of Adam Mickiewicz University in Poznań have won the EQUIP (EU-India Platform for Social Sciences and Humanities) competition for international research projects in the humanities and social sciences implemented in cooperation with India. Professor Krzysztof Stachowiak and Dr Marcin Adamczak will research the relationship between space and spot in the film and the role that the film industry plays in creating cultural and economic ties between India and Europe. Researchers will analyze the locations in which Indian films are produced, and the social and economic impact of the Indian film industry on these locations. The research consortium includes: University of Basel (Switzerland), Novia University of Applied Sciences (Finland), Research Center of the Slovenian Academy of Sciences and

Arts (Slovenia), Jawaharlal Nehru University (India). More: <http://igsegp.amu.edu.pl/filmind/>

PhD student at the University of Szczecin to receive annual scholarship

2019-01-10

A PhD student at the University of Szczecin, Monika Zięciak became a scholarship holder of the Polish-American Freedom Foundation in the academic year 2018/2019. In the competition for the scholarship she defeated 70 candidates from various universities in Poland. The title of the awarded dissertation is «Independence of the juveniles of Youth Educational Centers». The work is created under the supervision of Prof. Barbara Kromolska. The aim of the «Bridging Scholarships Program» is to encourage outstanding PhD students to develop and deepen their knowledge and contribute to the education and knowledge in Poland. The program is one of the largest non-governmental scholarship initiatives in Poland. Its partners are currently: the Polish-American Freedom Foundation, the National Bank of Poland, the Rural Development Foundation, the BGŻ BNP Paribas Foundation, and a consortium of nearly 90 local non-governmental organizations.

6th International Consumer Conference in Katowice

2019-01-10

The Faculty of Law and Administration of the University of Silesia, the Association of Consumer Ombudsmen and the Foundation for the Faculty of Law and Administration of the University of Silesia *Facultas Iuridica* invite participants to the 6th International Consumer Scientific Conference „Consumer Accident Investigation. A new order for consumers”. The conference will be devoted to consumer rights and issues related to new legal regulations in this area. Participants will have the opportunity to discuss practical and theoretical protection of consumers, exchange experiences and undertake domestic and foreign cooperation. The conference will take place on February 28 and March 1 at the Faculty of Law and Administration of the University of Silesia (Katowice, 11B Bankowa, Auditorium No. 7) and at the Arena Hotel (Tychy, General de Gaulle 8).

Drone of the Lodz University of Technology to study the air quality in the city

2019-01-11

The drone of the Lodz University of Technology (PŁ) since February will begin to regularly examine the air quality over the city and the pollution. This is the result of the work of Dr Eng. Robert Cichowicz from the Department of Civil Engineering, Architecture and Environmental Engineering, which last year began the implementation of the project under the name «Spatial analysis of changes in the state of air pollution in the Łódź agglomeration». The Łódź University allocated PLN 140,000 for the project. Equipped with specialized equipment, drones will investigate nitrogen oxides, carbon monoxide, carbon dioxide and other substances that appeared in the air from boiler rooms, combined heat and power plants, coal-fired ovens, oil and gas boilers as well as from car exhaust fumes. In addition, it will check the amount of ozone in the air.

World Logics Day to be held at the University of Warsaw

2019-01-11

This year, the World Logic Day will be celebrated for the first time at the University of Warsaw (UW). The Institute of Philosophy of the University of Warsaw invites students to participate in open lectures held as part of the event „World Logics Day at the University of Warsaw” on January 14. The aim of the event is to mark the role of logics among other sciences and in social life. The initiator of the World Logic Day is Prof. Jean-Yves Beziau from the University of Rio de Janeiro, organizer of congresses devoted to various aspects of logics. He chose the date of January 14, because it is a day associated with the life of world-renowned logicians who became patrons of the event: Polish Alfred Tarski (118th anniversary of birth) and Austrian Kurt Kapel (41st death anniversary). There are currently 29 universities in different parts of the world involved in the World Logic Day.

Researchers of the Nicolaus Copernicus University in Toruń exploring the medieval port of Puck

2019-01-11

Researchers from the Department of Underwater Archeology of the University of Nicolaus Copernicus in Toruń are investigating the remains of the early medieval port in Puck. Their work is carried out as part of the European Virtual Arch project „Visualize to Valorize” financed from the Interreg Central Europe program. Apart from the University of Toruń and the City Hall in Puck, Croatia, the Czech Republic, Austria, Italy, Slovakia, Slovenia and Germany take part in the project. The undertaking assumes the popularization and dissemination of knowledge about the archaeological heritage. The implementation of this goal is based on the use of virtual and augmented reality methods, which are increasingly popular tools for the presentation of unreachable spaces, including the remains of past landscapes and archaeological sites. More: <https://www.umk.pl/wiadomosci/?id=25867>

Wrocław University of Environmental and Life Sciences to implement the „BioSciUniversity” project

2019-01-11

Wrocław University of Environmental and Life Sciences has been included in the group of 19 Polish universities, which received funding under the competition of the Minister of Science and Higher Education „Strategy of Excellence - University of Research”. 700 thousand PLN has been allocated for the project «BioSciUniversity», which aims to improve the quality of university management, including the introduction of organizational changes, allowing to increase the international importance of the University's activities. The most important tasks of the project are raising the international recognition of the academic activity of the university by selecting Leading Research Teams, strengthening research cooperation with high-reputable research centers; improving the quality of education of stu-

dents and PhD students, in particular on faculties and scientific disciplines related to priority research areas, and preparation of comprehensive solutions for the professional development of university staff.

Scientific conference on the social role of the film to be held in Katowice

2019-01-11

The University of Silesia in Katowice and the SWPS University invite participants on April 4th and 5th to the third national scientific conference „Film psycho-tropy”. The motto of this year's meeting is „The Social Role of the Film”. The program includes thematic sessions, a student and poster sessions, lectures of invited experts, a discussion panel with the participation of researchers, practitioners and creators, as well as certified workshops for teachers. The meeting will be an opportunity to exchange experiences and good practices. The conference is addressed to a wide range of researchers from various disciplines, PhD students of various fields of study, teachers, school pedagogues and psychologists, people using film in education, prevention and therapy, filmmakers, as well as film enthusiasts.

Children's channel Nickelodeon together with the Warsaw University of Technology to teach children programming

2019-01-14

On 4-8 February 2019, the broadcaster of the children's television channel Nickelodeon in cooperation with the Institute of Automation and Applied Computer Science, Warsaw University of Technology is organizing a winter holiday course of programming for children in Warsaw. During the workshop, children in two age groups: 8-11 years and 12-15 years will learn programming skills including creating websites, applications and games under the supervision of specialists and educators. Children can participate in trips to the Warsaw University of Technology and to the Copernicus Science Center, spherical cinema, workshops and relaxation exercises with elements of yoga for children. Applications can be submitted on the website: www.nick.com.pl/technickcamp

State Higher Vocational School in Krosno to obtain the right to conduct MA studies

2019-01-14

The State Higher Vocational School (PWSZ) in Krosno received the right to conduct MA studies. The decision of the Minister of Science and Higher Education was preceded by a positive opinion of the Polish Accreditation Committee. The right responds the needs of the regional economy, looking for well-trained specialists prepared to work in production and service plants, research centers, design and advisory companies – emphasized Prof. Zbigniew Barabasz, Vice-Rector for the development of the State Higher Vocational School in Krosno. The first students in the field of production engineering will start their education in February. As part of this course, the university will run three specialties: Integrated manufacturing systems, Quality, environment, occupational safety and health in the enterprise, and IT systems in production engineering. Graduates will obtain a master's degree in engineering.

University of Rzeszów to launch Interdisciplinary Center for Preclinical and Clinical Research

2019-01-14

Within two years, the University of Rzeszów will launch a new facility to carry out experiments on animals, including pigs, mice, rats and rabbits. The research will be conducted by the biotechnology department. The University of Rzeszów signed an agreement on co-financing the project under the name «Interdisciplinary Center for Pre-clinical and Clinical Research» with the Podkarpackie Voivodship Board. The project will be co-financed from the European Regional Development Fund and will be implemented within a scientific consortium with the University of Warmia and Mazury in Olsztyn from March 2019 to April 2020 under the Regional Operational Program of the Podkarpackie Voivodeship for 2014-2020. - Basic, applied, preclinical and clinical research will be carried out at the facility. Research will be carried out on pigs, mice, rats and rabbits - adds Dr. Maciej Ulita, spokesman press of the Rzeszów university.

Cardinal Stefan Wyszyński University becomes the leader of the project „Closer to the patient”

2019-01-14

One thousand pharmacies will take part in the pilot project “Closer to the Patient”. The project leader is the Medical Department of Collegium Medicum of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw. The aim of the project is «validation of the pharmaceutical service». The project «Closer to the patient» is a program of three-step intervention of a pharmacist in a pharmacy to reduce the mortality of patients from non-adherence causes of drugs in atrial fibrillation. The project is carried out by scientists of the Cardinal Stefan Wyszyński University together with scientists from the Medical University of Gdańsk and the Collegium Medicum of the Nicolaus Copernicus University in Toruń. The research methodology was prepared by Dr Regis Vailancourt from a hospital in Ottawa along with a team of the best clinical pharmacists in Canada.

Graduate of the Medical University of Wrocław honored for her master's thesis

2019-01-14

Justyna Paleczny, graduate of medical analysis of the Medical University of Wrocław, was awarded in the National Competition for her Master's Thesis in the field of medicine in 2018. In the paper «Evaluation of the usefulness of the Solid-Phase Micro Extraction technique for differentiation between methicillin-resistant and methicillin-resistant staphylococci», she checked whether on the basis of differences in volatile metabolite profiles, staphylococcus aureus is sensitive to methicillin and can be distinguished from strains resistant to this antibiotic. In her research she used the fast and cheap Solid Phase MicroExtraction (SPME) method. In today's methods used for the diagnosis of sepsis, the waiting time for the result is up to 72 hours. The SPME method can shorten this time up to 2 hours after collection. Such a faster diagnosis reduces the patient's death risk and limits the use of antibiotics with a broad spectrum of activity.

Researcher at the Medical University of Gdansk receives the Education Star

2019-01-14

Dr Sławomir Wójcik, assistant professor at the Department of Anatomy and Neurobiology and head of the Recruitment Department at the Medical University of Gdańsk became the laureate of the competition „Internationalization Stars 2019” organized by the Educational Foundation „Perspektywy”. He won in the Star of Education category - Teaching Star. The laureate has been involved in the internationalization of universities and science in Poland for over 15 years. The area of his activities includes national and international communication, recruitment for Polish and English studies, teaching at the level preparing for higher education (anatomy and neurobiology) and preparation for recognition exams. The aim of the competition is to award and promote people with outstanding achievements in the internationalization of Polish universities. Applications for awards can be submitted by universities, student organizations, university employees and students.

Scientists of the University of Life Sciences in Wrocław to receive grants within Miniatura 2

2019-01-14

Scientists of the Wrocław University of Environmental and Life Sciences have obtained grants from the Miniatura 2 program. They will receive a total of 150,000 PLN from the National Science Center. The aim of the Dr Aleksandra Grudniewska's project is the use of natural deep eutectic solvents (NADES - natural deep eutectic solvents) to isolate bioactive compounds, mainly flavonoids from by-products of the brewing industry. Dr Tomasz Janek will try to explain the mechanisms of action of metal complexes with lipopeptide biosurfactants produced by bacteria of the genus *Pseudomonas* and *Bacillus* on the main virulence factors of *Candida*. Dr Kamil Sierzant will check if it is possible to improve the fatty acid profile in the meat of broiler chickens (including increasing the omega-3 fatty acid content with omega-6 re-

duction) with simultaneous improvement of the oxidative stability of this meat. More: http://www.glos.upwr.edu.pl/aktualnosci/48879/miniatura_2_granty_for_naukowcow_upwr.html

National Academic Exchange Agency becomes a partner of Generation Study Abroad

2019-01-15

National Agency for Academic Exchange (NAWA) became a partner of the Generation Study Abroad program implemented by the Institute of International Educators in the USA. Through the status of a partner institution (Country Partner), the activities of the Polish Agency will contribute to increasing the number of American students at Polish universities, and will also strengthen the promotion of the Polish higher education in the US. The NAWA, representing Poland in the Generation Study Abroad, is one of 20 prestigious institutions from around the world, including: Education New Zealand, Norwegian Center for International Cooperation in Education, the Swedish Institute and the British Council. The Institute of International Education has been operating since 1919 and has 19 offices and branches around the world as well as over 1,200 member institutions.

Dual studies at the University of Warmia and Mazury

2019-01-15

The Department of Animal Bioengineering of the University of Warmia and Mazury in Olsztyn (UWM) will be running dual studies in cooperation with the Capital Group of Cedrob SA since the academic year 2019/2020. The Cedrob is one of the leading Polish producers of poultry meat products. It employs over 7,000 workers and processes 45 thousand pieces of poultry per hour for 20 hours a day. The majority of its executives are UWM graduates. Twelve students will be able to participate in the dual degree program that will be launched in the new academic year. A letter of intent in this matter has already been signed for the zootechnics and works on the educational offer are underway.

Dr Henryka Bochniarz to hold a lecture at the University of Lodz on economic challenges in 2019

2019-01-15

On January 17, 2019, Dr Henryka Bochniarz will conduct a lecture entitled „A new global order or a new global mess?” at the Faculty of Economics and Sociology at the University of Lodz (UŁ). Dr Bochniarz will try to answer the following questions: What challenges await us in 2019? After years of economic growth, in 2019 the world is waiting to slow down. How will it affect the economic condition of the European Union and Poland? European economy: how to find a place in the new global economic order? Relative economic stability and peace in Europe are not enough for the European Union to gain a secure position in global disorder. Henryka Bochniarz completed her PhD in economics. She is the founder and the president of the Confederation Lewiatan and the vice-president of BUSINESS-EUROPE, the largest employer organization in the European Union.

Polish-Ukrainian cooperation of rectors to improve university's activities

2019-01-15

The Warsaw University of Technology with the support of the Ministry of Science and Higher Education is implementing the project „Polish-Ukrainian cooperation of institutions representing rectors for the improvement of the university's operation”. The project is implemented by the faculty of administration and social sciences of the Warsaw University of Technology, and its participants are the university management staff in Poland and Ukraine: rectors, vice rectors and experts. The main goal of the project is «the implementation of cooperation between Polish and Ukrainian rectors in the governance in HEIs», in the field of improving the management of universities with respect for the academic community values, in seeking the desired balance between self-government and university governance, with reference to the experience of both countries and international solutions.

University of Economics in Katowice implementing the PIETE project

2019-01-15

Department of Organization Relations Management at the faculty of computer science and communication at the University of Economics in Katowice is implementing the PIETE project - Partnership for Initial Entrepreneurial Teacher Education. The aim of the activities is to increase didactic competences in the field of entrepreneurship of current and future teachers of secondary schools and lecturers. The result of the project will be guidelines prepared in the form of a compendium of knowledge for students of teaching faculties and professionally active teachers. The project leader is the Univations GmbH Institute for Knowledge & Technology Transfer at Martin-Luther University Halle-Wittenberg (Germany). The other participants are the University of Technology and Humanities in Bielsko-Biala, the University of Szeged (Hungary), Pedagogische Hochschule in Tirol

and the Management Center by the University of Innsbruck (Austria) and the University-Industry Interaction Network.

Conference „The first experience of performing the function of Data Protection Officer”

2019-01-16

SABI - Association of Data Protection Supervisors together with the Faculty of Management at the Warsaw University of Technology (PW) invites participants to the national conference „The first experience of performing the function of Data Protection Officer”, which will be held on January 24, 2019, in the main building of the Warsaw University of Technology. The inaugural lecture entitled „Data protection supervisor in the era of the 4th technical revolution” will be delivered by Dr Eng. Janusz Zawila-Niedźwiecki, Dean of the Faculty of Management at Warsaw University of Technology. The conference will consist of lectures and a discussion panel devoted to the tasks of the Data Protection Officer. More: <http://sabi.org.pl/dzien-IOD-2019.php>

International Center for Research on Artificial Intelligence and Cyber Communications established in Łódź

2019-01-16

The Faculty of Management of the University of Lodz (UŁ) is launching an international Center for Research on Artificial Intelligence and Cyber Communications. Its main goals are to conduct and disseminate scientific research, organize conferences, seminars and workshops with the participation of experts, publish monographs, scientific articles and analyzes, raise funds for research and development of research infrastructure and promote open cooperation of international experts. - Establishing the Center at the Faculty of Management of University of Lodz is a response to the needs of both business and students. More and more companies are decid-

ing to use artificial intelligence in their activities, developing their competitive advantage. This increases the demand for students with business knowledge who know the methods and potential of this new technology - said Dr. Artur Modliński, head of the Center for Research on Artificial Intelligence and Cyber Communications.

Universities applying for participation in the Academic Legion program

2019-01-16

Until 25 January, the universities are applying to participate in the Academic Legion program. Students from both public and non-public universities can join the program. Military education includes two parts of the training: theoretical and practical military exercises. On December 21, 2018, the Minister of Science and Higher Education and the Minister of National Defense signed an agreement on the implementation of the students' military education program as part of the Academic Legion. On this basis, the Minister of Science and Higher Education intends to commission the implementation of the theoretical part of the military education program as part of the Academic Legion in the second semester of the academic year 2018/2019. Applications for participation in the program should be submitted on behalf of the university by rectors or their proxies by 25 January 2019.

Rzeszów University of Technology commemorates the 100th anniversary of the International Astronomical Union

2019-01-16

The Student Self-government of the Rzeszów University of Technology in co-operation with the student volunteers Projektore are organizing the event „Look at the stars, expand the horizons”. The event will take place on January 18, 2019 in the Center of Culture and Science at the Rzeszów University of Technology. The event is organized to commemorate the 100th anniversary of the International Astronomical Union in 2019. During the event, scientific circles and student organizations will present their activities. The Faculty of Management at the Rzeszów University of Technology is planning to conduct lectures led by invited speakers promoting astronomy.

XI Days of Transport at the Krakow University of Technology

2019-01-16

On 17-18 January 2019, students from the Scientific Society of Logistics TiLOG operating at the Faculty of Civil Engineering of the Krakow University of Technology are organizing International Scientific Seminar XI Days of Transport. The main objective of the project is to exchange knowledge and experience both with the academic environment, companies from the TFL industry, as well as with students from other universities from Poland and abroad. The discussions will consist of three panels: logistics, rail and air. Participants will address such issues as: intelligent transport systems, computer tools in controlling and optimizing logistics and transport processes, directions of railway integration development with other means of transport, air transport market in Poland and in Europe, and digitalisation of air travel. More: <https://www.facebook.com/events/199192580978120/>

Polish and Portuguese researchers to examine the indoor air quality

2019-01-16

Polish and Portuguese scientists will carry out the project „Indoor air quality and public health implications of fungi and mycotoxins contamination of HVAC systems”. The project has received funding from the National Academic Exchange Agency as part of the bilateral exchange program for scientists between Poland and Portugal. The coordinator of the Polish side is Dr Magdalena Twarużek, Prof. Associate from the Department of Physiology and Toxicology, Institute of Experimental Biology, Faculty of Natural Sciences of the University of Bydgoszcz. The Portuguese side is coordinated by Dr Susana Viegas from the Centro de Investigação em Saúde Pública, Escola Nacional de Saúde Pública in Lisbon.

SOLARIS to develop Polish Laser on Free Electrons

2019-01-17

The National Synchrotron Radiation Center SOLARIS will take part in the construction of the Polish Laser on Free Electrons. The SOLARIS Center is a department of the Jagiellonian University specialized in research of synchrotron radiation. It is one of the partners of the PolFEL project, whose leader is the National Center for Nuclear Research in Świerk near Warsaw. Free electron lasers and synchrotrons are the most technologically advanced research devices used in modern science. PolFEL will allow the development of basic and technological research in physics, chemistry, biology, material engineering and other fields.

Professor Victor Calo from Australia to conduct a seminar at the AGH University of Science and Technology

2019-01-17

On January 21, 2019 at the Information Center of the AGH University of Science and Technology in Krakow, Professor Victor Calo from the Curtin Uni-

versity in Perth, Australia will hold an open seminar on isogeometric analysis. The seminar will be an introduction to the subject of isogeometric analysis, created by Prof. Victor Calo. Isogeometric analysis is a method of performing effective and accurate numerical simulations of various engineering problems. Professor Victor Calo is so-called a Highly Cited Researcher. It means that it belongs to 1 percent of world's most-cited IT scientists. There are 95 such scientists in the world, and five of them are involved in the field of isogeometric analysis.

University of Rzeszów to launch post-graduate studies Image and management in public administration

2019-01-17

By the end of January 2019, students can apply for the second postgraduate program „Image and management in public administration”. The studies are organized by the Institute of Political Sciences of the University of Rzeszów. The study program includes 180 hours of practical exercises and workshops in the field of management and shaping the personal and organization image. The program includes the following classes: Leadership in the organization, Managerial competences in relation to the employee, Workshops on television appearances, Public image of employee, Dress-code in the organization and Public speaking workshops. More: <http://www.politologia.ur.edu.pl/pl>

Researchers from Poznań and Lisbon to cooperate

2019-01-17

The team of Karolina Wieszczycka from the Institute of Technology and Chemical Engineering of the Poznań University of Technology obtained funding in the call for bilateral exchange of scientists of the National Academic Exchange Agency (NAWA) and Fundação para a Ciência e a Tecnologia (FCT). As part of the project «New carriers in the HF system for the selective separation of precious metal ions from waste sources» teams from the Poznań University of Technology and Instituto Superior Técnico from Lisbon will cooperate in searching for new solutions of hydrometallurgical recycling of waste electrical, electronic equipment and used car catalysts. The purpose of the exchange program is to support the mobility of researchers in order to implement research projects conducted jointly by partners from Poland and Portugal.

Leszek Balcerowicz to hold a lecture at the University of Szczecin

2019-01-17

The University of Szczecin and the Civic Development Forum invite participants to the open lecture of Dr Leszek Balcerowicz „Institutional systems and living conditions in the country.” The lecture will take place in the Prof. Przemysław Małek auditorium, at the Faculty of Economic Sciences and Management. The speaker will outline the role of political systems in creating conditions for economic development and life of the population of a given country, because state management systems are of great importance for the residents' life in an economic context. It will also draw attention to the role of civic rights, the rule of law, economic freedom and democratic mechanisms in building well-being, because all these systemic variables are interdependent and equivalent. Dr Leszek Balcerowicz is a specialist in economics, former president of the National Bank of Poland, deputy prime minister and minister of finance in the first non-communist government of Poland after World War II, Professor of Warsaw School of Economics.

Koszalin University of Technology implementing a program to increase the quality and effectiveness of education

2019-01-17

The Koszalin University of Technology is implementing a program of integrated activities to increase the quality and effectiveness of education. It is a huge, multi-stage and multifaceted undertaking, the aim of which is to increase the quality, effectiveness and accessibility of the university's educational offer and improve the management of the entire institution. As part of a multi-annual project Koszalin University of Technology plans to improve the quality and accessibility of the educational offer and to change the organization of the university and attract students to trainings and workshops. The university will organize internships and study visits in companies implementing modern technologies and organizational solutions, seminars conducted by scientists from abroad. Over 500 students from all organizational units of the university will participate in the certified trainings and workshop classes for 4 years. The project will be run until the end of August 2022.

University of Technology and Humanities in Bielsko-Biała to cooperate with the School Complex

2019-01-18

The University of Technology and Humanities in Bielsko-Biała (ATH) has signed a cooperation agreement with the Electronic, Electrical and Mechanical Schools in Bielsko-Biała. Thanks to the agreement signed by the rector of the university - Prof. Jarosław Janicki and the headmaster of the school Eng. Jacek Zieliński, students will have the opportunity to participate in the didactic classes in faculty laboratories. Bielsko Biała secondary school students will also be able to participate in ordered lectures, conferences and other events organized by ATH teachers and students. Another interesting form of cooperation

is also the opportunity to consult student research projects. The signing of the contract is the result of cooperation between the school's management and the dean of the machine and computer science department, Dr Eng. Jacek Nowakowski and the employees.

Students of the Adam Mickiewicz University in Poznań receive the grants for their first studies

2019-01-18

Twelve students of the Adam Mickiewicz University in Poznań became the laureates of the second BEST Student GRANT competition 2018/2019. The winners hold 5,000 each PLN for their first research. Grants were awarded to: Emilia Brzóska, Konrad Cegielnik, Kornelia Głowacka, Dominika Górko, Adam Kaczorowski, Karolina Król, Joanna Larysz, Natalia Pietras, Wojciech Stawnikowski, Hanna Szczepanek, Filip Wojnarowski and Olga Żymkowska. The young scientists research irony in Marcin Świetlicki's lyric poetry and the study of the differences and similarities between Polish and German culture based on comparison of online advertising from the Christmas period. The BEST Student GRANT is a program for the winners and finalists of the school subject competitions, as well as people who achieved the best results at the final examinations. The awarded money can be used to participate in workshops and seminars related to the subject of research. More: <https://amu.edu.pl/dla-mediow/komunikaty-prasowe/mlodzi-badacze-uam-nagrodzeni>

Wrocław University of Science and Technology to inaugurate cooperation with the Liceum in Oleśnica

2019-01-18

Wrocław University of Science and Technology inaugurated cooperation with Juliusz Słowacki Secondary School in Oleśnica. This is one of the six high schools, which cooperate with the Wrocław university. The main goal of the cooperation is to promote exact and technical sciences and help in developing students' interests and passions. The university committed to provide support in the implementation of projects within the Lower Silesian Science Festival, to offer the pupils to participate in the «Talent Study» program and to present students with projects implemented by student research clubs. The program also assumes that pupils can participate in University Open Days. They will be informed about scientific conferences, seminars, lectures and supported during recruitment to university.

Silesian University of Technology signs an agreement on cooperation with the city of Świętochłowice

2019-01-18

Silesian University of Technology signed an agreement with Świętochłowice. The cooperation will take place primarily in the areas of education, research and development and human resources. The university will also actively participate in the organization of the „Świętochłowice Business Plan” competition. The partners will cooperate in the scope of agreeing on research and development topics, presenting and promoting achievements, improving educational programs and modernizing the education process. It is also planned to appoint specialists for strategic technical and organizational solutions. The city and the university will actively cooperate in employing graduates of the Silesian University of Technology and in the organization of student internships. The university also decided to involve in

stimulating the activity of Świętochłowice residents in starting and running a business and became a partner of the «Świętochłowice Business Plan» competition.

Scholar of the University of Gdańsk nominated for the award of the Association of Journalists of the Republic of Poland

2019-01-18

Alina Kietrys from the Institute of Philosophy, Sociology and Journalism at the Faculty of Social Sciences of the University of Gdańsk was nominated for the Bolesław Prus award of the Association of Journalists of the Republic of Poland for lifetime achievements in journalism. Bolesław Prus Award, for many years had been the highest and most prestigious distinction of outstanding journalists, members of the Association of Journalists of the Republic of Poland. After years of interruption, the Association resumed awarding these prizes, according to the new modified regulations in 2015. Journalists from the entire journalistic community, members of all journalistic associations and organizations can apply for the Award. The prize has two forms: the main prize for lifetime achievements in journalism («Golden Prus») and an award for a young journalist up to the age of 35 («Green Prus»).

Jan Długosz University of Humanities and Natural Sciences to carry out two research projects

2019-01-18

University of Humanities and Natural Sciences in Częstochowa received money from the National Science Center for the implementation of two research projects. The first of them, «Research on methods of intensification of sorption processes in modified construction of adsorbent beds», obtained co-financing in the amount of over 830 thousand PLN from the call OPUS 15. The project manager is Dr Jarosław Marek Krzywański from the faculty

of mathematics and natural sciences. The second project is entitled „Theoretical studies of physical properties of chalcopyrite semiconductors for applications in solar cells”. It received over 136 thousand PLN within the PRELUDIUM 15 PLN call. Its supervisor is Myron Rudysh, PhD student of the Faculty of Mathematics and Natural Sciences.

University of Silesia to hold XXV Theological Evening „Marriage Processes in the Church”

2019-01-18

The Faculty of Theology of the University of Silesia in Katowice invites participants to the XXV Theological Evening. The theme of the meeting on January 24 will be „Marriage Processes in the Church.” The program includes a poster exhibition, introductory performance and open lectures in the field of canon law. During the evening, the most frequently appearing legal titles, the method of determining the formula of process doubt, as well as the subsequent stages of the ordinary and shortened process will be presented. Speakers are canonist lawyers: Dr Mariusz Auguścik - vice-rector of the Metropolitan Court in Katowice and priest Dr. Rafał Dappa – vice-rector of the Bishop's Court in Gliwice. The poster exhibition prepared by the deacons of the Higher Silesian Seminary will present obstacles and defects of marital consent and information about the form of the relationship, as well as a canonical description of the marriage. A short introductory spectacle will be also presented by students.

Medical University of Gdansk and the University Clinical Center become Medical Leaders

2019-01-21

The Medical University of Gdańsk and the University Clinical Center (UCK) in Gdańsk have been awarded in the competition Success of the Year 2018 in Health Care and became Medical Leaders. The university was awarded for its rich educational and training activities, while UCK was considered the most innovative hospital in Poland. The jury of the competition appreciated the great involvement of the academic community and initiatives taken by the university. The Medical University of Gdańsk has popularized knowledge about health, disease prevention and treatment methods, both among children and adults for many years. Gdańsk students actively participated in a charitable educational and educational program to support the development of children raised in orphanages, foster families and in families with low material status. As part of the Heart of Kenya project, they taught Kenyans how to correctly perform ECG testing and interpret its results. More: <https://gumed.edu.pl/52795.html>

University of Poznan to hold forum about supporting people with disabilities

2019-01-21

The Office for Students with Disabilities at the Adam Mickiewicz University in Poznań and the Association of Disabled Students „Ad Astra” invite participants to the Fourth Forum of University Plenipotentiaries for Persons with Disabilities „Innovative solutions in supporting people with disabilities in higher education”. The event will be held on 27 and 28 February. The aim of the Forum is to promote innovative solutions in the field of supporting people with disabilities, disseminate knowledge and raise awareness about the functioning of such people in higher education. The organizers are planning discussion of new realities in financing the support of people with disabilities at universities, workshop sessions with experts specializing in various aspects of organizing

support, as well as meeting with representatives of the National Center for Research and Development dedicated to the «Accessible University» competition.

Libyan scientist to revive scientific exchange between Gdańsk University of Technology and universities in Libya

2019-01-21

Professor Hakim S. Abdelgader, graduate of the Gdańsk University of Technology, a researcher at the University of Tripoli in Libya wants to revive the academic exchange between the university and the Libyan universities, difficult due to the policy of this country. - The Libyan Ministry of Education has ordered that students wishing to study abroad can do so only at one of three hundred universities around the world. The list prepared by the department includes universities in Warsaw and Krakow, but I do not understand why there is no Gdańsk University of Technology between them - says a Libyan scientist. Professor Abdelgader in 2007, at the request of the rector of the University of Tripoli, signed a cooperation agreement between the university and the Gdańsk University of Technology and would like to renew it with the participation of the current rector of the Gdańsk university and the ministries of education. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGNcmoQv7K0/content/profesor-z-libii-rozwija-wspolprac-pg-z-uczelniami-w-swoim-kraju

Projects of the Silesian University of Technology co-financed in the 3rd TANGO Call

2019-01-21

Projects of electrical, automation, electronics and computer science as well as environmental and energy engineering faculties at the Silesian University of Technology will receive funding from the National Center for Research and Development and the National Science Center. Co-financing is granted

to projects: «Probe for dynamic measurements of fluid parameters in two-phase flows, mainly in wet steam» under the supervision of Dr Eng. Sławomir Dykas from the faculty of Environmental engineering and energy, «Innovative photonic measurement system for biomedical applications» under the supervision of Prof. Paweł Karasiński from the Electrical department and «Application of three-dimensional vascular network models» under the direction of Dr Eng. Krzysztof Psiuk-Maksymowicz from the faculty of Automation, Electronics and Computer Science. The money is allocated from the support program for the practical use of TANGO basic research results. In total, from 11 projects 6 of them will receive financing within the TANGO call.

Wrocław University of Science and Technology to implement the project „Cybersecurity for the economy of the future”

2019-01-21

Wrocław University of Science and Technology received almost PLN 22 million from the National Center for Research and Development for the project „Cybersecurity for the economy of the future”. The Lower Silesian Security Cluster will be involved in its implementation. The goal of the project is m.in. improving the quality of cyber security education, which is to cover not only students but also research and teaching staff and management. The plans are to launch new and modernize already existing education programs, as well as to purchase tools and software. - High-quality semi-annual internships for students will also be of key importance. As a university, we have financial resources to implement them, we must now find companies where they could acquire knowledge. In this respect, we count on cooperation with cluster members - says Prof. Tadeusz Więckowski, head of the Department of Telecommunications and Teleinformatics at the electronics department quoted on the university website.

Strategic partnership between the Wrocław University of Science and Technology and the Lower Silesia Voivodship

2019-01-21

Wrocław University of Science and Technology has signed a strategic agreement on cooperation with the local government of the province Lower Silesia. The document was signed by Prof. Cezary Madryas, rector of the Wrocław University of Science and Technology and Cezary Przybylski, marshal of the province Lower Silesia. The contract assumes cooperation in the area of self-government-science-innovation-business, joint activities for the sustainable development of the voivodship and universities, supporting the development of local government by transferring knowledge, improving the skills of local government officers and local and regional leaders, and initiating joint meetings and conferences for the development of Lower Silesia. - We are a voivodship with the wealth second rank in the country, just behind the Mazovian voivodship. We would not be able to achieve such success without the cooperation with universities, including the Wrocław University of Science and Technology - says the Marshal of the province. Lower Silesia. More: <http://pwr.edu.pl/uczelnia/aktualnosci/wspieramy-nauke-i-biznes-nadolnym-slasku-11080.html>

International Visegrad Fund Scholarships

2019-01-22

Until March 15, 2019, graduate students and young researchers can apply for scholarships of the International Visegrad Fund. Grants under the program are offered in all scientific disciplines, in every possible language and include a stay of 1 to 4 semesters. The program does not have any age limit for candidates. Scholarship holders can study or conduct research at universities and research centres in Central and Eastern Europe. The fact that the grant is addressed to both the student and the host institution facilitates the application process for both, the candidate and the selected center. The International Visegrad

Fund supports financially projects that develop cooperation between the Visegrad Group countries (the Czech Republic, Poland, Slovakia and Hungary), the Western Balkans and the Eastern Partnership. More: <https://www.visegradfund.org/>

Agreement on cooperation between the Lodz University of Technology and the Apator group

2019-01-22

Joint education of students, effective preparation of graduates to the requirements of the changing market, mutual exchange of knowledge, implementation PhD theses and joint research and development projects are the most important elements of the cooperation agreement signed between Lodz University of Technology and the Apator group Ltd. The contract is a part of the development strategy of the Lodz University of Technology, providing the cooperation of the university with the economic environment. This is a very important element of the evaluation of the university's activity under the new Higher Education Act, which can be translated into specific financial subsidies - emphasizes Prof. Sławomir Wiak, rector of the Lodz University of Technology. The Apator Group consists of 16 domestic and foreign entities. The organization implements technologically advanced smart-class products and services on the market and systems for active management of energy media distribution networks.

Okta Chandra Aulia from Indonesia becomes the best foreign student in Poland

2019-01-22

Okta Chandra Aulia from Indonesia, a forestry student at the Warsaw University of Life Sciences (SGGW), won the Interstudent competition for the best foreign student in Poland in the category of Master's students. Okta Chandra Aulia participates in climate and sustainable development initiatives and cooperates with the Promotion Office. She is currently an intern at the WULS-SGGW. Okta Chandra Aulia has also been a member of the Indonesian

Red Cross for thirteen years and since the arrival to Poland she runs the Association of Indonesian Students in Poland. The Interstudent competition is organized by the Perpektywy Education Foundation with the honorary support of Prof. Eng. Jan Szmidt, chairman of the Conference of Rectors of Academic Schools in Poland. The competition's partners are the Conference of Rectors of Academic Schools in Poland, the Students' Parliament of the Republic of Poland and the National Representation of PhD Students.

Second-cycle studies at the State Higher Vocational School in Nowy Sącz

2019-01-22

Students can apply for second-cycle studies at the Technical Institute of the State Higher Vocational School in Nowy Sącz. The studies will last three semesters and are intended for graduates who have completed first-cycle studies and have an engineering degree. In December 2018, the University of Silesia obtained the consent of the Minister of Science and Higher Education to conduct second-cycle studies with a practical profile in the field of Information Technology. In addition, the Technical Institute has introduced a number of new specializations to date, such as: Bionics in mechatronic systems, Reconstruction engineering and IT systems programming. Applications can be sent till February 14, 2019. More: <http://www.pwsz-ns.edu.pl/it>

Torun Scientist becomes a Rising Star of Internationalization

2019-01-22

Dr Agata Karska from the Faculty of Physics, Astronomy and Applied Informatics at the University of Nicolaus Copernicus in Toruń became the Environmental Star of Internationalization by the Education Foundation „Perspektywy”. The Toruń researcher received the special Rising Star award. The prize is awarded to scholars under 35 years and whose achievements have been noticed not only at the home university, but also in the national and international dimension. The award committee appreciated Dr Karska for successfully combining scientific research at a global level with the function of the dean's plenipotentiary for internationalization and coordinating a number of projects aimed at increasing the internationalization of research and education at the University. More: <https://www.umk.pl/wiadomosci/?id=25893>

Adam Mickiewicz University in Poznań signed a contract with Sonalake company

2019-01-22

The Adam Mickiewicz University in Poznan will cooperate with the Polish-Irish company Sonalake. The cooperation agreement was signed by the Vice-Rector for informatization and cooperation with the socio-economic environment, Prof. Marek Nawrocki and board member Sonalake, Sławomir Dębczyński. - Adam Mickiewicz University is the largest university in the region, and we are looking for new solutions due to the dynamic growth of employment and problems with finding IT specialists. Since we cannot hire trained employees with extensive experience, we have decided to invest in young people who are just entering the market. Our plans are to show them what and how we do and our transfer technological knowledge in a practical way - says Sławomir Dębczyński. The Sonalake is a Polish-Irish company offering advanced IT systems for telecommunications and software development services.

New equipment for the Laboratory of Organization and Traffic Management of the State Higher Vocational School in Kalisz

2019-01-22

The Laboratory of Organization and Traffic Management of the faculty of social sciences and humanities of the State Higher Vocational School in Kalisz has been enriched with a good-class speed camera with professional software. The Laboratory of Organization and Traffic Management at the University of Kalisz also has a simulator for the work of drivers and a drone to control the traffic. There are also 11 computers at the disposal of students and lecturers, equipped with specialized software for analyzing road accidents. - It is very important to use that, because it is the same program as the court experts use in their work. Internal safety students have the opportunity to acquire practical skills, which is difficult to overestimate - says Dr. Paweł Kamiński, associate dean of the Faculty of Social Sciences and Humanities.

Wroclaw University of Science and Technology explores new sources of light in the infrared range

2019-01-22

Wrocław University of Science and Technology conducts the study of new light sources of the mid-infrared range. This is a very advanced technology, which is being tested by very few scientific centers in the world. The project allowed to develop infrared light sources operating in the wave range from 2000 to 6000 nanometers. These are ranges invisible to the human eye. Their main advantages are low price of light sources, simple construction, high reliability and low temperature work. Medium infrared is widely used in medicine. It can increase the availability of diagnostic methods for patients - including the recognition and classification of cancer cells. It is also a simple and effective method of gas detection, e.g. in mines. The research is directed by

Dr Eng. Sławomir Sujecki, Prof. Wrocław University of Science and Technology, who has been for many years also working at the University of Nottingham. The project is implemented as part of the Polonez grant from the National Science Center, co-financed by the European Commission. More: <http://pwr.edu.pl/uczelnia/aktualnosci/badania-nad-nowymi-zrodami-swiatla-11082.html>

Operational Program Digital Poland to launch Electronic Center for the Provision of Oceanographic Data

2019-01-22

The project „Electronic Center for Providing Oceanographic Data eCUDO.pl” will be financed under the Operational Program Digital Poland. The main product of the project is the eCUDO.pl system, which will consist of a central system, a search and acquisition module for metadata from external institutions, and the integration of federated systems. The main goal is to increase the digital accessibility and usefulness of public sector information through digital access to science resources in the field of oceanology. The leading partner of the Project is the Institute of Oceanology of the Polish Academy of Sciences with University of Gdańsk, Maritime Institute in Gdańsk, Marine Fisheries Institute - National Research Institute, Polish Geological Institute - National Research Institute, Szczecin University, Pomeranian Academy in Słupsk.

Lodz University of Technology to launch construction of the „Alchemium”

2019-01-23

The Rector of the Lodz University of Technology, professor Sławomir Wiak, signed on Monday, January 21, 2019, the contract for the implementation of the first stage of the investment called „Alchemium”. Within the first stage, a new conference and teaching center will be created, with lecture halls and an assembly hall for 500 people. The second stage of the investment includes the construction of a new laboratory for the Faculty of Chemistry. The

entire investment is worth PLN 113 million, of which 97.5 million is allocated from the Ministry of Science and Higher Education. Prof. Wiak, the rector of the university, emphasized that the new investment is to increase the potential of the Lodz University of Technology.

Students from Chełm to represent Poland in the Junior World Gliding Championships

2019-01-23

Tomasz Hornik, Kinga Tchorz and Konrad Partyka, pilot students of the State Higher Vocational School (PWSZ) in Chełm, were appointed to represent Poland in the Gliding World Junior Championships, which will be held in July in Hungary. - The appointment for the world championship is undoubtedly the fulfilment of one of my aerial dreams, it offers many possibilities and opens up more than one door in a professional career in the future - said Kinga Tchorz. Currently, about 150 future pilots study at the PWSZ in Chełm. At the end of last year, the university purchased three new training aircrafts thanks to the subsidies from the Ministry of Science. Thus the air fleet of the Chełm school expanded to 10 planes.

Professor Shimon Redlich from Israel becomes a doctor honoris causa of the University of Rzeszów

2019-01-23

On Monday, January 28, 2019, a solemn meeting of the Senate of the University of Rzeszów (URz) will offer the title of doctor honoris causa URz to professor Shimon Redlich. Professor Redlich was born in 1935 in Lvov. As a child, he survived the Holocaust. He emigrated from Poland to Israel in 1950. He studied history at the Hebrew University, sovietology at Harvard University, and received his doctorate from the University of New York. Professor Redlich lectured at the Ben-Gurion University for nearly forty years. In 2003 he retired as a professor emeritus in the field of contemporary European and contemporary Jewish history. For years, he has been actively working to improve Polish-Jewish and Ukrainian-Jewish relations.

SENER Group to cooperate with the Warsaw University of Technology

2019-01-23

Warsaw University of Technology (PW) has signed a cooperation agreement with the SENER group. The agreement is part of the implementation of the Polish space strategy. It assumes enhancing the competences of specialists in the space sector and joint scientific and research work. - SENER Group has over 50 years of experience in the space industry. At the time our engineers designed over 275 devices for space. We are happy that we will be able to share our knowledge with students of Warsaw University of Technology and facilitate young people's career in this unique industry - said Sergio Reguero, CEO of SENER Polska. The assumptions of the contract concluded between PW and SENER include consultation of curricula and studies to prepare students in the best possible way to start working in the space sector. Both parties will also jointly carry out scientific and research activities.

Academy of Land Forces in Wroclaw to cooperate with the Doctrine and Training Center of the Armed Forces

2019-01-23

The Academy of Land Forces in Wroclaw signed an agreement on cooperation with the Center for Doctrine and Training of the Armed Forces. The main assumption of the document is the development of science and technology and providing professional education as the best way to improve the state security and development of the Polish Armed Forces. The signatories are planning educational, scientific and environmental cooperation in the field of organization and conducting scientific and research activities in the management and quality science, security sciences, civil engineering and transport, and conducting research, in order to improve existing methods and search for new solutions for Armed Forces. The aim of the agreement is to work for the development of concepts and experiments in the field of new training solutions, including the concept

of forms and methods, and the rules and procedures for training commands, staffs and troops.

Scientists of the University of Silesia together with the company IBI Verde developed a new pluviometer

2019-01-23

Scientists of the University of Silesia together with employees of the IBI Verde Ltd developed a new pluviometer - a device for measuring daily sums of atmospheric precipitation. Their invention is already patented. The device records the change in the weight of rainfall, snow, hail, dew, and even fog using the so-called a strain gauge bridge that transmits a measurement signal to the data acquisition and processing module. Therefore, the actual duration of atmospheric precipitation and changes in the weight of the collector system is recorded. The patented pluviometer allows to obtain an accurate weight measurement in a wide range of rainfall intensity and wind speed and it is characterized by an aerodynamic shape and an economical measuring system. It has a shape compatible with the recommendations of the World Meteorological Organization, so the wind field around the collector bowl is not significantly distorted. Laboratory of Refrigeration and Air Conditioning established at the Maritime University of Szczecin

2019-01-23

The Laboratory of Refrigeration and Air Conditioning was established in the Department of Marine Machinery and Equipment, mechanical department of the Maritime University of Szczecin. The studio was created on the basis of the employees' projects and was financed by the university. In the laboratory, researchers will focus on developing energy-saving and safe solutions for the environment. Cooling devices have a huge impact on the natural environment, and the task of scientists is to find new solutions that make this impact as small as possible. The new laboratory of the Szczecin university is equipped with a station for testing refrigeration automation, a test stand for ventilation unit with heat recovery, a didactic stand for filling and recovery of the refrigerant, as well as a refrigerator to run the courses both for students and officers' cadres.

Bydgoszcz scientists to help design the roofing of the ski jumping hill

2019-01-23

University of Technology and Life Sciences in Bydgoszcz (UTP) signed a letter of intent on cooperation with the Archigeum company. Under the agreement, the scientists from Bydgoszcz will join the research to build a roofing of the Wielka Krokiew runaway - a ski jumping hill in Zakopane. The idea of a tunnel protecting jumpers against snowfall and giving thermal protection before jumping was created by the Archigeum Architecture Design Workshop from Zielonka. The project has already gained the acceptance of the International Ski Federation FIS in Switzerland. Scientists from the University of Bydgoszcz under the direction of Dr Eng. Dariusz Skibicki from the Department of Computer Methods will perform strength calculations of the structure using the finite element method and will model the wind and snow load.

Dual studies at the University of Warmia and Mazury with the Citi Handlowy bank

2019-01-24

The Faculty of Economic Sciences of the University of Warmia and Mazury (UWM) in Olsztyn launches dual studies in cooperation with the Citi Handlowy bank. Applications will be accepted until February 1, 2019. The cooperation of the Olsztyn university with the Citi Handlowy bank is not limited to this proposal. For several years, the bank with the Faculty of Economic Sciences have been conducting post-graduate studies, «Akademia na bank» and many joint workshops. Soon it will start accept applications for summer internships. At present, the University of Olsztyn conducts dual studies at three faculties: the Faculty of Food Sciences with the company Ogram and the faculties of Economic Sciences and Technical Sciences with the Michelin group.

Krakow University of Technology launches the Laboratory of Railway Traffic Engineering

2019-01-24

Krakow University of Technology officially opened Laboratory of Railway Traffic Engineering. The laboratory is equipped with a railway traffic simulator created at the Krakow University. The laboratory consists of 12 computers, which reflect the work of the traffic dispatchers in one net. The assumptions and functionality of the model system are similar to solutions used in the process of training of on-duty traffic officers. Work on the preparation of the Railway Traffic Engineering Laboratory has been continued at the Krakow university since 2014. The project was awarded by the Office of Rail Transport in last year's competition «Culture of safety in rail transport».

Deputy Prime Minister Gowin visits the Warsaw School of Economics

2019-01-24

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin visited the Warsaw School of Economics (SGH) on 22 January. The Deputy Prime Minister was invited by the Rector of the Warsaw School of Economics, Prof. Marek Rocki. The university authorities thanked the minister for co-financing the construction of the scientific and didactic building at ul. Batory in Warsaw. The subsidy for this purpose amounted to PLN 30 million. The conversation also concerned current issues related to the implementation of the new Law on Higher Education and Science. - The Warsaw School of Economics anticipated the solutions that are included in the Constitution for Science, and it has been the leader in Poland providing solutions guaranteeing the improvement of the level of education of students and scientific research for almost 30 years. I wish that the spirit of perfection and perseverance in forming the elite of the young generation should always be guided by the Warsaw School of Economics - wrote the deputy prime minister in the memorial book of the university.

Biologists from the University of Warsaw discover new herbicides

2019-01-24

Biologists from the University of Warsaw (UW) have discovered chemical compounds that are innovative in terms of chemical structure and have very high effectiveness in eliminating weeds. The main authors of the invention are Dr Rafał Archacki and Dr Paweł Siedlecki from the Institute of Experimental Biology and Biotechnology of Plants at the Faculty of Biology of the University of Warsaw. New substances were found by chance when regulators of proteins stimulating the growth and development of plants were sought in other conducted research project. Several dozens of selected chemical compounds have been tested. Among them, the biologists managed to find several promising molecules. However, some of the tested substances, contrary to the expectations of researchers, inhibited it or even destroyed plants, instead of stimulating growth. Discovered herbicides were subjected to efficacy tests that provided very promising results. Now researchers will conduct further research and carry out tests and field trials.

University of Szczecin launching Winter Birds Counting

2019-01-24

The Scientific Circle of Zoology of Vertebrates „Wąsatka” of the Faculty of Biology at the University of Szczecin and the National Society for the Protection of Birds (OTOP) are inviting participants for an ornithological walk as part of Winter Bird Counting. The first walk is planned on Friday, January 25th. During the walks, the scholars are planning to teach how to recognize birds and discover places where they can be observed. In addition, participants will also learn how to properly help birds in the winter and what to feed them. This year's campaign is focused on goldfinches. - During Winter Birds Counting, we observe birds that spend the winter in close company of man, that is in urban gardens and parks. We are counting birds for a minimum one hour and then send the results to the electronic observation centre

available on the OTOP website. Numerous school and pre-school teachers who organize class trips can take part in Winter Bird Counting. More: <http://usz.edu.pl/zimowe-ptakoliczenie-2019/>

Kielce University of Technology to receive 12 million PLN as part of the Regional Initiative of Excellence

2019-01-25

Kielce University of Technology received PLN 12 million to support scientific research and develop a long-term development strategy. Funds granted by the Ministry of Science and Higher Education under the Regional Initiative of Excellence program will be devoted to the development of two disciplines: „Environmental Engineering” and „Construction”. The goal of the project is to raise the level of scientific research and development work; increasing the importance of research in the international scientific community; increasing the impact of scientific research on the functioning of the socio-economic environment in the regions and supporting research on modern didactic methods aimed at improving the quality of education. The Kielce University of Technology will carry out the project for the next 4 years.

Warsaw University to hold the debate „Japan: political life and relations with the state”

2019-01-25

The University of Social Sciences and Humanities in Warsaw, together with the Warsaw Public Library are organizing a debate „Japan: political life and relations with the state” on January 31. East Asian countries have always fascinated Westerners. Japan became the first in Asia to adopt Western values and seems to be a master in showing the West its modern face. And how does real life in modern Japan look like? This and other questions will be answered by Prof. Teruji Suzuki - a retired professor of Tokai University and Kagawa University, currently lecturing as a visiting professor at the University of Warsaw; Dr Bartosz Wojciechowski – teacher of

Japanese, lecturer at the Jagiellonian University and Edyta Nowicka, a consultant in Japanese business, living in Tokyo and a lecturer at the SWPS University. The moderator of the meeting will be Prof. Krzysztof Gawlikowski, head of the Department of Asian Studies of the SWPS University.

Poland to offer post PhD internships for foreign researchers

2019-01-25

The National Academic Exchange Agency (NAWA) invites researchers from abroad to undertake post PhD internships in Poland as part of the new Ulama Program for the mid-term arrivals of scientists. The program allows recognized and promising scientists who have at least a PhD degree scholars to visit Polish universities and other scientific and research organizations. The NAWA program offers grants for researchers from all fields of science and from different countries around the world. This initiative will allow to establish or deepen contacts between Polish and foreign science institutions. More: <https://nawa.gov.pl/naukowcy/program-im-ulama>

Collegium Invisibile to look for gifted Polish students

2019-01-25

The Collegium Invisibile, an association for gifted students and tutors, will accept applications until 10 March. The proposed programs are aimed at comprehensive development and help young people in the conscious development of their scientific careers. Students, who are on the second or third year of their studies, first or second year of PhD studies as well as from the second to sixth year of regular studies can apply for this internship. The studies at the Collegium last between three and seven years. Application process consists of two stages. As part of the first evaluation, the form submitted by the candidates and their written scientific works (up to approximately 3500 words, in Polish or English, or in another language after consultation with the association) are assessed. The second stage is an interview, checking the predispositions and motivation of candidates for studying at the Collegium. More: <http://ci.edu.pl/rekrutacja/>

Koszalin University of Technology to launch new research and implementation center for surface engineering

2019-01-25

The Koszalin University of Technology (PK) is launching a research and implementation center for surface engineering, process design and simulation as well as vibroacoustic research. The cost of the project is PLN 3.35 million. The Center is to refine and expand the research and service offer of the university in the field of surface treatment, including heat treatment, thermo-chemical, plasma and PVD coatings (application of a hardener). The University has equipment for applying coatings using PVD and diamond-like coatings based on carbon. - Our activity is to modify the surface of the tools to increase their durability. This can be achieved by plasma nitriding and application of anti-wear coatings - says Vice-rector of the Polish Academy of Sciences, Prof. Witold Gulbiński. Equipping tools with wear-resistant coatings often extend their durability, which reduces production costs. The University has already implemented several such research and development projects.

Student of the Medical University of Gdańsk wins the INTERSTUDENT competition

2019-01-25

Charles Woode from Ghana, a 3rd year student of the Nursing of the English Division of the Medical University of Gdańsk, won the prestigious INTERSTUDENT competition in the MA category. The competition is addressed to foreigners studying at Polish universities. The prizes are awarded in the following categories: undergraduate studies, master's studies and PhD studies. The jury distinguishes active people in the academic life, achieving good results in science and participating in interesting research projects. The other winners are: Okta Chandra Aulia from Indonesia from the Warsaw University of Life Sciences (Master's degree) and Svitlana Sovinska from Ukraine from the Krakow University of Technology (PhD studies). Special awards for supporting foreigners and charity were received by: Danylo Fun-

tovoi from Ukraine - a student of the Lublin University of Technology and Lisa Aditya from Indonesia, studying at the Gdańsk University of Technology.

Silesian University of Technology to cooperate with the Kiev National University of Building and Architecture

2019-01-25

Silesian University of Technology has signed an agreement on cooperation with the Kiev National University of Building and Architecture. The contract has been concluded for 5 years and assumes cooperation in the field of education, research and administration. The document includes the exchange of academic staff and students, providing for student apprenticeships, cooperation in the field of didactics and implementation of research programs, as well as joint scientific support for PhD students. - As a representative of the Ukraine, I am very pleased with the opportunity to establish cooperation with the Silesian University of Technology, one of the leading universities of technology in Poland. Our universities share a very similar profile of scientific and didactic activity, which will further facilitate our cooperation. I will be in favor of developing all the directions of cooperation written in the agreement - says the rector of the Kiev university, Prof. Volodymyr Tkachenko.

Academy of Physical Education in Poznan to hold a conference on dancer movements

2019-01-25

The Department of Dance and Gymnastics and the Students' Scientific Society The Laboratory of Dance of the Academy of Physical Education in Poznan invite participants to the International Scientific Conference Dance Connections which will be held on February 14 and 15. In Poland, dance is still perceived first and foremost in aesthetic terms, as a field of art, and people forget about its rehabilitation and therapeutic character. Conference guests will present different systems of thinking about

movement and dance. The event will be attended by Frey Faust, a world-renowned dancer and choreographer who built an evolving pedagogical approach to the organization and mutual correlation of empirical and scientific results of research on human movement thanks to his independent research on anatomy, biomechanics and physics. The conference is addressed to physiotherapists, athletes, lecturers, dancers, teachers and trainers related to physical culture and fitness, and people interested in personal development. More: <http://www.awf.poznan.pl/pl/lista-aktualnosci/newsy-2019/4023-o-ruchu-czlowieka-w-tancu-i-miedzynarodycji-wferencja-w-awf-poznan>

Cardinal Stefan Wyszyński University organizes a course for people working with foreigners

2019-01-28

School of Polish Language and Culture for Foreigners of the Cardinal Stefan Wyszyński University in Warsaw and the Mazowieckie Local Government Center for Teachers' Training are organizing a free course for people working with foreigners. The course is addressed to employees and associates of non-governmental organizations, educators, local government employees and local activists from all over Poland who work or plan to work in institutions dealing with multiculturalism, integration and supporting foreigners living in Poland. The program includes intercultural communication, family support in the process of integration and adaptation in the local environment, basics of methodology and didactics of teaching Polish as a foreign language and designing activities and workshops in the local community related to foreigners.

International forum on learning and teaching at the University of Warsaw

2019-01-28

On February 14-15, the University of Warsaw will host a forum devoted to the issues of learning and teaching „Towards successful learning: Controversies and common ground”. The event is organized by the European University Association which consists of over 800 universities and national conferences of rectors from 48 countries, including University of Warsaw. The conference is divided into three sessions. The first one is devoted to teaching purposes, the speakers will discuss the issue of whether is critical thinking a part of study programs. The second session will concern European policies related to learning and teaching. The last session will show two different approaches to education from University College Cork and the University of Oslo. More: https://www.eua.eu/events/24-2019-european-learning-teaching-forum.html?utm_source=social&utm_medium=LinkedIn&utm_name=LinkedIn-social-02-10-2018

Warsaw University of Technology participates in a tripartite agreement for an energy-efficient economy

2019-01-28

Warsaw University of Technology has concluded a tripartite agreement with the city of Piastów and the Teraz Energia company for the development and commercialization of technological solutions supporting the building of an energy-efficient and environmentally friendly economy. The parties will jointly implement projects in the areas of energy efficiency, dispersed generation of RES (renewable energy sources) and electromobility. The intellectual, technological and capital potential of the signatories of the agreement will be used for achieving the goals of the initiative. The university will involve scientists and students to co-create innovative technologies ready for commercialization. Company Teraz Energia which is a part of the Innovation Incubator of the Warsaw University of Technology,

develops technologies in the field of Intelligent Energy Networks, the Internet of Things and Virtual Power Plants.

Krakov's universities to promote China's language and culture

2019-01-28

Krakov's universities: AGH University of Science and Technology (AGH) and the Jagiellonian University have signed an agreement on joint promotion of Chinese language and culture. During the meeting the rectors of both universities signed an agreement on cooperation in the area of conducting Chinese language classes for AGH students and staff as part of the Institute of Confucius of the Jagiellonian University at the AGH University of Science and Technology. - In AGH we have been running a Confucian Class project for the second year. This year about 150 students and staff attend Chinese language and culture classes. Without the assistance of the Confucius Institute of the Jagiellonian University, we would not be able to provide the possibility of learning Chinese for more than half of the people. The agreement opens new opportunities for us not only in the organization of language courses, but above all cultural events that allow us to better understand the history and mentality of the China- said Prof. Piotr Małkowski, Deputy Rector of the AGH University of Science and Technology for cooperation with China.

Pomeranian Academy in Słupsk to cooperate with the Regional Directorate of Environmental Protection in Gdańsk

2019-01-28

The Pomeranian Academy in Słupsk (AP) will cooperate with the Regional Directorate of Environmental Protection in Gdańsk (RDOŚ). Agreement on this matter was signed by the Regional Director of Environmental Protection in Gdańsk Radosław Iwiński and the rector of the university - Dr Eng. Zbigniew Osadowski. The parties agreed to provide the joint

organization of events, conferences, expert seminars for the protection of the environment and nature, and support for educational projects. The agreement also regulates the students' practice at RDOŚ. The signatories of the agreement agreed to provide mutual support in the field of promotion of knowledge concerning environmental protection and nature including publishing projects; co-organizing lectures and workshops on information and popularization of environmental protection and nature directed to the local community.

Conference at the University of Casimir the Great in Bydgoszcz on the 20th anniversary of joining NATO

2019-01-28

The University of Casimir the Great in Bydgoszcz invites participants on March 11 and 12 to the National Science Conference „Poland in international relations twenty years after joining NATO”. The topics of the conference include assessment of historical processes resulting in access of Poland to NATO and the European Union and conditions resulting from the changing geopolitical position of Poland in Central and Eastern Europe in the twentieth century as well as Poland's attitude to the crises of contemporary Europe (including the conflict in Ukraine, migration crisis, Brexit). The organizers are also planning to discuss Poland's activities in international organizations and initiatives, such as the OSCE, Council of Europe, the Visegrad Group, the Weimar Triangle and the Three Seas Initiative and the impact of historical policy of Poland and other countries on mutual relations, including re-opening the problem of reparations and war damages, and possibly the issue of revision of the borders. Sensor network to investigate air quality at the Wrocław University of Science and Technology's campus

2019-01-28

Wrocław University of Science and Technology has launched a network of sensors for the assessment of air quality on its campus. Not only employees and students but also residents of Wrocław can use the information gathered. This is the only installation of this type in Poland. The network launched by scientists now consists of eighteen sensors, and ultimately will consist of twenty pieces. They were arranged on the campus at Grunwaldzki Square, as well as on the campus at Długa, at Prus, in Geocentrum at Na Grobli streets and on the housing estate at Wittig street. The main task of the installation is to measure concentrations and analyze pollutants responsible for the so-called smog on the campus, but also the it is to develop sensors that reliably determine air quality. The tests are to check also the impact of building, strength and direction of the wind and urban plants on the quality of air. More: <http://pwr.edu.pl/uczelnia/aktualnosci/badamy-jakosc-powietrza-na-kampusie-politechniki-wroclawskiej-11088.html>

University of Life Sciences to create a nutritional education center

2019-01-28

Wrocław University of Environmental and Life Sciences and the German association Christlich-Soziales Bildungswerk Sachsen will implement the project „Network of nutritional education for the sustainable development of the Euroregion Nysa”. As part of the project, nutritional education centers will be created in Radomierz and Hoyerswerda. They help to promote health, good eating habits and not to waste food. One of the aims of the project is to draw the attention of the region's inhabitants to balanced nutrition. For this purpose, firstly, statistical surveys on knowledge in the field of production and handling of food in the Euroregion Nysa will be carried out. The test results will show the type

and amount of food that is bought and discarded when it could still be consumed. An analysis of eating habits will allow to assess knowledge about the nutritional and energy value of food and will enable the identification of consumer behavior patterns in selected households. More: http://www.glos.upwr.edu.pl/aktualnosci/48938/stacja_w_radomierzu_bezpie_centrum_edukacyjnego.html

Lodz University of Technology invites students for studies

2019-01-29

Candidates for second degree studies at the Lodz University of Technology can submit documents for 26 fields including three courses conducted in English, from February 4, 2019. In this year, Chemistry in forensics led by the Faculty of Chemistry is a novelty. This study prepares graduates for the use of specialist knowledge in the field of forensic chemistry, analysis of evidence and techniques used in forensics. Another novelty in the offer of the Lodz University of Technology are dual studies in the field of design. Graduates of the baccalaureate studies in this field may continue their studies at the second-cycle studies, on a completely new specialty- textile product. This study combines studying and practice - through internships in companies. More: <https://rekrutacja.p.lodz.pl/pl/lista-kierunkow>

Prof. Darewicz from the University of Warmia and Mazury receives Statuette of Saint Jacob in the science category

2019-01-29

Professor Małgorzata Darewicz, dean of the Faculty of Food Sciences at the University of Warmia and Mazury (UWM) in Olsztyn received the statuette of Saint Jakub in the science category for 2018. For 16 years statuettes of Saint Jacob, the patron of Olsztyn, are awarded by the Mayor for outstanding achievements in the fields of science, culture, sport, economy, non-governmental activities and for special merits for the city. Professor Darewicz is a food biochemist. She specializes in basic research to de-

velop the optimization of food protein processing and improvement of production technology of dairy products, with special focus on their health-related properties. She also deals with the development of methods for obtaining protein hydrolysates in the production of dietetic and medicinal preparations.

University of Lodz intends to launch a research station in Colombia

2019-01-29

University of Lodz, together with its partners, intends to buy 30 hectares of North-Tropical rain forest and build a research station in Colombia. Hofmeisterella biglobulosa, Myoxanthus ortizianus and Hirtzia barrerana are names of unknown species of orchids discovered by Dr Marta Kolanowska. A researcher from the Department of Biology and Environmental Protection of the University of Lodz is working in the Sibundoy Valley, in the southern part of Colombia. In the valleys of the Putumayo and San Francisco rivers, scientists from Łódź and cooperating with them natives found dozens of flowering orchids, among others Cryptocentrum lehmannii, Trigonochilum porrigens. The «Biodiversitatis» Foundation, which is a non-profit organization supporting the protection of biodiversity and the Faculty of Biology and Environmental Protection of the University of Lodz declared their willingness to create a research station in the Sibundoy valley. The partner of the project is to be the Czech Global Change Research Institute.

Recollection of the Holocaust at the Catholic University of Lublin

2019-01-29

Until February 1, 2019, the First Commemoration of the International Day of Remembrance of Victims of the Holocaust in the Lublin region will take place, with the support of the Marshal of the Lublin Voivodeship, Jarosław Stawiarski. Until January 31, participants will be able to take part in a conference entitled «Holocaust and after the Holocaust ...» and in the meeting with survivors from the Holocaust and Polish representatives of the Righteous Among the Nations as well as listen to a lecture by Tomasz Chojnacki from the Catholic University of Lublin entitled «The fate of Jews in German concentration camps». The participants of the event will also be able to watch the film entitled «The Story of Irena Sendlerowa,» directed by Andrzej Wolf and to meet the director of the film and Irena Sendlerowa's daughter - Janina Zgrzebska. More: http://www.kul.pl/files/075/2019/programy/program_miedzynarodowego_dzien_pamieci_o_ofiarach_holocaustu.pdf

Deputy Minister of Science Piotr Dardziński on the Łukasiewicz Research Network

2019-01-29

- We wanted the Łukasiewicz Network Research Institutes to focus on tasks that are not assigned to universities. To provide knowledge and technology to entrepreneurs, and not to do didactics and awarding degrees - said Piotr Dardziński, deputy minister of science and higher education. However, the Deputy Minister stressed that this does not mean that there will be no PhD students in Łukasiewicz Network or that there will be no academic career there. This will be possible in cooperation with universities or institutes of the Polish Academy of Sciences. The main tasks of the Network are independent implementation of research projects of great importance for the country's economic policy, supporting the commercialization of the results of

research and development works and coordinating the implementation of such projects by institutes focused in the Network.

Center for Research on Diseases of Civilizations to be created at the Pomeranian University in Słupsk

2019-01-29

An interdisciplinary Center for Research on Civilization Diseases will be created at the Pomeranian University in Słupsk. The Ministry of the Interior and Administration has allocated PLN 1.7 million for this purpose. The Center was designed as an interdisciplinary center, allowing the implementation of topics from both basic and theoretical as well as clinical, epidemiological research, and also in the field of psychology and sociology of civilization diseases. The Center will establish laboratories for clinical, epidemiological and statistical analysis; research on metabolic processes as well as basic and experimental research of civilization diseases.

Researcher of the University of Zielona Góra appointed as an external examiner in biology

2019-01-29

Professor Leszek Jerzak from the Faculty of Biological Sciences of the University of Zielona Góra was appointed by the National University of Ireland as an external examiner in biology at medical universities: Royal College of Surgeons in Ireland in Dublin, RCSI in Bahrain and RUMC in Penang, Malaysia. The external examiner plays an important role in exams in the countries of the British education system - where it is required that at least one member of the examination commission should come from a different university. It is one of the oldest quality control systems in higher education - in the case of differences in the assessment of the examination by internal examiners, the deciding vote belongs to the external examiner. The work involves the analysis and quality control of biology exams in medical fields. The analysis is subject to compliance of the

test content with the knowledge passed on during classes and control or tests are understandable for students.

Koszalin University of Technology to participate in the international project „EngiMath - Mathematics on-line model in education”

2019-01-29

Koszalin University of Technology with other six higher education institutions will develop and implement modern methods of teaching mathematics at technical universities. The „EngiMath - Mathematics on-line model in education” project is financed by the European Union under the Erasmus + program. In addition to the Koszalin university, the following universities are involved in the project: Tallinna Tehnikakõrgkool (Estonia) as a coordinating university and Letterkenny Institute of Technology (Ireland), Instituto Politecnico do Porto (Portugal), Universidad Del Pais Vasco / Euskal Herriko Unibersitatea (Spain) and Universitatea Tehnică Cluj-Napoca (Romania). The aim of the activities is to develop and implement an innovative methods by using a variety of information technologies, means of communication and mathematics teaching model for students of engineering studies. The universities implementing the project will design and develop a course of mathematics for first-year students.

Adam Mickiewicz University in Poznan to become the coordinator of the European Master's Program in the field of Human Rights and Democratization

2019-01-29

University Adam Mickiewicz in Poznań and the Poznań Center for Human Rights will coordinate the Polish European Master's Program in the field of Human Rights and Democratization (E.MA). E.MA is a unique master's program enabling students to conduct their studies on theory and practice of human rights. The program has been carried out for over 20 years in 42 Universities of the European Union. After completing the first semester in a multicultural environment, the participants of the program prepare a diploma thesis at one of the European universities. The E.MA studies are completed by a unique European Master's Degree in Human Rights and Democratization, awarded jointly by all 9 universities. The best graduates can receive prestigious internships in the Council of the European Union and the European Commission, at the UN in Geneva and New York.

Competition for the most interesting PhD dissertations in the field of humanities devoted to modernity

2019-01-29

Until February 22, students can apply to the competition for the most interesting PhD dissertations in the field of humanities, dedicated to modern times. Prof. Alina „Inka” Brodzka-Wald competition is organizing the Academy for the Development of Philanthropy in Poland. Alina Brodzka-Wald was one of the most recognizable Polish historians and theoreticians of literature. To commemorate her life and merits, the Fund named after her was created. Its objective is development of science, education, culture, health care and social assistance. For the past six years it has been organizing a competition for the most interesting PhD dissertations defended in the year preceding the recruitment. The jury of the

competition consists of well-known representatives of the humanist community: Prof. Maryla Hopfinger-Amsterdamska; Prof. Grażyna Borkowska; Prof. Jan Kordys; Prof. Marek Zaleski and Dr Tomasz Żukowski from the Institute of Literary Research of the Polish Academy of Sciences. More: <http://www.funduszewieczyste.pl/pl/modele-funduszy-wieczystych/item/7-fundusz-im-prof-aliny-brodzkiej-wald>

AGH University of Science and Technology in Krakow opens new building for the Telecommunications Department

2019-01-30

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin, Minister of Entrepreneurship and Technology Jadwiga Emilewicz, the Małopolska voivode Piotr Ćwik and the authorities of the AGH University of Science and Technology in Krakow participated in the opening of the new building of the Faculty of Computer Science, Electronics and Telecommunications of the Kraków University. In the era of intense technological progress, specialized education in the field of ICT, telecommunications or cybersecurity is one of the areas to put a decisive emphasis – said Deputy Prime Minister Gowin during the ceremony. In such places the future of the Polish economy is coined. The new building has been constructed for the students of the Department of Telecommunications. The laboratories ultra-fast computer networks, LTE 4G / 5G cellular systems and wireless ICT networks will be launched in it.

Lazarski University in Warsaw looking for trainees to the Blockchain Technology Center

2019-01-30

Blockchain is a modern technology of distributed databases that cannot be counterfeited. It is resistant to cyber attacks, because its security is ensured by cryptography. The consortia of the largest companies in the world develop common blockchain standards for business purposes, that are formed at

a rapid pace. Cryptocurrencies are one of the possible applications of this technology. They are becoming more and more popular, despite significant fluctuations in capitalization. There are also new legal challenges in the regulation of this developing field, also at international level. All interested universities can contact at: blockchain@lazarski.edu.pl

Academy of Innovation for the University 2020

2019-01-30

The Polish Rectors' Foundation and the Chairman of the Conference of Rectors of Academic Schools in Poland are holding an event called the Academy of Innovation for the University 2020, which will take place on February 15 in Warsaw. - The Constitution for Science grants universities a huge autonomy in the process of strategy modeling, organizational structure or educational programs offered by universities. Wisely used EU funds can become a driving force for changes that Act 2.0 allows - emphasizes Prof. Łukasz Sułkowski, president of the PCG Academia Board, one of the organizers of the event. The organizers also include other companies from the Polish and global IT solutions market for universities: Blackboard, Microsoft, Inspera, Think Beyond, N-educat.io and 3strona.pl. Participation in the event is free for university representatives. The program and registration form are available at: www.AI2020.pl

Monoprofiled Center for Medical Simulation for Nursing at the University of Zielona Góra

2019-01-30

The University of Zielona Góra opened the Monoprofiled Center for Medical Simulation for Nursing. The investment was implemented under the Operational Program Knowledge Education Development 2014-2020. The project was co-financed from the European Union funds. The Center consists of a high-fidelity nursing room, two OSCE examination rooms, two technical skills workshops, a simulation hall in the field of basic and advanced resuscitation procedures (ALS and BLS), a room for nursing skills and rooms for staff. Classes in the Zielona Góra Center will start in the summer semester this academic year.

University of Silesia to invite for the third Postgraduate Studies in Regional Knowledge

2019-01-30

By February 15, the University of Silesia in Katowice will launch the third two-semester, interdisciplinary Post-Graduate Studies in Regional Knowledge. The studies are addressed to people who are particularly interested in Silesia and Silesian Voivodeship. Graduates will learn how to use effective and attractive methods and forms of education during academic classes as well as during field activities. The study program includes workshops in important places in Silesia. Students will carry out exercises there, which they will use to work with students and directly meet people who are a source of knowledge about the region. Graduates will be perfectly prepared to play the role of regional education leader (creating original regional classes, regional programs and other forms of education related to knowledge about Silesia).

University of Life Sciences in Poznan organizes a course for people interested in beekeeping

2019-01-30

University of Life Sciences in Poznan invites everyone who wants to know the biology of the honey bee and the basic principles of running an apiary. The condition for participation in the course is the age of 18 or more and no medical contraindications to work in the apiary. The course will start in March and is intended for both those who have just started their first apiaries and those who are planning it. Classes will be held at the Department of Ownership Breeding of the University of Life Sciences in Poznań (theoretical part) and in the apiary in the field station in Swadzim near Poznań (practical part). The lecture topics will include biology of honeybee and bee colony; apiary economy; bee diseases and pests and basics of beekeeping botany. Practical classes will include family reviews, preparing families for the production of honey and honey harvesting.

Prof. Juliusz Chrościcki to hold a lecture in the Museum of the University of Wrocław

2019-01-30

The Museum of the University of Wrocław invites participants on February 1 for a lecture by Prof. Juliusz Chrościcki „READING LETTER of Jan Vermeer van Delft”. Professor Chrościcki is one of the greatest Polish historians of modern art and a specialist in the field of iconography of power. The lecture will be devoted to a chosen motif in the work of one of the most famous painters in history: Jan Vermeer van Delft. This Dutch artist is considered to be the master of genre scenes, especially the pictures of women in residential interiors, occupied with everyday activities, such as reading. Professor Chrościcki has been associated with the University of Warsaw, where he has been the deputy dean and dean of the Historical Department. He was the director of the Polish center at the Sorbonne in Paris. He is a co-creator and editor-in-chief of the journal «Baroc-

co. History-Literature-Art» and the author of numerous scientific publications on the history of art and culture of modern Europe.

Jagiellonian University to launch the Bangladesh Studies Center „Bangabandhu”

2019-01-31

Rector of the Jagiellonian University in Krakow Prof. Wojciech Nowak and Ambassador of the People's Republic of Bangladesh in Poland Muhammad Mahfuzur Rahman signed an agreement for establishing Bangladesh Center „Bangabandhu” for Bangladesh Studies at the Jagiellonian University. The Center's task will be to initiate, support and develop educational and research activities in the field of Bangladesh studies. It will be the first unit of this type in Europe. The Bangladesh Studies Center «Bangabandhu» will be established at the Institute of Middle and Far East of the Faculty of International and Political Studies of the Jagiellonian University.

Delegation from Angola visits the Krakow University of Agriculture

2019-01-31

The University of Agriculture in Krakow was visited by the delegation of Angola, headed by Domingos Culolo, ambassador of the Republic of Angola in Warsaw. The subject of the talks was the possibility of extending research and teaching cooperation between the Krakow University of Agriculture and universities in Angola. The cooperation so far has been based mainly on contacts with Universidade Kimpa Vita (UniKiVi) in Uíge, with which the Kraków University conducts academic exchange. The positive experience in that cooperation provides opportunities for rapid and intensive development of contacts between the University of Agriculture and other public universities in Angola.

First postgraduate studies of the Warsaw School of Economics receive a global certificate

2019-01-31

The programs of two post-graduate studies at the Collegium of Economic Analysis of the Warsaw School of Economics (SGH) have successfully received accreditation and can offer their students a global business analytics program in the field of business analytics. The graduates of the studies «Statistical Analysis and Data Mining in Business» and «Academy of Analytics with SAS, R & Python» receive the certificate of graduation and local and global SAS Institute certificates. The granting of global certificates for two postgraduate studies at the Collegium of Economic Analysis is a proof of a high evaluation of the program offer, which is updated from year to year in accordance with the needs of the latest challenges, standards and requirements of business analytics in the world.

Polish government adopted a draft law on supporting scientific activities from the Polish Science Fund

2019-01-31

The Council of Ministers has adopted a draft law on supporting scientific activities from the Polish Science Fund submitted by Minister of Science and Higher Education Jarosław Gowin. The act will create a new mechanism for financing research and development works and their commercialization. The fund is to support the creation of virtual research institutes, providing stable public funding at a level that allows achieving a specific effect in a selected area of science over a period of 5-10 years. - The adoption of the project on the Polish Science Fund is an important milestone on the road to enriching Polish science and the Polish economy with this component of knowledge that we all need so much - said Prime Minister Mateusz Morawiecki. Also, the deputy minister of science Piotr Müller stressed that the creation of virtual research institutes is an opportunity especially for Polish outstanding scientists

dealing with biotechnology and biomedicine. The amount of 500 million PLN will be directed to research in these areas.

Students of Warsaw University of Technology changing Starachowice

2019-01-31

The students of geodesy and cartography of the Warsaw University of Technology arrived to Starachowice, a town of 50,000 inhabitants in the Świętokrzyskie Province, with their own works, presenting not very attractive places of Starachowice before and after the changes. The students were invited by the city authorities, as part of the cooperation that has been going on for several years. Projects were presented at the seminar organized in the municipal office of changes in settlements and municipal facilities. Marek Materek, mayor of Starachowice stressed that student projects presented 4 years ago, concerning the new development of the city park have been implemented. He assured that also this year's proposals of Warsaw students will be implemented.

University of Silesia to hold a conference about integration in multicultural social and educational environments

2019-01-31

The University of Silesia invites participants to the conference „Integration in multicultural social and educational environments”, which will take place on March 26, 2019 at the Department of Ethnology and Educational Sciences in Cieszyn. The conference is a continuation of the series „Activation of individuals, groups and communities in the local environment” dedicated to selected areas of social pedagogy. The organizers announce the following topics: multidimensional integration processes; social policy for inclusion; diagnosing and designing activities for qualitative changes of inclusion processes; school environment for integration; determinants of integration behavior of educational entities and integration in theory and practice. The co-organiz-

ers of the conference are the Institute for Identity Research of the European Pedagogical Faculty and the Department of Slavic Studies of the Faculty of Philosophy of the University of Ostrava; Association for Supporting Intercultural Education and the Polish Pedagogical Society.

Conference on industry 4.0 and the future of the manufacturing industry to be held in Szczecin

2019-01-31

Regional Center for Innovation and Technology Transfer of the West Pomeranian University of Technology in Szczecin invites participants on February 12 for the first in Szczecin seminar for small and medium-sized companies on industry 4.0 and the future of the manufacturing industry. The meeting is intended for owners, managers and managers of companies from the sector of small and medium-sized enterprises in the manufacturing and logistics industries and related industries. Its aim is to familiarize entrepreneurs with the possibilities of introducing solutions in the field of digitization, IT, robotics and automation in companies - that is entering the era of industry 4.0. The program of the event includes speeches of managerial staff from Poland and Germany as well as a discussion panel that will be conducted by specialists in the field of industry implementation 4.0. It will be a great opportunity to exchange experiences and talk with potential partners who have already implemented technology 4.0 in their companies.

Jagiellonian University establishes its first university council

2019-02-01

The Senate of the Jagiellonian University in Krakow appointed the first university council to perform their activities until the end of next year. It consists of seven people, including three from outside the JU community. The creation of such bodies at public universities is provided by the new Act on Higher Education, which entered into force on October 1, 2018. In accordance with the provisions of the Law on Higher Education and Science, the Senate of the Jagiellonian University appointed the first university council, which included: Prof. Grażyna Stochel, Dr Dorota Szumska, Prof. Jerzy Wordliczek, Dr Mikołaj Budzanowski, Prof. Jacek Purchla, Dr Zbigniew Ingłot and Jakub Bakonyi. The University Council will give an opinion on the draft of the new Statute of the Jagiellonian University, will indicate candidates for the rectors to be elected in 2020. It will also accept the sale of certain assets of the Jagiellonian University.

Senate of the University of Białystok honored the distinguished employees of the university

2019-02-01

On January 30, 2019, the Senate of the University of Białystok awarded the „Medal of the University of Białystok” and titles „Merited for the University”. «Medal of the University of Białystok» was received by Prof. Bazyli Poskrobko. By the Vice-Rector for Education, Dr Wojciech Śleszyński, Prof. Poskrobko is an outstanding Polish economist, a leading specialist in the field of environmental economics. He has put a lot of effort for the development of the Faculty of Economics and Management, where he has been working from the mid-eighties. The title of «Merited for the University» was awarded to Andrzej Branicki (Faculty of Physics), Prof. Beata Izabella Godlewska-Żyłkiewicz (Faculty of Biology and Chemistry), Prof. Dariusz Ryszard Kijowski (Faculty of Law), Dr Józef Maroszek (former scholar of the

Faculty of History and Sociology), Prof. Bogusław Nowowiejski (Faculty of Philology), Regina Maria Sokołowska (central administration).

Rzeszow University of Technology to help create classes for aircraft mechanics

2019-02-01

The Rzeszów University of Technology will support the creation and providing aviation technician classes and avionics technician classes at the School Complex No. 2 in Łańcut. This is the result of the agreement signed between the university and the municipality in Łańcut. Classes of the aviation industry at the School Complex No. 2 in Łańcut are the effect of the agreement signed by the Powiat Eldership in Łańcut with EME Areo. The company, which is a joint venture of the tycoons in the aviation industry - German airlines Lufthansa and MTU Aero Engines, is building in Jasionka near Rzeszów a plant where the latest generation of aircraft engines will be serviced. Ultimately, it is planned to employ over 1,000 people, half of whom will be aircraft mechanics. The company is to help develop training programs in new classes and provide internships.

National Center for Nuclear Research signed a cooperation agreement with the University of Tokyo

2019-02-01

Professor Tatsuya Okubo, dean of the School of Engineering at the University of Tokyo and Prof. Krzysztof Kurek, director of the National Center for Nuclear Research (NCBJ), signed an agreement on academic exchange between the institutions he represents. The agreement signed for a five-year period provides for the exchange of scientists, students and administrative staff, conducting joint research, organizing lectures and symposia, and exchanging scientific information. NCBJ strives to establish scientific contacts with all leading research institutions in Europe, America and Asia. - We would like to use the Japanese experience in educating our PhD students. We also intend to conduct joint research,

among others. using the Japanese infrastructure as well as the unique opportunities offered by the Maria research reactor operating at NCBJ – said director Kurek.

Silesian University of Technology to launch an interdisciplinary course - nanotechnology

2019-02-01

Silesian University of Technology is launching the second degree studies on the interdisciplinary field of nanotechnology implemented by seven faculties of the university. Classes will be conducted in the summer semester, in the design mode with individual academic care. Students of the new field will acquire interdisciplinary knowledge in the field of physics, chemistry, material engineering, designing the structure and properties of engineering materials, as well as their production technologies combined with the ability to use modern IT tools used for numerical simulations of phenomena and processes in nanotechnology. Graduates will become the appropriate staff for technologically advanced industrial enterprises in the sectors of modern technologies related to electronics, optoelectronics, optics, photonics, medicine and pharmacy, environmental protection, automotive, aerospace, machine, textile and clothing, cosmetics, agricultural and food industries.

Researcher of the University of Zielona Góra becomes an expert of the European Commission

2019-02-01

Dr Piotr Mysiak, vice-dean for science and quality education at the law and administration faculty of the University of Zielona Góra became an expert of the Executive Agency for Education, Culture and Audiovisual Sector of the European Commission (EACEA). EACEA manages financial resources designated for education, culture, audiovisual sector, sport or civic activity. Its mission is to support the European Commission in the implementation and running of projects and funds in these areas. One of the agency's most well-known activities is the Erasmus + program promoting international exchange in higher education. It was the field of expertise of Dr Mysiak, who will also take part in the next evaluation session of projects submitted for the Erasmus + competition Capacity Building in the Field of Higher Education.

Opole University of Technology receives a new electron microscope

2019-02-01

A specialized material engineering laboratory of the Opole University of Technology has been equipped with the Scanning Electron Microscope JSM-840A with the Energy Dispersive Spectroscopy (EDS) system enabling work at magnifications up to 300,000 times. The new microscope, in combination with EDS X-ray microanalysis, is a powerful tool allowing to determine the elemental composition of samples with a size of several micrometres or create a map of the distribution of elements in a larger area of the sample with micrometric spatial resolution. Scanning electron microscopy with the EDS system is a useful and increasingly common technique for characterizing surfaces and structure of materials - mainly morphology and elemental composition. It allows the observation of both organic and mineral samples at very high magnifications, and its use is very wide.

Student of the AGH University of Science and Technology built a robot from the „Star Wars”

2019-02-04

Weronika Muszyńska, student of the Faculty of Metal Engineering and Computer Science at AGH University of Science and Technology in Krakow, has built a replica of the BB-8 robot appearing in the latest parts of the Star Wars saga, as part of her engineering work. She designed «BB-8 mobile robot and implementation of control software» and thus replicated the droid in 1: 1 scale, using parts printed in 3D technology. Her model can move, and the user is able to manage it using a specially written application and software prepared by the constructor. BB-8 moves in the same way as its film prototype.

Cedrob to subsidize scientific research of the Warsaw University of Life Sciences

2019-02-04

Researchers from the Faculty of Production Engineering of SGGW of Warsaw University of Life Sciences (SGGW) have completed scientific research entitled „Ways of developing a bird poultry farm” thanks to the financing obtained in the competition „We support development” organized by the company Cedrob S.A. As part of the subsidy, the research team purchased the necessary equipment, a muffle furnace, a granulator with exchangeable matrices, a flue gas analyzer and a laboratory scale. The manure research at the SGGW Analytical Center was also financed. The results of the research will be presented at the international conference Biosystems Engineering 2019 in Tartu, Estonia and published in the journal Agronomy Research.

Łódź University of Technology to start cooperation with a biotechnology company Bio-Gen

2019-02-04

One of the leading biotechnology companies in Poland Bio-Gen has signed a cooperation agreement with the Lodz University of Technology. - The ability to use the knowledge and experience of Bio-Gen specialists is of great importance to us, both for scientific and educational projects - said the dean of the Faculty of Biotechnology and Food Sciences Prof. Maria Koziolkiewicz. The prospect of cooperation in organizing internships for students, educational meetings and conducting joint research and development of new technologies are also important factors. The Bio-Gen plans to employ several hundred new, young employees in Łódź. Its cooperation with the Lodz University of Technology is a chance for the company to select the best candidates.

National Academic Exchange Agency to select projects for the next program Polish Returns

2019-02-04

The National Academic Exchange Agency (NAWA) has started the selection of projects for the second Polish Returns program, which is addressed to Polish researchers working at universities around the world. Its aim is to encourage the return of native scientists who are successful in scientific and teaching works in foreign research centers. The Polish Returns program is the only grant offering Polish scientists residing in research centers abroad the opportunity to return to Poland in order to create their own project group and conduct research taking into account world-class financial conditions. 22 projects were financed in the first program in 2018. More: <https://nawa.gov.pl/naukowcy/polskie-powroty/ogloszenie>

Cooperation of the University of Economics in Katowice and Ternopil National Pedagogical University

2019-02-04

The University of Economics in Katowice will cooperate with the Ukrainian Ternopil National Pedagogical University. The agreement provides for scientific-research and didactic cooperation and is part of the internationalization strategy of the University of Economics. The agreement was positively evaluated by the Senate Committee for International Cooperation and signed by Dr Robert Tomanek, Rector of the University of Katowice and Bogdan Buyak, Rector of Ternopil Volodymyr Hnatiuk National Pedagogical University. As part of the agreement, the Polish university is planning to provide the visits of students of Tourism Economy in Ukraine, conducting basic research, joint publications and implementation of possible projects in an international research team.

Researcher at the University of Wrocław becomes Ambassador of the Fulbright Program

2019-02-04

Dr Mateusz Świątlicki from the Institute of Slavonic Philology at the University of Wrocław became an ambassador of the Fulbright Program in the province Lower Silesian and neighboring provinces. He was selected through an open competition from over 2,000 Polish graduates. The Fulbright program is the largest program of scientific and cultural exchange in the United States. It is considered by many to be one of the most prestigious exchange programs in the world. For over 70 years, it has supported cooperation for the development of science, culture and interpersonal and interinstitutional relations between the United States and over 160 countries. Mateusz Świątlicki, specialist on America and Ukraine issues, is a doctor of humanities in the field of literary studies at the Wrocław University. As part of his new duties, he will organize information meetings for the aca-

dem environment of the University of Wrocław and other universities in the Lower Silesian Voivodship and neighboring provinces.

PhD students of the University of Silesia invite participants to the conference „Humor Research Project”

2019-02-04

The PhD NEOLinguists Scientific Circle supported by the Institute of English, the Institute of English Language Cultures and Literatures, and the Institute of Romance Languages and Translation Studies at the University of Silesia invites participants to the Humor Research Project, which will be held on 4 and 5 April. The aim of the conference is to enable an exchange of views on the perception of humor through the different paradigms to look at the phenomenon and its interdisciplinary and universal character, and encourage debate on the place of humor in language, culture and scientific research. Conference topics include various realizations of humor in literature and translations; sense of humor perceived through linguistics; cultural, intercultural and multicultural aspects of humor; examples of humor in research on media and visuality; the role of humor in methodology and teaching, and the importance of humor and laughter in cognition and social interaction. Multiprofiled Center of Medical Simulation to be created at the University of Zielona Góra

2019-02-04

The University of Zielona Góra began the construction of the Multiprofiled Center of Medical Simulation at the Medical Faculty (WCSM). The task is implemented since January and will be completed in the middle of 2023. The rooms of the Center ensure the preservation of the communication route and the continuation of the scenario from pre-hospital care to the hospital rooms. Within WCSM simulation, students of the medical faculty will find high-fi-

delity rooms including an ambulance simulator, a Hospital Emergency Department, an intensive care unit, an operation room, a delivery room, simulation rooms for basic and advanced resuscitation procedures (ALS and BLS), and a surgical room. Also, the «Standardized patient» program will be implemented within the project. The value of the project is approximately PLN 16.5 million, of which the construction costs 5.5 million PLN. The remaining 11 million PLN will be spent to provide simulators and medical equipment. The WCSM surface will be 1 135 sq m.

Warsaw University of Technology bought the airport in Przasnysz

2019-02-05

Warsaw University of Technology bought over 70 hectares of land in the Przasnysz Economic Zone in Sieraków with a Przasnysz airport located there from the self-government of Przasnysz. The Warsaw university wants to create an experimental and implementation area. They are planning to build a laboratory facility to research the light aviation and unmanned aerial vehicles. The University of Technology acquired the area for 2.5 million PLN, which is about 20% of its market value. According to the head of the Przasnysz Poviát, Krzysztof Bieńkowski, the unpaid 80% is a contribution granted by the poviát to the implementation of the project, which can develop the Przasnysz region.

Ministry of Science to establish Commission to monitor the implementation of the higher education and science reform

2019-02-05

Pursuant to the Ordinance of the Minister of Science and Higher Education, a special commission of 12 people was appointed to monitor the implementation of higher education and science reform. The commission consists of 12 outstanding scientists and representatives of the academic community. The head of it is Prof. Maciej Żylicz, biochemist and molecular biologist, president of the Board of the Foundation for Polish Science. The tasks of the team include: analysis of the effectiveness of activities undertaken in connection with the implementation of the reform by entities of the higher education and science system; development of proposals for good practices in the implementation of the reform and its recommendations of the minister competent for higher education and science, and solutions or tools supporting the implementation of the reform.

Conceptually Revolutionary University of Competence for students from Wielkopolska

2019-02-05

Piła Nadnotecki Institute of the Adam Mickiewicz University in Poznań will carry out a project to raise the level of competences of students from northern Wielkopolska - „KRUK” - Conceptually Revolutionary University of Competence. KRUK is an educational program about the amazing world of nature, humanity and technology, which uses non-standard and very unobvious methods of education, resulting from the conclusions of the latest research in the field of neuroscience and sociobiology to educate the competence to acquire experience independently. The training studies will start in April. The leading idea of the project, co-financed from EU programs, is communication in nature, society and the virtual world. During the course, the students, with the support of trainers, will independently acquire knowledge from three areas: exact sciences,

social sciences and information and communication technologies. More: <http://krukuam.cba.pl/>

Scholars of the University of Silesia to participate in two European mobility programs

2019-02-05

Scholars of the University of Silesia will take part in two mobility programs organized by the European Association of Communication Professionals in Higher Education EUPRIO. Giga Gogosashvili from the International Students' Recruitment Office will take part in the project «Steps and tools for a competitive Alumni Association / Alumni Relations Office» regarding to the relationship with foreign graduates. The leader of the project is the Brno University of Technology in Brno. Jacek Nowak from the Office for Cooperation with the Economy participates in the team that deals with cooperation between universities and cities - «The university & the city: how to really step down from our ivory towers and engage with citizens». The project leader is the Technical University of Delft (Netherlands). The EUPRIO is involved in cooperation between European universities in communication and promotion, as well as in the work of university press offices, PR and marketing departments. The University of Silesia is a member of EUPRIO since 2017.

Music in public space - studies at the University of Humanities and Natural Sciences in Częstochowa

2019-02-05

University of Humanities and Natural Sciences in Częstochowa launches a new field of study - Music in public space. Applications for a three-year vocational studies can be sent until the end of May. The course offers specialties: artistic animation and stage music with specialization of stage vocal. Graduates will be able to take up the work of a manager-animators of musical activity in cultural institutions, such as philharmonics, concert halls, cultural centers, music bands and the media. Students will acquire knowledge and skills in organization and

management of cultural institutions; initiating and organizing cultural events, becoming a music impresario; implementation of artistic projects; financing of culture and promotion and marketing of cultural goods and general musical preparation (playing on instruments, conducting, singing, ear training, music history). Opole University of Technology to participate in the international project to improve air quality

2019-02-05

Opole University of Technology is one of the beneficiaries of the project „Implementation of the air quality management system in the self-governments of the Opolskie Voivodeship” co-financed by the European Union. The coordinator of the project is the voivodship self-government, it is attended by 26 communes of the Opole region and the Czech regions - Moravian-Silesian and Olomouc. The aim is to increase the capacity and improve the quality of public administration activities at all levels, in relation to the corrective actions set out in the air protection plan (POP). The implementers want to achieve this goal by preparing and implementing at all levels of the self-government (commune, poviat, voivodship) a uniform information system supporting the implementation of POPs and increasing public awareness in the field of air quality. The value of the entire project is EUR 2.8 million, of which 55% is allocated by the European Commission LIFE Program.

SUNRISE receives one million euros for research converting solar energy into fuel

2019-02-06

The SUNRISE consortium, including the University of Warsaw, Leiden University, University of Uppsala, the French Alternative Energies and Atomic Energy Commission, the Italian National Research Council, the European Energy Research Association, and Siemens AG, has received a grant from the European Commission for a project on the use of solar energy in circular economy. Researchers are to create a roadmap for research aimed at converting solar energy into fuel and other high-value chemical products. The researchers intend to be an alternative to energy based on fossil raw materials. The project is financed under the Horizon 2020 program. The consortium received an annual grant of EUR 1 million within the Future and Emerging Technologies-Coordination and Support Action call.

University of Rzeszów receives new PhD entitlements

2019-02-06

The Faculty of Medicine and the Faculty of Law and Administration of the University of Rzeszów (UR) have been granted the right to confer the PhD degree. By the decision of the Central Commission for Degrees and Titles, the Medical Faculty of UR was granted the right to confer the title of PhD in medical and health sciences. -This is another step in developing medicine at the University of Rzeszów - emphasizes Dr Maciej Ulita, spokesman for the Rzeszów University. The same decision was taken by the Central Commission in relation to the Faculty of Law and Administration, which was granted the right to confer the title PhD of social sciences in the legal sciences.

Łódź universities sign Agreement on cooperation

2019-02-06

Rector of the Lodz University of Technology - Prof. Sławomir Wiak and the rector of the Medical University of Lodz - Prof. Radziśław Kordek signed a

letter of intent on cooperation under the EcoUMED program. The project is to support pro-ecological activities carried out for the sustainable development of Łódź universities. In the signed document, the signatories expressed their interest in new, joint scientific and research projects on the application and interdisciplinary nature. One of the important areas of cooperation will be the diagnosis and prevention of the 50+ society. The university's cooperation will also concern the modernization of the infrastructure of the Medical University, including the development of the «smart buildings» as well as autonomous transport using 5G technology.

Celebrating 100th anniversary of the AGH University of Science and Technology

2019-02-06

As part of the celebrations of the 100th anniversary of the AGH University of Science and Technology in Kraków, students working at the Metal Scientists Scientific Circle at the Faculty of Metal Engineering and Computer Science AGH decided to organize a cruise on the Mediterranean on the Pogoria sailing ship. «The 100th anniversary of the AGH UST» will last from 16 to 23 February 2019. During the sea expedition, a conference will be held on board of the ship titled «100 years of AGH - unforgettable memories», under the auspices of Prof. Anna Siwik, the rector for student affairs of the AGH. Both events will be an opportunity for a multigenerational meeting of faculty employees as well as former and present members of the scientific club. The cruise is also a non-standard and attractive form of promotion of AGH and Jubilee of the university.

ProspectUS project inaugurated at the University of Silesia

2019-02-06

The University of Silesia started the implementation of the project „ProspectUS - the concept of strengthening the research position”. The project analyzes will be a source of data in order to develop the objectives and assumptions of the long-term university

development plan. The project will be implemented by seven teams created by research and teaching staff, administration and management, as well as external experts. Actions called «Silesian research» are to serve primarily to strengthen the research potential of the university. The current state of the university will be analyzed: scientific activity in the area of individual scientific disciplines, the level of research cooperation and the quality of education, as well as the analysis of the academic environment will also be carried out, including study on the importance of trends in civilization changes, styles and ways of life of the society and political conditions in the national and international dimensions.

Wroclaw University of Economics extends cooperation with IBM

2019-02-06

Wroclaw University of Economics extends cooperation with IBM. The agreement was signed by the rector of the university - Prof. Andrzej Kaleta and general director of IBM Global Services Delivery Center Polska Ltd (IBM GSDC) - Izabela Olszewska. The University cooperates with IBM GDSC in the organization of three postgraduate programs: Team leader; Project Management and Cyber Security Management. The signed contract extends the existing - six-year long - cooperation for further education to the basic area program. Over the next three years, nearly two thousand hours of workshops, trainings, summer schools for students and students from 9 faculties of the university will be provided as part of the PORTAL project - the Integrated Development Program of the University of Economics in Wrocław.

Polish scientists to participate in the project of studying the nitrogen circulation in urban space

2019-02-06

Researchers from Austria, China and Poland will implement the project „Nitrogen circulation in urban space: a new economic approach (UNCENT) to meet the challenges of climate change”. The head of the Polish team is Dr Eng. Monika Suchowska-Kisielewicz from the University of Zielona Góra. Contamination with nitrogen has been considered one of the most serious global challenges. The most important sources of nitrogen compounds are agriculture and soil fertilization, combustion processes, landfills and waste processing installations as well as sewage treatment plants. The aim of the project is to create «urban nitrogen balances», to identify the causes and routes of release of these compounds and methods of counteracting, taking into account the recovery of useful materials - such as nutrients. The amount of over 874,000 PLN is allocated from the Sustainable and Liveable Cities and Urban Areas call financed by the Chinese NSFC agency and the JPI Urban Europe network including the National Science Center belongs.

Nicolaus Copernicus University positioned high in Torun in international rankings

2019-02-06

New year brought new world university rankings that confirmed the position of the Nicolaus Copernicus University in Toruń (UMK) in Poland and its stable international reputation. In the latest Transparent Ranking, based on the results of 10 top and most-cited researchers from the university according to the Google Scholar database, UMK took 849th place in the world and turned out to be the best Polish university. In the QS Emerging Europe and Central Asia ranking, UMK is in 88th place (107th a year ago) remaining the 13th university in Poland. This is one of the three most prestigious ratings, which takes into account the opinions of lecturers

and employers, quotations of their publications and percentage of lecturers and foreign students. In the January Webometrics ranking, which is based on a composite indicator and examines the presence of academic and research institutions on the Internet, UMK was ranked 762th, maintaining the 7th position in Poland.

Polish-French Year of Science

2019-02-07

Ministers of science and higher education in Poland and France - Jarosław Gowin and Frédérique Vidal, signed a joint declaration on the organization of the Polish-French Science Year. The event will enable deepening and enriching cooperation between Poland and France, in particular between Polish and French higher education institutions and research institutions. The year of science will be officially inaugurated in Paris in March 2019, on the occasion of the 1st Polish-French Forum of Rectors and Presidents of Universities, and will end in Poland in December 2019.

Collegium Civitas to hold a seminar on combating the financing of terrorism

2019-02-07

The Collegium Civitas Center for Research on Terrorism in Warsaw and the House of History invite participants to a seminar devoted to combating the financing of terrorism. The seminar will take place on 15 February as part of the interdisciplinary program «Views on terrorism», which aims to provide the listeners with the history of the fight against terrorism. Such meetings are an opportunity to discuss the evolution of means and methods of this fight, and the axis of the program is the history of terrorism in the twentieth century. The seminar will be attended by experts in the strategies of fight against terrorism, its financing and money laundering: Dr Wojciech Filipkowski, Dr Wojciech Szewko and Dr Krzysztof Liedel. Food safety - a new course of the University of Jan Długosz in Częstochowa

2019-02-07

Faculty of Mathematics and Natural Sciences, University of Humanities and Natural Sciences in Częstochowa is launching new post-graduate studies in the field of food safety and quality. The curriculum includes modules: commodity science and food technology, food hazards, organizational and legal aspects of the operation of food production plants, food safety systems, quality management, food and nutrition quality, quality and food safety management systems and food standards. These are studies for educated professionals employed in units associated with the production, distribution and control of food, and for educated professionals people who want to improve their competences. Their goal is to systematize and broaden knowledge in the field of food safety and quality.

Student of the Adam Mickiewicz University awarded by the Polish Chinese Business Council

2019-02-07

Joanna Nowotna, a student of sinology at the Adam Mickiewicz University in Poznań, took the second place in the diploma thesis competition, organized by the Polish Chinese Business Council. The prize for the Bachelor's thesis «Electronic payments in China: historical background, current status and development prospects» is an internship at the Polish branch of Bank of China. The laureate continues her master's studies, at the same time realizing the post-graduate program of the School of Law and Economy of China at the University of Warsaw. The organizer of the competition was the Polish Chinese Business Council, in cooperation with Bank of China, HSBC Bank Poland and Haitong Bank. The competition was supported by the Ministry of Enterprise and Technology, the Ministry of Science and Higher Education and the Embassy of the People's Republic of China in Poland. The goal of the competition is to create future leaders and experts in business cooperation between Poland and China.

World Wetlands Day of the Maria Curie Skłodowska University in Lublin

2019-02-08

The Faculty of Geosciences and Spatial Management of the Maria Curie Skłodowska University (UMCS) in Lublin invites participants on February 8, 2019 to celebrate the World Wetlands Day. The event will be a series of open popular science lectures and workshops about the problems of wetlands. The University's scholars, students and graduates of the Faculty and invited guests: Andrzej Różycki (Poleski National Park), Barbara Grzebulska (Regional Ecological Center) and Krzysztof Wojciechowski (Team of Lublin Landscape Parks) will provide participants with the issues related to wetland biodiversity, their protection, and the impact of wetlands.

University of Warsaw to hold Forum of the European University Association on teaching and learning

2019-02-08

The EUA European University Association, which also includes the University of Warsaw (UW), organizes a forum devoted to the issues of learning and teaching „Towards successful learning: Controversies and common ground” at the Warsaw University on February 14-15, 2019. The European University Association is an institution that consists of over 800 universities and national conferences of rectors from 48 countries. Over 250 people will take part in the Warsaw forum, including vice-rectors, deans, researchers involved in the subject of teaching as well as political decision-makers and students. The forum will consist of three sessions devoted to teaching objectives, European policies related to learning and teaching and two different approaches to learning - presented by University College Cork and by the University of Oslo More: <https://www.eua.eu/events.html?task=euaevents.download-Doc&id=1931>

University of Silesia to hold a seminar on improving the quality of life in the city

2019-02-08

On March 1st, the Observatory of Municipal and Metropolitan Processes at the University of Silesia in Katowice invites participants to the seminar. „Towards nature, or how to improve the quality of life in the city?“ The meeting is part of the Local Government Academy - a program promoting specialist knowledge supporting the activities of local government and building cooperation between its representatives and experts from various fields of science. The subject of the nearest seminar focuses on the issue of natural resources management in order to improve the quality of life of urban residents. The Observatory of Municipal and Metropolitan Processes is an entity of the University of Silesia, where researchers working in research teams carry out, sectoral analyzes for the needs of local government units and provide expert services.

Darwin's birthday to be celebrated at the University of Wrocław

2019-02-08

The Institute of Psychology of the University of Wrocław and the Polish Society for Human Sciences and Evolution invite participants to a series of popular science events on the occasion of Karol Darwin's birthday. As part of the Darwin Days, students of psychology and biology will conduct workshops on the basics of biology and biological foundations of psychology. Over 500 pupils from 9 primary schools in Wrocław will take part in classes, where they will learn how natural selection works, where emotions come from and how the brain is built (and why exactly). For adults, open popular science lectures are prepared in the hall of the Institute of Psychology at the University of Wrocław, ul. Dawid 1 (start at 18.00). The dates and topics of lectures are: February 11 - Evolution of Romantic Love; February 12 - Evolutionary meanders of human nature and February 13 - Revival of mammoths, dinosaurs and Neanderthals. About ancient DNA. After each lecture a session of questions from the audience is planned.

Researchers from the Lviv University of Technology visit Gliwice

2019-02-08

Silesian University of Technology hosted a delegation of scientists from the Lviv University of Technology. Representatives of the Ukrainian university spent two days in Gliwice, during which they became acquainted with the achievements of the faculties and the research programs implemented on there. The guests visited the faculties of Mechanical Technology, Automation, Electronics and Information Technology, Construction, and Environmental Engineering and Energy. They talked about the research and didactic processes carried out at particular faculties. The implementing dual studies in Ukraine on the basis of EU experience and the concept of building control systems and visualization of water supply networks in cities based on the Matlab program were also discussed. The University of Gliwice has expressed interest in exchanging experiences in the form of temporary employment of scholars from Lviv - involving them in the process of scientific research and the didactic process.

Scientists to study the habits of Warsaw squirrels

2019-02-11

Scientists of the Warsaw University of Life Sciences will conduct research on the habits of Warsaw squirrels. Scientists will take a closer look at rodents living in the Łazienki Park and the Las Natoliński. The animals are already equipped with special transmitters. Research in the Royal Łazienki Park and the Las Natoliński will allow to compare the habits of independent herds inhabiting green areas with various degrees of human interference. In the experiment, the scientists will use the so-called CMR (capture-mark-recapture) method. This means that the squirrels were marked with earrings with an individual number and equipped with radlets with radiotelemetric transmitters. Research conducted in the winter will allow to deduce how different sources of food may influence squirrels.

Lodz University of Technology receives certificates for biotechnology

2019-02-11

In recognition of the high quality of education the biotechnology course at the Lodz University of Technology by the Faculty of Biotechnology and Food Sciences received the certificate of the Accreditation Committee of Technical Universities (KAUT) and the European quality mark - EUR-ACE Label. The Faculty of Biotechnology and Food Sciences was visited by KAUT experts and European experts associated in the ENAEE (European Network for Accreditation of Engineering Education). One of the tasks of ENAEE is to provide European education programs with a certificate that confirms a high level of education. Biotechnology course received the KAUT accreditation for five years from the academic year 2018/2019.

Silesian University of Technology starts cooperation with Asseco Data Systems

2019-02-11

Silesian University of Technology has signed a cooperation agreement with Asseco Data Systems. The partners will cooperate primarily on the didactic, research and organizational levels. According to the provisions of the agreement, students and PhD students of the University of Technology will be able to take internships in the company, as well as write diploma and PhD dissertations on topics related to its activities. Also special internships will be organized for graduates and scientists. The signatories of the agreement also plan to launch joint MBA studies in the field of cyber security as well as university and project management, as well as to organize projects promoting IT, including competitions and training. The implementation of joint research projects is also planned. Asseco Data Systems is one of the most modern companies in the IT sector. It provides products, services and IT solutions for enterprises and local government administration. More: <https://www.polsl.pl/Lists/Aktualnosci/Uczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci&Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2570>

Scholar of the University of Economics in Katowice published in a prestigious journal

2019-02-11

Dr Jan Konowalczyk from the University of Economics in Katowice is implementing the project „Methodology for estimating the value of damage on real estate midwives in areas of limited use of airports in Poland“. Apart from the scholars of the Katowice University's Investment and Real Estate Department, the research involves scientists from five other Polish universities. The results of their work have recently been published in the prestigious journal Sustainability, which is on the Philadelphia list. The text «Investigating the Impact of Airport Regional Policy in Poland», co-authored by Dr Konowalczyk, begins a series of publications in domestic and foreign magazines. The effects of research, implemented since 2016, have already been presented at prestigious conferences in Boston (USA, AAG 2017), Delph (Holland, ERES 2017), Bonita Springs (USA, ARES 2018), Guangzhou (China, AREUEA 2018).

Professor Maciej Żylicz to hold a lecture on „Micro-evolution of cancer cells“ at the University of Wrocław

2019-02-11

University of Wrocław invites participants on February 21 for a lecture of an eminent biochemist Prof. Maciej Żylicz, entitled: „Micro-evolution of cancer cells“. The lecture at the Congress Center of the university will take place as part of the Interdisciplinary Scientific Seminar of the Wrocław University of Technology. Professor Maciej Żylicz deals with the molecular biology of thermal shock proteins, the interaction of caring proteins, cancer transformation, p53, MDM2. For many years he worked at the International Institute of Molecular and Cell Biology in Warsaw. Since 2005 he has been the president of the board of the Foundation for Polish Science. He participates in works of many national and foreign academies of sciences, he is a laureate of numerous scientific awards. Professor Żylicz received honorary

doctorates from Wrocław, Gdańsk and Jagiellonian Universities. Interdisciplinary Scientific Seminar is a program addressed to students, PhD students, researchers and anyone interested in deepening science knowledge.

Lodz University of Technology invites participants to a debate about new solutions in science and higher education

2019-02-12

The debate „Statutes of the university and the Act 2.0“ will take place on February 18, 2019 at the Lodz University of Technology with the participation of Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. The event will take place as part of a series of nationwide debates of the NKN FORUM. It is a new initiative of the Minister of Science and Higher Education created with the participation of representatives of the academic community, serving to discuss key elements and possible solutions resulting from the new law on higher education and science. The Łódź debate combines discussions in thematic groups, which will concern the organization and management of the university, as well as its structures in the context of didactics and research management, employees issues and academic advancements, university assets and finance, and process management models in the light of the new law.

Deputy Prime Minister Gowin visits the State Higher Vocational School in Płock

2019-02-12

The State Higher Vocational School (PWSZ) in Płock was included in the group of 15 vocational schools awarded as part of the „Didactic initiative of excellence“ project. Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education announced it during his visit at the Płock school. The decision on the project «Didactic initiatives of excellence» is double good news for vocational schools - said Minister Gowin. Firstly, up to fifteen vocational schools from different parts of Poland will receive

an additional one million PLN for the quality of education. Secondly, it is proof that the environment associated with PWSZ played an important role in the process of creating the Constitution for Science. Additional support for public vocational universities in the field of excellence in education was an important postulate of this group of schools.

Conference „Silesian Channel and Waterway of the Upper Vistula - opportunities and challenges“

2019-02-12

The Silesian Water Center of the University of Silesia and the Department of Engineering and Water Management of the Krakow University of Technology invite participants to the scientific conference on „Silesian Channel and Waterway of the Upper Vistula - opportunities and challenges“. Participants will discuss the planned development of inland waterway transport in Poland as an opportunity for the diversification of transport. The conference include the history of the Silesian Channel and the Waterway of the Upper Vistula - goals, routes, stage of completion, class and stock, as well as the planned scope of works; hydrological and hydrotechnical conditions and water management for its functioning as well as present and future spatial conditions with the indication of strategic nodes. The organizers also plan to discuss the economic effects of the construction of the Silesian Channel, the modernization of the Upper Vistula Waterway and the principles of cooperation of the industry environment with government institutions and local self-government.

PhD student of the University of Technology and Life Sciences in Bydgoszcz to receive Rector's Award of the Kielce University of Technology

2019-02-12

Sandra Śmigiel, PhD student at the Faculty of Mechanical Engineering at the University of Technology and Life Sciences in Bydgoszcz, received a special award of the Rector of the Kielce University of Technology in the Student-Inventor competition for the „Mobile ECR recorder based on the LoR”. The invention of a young researcher is a system for monitoring the electrical activity of the heart based on the technology of wireless data transmission LoR together with a device for receiving data and processing them. The co-founder of the invention is Dr Eng. Damian Ledziński and Dr Eng. Tomasz Andrysiak. The National Student-Inventor Competition has been organized since 2010 by the Kielce University of Technology. Its aim is to develop a culture of innovation in the academic environment. This year brought 139 solutions from 20 universities from all over Poland which is the record in the history of the competition with 361 inventors, including 157 students.

PhD student of the University of Silesia becomes the winner of the „Student-Inventor” competition

2019-02-12

Michał Pielka, PhD student at the Faculty of Computer Science and Materials Science at the University of Silesia, was the winner of the „Student-Inventor” competition organized by the Kielce University of Technology. 139 proposals from 20 universities from all over Poland were submitted to this year's competition. The awarded invention is a system for monitoring locomotor functions of the organism, respiratory activities and pulse together with related solutions of 2 patented inventions and 2 industrial designs. One of the solutions is a developed meth-

od of data transmission that allows to send more information and simplify the procedure for their receipt. The winners will present their solutions in Switzerland during the 47th International Exhibition of Inventions of Geneva, they will also take part in accompanying seminars organized by the World Intellectual Property Organization and the European Organization for Nuclear Research.

Exhibition of Rector's insignia of the Poznań State Higher Schools

2019-02-12

Until March 2nd visitors can see the exhibition „Rector insignia of state universities in Poznań” held in the Archdiocesan Museum in Poznań. The exhibition was organized on the occasion of the 500th anniversary of establishing the Lubrański Academy and the 100th anniversary of higher education in Poznań. In the former headquarters of the Lubrański Academy there are presented the rector's insignia from Adam Mickiewicz University; University of Arts; University of Economics; Medical University; University of Life Sciences; Academy of Music; Academy of Physical Education and Poznan University of Technology. The basic set of insignia includes a chain, scepter and ring. The scepter derived from the shepherd's rod is a sign of power and decision-making, the chain means the authority of the office and the ring refers to the symbolism of the vow when the rector commits to faithful and loyal service to the university.

200,000 graduates of the Silesian University of Technology

2019-02-13

The Silesian University of Technology educated the 200,000th graduates. The holder of the graduation diploma no. 200,000th is a Bytom graduate of the energy sector with the specialty of modernization of power installations. Silesian University of Technology educates engineering staff since 1945. In the first year, 2750 students enrolled in four faculties at the Gliwice university. At present, the Silesian University of Technology has 15 faculties located in three

cities: Gliwice, Katowice and Zabrze. About 20,000 students and over 600 PhD students are taught at the university. Students have at their disposal a modern campus and access to over 150 well-equipped laboratories. Today, the Silesian University of Technology offers 60 fields of study and over 200 specialties, both in technical and non-technical fields. Last year, the university expanded its educational activities to include academic high schools in Gliwice and Rybnik.

Innovative gripper from the Wrocław University of Technology to fly into space soon

2019-02-13

Students of the Wrocław University of Technology have completed work on an innovative gripper. They want to check its qualities in the microgravity and vacuum conditions. In March, the device will be launched at a height of 80 km. Students' project: Testing Robotic Application For Cathing in Zero-G is to check whether it is possible to use a jamming gripper in microgravity and vacuum. Such devices consist of a diaphragm filled with a granulate operating on the principle of pressure difference manipulation. The inflatable gripper adapts its shape to the object to be lifted, and after the air is sucked out, the granulate hardens, the membrane tightens on the object, and can be moved. The experiment is carried out within the framework of the Swedish-German Rexus / Bexus program under a bilateral agreement between Germany (DLR - Deutsches Zentrum für Luft- und Raumfahrt) and the Swedish space agency (SNSB - Swedish National Space Board). More: <https://pwr.edu.pl/uczelnia/aktualnosci/kosmiczny-chwytak-studentow-pwr-gotowy-do-lotu-w-kosmos-11097.html>

Students of the University of Economics in Katowice to participate in the second part of the Global Management Challenge

2019-02-13

Two student teams from the University of Economics in Katowice were promoted to the second stage of the world's largest business simulation - Global Management Challenge (GMC). 155 teams from companies and universities participated in the first part of the simulation. Teams fought for the highest investment result of their company for 5 weeks. 60 teams including GoldenEye (students of the finance and insurance faculties, IT and communication faculties and management departments) and MGCG Managers (students of the finance and insurance faculty) from University of Economics qualified for the next competition. GMC is the largest business simulation in the world in which several teams manage companies competing on the virtual market. The project is present in nearly 40 countries around the world. In the advanced training program GMC uses gamification, which means the use of mechanisms from computer games in business.

Polish-Ukrainian scientific conference to be held in Gorzów Wielkopolski

2019-02-13

Department of Polish Language, Academic Center of Ukrainian Studies of the Academy in Gorzów Wielkopolski and the Faculty of Tourism of the Carpathian National University in Ivano-Frankivsk (Ukraine) will invite participants on May 14 and 15 to the International Scientific Conference „Cultural heritage of the borderland”. The aim of the conference is to present the cultural heritage of the border area in the aspect of its impact on cultural and scientific development, the sense of ethnic and national identity, religion and to develop mutual relations. The conference is addressed to cultural researchers, linguists, historians, sociologists, political scientists, literary scholars, euroregional officers, pedagogues, catechists, theologians, psychologists and all interested participants.

University of Szczecin looking for partners to implement internships

2019-02-13

The University of Szczecin is looking for institutions interested in cooperation in the implementation of student internships in newly launched fields financed from the European Social Fund. The search for partners is caused by the launch of new fields of study related to the implementation of two projects entitled: Dual studies - Teacher and artist and Culture-Education-Competences. Both projects were positively evaluated by the National Center for Research and Development under the competition procedure of the Knowledge and Education Development Operational Program. Therefore, the University is looking for institutions interested in cooperation in the implementation of apprenticeships and internships of pre-school and early school education pedagogues with expanded first and second degree artistic education. Institutions interested in cooperation can contact the project manager via e-mail: paula.wiazewicz-wojtowicz@usz.edu.pl

Rzeszów University of Technology ends to invite students for dual studies

2019-02-14

Only until February 14 students can apply for dual studies started by the Rzeszów University of Technology. This model allows to educate students about mechanical engineering for the aviation industry as well as automation and robotics. The aim of the studies combining science and gaining professional experience is to raise the key competences and practical qualifications of students of the Rzeszów University of Technology. Therefore, the Faculty of Mechanical Engineering and Aeronautics will launch a new field of study with a practical profile in three specialties: mechanics and mechanical engineering, mechatronics and aircraft engines for 47 students. The faculty of electrical engineering and robotics will be created at the Faculty of Electrical and Informatics for 25 students.

Debate about the condition of the European Union

2019-02-14

The Faculty of Political Sciences and International Studies at the University of Warsaw (UW) invites participants on February 14, 2019 to the debate „Union at a crossroads”. In what state will the Union be after the Brexit and euroelections? Will the scenario of a «two-speed Europe» be fulfilled with the strengthened position of France and Germany? Will there be a return to «Europe of Homelands»? How real is the disintegration of the Union? Konrad Szymański - Deputy Minister of Foreign Affairs, Radosław Sikorski - Minister of National Defense in 2005-2007, Minister of Foreign Affairs in 2007-2014, Prof. Roman Kuźniar - political scientist and diplomat, chairman of the Scientific Council of the Institute of International Relations of the University of Warsaw and Prof. Tomasz Grzegorz Grosse - a political scientist and sociologist, head of the European Union Politics Department at the Institute of European Studies at the University of Warsaw will answer the issues. The debate will take place in the Świetlica Wolności Center, Warsaw, ul. Nowy Świat 6/12.

University of Wrocław to participate in the Urban Experts Research Alliance

2019-02-14

The University of Wrocław (UW) is the first scientific and research institution from Poland which was admitted to the European network of Urban Experts Research Alliance (UERA), - an organization specializing in urban development issues. The UERA network brings together over 50 universities and research institutions from 18 European Union countries. It was established in order to develop and provide cities with specialist knowledge and practical solutions in managing them. The network works on behalf of the European Commission under the JPI Urban Europe joint program initiative. Representatives of the public sector, including local governments, expert institutions and other entities specializing in urban issues, participate in this activity for Europe. Dr Aldona Wiktorska-Święcka from the Department of European Studies was elected to the UERA Board for the term 2019-2021, as the first scholar from Central and Eastern Europe.

Gdańsk University of Technology to hold a conference „Microplastics - a big problem?”

2019-02-14

The Open University of Technology invites participants on February 21 to the Courtyard of Hevelius in the Main Building of the Gdańsk University of Technology for the first meeting of the #CiekawiNauki program: “Microplastics - the risks associated with them and the quality of water and ways to improve it”. - We encounter the problem of microplastics when shopping or opening a plastic bottle of water. Our cities also deal with that by eliminating potential sources of microplastics and proper treatment of sewage and rainwater. Invited experts will also answer the questions which everyday products contain the most harmful substances, what effect plants have on rainwater purification and how to protect themselves from toxins in everyday life. The program #CiekawiNauki is a new initiative of the

Gdańsk University of Technology. Monthly meetings with experts will bring closer the current problems of science and the modern world in an accessible form and in a pleasant atmosphere. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hwGncmoQv7K0/content/mikroplastik---wielki-problem-pierwsze-spotkanie-z-cyklu-ciekawinauki

Wrocław researcher receives the Bekker scholarship of the University of Illinois

2019-02-14

Dr Magdalena Mielczarek from the Laboratory of Biostatistics at the Department of Genetics of the Wrocław University of Environmental and Life Sciences received a scholarship from the Bekker Program allowing her to go to the Laboratory of Biostatistics and Bioinformatics at the University of Illinois - one of the best institutions of this type in the world. A Wrocław researcher will deal with bee genomics, specifically the determination of differences in the genome (complete genetic information of the organism) between groups that are in the bee family - a bee mother, workers and drones. - The project is about characterizing the genomes of these insects in the context of copy number polymorphisms (extensive regions that have been cut or multiplied in the genome), and whether they underlie pollination efficiency, division of roles into a hive, appearance, etc. Until now, I research the exact meaning of polymorphisms in the number of copies in bees, and perhaps they have a significant impact on their bodies - says Dr. Mielczarek. More: http://www.glos.upwr.edu.pl/aktualnosci/48950/z_upwr_do_ilinois_by_badac_pszczoly.html

Conference „World of Claw-Hunters” to be held at the Warsaw University of Life Sciences

2019-02-15

The Aves Scientific Circle operating at the Faculty of Animal Sciences of the Warsaw University of Life Sciences (SGGW) invites participants to the conference „World of Claw-Hunters”, which will take

place on March 2, 2019 at the WULS-SGGW campus in Warsaw. The conference topics cover issues related to falconry, breeding, nutrition, physiology and diseases, legal aspects and the protection of birds of prey. During the event, the organizers will focus on falconry and bird of prey in Poland and in the world, breeding of birds of prey and education in falconry in Europe, as well as legal aspects related to the possession and breeding of falconry birds.

„Warsaw Legends” on the Radio of the University of Cardinal Stefan Wyszyński

2019-02-15

The Development Foundation of Cardinal Stefan Wyszyński University (UKSW) in Warsaw established cooperation with the National Center for Culture in the implementation of the project called „Warsaw Legends: a radio play on the base of legends written by Artur Oppman”. As the University of Warsaw emphasizes, the aim of the project is to popularize and save from oblivion in the minds of young people in Warsaw legends, through their attractive arrangement in the form of radio dramas. The collection of radio plays is based on Artur Oppman’s „Warsaw Legends”: Mermaid, Basiliscus and Golden Duck. The project is addressed mainly to young people and students of Warsaw universities and people interested in the history of Warsaw. It will be realized in the studio of Radio UKSW and recorded by journalists and students of UKSW journalism. The first radio play UKSW will be broadcast on February 18, 2019 at 18.00 via the website www.radio.uksw.edu.pl.

Special-purpose company of the Gdańsk University of Technology started cooperation with Komputronik Biznes

2019-02-15

Exento Ltd - a special-purpose company of the Gdańsk University of Technology dealing with the commercialization of research results and supporting start-ups in building business relations - started cooperation with Komputronik Biznes, an integrator of IT solutions. As part of the e-Pionier project, partners will select and help solve several socio-economic problems, which will lead to the creation of start-ups from areas related to the IT industry. The task of Komputronik Biznes will be to give opinions and select the most interesting teams solving problems in areas such as information and communication technologies in security and medicine, digital communication, image processing and processing using neural networks, cloud solutions and the Internet of Things. The company provides selected support teams - from project creation to its implementation, commercialization and implementation of products based on MVP (Minimum Viable Product, i.e. initially ready to be marketed).

University of Silesia to hold a conference "Legal and social aspects of mobbing and discrimination in employment"

2019-02-15

The University of Silesia and the Social Insurance Institution invite participants to the scientific conference „Legal and social aspects of mobbing and discrimination in employment” on 13 March. The meeting aims to introduce the subject in the context of current legal regulations and the achievements of Polish labor law. As part of the conference organized by the «Opus per Laborem» Scientific Society, the Department of Labor Law and Social Policy of the University of Silesia and the Social Insurance Institution, two panels are planned: expert and student. Academic staff from Polish academic centers

specializing in labor law as well as members of the Polish Teachers' Union (ZNP) at the University of Silesia and the Antimobbing Club operating in the Silesian district of the PNA are invited to participate in the event. The special guest will be Melike Yaman from Altınbaş Üniversitesi (Turkey), who will give a speech on the subject of mobbing in the light of Turkish law.

Rzeszów University of Technology to cooperate with the Technical School Complex in Leżajsk

2019-02-15

Rzeszów University of Technology (PRz) has signed a cooperation agreement with the Technical Schools Complex (ZST) in Leżajsk. As a result of the agreement, the Faculty of Mechanics and Technology of the Rzeszów University of Technology in Stalowa Wola will support the mechanical profile class at the school in Leżajsk. The agreement was signed by Dr Eng. Grzegorz Masłowski, vice-rector for education at the Rzeszów University of Technology and Halina Samko, head of the Technical Schools in Leżajsk. As part of the cooperation, Rzeszów University of Technology will support the mechanical profile class. The youth from ZST in Leżajsk will take part in conferences and scientific symposia organized by the Rzeszów University of Technology and cooperate with the academic circles operating at the university.

Lodz University of Technology to hold an academic debate „University statutes and Act 2.0”

2019-02-18

The Lodz University of Technology will hold the first academic debate „Statutes of the university and the Act 2.0” with the participation of Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. The meeting and discussions on the most important document related to the functioning of the university, will take place on Monday 18 February 2019. About 400 representatives of all universities in Poland will come to the debate

at the Lodz University of Technology. They will discuss the most important topics related to Statute 2.0: authorities, organization and management of the university; the structure of a university and the management of scientific research and employees' affairs, including scientific advancements. During the event in the expert debate, Piotr Müller, the deputy minister of science and higher education, will present the chances and challenges facing high schools working on the new university statute.

Cooperation between universities from Leszno and German Darmstadt

2019-02-18

Jan Amos Komensky State Higher Vocational School (PWSZ) in Leszno signed a strategic cooperation agreement with the German Hochschule Darmstadt-University of Applied Sciences. Agreement was signed by Prof. Maciej Pietrzak, the Rector of the PWSZ during his visit in Darmstadt. It will enable all graduates of the University of Leszno to participate in the fields of electrical engineering and mechatronics and to continue their studies at the second level studies in Germany without examinations, without program differences and without tuition fees. Other provisions of the agreement are provided paid internships in renowned German corporations. Hochschule Darmstadt-University of Applied Sciences is one of the largest German vocational universities with an offer of over 50 fields of study. The university has about 15 thousand students with 18 percent foreign students.

Exhibition and lecture on Dutch masters and their paintings at the University of Wrocław

2019-02-18

The Center of Culture of the Dutch University of Wrocław invites participants to the exhibition „With a dream and reality”: Copies of Dutch masters. Enthusiasts will be able to admire copies of paintings by the Dutch masters - Bosch, Vermeer and Van Gogh, who inspired Polish poets. The exhibition was inspired by two women: Agnieszka Traczyńska, artist-painter, teacher at the Wrocław High School, who creates wonderful copies of the paintings of Hieronymus Bosch and Magdalena Śniedziewska, researcher of Polish literature, author of the book The Seventeenth century Dutch painting. The official opening of the exhibition with the participation of the representative of the Embassy of the Kingdom of the Netherlands, Martin van Dijk, will take place on March 7 at 17. After the opening, a lecture «It's not quite bad with us if we can admire Dutch painting» by Magdalena Śniedziewska was planned.

Szczecin Institute to hold Inland Shipping International Conference 2019

2019-02-18

The Institute of Transport Management at the Maritime University of Szczecin and the West Pomeranian Maritime Cluster Association will invite participants on 16 and 17 May to the International Scientific Conference Inland Shipping International Conference 2019. The leitmotif of the meeting will be inland navigation as an alternative to road transport - which is in line with the assumptions and objectives of the European Union's Sustainable Transport Policy. The conference is to be a meeting of practitioners and scientists and a forum for the exchange of views and experiences. The organizers are planning to discuss the following topics: The role of inland navigation in the socio-economic development of the regions; The importance of inland waterway transport in multi-bay transport systems

and supply chains; Global and European trends in the development of inland waterway transport (infrastructure, means of transport, control systems) and Polish waterways as a key element of the green corridor Baltic - Central and Southern Europe.

Płock to host the 1st Plenary Assembly of Rectors of Public Vocational Universities

2019-02-19

The State Higher Vocational School in Płock will host the 1st Plenary Assembly of Rectors of Public Vocational Universities. It will take place on March 20 - 23, 2019 and will be combined with the celebration of the 20th anniversary of the Płock university. The conference will be opened by Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. The conference is an association of rectors representing Polish public vocational schools. During the Plenary Assembly held in Płock, the participants will talk on the subjects related to changes resulting from the Constitution for Science and plans for the development of vocational schools. Over 50 rectors and vice-rectors of the State Higher Vocational Schools from all over Poland will take part in the conference.

Environmental Aerodynamics Laboratory to be created at the Krakow University of Technology

2019-02-19

The Environmental Laboratory of Environmental Aerodynamics, unique in the scale of Europe, will be built at the Krakow University of Technology (PK). It will be a modern solution to fight for clean air in the region and in Poland. The University has obtained nearly PLN 18 million for this purpose from the Regional Operational Program of the Małopolska Region for 2014-2020. The laboratory is planned to be built on the campus in Czyżyny. It will be the only research center of environmental aerodynamics in Poland - emphasizes the Krakow university. It will run model studies and computer simulations regarding the dynamic impact on smog and airing

of cities. The Environmental Aerodynamics Laboratory is to be created by 2021. The total value of the project is over PLN 24.6 million.

University of Białystok to cooperate with military counterintelligence

2019-02-19

Professor Robert Ciborowski, rector of the University of Białystok (UwB) and Maciej Materka, head of the Military Counterintelligence Service (SKW) signed a cooperation agreement. It is supposed to concern didactic, scientific and publishing activities. In accordance with the provisions contained in the document, cooperation will include joint ventures, whose main objective will be to raise awareness of the possibilities of protection against contemporary threats of the Polish state. It is primarily about the exchange of knowledge and experience in the field of conducting educational activities and raising professional and scientific qualifications of the staff of both institutions. The agreement provides for the possibility of conducting activities or trainings for the needs of the University of Life Sciences, organization of joint workshops or cooperation in the creation of study programs.

Philosophical seminar at the University of Silesia „Imagined space - created space”

2019-02-19

The lecture entitled „Space of Humanism in Ancient Philosophy” will start a series of meetings organized as part of the general philosophy seminar „Spatial Imaging - Space Created” at the University of Silesia in Katowice. The series of lectures will begin on February 19 and will last until June 4. Speakers include scientists from the University of Silesia, the Jagiellonian University, the Silesian University of Technology and the Silesian Medical University - philosophers, historians, sociologists, cultural experts, architects, theologians and lawyers. The lectures are addressed to students of the humanities and social sciences and all interested. The subject matter of the meetings concerns reflection on various aspects of the understanding of space - especially in relation to the virtual world, changing the approach to the ways of understanding words: close, far, strange, unknown, safe in various contexts.

Delegation of the Ministry of Science to visit Great Britain

2019-02-20

The delegation of the Ministry of Science and Higher Education, headed by Deputy Minister Piotr Dardziński, visited Great Britain. The most important point of the stay was a meeting with Chris Skidmore, Minister of State for Universities, Science, Research and Innovation in the Business Department, Energy and Industrial Strategy. In addition, the delegation visited the Museum of General Sikorski, met with outstanding Polish scientists and representatives of the British scientific community, and participated in the twelfth Congress of the Federation of Polish Students' Associations in Great Britain. The purpose of the visit was to strengthen Polish-British relations in the field of higher education and science, inter alia by strengthening contacts between research institutions in Poland and the United Kingdom and starting cooperation in supporting short-term mobility of students and researchers.

Campus of the Białystok University of Technology implemented in virtual space

2019-02-20

Białystok University of Technology (PB) is the first university in Poland to implement an innovative solution that is friendly to students, employees and guests. The university campus has been moved into a virtual space. The Zonifero application, developed by specialists from the Białystok firm SoftwareHut easily helps find a laboratory or lecture hall by mobile phone. As explained by Dorota Sawiocka, a PB spokeswoman, all important places can be located with the help of a virtual map: the dean's office, career office, lecturer's room, doctor's office, photocopying point or buffet. You can also find out where to apply with specific documents, collect your ID or index, how to find yourself in the PB library. The application is free and available for devices with Android and iOS.

Month of Mother Language to be held at the Jagiellonian University

2019-02-20

Faculty of Polish Studies at the Jagiellonian University in Krakow, in cooperation with the Students' Scientific Society of Students' Linguistics at the Jagiellonian University, organizes for the fourth time the Month of Mother Language, which will last from February 21 to March 21, 2019. As part of this undertaking, a number of events related to the Polish language will take place, including the 5th Krakow Dictation, which will take place on March 16, 2019. It will be conducted in two categories - open and junior (for people up to 15 years of age). In addition, there will be a fourth national competition for advertising for primary schools and a chat competition, as well as linguistic workshops conducted by students at schools in the Małopolska Region. Another accompanying event will be the 21st National Rhetoric Competition. More: mjo.uj.edu.pl

PhD student at the University of Silesia receives the Fulbright Junior Research scholarship

2019-02-20

Mateusz Król, a PhD student at the Department of Canadian Research and Literary Translation of the Institute of Romance Languages and Translation Studies at the University of Silesia, became the laureate of the prestigious Fulbright Junior Research Award for the academic year 2019/2020. The purpose of the scholarship is to collect materials for the PhD dissertation. During the stay - for 6 to 9 months - the scholarship holder implements a research project at an American university, research institute or non-governmental organization. The scholarship is financed by the US Department of State and the Polish Ministry of Science and Higher Education. The Polish-American Fulbright Commission is an educational foundation whose main task is to administer the Fulbright Program in Poland - the largest program of scientific and cultural exchange in the United States. For over 70 years, the Program supports cooperation for the development of science, culture and interpersonal and interinstitutional relations between the US and over 160 countries. „Critical elements - is the era without a smartphone coming? - lecture at the University of Wroclaw

2019-02-20

The Institute of Geological Sciences of the University of Wroclaw invites participants to a lecture from the series „Secrets of the Earth and the Universe”. On Saturday, February 23, Dr Krzysztof Turniak will talk about the elements used in the production of modern equipment, and at the same time threatened by depletion. Each smartphone is made up of dozens of rare elements, and currently exploited sources of some of them are already running out. What is worse - they are located in only one or several countries in the world, which may threaten the stability of supplies. The scientist will try to answer the following questions: What are the critical elements and what are the prospects for their acquisition? Which of them we produce in Poland? Are we in danger of stopping the production of technologically advanced devices due to the lack of certain elements? Can the exploitation of minerals containing critical elements be harmful to the environment?

Silesian University of Technology cooperates with the Air Force Institute of Technology

2019-02-20

Silesian University of Technology is intensively developing scientific-research and didactic cooperation with aviation institutions. The latest partner of the university becomes the Technical Institute of Air Forces from Warsaw. The contract has been signed by the Vice-Rector for General Prof. Bogusław Łazarz and the director of the Institute, Prof. Mirosław Kowalski. The signatories of the agreement expressed their satisfaction with the strengthening of contacts between institutions whose business profiles allow for synergistic scientific and research cooperation in innovative fields of knowledge. The signed document will be the first step towards intensification of activities in the dynamically developing civil and military aviation industry. The contract provides joint

conducting research and development, innovative and implementation activities, as well as implementation of projects financed from domestic or foreign funds. The partners will also organize training for employees and undertake many other initiatives.

University of Lodz started the implementation of the PROM program

2019-02-21

The University of Lodz as one of the first universities in Poland has started the implementation of the PROM program, financed by the National Academic Exchange Agency (NAWA) and received nearly 750,000 PLN for the implementation of tasks related to international exchange. The participants of the project have the opportunity to take part in short trips (lasting from 5 to 30 days), with the aim to raise the competences and qualifications. Ultimately, they will contribute to the improvement of the accessibility of international education programs and increase the mobility of staff in the travel of representatives of Polish universities and scientific institutions abroad, as well as arrivals of scholarship holders to Poland, including people coming from outside the European Union. NAWA co-finances mobility related to conducting didactic classes at foreign universities, participation in conferences, summer / winter schools, courses, workshops, internships and study visits.

Lecture by Dr Ryszard Schnepf about the US at the halfway point of the presidency of Donald Trump

2019-02-21

As part of the series „8 lectures for the New Millennium”, on February 26, 2019, Dr Ryszard Schnepf will give a lecture on „Trump's America - halfway point”. The event will take place in the hall of the former University Library of the University of Warsaw. During the lecture, Dr Schnepf will analyze the situation in the US and try to answer the question of the condition in which US is in the middle of the term of Donald Trump. Dr Ryszard Schnepf is a diplomat, former Pol-

ish ambassador in Uruguay, Costa Rica, Spain and the United States. He is currently involved in scientific activities on Latin American culture and contemporary problems of Ibero-American countries. He also specializes in the theory of diplomacy and the issue of international relations in the USA.

4th Psychiatric Prevention University

2019-02-21

The Medical University of Białystok (UMB) is launching the 4th University of Psychiatric Prevention. The Faculty of Health Sciences UMB invites by June 2019 44 senior students. They are graduates of another educational program of the Białystok Medical University – the University of Healthy Senior. Classes are unique in the country, because no other medical school organizes a series of lectures devoted only to psychogeriatrics, mental disorders in the elderly people, although almost all universities have universities of healthy senior citizens. The subject matter of the course will concern mental disorders in the elderly generation, anxiety disorders, sexual disorders or addiction to drugs and alcohol.

PKO Bank Polski and Warsaw University of Technology jointly to train cyber security experts

2019-02-21

The Faculty of Mathematics and Information Sciences of the Warsaw University of Technology launched the subject „Practical aspects of cyber security”. During lectures and workshops, experts from PKO Bank Polski, who deal with cyber security on a daily basis and fight against online threats, will share their practical knowledge with students. In the first semester there are 15 places free for students of the Faculty of Mathematics and Information Sciences of the Warsaw University of Technology. Classes include issues such as monitoring the company's infrastructure, detecting threats, analyzing malicious software or conducting software penetration tests. As part of the company security simulation, students will get a virtual company under their care.

Conference „Climate facts and myths” with Dr Marcin Popkiewicz

2019-02-21

The College of Individual Inter-university Studies at the University of Silesia invites participants to a conference with Dr Marcin Popkiewicz „Climate facts and myths”. The event is part of the „ISM gives voice” initiative - a series of meetings with extraordinary personalities of Polish culture, literature, fine arts, journalism and NGOs. On February 26 at the Center for Scientific Information and the Academic Library Dr Popkiewicz will discuss the issues of climate change, including global warming, around which many myths will grow. The lecture will introduce the climate control processes, its changes in the past of the Earth and those occurring under the influence of human activity. Dr Marcin Popkiewicz is a megatrends analyst, expert and journalist dealing with connections in the areas of economy-energy-resources-environment, author of the publication «World on crossroads», «Energy revolution. But what for? «and» Science about the climate », editor of portals ziemianarozdrozu.pl and naukaoklimacie.pl.

Deputy Minister Piotr Müller visits the University of Szczecin

2019-02-21

Piotr Müller, secretary of state in the Ministry of Science and Higher Education was a guest of the authorities and students of the University of Szczecin. The main topic of their talks were the changes at the university, caused by the „Constitution for Science”. An important point of the visit was a meeting with students of Szczecin universities. During a half-hour conversation, the participants discussed the role of students in creating a new reality of Szczecin's universities, a real influence on the creation of statutes, computerization of certain processes and the course of PhD studies. The minister argued that thanks to the reform at universities, the organization of studies will be better developed as well as the level of knowledge acquired by students

becomes higher. Minister Müller referred to the direction of internal reforms and the way of implementing statutory solutions in a conversation with the rector of the University Prof. Edward Włodarczyk.

Project „Juniors at the University of Technology” to be launched in Płock

2019-02-22

The branch of the Warsaw University of Technology in Płock invites students of the 6th-8th grade primary school classes to participate in the „Juniors at the University of Technology” project. The project will be carried out at the Faculty of Civil Engineering, Mechanics and Petrochemistry of the Warsaw University of Technology in cooperation with the City of Płock. The university received funding for this project under the «University of the Young Explorer» program. Project participants will take part in a series of mathematics and natural science workshops as well as related to information and communication technologies. 180 students will expand their knowledge in the field of mathematical and natural competences, learning skills, critical thinking and ICT competence (information and communication technologies) under the guidance of lecturers. Students can apply for the project until February 28 at: www.umo.pw.plock.pl

Scientific conference „Cursed Soldiers - Steadfast Heroes” to be held in March in Wrocław

2019-02-22

The Academy of Land Forces (AWL) in Wrocław invites participants on 7 March to the student scientific conference „Cursed Soldiers - Steadfast Heroes”. The event is to commemorate the „Cursed Soldiers” and to contribute to the deepening of knowledge about them. The conference topics include Forms of activity of the Polish independence underground; Youth Conspiracy in Poland 1944-1956; The repression apparatus and the Polish independence underground; The perception of the underground of the so-called independence second conspiracy by Pol-

ish society from the end of World War II to modern times; Cursed Soldiers and contemporary patriotic attitudes; The Narrative about Cursed Soldiers in the People's Republic of Poland and after 1989 and Restoring Memory. From Cursed Soldiers to Steadfast Heroes. The conference is organized jointly by: Naval Academy in Gdynia; Academy of War Art in Warsaw; Lotnicza Military Academy in Dęblin and Branch of the Institute of National Remembrance in Wrocław.

Implementation of the BIOTRAFO project started at the Silesian University of Technology

2019-02-22

The implementation of the BIOTRAFO project financed by the Horizon 2020 program began at the Silesian University of Technology. Its goal is to increase mobility of scientists and the transfer of knowledge in accordance with the principles of the MSCA-RISE mechanism. Project research will focus on the design and use of high-performance, compact power transformers immersed in biodegradable fluids. Their results will be useful for the whole environment related to the power transformers industry. This is directly related to the objectives of the program e.g. the creation of a network of cooperating institutions for expanding knowledge and development of devices using biodegradable oils. Beneficiaries and partners in the project are employees and PhD students from research institutions and companies from European countries: Spain, Germany, Turkey, Great Britain and Italy as well as partner countries from South America and Asia: Argentina, Japan, Colombia and Peru.

Conference on developing the attractiveness of urban spaces at Colloquium: Future of Silesian cities

2019-02-22

On February 27, Silesian universities and scientific institutions invite participants to the Auditorium of the Parnassos of the Silesian Library in Katowice for the 3rd Colloquium: Future of Silesian cities. The topic of the meeting is developing the attractiveness of urban spaces. The organizers are planning a discussion about the factors and criteria for the attractiveness of urban space in the business, residential and public dimension as well as the relations between the public, private and civic sectors in jointly developing the attractiveness of space. Organizers of Colloquium are University of Economics and University of Silesia; The Silesian Technical University; Institute for Ecology of Industrial Areas; Study Commission on the Future of Upper Silesia Branch of the Polish Academy of Sciences (PAN) Katowice; The Committee for Spatial Development of the Polish Academy of Sciences in Warsaw; Upper Silesian University of Entrepreneurship and the Silesian Library.

Researchers from Gdańsk and Wrocław looking for new uses of cold plasma

2019-02-22

Scientists from the Wrocław University of Technology and the University of Gdańsk are conducting research on the use of cold atmospheric plasma to inactivate bacteria responsible for diseases of cultivated and ornamental plants. Their work can revolutionize the agro-technical industry. The aim of the joint project is to develop a fast, effective and cheap method of eradication of bacterial pathogens responsible for diseases of cultivated and ornamental plants. The experiments are carried out using potatoes, chicory and hyacinths as model plants. By «treating» plants, scientists use a so-called «tripod» mounted on a tripod. a plasma pen that generates a cone of cold atmospheric plasma, several centimeters long and only a few millimeters thick. This al-

lows precise destruction of bacteria in the infected part of the plant. In the near future, scientists plan to continue research on the possibility of using cold atmospheric plasmas in medicine. More: <https://pwr.edu.pl/uczelnia/aktualnosci/zimna-plazma-pomoze-roslinom-11101.html>

Changes in the education model of the University of Warsaw

2019-02-25

- We are elaborating a new model of education to change in the organization of studies at the University of Warsaw. We are planning to decrease competition inside the university, increasing the role of interdisciplinary studies. In the current model, the university's great potential is not fully realized - said Anna Korzekwa-Józefowicz, a spokeswoman of the University of Warsaw. Next new academic year, PhD studies will be replaced with PhD schools. There will be four such schools at the University of Warsaw including science and natural sciences, social sciences, humanities and cross-domain studies. PhD students will become research assistants. In regard to the education reform, the University of Warsaw plans to change the education model by establishing of the University Education Council, which is to develop a university-wide education policy and be responsible for application process.

Day of the Pi number at the Technical University of Lodz

2019-02-25

On March 14, 2019, the Lodz University of Technology (Pł) invites participants to break the Guinness record in setting the longest chain of people forming the Pi extension. The Pi number is infinite after the decimal point, but we remember it as 3.14. This value is referenced by the date when the world's most known number celebrates its feast. The current Guinness record in the category „The longest extension of the number of Pi composed of people” is 627. The record was established by the mBank Foundation on March 14, 2018 in Warsaw. The breaking of the Guinness record, which is the highlight of the „The Pi Day on Pł”, will start at 13.00 in

the specially marked place on the B campus of the Lodz University of Technology. Everyone who joins the mathematical chain of developing the Pi number will receive commemorative diploma and a gift.

Masonic treasures presented in the library of the Adam Mickiewicz University in Poznań

2019-02-25

University Adam Mickiewicz in Poznań possesses the largest collection of Masonic items in Europe. There are over 80,000 books in the university archives including real publishing gems e.g. the Anderson Constitution of 1723 - considered the canon book of the Freemasonry law. Collections in 1949 were delivered to Poznań from Sława Śląska. Earlier, they were collected by Himmler. The Germans had no problem with finding Masons because of the obligation to list members of particular lodges. A special team of SS librarians studied the collections, catalogued them and studied. Later, in the end of the war, the collections were transported away. Books and documents are stored in the Special Collections Department of the University Library. Currently, the University is raising funds for the digitization of the collections and their publication. More: <http://uniwersyteckie.pl/kultura/masonski-skarb-ze-zbirow-liblotekiu-uam>

Medical School in Białystok to launch the Monoprofiled Center of Medical Simulation

2019-02-26

The modern Monoprofile Center of Medical Simulation has been opened at the University of Medical Sciences (WSM) in Białystok. Prof. Lech Chyczewski, Rector of WSM, emphasizes that the Center will enrich the science of the nurse profession and help in the final evaluation of teaching results. The center consists of several rooms with different types of simulation models. It simulates not only newborns, children and adults, but also the parts of body like a hand, so that future nurses can learn to make injections or sew the seams. The Center has also models of the breasts affected by cancer. Dr Bianka Misiak, head of the Nursing Department at WSM, reminds that the Białystok school educates future nurses since 2005. In her opinion, the creation of the Center marks a milestone in improving the quality of education.

Simulation of the General Assembly of the UN General Assembly to be held at the University of Białystok

2019-02-26

Nearly 100 high school students from all over Poland including foreigners from the British School in Warsaw and students from Germany, took part in this year's debates of BiaMUN (Białystok Model United Nations). The event, which was held on the campus of the University of Białystok (NB) from February 22-24, 2019, was a simulation of the General Assembly of the United Nations (UN). The BiaMUN meeting was inaugurated by a lecture of Włodzimierz Cimoszewicz - former Prime Minister and Minister of Foreign Affairs. The young speakers debated about politics, social and economic issues. The themes of this year's debates included the Russian-Ukrainian conflict, the aging of European societies or the forced marriages of children. During their speeches, the participants took on the representatives of various UN member countries.

Academy of Fine Arts in Wrocław to cooperate with Nokia Garage

2019-02-26

The Academy of Fine Arts in Wrocław has signed a framework cooperation agreement with Nokia Garage. The agreement opens the way to cooperation regarding didactic classes and trainings, support of scientific circles and implementation of projects financed from external sources. The cooperation will be carried out in the Department of Design, Faculty of Interior Design and Design. The agreement provides for a broad exchange of knowledge and experience, including the development of innovative projects, the organization of internships, cooperation at the thesis and job fairs. Nokia is the world's largest specialist in the field of broadband transmission in cellular networks. The Nokia Garage offers the most advanced technologies of the company that allow participants to create solutions for the Internet of Things, 5G, Machine Learning, Artificial Intelligence, Virtual Reality and Augmented Reality.

Pre- Day for international students at the Wrocław University of Technology

2019-02-26

Almost 300 new students from abroad appeared on February 22 at the Wrocław University of Technology to take a part in the 'Pre- Day'. They acquainted with the university, colleagues from science clubs and opportunities to spend their free time. In the summer semester, the university will teach a record number of over 1,100 international students. The most of new students come from India, Ukraine and Turkey. The citizens of Pakistan, Iraq, France, Spain, Portugal, Indonesia, Bangladesh, Italy, China, Libya, Brazil and Germany also came to Wrocław to study. They were most eager to choose mechanical; IT and management; chemical and architecture faculties. As part of the event, students watched an information film about the University of Technology and special presentations prepared by the university organizations. They also met their colleagues from scientific circles and student organizations and got

acquainted with the offer of the university library. The representatives of the police told the students about safety in the city.

University of Humanities and Natural Sciences in Częstochowa to cooperate with Symkom

2019-02-26

University of Humanities and Natural Sciences in Częstochowa concluded a cooperation agreement with a company Symkom - ANSYS Channel Partner in Poland, dealing implementation of comprehensive solutions in the field of numerical analysis in industry. The agreement was signed by the rector of the university, Prof. Anna Wypych- Gawrońska and the president of Symcom, Dr Eng Leszek Rudniak. The agreement is a result of numerous joint initiatives. The most important activities are related to the dual studies, which will be launched from the academic year 2019/2020 in the field of Innovative Technologies and Modern Materials. The studies will be implemented in unique specialties: Virtual Prototyping, Design and Industrial Design. The direction is co-created by representatives of companies and institutions, in which graduates will be able to find employment.

EDUAL Conference - Dual studies in response to the needs of Industry 4.0

2019-02-26

The Silesian University of Technology and the Katowice Special Economic Zone invite participants to the 3rd EDUAL Conference on 4th March - Dual Studies in response to the needs of Industry 4.0. Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin confirmed his participation in the event at the Education and Congress Center of the Silesian University of Technology in Gliwice. The first conference was devoted to the concept of dual education and a comparison of several models existing at that time. The second meeting was attended by the rectors of all Polish technical universities. During that conference, the creation of the first Silesian Center of Industry Competence 4.0 was announced in Poland. This year's conference takes place at the beginning of the implementation of a large program devoted to dual education, announced for the first time by the National Center for Research and Development. The event is combined with the Engineering Job and Entrepreneurship Fair and will be an opportunity to exchange experiences and ideas regarding dual education.

Krakow University of Technology to complete the project „European Technical Heritage”

2019-02-27

In April 2019, the AGH University of Science and Technology in Kraków will complete the project „European Technical Heritage” (EDT), implemented for three years by the Library of the Krakow University of Technology. Its purpose is to popularize historical and contemporary publications in the field of technical sciences in an innovative IT environment. The effect of the project is the digitalization of over 6,000 volumes of books and magazines that have not been processed in other scientific institutions before and have not been available on-line. The Library of the Krakow University of Technology has selected a collection of publications on Lvov and

works published there before 1945 and a collection of prints published between the 16th and 20th centuries. Also, the Main Library of the AGH University of Science and Technology chose a collection of periodicals from the 19th and 20th centuries to be digitalized. The collections popularized by the EDT project will serve to popularize knowledge in the field of technical sciences, natural sciences, architecture, art, history, cultural studies, library science and bibliophilia.

Rzeszów University of Technology receives nearly 12 million PLN for the for the development of aviation technologies

2019-02-27

Rzeszów University of Technology received almost PLN 12 million for the implementation of the project „Regional Center of Excellence in Automation and Robotics, Information Technology, Electrical Engineering, Electronics and Telecommunications of Rzeszów University of Technology”. The project will be implemented from the „Regional Initiative of Excellence” program, which was announced by the Ministry of Science and Higher Education. The aim of the project is to strengthen the research potential of the Rzeszów University of Technology and increase the level of scientific research. The project will be implemented in 2019-2023. Its detailed tasks include technology development and the use of Artificial Intelligence (AI), Internet of Things (IoT), machine learning (ML) and analysis of large sets of quickly collected data (Big Data) for the needs of the aviation industry.

Graduates of the Jagiellonian University in Krakow succeed in the exams for law applications

2019-02-27

The Ministry of Justice informed that the graduates of the Jagiellonian University in Krakow passed best the entrance examinations for advocate, legal advis-

er, notary and bailiff applications, conducted in September 2018. 85.5% of the Jagiellonian University graduates passed the exam. The next places were taken by graduates of the University of Adam Mickiewicz University in Poznań (74.6%), graduates of the University of Gdańsk (72.8%) and the University of Lodz (72.5%). In 2018, 6,937 graduates from 44 universities 18 public, 22 non-public and 4 foreign took those exams. They were passed by 3,544 people, or 51.1% of all candidates.

Katowice pupil wins the 11th Elektron competition at the Wrocław University of Science and Technology

2019-02-27

Nearly a thousand secondary school pupils competed in the 11th the all-Polish Elektron competition. Its organizer is the department of microsystems and photonics of the Wrocław University of Science and Technology. Participants solved tasks based on electrical engineering, telecommunications, optoelectronics and photonics as well as mechatronics. The competition took place in three stages, starting from the elimination at schools, through the regional stage, to the final. It was won, as last year, by Hubert Kulka from the Silesian Technical Research Institute in Katowice. The second place was taken by Jakub Dietrich from the School of Communications of Nicolaus Copernicus in Poznan, and the third by Jakub Jendryka from the Academic Schools of the Wrocław University of Technology. Participants solved tasks prepared by scholars of the University of Science and Technology and students from the Association of Polish Nanotechnology Enthusiasts. They concerned electronics, and often extended beyond the school curriculum.

Seminar „Everyday life in couples” to start at the University of Gdańsk

2019-02-27

The University of Gdańsk invites participants on February 28 for the first meeting as part of the seminar „Everyday life in couples”. The series will start with the lecture „Materialization of the couple: tension and roles in the process of building a home everyday for two”. The inaugural lecture will be delivered by Dr Filip Schmidt from the Adam Mickiewicz University in Poznań - author of the book «Couple, flat, marriage. The dynamics of intimate relationships in the context of historical changes and contemporary discussions about the processes of individualization», published by the Polish Science Foundation. The dates and topics of the next meetings are: March 7 - about pairs at work; March 28 - non-heteronormative pairs; April 3 - on couples finances and April 10 - on culturally mixed pairs. The co-organizer of the cycle is the Gdańsk Branch of the Polish Sociological Association.

Night of the Owls at the Maria Curie Skłodowska University

2019-02-28

The Faculty of Biology and Biotechnology of the Maria Curie Skłodowska University (UMCS) in Lublin invites participants to the Night of the Owls. The meeting with owls will start on March 16, 2019. at 16:30 and will last until 17 March. In the first part of the event there will be workshops to find out which species of these birds live in Poland and specifically, in Lublin. There will also be attractions for the kids, e.g. learning to perform owls' voices and a knowledge contest about owls. Participants will be able to get acquainted with ornithological literature and practise with field equipment and even stroke an owl. The second part of the event is a night trip, during which participants will be able to see how the night life of the forest looks, and above all, hear and see owls in their natural environment.

Jagiellonian University to launch the Mexican Center

2019-02-28

The Jagiellonian University (Jagiellonian University) in Kraków, in cooperation with the largest Latin American university - the National Autonomous University of Mexico, opened the Mexican Center. The main objective of this new university unit will be the dissemination of Mexican science and culture, student exchange, and meetings with Mexican researchers who specialize in experimental, social and humanities sciences. The ceremony of the inauguration of the Center was preceded by a lecture for students of the Institute of American Studies and Polish Diaspora of the Jagiellonian University, entitled «USA-Latin America: the time of the test”, which was given by Dr Ryszard Schnepf. The opening of the Mexican Center of the Jagiellonian University took place with the participation of the rector of the Jagiellonian University, prof. Wojciech Nowak and the Mexican ambassador to the Republic of Poland Alejandro Negrín Muñoz.

Charity action „Students for Palestine” held at the University of Silesia

2019-02-28

The Association of Arabists of the University of Silesia Al-Asabiya organizes the third charity action, which will take place on March 5 and 6 at the Faculty of Philology in Sosnowiec. It will be used to finance neurological examinations of intellectually disabled patients in the Al Malat center in Bejt Sahur near Bethlehem. As part of the collection, the organizers are planning a bazaar of home-made cakes and dishes as well as Middle Eastern drinks, a fair of books and various things, henna painting, Arabic calligraphy and the auction of valuable items. The event will be accompanied by a concert of Middle Eastern music performed by Palestyna Art Alert and an evening of poetry by Josef Sh'hada. The action is addressed to pupils and students. Participation in the event may contribute to the development of sensitivity, openness to various cultures, curiosity of the world and general knowledge. The applications can be sent electronically: alasakiya@gmail.com

University of Physical Education in Wrocław to launch Senior security classes

2019-02-28

The Academy's activities for Safe Senior are organized for the students of the University of the Third Age of the University of Physical Education in Wrocław by the Municipal Police Headquarters. During the Academy, its participants learn about the types of crimes committed to older people and how to avoid them and how to defend against them. The participants will discuss behavior in emergency situations - how to defend against violence against the elderly people, how to give first aid, and how to inform the emergency services in order to have a short and informative message. The inaugural lecture «History and Tradition of the Police» was delivered by police officer Michał Kawalec. An additional artistic setting was provided by the police orchestra of the Voivodeship Police Headquarters in Wrocław.

Conference “How to attract American students to Polish universities?”

2019-03-01

The National Academic Exchange Agency (NAWA) and the Polish-American Fulbright Commission organize on March 8, 2019 in Warsaw a conference within the Direct to Internationalization series entitled: How to attract American students to Polish universities? The program includes speeches by guests from the United States, as well as experts on cooperation with the US and representatives of universities who have been successful in developing this cooperation. Participants will learn, among others, about Polish-American cooperation in the area of science and higher education, and the tools and opportunities offered by NAWA and the Fulbright Commission to develop this cooperation. More: <https://nawa.gov.pl/promocja-i-targi/warsztaty-i-szkolenia/cykl-direct-to-internationalization/76-direct-to-internationalization-3>

Toruń Astrophysics / Physics Summer Program invites students

2019-03-01

The Faculty of Physics, Astronomy and Applied Computer Science of the University of Nicolaus Copernicus in Toruń has started application process for the third Summer The Toruń Astrophysics / Physics Summer Program (TAPS). The program is addressed to students from Poland and abroad interested in the implementation of holiday research projects as part of research conducted by physicists and astrophysicists from Toruń. This year, students can choose from 21 research topics: study of star forming processes in distant galaxies, quantum nanooptics, plasmon networks, atomic clock applications and ultra-precision optical spectroscopy. In addition to the implementation of projects, workshop participants will have the opportunity to listen once a week to scientific lectures on research topics that are currently explored in physics and astronomy. Speakers will be scientists from Toruń and guests invited from other centers. More: www.fizyka.umk.pl/taps

En Arche Foundation announces a scholarship contest for biology students

2019-03-04

The offer is addressed to current students of the third year of bachelor studies who plan to continue their master's studies, to first-year students completing master's studies and to current students of the third and fourth year of master's studies at the faculties of biology. Persons applying for a scholarship should interest in the neo-darwinist theory of evolution and its criticism from the position of intelligent design theory. One of the conditions for receiving the scholarship is to write an essay that will answer the question: What challenges does the intelligent design theory add to the standard model of biological macro-evolution? The Foundation offers a scholarship of PLN 1200 per month, which will be paid for nine consecutive months starting from October 2019 to June 2020. More: <https://enarche.pl/wp-content/uploads/Regulamin-Konkursu-1.pdf>

Diary - new course at the University of Life Sciences in Lublin

2019-03-04

The University of Life Sciences in Lublin since the academic year 2019/2020 has launched seven new fields of study. The Dairy products study is a response to the needs of the local industry. In the dairy sector, education will be carried out in close cooperation with regional dairy cooperatives from the Lublin region. During the conversation with the rector, I mentioned one of the problems of our industry - the problem of generation gap. It's about the lack of professionals in the dairy industry. Specialists are aging, retiring, and their places are not occupied by young people, because there is nobody to educate them - said Tadeusz Badach, President of the Regional Dairy Cooperative in Krasnystaw. The Dairy course will start in October 2019. At the beginning, the Lublin University will educate about 30 future specialists in the dairy industry.

4EU + Alliance applying for the status of „European Universities”

2019-03-04

On February 28, 2019, the 4EU + alliance submitted an application in the „European Universities” competition funded by the Erasmus + program. The European Commission is supporting alliances of European universities. This will be a crucial step towards the creation of a European area of education until 2025. The 4EU + European Alliance unites six renowned and comprehensively educating research universities. In 2017, Charles University (Czech Republic), University of Heidelberg (Germany), Sorbonne University (Sorbonne Université, France) and University of Warsaw (Poland) formed the 4EU alliance, which was officially inaugurated on March 10, 2018 in Paris. At the beginning of October 2018, a common strategy for long-term cooperation was approved (Joint Strategy for Long-term Cooperation). In the same month, the Alliance included more two universities - the University of Copenhagen (Denmark) and the University of Milan (Italy).

Professor Alfred Forchel to deliver a lecture at the Wrocław University of Technology

2019-03-04

Wrocław University of Technology invites participants to the lecture by Professor of Alfred Forchel, world-renowned physicist from the University of Würzburg, on 7 March entitled „Semiconductor nanophotonics - opportunities and challenges for science and applications”. It will be a summary of the most important discoveries in the field of semiconductor nanophotonics - new physical phenomena related to the interaction of light with matter at the quantum level and the construction of active optoelectronic elements based on them, serving such forward-looking fields as photonic integrated circuits and quantum communication. Alfred Forchel studied physics at the University of Stuttgart, where he was awarded a PhD degree. In 1990 he became a professor at the University of Julius and Maksymilian in Würzburg, where he headed the Department of Technical Physics. He created there a modern laboratory of nanostructures and semiconductor devices. Since 2009 he has been the rector of this university. 4th Katowice Psychometric Meeting to be held on March 14 and 15

2019-03-04

The Institute of Psychology at the University of Silesia is organizing the 4th national scientific conference in the Katowice Psychometric Meetings series. The conference, which will be held on 14 and 15 March at the Center for Scientific Information and the Academic Library will focus on the problem of the construction of psychological tests. The aim of the conference is to reflect on the changes occurring within psychometry over the years, as well as to disseminate knowledge about optimal strategies for the design of research and diagnostic tools. The meeting will be an opportunity to compare the methods used in the construction and adaptation of psychological tests, analysis of possible applications of these tools in education, business and the labor market or the use of advanced statistical methods in the preparation of such tests. More: <http://www.psychometria.katowice.us.edu.pl/>

XXXI International Education Salon Perspektywy 2019

2019-03-05

On March 8-9, 2019, the XXXI International Education Salon Perspektywy 2019 will take place in the Palace of Culture and Science in Warsaw. It will include the Salon of Higher and Post-secondary Schools, Foreign Schools, "Study abroad". The Warsaw Salon Perspektywy is an event during which young people can not only talk and get acquainted with the exhibitors' offer, but also participate in an extensive program of meetings, seminars and presentations. The exhibitors will have the opportunity to present the educational offer of universities, post-secondary schools, the offer of high schools and technicians in Warsaw and Mazovia Region, offer of scholarship programs, internships and practices organized by employers, educational publishers and producers of scientific aids. The event will also include presentations of study opportunities abroad, conducted by representatives of embassies, educational institutions and foreign higher education institutions.

Silesian University of Technology launches „Encounters with passion”

2019-03-05

Meeting with Prof. Jerzy Buzek began the series „Encounters with passion” – the program where the guests inspire students with their achievements. The event was organized by the Students' Self-Government and the University Council of the PhD Students of the Silesian University of Technology. During the meeting with students, the former Prime Minister and the President of the European Parliament recalled times of studies at the Silesian University of Technology, but also convinced that Silesia has a future, and graduates of the University of Technology have never had problems finding a job. Professor Jerzy Buzek graduated from the Silesian University of Technology in 1963. Later he worked at the Institute of Chemical Engineering of the Polish Academy of Sciences in Gliwice, where he wrote his PhD thesis in the technical sciences. In the years 1997-2001 he was the Prime Minister, since 2004 he has been continuously a member of the European Parliament, in the years 2009-2012 he was its chairman.

West Pomeranian University of Technology receives European certificate

2019-03-05

Two majors at the Faculty of Mechanical Engineering and Mechatronics of the West Pomeranian University of Technology in Szczecin, Material engineering and Transport obtained the European quality certificate for the EUR-ACE Label. Certificates are awarded for 5 years. Thanks to them, the university obtains confirmation of the high quality of education of engineers, conducting its education in accordance with standards set by professional organizations, and that the accredited program is based on the effects of education. EUR ACE Label is a certificate developed by the European Network for Engineering Accreditation. It is important for employers who obtain assurance that the candidate's competences in terms of knowledge, understand-

ing and practical skills are in line with international standards in the field of education of engineers in accordance with the standards and principles adopted in Europe.

European Union Commissioner for Agriculture visits the University of Agriculture in Krakow

2019-03-06

Phil Hogan, European Union Commissioner for Agriculture and Rural Development visited the University of Agriculture in Krakow (URK) and met with the authorities of this university as part of a visit of the delegation of the European Commission to Poland. The meeting included the presentation of research and education directions at the Krakow University of Agriculture. Commissioner Hogan «was greatly impressed by the discussed issues and expressed his readiness to strengthen cooperation and implement joint ventures. He also invited scientists and students to visit Brussels.» Phil Hogan emphasized the high quality of research conducted at URK. He also presented the assumptions of a new perspective for the Common Agricultural Policy and discussed plans regarding the principles of agricultural financing.

Peruvian Day held at the Catholic University of Lublin

2019-03-06

The Faculty of the Spanish World, Politics and International Relations of the Catholic University of Lublin (KUL), the Spanish-Polish Circle and the Honorary Consul of the Republic of Peru in Lublin invite participants to the Peruvian Day, which will be held at the Catholic University of Lublin, on March 7, 2019. The event is organized on the occasion of the launch of the Honorary Consulate of the Republic of Peru in Lublin. The program includes the opening of the photo exhibition entitled «Close and a bit further Peru» and a series of lectures devoted to Peru. The lecture on Polish-Peruvian relations will be delivered by Alberto Salas Barahona, Ambassador of Peru to Poland. Also, Pablo de la Fuente from the Department of the Spanish World KUL will talk about Polish-Peruvian football confrontations (1977, 1978, 1982).

Marshal of the Śląskie Voivodeship to co-finance Postgraduate Studies in Regional Knowledge

2019-03-06

The Marshal of the Silesian Voivodeship has confirmed co-financing for teachers who will take up studies in the next two-semester of interdisciplinary Post-Graduate Studies in Regional Knowledge. The applications can be sent until March 12. The studies are addressed to people who are particularly interested in Silesia and the Silesian Voivodeship. Their graduates will be provided with the ability to use effective and attractive methods and forms of education acquired during classes of an academic nature, as well as during field activities. Participants will carry out exercises that will be used during work with students, city tours and people who are the source of knowledge about the region. The acquired knowledge and experience will enable them to fulfil the role of regional education leader through creating original regional classes, regional programs and other forms of education related to knowledge about Silesia. Maritime University of Gdynia cooperates with the Experyment Science Center

2019-03-06

The Maritime University of Gdynia has signed a cooperation agreement with the Experyment Science Center. The document assumes support for popularizing science and knowledge, exchanging experience in education and organizing joint educational and scientific projects. The parties agreed to organize common events popularizing science and to provide substantive cooperation in events organized independently and enable the exchange of experience in order to develop educational processes. The agreement will allow students to participate in internships taking place at the Center, as well as to prepare their bachelor's and master's theses, other publications, educational and development projects. The partners will cooperate in obtaining funds as part of national, European and other projects and inform about joint activities through all their information channels.

Prof. Madeleine Albright to visit the University of Warsaw

2019-03-07

On March 8, 2019, in the auditorium of the former University Library Madeleine Albright, an American diplomat who was the first woman in history to be the secretary of state of the USA will meet Warsaw students. Her visit to the University of Warsaw is connected with last year's edition of her book entitled «Fascism. Warning». In the years 1997-2001, Professor Albright held the office of secretary of state of the USA, nominated by President Bill Clinton. Earlier, she worked at the White House, where she dealt with foreign policy. She was also a member of the Woodrow Wilson International Center at the Smithsonian Institution, as well as an American ambassador to the United Nations. Meeting with Prof. Albright will be conducted in English with the possibility of a translation. More: <https://www.facebook.com/events/728088804258060/>

MA studies inaugurated at the State Higher Vocational School in Krosno

2019-03-07

The State Higher Vocational School (PWSZ) in Krosno has launched the first Master's studies. - For us, this is an important event. We are starting a new stage in the development of our school - said during the inauguration of the Master's program in the field of «Production Engineering» Rector of the State Higher Vocational School in Krosno Prof. Grzegorz Przebinda. - This is a sign of appreciation of our school, strengthening its place both in the higher education system as well as in the region. The Master's degree at this university is a response to the demand of the regional economy, looking for well-trained specialists, prepared to work in production and service plants, research centers, design and consulting companies. The «Production Engineering» faculty accepted 114 students.

Detective story to celebrate the 100th anniversary of AGH University of Science and Technology

2019-03-07

The AGH University of Science and Technology in Krakow as part of the celebration of 100th anniversary of the university launched a contest for detective stories containing the topic of the University. The most interesting, suspenseful work with the campus and the AGH community in the background will be published in a common collection of stories. The competition is open and directed to both professional writers and amateurs. Stories should present the idea referring to the hundred-year history of AGH and take into account one of the selected topics: AGH laboratories, the Prometheus supercomputer, St Barbara feast, Juwenalia- student feast, the activity of science clubs, the campus or the Student City. Rules of the competition: https://www.agh.edu.pl/fileadmin/default/templates/images/Aktualnosci/aktualnosci/_2019/0603/Regulamin_konkursu_Kryminal_na_100-lecie_AGH.pdf

State Higher Vocational School in Nysa to launch an architectural model studio

2019-03-07

The Institute of Technical Sciences of the State Higher Vocational School in Nysa is launching a new architectural model studio. It allows students to develop various types of architectural objects and urban complexes independently. In the new studio students have at their disposal advanced equipment for assembling the models CNC milling machine, mini paint chamber with a set of compressors and airbrushes, model tools for processing wood-based materials and plastics, and other micro tools. The architectural model studio perfectly complements the educational infrastructure of architecture as a laboratory of building materials; drawing studio; painting studio; sculpture studio; a computer lab equipped with specialized CAD and CAE software and an atelier for students.

Russian Center for Science and Culture in Warsaw presents handbooks for the University of Economics in Katowice

2019-03-07

Matrioshka Student Scientific Club operating at the University of Economics in Katowice received books from the Russian Center for Science and Culture in Warsaw. This is an expression of support for the activity of the students club, which members visited the Center last December. Students received several dozen textbooks for learning Russian. They include beautiful editions of Russian scientific aids that are hardly available in the Polish publishing market. The club members hope that beautiful textbooks will encourage students to learn Russian and learn about Russian literature and art, as well as being useful in business contacts.

Adam Mickiewicz University in Poznań to apply for the status of a European University

2019-03-07

Adam Mickiewicz University in Poznan, together with seven universities from Europe, acting as part of the EPICUR (European Partnership for an Innovative Campus Unifying Regions) consortium, is applying for an EU grant for the creation of a European University. The concept of European Universities is the idea of French president Emmanuel Macron, who proposed the creation of a network of European universities with joint study programs and diplomas, conducting jointly advanced research. Universities are to start working from the next academic year. The project is financed under the Erasmus + program «European Universities». Poznan University's partners in the consortium are: University of Strasbourg and University of Haute-Alsace (France); University of Amsterdam (Netherlands); Albert-Ludwigs-University Freiburg and Karlsruher institut für technologie (Germany); University Bodenkultur Wien (Austria) and Aristotle University of Thessaloniki (Greece). More: <https://amu.edu.pl/dla-mediow/komunikaty-prasowe/uam-w-konsorcjum-epicur-ubiega-sie-o-status-uniumptionetu-europejskiego>

Academic Gala of the Journalistic Laurels 2018 in Lublin

2019-03-08

The University of Maria Curie Skłodowska (UMCS) in Lublin and the Catholic University of Lublin are organizing the Academic Gala of the Journalistic Laurels 2018, which will take place on March 11, 2019 at the Crown Tribunal in Lublin. The celebrations will include a debate: „Local media and civil society”. The Academic Journalistic Laurels (AKLAUD) are annual awards established in 2014 for people who combine work in the media with academic activity. The prize is given in two categories: AKLAUD and junior AKLAUD. The program will include the debate «Local media and civil society» with the participation of the representatives of the

AKLAUD Award Chapter, the Lublin media and local government. During the discussion, the invited participants will refer to the issue of relations between local media and individuals, groups and communities, and the role of the media in Lublin in defining the principles of social coexistence and educating future journalists.

Gdansk University of Technology and Second High School in Elbląg to form an academic class

2019-03-08

Faculty of Management and Economics of the Gdańsk University of Technology and Second Secondary School in Elbląg signed an agreement on cooperation in creating an academic class in order to promote entrepreneurial attitudes and activities. The agreement allows students to expand their knowledge in the field of economic sciences and knowledge of the economy in the school year 2019/2020. All lectures will include economic topics, entrepreneurship or finances and will be run by the employees of the University of Technology at the Secondary School No. 2 in Elbląg. The workshop and laboratory classes will be run at the university. The part of them will be conducted in English. The Faculty of Management and Economics has been cooperating with the Second Secondary School in Elbląg for several years, including organizing the competition for students from Warmian-Masurian and Pomeranian provinces who would like to test their knowledge of the functioning of financial markets, entrepreneurship and economics.

Dr Michał Puszczynski from the Wrocław Academy of Fine Arts receives the Fulbright scholarship

2019-03-08

Dr Michał Puszczynski from the Ceramics and Glass Faculty at the Academy of Fine Arts in Wrocław received a Fulbright Senior Award for the academic year 2019/2020. The Fulbright Senior Award is a scholarship for scientific and research workers of Polish scientific institutions for the implementation of their own research projects in the USA. During their stay in the USA, lasting from 3 to 9 months, the scholarship holders can implement their own research projects at an American university, research institute, government institution or non-governmental organization. For the academic year 2019-20, the Polish-American Fulbright Commission awarded 21 such scholarships out of 80 received applications. The scholarship is financed by the US Department of State and the Polish Ministry of Science and Higher Education.

Professor Kazimierz Furtak becomes a honorary doctor of the Kielce University of Technology

2019-03-11

Kielce University of Technology awarded the title of doctor honoris causa to Prof. Eng. Kazimierz Furtak, Rector of the Krakow University of Technology in the 2008-2012 and 2012-2016 terms. Professor Furtak is an outstanding expert in the field of civil engineering. He specializes in issues related to construction and materials research, construction of bridges and tunnels, concrete and wooden structures, reinforcement and modernization of bridge structures. His scientific activity resulted in the introduction to the Polish bridge technology of ferroconcrete assembly of a bridge deck with steel girders using slat joints. From 2017, he is the chairman of the Central Commission for Degrees and Titles. In addition, he chairs the Commission of Technical Sciences of the Polish Academy of Learning, as well as the Committee of Civil and Water Engineering of the Polish Academy of Sciences.

Lodz University of Technology receives „HR Excellence in Research”

2019-03-11

The European Commission has granted the Lodz University of Technology the award „HR Excellence in Research” for the following years. Earlier, it accepted the report on the implementation of the activities carried out so far and the proposal for a refreshed „Action Plan for 2018-2021”. - The distinction of HR Excellence in Research shows that the Lodz University of Technology dynamically adapts to the needs of scientists, striving to provide them with the best possible conditions for conducting research. In addition, thanks to the distinction, we are even better recognized internationally as a reliable partner, offering high standards of employment and research - says prof. Sławomir Wiak, rector of the Lodz University of Technology. Lodz University of Technology is the first technical university in Poland that has implemented the HR Strategy for Researchers. Already in 2016, it received the prestigious «HR Excellence in Research» award.

Professor Koźmiński: Universities want to educate the elite

2019-03-11

In competitive conditions, it is necessary to professionalize the management of universities and research centers - says Prof. Andrzej K. Koźmiński, President of the Kozminski University in Warsaw. Professionalization of university management and research centers requires on the one hand determination of criteria for the assessment and measures of success (also financial ones) of universities, and on the other - the formation of a group of professional managers of higher education and science – highlights Prof. Kozminski. In his opinion, this professional group will be aspired by people who, at a certain stage of their academic work (e.g. after PhD or post PhD degree), will decide for a managerial career, which should be sufficiently attractive and stable. The entire article by Professor Koźmiński about the issues of elite training and methods of its financing: <https://www.rp.pl/Opinie/302289847-Uczelnie-chca---ksztalcic-elity.html>

Conference “About the role of women in organizations and cultural institutions” to be held in Szczecin

2019-03-11

The Department of Sociology of Organization and Management of the Institute of Sociology at the University of Szczecin, the Szczecin branch of the Polish Sociological Association and the Municipal Public Library in Szczecin invite participants to the National Scientific Conference „Manager, activist, artist - women in organizations and cultural institutions” on March 12. The conference will be devoted to the position, role and activity of women in organizations and institutions in the field of culture, including artistic, educational, social and other forms of culture. It will start at 9:30 in the branch of the Municipal Public Library - ProMedia, at al. Wojska Polskiego 2. The organizers are planning to find answers to the questions: What is the cultural activity of women? What is their contribution to the development of organizations and institutions of culture and art? Is their culture management different from the men's approach?

Graduate of Law from University of Opole becomes the second in the all-Poland tax law competition

2019-03-11

A graduate of the Law and Administration Faculty of the University of Opole - Filip Kwaśniak took the second place in the all-Poland competition „MDDP & OSF Tax Everest- Academic Polish Championship in writing master's theses in the field of tax law”. The jury of the competition organized within the 4th Torun Review of Tax Certification in the Faculty of Law and Administration of the Nicolaus Copernicus University in Toruń appreciated the Filip Kwaśniak's Master's thesis «Convergence of administrative and penal sanctions in tax law». 34 master's theses from all universities in Poland were submitted for the contest, 7 were promoted to the final finale. The jury consisted of outstanding experts on the doctrine and practices of tax law in Poland.

13th Pi Day Party to be held at the University of Silesia

2019-03-11

Traditionally, in March, the Faculty of Mathematics, Physics and Chemistry of the University of Silesia organizes the Pi Day Party. The program of the event consists of interesting popular science lectures, various workshops, as well as shows and competitions with prizes. This year's party will start on March 14, 2019 at 9.42 (or $3 * 3.14$). The term is not chosen by chance, it refers to the American record of March 14: 3.14, the first three digits of the number π . The idea of celebrating the holiday was made in 1988 in the United States. At the University of Silesia, the event will be organized for the thirteenth time, and meetings will be held on the campus of the university in Katowice. This year's festival will last two days (March 14 and 15) and will be inaugurated by a lecture by Prof. Paweł Walczak entitled „A word on triangulation of polygons and polyhedrons”. More: <http://swietopi.pl/>

University of Life Sciences in Lublin implements the project as part of the „Third University Mission” program

2019-03-12

The Department of Chemistry of the University of Life Sciences (UP) in Lublin started the project: „CHEMICAL WAY: I teach, experience, understand, use, inspire”, which will last until November 30, 2020. UP in Lublin in cooperation with other education organizations will carry out a series of educational and research activities for 190 secondary school pupils from the Lublin region. Thus, the Lublin University will carry out tasks from the so-called «Third University Mission» program, which is part of a broad cooperation with the socio-economic environment. The project aims to inspire students' cognitive curiosity, creative thinking, making hypotheses and learning from conclusions by themselves, encouraging further education and selection of engineering professions.

University staff to receive PLN 916 million for salary increase

2019-03-12

The Ministry of Science and Higher Education (MNiSW) provides university staff with over PLN 916 million for salary increases. The allocation of the additional amounts will start soon. This is addition to the funds allocated at the end of last year, simultaneously with state treasury bonds that become another injection of money for universities implementing the Constitution for Science. The Ministry of Science and Higher Education points out that the amount now allocated is not money to increase the minimum wage for academic teachers. The minimum salary has been raised since January this year as the minimum pay for lecturers is set out in the Constitution for Science. However, the way of the distribution of funds from the reserve for remuneration will be decided autonomously by the universities.

University of Physical Education in Wrocław receives the HR Excellence in Research Logo

2019-03-12

The European Commission awarded the Academy of Physical Education in Wrocław with the Logo of HR Excellence in Research. The universities receiving the logo commit to creating favorable working conditions, career development and transparent recruitment processes for researchers. The HR Excellence in Research logo is awarded to institutions that are implementing the principles of the «European Charter for Researchers» and the «Code of Conduct for the Recruitment of Researchers», create a friendly working and development environment. Obtaining a logo is a distinction and prestige for its owner; it promotes it among international organizations and scientists, and assures bonuses for universities in international grant competitions, as well as in competitions of the National Science Center and the National Center for Research and Development and programs for financing science from the funds of the Ministry of Science and Higher Education.

Counteracting Violence in the Family - a new course at the University of Casimir the Great in Bydgoszcz

2019-03-12

Until 31 March, students can apply for a new postgraduate studies on Counteracting Domestic Violence at the University of Casimir the Great in Bydgoszcz. These are additional studies and their completion will prepare graduates to apply for a specialist certificate in the field of counteracting domestic violence. The studies will acquaint students with the theory, especially with knowledge of law, and with the practice of counteracting domestic violence, equip them with interpersonal skills necessary to work with people experiencing domestic violence and perpetrators of violence. Students will acquire competences and skills in the analysis and assessment of situations and phenomena that cause domestic violence, the use of methods, techniques and means of intervention against perpetrators of violence, organizing the provision of psychological assistance to an abused child, and evaluation of actions to solve problems in the field of preventing domestic violence.

University of Szczecin awarded for a creative recruitment campaign

2019-03-12

The University of Szczecin took the third place in the Genius Universitatis 2019 competition, organized by the Perspektywy Publishing House. The #SuperTeamUS campaign won the award in the „university in social media” category. The goal of #SuperTeamUS was to select a group whose image would serve to support the recruitment campaign. Pictures of the winning team were used in the university's information booklet, they are placed on printed materials promoting the educational offer, on websites and in social media, and the members of the group represent the university during meetings with high school graduates, Genius Universitatis is a contest for creative recruitment campaign of a university. Works were assessed in the following categories: press advertising supporting recruitment, recruitment support event, social media campaign, content marketing, recruitment website, online video, promotional gadget. They were evaluated by specialists dealing with marketing, advertising and social media on a daily basis.

Rector of Wrocław University of Technology met with Lower Silesian local government

2019-03-12

Rector of the Wrocław University of Technology Prof. Cezary Madryas met the Mayor of Jelenia Góra Jerzy Łuźniak, Mayor of Legnica Tadeusz Krzakowski, Mayor of Wałbrzych Roman Szelemiej, Marshal of the Lower Silesia Province Cezary Przybylski, Prof. Jerzy Jasieńko, Vice-Rector for Organization and Development and Prof. Andrzej Dziedzic, Vice-Rector for Teaching. The reason for the meeting were the issues connected with the branch of the Wrocław University of Technology in Jelenia Góra, Legnica and Wałbrzych. During the meeting the participants decided to modify and adapt to the current needs of the economy the curriculum in the branches of the university, also by launching courses consistent with the needs of the local industry. Activities will be undertaken jointly by

the cities and the university. The adopted work schedule assumes that recruitment for new directions will start in spring 2020, and the first students will start their studies on October 1, 2020.

New courses of the Open University of Warsaw

2019-03-13

Applying for the Open University of Warsaw (UOUW) classes is available in the third trimester of the academic year. The university offers 275 courses including 79 novelties. The courses are addressed to all students over 16 years of age. The UOUW's proposals cover issues ranging from the humanities to the natural and exact sciences and represent six areas of knowledge: culture and ideas; languages of the world; man and society; law, business and IT; science and environment; recreation and hobby. New students can choose following topics: „Lady, vamp, devotee, icon - Polish and Italian women in the mirror of the world” ; „I feel, so I am - workshops on emotional intelligence”; „Appetite for Portugal - Portuguese for holidays and not only” (A1 level); „Food consumer - a specially protected entity”; „Creativity in the design process” and „Drawing and painting for beginners”. XVIII National Conference of Teachers and Educators „School a place of man's education”

2019-03-13

The Department of Philosophical Anthropology and Philosophy of Law of the Catholic University of Lublin (KUL) together with the Foundation Servire Veritati Institute of National Education organizes on March 16, 2019 in Lublin, the XVIII National Conference of Teachers and Educators „School a place of human education”. During the event, the participants will hear the lecture of Dr Bogdan Czupryna „School as an environment raising maturity. What determines the effectiveness of education at school? Dr Marek Dziewicki from the Cardinal Stefan Wyszyński University in Warsaw will present the issue of empathy

and assertiveness in educational communication. The second part of the conference will be devoted to «contemporary teacher's models» and the school's relationship with parents. This issue in the lecture «Parent-consumer at school. The demand instead of support and cooperation” will be presented by Jacek BANAS from the Lublin Teacher Training Center.

Postgraduate studies „Information Security Management and Personal Data Protection”

2019-03-13

The Warsaw University of Life Sciences (SGGW) is recruiting students for the post-graduate program „Information Security Management and Personal Data Protection”. The course is starting in March this year. The studies are addressed to people employed in enterprises whose activity is covered by the GDPR and where there are high requirements in terms of the security of information, or people who are planning to become a Data Protection Officer (IOD), designated to implement the GDP in the government and local government administration units. The studies will enable preparation for practical and effective implementation of challenges in the field of information security management faced by today's enterprises and organizations. Completing the studies prepares participants to work as a Data Protection Officer or a person responsible for information security in the organization.

Council of the University of Rzeszów begins its activity

2019-03-13

The Council of the University of Rzeszów (UR) inaugurated its activities. It is a collegiate opinion-making body of the University. The term of office of the first Council will last until December 31, 2020. The Council, in accordance with statutory requirements, includes Małgorzata Kucharska - President of the Podkarpackie Business Club; Marek Ruchała - Director of the Sanofi Polska branch; Wit Karol Wojtowicz - Director of the Łańcut Castle Museum; Dr Józef Kierski; Prof. Jolanta Pasterska; MD Jacek Tabarkiewicz; Kamila Sikorska - Chairwoman of the Students' Self-government of UR. ->We are very pleased that such outstanding representatives of science, culture and art have agreed to support the University of Rzeszów. I am convinced that thanks to their help and involvement, our University will successfully implement its important mission not only for the Podkarpacie region «- said the Rector of the University of Economics - Prof. Sylwester Czopek.

Student Foresters' Club of the University of Life Sciences in Poznań receives awards

2019-03-13

The Student Foresters' Club of the University of Life Sciences in Poznań received the awards: „Forest Institution of the Year 2018” and „Oak Woodlander Statuette”. The award was given for Faculty's nearly 100 years history and its achievements. The jury awarded the formation of active attitudes for many students, through organization of scientific camps, stimulation of social activity of forestry students and commitment connected with commemorating the history of the Forestry Department and the Foresters' Club. The jury also appreciated the improvement of professional knowledge within the dozen sections operating, creating positive conditions for the development of student talents and the role of a recognizable, solid brand of the Poznań Forestry Department.

Koszalin University of Technology to cooperate with the Military Armaments Plant in Grudziądz

2019-03-13

Koszalin University of Technology has signed a cooperation agreement with Military Armaments Plant in Grudziądz (WZU). The agreement covers the implementation of apprenticeships by students of the mechanical faculty, faculty of electronics and computer science and the faculty of economic sciences. The University of Technology has already signed over 150 contracts for internships with various organizations. The WZU is the first company from the armaments industry in this group. The signatories of the agreement do not exclude that they will establish a second branch of the Koszalin University of Technology in Grudziądz, based on cooperation with the plant. Operating since 1960, the WZU is a modern defense industry company that realizes orders for the Polish army and foreign partners. It operates on the international armaments market with a specialization in missile defense technology. The company deals with the modernization of missile weapons and the renovation of anti-aircraft missile sets.

Joachim Gauck to be awarded the title of PhD honoris causa at the University of Lodz

2019-03-14

The Senate of the University of Lodz (UŁ) decided to award the title of doctor honoris causa to the former German President Joachim Gauck. The ceremony is scheduled for May 24, 2019. The PhD title will be awarded at the solemn meeting of the UTU Senate. - Joachim Gauck argued that the citizens of the former East Germany should settle their past and try to understand themselves. He did not stigmatize, but he wanted to understand. He knew that such a critical reflection was not straightforward, he realized that not only the former prominent persons of the regime had gone after the transformation into life's trouble, but also the former dissidents were unable to find their place in the new reality

and today they belong to the «victims of unification» - emphasizes Prof. Joanna Jabłkowska, dean of the Faculty of Philology at the University of Lodz, a Germanist. Joachim Gauck was the president of the Federal Office for Stasi Files (the Gauck's Institute). In March 2012 he was elected president of the Federal Republic of Germany. He held the office until March 2017.

University of Białystok to launch „March meetings with science”

2019-03-14

Workshops, lectures, shows and visits to scientific laboratories are the part of Open Days held at the University of Białystok Campus (UwB) on March 21-23, 2019. The event will be held under the slogan „March meetings with science”. The pupils and children together with their parents or guardians will have a lot of fun. The Faculty of Physics invites them to a lecture on gravitational waves. Chemists invite participants to chemical practical classes, where they will eat superice- cream and crunchies of a young scientist. They also prepared art contests for the 100th anniversary of the founding of the Polish Chemical Society and the 150th anniversary of the Periodic Table of Elements. Biologists will tell pupils about great epidemics in the history of mankind. Mathematicians and computer scientists have prepared workshops on photography, robots and computers.

University of Casimir the Great in Bydgoszcz cooperates with the Social Insurance Institution

2019-03-14

The University of Casimir the Great in Bydgoszcz signed a cooperation agreement with the Social Insurance Institution (ZUS). The agreement expands the area of cooperation of both institutions lasting for over two years. The document formalizes cooperation between the Institute of Law, Administration and Management with the Social Insurance Institution. As part of it, students will benefit from additional lectures and classes in the field of social security. Now the area of cooperation will be much larger and will include organization of conferences and seminars, implementation of joint research and development projects, organization of apprenticeships and internships, and the possibility of publishing for university employees in industry publications. The signing of the contract is also aimed at undertaking activities aimed at disseminating knowledge about insurance and implementation of the project: «Social insurance - education with ZUS».

Scientists of the University of Economics in Katowice awarded in the Progres3 competition

2019-03-14

The work of scientists of the University of Economics in Katowice was awarded in the competition for the best PhD dissertation delivered in 2018 at universities forming the Progres3 consortium. The first prize in the «Economics, finance and management» category was awarded to Dr Grzegorz Krawczyk for «Impact of the public procurement system on the functioning of the transport market in Poland». The work of Dr Aleksandra Sabo-Zielonka «Decision models in the planning of order picking in a modern warehouse» won the second prize in the category «Information Technology and Electrical Engineering». The third prize in the category «Health Market» was obtained by Dr Karolina Szymaniec-Mlicka for «The impact of the strategic orientation of the

organization on the effectiveness of its functioning on the example of public health entities». The Progres3 consortium consists of universities from the Czech regions: Moravian-Silesian, Žilina, Trenčín and Banskobystric, as well as Silesian and Opole Voivodships.

Researcher at the University of Gdańsk receives Fulbright scholarship

2019-03-14

Dr Agata Weydmann-Zwolicka from the Institute of Oceanography of the University of Gdańsk has been awarded the prestigious scholarship of the Polish-American Fulbright Commission in the Senior Award category 2019/20. The Gdańsk researcher will carry out the project «The impact of atlantification on the Arctic zooplankton: application of modern genomics methods» in cooperation with scientists from the Department of Marine Sciences and the Institute for Systems Genomics at the University of Connecticut. The main scientific goal of the project is to study the impact of climate change and the so-called Arctic atlantification on the biodiversity of zooplankton in the region of the West Spitsbergen Current, transporting into the Arctic the water of Atlantic origin and various planktonic organisms. Particular emphasis will be put on poorly known taxonomic groups and the biomass that are likely to change with global warming. More: https://ug.edu.pl/media/aktualnosci/86513/dr_hab_agata_veydmann-zwolicka_laureatka_stypendium_polsko-amerykanskiej_komisji_fulbrighta

Malaysian Ambassador visits the Jagiellonian University in Krakow

2019-03-15

The development of cooperation between the Jagiellonian University and Malaysian universities in the field of European studies, medicine and chemistry was the subject of talks between Chitry Devi Ramiah, Ambassador of Malaysia in Poland and Prof. Wojciech Nowak, the rector of the Jagiellonian University. The talks concerned higher education in

Poland and Malaysia, fields of study conducted by universities from both countries, as well as students and staff mobility. Chitry Devi Ramiah took over the office of the Malaysian Ambassador to Poland on April 17, 2018. She majored from social sciences, international relations and public administration. Formerly, she served as an ambassador in East Timor and as a Consul General in India.

University of Warmia and Mazury joins the international project „Water Harmony”

2019-03-15

The University of Warmia and Mazury (UWM) in Olsztyn participates in the international project „Water Harmony”, which is implemented as part of the Horizon 2020 program. The project starts this year and will last 3 years. The budget of the entire grant is 2 million euros. Its Polish budget is 800,000 PLN. The universities from Norway, Israel, USA, Singapore, China, Romania, Australia and Poland (UWM) and the Institute of Science from Sweden participate in the project. Harmony is in this project understood simply as a use as little water as possible, as avoiding use of pollutants and assuring the best the water cycle through effective wastewater treatment. - In this project, we want to show how to close various cycles of water - emphasizes Prof. Lech Smoczyński, head of the Department of Chemistry at the Faculty of Environmental Sciences and Agriculture UWM, coordinator of the Polish part of the project.

Growing popularity of the Unified Anti-plagiarism System

2019-03-15

Since the beginning of 2019, over 40,000 diploma theses have already been tested in the Unified System (JSA). JSA checks the similarity of the works to the texts and studies that were created earlier. It does not assess if the work is plagiarized, but it serves as a tool supporting the work of the promoter. JSA users come from 216 universities. The largest number of works for the JSA analysis was delivered by users from the Poznan University of Technology, Rzeszów University of Technology, Warsaw University of Technology, Krakow University of Technology and Gdańsk University of Technology (from 1,000 to nearly 2,500 works per university). JSA was developed at the Information Processing Center - National Research Institute at the request of the Ministry of Science. Pursuant to the amendment to the Act on Higher Education from January 1, 2019, each written dissertation before its admission must be checked in the JSA.

Deputy Minister Müller: We want scientists to focus on ambitious research

2019-03-15

Deputy Minister of Science and Higher Education Piotr Müller, who is also the chairman of the reform implementation team explained the changes that the „Constitution for Science” brings to the students and scientists of the Faculty of Political Science of the Maria Curie Skłodowska University (UMCS) in Lublin. - The reform allows to use the scientific capital, because so far the scientists have been focused on publishing many works, not necessarily of high scientific value – said Deputy Minister Müller during the meeting. We want scientists to publish their four most important research. We require them to do it once every four years and to focus on ambitious research, which brings results for citizens - he added. One of the changes introduced by the law on higher education and science is that universities can join federations and perform

as a one body. Deputy Minister Müller said that he hopes that such a federation will also be created by Lublin universities.

University of Maria Curie Skłodowska in Lublin to cooperate with the Military Counterintelligence Service

2019-03-15

The Maria Curie Skłodowska University (UMCS) in Lublin on Friday 15 March 2019 will sign cooperation agreements with the Military Counterintelligence Service (SKW). The captions under the document will be submitted by the rector of UMCS Prof. Stanisław Michałowski and the head of SKW Maciej Materka. The intention of both parties is to undertake and develop cooperation in the field of education of current and future cadres dealing with broadly understood security. According to the draft agreement, the Lublin university and SKW are also to jointly undertake activities that raise awareness of the possibilities of protecting Poland from contemporary threats.

Interdisciplinary conference „Contemporary man in the face of (not) favorable reality”

2019-03-15

The Faculty Council of the PhD Students’ Government and the Department of Social Pedagogy at the Faculty of Pedagogy and Psychology at the University of Silesia invite participants to the interdisciplinary student and PhD conference „Contemporary man in the face of (not) favorable reality”. The aim of the conference is a multi-faceted exchange of views and experiences regarding human functioning in the modern world from the perspective of challenges faced both by individuals as well as by collectives and institutions. The proposed thematic panels include: the shape and functioning of the modern family; cultural determinants of human functioning; shadows and the glamor of elderly people in the modern world; man and health, illness and disability; problems of functioning of socially

maladjusted individuals and the media - an opportunity or a threat to modern man? Applications for participation can be sent by Internet: konferencja.czlowiek2019@wp.pl

„Communication” application of the student of the University of Technology and Life Sciences in Bydgoszcz

2019-03-15

Bartek Mróz , student of the first year of applied computer science at the University of Technology and Life Sciences in Bydgoszcz, created the KomByd application, which makes the use of public transport easier for its users. The application, which can be downloaded for free from the GooglePlay online store, allows to search for stops by name and it shows the actual departure time of the bus. It also allows them to track bus departure times from other stops on the route and search for stops on the map. Through the application, users can also manage their season tickets, and the application will remind them to extend the validity of the ticket. The application is available in three language versions - Polish, English and Ukrainian.

University of Warmia and Mazury to launch the Center for Popularization of Science and Innovation

2019-03-18

The University of Warmia and Mazury (UWM) in Olsztyn has launched the construction of the Science and Innovation Center for Science and Innovation. The first visitors are welcomed in 2021. The basic aim of the center will be to popularize science and innovation among the inhabitants of the Warmian-Masurian Voivodeship. - We consider the Warsaw Copernicus Science Center as a model for our center. Our offer will be addressed both to children and adults - explains Dr Aleksander Socha, the UWM Chancellor. The estimated investment cost will amount to approx. PLN 33 million. Over PLN 16.6 million will be received from the Warmia and Mazury Regional Operational Program and PLN 10 million from the UWM own resources.

15th Student Information Festival

2019-03-18

From 21 to 23 March 2019 the AGH University of Science and Technology in Krakow will hold the 15th Student Information Festival. The event is organized by students for students. As every year, the festival gives the opportunity to make interesting acquaintances, broaden horizons and exchange information and views with people sharing similar interests. The Student IT Festival has been organized by students from the computer science circles of four Krakow universities: AGH University of Science and Technology, Jagiellonian University, Krakow University of Technology and University of Economics. Every year, the event unites professional IT specialists and enthusiasts from all over Poland who do not have the opportunity to deal with it professionally. More: <https://sfi.pl/>

Warsaw University of Technology agrees on cooperation with Polimex-Mostostal

2019-03-18

Prof. Eng. Jan Szmidt, rector of the Warsaw University of Technology (WUT), Krzysztof Figat, president of the board of Polimex-Mostostal, and Przemysław Janiszewski, vice-president of Polimex-Mostostal signed an agreement on scientific and technical cooperation. Combining the scientific and research potential with practical knowledge and experience of one of the leaders of engineering and executive companies in Poland will allow to develop competences and promote best practices in the construction, energy, oil, chemistry and gas industries as well as production. Cooperation is planned for educational, development, investment and modernization projects. The agreement includes the implementation of scholarship programs for the best students and graduates of the WUT, as an investment to create a back-up of the competent staff of future employees of the Polimex-Mostostal group. The agreement also provides for cooperation in the organization of training courses and post-graduate studies dedicated to the company's engineering and technical staff.

International design conference 2019 Agrafa to be held in April in Katowice

2019-03-18

The Academy of Fine Arts in Katowice invites participants on 4th and 5th April to the 6th international design conference Agrafa 2019. The organizers are planning an international review of the latest student achievements and an accompanying design workshop. They are providing for a opportunity to discuss about how to use the extraordinary possibilities of the 21st century and their consequence in the everyday life, in the environments where people have their relationships. The conference aims to predict what role of the designer in future scenarios. The history of those design events taking place under a common name Agrafa dates back to the

early 90s of the twentieth century, when the Nationwide Review of Graphic Design for Students of Fine Art Schools was organized for the first time. The Agrafa has been accompanying international conferences devoted to graphic design tasks since 2007. More: <https://agrafa.asp.katowice.pl/>

Pomeranian University in Słupsk to launch a new study - Cyberspace engineering

2019-03-18

The Pomeranian Academy in Słupsk is launching a new study - Cyberspace Engineering. The study is tailored for those who plan to work in institutions dealing with cybersecurity or want to become a radio, television or online journalist. The study program includes the basics of social sciences and personal security as well as knowledge of procedures and principles related to broadly understood cybersecurity, including learning to encrypt and decrypt data, secure information systems and secure data transmission in networks. Studies will offer two specialties: Cybersecurity with elements of cryptography and cryptology will prepare the graduate to create security and fight against cyber threats in local IT networks, and Cybermedia engineering provides training in the field of functioning of all types of media - including the handling of computer programs for text and image processing.

Prof. Jan Blecharz to hold a lecture on psychology and sport at the University of Wrocław

2019-03-18

The Institute of Psychology at the University of Wrocław invites participants on 19 March to meet with an outstanding sports psychologist - Prof. Jan Blecharz from the physical education and sports department of the Academy of Physical Education in Krakow. Professor Blecharz, psychologist of the Polish team at the Olympics in Albertville and Salt Lake City, as well as national team in ski jumping, will give a lecture on «Psychological aspects of sports championship». He will talk about the history of sport psychology, its main goals and tasks, and will try to answer why modern sport needs psychology? In his reflections on the role of psychologist and psychology in sport, Prof. Blecharz will be accompanied by his long-time co-worker, two-time Olympic champion, three-time world medallist, Renata Mauer-Róžańska.

University of Opole joins the program „Legal Awareness as a Way to Teen Security”

2019-03-18

The District Bar Council, the Faculty of Law and Administration of the University of Opole and the Self-government of the Opolskie Voivodeship have signed an agreement on the implementation of the program „Legal Awareness as a Way to Teen Security.” The signatories of the agreement want to work together to shape correct attitudes towards other people in the consciousness of schoolchildren and to respect their rights. The program was created in response to the needs arising from the diagnosis and interviews with teachers, students and parents, but above all in response to the growing number of court cases involving minors. Within its framework, the organizers are planning meetings with students in schools, workshops for teachers and willing parents, simulations of courtroom hearings for students and a summary conference. Classes for senior pupils of 22 schools of the province Opole district will be led by advocates of the District Bar Council and law

students. More: <http://www.uni.opole.pl/page/2754/rusza-program-educacji-prawnej-nastolatkow>

University of Life Sciences in Lublin to launch chemistry courses for pupils of secondary schools

2019-03-19

The free chemistry classes are offered by the University of Life Sciences in Lublin. The aim of lessons addressed to 160 secondary school students is teaching practical chemistry and developing creative thinking. The classes will be delivered as 9 workshops during which the pupils will be experimenting in the laboratory of the Department of Chemistry at the University of Life Sciences in Lublin (UP). Dr Jadwiga Stachowicz from the Department of Chemistry of UP emphasizes that the workshops will stimulate students' cognitive curiosity and interest in the laboratory work, as well as allow them to learn chemistry in a practical way.

Elbląg university undertakes cooperation with a Portuguese university Madeira

2019-03-19

Professor Eng. Zbigniew Walczyk, Rector of the State Higher Vocational School (PWSZ) in Elbląg, has signed a contract under the European ERASMUS + Program with the Instituto Superior de Administração e Línguas (ISAL) from Funchal on the Portuguese Madeira. The agreement will enable the cooperation of students and teaching staff from the Faculties of Economics of both universities. ISAL conducts regular studies at the faculties of Economics, Management, Tourism as well as post-graduate studies and specialization courses, such as Administrative management, Ecological tourism, Commercial management. The State Higher Vocational School in Elbląg has already concluded 30 partnership agreements under the Erasmus + Program. Thanks to the program, students and employees can travel to the Czech Republic, Turkey, Spain, Germany, Romania, Northern Macedonia, Croatia, Italy,

Portugal, Greece, France, Bulgaria, Slovakia, Hungary, Lithuania and Latvia.

New Program for foreigners studying Polish and Polish studies

2019-03-19

The National Academic Exchange Agency (NAWA) has started the call for proposals in a new program addressed to foreigners - POLONISTA Program for students of Polish and Polish studies 2019. The aim of the Program is to popularize the Polish language in the world and to support foreigners studying as part of Polish studies and programs carried out in foreign academic centers by allowing them to spend one or two semesters at a selected public university in Poland. The program is addressed to students of foreign Polish studies or Polish programs implemented as part of Slavic studies (in the field of Polish language, Polish culture and knowledge about Poland). Also winners and finalists of the Polish Language and Literature Competitions organized outside of Poland are eligible for participation in the Program. More: <https://nawa.gov.pl/jezyk-polski/program-dla-studentow-polonistyki-i-studiow-polskich-2019/ogloszenie>

Maria Curie Skłodowska University in Lublin to launch Open Days

2019-03-19

The Maria Curie Skłodowska University (UMCS) in Lublin invites pupils on March 22, 2019 to the largest event for university candidates - UMCS Open Days. During the event, the university will present its educational offer, the course of the recruitment process and requirements for candidates for studies. They will also see the real life of the university and get know how they can pursue their passions at UMCS. The program of the event also includes meetings with representatives of the District Examination Board from Krakow, who will present the modules for the exams in Polish, maths and a foreign language. Additional information, the main program and schedules of events on particular UMCS faculties can be found at: www.drzwiotwarte.umcs.pl

Debate of the National Congress of Science about doctoral schools

2019-03-19

The Nicolaus Copernicus University in Toruń will be the place of the second debate of the National Congress of Science (NKN) devoted to doctoral schools. Their introduction is one of the most important changes in the new Law on Higher Education and Science. The level of science practiced in Poland in a few years will be determined by present PhD students. That is why it is so important to create conditions for creative exchange of ideas, to ensure participation in scientific research at the highest level and contact with eminent scholars. The answer to these needs is to create completely new institutions in Poland - doctoral schools. During the debate on March 20, the representatives of various universities will present their doctoral school projects, exchange experiences and talk about the challenges and opportunities brought by transformations in the approach to doctoral education. The discussion will also concern the organizational structure, joint schools for several universities, education programs, recruitment and evaluation rules.

Moroccan promotion of the Lodz University of Technology

2019-03-20

The Center for International Cooperation at the Lodz University of Technology (PŁ) has started a project in Moroccan Marrakech to promote studies at the Łódź University. The project received funding in the amount of PLN 100,000 from the National Academic Exchange Agency from the «Modern Foreign Promotion» program. Its purpose is to increase the interest of Moroccan students in offer of the Technical University of Lodz especially in the French-language course Gestion et Technologie. The project is a comprehensive information and promotion campaign, which consists of three elements: a dedicated landing page, the project website (www.carouleavectul.ma), mobile advertising on the streets of Marrakech, which include 50 bicycles with the logo of the Lodz University of Technology and organization meetings with potential candidates for studies.

Deputy Prime Minister Gowin provided the State Higher Vocational School in Chełm with three planes

2019-03-20

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin provided the students of the State Higher Vocational School in Chełm with three Polish aircrafts - AT3 Series R100. Airplanes were purchased thanks to the financial support of the Ministry of Science and Higher Education. 150 students of the Pilotage course will use the planes in the training process. Thanks to new machines, the fleet of the University of Chełm will increase to 9 aircrafts. - We really want our students to be professionally prepared. We give them the highest quality equipment to assure them the opportunity to use the full and modern avionics tools. This will allow them to improve their skills and easy start in the labor market - said the rector of the State Higher Vocational School in Chełm, Dr Eng. Arkadiusz Tofil.

Fr. Prof. Dziekoński: In the age of technology development, it is worth dealing with the spirit

2019-03-20

Innovation, high dynamics of change and courage in entering new areas of knowledge distinguishes us from other universities - said Fr. Prof. Stanisław Dziekoński, rector of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw. - In the era of new technology, digitization, artificial intelligence, Internet of things, which are obviously very important in helping humans but we recognize also the worth of spiritual needs. It is necessary to strengthen those competences to bring us closer to humans. Therefore, the inclusion of the medical department into our university is even desirable - said the Rector of UKSW. Fr. Prof. Dziekoński explained that some of the scientific staff at Collegium Medicum come from UKSW, some are experts who work in institutions contracted by UKSW. These institutions include the Military Medical Institute, the Mother and Child In-

stitute, the Institute of Cardiology in Anin and the Central Clinical Hospital of the Ministry of Interior and Administration.

Jagiellonian University to launch Student Center for Support and Adaptation

2019-03-20

The Jagiellonian University and the University Hospital in Krakow have established a Student Support and Adaptation Center (SOWA). This initiative was created in response to the growing number of students who experience various types of psychological crises, nervous breakdowns and depression. Polish and world statistics show that students are more likely to face emotional problems than people of a similar age who do not continue their education in higher education institutions - says Dr Med. Maciej Pilecki, head of the Clinical Department of Child, Adolescent and Adult Psychiatry at the University Hospital in Krakow. The center began its work on March 18, 2019. Its headquarters is Sniadecki Collegium at ul. Kopernika 27 in Krakow.

Professor Eng. Andrzej Jacek Tejchman-Konarzewski from the Gdańsk University of Technology joins the Science Evaluation Commission

2019-03-20

Professor Eng. Andrzej Jacek Tejchman-Konarzewski, head of the Department of Building and Materials Engineering at the Faculty of Civil Engineering and Environment at the Gdańsk University of Technology was appointed to the Science Evaluation Commission (KEN). The Commission has 31 representatives of various fields of science and art as well as specialists in scientific policy appointed by the decision of the Minister of Science and Higher Education, Jarosław Gowin. The task of the body established by the Constitution for Science is first and foremost to evaluate the quality of scientific activity that will take place in 2021. The Commission will also evaluate evaluation of education in doctoral schools. It will also be responsible for preparing draft lists of publications on scientific monographs and scientific journals and peer-reviewed materials from international conferences, as well as presenting to the minister proposals for scientific categories for entities subject to evaluation.

University of Silesia to cooperate with the Cervantes Institute in Krakow

2019-03-20

The University of Silesia has signed a cooperation agreement with the Cervantes Institute in Krakow. The document was signed at the Faculty of Philology in Sosnowiec, during this year's Hispanophony - an event promoting Spanish language and culture. Cooperation enables organizing annual international conferences for teachers of Spanish as a foreign language (ELE), didactic workshops, as well as developing an internship program for students of the Cervantes Institute and co-organizing cultural events promoting Spanish language and culture, Hispanoamerican and Hispano-speaking countries. The Cervantes Institute is a Spanish state institution established in 1991 to disseminate and teach Span-

ish and to promote Spanish and Hispanic American culture abroad. The Institute has over 77 branches on five continents.

University of Technology and Life Sciences in Bydgoszcz supports the tool industry

2019-03-20

The University of Technology and Life Sciences in Bydgoszcz (UTP) has started the implementation of the Instrument Valley's project. Its aim is to support entrepreneurs, promote industry education as well as promote the region as a strong center of the tool industry. The agreement on this matter was signed during the Innoform fair in Bydgoszcz by the UTP Rector, voivodship marshal, the mayor of Bydgoszcz, the head of the Bydgoszcz powiat, the rector of the University, the chairman of the board of the Bydgoszcz Industrial Cluster and the Kujawsko-Pomorski Curator of Education. The aim of the project is to care for the development of the tool and plastics processing industry, to support industry education at all stages of education and to promote the Instrument Valley's brand and the Innoform fair. In Bydgoszcz, there are over 190 enterprises dealing in plastics processing and about 30 tool centers. They employ a total of over 4,000 people.

Collegium Civitas Seminar to fight against terrorism in cyberspace

2019-03-21

In cooperation with the House of Meetings with History and as part of the interdisciplinary program „Views on terrorism” the Center for Research on Terrorism of Collegium Civitas in Warsaw invites participants to the seminar „Fight against terrorism in cyberspace”. The event, which will take place on Friday 22 March 2019 in Warsaw at ul. Karowa 20, will be devoted to the use of various methods of communication, training and radicalization, also in cyberspace by terrorist organizations. Due to the fact that counteracting these phenomena requires expertise in IT, communication theory and psychological processes of radicalization, the fight against

terrorism in cyberspace is one of the most dynamic fields of confrontation with this threat. The seminar will be attended by experts in the field of counter-terrorism and security in cyberspace.

Medical University of Białystok to cooperate with the Belarusian psychiatric clinic

2019-03-21

The Medical University of Białystok has concluded an agreement on scientific cooperation with the Belarusian Pediatric Psychiatry Clinic in Minsk. The contract concluded for 5 years assumes the exchange of personnel, scientists, doctors and administrative employees, development and implementation of joint research and training programs, exchange of information, materials and scientific publications, joint publication of instructions and monographs on medicine and the organization of joint scientific conferences and symposia. This initiative can help in completing the staff for the Center for Psychiatry created in Białystok for children, youth and adults. The university authorities expect that Belarusian child psychiatrists will take up work in Białystok, when the Center will start operating.

State Higher Vocational School in Nysa to cooperate with secondary schools from 3 provinces

2019-03-21

The State Higher Vocational School in Nysa will cooperate with the School of Economics in Nysa. The university already cooperates with 32 secondary schools from the Opole; Lower Silesia and Silesia provinces. The main assumption of cooperation with the new partner is integrating school and non-school didactic activities taking into account the passions and interests of students e.g. sport, psychology and diet. Implementation of this goal will enable the pupils to discover, direct and broaden their interests and thus make an informed decision about the field of study. The agreement provides for lectures and meetings with class students learning profession of hotel assistant, lectures and meetings organized at the Institute of Health Sciences and participation of seminars and scientific conferences.

Conference of partners of Economics, Ecology and Infrastructure at High-Speed Railways project

2019-03-21

The participants of the Economics, Ecology and Infrastructure at High-Speed Railways project have met at the University of Economics in Katowice (UE). The project is financed by the European Union as part of the Erasmus + program. The project involves UE in Katowice, the Technical University of Dresden from Germany (leader), Technical University of Madrid from Spain, M. Auezov South Kazakhstan State University, Tynyshepaev Kazakh Academy of Transport and Communications and Eurasian National University from Kazakhstan, as well as the Russian Federal State Budget Educational Institution for Higher Education «Emperor Alexander I of St. Petersburg State Transport University», Ural State University of Transportation and Far Eastern State Transport University. The main objective is to support the transfer of knowledge in the field of railway engineering, in particular high-speed rail, through the exchange of knowledge and skills between partners.

7th International Conference of Masters of Science to be held in May at the University of Silesia in Katowice

2019-03-21

The Faculty of International Polish Studies, the School of Polish Language and Culture, as well as the Student Group of Foreign Students „The Tower of Babel” and the Center for Chinese Language and Culture at the University of Silesia invite participants to the 7th International Conference of Masters of Science. The aim of the meeting, which will be held on May 13 at the Faculty of Philology, is to enable graduate students, outstanding students of the undergraduate studies and PhD students to present fragments of their own diploma theses. The invitation to participate in the conference is addressed to both foreigners and Poles studying at Polish universities. Foreign students can present their point of view on Polish literature, culture and language, while Polish students can present intercultural issues during their lectures. Applications can be sent by April 21 at the e-mail address: szkola@us.edu.pl.

Medical University of Bialystok wins the „Vision of Health 2019” competition

2019-03-22

The Artificial Intelligence Center of the Medical University of Bialystok (UMB) has been awarded within the „Vision of Health 2019” contest. The prizes were awarded in 8 categories. The jury appreciated the UMB vision regarding the development of artificial intelligence in medicine. On behalf of the Bialystok university, the award was received by Prof. Marcin Moniuszko, Vice-Rector for Science. The main prize was awarded in the category Visionary of the year. Bialystok's university also triumphed in the following categories: visionary of the system, visionary of science, visionary solutions in medicine, visionary personality, visionary social worker, visionary educational and preventive program, and a vision in Polish medicine. The «Vision of Health 2019» contest was organized by the weekly journal «Do Rzeczy» with support of the Ministry of Health.

Krakov student wins the competition for the best diploma thesis on currency markets

2019-03-22

Magdalena Sikorska from the University of Economics in Krakow won the first Competition for the best diploma thesis on currency markets. The organizer of the Walutomat.pl competition, the largest currency exchange platform in Poland, awarded her for the work „Significance of swap transactions in the evolution of the Polish currency market and the OTC interest rate derivatives market”. The Walutomat service has just announced the winners of the contest. For the next year's Diploma Work Competition students can submit not only their master's, but also bachelor's and engineering theses. In this way, the organizer wants to broaden the reach of the competition. To take part in the next year's competition, a student should write a thesis on currency markets, present it from April 1 to November 15, 2019, achieve at least a good grade and send it to the organizer. There are cash prizes worth PLN 8,000 to win, as well as sets of attractive gadgets.

University of Wrocław participates in the European Universities competition

2019-03-22

The University of Wrocław (UW) is one of the universities participating in the European Universities competition organized by the European Commission. The University of Wrocław is applying for funding within the InclusU network (Inclusive-ness in / for the European Union). The agreement was signed by: University of Wrocław, University of Malmö (Sweden), Michał Römer University (Lithuania), Babeş-Bolyai University (Romania), Roma Tre University (Italy), University of Minho (Portugal) and University of Lille (France). The InclusU network would have a total of 224,000. students and 19 thousand employees. The president of France, Emmanuel Macron, appealed in 2017 for the creation of twenty «European Universities» - networks of long-term universities cooperating with each other. These consortia would enable students to obtain a degree in education at several European institutions simultaneously. It would foster international integration and translate to a higher level of education.

Gdańsk University of Technology signs agreement of cooperation with the Regional Labor Inspectorate

2019-03-22

Gdańsk University of Technology and the Regional Labor Inspectorate signed a declaration of cooperation. It will include co-organization of scientific conferences, internships for students and joint research projects. The signatories undertook to support mutual initiatives for popularizing and deepening knowledge in the field of human protection in the work environment. The cooperation also includes organizing scientific conferences, symposia and other forms of transferring knowledge and experiences as well as inspiring significant scientific research, technology transfer and commercialization of research results. The District Labor Inspectorate in Gdańsk in the field of education is to be involved in providing students with practical knowledge in the

field of human protection in the work environment. It is also planned to organize internships for outstanding students and the implementation of joint research and development projects.

Research on humour and aggression on the Internet

2019-03-25

Dr Marta Dynel from the Faculty of Philology at the University of Lodz (UŁ) has started her research on humour and aggression on the Internet. Humour and rudeness in the Internet are subjects studied so far independently. The main goal of the interdisciplinary project of Dr Marta Dynel is an analysis of interdependence between sense of humour (both verbal and non-verbal) and verbal rudeness in communication in social media, showing that aggression on the Internet can serve entertainment purposes and that Internet humour can have its roots in real or faked aggression. - We will systematically examine new forms and dynamics of aggressive humour, mainly in English but also in other languages (Polish, Russian, Lithuanian, German, Italian and Spanish), analyzing not only intercultural but also intra-cultural issues- said Dr Marta Dynel.

Jan Kochanowski University in Kielce receives the right to award PhD in law

2019-03-25

The Jan Kochanowski University (UJK) in Kielce has obtained the right to award PhD titles in the legal science discipline. It qualifies Kielce to the elite academic centers educating lawyers - said Prof. Jerzy Jaskiernia, dean of the Faculty of Law, Administration and Management of UJK. Prof. Jerzy Jaskiernia emphasized that the development of the scientific staff was decisive. - In Warsaw and Krakow, the organization of academic staff educating lawyers is simple. In Kielce we started almost from scratch, and today our legal staff consists of 12 professors and post PhD holders, 21 PhD holders in legal sciences. They are Kielce inhabitants. This creates a perspective for the future - believes Prof. Jerzy Jaskiernia. The first PhD courses in the field of legal sciences are scheduled to start in April this year.

State Higher Vocational School in Płock celebrated its 20th anniversary by changing its name

2019-03-25

The State Higher Vocational School in Płock celebrates its 20th anniversary. On this occasion, the university decided to change the name. From March 21, 2019, it becomes the Mazowiecka Public School in Płock. - The development of our university is balanced. We have a stable number of students, we educate at a high level and regularly expand our study offer. We are developing scientifically, we are improving our educational base - said Prof. Associate Maciej Słodki, university rector, during the anniversary celebrations. Professor Słodki added that the Act 2.0 -Constitution for science changed not only the status, but also the statute of vocational schools. - We were and are a university educating primarily for the needs of our city and the broadly understood region. We would like to highlight it in a special way by changing the name of our university to the Mazowiecka Public School in Płock.

Silesian Medical University receives certificates „Studies with future” and „Laurel of Innovation”

2019-03-25

Silesian Medical University in Katowice was awarded in the 4th Competition and Accreditation Program „Studies with future” certificate. The study «Health Risk Management» provided in the public health department in Bytom again obtained the accreditation certificate «»Studies with future». Also the «Neurobiology» faculty, second-degree studies, at the medical department in Katowice received this award. The «»Studies with future» accreditation certificate is awarded by the Foundation for the Development of Education and Scholarship. It is given to studies and specializations that meet the needs of the labor market and meet the expectations of the socio-economic environment. In addition, the courses of «Health Risk Management» and «Neurobiology», second-degree studies obtained the «Laurel of Innovation» - a special distinction for the studies implementing the most innovative and unique solutions in the field of material base and technology supporting the educational process.

New partners of the University of Silesia in Katowice

2019-03-25

The University of Silesia in Katowice has signed further cooperation agreements: with the School nr 11 in Kęty, 1st Secondary school in Kęty; with the School of Arts in Dąbrowa Górnicza and the Upper Silesian Education Center Maria Skłodowska-Curie in Gliwice. Cooperation with schools will enable students to participate in lectures, seminars and workshops at the university and lectures at the school. Under the contracts, teachers will receive support in raising professional qualifications, and students will be able to take pedagogical practices at school or participate in observational activities. The agreement with the Upper Silesian Education Center assumes the implementation of joint projects and cooperation in the organization and promotion

of cultural and educational events. The university and schools are planning also to animate and create cooperation networks aimed at better use of the scientific and human potential of both parties.

Wroclaw University of Economics joins the international project HeartBIT 4.0

2019-03-25

The employees of the Institute of Business Information Technology at the University of Economics in Wroclaw gained funding for the HeartBIT 4.0 project. The project will be implemented as part of the prestigious Horizon 2020 program (Twinning Program). The aim of the HeartBIT 4.0 project (Application of innovative Medical Data Science for heart diseases) is to conduct a series of trainings, workshops, consultations and to develop materials for the employees of the Faculty and Clinic of Heart Diseases at the Medical University of Wroclaw, including in the field of application of modern Big Data technologies, Data Science techniques and machine learning in medicine and the security of medical data. The project will be implemented by a university consortium consisting of: Medical University and Wroclaw University of Economics, German Technische Universität Dresden and Universität Leipzig as well as the Czech Vysoká škola Ekonomická v Praze. The total project budget is approximately 788 thousand euro.

Vocational colleges and the Industrial Development Agency signs cooperation agreement

2019-03-26

During the first Conference of Rectors of Public Vocational Schools in Plock the school representatives signed a contract, which completely changes the relations between vocational schools and industry. Thanks to the agreement, vocational schools will be able to establish close cooperation with the Industrial Development Agency (ARP). In accordance with the provisions of the contract, the ARP

will present the enterprises' demand for graduates of specific majors and on this basis, vocational schools will be able to better shape their scientific offer. - From now on, vocational schools will develop their educational program in close cooperation with companies, the industry included in the Industrial Development Agency, but I am convinced that this agreement will expand to other areas of the Polish economy - said Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin.

Warsaw University to hold IT Days 2019

2019-03-26

From 26 to 27 March 2019, the Faculty of Mathematics and Information Science of the Warsaw University of Technology will hold the Warsaw IT Days. This is the largest meeting of students, professionals and IT experts in Central and Eastern Europe. The 10th Warsaw Computer Science Days will include interesting lectures in the field of computer science, creating start-ups and workshops take place. The conference is also connected with the IT Job Exchange to present job and apprenticeship offer. Participants of the event will be able to check the latest trends in the IT job market, consult their career path and find out what current and future value in the job market they represent. More: <https://warszawskiedniinformatyki.pl/>

University of the Third Age of the Lodz University of Technology and the city of Łódź sign the agreement on their cooperation

2019-03-26

Mayor of Łódź Hanna Zdanowska and Vice-Rector for Science at the Lodz University of Technology Prof. Ireneusz Zbiciński, signed an agreement on cooperation between the University of the Third Age of the Lodz at the University of Technology and the city of Łódź, regarding joint activities for the multi-aspected development of the seniors' community. Thanks to the cooperation established, the parties will be able to inspire each other to joint activities for the benefit of seniors in the areas of education, promotion of physical, social and cultural activity and learning about the environment and history of the Lodz region. The University of the Third Age of the Lodz University of Technology, operating since 2006, is an integral part of a university. University of Economics in Katowice receives certificate "Studies of Future"

2019-03-26

Two fields of study at the University of Economics in Katowice have been awarded with accreditation certificates of the Foundation for the Development of Education and Higher Education. The certificates were awarded to the following majors: Computer Science at the Department of Computer Science and Communication and Entrepreneurship and Finance conducted at the Faculty of Economics. They were handed in Jabłonna during the Final of the National Competition and Accreditation Program «Studies of Future». In addition, the Entrepreneurship and Finances course received the extraordinary Laurel of Innovation certificate. The certificate is offered to the majors that implemented the most innovative and unique solutions in the material base and technologies supporting the didactic process, and the IT course was awarded the extraordinary Certificate of

Education Quality Leader.

Pomeranian Medical University in Szczecin cooperates with the University of Vilnius

2019-03-26

The Pomeranian Medical University in Szczecin (PUM) signed a cooperation agreement with the Lithuanian University of Vilnius. The agreement concerns, joint research, exchange of scientific and didactic staff and students. Last year, the PUM delegation visited Vilnius University, which has long been involved in joint research in the field of hereditary cancers. Now, thanks to the agreement, their cooperation will be extended to new areas, including congenital metabolic diseases and medical history. The Vilnius University was founded in 1579 by King Stefan Batory. Today it is on the list of the 500 best universities in the world and is the largest high school in Lithuania. It has 12 departments, 10 research centers, 3 hospitals, an astronomical observatory and over 25,000 students.

European Day at Collegium Civitas in Warsaw

2019-03-27

Elections to the European Parliament will be held on 26 May 2019 and on 9 April Collegium Civitas in Warsaw invites participants to meet EU experts and join CC workshops to celebrate the European Day. During the event, the participants can ask experts about the problems and challenges of the EU and what can be expected from the next elections. They will talk about Brexit and fake news, as well as the direction in which the community is heading and its influence. Also, non-governmental organizations representing various initiatives controlling the EU and animating pro-European and pro-democratic movements are invited to European Day. Nano and Micromechanics Conference CNM2019 to be held at Rzeszów University of Technology

2019-03-27

Rzeszów University of Technology will host the Nano and Micromechanics Conference CNM2019. The event, which will take place in July this year, as part of the National Academic Exchange Agency (NAWA) project is organized by Rzeszów University of Technology, Institute of Fundamental Problems of Technology of the Polish Academy of Sciences (PAN) and the Committee of Mechanics of the Polish Academy of Sciences. The CNM 2019 conference is an international meeting devoted to micro and nanomechanics, which takes place every two years in Poland. The conference is addressed to engineers and scientists from both academia and industry from around the world to discuss the latest developments and future changes in nano- and micro-mechanics. The aim of the conference is to familiarize with the latest knowledge in the multidisciplinary area of nanotechnology and micro-technology in the fields of mechanics, fluids, physics, chemistry, biotechnology and biomedicine.

New fields of study launched at the University of Environmental and Life Sciences in Lublin

2019-03-27

Veterinary analytics, biosafety and crisis management, dairy, animal care and animal therapy, garden art and plant arrangements, management of the Earth's resources, herbalism and phytoproducts. These 7 new fields of study will be launched by the University of Nature (UP) in Lublin in the academic year 2019/2020. The offer for the new academic year includes a total of 39 studies. In addition to the seven new trends, there are unique courses in Poland that only occur at the UP in Lublin, such as animal behavior, food safety and certification, biocosmetology, gastronomy and culinary arts, hippology and equestrianism, herbalism and plant therapies. Online registration of candidates for studies will start on May 10, 2019.

National Academic Exchange Agency becomes an official partner of the Going Global conference

2019-03-27

The National Academic Exchange Agency (NAWA) has become the official partner of the annual Going Global conference at the invitation of the British Council Poland Foundation. Since 2004 Going Global is one of the most important events gathering leaders of higher education. This year's conference will take place in Berlin on 13-15 May. The event will focus on issues related to the role of the higher education sector in the context of such challenges as diplomacy of knowledge and the digital world. NAWA will be a participant in the poster session, where it will present the „Polish Returns” Program of Ulam. The agency will take part in the exhibition presenting its offer to Going Global guests.

University of Casimir the Great in Bydgoszcz to discuss on economic crime

2019-03-27

The Criminal Law Society in cooperation with the Faculty of Administration and Social Sciences of the University of Casimir the Great in Bydgoszcz invites participants to the National Student and Doctoral Scientific Conference „Economic Crime”, which will be held on 3rd April. The conference is to be a platform for the following issues: crime of mismanagement; crime of economic bribery; fraud; money laundering offense; crimes against creditors and excise smuggling and other crimes related to the depletion of excise duty. The organizers are also planning discussions on crimes against public procurement, incorrect keeping of business records, crimes against money and securities trading, tax fraud, abuse against EU financial interests and organized economic crime.

University of Gdańsk becomes a co-organizer of Summer Meetings with Science

2019-03-27

The Institute of Hydraulic Engineering of the Polish Academy of Sciences in Gdańsk, the Institute of Oceanology of the Polish Academy of Sciences in Sopot and the University of Gdańsk have signed an agreement on cooperation in the organization and promotion of „Summer Meetings with Science”. Summer Meetings with Science is a science-popularizing activity conducted continuously since 2003 at the Creative Work Center of the Polish Academy of Sciences in Czarlin-Skoczków on the Wdzydze lake. In July and August, every Saturday, scientists from various disciplines give popular science lectures popularizing the results of research conducted in Poland. After each lecture a discussion takes place, followed by a coffee break with a lecturer. The organizers of the Meetings received in 2012 the prestigious award of the Science Populariser awarded by the Ministry of Science and Higher Education and the Polish Press Agency. The campaign has been organized for many years with the support of the Council for Dissemination of Science of the Polish Academy of Sciences.

First newsletter of the international PIETE project

2019-03-27

The University of Economics in Katowice (EU), together with six universities from Poland and abroad, is implementing the PIETE project - Partnership for Initial Entrepreneurial Teacher Education. Its aim is to increase entrepreneurial skills among teachers of secondary schools and lecturers in teaching faculties. The first newsletter of the project involving cooperation between scientists from economics universities and researchers from universities teaching in the field of teaching methodology is already available. The leader is the Univations GmbH Institute for Knowledge & Technology Transfer at Martin-Luther University Halle-Wittenberg (Germany). In Poland the consortium include: University of Economics in Katowice, the Technical-Humanistic Academy in Bielsko-Biała participates in it, the foreign partners

are the University of Szeged (Hungary), Pedagogische Hochschule in Tirol (Austria), UIIN University-Industry Interaction Network (Netherlands) and MCI Management Center by the University of Innsbruck (Austria). More: <https://www.entrepreneurialteachers.eu/index.php/newsletter/>

AGH University of Science and Technology in Krakow to launch Job Fair

2019-03-28

Over 100 exhibitors present their offers to students and graduates during the Job Fair of the AGH University of Science and Technology in Krakow on March 28, 2019. This year's 115 exhibitors include companies Arcelor Mittal, Ericsson, Nokia, Comarch, Maspex and Motorola Solutions. Such a large number of exhibitors is the result of the fact that employers value highly the candidates coming from the AGH University of Science and Technology. The program of the fair includes consultations of application documents in Polish and English conducted by career counselors at the AGH UST Career Center. Thanks to this, job applicants will have the opportunity to better present their experience and skills to potential employers. More: <http://www.targi.agh.edu.pl/edycja-wiosenna/>

Project of the Wrocław University receives funding from the STER call

2019-03-28

The project of the Institute of Political Science of the University of Wrocław „Comparative studies on politics and administration – PhD studies for foreigners” will receive funding within the call of the National Agency for Academic Exchange STER - PhDscholarships for foreigners. Thanks to co-financing of over 850,000 PLN the Institute will conduct international promotion of the doctoral school and recruit students from around the world. The participants of the PhD comparative studies on politics and administration will start their studies in the academic year 2019/2020, and the best of them will receive a scholarship. Money under the STER competition is allocated for paying the scholarships and for activities aimed at attracting foreign PhD students. Thanks to the program, universities in Poland will gain foreign PhD students in biological sciences, politics and administration, earth sciences, literary studies, linguistics, as well as fine arts.

Silesian University of Technology to launch MBA studies with Industry 4.0 profile

2019-03-28

The first MBA studies on Industry 4.0 have been launched at the Silesian University of Technology. The ceremony of inauguration at the headquarters of the Center for Innovation and Technology Transfer was attended by representatives of the university authorities, the organizers of the studies and the students. - I am convinced that your studies are the best way to achieve the highest level of management. It is a real investment in knowledge, unique skills that are used to effectively manage modern enterprises - says Vice-Rector of the University for cooperation with the socio-economic environment, Prof. Janusz Kotowicz. MBA students represent all three public, private, social sectors of leading Polish and foreign companies. The planned profiles include air service, public services, engineering, IT, cyberse-

curity, energy, healthcare, HR and unprofiled MBA Executive.

New studies launched at Lublin high schools

2019-03-29

The students can apply for Lublin universities, which offer a lot of novelties in the academic year 2019/2020. The Catholic University of Lublin offers the course of applied anthropology in English. The studies are carried out at the first level and have a practical character. University of Life Sciences launches dairy studies. The course is to proceed in cooperation with the agricultural industry in the dual system. The College of Entrepreneurship and Administration proposes Management and Interior Design - the only such a course in the Lublin province. The University of Maria Curie Skłodowska in the new academic year has been launched physical education at the Puławy non-resident department, international relations in English as full-time studies at the Faculty of Political Sciences in Lublin and Polish-German cultural and translational studies.

National Center for Research and Development to launch „University Available” call

2019-03-29

The National Center for Research and Development has announced the call „University available”. The competition is financed from the European Funds - Operational Program Knowledge Education Development (PO WER). Adapting the university to the needs of people with disabilities is one of the objectives of the Government Accessibility Plus Program. The «Accessible University» call is part of the Government Access Availability Plus program. Its purpose is to introduce changes that will result in the full participation of people with special needs in social and public life. The whole spectrum of planned solutions is to make our surroundings like universities, schools, means of transport more friendly and accessible to people with disabilities - explains Jerzy Kwieciński, Minister of Investment and Development. The call for proposals will start on April 15 and will last until June 28, 2019. The to-

tal budget of the «Available University» is PLN 200 million, and public and private universities can apply for funding of up to PLN 15 million, regardless of the number of students.

Maria Curie-Skłodowska University in Lublin to launch Programming Academy

2019-03-29

Students can apply for a competition „Algorithms and data structures” and the course „Fundamentals of Programming”, organized as part of the Academy of Programming at the Maria Curie-Skłodowska University in Lublin (UMCS). The programs are addressed to a wide range of students interested in programming and are aimed at popularizing information technology among students of schools in the Lublin province. The organizer of the initiatives is the UMCS Institute of Computer Science in Lublin. UMCS Programming Academy is a long-term educational project that aims to popularize information technology among school students from the Lublin province. The Academy's offer is addressed not only to top managers, but also to a wide range of students interested in programming. The organizers want to motivate students to broaden their horizons and prove that IT issues can be presented in an interesting and accessible form. More: www.ap.umcs.pl

Students of the University of Białystok to help the amphibians

2019-03-29

Spring migration of amphibians on many Polish roads causes their mass deaths under the wheels of cars. In order to help frogs, toads or grass frogs safely reach the place of breeding, students from the Biologists' Circle of the University of Białystok (UwB) once again got involved in the Płotki Action. In place of their activities, they chose the Tsar's Way - a route intersecting the Biebrza National Park, on the section between Osowiec and Laskowiec. Biologists have been conducting studies on mortality of vertebrates including amphibians, for several years. The data is alarming: the increasing traffic on the Tsar's Road has a clear impact on amphibian mortality. To help the amphibians, the students in cooperation with the Biebrza National Park (BPN) set 800 meters of fences made of agrotexiles that prevent the frogs, toads or grass frogs from going out into the road. Pools are dug along the fences, where wandering animals fall. Twice a day buckets are checked and amphibians are safely transferred to the other side of the road.

Debate about the place of humor in language, culture and scientific research

2019-03-29

The PhD NEOLinguists Scientific Circle operating under the patronage of the Institute of English, the Institute of English Language Cultures and Literatures, and the Institute of Romance Languages and Translation Studies at the University of Silesia invites participants to the Humor Research Project on 4 and 5 April. The aim of the conference at the Faculty of Philology at the University of Silesia in Sosnowiec is to enable an exchange of views on the perception of humor through the prism of different paradigms, making it possible to look at the phenomenon of humor and its interdisciplinary and universal character, and to encourage debate about the place of humor in language, culture and research scientific. The proposed issues include various implementations of

humor in literature and translations, cultural, intercultural and multicultural aspects of humor, examples of humor in research on media and visuality, the importance of humor and laughter in cognition and social interaction, as well as the role of humor in methodology and teaching.

Silesian University of Technology invites participants to the Innovator Day

2019-03-29

The Faculty of Organization and Management at the Silesian University of Technology in Zabrze invites participants on April 4 to the „Innovator's Day” conference. It is an opportunity to exchange knowledge and experiences between students, entrepreneurs and research workers in the field of creating, developing and commercializing innovative solutions and the possibility of supporting young innovators and inventors. The organizers are planning attractions in the form of scientific riddles rooms, interesting lectures, exhibitions and practical workshops on the use of creative thinking techniques for innovative solutions and design thinking. Conference participants will also learn how to facilitate the processes of prototyping and designing new solutions through visual thinking, how to use the Internet of Things to implement a robot controlled via wifi, how to run an IT project “Creating the first mobile application”.

University of Gdańsk joins the Santander Universidades network

2019-03-29

The University of Gdańsk and Santander Bank Polska SA have signed a cooperation agreement under the Santander Universidades project. The main areas of cooperation are the development of new technologies, supporting the culture of entrepreneurship, establishing international contacts, scientific research, substantive support for the university community and the organization of internships for students. This is another cooperation agreement that the University of Gdańsk signs with public and

private institutions in order to strengthen joint scientific and didactic and organizational areas of activities, as part of the strategy of closer cooperation with the socio-economic environment. Santander Universidades is one of the key social initiatives of the Santander Group, aimed to carry out projects supporting higher education in the world for over 20 years. In Poland, the program has been operating since 2011, and it gathers 58 universities. More: https://ug.edu.pl/media/aktualnosci/86921/umowa_pomiedzy_uniwersytetem_gdanskim_i_santander_bank_polska

University of Rzeszów to organize the scientific conference „Towards independence”

2019-04-01

On 4-5 April 2019, the Ignacy Łukasiewicz Museum of Oil and Gas Industry in Bóbrka is organizing the first scientific conference entitled „Towards independence” under the grant „Towards independence: Independent Poland and Free Poles in the 19th-21st century”. The organizer of the event is the Faculty of Sociology and History of the University of Rzeszów. As part of the conference the university provides 4 thematic sessions: Pending independence, Modernization impulses in the Polish economy, Social changes at the turn of the century, Shades of Polish modernization. During the conference, the participants will listen to over a dozen lectures and presentations, including a lecture of Prof. Wojciech Morawski (Warsaw School of Economics) “Industrialization and modernization. Polish experiences”, and Prof. Piotr Franaszek (Jagiellonian University in Krakow) “The oil industry as a factor in the modernization of the economy and the Galician society”.

First call of the program „Initiative of excellence - a research university”

2019-04-01

The aim of the call is to select and support universities that will strive to achieve the status of a research university, and will be able to effectively compete with the best academic centers in Europe and the world. Universities participating in the competition will be required to present a plan for raising the level of research and quality of education, the implementation of which will contribute to raising the international importance of the university's activities. Universities selected in the competition will receive increased subsidies annually, in the years 2020-2026. The call for proposals under the «Initiative of excellence - research university» program will start on May 15 and will end on June 24, 2019.

Senate of the University of Białystok elected members of the University Council

2019-04-01

The university council is a new body, introduced by the Law on Higher Education and Science, which entered into force on October 1, 2018. In the 6-person Board of the University of Białystok (UWB), the university will be represented by three people: - Prof. Leonard Etel - Rector of the University of Białystok in 2012-2016, - Prof. Beata Izabella Godlewska-Żyłkiewicz - dean of the Faculty of Biology and Chemistry, member of the Analytical Chemistry Committee of the Polish Academy of Sciences, - Tomasz Zalewski, Chancellor of the UB. The members of the University Council from outside the UWB include: - Piotr Horba, - director of the Business and Corporate Banking Center in Białystok, Santander Bank Polska, - Robert Mucha - Sales and Marketing Director at Witraż company, - Andrzej Parafiniuk, - president of the Podlasie Regional Development Foundation. Andrzej Parafiniuk became the chairman of the UWB Council.

University of Gdańsk implementing the project „Masters of didactics”

2019-04-01

The University of Gdańsk has launched the project „Masters of didactics” co-financed from the European Social Fund under the Operational Program Knowledge Education Development. The aim of the project is to develop academic tutoring and other innovative didactic methods at the University of Gdańsk. University lecturers participating in it will take part in several-day study visits and training at renowned European universities, ranking in the first hundred schools of the Shanghai ranking. The course participants will use the acquired skills by tutoring the students of the Gdańsk University. The project will be attended by 38 teachers from all faculties of the University of Gdańsk and 114 students. The budget of the project is almost 330,000 PLN.

Gowin: It's time to focus on investments

2019-04-02

- We need huge investments in infrastructure, in energy, in education, in science, in higher education. In order to make these investments possible, we must really simplify economic law, remove barriers, invest in modern technologies - said Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. The head of the Ministry of Science pointed out that Poland as a state and society should concentrate on the second development engine. In his opinion, apart from consumption, Poland needs investments and therefore there is an urgent to create conditions for much faster investments than in recent years. In this context, Deputy Prime Minister Gowin mentioned the Łukasiewicz Network. - I'm glad that this network is launched, because it will be the third largest group of research centres in Europe. And the largest group of scientists. These institutes rather start cooperating e.g. on the commercialization of graphene, instead of senselessly compete with each other and duplicate their programs, - added Gowin.

Results of the International Alumni Program

2019-04-02

The National Academic Exchange Agency reports that results of the International Alumni Program have been announced. The main goal of the Program is to support universities and scientific units conducting education in the development of long-term relationships with foreign graduates, to use their knowledge and experience in educational processes and to build the brands of Polish institutions abroad in cooperation with them. 23 projects have been submitted to the ranking list. As part of the International Alumni Program, academic institutions will include create databases, applications and websites for developing contacts with foreign graduates, organize graduate conventions, reward active and successful foreign graduates, implement mentoring programs with their participation, prepare information and promotional materials for target groups, conduct online campaigns and promote abroad with the participation of foreign graduates. List of projects recommended for funding: <https://nawa.gov.pl/images/Aktualnosci/List rankingowa-International-Alumni-2018.pdf>

State Higher Vocational School in Elbląg cooperates with Asseco Data Systems

2019-04-02

The State Higher Vocational School (PWSZ) in Elbląg has signed an agreement with Asseco Data Systems. The cooperation will cover both the scientific sphere and joint IT undertakings as well as the organization of professional internships for university students and graduates. The agreement provides for the organization of internships, student and graduate internships as well as scientific cooperation in the field of the implementation of diploma theses in the field of computer science. - From the beginning, as soon as we started to build a university, the practicality of the training was the most important for us. But not such a craft school, it's about practical training with a solid general education, which will allow, if necessary, changing in the profession - said Prof. Eng. Zbigniew Walczyk, rector of the Elbląg PWSZ.

5th National Scientific Conference „Ecology, logistics, transport”

2019-04-02

The Logistics Scientific Club operating at the Faculty of Economic and Legal Sciences of the University of Natural Sciences and Humanities in Siedlce is organizing the 5th National Scientific Conference „Ecology, logistics, transport” on 4 April 2019. The event is addressed to practitioners, scientists, PhD students and students dealing with the issues of logistics. During the conference, the organizers are planning speeches and lectures on the following topics: Conditions of supply chain operation, Optimization of procurement processes, Logistics of production processes, Client as a basic element of distribution logistics, Innovative solutions in logistics processes, Efficiency of transport activities.

Researchers from the Adam Mickiewicz University in Poznań studying peatlands and climate change

2019-04-02

The University of Adam Mickiewicz in Poznań has launched a Laboratory of Wetland Ecology and Monitoring (LWEM) investigating how climate change and human activity affect wetlands and how bogs can help in slowing down the climate change. Scientists from the LWEM experimentally are testing the reaction of peatlands to drought and global warming. At the same time, they are working on peat profiles with many intermediaries aiming at recreating past climatic conditions. Great emphasis of the research is placed on biodiversity and ecology of microorganisms. Researchers show the potential of bogs to accumulate carbon dioxide, and how these ecosystems help in combating global warming by absorbing CO₂. Research shows that this state will not last forever. – The humanity is only 100 years from the catastrophic global warming. After this time, the bogs will emit more carbon dioxide than they absorb. More: <https://amu.edu.pl/badania-naukowe/popularyzacja-wyuka/artykuly-popularyzacja-wyuka/naukowcy-z-uam-badaja-torfowiska-i-zmiany-klimatu>

Cooperation agreement between Gdansk University of Technology and Grupa LOTOS

2019-04-02

Grupa LOTOS and Gdańsk University of Technology have signed a cooperation agreement. The signatories will work together on research and development projects in the area of low-emission transport and energy storage. The plan is to build devices that will be able to be implemented in the industry of lithium-ion and hydrogen batteries. Scientists from the university will prepare transducers, batteries and energy storage. The university will provide laboratories and qualified staff, LOTOS will guarantee the purchase of equipment and it will deal with issues related to technology and license. The University and Grupa LOTOS have been cooperating for many years - employees of the company conduct lectures and exercises at the university, and students participate in classes at the refinery. The new LOTOS Lab company will coordinate projects related to new methods of energy balancing, new batteries and cells as well as modern methods of energy storage and transport. Silesian University of Technology starts cooperation with the Qlavi foundation

2019-04-02

Silesian University of Science and Technology has signed an agreement on cooperation with the Gliwice foundation Qlavi. This is a continuation of the university's activities to maximize the acquisition of knowledge by students with motion limitations. The signatories of the agreement undertake to cooperate in the elimination of architectural barriers at the Silesian University of Science and Technology, to increase students' awareness in this area, to continue cooperation in the field of technical competence and student education, student activation in charity and voluntary activities, and support for the beneficiaries of the Qlavi foundation. The Qlavi

Foundation is engaged in activities for the benefit of the disabled people, activities for the integration and reintegration of professionals and the people at risk of social exclusion, supporting the development of communities and local societies. It also conducts social campaigns to raise awareness of everyday problems of people with disabilities.

Cardinal Stefan Wyszyński University in Warsaw to cooperate with the „Grom” unit

2019-04-03

Cardinal Stefan Wyszyński University (CSWU) in Warsaw concluded a cooperation agreement with the elite Polish military unit „Grom”. The agreement provides for cooperation in the field of research, didactics and other forms of education as well as the practical use of knowledge and any research techniques for the benefit of students, PhD students and employees; organization of various forms of education and staff improvement using teaching resources and experience of the Parties; practices in the form of volunteering, specialist courses and other forms of practical improvement of knowledge for the Grom soldiers; carrying out joint activities for the improvement of normative and doctrinal principles concerning training, preparation and implementation of the crisis management process and activities of Special Forces units in this regard; implementation of scientific and research projects with the participation of the staff and using the professional capabilities, infrastructure, specialist equipment and equipment of the Parties.

National Genetic Conference „Genomica” to be held in Krakow

2019-04-03

The National Genetic Conference „Genomica” is an initiative of students of the Students’ Scientific Society of Biotechnology „Mygen” of the Jagiellonian University in Krakow, which operates at the Faculty of Biochemistry, Biophysics and Biotechnology of the Jagiellonian University. The symposium will be held in Krakow on 5-7 April 2019. «Genomica» is addressed to students of various degrees and directions just starting their adventure with science and those who already conduct their own research and want to present them to others. The organizers are emphasizing, that this event is an excellent opportunity for beginning researchers to establish first scientific contacts, discuss topics of interest, as well as to gain experience and find a place in the scientific community. More: www.genomica.pl

State Higher Vocational School in Oświęcim to receive PLN 22.5 million for investments

2019-04-03

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin, allocated the amount of PLN 22.5 million for investments carried out at the State Higher Vocational School in Oświęcim. The funds will be used to implement the historical adaptation of the largest building located on the campus of the Academy of Oświęcim, for the needs of practical training, in particular the Center for Engineering and Medical Education to provide access to specialized laboratories and the Academic Library. The newly created didactic and research facilities will enable conducting regional scientific research and will constitute the basis for innovative education.

Debate on digging the Vistula Spit held at the University of Gdańsk

2019-04-03

The Academic Center for Culture in cooperation with the Department of Ecology and Vertebrate Zoology at the University of Gdańsk invites participants to the Auditorium C / 105 at the biology department on 4 April for the debate „Substantially on Digging the Vistula Spit”. In the opinion of the organizers of the debate, the plan of the excavation and the construction of the shipping channel as well as actions taken to implement the investment brought a lot of controversies. Also, unreliable and untested information appears around the subject. There is still lack of calm conversations, experts' discussions that would allow the public to understand what is to be built, and what are the potential risks of it. The purpose of the meeting is to clarify the inaccuracies and gather reliable arguments for and against the planned digging. Organizers would like to discuss and compare the potential benefits and threats resulting from this investment, as well as refer to legal aspects related to the protection of nature in the area of the spit.

Silesian University of Technology launched the Academy of Materials Science and Technology for schools

2019-04-03

The Faculty of Mechanical Engineering at the Silesian University of Technology started the Academy of Materials Science and Technology. It is attended by 300 pupils, qualified from secondary schools. Each participant will take part in eight thematic laboratory classes and will listen to four popular lectures. - This is an initiative created for talented young people and creative teachers, the first on such a scale in the field of materials science and technology - says the program coordinator, Dr Agata Śliwa. Selected lectures are held in the form of popular science talks, which allow students to discover scientific facts about materials and technologies of the future. After the lectures, participants in small

laboratory groups can literally touch the discussed issues within a strictly planned classes. Due to the great interest, the organizers will launch the Academy also in future. More: <https://www.materialowa.pl/>

Warsaw University of Life Sciences to hold lecture on environmental pollution

2019-04-04

Department of Landscape Architecture, Faculty of Horticulture, Biotechnology and Landscape Architecture, Warsaw University of Life Sciences (SGGW) and US Embassy in Poland invite participants to an open lecture by Eben Schwartz on environmental pollution by plastics on 8 April 2019. Eben Schwartz heads the Marine Debris Program at the California Coastal Commission. This commission deals with the protection and regulation of the California coast. Schwartz is an expert there, advising governments at local and state level, NGOs and industry, what activities to run and what programs to implement to address the causes of sea and ocean pollution.

Jan Kochanowski University in Kielce to award PhD titles in medical fields

2019-04-04

The Jan Kochanowski University (UJK) in Kielce received the right to award PhD titles in medical faculties. - The Commission appreciated our efforts. The receipt of rights reflects the scientific activity of our Faculty of Medicine and Health Sciences - emphasizes Prof. Stanisław Głuszek, Vice-Rector of the UJK. Kielce University will soon develop regulations for awarding PhD titles. The offer is mainly prepared for doctors, although other graduates of medical studies will also be able to use it. The university authorities expect that the PhD will primarily be awarded to the doctors working in the largest hospitals in the region, namely in Kielce, Czarnów and in the Świętokrzyskie Oncology Center.

Ministry of Science allocated 4 million for investments at the University of Białystok

2019-04-04

The Ministry of Science and Higher Education has allocated over PLN 4 million to investments of the University of Białystok (UwB). It will create a new university library and observatory together with the planetarium on the campus at ul. Ciołkowski. The library will be built within the next two years in the area next to the University Cultural Center and will be another building located around the so-called Sunny Square on the campus. In the middle of this square, an observatory will be built in 2020. The planetarium is designed to develop astronomy, but also to make it an element of the city. - We want residents to use this observatory - said Prof. Robert Ciborowski, rector of the UB.

„History is wisdom - future is challenge” becomes the motto of the Gdańsk University of Technology

2019-04-04

Over 4,000 people took part in an online contest organized to select the university motto, held among employees and students of the Gdańsk University of Technology. The motto of the academic community was the „history is wisdom - future is challenge”. A total of 18284 invitations to participate in the survey were sent. 2421 students and PhD students and 1585 employees of the Gdańsk University of Technology participated in the online voting. A total of 2892 votes (71.92 percent) supported the winning motto. - I declare that we will take into account the opinion of the majority and the proposed motto will be incorporated into our statute - said the rector of the Gdańsk University of Technology, Prof. Eng. Jacek Namieśnik.

Studies at the University of Casimir the Great in Bydgoszcz supported by the ministry

2019-04-04

The Minister of Maritime Economy and Inland Navigation Marek Gróbarczyk assumed to support the course of the revitalization of waterways, conducted at the Institute of Geography at the University of Casimir the Great in Bydgoszcz. This is a unique course on the scale of Europe. Modern engineering studies will prepare specialists in the field of comprehensive management of inland waterways. Students will acquire specialist knowledge in the field of natural and technical sciences, in the fields related to navigation, transport and logistics, engineering design, river information systems or the functioning of the water environment. Students interested in working as a member of a crew can take up professional practice in shipping companies in Poland and abroad. Students educated in the revitalization of waterways will obtain basic navigation rights and receive a certificate of a seaman, which can be upgraded as a part of their apprenticeship to the further shipping levels.

Silesian University of Technology to cooperate with secondary schools educating aviation mechanics

2019-04-04

Silesian University of Technology actively develops teaching activities in the field of aviation technology as well as in cooperation with leading secondary schools teaching in these courses. Cooperation agreements were signed with Complex of Automotive Schools in Gliwice and Complex of Mechanical Schools No. 4 in Krakow. The agreements define the principles of cooperation under the cooperation, classes profiled occupations: mechanical technician aerospace and avionics technician. In order to implement the agreement, the University of Technology will support the school through the implementation of practical activities in the emerging objects currently the Academic Aviation Training Center at

the Silesian University of Technology Gliwice airport. Cooperation will involve, supporting the content of the teaching process, in order to prepare young people to study in the fields of aviation and to work after graduation. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListaWiadomosci&Page=1&WebPartTitle2=Wiadomosc&Filter1Field2=Identyfikator&Filter1Value2=2647>

University of Gdańsk joins the group of 20 universities in the program „Initiative of excellence - a research university”

2019-04-04

The University of Gdańsk joins 20 Polish universities qualified for the program „Initiative of excellence - a research university”. The aim of the program is to select and support universities that will strive to achieve the status of a research university and will be able to effectively compete with the best academic centers in Europe and in the world. Universities qualified for the program met high enough assessments of research and didactics. There are statutory conditions regarding scientific categories obtained during the last comprehensive assessment of scientific performance. In addition, none of the fields of study offered by the university may be negatively assessed by the Polish Accreditation Committee. The selection of research universities is one of the most important aspects of the reform of higher education, introduced by the new law on higher education - the so-called Constitution for Science. More: https://ug.edu.pl/media/aktualnosci/87117/uniwerytet_gdanski_wsrod_20_uczelni_w_programie_inicjatywa_doskonalosci_-_uczelnia_badawcza

Parachute training to be held at the Rzeszów University of Technology

2019-04-05

On 10 April 2019, the Rzeszów University of Technology will host a parachute training show and a lecture entitled „The history of parachuting at the turn of the century and the use of Polish airborne troops during the Second World War.” The event is organized by Seven Rights, the owner of the Krak-Sky parachute school. The aim of the event is to familiarize students of the Rzeszów University of Technology with basic knowledge about parachuting and to present ways of using parachute equipment in airborne units. The classes will take the form of a multimedia lecture conducted by experienced instructors, former and current soldiers of airborne units and special forces.

Call for proposals for bilateral exchange with Germany

2019-04-05

The National Academic Exchange Agency (NAWA) has started accepting applications for bilateral exchange of scientists with the Federal Republic of Germany. The main purpose of the exchange is to support the mobility of scientists in the implementation of research projects, agreed and conducted jointly by partners from Poland and Germany. Joint research projects can cover all fields of science. Co-financing can only be used to cover the costs of personal exchanges. The sending party finances the journey of his researcher, while the receiving party covers the costs of the stay of a researcher from the partner country. The maximum amount of project financing from NAWA's budget is PLN 25,000. Applications for financing the exchange may include universities, scientific institutes of the Polish Academy of Sciences, research institutes and international institutes or other entities conducting mainly scientific activities, operating on the territory of Poland and having a scientific category. More: <https://nawa.gov.pl/naukowcy/wymiana-bilateralna#wymiana-bilateralna-pomiedzy-polska-a-niemcami-2019>

Eight new faculties to appear at the University of Gdańsk

2019-04-05

Eight new directions will appear in the offer of the University of Gdańsk in the academic year 2019/2020. In total, there will be 80 fields of study at full-time and part-time studies. The University also offers education at a PhD school and the opportunity to improve professional qualifications at post-graduate studies. Applications can be sent since June 17. New fields of study include practical IT, health institution management, audiovisual production, telemedicine and health care projects, insurance - interdisciplinary studies, socio-economic geography with elements of GIS and physical geography with geoinformation, and Criminology and criminal justice - studies in English. More: https://ug.edu.pl/media/aktualnosci/87079/nowe_kierunki_i_rekrutacja_na_uniwersytet_gdanski_-_rok_akademicki_2019202

University of Warsaw assessed in THE University Impact Rankings

2019-04-08

The University of Warsaw was ranked 201-300 in THE University Impact Rankings. The Warsaw University was the only high school from Poland included in this list of 450 universities from 76 countries. The winner of the ranking is the University of Auckland from New Zealand. The ranking is a new initiative of the Times Higher Education journal, which presents the impact of universities on society and the economy. The ranking assesses how universities contribute to the implementation of sustainable development goals set by the United Nations. In 2015, UN member states adopted a document containing seventeen sustainable development goals, which concern elimination of poverty, hunger, reducing inequalities, counteracting climate change or reviving global partnership. The authors of the pilot ranking of the Times Higher Education magazine took into account eleven sustainable development goals. Three of them influenced the ranking position of the University of Warsaw. See ranking: <https://www.timeshighereducation.com/rankings/impact/2019/>

State Higher Vocational School in Nowy Sącz to offer Chinese and Swedish languages

2019-04-08

In the new academic year, the State Higher Vocational School (PWSZ) in Nowy Sącz will introduce Chinese and Swedish language lessons to its offer. -Since 2017 students can study business linguistics at our university. So far, only three universities in Poland have such an innovative study in their offer - explains Monika Madej-Cetnarowska, the director of the Foreign Language Institute in Nowy Sącz. - We came to the conclusion that it would be best to combine learning foreign languages with economic subjects. Students in Nowy Sącz learn English also German or Russian. Business subjects include economics, management, negotiations, entrepreneurship or international economic relations. From the new academic year students will also be able to learn Chinese. As part of linguistics for business, the State Higher Vocational School also intends to introduce the Swedish language.

Agreement on cooperation between the Rzeszów University of Technology and the National Higher School of Technology and Economics in Jarosław

2019-04-08

Rzeszów University of Technology has signed an agreement on cooperation with the State Higher School of Technology and Economics in Jarosław on the common education of students, scientific and development cooperation. The Rzeszów University emphasizes that the agreement will allow both high schools to use the opportunities created by the Constitution for Science. The agreement was signed in the presence of Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. The signed agreement provides for cooperation in developing regular programs of studies at both the Rzeszów University of Technology and the State Higher School of Technology and Economics in Jarosław.

Researcher of the Medical University of Poznan receives Scholarship of the Kosciuszko Foundation

2019-04-08

Professor Med. Marzena Gajęcka, head of the Department of Pharmacy and Pharmaceutical Genetics and Pharmacy of the Poznan University of Medical Sciences, received a scholarship from the Kościuszko Foundation for the academic year 2019/2020 to complete a scientific internship at Baylor College of Medicine and Texas Children's Hospital, Houston in the United States. During his three-month stay in Houston, Prof. Gajęcka will work on the application of integration analyzes in multi-level studies on host-microbiota interaction in multifactorial diseases. The Kosciuszko Foundation promotes Polish-American cooperation through international exchange in education, science and culture. The Foundation grants annual residency and grant grants to Poles for studies, research and/or didactics

at universities or other institutions providing higher education in the United States.

Minister offers scholarships to 19 students of the Silesian University of Technology

2019-04-08

In the academic year 2018/2019, 19 students of the Silesian University of Technology received scholarships from the Minister of Science and Higher Education for outstanding achievements. The most scholarships were received by mathematics students. The laureates of ministerial scholarships are: Karolina Kęsik, Aleksandra Krawiec, Kamil Książek, Oleksandra Osadcha and Alicja Winnicka - students of mathematics; Agata Raczyńska and Maria Bzówka - students of biotechnology; Robert Nawrath - student of electronics and telecommunications; Tomasz Wasiak and Grzegorz Stando - students of chemical technology; Anna Kuziel, Małgorzata Skorupa and Daria Więclawska - students of technology and chemical engineering; Adrian Czajkowski and Mateusz Kochel - students of the power industry; Nikolina Poranek - a student of environmental engineering; Marta Zaborowska - a student of nanotechnology and material processes technology, and Mateusz Jezusek and Krystian Szewczyński - students of transport. The scholarship amounts to 15 thousand PLN.

Prof. John Raven to be awarded a doctor honoris causa title of the Catholic University of Lublin

2019-04-09

On Thursday, 11 April 2019, the Catholic University of Lublin (KUL) is holding a ceremony of awarding Prof. John Raven with the title of doctor honoris causa KUL. Professor John Raven is a British psychologist. His merit and contribution to psychology as a science include the design, validation, standardization and normalization of the global psychological diagnosis of intelligence tests. He also created the concept of new social and psychological powers, such as cognitive, social, learning power and poten-

tiality in education, which can significantly contribute to the development of sustainable communities. Professor John Raven cooperated for many years in science and teaching with the Faculty of Social Sciences of the Catholic University of Lublin.

State Higher Vocational School in Chełm co-organizing Świdnik Air Festival

2019-04-09

Dr Eng. Arkadiusz Tofil, rector of the State Higher Vocational School (PWSZ) in Chełm, signed a letter of intent regarding the organization of Świdnik Air Festival air shows. During the event, the PWSZ will be responsible for the organization of aircraft movements on earth. - We are representing a university that educates pilots of aircrafts and helicopters as well as flight mechanics and we offer students our knowledge, skills and experience in addition to the protection of the ground fleet of aircraft and technical support. We want our guests to take part in a unique air show, but above all we want to provide it safe and efficient - said the Rector of the PWSZ. Świdnik Air Festival is scheduled for June 8-9, 2019. The event will take place at the airport belonging to EPLB Lublin and WSK PZL-Świdnik SA.

HR Excellence Center to be created at the Łazarski University in Warsaw

2019-04-09

The Łazarski University in Warsaw, together with the Compensation & Benefits Club operating at the University, begins the construction of HR Excellence Center, which will be a forum for the exchange of knowledge in the field of HR for small and medium-sized enterprises. The idea of the project is to let all employers create an engaging work environment, have access to the latest knowledge and HR solutions, and make use of the best practices and achievements of science. The project aims to integrate the scientific community with the business of small and medium enterprises, so as to support the development of the sector of small and medium enterprises as effectively as possible.

Lodz University of Technology to launch Nationwide Student Seminar TEXTIL 2019

2019-04-09

The Faculty of Textile Technology and Design of the Lodz University of Technology invites participants on April 9, 2019, to the National Student Seminar TEXTIL 2019 „Young Fashion Design University of Technology”. The event is an opportunity for young people to present their creativity, show projects and to get acquainted with the potential and offer of the Faculty. The competition part of the TEXTIL 2019 seminar includes: fashion shows, model exhibitions and multimedia presentations. TEXTIL 2019 is also an opportunity to participate in 1.5-hour workshop classes, presenting modern textile technologies in the field of clothing, design, knitting, metrology and synthetic fibers as well as multimedia activities.

University of Opole receives over PLN 29 million for investments

2019-04-09

The University of Opole received more than PLN 29 million in funding for investment purposes. Money was delivered to the Opole university in the form of State Treasury bonds handed by undersecretary of state in the Ministry of Entrepreneurship and Technology, Marcin Ociepa. The government subsidy will be earmarked for the construction of a new large teaching facility for IT specialists, along with equipment and a laboratory of new information technologies. - It will be built on our plot at ul. Oleska, where we are also planning to build a sports hall and a canteen - said the rector of the University of Opole, Prof. Marek Masnyk. He added that the project work on the investment will begin next year.

Institutes of the Polish Academy of Sciences establish the Anthropos Doctoral School

2019-04-10

The Institutes of the Polish Academy of Sciences (PAN) established Doctoral School Anthropos in Warsaw. The school consists of nine Institutes of the Polish Academy of Sciences: Institute of Archeology and Ethnology, Institute of Literary Research, Institute of Geography and Spatial Organization, Institute of History, Institute for the History of Science, Institute of Polish Language, Institute of Mediterranean and Oriental Cultures, Institute of Slavic Studies and Institute of Art. The Anthropos Doctoral School will offer a comprehensive education program that combines the preparation for independent and collaborative research, the development of academic skills as well as specialized and interdisciplinary seminars. Announcement about applying to school will appear by the end of May this year. Doctoral schools are a new form of doctoral education, introduced in the Law on Higher Education and Science.

University of Silesia established cooperation with Univerzita Hradec Králové from the Czech Republic

2019-04-10

The University of Silesia established cooperation with the Czech university of Hradec Kralove. The cooperation agreement regulating academic exchange of employees and students was signed in Katowice by the rectors of both universities - Prof. Andrzej Kowalczyk and Prof. Eng. Kamil Kuča. The universities are planning to organize guest lectures, create joint courses and study programs, exchange scientific publications and participate in educational projects and conduct scientific research. Conducting joint activities will also include the organization of seminars, symposia, study visits, consultations and other forms of activity.

University of Lower Silesia in Wrocław examines the importance of robotics in social work

2019-04-10

The University of Lower Silesia in Wrocław together with partners from four European countries are implementing the PRoSPEro project: Pedagogy of Robotics in the Social Professions in Europe. The activities are carried out under the ERASMUS PLUS KA203 program - Strategic Partnership for Higher Education. The project concerns the importance of robotics in contemporary social work. Researchers are investigating how the dissemination of solutions related to artificial intelligence and robotics changes the realities of work in the broadly understood social work. The result of the project will be a proposal for an education program for students of social work and / or social pedagogy taking into account the issues of social robotics. The partners of the project are: the Institute of Technology SLIGO in Ireland, the National University of Ireland Galway and The Alzheimer Society of Ireland; Danish VIA University College and Holsterbro Kommune, the Dutch Twente University and the Spanish Universitat de Valencia.

Projects of the University of Humanities and Natural Sciences in Częstochowa co-financed from the STER program

2019-04-10

Two programs submitted by the University of Humanities and Natural Sciences in Częstochowa (UJD) have received funding under the STER Program "Doctoral scholarships for foreigners" of the National Academic Exchange Agency (NAWA). The first project is «Polish-language and / or German-language literature in the European context: modernity - media - tradition - (inter) culture - emigration - reception» led by Dr Anna Majkiewicz. The second funding was given to the application of Dr Magdalena Bator for her research in linguistics «Polish and / or English in a European context: history - media - discourse - culture». The aim of the STER Program is to internationalize doctoral schools by increasing the attractiveness of the offer addressed to foreign candidates for doctoral schools run by Polish institutions.

University of Białystok to launch Academy of the Third Age

2019-04-11

University of Białystok (UWB) began the project of the Academy of the Third Age for seniors. Money for its implementation, more than PLN 1 800 000 is received by the university from the National Center for Research and Development. 400 seniors will be able to take part in free lectures, workshops, concerts and trips prepared by the Faculty of Pedagogy and Psychology of the University of Białystok. In addition, the program includes photographic and film activities concerning new information technologies, as well as healthy lifestyle or safety. Most of them will be run by academic teachers of various specialties.

Cardinal Stefan Wyszyński University to launch Academic Family Center created

2019-04-11

The Faculty of Family Studies at the Cardinal Stefan Wyszyński University (UKSW) in Warsaw will launch the Academic Family Center. The letter of intent in this matter was signed by the rector of the CSWU, Fr. prof. Stanisław Dziekoński with the Marshal in Warsaw. The agreement concerns the cooperation of the Faculty of Studies on the Family with the Self-Government of the Mazowieckie Voivodship, and especially with the Social Policy Center operating in the structures of the Mazowieckie self-government. The aim of joint action of both institutions will be to professionalize the staff of social assistance in the Mazowieckie voivodship. The task of the Academic Family Center will be to conduct scientific research, didactic activities, as well as advisory and expert activity.

Almost PLN 3 billion in Treasury bonds received by Polish universities

2019-04-11

136 universities received PLN 2.9 billion in Treasury bonds. The money from bonds can be used for investments or for the repayment of investment loans. This is another financial support that was received by the university in connection with the implementation of the Constitution for Science. - Thanks to bonds, universities from all over Poland will be able to meet their additional investment needs related to development. We have broadly defined these needs in the Act. The funds may be intended not only for the implementation of investments, but also for the repayment of liabilities due to investment loans - said Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education.

PhD student of the Silesian University of Technology becomes coordinator of EURODOC

2019-04-11

Katarzyna Turoń, PhD student at the Faculty of Transport and representative of the board of the University Council of the PhD Student at the Silesian University of Technology became one of the coordinators of the European Council of Doctoral Candidates and Junior Researchers (EURODOC). She will be responsible for issues related to scientific articles, scientific editorial and the organization's newsletter. This year's elections were a huge success of the entire Polish delegation issued by the National Representation of Doctoral Students. Five Polish PhD students representing the Silesian University of Technology, the Krakow University of Technology, the Lodz University of Technology, the Rzeszów University of Technology and the University of Lower Silesia were elected to the new board and administration. EURODOC is an international federation of 32 national associations of doctoral students and young scientists from European Union countries and the Council of Europe.

Nationwide Mathematical Student Conference „OMatKo !!!” to be held in Wrocław

2019-04-11

Scientific groups operating at the Faculty of Mathematics of the Wrocław University of Technology invite participants from the 12th to the 14th of April to the 6th National Mathematical Student Conference „OMatKo !!!”. The conference in the Congress Center of the Wrocław University of Technology is intended for students and PhD students of mathematics and related fields from all over Poland. This year, approximately 300 people have announced their participation. The meeting is guided by the idea of «students to students» and it is the participants who will present papers on their interests or the results of their own scientific research. In two independent thematic blocks 37 speakers will talk on theoretical and applied maths. The opening lecture entitled «Archimedes's Law. Is the mathematician also jumping out of the bathtub? », will be given by Prof. Jacek Małecki. In addition, participants will have the opportunity to talk to partner companies, such as: McKinsey, Kruk, Credit Suisse and Aviva.

Researcher of the University of Białystok to examine competition law in the European Union

2019-04-12

Dr Anna Piszcz from University of Białystok (UwB), received funding for her project under the last competition MINIATURE 2 announced by the National Science Center. The research is to concern competition law in the European Union. Dr Anna Piszcz intends to compare legal solutions in the field of collective consumer claims for damages caused by anticompetitive practices. Until now, despite many measures taken by the European Commission, they have not been harmonized and there are various regulations in various EU member states. Thanks to the subsidy from the MINIATURA competition, Dr Anna Piszcz will be able to present and discuss the preliminary results of her research during the conference of the Academic Competition Law Associa-

tion (ASCOLA) gathering competition law researchers from around the world, which will be held in June in Aix en Provence (France).

Polish universities present at educational fair in India

2019-04-12

A delegation of the University of Warmia and Mazury in Olsztyn (UWM) participated in international educational fairs in New Delhi, India. Participation in the fair was one of the tasks of the project «VENI VIDI VICI - integrated foreign promotion of the University of Warmia and Mazury in India» funded by the National Agency for Academic Exchange. Its head is Dr Rakesh Jalali is Rector's Plenipotentiary for English-language studies and the Center Innovation and Technology Transfer UWM in Olsztyn. - The Indian higher education system is not able to provide places for all students and that's why many young Indians are studying abroad. In Poland, Indians are the third group of foreign students in terms of size, - explains Dr Rakesh Jalali. Apart from UWM, the Fair was attended by University of Social and Life Sciences in Lublin, Maria Curie Skłodowska University in Lublin, University of Silesia in Katowice, Krakow University of Technology, University of Life Sciences in Poznan.

Gdańsk universities receive over PLN 1 million for implementations under the Innovation Incubator 2.0 program

2019-04-12

Consortium composed of Gdańsk University of Technology (PG), University of Gdańsk, Medical University of Gdańsk and special purpose company PG Excento obtained PLN 1.1 million within the competition under the Innovation Incubator 2.0 program. The consortium will conduct pre-implementation projects, promote scientific achievements of Pomeranian scientists and strengthen cooperation between the scientific environment and the business environment. Three Pomeranian universities have planned meetings with business representatives in order to

present the technological offer, results of scientific research or research services, and participate in science and business exhibitions and exhibitions. The consortium is one of the 24 applicants for this year's competition and it received the highest ratings of the recommending team. More: https://ug.edu.pl/media/aktualnosci/87382/ponad_milion_na_wdrozenia_w_programie_inkubator_innowacyjnosci_20

VIII Interuniversity Conference Brain Day in Szczecin

2019-04-12

Department of Clinical Psychology and Psychoprophylaxis of the Institute of Psychology at the University of Szczecin, Department of Psychiatry of the Pomeranian Medical University, District Medical Chamber in Szczecin, Polish Neurological Society and Polish Psychiatric Association Branch in Szczecin and the Cogito Association invite participants to the VIII Inter-University Conference Day of the Brain. The Brain Day is a lecture on topics related to the functioning of this organ in an interdisciplinary perspective - from a medical, neurological and psychiatric point of view, and taking into account humanistic aspects. This year's performances will include: Imagination of music, Irrationality of our communication, Does art suffer?, or Who is art therapy for? and Diseases of the brain in the film. The conference is organized under the slogan «BRAIN - ART - CONTROVERSIA» and will take place on Saturday, 13 April, in the hall of the Faculty of Humanities of the University of Szczecin.

University of Natural Sciences and Humanities in Siedlce to hold Conference on local self-government

2019-04-15

The Department of Public Administration and Management of the Faculty of Economic and Legal Sciences of the University of Natural Sciences and Humanities in Siedlce and the Scientific and Political Thought Society are organizing on 16 April 2019 a scientific conference entitled „Territorial self-government in political and legal thought“. The organizers are inviting not only political scientists and lawyers to participate in the conference, but also philosophers, sociologists and other representatives of social sciences and humanities interested in this subject. During the conference they are to discuss following issues: local government as a research problem of political science / legal sciences; territorial / local government - delimitation of concepts in the perspective of political thought; territorial self-government in relation to the basic problems and categories of political philosophy (power, legitimization, sovereignty, political matters).

Scholars from University College London visited the State Higher School in Biała Podlaska

2019-04-15

The State College of Higher Education (PSW) in Biała Podlaska hosted representatives of University College London (UCL). UCL representatives visited Polish universities cooperating as part of the „Masters of Didactics“ program financed by the Ministry of Science and Higher Education. The project aims to develop and implement new solutions in the scope of training tutors and training in the form of tutoring. PSW in Biała Podlaska, joined the project «Masters of Didactics» in 2018. - We are currently at the stage of analyzing various didactic methods in the group of PSW academic teachers who completed internships in London and Ghent. We are providing pilot classes with the use of innovation in education. - said Speaker of the PSW Dr Eng. Agnieszka Smarzewska.

Scientists of the Jagiellonian University receive grants from the National Science Center

2019-04-15

The last ranking list in the call Miniatura 2 included 6 young scientists from the Jagiellonian University in Krakow. Thus, the number of researchers from the Jagiellonian University who received funding for individual scientific activities for the implementation of basic research, i.e. small grants of the National Science Center increased to 44. The scientific activities that can be financed under the Miniatura call include: preliminary research, pilot studies, queries, scientific internships, scientific consultations, research or conference trips. The following scholars will benefit from the support of the National Science Center: Dr Eng. Emilia Bonar (Faculty of Biochemistry, Biophysics and Biotechnology, Jagiellonian University), Dr Maria Dainotti (Faculty of Physics, Astronomy and Applied Computer Science, Jagiellonian University), Dr Dominik Kaim (Faculty of Geography and Geology, Jagiellonian University), Dr Dariusz Piwowarczyk (Faculty of Philology, Jagiellonian University), Dr Anna Rokicińska (Faculty of Chemistry, Jagiellonian University) and Dr Marcin Zawrotniak (Faculty of Biochemistry, Biophysics and Biotechnology, Jagiellonian University). More: <https://www.ncn.gov.pl/konkursy/wyniki/miniatura2>

University of Lodz to launch a new project IT Graduate

2019-04-15

The University of Lodz (UŁ) is starting a new project IT Graduate. It is addressed to those graduates from this university who would like to retrain. -We believe that nothing is impossible and that it is worth learning at every stage of life. That is why we have created a project dedicated to 500 graduates of the University of Lodz. What is extremely important, the project takes into account the needs of disabled people and seniors. Our goal is to improve the competence of graduates in the field of IT - explains Prof. Antoni Różalski, rector of the University of Lodz. All ULA graduates can participate in the courses, regardless of the level of skills or experience, also the people already associated with the IT industry. Weekend

courses allows participants to study without having to give up your current obligations. Each path lasts three trimesters during two-day conventions twice a month.

Collegium Civitas to hold a conference on E-threats to the elections 2019

2019-04-16

The Information Analysis Center and the Center for Research on Terrorism at Collegium Civitas in Warsaw are organizing a conference on April 25, 2019: „E-Threats to elections 2019: Information as a weapon, manipulation, botocracy“. The conference will start with three introductions. Michał Boni, Member of the European Parliament, will try to answer the question: Can European law fight against misinformation? Martyna Bildziukiewicz from EEAS East StratCom Task Force will deal with the issue of disinformation in the European elections, and Dr Krzysztof Liedel, head of the Collegium Civitas Information Analysis Center, will hold the lecture „Information fight as an element of the hybrid conflict“. Next, the organizers are planning two panel discussions on the disinformation threats for democracy that appear in electoral processes.

Rector of the University of Warsaw joins the board of the European University Association

2019-04-16

Professor Marcin Pałys, rector of the University of Warsaw, was elected to the board of the European University Association (EUA), which includes over 800 universities from 48 countries and influences EU policies regarding higher education, research and innovation. Professor Pałys was actively involved in EUA activities, including a member of the RIS3 Expert Group. In the years 2011-2013, he also acted as an expert of the External Advisory Group for flagship initiatives of the European Commission (FET Flagship projects). The EUA board includes the president and 8 members, including two vice presidents. All members are current or former Rectors of the Association's schools. The Council has meetings at least 3 times a year and is responsible for shaping the Association's policy and planning its activities. The members' term of office lasts 4 years.

Jan Kochanowski University in Kielce signs a contract with the Research Network Łukasiewicz

2019-04-16

Jan Kochanowski University (UJK) in Kielce as the first university in Poland has signed a contract for scientific and research cooperation with the Research Network Łukasiewicz. The Łukasiewicz Research Network was established on April 1. It consists of 38 institutes that are to commercialize the research in Poland. In Kielce, the agreement was signed by representatives of the Institute of Biopolymers and Chemical Fibers in Łódź and the Lodz Institute of Leather Industry. - The University is a place where not only science is practiced in the fundamental area, but part of the research must be completed as industrial implementations - said Prof. Jacek Semaniak, rector of the Jan Kochanowski University. Representatives of research institutes that will cooperate with UJK talked about specific projects. They presented as an example- the production of diabetic shoes that will be able to dose insulin.

Prof. Rogatko to hold a lecture at the Maria Curie-Skłodowska University about the first photo of the black hole

2019-04-16

Professor Marek Rogatko from the Department of Astrophysics and Theory of Gravity of the Maria Curie-Skłodowska University (UMCS) in Lublin invites all interested students to an open lecture entitled „Darkness, I see darkness - the first photo of a black hole”. The lecture will take place on April 16 at 17:00 in the Hall of the Institute of Physics UMCS. For the first time in the history of high-energy astrophysics, we managed to take a photo of a black hole located in the center of the M87 galaxy, 55 million light-years distant from us. The black hole itself has a mass of about 6.5 billion solar masses. Photographs and data needed for them were provided by researchers from the Horizon Telescope of Event (EHT), belonging to the European Southern Observatory (ESO). The lecture will present issues related to the scenes and the possible consequences of taking this unique photography, which focused the attention of all global media.

New research center of the Wrocław University of Science and Technology to launch new laboratories

2019-04-16

Twelve specialized laboratories with modern equipment will be located in the newly opened GEO-3EM research center of the Wrocław University of Technology. The value of the investment is PLN 102.6 million. The Center was established in the vicinity of the „Polinka” cableway station and the Geocentrum educational and research complex. The three-story building has over 100 different rooms - laboratories, a conference room and warehouse and administration facilities. This infrastructure will be used by scientists from civil and water, chemical, electronics, geoenvironment, mining, geology and mechanical faculties. The facility is adapted to

the needs of the disabled students. 12 laboratories have been located in the building including Laboratory of Hydrometallurgy Processes, Laboratory of Polymer Plastics Processing, Laboratory of Earth Sciences and Mineral Engineering and Accredited Tape Laboratory and Accredited Laboratory of Work Safety. More: <https://pwr.edu.pl/uczelnia/aktualnosci/centrum-geo-3em-otwarte-nowoczesne-laboratoria-dla-dolnego-slaska-11166.html>

Mayor of Warsaw promises scholarships for PhD students interested in researching the capital city

2019-04-17

The Warsaw School of Economics (SGH) and the capital city of Warsaw have signed an agreement on cooperation in providing sustainable development of the city as well as spatial and economic policy. On the occasion of the event, the president of Warsaw announced a scholarship program for PhD students interested in researching Warsaw. - It is a chance for development for young scientists - said Rafał Trzaskowski. Both the agreement and the scholarships for PhD students will enable effective implementation of the objectives of the Warsaw2030 Strategy, i.e. our city as an open and friendly metropolis with active residents. The agreement will allow to further use the potential of the Warsaw science sector to improve the quality of life in the city, to include researchers in the dialogue on the development of the city - added Mayor Trzaskowski. The agreement also includes the working group that will elaborate recommendations on spatial changes of the area in front of the SGH main building and the inclusion of the campus in the public space of the city.

National Academic Exchange Agency to launch call for the bilateral exchange of scientists with France

2019-04-17

The National Academic Exchange Agency (NAWA) invites participants to submit proposals for a bilateral exchange of scientists with the French Republic. The main objective of the project is to support the mobility of scientists implementing research projects conducted jointly by partners from Poland and France. Research projects can cover all fields of science. This financing can only be used to cover the costs of personal exchanges. The sending party finances the journey of his researcher, while the receiving party covers the costs of the stay of a researcher from the partner country. The maximum amount of project financing from NAWA's budget is PLN 25,000. Applications for funding may be submitted by universities, scientific institutes of the Polish Academy of Sciences, research institutes, international institutes or other entities conducting mainly scientific activities, operating in Poland and having a scientific category. More: <https://nawa.gov.pl/naukowcy/wymiana-bilateralna>

Lodz City Hall and University of Technology to cooperate in reducing noise in the city

2019-04-17

The Lodz University of Technology (PŁ) and the City of Lodz Office (UMŁ) have signed a letter of intent regarding cooperation aimed at recognizing and reducing noise in Łódź. The idea of initiating joint activities is the result of the arrangements and cooperation of employees of the Department of Environmental Protection and Agriculture and the Faculty of Management and Production Engineering of the Lodz University of Technology, which operates a laboratory - LabNOISE, accredited at the Polish Center for Accreditation. The laboratory deals with research, identification and analysis as well as noise reduction methods of environmental, industrial, communication or installation origin.

Pomeranian Medical University in Szczecin launches the Center for Medical Simulation

2019-04-17

A Medical Simulation Center was opened at the Pomeranian Medical University in Szczecin. It is one of the most modern facilities for training students of medical faculties. Classes in the Center have already started. - We have the latest teaching and medical center in Poland. We have overtaken other such universities in terms of equipment and quality. It will be used by students of all our faculties. Each student, before starting their practice, will undergo classes in this center on clinical and preclinical subjects - says the rector of the Pomeranian Medical University, Prof. Bogusław Machaliński. The facility consists of 35 classrooms including an operating theater, an intensive care unit, a hospital emergency department, an ambulance simulator, a delivery room and a nursing room. There are also rooms of technical, clinical and surgical skills, ultrasound and endoscopy labs, an ambulance and 12 programmable phantoms.

Scientists of the University of Silesia and miners to cooperate for the environment

2019-04-17

University of Silesia, a special-purpose company of the university SPIN-US and Jastrzębska Spółka Węglowa signed a letter of intent to cooperate in the implementation of projects aimed at responsible restoration of the natural values of habitats in areas transformed as a result of mining and industrial activities. The declaration assumes research and development works consisting in the identification of the status and potential of the environment based on the latest knowledge about the functioning of the environment. Undertaken actions are not only aimed at improving the condition of the natural environment, but also at improving the quality of human life through the increase of environmental values of areas transformed as a result of human activity. The latest scientific achievements will be used

to solve environmental problems. Initiatives will be implemented with the participation of scientific and expert staff, which will allow to develop modern solutions and to implement innovations and environmentally friendly technologies. More: <https://www.us.edu.pl/universytet-slaski-i-jastrzebska-spolka-weglowa-deklaruja-wspolne-dzialania-na-rzecz-sowiska-atatu>

Maria Curie-Skłodowska University in Lublin to hold International Earth Day

2019-04-18

The Faculty of Geosciences and Spatial Management together with the Artistic Department of the Maria Curie-Skłodowska University (UMCS) in Lublin for the twelfth time are organizing the International Earth Day connected to the National Geographic Day. The World Earth Day, taking place on April 26, 2019, is a worldwide campaign to promote ecological attitudes by events organized in spring in many places. The organizers prepared dozens of attractions for the viewers. Thanks to the lecture «Whose trace is this?», the participants will learn what traces are left by both animals and plants. The topics also include lakes and their greatest secrets, natural medicines and cosmetics as well as ordinary / unusual H2O. More: www.dzienziemi.umcs.pl

Adam Mickiewicz University in Poznań to launch Bilingualism Center Matters @ Poznan

2019-04-18

Adam Mickiewicz University in Poznań has launched the Bilingualism Center Matters @ Poznań. It is one of the 23 international branches of the Bilingualism Matters Center located at the University of Edinburgh in Great Britain. Bilingualism Matters @ Poznań is a research and information center operating at the faculty of Poznan University of English, dealing in multilingualism and language learning. The newly opened BM @ Poznan will offer a space for discussion between teachers, educators, parents and scientists studying bilingualism. The Center's offer includes training and workshops in the field of bilingualism and language learning, support for projects related to the introduction of language teaching, raising the awareness of teachers, parents and children in matters related to bilingualism, answering questions about raising bilingual children, providing access to information and resources.

Projects of the University of Gdańsk ranked high in the list of the Miniatura 2 call

2019-04-18

Scholars of the University of Gdańsk are winners of the Miniatura 2 call organized by the National Science Center. They can get grants for preliminary and pilot studies, queries, internships, scientific consultations and conference trips. Dr Małgorzata Kapusta will carry out the project: «An attempt to identify motor proteins involved in the transport of the male reproductive unit in the May lily», Dr Przemysław Karpowicz's grant allow to run the project: «Development of a model for affinity testing of platelet-derived growth factor PDGF-BB with its receptors», and Dr Agata Błaszczuk received financing for her project «Research on the mechanism of antifungal activity of compounds produced by Baltic cyanobacteria - search for inhibitors of aspartyl proteases Sap». This is the last ranking list of the competition. 17 research pro-

jects were funded for a total amount of almost 560,000 PLN and they will be implemented at the Gdańsk University.

University of Opole launches online registration of candidates

2019-04-18

From April 18, the students can log into the online registration system for candidates of the University of Opole. The university offers 72 majors including 10 new ones in the new academic year. It offers very popular psychology, medicine, law and IT. There are also 10 new directions: Angewandte Germanistik, biomonitoring, design and social communication, editing, Czech language in the service sector, foreign languages in the public service, foreign languages in tourism, applied linguistics, speech therapy with Polish as a foreign language, nutriobiochemistry, tourism and leisure. - Every year we try to offer new areas of education to candidates so that every secondary school graduate can be satisfied with our offer- says Dr Jerzy Wiechuła, Rector's Plenipotentiary for Recruitment. In total, almost 3300 places have been prepared for future students.

University of Silesia to develop a new strategy for cooperation with foreign graduates

2019-04-18

University of Silesia in Katowice (University of Silesia) received almost 100,000 PLN for the implementation of the project „UAA Alumni - building relations with foreign graduates of the University of Silesia” as part of the International Alumni program implemented by the National Academic Exchange Agency. The main goal of the project is to develop a cooperation strategy with foreigners who graduated from the Silesian University. Initially, the team for cooperation with foreign graduates will be established from the employees of various administrative units of the University. The activities will be implemented from May 2019 to October 2020 and they will include creation, implementation and pro-

motion of a mobile application - a tool supporting establishing contacts with foreign university graduates and organizing meetings with graduates during the summer school of language, literature and Polish culture in Cieszyn in August 2020.

University of Warsaw to launch new faculties

2019-04-19

From the academic year 2019/2020, the University of Warsaw (UW) will launch 12 new and 8 remodelled programs. The offer of 20 new or changed programs at the University of Warsaw was prepared as a result of the analysis of reports on future professions and interviews with representatives of the university's socio-economic environment. The proposed new curricula better meet the requirements of the current and anticipated labor market - emphasized Prof. Anna Giza-Poleszczuk, vice-rector of UW for development on the campus radio student campus. New proposals of the University of Warsaw include: Big Data Management (Journalism, Information and Bibliology Department), Digital Sociology (Faculty of Philosophy and Sociology), Search Geology (Faculty of Geology), Intercultural Communication - Asia and Africa (Faculty of Oriental Studies), Philology of Polish Sign Language (Faculty of Polish Studies).

First Silesian Scientific Stand Up

2019-04-19

On 24th April Center for Popularization of Science of the Silesian University of Technology (CPN) invites participants to the Student Club Spirala on the First Silesian Stand Up. Eight scientists from the Silesian University of Technology, the University of Silesia and the Institute of Oncology in Gliwice will perform scientific stand ups. - Such events are organized in the world, in Poland the scientific stand up is just beginning to function in the awareness of popularisers. It requires not only a sense of humor, but also a great courage and distance to yourself. Can Silesian scientists do it? Let's check it out! - says Prof. Aleksandra Ziemińska-Buczyńska, director of CPN. The First Silesian Stand up in Science invited Dariusz Aksamit from the Faculty of Physics at Warsaw University of Technology, the winner of this year's Promotor of the Year award in the Animator category. The event will be hosted by Antoni Syrek-Dąbrowski - comedian, improviser and screenwriter from Stand Up Polska. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci &Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2671>

Project of the University of Silesia receives the highest mark of the ranking list of the TANGO3 call

2019-04-19

The scientific project, headed by Andrzej Dzienia, a PhD student of the Faculty of Mathematics, Physics and Chemistry at the University of Silesia has been ranked on the highest position in the list of applications for research funding under the TANGO 3 call. The co-financing will allow him to develop a unique pressure free-radical method of polymerization of N-vinyl pyrrolidione to obtain polymers with controlled properties. These compounds will find use in the pharmaceutical industry. The developed method will reduce the use of catalysts and organic solvents and will maintain high process efficiency and control over the properties of the obtained macromolecules. This makes the whole pressure po-

lymerization process much more effective and more ecological compared to the methods currently used in this industry.

Researcher of the University of Economics in Poznan receives Scholarship of the Kosciuszko Foundation

2019-04-19

Doctor Piotr Tarka, Prof. Associate of the University of Economics in Poznań from the Department of Market and Services Research received the Kosciuszko Foundation scholarship for research and study for a 4-month stay in the USA. The scholarship will allow the researcher of the Poznań University to carry out research into the impact of personal values on the compulsive purchasing behavior of young US consumers. The research will be carried out in cooperation with American University of Pennsylvania and the University of Richmond. The results will be compared with the results of tests on the Polish research sample. The Kosciuszko Foundation is an American-Polish cultural and educational institution founded in 1925. The aim of the Foundation is to conduct, support and promote intellectual, cultural and educational exchange between Poland and the United States of North America.

University of Poznan to hold a scientific conference: Universities in search of excellence

2019-04-19

The Adam Mickiewicz University in Poznan (AMU) invites participants to the international scientific conference „Universities in search of excellence” on May 6. The conference will be attended by eminent scientists and honorary doctors participating in the conference organized on the occasion of the 100th anniversary of the University. During the conference, outstanding personalities of science will talk about their path to excellence, including honorary doctors of Poznań universities, professors: Béla Bollobás, Cheong Byung-Kwon, Andrzej Dubas, Krzysztof Matyjaszewski, Peter Nijkamp, Maria Sie-

mionowa and Hans Wolfgang Spiess. The program also includes awarding the UAM Foundation's Prize «Excellence in Science - Usability in Practice.» The competition was dedicated to all those who during the Jubilee Decade UAM 2009-2019, pursuing their research and scientific activities, actively and socio-economic benefit combined science with business.

International Visibility Project to improve the position of Polish universities in global rankings

2019-04-23

This project will help Polish universities to use their potential more fully and this will improve their position in world rankings - said Jarosław Gowin, deputy prime minister, minister of science and higher education at the meeting inaugurating the International Visibility Project (IntVP). The International Visibility Project is implemented by the Perspektywy Educational Foundation as part of the program of the Minister of Science and Higher Education under the name DIALOG. It is to contribute to the professional development of university staff with knowledge and competence not only in the field of academic rankings, but also in creating an international reputation of the university. The aim of the project is to increase the visibility of Polish universities on the international arena and to raise the position of Polish universities in international rankings.

University of Rzeszów to accept applications online

2019-04-23

From May 13, 2019, the University of Rzeszów (UR) starts electronic registration for studies in the academic year 2019/2020. - We are waiting calmly for secondary school graduates. I am appeasing all those pupils, who are interested in studies at the University of Rzeszów. If, for whatever reasons, the planned term of the final examinations will change we will modify the applications schedule so that all interested pupils have the opportunity to complete formalities related to admission to university - says Dr Maciej Ulita, UR spokesman. - For now, they can focus on learning. The University of Rzeszów prepared 6131 places for full-time studies and 3190 for part-time studies. All detailed information is available at: rekrutacja.ur.edu.pl

Biobank of the Medical University of Wrocław receives the certificate ISO 9001: 2015

2019-04-23

Biobank of the Medical University of Wrocław, as the first in Poland, obtained the ISO 9001: 2015 certificate in the scope of „biobanking of biological material for scientific, research and development as well as didactic purposes”. The certificate was awarded by the oldest and the most experienced BSI standardization organization in the world with the validity period until April 2, 2022. Biobank operates in the Laboratory for Biological Activity Screening and Biological Material Collection. The implementation of the guidelines enables management of Biobank processes according to the highest standards, guaranteeing the high quality biological material and data related to it. This translates directly into the possibilities of obtaining new scientific and research projects and cooperation in creating innovative research and development solutions.

Project of the Nicolaus Copernicus University in Toruń awarded in the competition „2019 Innovations That Inspire”

2019-04-23

The project „IMPULS 50+. Strategies for vocational activation of older people for Public Employment Services” conducted by the Faculty of Economic Sciences and Management at the Nicolaus Copernicus University in Toruń, won the award in the „2019 Innovations That Inspire” competition. The project aims to improve the effectiveness of public employment services in increasing the employability of the unemployed 50+ by adapting to Polish conditions and developing local cooperation and developing new, effective measures to support the labor market. The «Innovations That Inspire» competition is organized by AACSB International - the world's largest network of business education schools. In the fourth competition, 85 business school projects- examples of future-oriented solutions for education, research, community involvement or information and leadership activities were presented. Wrocław University of Technology develops a system for analyzing ashes from domestic furnaces

2019-04-23

Wrocław University of Science and Technology summarized the „Feniks” project, in which university scientists together with the City Guard examined what fuel is used by the inhabitants of Wrocław in their furnaces. The result is the development of sampling procedures and analysis system of ash from home furnaces. One of the main tasks of the project was to develop a control system - from the moment of sampling, to the final report. The University of Science and Technology researchers have prepared an appropriate diagram and a sample collection set consisting of a dozen elements, currently used by guards. However, before scientists

could start research, it was necessary to develop a database, which included information on how individual fuels (coal, coke, wood, etc.) and the most common waste (panels, textiles, plastics or newspapers) are burned. In total, researchers developed 21 markers, providing the guards with the set of samples. Cardinal Stefan Wyszyński University in Warsaw begins cooperation with the University of Bethlehem

2019-04-24

Rector of Cardinal Stefan Wyszyński University (UKSW) in Warsaw, Prof. Stanisław Dziekoński and Prof. Michael Sansur, rector of the University of Bethlehem, signed a letter of intent on cooperation between universities. The University of Bethlehem is a Catholic university, which was created as a result of the pilgrimage of Pope Paul VI to the Holy Land in 1964. The university was founded in 1973, based on the school run by the school friars from 1909. At present, approximately 3,500 students study at the University. The university is open to all religions. 76% of the academic community are Muslims, and 24% are Christians (various rites). The vast majority of students (77%) are women. The Chancellor of the University is Archbishop Leopoldo Girelli, the Apostolic Nuncio in Israel.

Professor Wiktoria Śliwowska becomes Doctor Honoris Causa of the Jan Kochanowski University in Kielce

2019-04-24

On April 25, 2019, the Senate of the Jan Kochanowski University (UJK) in Kielce will award Professor Wiktoria Śliwowska with the title of Doctor Honoris Causa UJK. Wiktoria Śliwowska in the years 1949-1953 studied at the State Pedagogical Institute in Leningrad. In 1953, she started working at the Institute of History at the Polish Academy of Sciences in Warsaw, where in 1960 she wrote her PhD thesis entitled «Pietraszow's case», and in 1971 she received a postdoctoral degree. In 1994, Wiktoria Śliwowska received the title of professor of humanities. Professor Śliwowska has published several hundred publications, including books translated into Russian, German, English and Spanish. Her main current interests include the history of Russia in the nineteenth century, the «Polish Siberia», both in terms of the extermination of participants of the independence movements in the nineteenth century, and the times of the Stalinist gulags.

XXIV Competition for the Siemens Award

2019-04-24

Until 30 April 2019, scholars can submit their work in the XXIV Competition for the Siemens Award. The competition is organized on the basis of an agreement between Warsaw University of Technology (PW) and Siemens Company. Its aim is to promote outstanding achievements in technology and scientific research conducted by employees of academic and non-academic institutions in Poland. The competition should report works related to the scope of Siemens AG's activity, and above all to the following areas of science and engineering: electrical engineering and energy, in particular in the generation, transmission and use of electricity; electronics and information technology as well as automation and robotics; rail transport, traffic management and control. More: <https://www.biuletyn.pw.edu.pl/content/download/14943/87040/file/Regulamin%20Konkursu%20o%20Nagrod%C4%99%20Siemensa.pdf>

Nicolaus Copernicus University in Toruń to receive PLN 25 million for veterinary medicine

2019-04-24

The Ministry of Science and Higher Education awarded the University of Nicolaus Copernicus in Toruń with 25 million PLN to fund the clinical and teaching facilities of the Veterinary Center. A building with an area of 5,000 sq m will be erected at the Bydgoszcz Road, on the plot transferred to the University by the Municipality of Toruń. The basement will include an experimental part, on the ground floor there will be a clinical part for large animals with a small animal clinic on the first floor, and diagnostic laboratories on the second floor. The building will also include classrooms. The Center's director, Prof. Jędrzej Jaśkowski emphasizes that it will be one of the best-equipped clinical facilities of veterinary medicine in Poland. - There will be a positron emission tomography for animals, magnetic resonance, X-ray, several ultrasound scanners and

a lot of other equipment at the highest world level - says Prof. Jaśkowski.

20th competition for the Fiat Chrysler Automobiles Award

2019-04-24

PhD dissertation and 5 Master's theses of the students of the Silesian University of Technology were awarded in the 20th Competition for the Fiat Chrysler Automobiles Awards. The gala ceremony took place in the Senate Hall of the Academy of Technology and Humanities in Bielsko-Biała. The jury rewarded Przemysław Snopiński's dissertation and master's theses of Jakub Hyla, Pola Gwiaździska, Danuta Zajac, Kamil Miesiączka and Krystian Molasa. The awards were also received by 6 students from the Academy of Technology and Humanities. The first competition took place in 1997 as one of the activities of the framework agreement on scientific and technical cooperation and training between the Fiat Research Center - Fiat Polska and the Warsaw University of Technology as well as the Silesian University of Technology. In the second competition, in 1998, it was joined by the University of Technology and Humanities in Bielsko-Biała - at that time as a branch of the Lodz University of Technology. In the 20 competitions, a total of 358 works from all three universities were awarded.

University of Lodz to hold the scientific conference „On the centenary of policy and sport relationships”

2019-04-25

The Team for Political Research on Sports in the Department of Political and Political Theory of the Faculty of International and Political Studies of the University of Lodz are organizing on May 6, 2019 an interdisciplinary scientific conference „On the centenary of policy and sport relationships”. What were the determinants of the links between sport and politics? Can the phenomenon of sport politicization be placed within a given geographic and temporal framework? How did politics affect sports in the past and how is it happening today? The participants will discuss those issues at the conference, which will take place at the Municipal Stadium in Łódź. Due to the interdisciplinary character of the conference, the organizers are inviting not only political scientists, but also representatives of other disciplines and specialties in the humanities and social sciences, as well as specialists in physical culture and sports journalists.

University of Silesia becomes a partner of the boDEREC-CE project

2019-04-25

Detection and analysis of residues of pharmaceuticals in drinking water is the main goal of the BEC-EREC-CE project, which was implemented by scientists from the University of Silesia. The university will provide knowledge and experience by providing tools for industry and administrations in the field of sustainable water management and land use. The project aims to develop an integrated decision support system for water supply companies and to improve the quality of drinking water. The task will be implemented on the basis of identification and detailed analysis of processes determining the transformation of pharmaceutical residues or their natural degradation, as well as the evaluation of the effectiveness of their elimination through various methods of water treatment. The project involves

12 partners from Croatia, the Czech Republic, Slovenia, Poland, Germany, Italy and Austria, as well as 7 supporting partners. The project is financed from the Interreg Central Europe program.

Pomeranian University in Slupsk to launch modern educational and cultural center

2019-04-25

The Pomeranian Academy in Słupsk received funding for the reconstruction of the historic building after the former military canteen. After renovation, the building will be used by students as a lecture hall, and by the whole city - for concerts and other events. Abandoned and unused for almost twenty years, the building after reconstruction will be a modern didactic and representative base with a multifunctional conference room. It will serve not only universities, but also residents of the entire city and region. Works will begin this year and will last two years. The facility will be adapted to the needs of people with disabilities. The building is part of historic barracks, the reconstruction will be carried out preserving its historical shape. The total investment cost is over PLN 12 million, the Ministry of Science and Higher Education has donated PLN 10 million for this purpose. The university's own contribution amounted to over PLN 2.5 million.

University of Warsaw to launch four doctoral schools

2019-04-26

Rector of the University of Warsaw Prof. Marcin Pałyś issued an ordinance to create four doctoral schools: Doctoral School of Humanities, the Doctoral School of Social Sciences, the Doctoral School of Science and Natural Sciences, and the Doctoral Interdepartment School at the University of Warsaw. At the same time, the rector appointed the new schools directors. The creation of schools and the appointment of their directors resulted from the resolution adopted by the Senate of the University of Warsaw on April 17, 2019 regarding the «Framework principles for the organization of doctoral schools at the

University of Warsaw». The document describes the tasks and manner of appointing the school head and board. The rules of cooperation between the school and the councils of scientific disciplines, the council of scientific disciplines as well as the authorities of the units under which PhD students will conduct their research have been also regulated.

University of Gdańsk implementing the project „Bioeconomy for ‚blue growth’ in the Baltic Sea Region”

2019-04-26

The University of Gdańsk, together with universities and institutions from the countries of the Baltic Sea region, implement the project „Bioeconomy for ‚blue growth’ in the Baltic Sea Region.” The project, implemented by the Finnish Institute for Environmental Protection, the Latvian Institute for Water Ecology, the University of Tartu, the Kaliningrad State Technical University, Klaipėda Science and Technology Park and the University of Gdańsk will use the results of INTERREG territorial cooperation projects already implemented or completed and other projects financed from other sources concerning promotion of the «blue’ bioeconomy. This will allow decision-makers to take full advantage of the opportunities associated with solutions for developing the «blue» bioeconomy around the Baltic Sea, as well as the „blue” innovations. It will also contribute to creating a platform for the exchange of results between partners and other stakeholders of the „blue” bioeconomy and to integrate knowledge and expertise in the region.

Silesian University of Technology to accept applications for the Stock Exchange School

2019-04-26

The Faculty of Organization and Management of the Silesian University of Technology together with the Warsaw Stock Exchange Foundation invite students interested in investing to the Stock Exchange Schools courses. The courses are addressed to beginners and intermediate students. Stock Exchange School is intended for people who are making their first steps on the capital market. It presents the market in a comprehensible, reliable and practical way. It shows that the stock exchange is also a great place to start long-term savings. The lecturers at the Stock Exchange School are practitioners and capital market specialists as well as academic employees. The courses will be organized on two levels: Fundamentals of investing on the stock exchange - May 11-12 and September 7-8, and the Stock Exchange for Intermediate - June 22-23 and September 28-29, 2019.

University of Silesia joins new Innovation Incubator program

2019-04-26

The University of Silesia in Katowice has received funding for the implementation of its project within the program of the Ministry of Science and Higher Education Innovation Incubator 2.0. The program is to contribute to the promotion of scientific achievements, development of innovation, as well as to strengthen cooperation between science and the economy. The consortium composed of University of Silesia, SPIN-US SPE and Jan Kochanowski University in Kielce will conduct activities to initiate and intensify cooperation of the scientific community with the business environment by seeking entities interested in implementing research and development results, promotion of technology and participation in science and business exhibitions and fairs. Activities will also concern the implementation of pre-implementation work - adapting inventions to the needs of interested buyers. The program also

provides for the management of the technology portfolio and the establishment of innovation brokers.

Professor Marian Gorynia becomes doctor honoris causa of the University of Bialystok

2019-04-29

Professor Marian Gorynia, an eminent Polish economist, received the title of doctor honoris causa of the University of Bialystok (UwB). Professor Marian Gorynia graduated in economics from the Poznań University of Economics, where he also defended his PhD in 1985. In 1995 he obtained a postdoctoral degree, and in 2000 - a scientific title of professor of economic sciences. From 2003, he is a full professor at the University of Economics in Poznań. He is a member of editorial committees and program councils of many scientific journals, e.g., Journal of Transnational Management», «International Journal of Institutional Governance», «Economist», «National Economy» and «Economic Studies». He is a member of the Economic Sciences Committee of the Polish Academy of Sciences and the Central Commission for Degrees and Titles. Professor Gorynia is also the chairman of the Scientific Council of the Polish Economic Society.

Medical University of Lodz creates Center for Molecular Studies of Civilization Diseases

2019-04-29

The Medical University of Lodz has signed a contract for the Center for Molecular Studies of Civilization Diseases, as part of the MOLEcoLAB project, which involves the construction of top-class scientific and research laboratories for chemical and biological research and analysis. - MOLEcoLAB is a unique project not only because of the research that will be carried out there. In addition, the investment is consistent with the university's sustainable development policy - EcoUMED. We invest in «green» infrastructure and energy-saving solutions - says Dr Jacek Grabowski, Chancellor of the Medical Univer-

sity of Lodz. Laboratories of the Center for Molecular Studies of Civilization Diseases will enable to conduct research and development works, design innovative products and diagnostic and therapeutic services, as well as to implement cooperation with the industry in Poland and worldwide.

University of Rzeszów to launch the Multi-profile Center for Medical Simulation

2019-04-29

The University of Rzeszów (UR) has signed a contract to co-finance the purchase of several medical simulators for the medical needs of the Faculty of Medicine. Dr Józef Cebulski, Vice-Rector for Infrastructure and Cooperation with Economy, signed in the Ministry of Health the project «Multi-profile Medical Simulation Center for medical education with the use of the Medical Simulation Center. Development program of the Medical Faculty of the University of Rzeszów» implemented under the Operational Program Knowledge Education Development 2014-2020. The aim of the project is to improve the quality of practical education by implementing a development program and creating a multi-profile medical simulation center for the Medical Faculty of the University of Rzeszów. Co-financing PLN 13.5 million covers the whole project costs. PLN 10 million will be allocated for the purchase of equipment. The training of the staff will be covered by the remaining part of the amount.

State Higher Vocational School in Nysa to cooperate with the Opole Center for Economic Development

2019-04-29

The State Higher Vocational School in Nysa (PWSZ) and Opole Center for Economic Development signed an agreement on supporting entrepreneurship, innovation and cooperation in defining strategic research programs. The signatories of the agreement will cooperate in defining strategic development programs recognized as priorities for the development of the Opolskie Voivodeship and supporting and coordinating activities aimed at facilitating the transfer of research results and development works to the economy. The agreement also assumes the use of expert potential and joint support of entrepreneurship and innovation by strengthening regional business environment institutions, scientific-research units and supporting entrepreneurs in developing the ability to create and use solutions based on research results.

University of Zielona Góra receives PLN 10 million for the Multi-profile Medical Simulation Center

2019-04-29

The University of Zielona Góra received over PLN 10 million to create a Multi-profile Center for Medical Simulation. Ministry of Health has allocated money from the Knowledge Education Development Program to purchase equipment, hold training and courses for teaching staff conducting classes by simulation. The multi-profile Medical Simulation Center will be built in the premises at ul. Energetyków, where three floors (ground floor, 1st and 2nd floor) will include modern training rooms for medical students. Future doctors will practice in fully equipped, operating, intensive care and childbirth rooms. There will also be a hospital emergency unit and a S-type ambulance simulator (an ambulance used for more difficult cases with a lifeguard on board and at least one doctor). Rooms for medical procedures will be fully equipped with simulators, audio-video systems,

phantoms, equipment and furniture.

Gdańsk University of Technology participates in the International Visibility Project initiative

2019-04-29

Gdańsk University of Technology joined the initiative of the International Visibility Project. Its main goal is to help Polish universities develop their potential in terms of improving visibility and position in international academic rankings. The Perspektywy Educational Foundation is planning audits of universities participating in the project, participation in international ranking conferences and organization of seminars on methodology of creating rankings, tools and experiences in building international perception. The project is implemented under the program of the Ministry of Science and Higher Education «Dialog». The participants, including companies Elsevier and Clarivate Analytics will provide universities with specialist studies on academic rankings and their methodology as well as recommendations for the reporting of data for ranking organizations.

Steelworker's Day to be held the Academy of Mining and Metallurgy in Kraków

2019-04-30

On May 8-10, 2019, the AGH University of Science and Technology in Krakow will hold this year's celebration of the Steelworker's Day. As part of the ceremony, an international scientific conference «Innovations in Metallurgy and Materials Engineering» and the 56th Conference of Students' Scientific Circles of the AGH UST Metallurgy Division will be held. The event will start on Wednesday, May 8 with a holy mass for the scholars and students of the Faculty of Metal Engineering and Computer Science AGH, and it will close with the celebration on Friday, May 10 will be a solemn meeting of the AGH UST Senate, followed by a metallurgical oath ceremony.

University of Opole to receive almost PLN 14 million for the Multi-profile Medical Simulation Center of the Opole University

2019-04-30

The University of Opole received almost PLN 14 million for the Multi-profile Medical Simulation Center. The money comes from EU funds under the Knowledge Education Development Program. More than half of the amount will be spent on the purchase of the Center's equipment, and the rest will be devoted to the training of teaching staff and students, employment of medical simulation technicians and preparation of scenarios of simulation techniques. In the near future, the center will provide a workshop of technical, surgical and nursing skills, an intensive therapy room, a clinical and nursing skills room, a delivery room, an operating theater, a hospital emergency department and an ambulance simulator. It will be used primarily by students of the medical faculty as well as teachers and technical staff of the Opole university.

Network of air assessment sensors operating for three months at the Wrocław University of Science and Technology

2019-04-30

The only university network of sensors for air quality assessment in Poland has been operating for over three months on the Wrocław University of Science and Technology campus. The information provided by the network has already been read by several thousand employees, students and residents of Wrocław. The system consists of twenty devices, located on the university campuses, in Geocentrum at ul. Na Grobli and in the dormitories. The equipment used in the project consists of innovative measuring devices using a method in which the measurement consists in detecting light reflected from dust particles in the air. On the basis of the number of counts and the intensity of the scattered light, the instantaneous dust concentration is calculated. The aim of the project is to measure concentrations and analyze pollutants responsible for the so-called smog. During the tests, the influence of buildings, meteorological conditions and urban plants focused on a small, closed area on the spread of pollutants is also checked. More: <https://pwr.edu.pl/uczelnia/aktualnosci/modelowe-badania-jakosci-powietrza-na-kampusie-11174.html>

Third University Mission of the State Higher Vocational School in Legnica

2019-04-30

State Higher Vocational School in Legnica is implementing the project „Third University Mission - an opportunity for the development of passion, interests and education of people at risk of social exclusion.” The University has received almost PLN 350,000 from the European Social Fund for this purpose. The aim of the project is to develop competences allowing social and professional activation, expanding knowledge and developing interests, stimulating educational and cultural activity and preventing social exclusion of people aged 50+,

people aged 10-25 with special educational needs and youth carers. Activities will be implemented in modules: for young people - social integration training and field classes and workshops on bibliotherapy, choreotherapy, music therapy, fine arts, theater therapy; for seniors - workshops on online security, choreotherapy, music therapy, plastic arts and theater therapy, and classes for geriatric nurses.

State Higher Vocational School in Chełm to receive almost PLN 15 million

2019-05-02

The State Higher Vocational School (PWSZ) in Chełm will receive almost PLN 15 million for the implementation of two projects that aim to improve the practical competences of students of the Chełm higher school. The projects are co-financed from the European Social Fund. The first project «PWSZ Development Program in Chełm for regional development» received PLN 7.7 million and will be implemented from June 2019 to December 2022. The second project «Comprehensive university development program II» received PLN 7.1 million. The first project consists of three modules. The first two include education in the field of Mechanics and mechanical engineering, specialization Helicopter piloting, workshops with airline representatives and study visits at the Emergency Medical Service. The third module is based on activities improving the didactic competences of the university's staff. The main objective of the second project is to acquire additional qualifications and competences by students, teaching and management skills and IT support for management tools by university staff.

Professor Andrzej Stanisławek becomes a vice-minister of science and higher education

2019-05-02

Professor Andrzej Stanisławek from April 30, 2019 is the new secretary of state in the Ministry of Science and Higher Education. The deputy prime minister and minister of science and higher education, Jarosław Gowin, informed on Professor

Stanisławek's nomination on Twitter. «I am pleased to announce that on 30 April, Professor Andrzej Stanisławek was appointed secretary of state. He will be responsible above all for the relations of science and the economy- wrote Gowin. Professor Stanisławek has been an academic teacher at the Medical University in Lublin since 1989. Since 2012, he has been the deputy dean of the Faculty of Nursing and Health Sciences at this Lublin university.

Wrocław University of Environmental and Life Sciences to hold ecology workshops

2019-05-02

Wrocław University of Environmental and Life Sciences organizes specialized workshops as part of the project „People for Nature - Nature for People. Coexistence instead of competition in the Lower Silesian Natura 2000 areas.” The workshops will be conducted by experienced scientists, specialists and trainers. The aim of the project is to popularize and shape pro-ecological attitudes, raise public awareness of the need to protect the most valuable areas of biodiversity conservation, present the heritage and natural diversity of Poland on the example of the Lower Silesian Voivodship, as well as education in the areas of protected areas. The themes of the May workshops in Krośnice, Kowary and Bukowiec are estimating the value of the environment using the concept of valuation of ecosystem services in the Natura 2000 areas and assessment of environmental impact within the Natura 2000 areas. More: <http://czlowiek-natura.upwr.edu.pl/>

State Higher Vocational School in Leszno to popularize dual education

2019-05-02

State Higher Vocational School in Leszno will cooperate with the local Center for Craft Support, Dual and Professional Education. The partnership agreement was signed by the rector of the university, Prof. Maciej Pietrzak and the director of the Center - Bolesław Ratajczak. The cooperation of both institutions was initiated a year ago by a joint organization of the conference «Dual and vocational training - a good profession as a way to success». Further activities will aim at promoting the popularization of vocational and dual education among children and youth of the Leszno subregion. The agreement include mutual support for projects of both partners.

Krakow University of Technology signs an agreement with the company POLREGIO

2019-05-06

The Institute of Rail Vehicles of the Faculty of Mechanical Engineering of the Krakow University of Technology concluded with the Małopolska Branch of the company „Przewozy Regionalne” - POLREGIO agreement on cooperation in the field of didactics and research. Thanks to the signed agreement, students of the innovative dual specialty of rail vehicle engineering can learn more about the construction and operation of trains with the possibility of participating in train driver's work. The specialty Rail Vehicle Engineering was launched in 2017 and is carried out in the dual system of the courses Transport and Engineering of transport. It is a response to the dynamically developing rail vehicle construction sector and the resulting demand for qualified engineering staff in this industry.

Maria Curie-Skłodowska University in Lublin to hold meetings with business practitioners

2019-05-06

The Scientific Club of the Austrian School of Economics of the Maria Curie-Skłodowska University (UMCS) in Lublin is organizing a series of meetings with business practitioners to promote the idea of entrepreneurship and show that economics is useful in everyday life. Organizers want to show how to combine the theory of economics with practical aspects of the business on the example of well-known brands. The first meeting «Brewery as business» will be held on May 7, 2019 at the Faculty of Economics of UMCS. The meeting will be visited by Piotr Piekarski, president of the board of the brewery Browar Jastrzębie. During the event, the participants will learn how to run a brewery business, how the company managed to obtain capital for development, and learn about the current market situation of craft beers and the company's development prospects.

Pomeranian Medical University in Szczecin receives almost PLN 7.6 million

2019-05-06

The Pomeranian Medical University in Szczecin is on the ranking list of projects of the National Center for Research and Development recommended for receiving funding as part of the competition for the implementation of Integrated University Programs. The value of the project is almost PLN 7.6 million. The project «Integration-Integrated Development of the Pomeranian Medical University in Szczecin» includes: implementation of information management tools of the university, including electronic management of university records (EZD) along with a series of training for the staff enabling efficient implementation of EZD. The project also includes the implementation of additional classes: ultrasound diagnostics, endoscopy, radiochemistry, internal dosimetry, microsurgery, biophysics, near-infrared spectroscopy and 3D printing and the implementation of domestic and foreign teaching internships for university staff, specialist

courses for students and study visits in leading foreign national centers.

Scientific conference „Divided cities, divided islands”

2019-05-07

The Department of European Studies of the Institute of Political Studies of the Polish Academy of Sciences and Collegium Civitas, in cooperation with the Department of Political, Historical and Regional Geography of the University of Lodz, on 17 May 2019, are organizing a scientific conference in Warsaw's Palace of Culture and Science „Divided cities, divided islands”. During the conference, the political, social and economic situation of selected islands and cities divided by the state border as a result of various historical processes will be analysed. The organizers are particularly interested in how the divided regions manage in the 21st century in a world where borders disappear or do not play a major role in personal traffic and trade. The list of proposed divided cities includes Gubin, Zgorzelec, and the islands: the Cyprus or the Uznam (Swinoujście-Heringsdorf).

Rector of the Warsaw Academy of Special Education to hold a lecture at the Płock State Vocational School

2019-05-07

On 9 May 2019, Prof. Stefan Kwiatkowski will hold a lecture on Competences of the future - school, university, job market at the State Higher Vocational School in Płock. Professor Stefan Michał Kwiatkowski is the rector of the Academy of Special Education (APS) in Warsaw. He is also the head of the Department of Occupational Pedagogy and Andragogy APS, and Doctor Honoris Causa of the Pedagogical University named after National Education Commission in Krakow. The Rector of the Warsaw APS is the author of over 500 articles, as well as the author, co-author, editor and co-editor of 82 books, including such as: Vocational education - challenges, priorities, standards; School and the labor market; Continuing education. Theoretical and practical dimension; Educational leadership in theory and practice.

University of Wrocław to fold a conference “Sociology of disposable groups. Between the theory of social sciences and practice”

2019-05-07

The Department of Sociology of the Distribution Groups at the University of Wrocław invites participants on 9 and 10 May to the XXX international scientific conference “Sociology of disposable groups. Between the theory of social sciences and practice”. The conference, which for almost three decades has been a place of engaged discussion on developing new perspectives of cognition and description of social reality, is addressed to scientific communities, local government and government administration, public institutions and non-governmental organizations and business representatives providing public safety. Discussions of participants have always focused on security aspects (co-modalities) that shape the practices of our everyday lives. The main considerations undertaken by scientists are always «dispositional groups» located in more or less institutionalized social spaces.

Medical University of Silesia gained over PLN 10 million from the National Center for Research and Development

2019-05-07

The project of the Medical University of Silesia „Integrated School Programs SUM 2” received more than PLN 10.1 million funding from the National Center for Research and Development as part of the competition for „Integrated University Programs - Path I”. The project assumes increasing the competences of teaching staff in the scope of educating students according to the direction of Health Risk Management with knowledge and skills allowing health risk assessment and programming of preventive care and participation of teaching staff in courses of statistical programs, databases, specialized software and specialist English. Thanks to co-financing, the Faculty of Public Health will be provided with a

computer lab with equipment and software for analyzing environmental and health data. The money will also allow to launch the University Repository of Medical Cases and the system of handling scientific conclusions and the office document circulation.

Jagiellonian University joins the hundred most innovative universities in Europe

2019-05-08

The Jagiellonian University in Krakow took the 90th place in the ranking of the hundred most innovative universities in Europe prepared by the Reuters agency. The Reuters ranking takes into account the number of patents obtained for inventions created by scientists employed at a given university and scientific publications regarding the conducted research. The Jagiellonian University was classified in the 90th position. Krakow's university is the only Polish university included in the list. The Belgian Catholic University of Leuven (KU Leuven) was recognized as the most innovative university in Europe, followed by the German Erlangen University of Nuremberg, and the third - British Imperial College London. University of Humanities and Natural Sciences in Częstochowa to receive over PLN 4.2 million

2019-05-08

University of Humanities and Natural Sciences in Częstochowa received over PLN 4.2 million for the project „Integrated Program for the Development of UJD in Częstochowa 2018” announced under Priority III. Higher education for economy and development, 3.5 Comprehensive university programs. The objectives of the project are to improve the students' competences in accordance with the needs of the economy, labor market and society, through the implementation of workshop activities, additional practical tasks carried out in the project form and

improving the competences of employees through the implementation of internships in outstanding global centers. The money will also be used to support IT management tools by adapting to the existing regulations - in particular in the field of personal data protection and increasing the functionality of the university management system in order to use its capabilities to optimize management processes.

Center for Asian Affairs of the University of Lodz joins the EastAsiaNet consortium

2019-05-09

The Asian Affairs Center of the University of Lodz (OSA UŁ) became a full member of the international EastAsiaNet consortium (EAN). In practice, this means that researchers of the Łódź university will have much greater opportunities for research collaboration and academic exchange. University researchers will gain the opportunity to participate in EastAsiaNet grants, publications and send two researchers to its workshops at no charge. Students of Asiatic Studies, studying both in Polish and English will have an opportunity to study at the best European universities in the Asian studies. In addition, joining the EAN guarantees participation in the annual workshop organized by Marco Polo Center for Global Europe-Asia Connections in Venice.

Cardinal Stefan Wyszyński University receives the right of medicine studies

2019-05-09

The Minister of Science and Higher Education issued a positive decision regarding the application of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw to grant the Medical Faculty of Collegium Medicum the right to conduct education at the medical school. The consent concerns education at the regular master's studies with a general academic profile. The first course will start in October 2019. Students can apply for 100 places available from June 7. The qualification exams will cover three subjects: biology, chemistry and mathematics. The clinical basis for the UKSW medical studies are scientific and research institutes, including: Military Medical Institute, Cardinal Stefan Wyszyński Institute of Cardiology, Institute of Mother and Child and public hospitals and institutions that provide commercial activities in the field of medical services.

Success of the Poznań-Atlanta Executive Master of Business Administration program

2019-05-09

The Executive Master of Business Administration program Poznań-Atlanta, run by the Poznań University of Economics, has been included in the top ten MBA programs in Poland. The nationwide ranking has been prepared by Home & Market monthly journal. The program has been implemented since 1995 based on the best American models. It is the result of many years of close cooperation with Georgia State University. In 2008, the program received the prestigious AMBA accreditation for high quality education. Classes are conducted in English and are a combination of academic issues with specialist competences needed by middle and high level managers.

University of Economics in Poznań receives over PLN 10.6 million for improving the quality of education

2019-05-09

The University of Economics in Poznań received over PLN 10.6 million for the implementation of the project „Improving the quality of education and management at the University of Economics in Poznań”. The money is allocated from European Union funds under the Operational Program Knowledge Education Development 2014-2020. Co-financing will allow to develop, launch and implement a new field of practical education at the Faculty of Economics, implement classes by foreign lecturers with achievements in scientific and professional work. The project also assumes the use of information from the labor market to design education tailored to new socio-economic needs, purchase of IT systems to improve the quality of university management and improve the competences of managerial and administrative staff by participating in specialized training.

Gowin: If we want to have a wealthy society, we have to invest in science

2019-05-10

Polish universities have fulfilled the task of providing the mass education. However, now is the time for a more quality-oriented, more elitist education – said Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. Deputy Prime Minister Gowin emphasized that if we want to have a prosperous society, a dynamically developing economy, we must invest in science and in Polish universities. - I emphasized the word «investment» because it is really an investment. The money invested in science returns - added Gowin. The head of the Ministry of Science reminded that this year Poland has had a record increase in expenditure on science and higher education for 30 years. Over 2 billion from the state budget and 3 billion in the form of state treasury bonds will be allocated to the public universities.

Medical University of Silesia receives PLN 5.5 million for an integrated university program within regional development

2019-05-10

The project of the Medical University of Silesia „Integrated Programs of Universities for Regional Development” has received more than 5.5 million PLN of funding from the National Center for Research and Development. The project assumes the simulation of activities carried out at the site of the disaster with the use of the Emergency Medical Service helicopter, as well as the use of tools to simulate activities in the chemical laboratory and providing tools to familiarize students with the anatomical structures of the human body. Thanks to the co-financing, the competence of nursing students in the dealing with vascular access will be increased, as well as the implementation of tools for objective and real-time evaluation of the quality of lectures and staff work.

Ministry of Digitization to offer PLN 50 million for the Information Technology Center

2019-05-10

Technical universities from all over Poland will be involved in the Center of Information Technology (CMI) project. Thanks to this, more than 12,000 students will expand their IT skills that are the foundation of a dynamically developing world. Under CMI, 1,500 mentors (teachers and finalists of IT competitions) will use their knowledge, creativity and experience to create exciting programs of classes as part of IT project clubs. Project Centre: Digital Poland supported the project, allocating PLN 50 million for the development of IT specialists. CMI is to search and develop IT talents. Classes will be conducted not only by experienced professionals, but above all enthusiasts who deal with computer science with pleasure. The program includes two-semester training courses, covering mainly the mathematical foundations of algorithms and selected problems of algorithms and programming.

Gdańsk University of Technology to establish STOS Competence Center

2019-05-13

Gdansk University of Technology has signed a contract with Pomerania Development Agency for co-financing the construction of STOS Competence Center (Smart and Transdisciplinary knOwledge Services). The total value of the project exceeds PLN 114 million, co-financing amounts to over PLN 66 million and will come from the EU and the Ministry of Investment and Development programs implemented by the voivodeship self-government. - This investment should give a new impulse to our environment, allow for the development of research and modern didactics. Gdansk University of Technology has great development ambitions, and this project was of interest of our late rector, Prof. Jacek Namieśnik. We will try to continue his will to support the STOS Competence Center - says Prof. Piotr Dominiak, the rector of University. The project includes the construction of STOS Competence Center and a platform for the modern SMART services supporting research and development activities. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGncmoQv7K0/content/podpisano-umowe-o-dofinansowanie-budowy-centrum-kompetencji-stos-o-wartosci-ponad-114-mln

University of Wrocław to launch PhD program for foreigners

2019-05-13

The Institute of Political Science of the University of Wrocław launches the project „Comparative studies on politics and administration - PhD studies for foreigners”. The best students will receive a scholarship 5,000. PLN monthly. The PhD student can be a person who graduated from the master's program, speaks at least C1 at English and passed the application process successfully. The candidate may not be a graduate of a Master's program completed in a Polish institution or a PhD student completing a doctoral studies at a Polish institution or applying for the PhD degree in extramural mode.

The four-year PhD course will take place as part of the College of Political and Administrative Sciences at the University's Ph.D School. PhD students will participate in general university courses (in the field of law, ethics of scientific research or didactic methods in high school) and closely related to discipline. More: <https://uni.wroc.pl/doktoranckie-studia-porownawcze-nad-polityka-i-administracja/>

Professor Frédéric Dias to hold Interdisciplinary Scientific Seminar at the Wrocław University of Science and Technology

2019-05-13

The world-famous mathematician Prof. Frédéric Dias from University College Dublin will be the guest of the next meeting at the Interdisciplinary Scientific Seminar at the Wrocław University of Science and Technology. On May 14, the scientist will give a lecture on „The fascination of ocean waves”. Professor Dias is a mathematician and world leader in research in the field of fluid dynamics. He deals with the analysis of such topics as dispersal wave equations, tsunamis, wave impacts in objects and buildings or widely understood ocean energy. Meeting with Prof. Dias is open to all participants that apply for it via the Evenea.pl website. The lecture will be conducted in English and simultaneously translated into Polish. The Interdisciplinary Scientific Seminar is a program addressed to a wide range of recipients: students, PhD students, researchers interested in deepening knowledge of exact sciences. More: <https://pwr.edu.pl/uczelnia/aktualnosci/przed-nami/interdyscyplinarne-seminarium-naukowe-prof-frederic-dias-758.html>

State Higher Vocational School in Tarnów to launch Monoprofiled Center of Medical Simulations

2019-05-14

The State Higher Vocational School (PWSZ) in Tarnów has opened a modern Monoprofiled Center

for Medical Simulations (MCSM). Its several studios have been comprehensively prepared and equipped with technologically advanced equipment, including simulators, allowing for very realistic reproduction of clinical scenarios. MCSM was created thanks to the PLN 2.5 million allocated by the EU funds. - Education using the simulation method gives completely new possibilities to both didactics and students. I am very happy that our University has joined the group of higher education institutions with such advanced equipment. I want to thank everyone who contributed to the creation of the Center - said Prof. Eng. Jadwiga Laska, Rector of the PWSZ in Tarnów.

University of Silesia to examine the influence of the urban environment on the condition of bees

2019-05-14

Researchers from the University of Silesia decided to examine the impact of the urban environment and related stressors on the bees. Over a year and a half ago, 6 hives were placed on the roof of the Faculty of Law and Administration. For the purposes of the project, a special variety of insects was selected to collect pollen from melliferous plants found in nearby areas. In addition, for the purposes of the scientific experiment at the same time, a second, traditional apiary was created in the rural space about 100 km from Katowice. Scientists observed the functioning of both swarms to compare how related swarms deal with urban and rural environments. In the near future will be run researches, checking whether some stressors are intensified in specific months. In the future, scientists want to share their knowledge and experience with the owners of urban apiaries. More: <http://przystaneknauka.us.edu.pl/artykul/slodko-gorzkie-zycie-miejskiej-szczyszcz>

PhD student of the University of Life Sciences in Wrocław receives a Anna Pasek scholarship

2019-05-14

Krzysztof Wolski, a PhD student at the Institute of Environmental Engineering at the Faculty of Environmental Engineering and Geodesy of the University of Life Sciences in Wrocław, has been awarded during the 11th Anna Pasek scholarship competition, promoting the most talented Polish PhD students. The objective of the awarded project is to show changes in the outflow of waters (with particular emphasis on flood waters) resulting through the transformation of forest systems in selected mountain plots. The PhD student used satellite images LANDSAT 7 and LANDSAT 8 to observe the changes in the structure of the forest over the last 15 years. Specified changes and observed rainwater and hydrological data will allow to build rainfall - outflow models, based on which it will be possible to detect changes in the outflow from these plots and forecast their future. More: http://www.glos.upwr.edu.pl/aktualnosci/49325/doktorant_upwr_ze_stypendium_im_anny_pasek.html

Institute of Medical Sciences of the State Higher to be launched at Vocational School in Chełm

2019-05-15

The State Higher Vocational School (PWSZ) in Chełm received PLN 28.5 million to create the Institute of Medical Sciences. On May 13, 2019, the PWSZ in Chełm received a symbolic check for PLN 28.5 million and the decision of the vice-Prime Minister, Minister of Science and Higher Education Jarosław Gowin to erect the didactic building of the Institute of Medical Sciences of the State Higher Vocational School in Chełm. The Institute of Medical Sciences is to be established in Chełm until 2022. The rector of the PWSZ in Chełm Dr Eng. Arkadiusz Tofil emphasized that there is a constant increase in the demand for such employees both from hospitals and other medical institutions. - The University is trying

to obtain the opportunity to educate students also within the regular Nursing course. My dream is to launch our own clinic hospital- said the Rector of the State Higher Vocational School in Chełm.

Medical University of Warsaw launches Ranking of 100 scientific leaders

2019-05-15

The Warsaw Medical University (WUM) has announced the ranking of 100 university leaders. The list presents scientists of the highest publishing assessments in 2016-2018. The first place in the ranking was taken by Prof. Grzegorz Opolski, head of the I Department and Cardiology Clinic of the 1st Faculty of Medicine. The second leader is Prof. Rafał Płoski, head of the Department of Medical Genetics of the 1st Faculty of Medicine, and the third one is Prof. Hanna Szajewska, head of the Department of Pediatrics, I Faculty of Medicine. The list was prepared by the Main Library of the World Wide Web based on the analysis of the achievements of individual scientists from 2016-2018. The ranking included scholars employed at the University and co-authors of all published articles.

PhD student of the University of Economics in Poznań awarded a scholarship under W. Iwanowska program

2019-05-15

Piotr Matuszak, PhD student at the Department of Macroeconomics and Research on Development at the University of Economics in Poznań, received the W. Iwanowska scholarship for a 7-month trip to the Free University in Berlin from the National Agency for Academic Exchange. The aim of the Program is to increase the international mobility of PhD students of Polish universities by enabling them to conduct research or teaching in the best foreign centers. Trips last from 6 to 12 months and they provide an opportunity for stays in recognized scientific centers and the implementation of research projects together with outstanding foreign scientists. Professor Wilhelmina Iwanowska from the Nicolaus

Copernicus University in Toruń was the founder of the Astronomical Observatory in Piwnice near Toruń and the first woman- member of the board of the International Astronomical Union. She promoted 19 doctors, and 8 of them obtained the professor titles. She was an honorary doctor of three universities.

University of Gdańsk receives funding for the „Baltic Science Network - A Science Powerhouse” project

2019-05-15

The University of Gdańsk will implement the project „Baltic Science Network - A Science Powerhouse” thanks to funding from the Interreg Region of the Baltic Sea Program. The project is a continuation of the «Baltic Science Network» project, in which UG also participated as a partner. It aims to implement scientific policy in the macro-regional dimension and ensure better representation of interests of the Baltic Sea Region at the European Union level in terms of the researcher mobility and innovation excellence in the areas of Photon and Neutron Science, Life Sciences and Welfare State. The main objective is to increase the competence of ministries and funding agencies to design and implement transnational research infrastructure support programs in order to cooperate in research and innovation. The project coordinator is Free and Hanseatic City of Hamburg - Ministry of Science, Research and Equalities. More: https://ug.edu.pl/media/aktualnosci/88223/interreg_region_morza_baltyckiego_zatwierdzono_12_projektow_w_tym_jeden_w_partnerstwie_z_uniwersytetem_gdanskim

Young scientists of the University of Wrocław receive scholarships in the Start competition

2019-05-15

Seven young scientists from the University of Wrocław won scholarships in the Start competition of the Foundation for Polish Science. Wrocław's university is the third in terms of the number of rewarded scientists and scientists. Annual scholarships in the amount of 28 to 36 thousand PLN were received by: Patrycja Brzdąk (molecular biology); Filip Duszyński (geomorphology); Mateusz Janeta (chemistry); Karolina Jara (history of art); Paweł Lenio (legal studies); Krzysztof Sornat (IT) and Marika Żyła-Karwowska (chemistry). For the 27th time, the Foundation for Polish Science has selected the most promising and brightest researchers in a multi-stage competition, applied by 899 people. The average age of the winners is 29 years, and 60% scholarship holders have already obtained PhD titles. In total, the Foundation allocated PLN 3 million for the scholarships.

University of Warmia and Mazury awarded the medal of the Association of Polish Electrical Engineers

2019-05-16

The University of Warmia and Mazury in Olsztyn was awarded the Medal of Professor Stanisław Fryze of the Association of Polish Electrical Engineers. On behalf of the university, the medal was received by Prof. Jerzy Jaroszewski, Vice-Rector for Science. The Association of Polish Electrical Engineers celebrates its 100th anniversary this year. This is a scientific and technical non-governmental organization. The Association awards the Medal to academic teachers or high schools for outstanding scientific and didactic activity in the field of electrics as well as institutions and schools for merit in supporting didactic activities related to electrical engineering, energy, bionics, and information technologies. The University of Warmia and Mazury conducts education in the field of technical sciences mainly at the faculties of Technical Sciences and Geodesy of Spatial Engineering and Construction.

Medical University of Gdańsk to launch Center for Translational Medicine

2019-05-16

The Medical University of Gdańsk opened the Center for Translational Medicine (CMT). Translational medicine is a way to quickly transfer the knowledge gained in the experiment to everyday clinical practice. This is a new but extremely important scientific discipline. The seat is the University Clinical Center in the immediate vicinity of the Invasive and Non-Invasive Medicine Centers. The modern imaging center of the cardiovascular system with facilities was launched, which enables joint work of various scientific specialists and the employees of the Technology Transfer Center. The CMT is provided with a new infrastructure including a treatment space for conducting clinical research, imaging laboratories using the most modern magnetic resonance methods, laboratory and office spaces for conducting research and also commercial space. More: <https://gumed.edu.pl/55758.html>

Professor Chwalibóg becomes a honorary doctor of the Warsaw University of Life Sciences

2019-05-17

Rector and senate of the Warsaw University of Life Sciences in Warsaw awarded Prof. Andrzej Chwalibóg with the title of doctor honoris causa. The awarding will be celebrated at SGGW on May 17, 2019. Professor Chwalibóg graduated in 1971 with honors from the zootechnical studies at the Warsaw University of Life Sciences. He began his scientific work at the Department of Animal Physiology, Biochemistry and Analytical Chemistry of the Institute of Animal Sciences in Copenhagen. In 1995, he became the professor and head of the Department of Physiology and Nutrition. On his initiative in 2003, Center of Experimental Nutrition and Physiology and Instrument Center for Indirect Calorimetry and Stable Isotopes were launched. Their main task was to coordinate the use of unique research infrastructure, integrate scientific staff at universities in

Copenhagen and Aarhus and internationalize their research. His scientific achievements were appreciated by Queen of Denmark Margarethe II, giving him the title Knight of the Dannebrog Order.

Rzeszów University of Technology begins cooperation with the University of Hamburg

2019-05-17

Rzeszów University of Technology has signed a cooperation agreement with Helmut Schmidt University (Helmut-Schmidt-Universität / Universität der Bundeswehr) in Hamburg in the didactic, scientific and development cooperation. The signed agreement assumes the development of joint research projects, the organization of joint academic and scientific activities, such as courses, conferences, seminars, symposia or lectures, or the exchange of employees and students of undergraduate and graduate studies. On the behalf of the Rzeszów University of Technology, the agreement will be implemented by the Department of Electrical Engineering and Computer Science of the Faculty of Electrical Engineering and Computer Science and Department of Machines and Drivetrains of the University of Hamburg.

College of Public Administration in Ostrołęka to educate nurses

2019-05-17

The representatives of the nursing self-government and local self-government announce that the School of Public Administration in Ostrołęka will launch a nursing department. Such a proposal was made during the ceremony on the occasion of the International Day of Nurse and Midwife, which took place on 9 May 2019 in Ostrołęka. The initiator of the project was the vice-president of the Supreme Council of Nurses and Midwives Mariola Łodzińska, who noticed that there is a lack of the department educating nurses and midwives in Ostrołęka. She proposed then that local authorities, taking into account staff shortages, would take care of this staff locally for the needs of the region. The initiative was accepted by Elżbieta Lanc, a member of the Mazovia Province Board. She announced that together with the mayor of Ostrołęka, Łukasz Kulik, they decided that the local government would take the initiative to launch the department for nurses in Ostrołęka.

University of Natural and Humanities in Siedlce to receive almost PLN 8 million

2019-05-17

Siedlecki University of Natural Sciences and Humanities will receive almost PLN 8 million for development - said Deputy Prime Minister and Minister of Science and Higher Education Jarosław Gowin. -I am glad that the project prepared by the University of Natural Sciences and Humanities was very highly rated by the jury of the competition for integrated university development programs - said Jarosław Gowin in Siedlce. Rector of the Siedlce university Tamara Zacharuk received two symbolic checks. She admitted that «this is a beautiful gift for us for the 50th anniversary of the university. The funds will develop the scientific potential of the University of Natural Sciences and Humanities in Siedlce. We will use them, for the purchase of research equipment” - added Zacharuk.

Co-financing from the „Canaletto” bilateral exchange program for physicists from Toruń

2019-05-17

The project of the Faculty of Physics, Astronomy and Applied Computer Science of the Nicolaus Copernicus University received funding from the National Academic Exchange Agency as part of the bilateral exchange program for Canaletto scientists between Poland and Italy. The project of physicists from Toruń «Transforming ab initio Density Functional Theory into a practical tool for computational chemistry» was one of 15 projects that will be implemented (100 applications submitted and formally correct). Members of the team are Dr Szymon Śmiga and Mateusz Witkowski, the coordinator of the project is the director of the Institute of Physics - Prof. Ireneusz Grabowski. The exchange will be carried out with the Center for Biomolecular Nanotechnologies Italian Institute of Technology.

Wrocław University of Science and Technology starts applications

2019-05-17

Students can apply for the Wrocław University of Science and Technology until July 8. Over 7700 places for first and second degree studies are still available. - We have prepared 6814 places for regular studies and additional 915 places as part-time studies. Students can choose from over 50 fields of studies, including 14 in English. Last year the most popular study in terms of the number of candidates for one place turned out to be computer science in English at the Faculty of Computer Science and Management. There were over 7 candidates for one place here. Also, over 6 candidates applied for IT at the Faculty of Electronics. Computer science at the Faculty of Fundamental Problems of Technology (6 people for one place) and cyber security at the Faculty of Electronics (5.82 per one place) were also of considerable interest.

University Science Committee meet

2019-05-20

Implementation of the Act 2.0 at universities and the plans of the Ministry of Higher Education and Science were the most important topics of the University Science Committee (UKN), which took place on May 16-17, 2019 at the University of Białystok (UwB). UKN is one of the commissions of the Conference of Rectors of Polish Universities (KRUP). It consists mainly of vice-rectors responsible for science issues. Anna Budzanowska, the director general of the Ministry of Science and Higher Education informed about the procedures and schedule of activities related to the selection of research universities, which will receive increased subsidies in the coming years. She also talked about the elaborating the minister's new program called Social Responsibility of Science, as well as on the ministry's efforts to make the National Program for Humanities Development (NPRH) a government program with more grant competitions.

National Academic Exchange Agency invites Polish universities to participate in international educational fairs

2019-05-20

The National Academic Exchange Agency (NAWA) conducts the registration of universities interested in participating in international educational fairs, which will take place in the second half of the year. The universities can already apply for the Vietnam educational fair, which will take place in Hanoi (28/09/2019) and Ho Chi Minh City (29/09/2019). They can also register for a joint participation in the fair Central Asia Tour in Nur-Sultan (Astana) on September 28 and in Almaty on September 29, 2019. NAWA also encourages participation in the Study in Europe trade fairs as part of the campaign „Ready, Study GO! Poland“. With the participation of the Polish embassy in Singapore, a Polish stand will be prepared at an educational fair that will take place on 28 September 2019 in Singapore. Also, in cooperation with the embassy in Bangkok, a Polish stand will be prepared for the at the OCSC International Education Expo, which will take place on November 2-3, 2019 in Bangkok. More: <https://nawa.gov.pl/promocja-i-targi/targi?start=0>

Lazarski University to hold the Law Day

2019-05-20

The Lazarski University in Warsaw is organizing the eighth „Law Day at the Lazarski University“ festival on May 25, 2019. During the event, participants will have the opportunity to take advantage of free legal advice provided by law firms and legal counsel. This year, 10 law firms represented by advocates and legal counsels who cooperate with the Lazarski University as often also its lecturers and graduates will offer their pro bono services to the guests of the festival. Specialists will help participants to interpret documents and solve legal complexities in all areas of law, including labor law, inheritance law, family law, administrative law, economic law, criminal law, consumer protection law or property law. Interested participants will also be able to learn how to con-

duct bankruptcy proceedings and submit an application for consumer bankruptcy.

West Pomeranian University of Technology in Szczecin receives PLN 12 million for the development project

2019-05-20

The West Pomeranian University of Technology in Szczecin received nearly PLN 12 million of funding from the National Center for Research and Development for the project „ZUT 4.0 - Direction: Future“. The aim of the project is computerization of linking the process of designing technical education and monitoring the needs of the labor market in the West Pomeranian Voivodeship. The team of implementers will use the artificial intelligence algorithms to support decisions in the field of teaching future graduates and optimize the involvement of the staff in the didactic process. The project budget will be spent to provide courses enhancing students' competences / qualifications, developing the competences of the staff in the didactics and information management, to provide digitization of selected access and resource management processes, development of the Thematic Schools model and to launch the Academic Career Office 4.0.

Young scientists from Wrocław University of Science and Technology receive „Start“ scholarships

2019-05-20

Seven researchers from the Wrocław University of Technology received scholarships under the „Start“ program for the most talented young scientists. Scholarship holders were selected from among 899 candidates, the amount of the annual scholarship is 28 thousand PLN. The winners are: Dr Eng. Bartosz Błasiak (Faculty of Chemistry); Dr Eng. Róża Goścień (Faculty of Electronics); Dr Błażej Jaworowski (Faculty of Fundamental Problems of Technology); Dr Eng. Piotr Klukowski (Faculty of Computer Science and Management); Dr Eng. Adam Moyseowicz (Faculty of Chemistry); Dr Eng. Olga Rac-Rumijowska (Facul-

ty of Electronics, Microsystems and Photonics) and Dr Eng. Wioletta Rut (Faculty of Chemistry). «Start» program is organized by the Foundation for Polish Science. It is Poland's largest scholarship program for researchers under 30 years representing all fields of science. Scholarships can be spent for any purpose, they are to financially support young scientists in the difficult beginnings of their careers and to enable them to devote themselves fully to science.

Wrocław University holds International Conference and Assembly of Students' Scientific Clubs

2019-05-21

Over 500 students and carers from all over Poland participated in the 24th International Conference and the 36th Meeting of Student Science Clubs organized by the Wrocław University of Environmental and Life Sciences. In 17 sections students presented 155 works on biology, animal husbandry, biotechnology, food and human food technology, geodesy, environmental engineering, veterinary science, basic sciences, agrotechnics, ecology and environmental protection and economics. The topics of presentations were very diverse. The students talked about the change of fashions on dog breeds, vegan foams - innovative products on the confectionery market, use of hemp and linseed oil to produce a yeast based food supplement, use of ultrasounds to support yeast dough preparation, ECG standards for sport pigeons, stimulating entrepreneurial thinking for students and hydroponics for growing lettuce. More: http://www.glos.upwr.edu.pl/aktualnosci/49394/kola_naukowe_ponownie_na_upwr.htm

University of Warsaw to launch a new spin-off company

2019-05-22

A new spin-off company Project42 was launched at the University of Warsaw (UW) to deal with the creation of advanced analytical tools. Its founders are PhD students: Maciej Ciemny from the Faculty of Physics of the University of Warsaw and Kamil Mieszkowski from the Faculty of Management at the University of Warsaw. Together with their team, they are working on solutions that can improve the functioning of enterprises and institutions. The main operation of the new UW spin-off company is analyzing large amounts of data. Project42 creates algorithms, software and analytical services that enable enterprises to better use their information and data bases. Solutions created by Project42 use data science technology and machine learning.

New rector of the Vistula Academy of Finance and Business in Warsaw

2019-05-22

Dr Wawrzyniec Konarski was appointed the rector of the Academy of Finance and Business (AFiB) Vistula in Warsaw by the University's Founder. - I want to act to raise the University's image rank and to increase its recognition and attractiveness from the national and international perspective. This would emphasize the qualitative attributes of academic staff and students - said the new rector. Dr Wawrzyniec Konarski, a professor at AFiB Vistula, previously held the function of a rector's representative in the university authorities. He is a well-known political scientist, respected lecturer, member of Polish and international scientific associations, author of nearly 200 publications in the field of political science, cultural studies, media studies and international relations.

University of Science and Technology to launch a computational medicine center in Krakow

2019-05-22

The SANO AGH project at the AGH University of Science and Technology in Krakow has won a grant of 15 million euro in the prestigious Teaming for Excellence competition under the EU's Horizon 2020 program. Thanks to financing, researchers will be able to conduct advanced computer simulations used in medical diagnostics. The Center for Individualized Computational Medicine SANO will be created from the grant funds. It will deal with the creation of innovative methods of medical diagnosis and individualized therapy, which will be supported by advanced computer simulations. The SANO Center will be created as a result of international cooperation. The consortium includes the Academic Computer Center CYFRONET AGH, LifeScience Cluster in Kraków, the German Society of Fraunhofer Supporting Applied Research and Forschungszentrum Jülich GmbH and the British University of Sheffield.

University of Lodz to launch Joint PhD School with institutes of the Polish Academy of Sciences

2019-05-22

University of Lodz (UŁ) has created a PhD School together with the institutes of the Polish Academy of Sciences: Institute of Medical Biology of the Polish Academy of Sciences and the Center of Molecular and Macromolecular Studies of the Polish Academy of Sciences. The BioMedChem school will educate PhD students in three disciplines: biological, medical and chemical sciences. The aim of education is to broaden and deepen the knowledge of PhD students in their scientific discipline. The University of Lodz will educate PhD students at 4 PhD schools: Social Sciences, Humanities, Science of Natural Sciences and BioMedChem. The education of PhD students under new rules will start on October 1, 2019 in accordance with the Law on Higher Education and Science.

Student of the Nicolaus Copernicus University becomes a laureate of the Scholarship of the Cultural Heritage Foundation

2019-05-22

Zuzanna Jarmulska, a student at the Faculty of Fine Arts at the Nicolaus Copernicus University in Toruń is this year's laureate of the Scholarship of the Cultural Heritage Foundation. The winner is studying the conservation and restoration of works of art in the fifth year (specializing in conservation and restoration of stone sculpture and architectural detail). The student was awarded for the implementation of the diploma thesis, the subject of which is a seventeenth-century crucifix made of alabaster, from a valuable epitaph altar in the church in Ryńsk. Work on the subject required understanding the art of preservation of monuments and knowledge of the historical context of the creation of a work of art and stylistic analysis. The Cultural Heritage Foundation was established in 2012 at the initiative of Dr Michał Laszczkowski and Paweł Wilski. Its aim is to protect and promote Polish national heritage as an element of the European cultural heritage.

Five young scientists from the University of Gdańsk receive START scholarships

2019-05-22

Five scientists from the University of Gdańsk received START scholarships for the most talented young Polish scientists. This is the 27th scholarship contest organized by the Foundation for Polish Science. The annual scholarships of 28,000 PLN were received by: Dr Eng. Beata Bajorowicz from the Faculty of Chemistry in the field of material engineering; Dr Marcin Czapla from the chemistry department in the field of chemistry; Weronika Grochowska, from the history department in the field of art history; Aleksandra Mańkowska from the faculty of social sciences in the field of psychology and Dr Alicja Mikołajczyk from the department of chemistry in the field of chemistry. The scholarship winners were selected in a competition from among

899 candidates. The five winners bring the Gdańsk university the fourth place in Poland in terms of the number of START scholarship holders.

Archbishop Celestino Migliore to become a doctor honoris causa of the Cardinal Stefan Wyszyński University in Warsaw

2019-05-23

On May 28, 2019, during a solemn conference of the Senate of the University of Cardinal Stefan Wyszyński (UKSW) Archbishop Celestino Migliore will be awarded the title of doctor honoris causa of the CSWU. Archbishop Migliore studied at the Interdepartmental Theological Study in Fossano, where he obtained a master's degree in theology. He obtained a bachelor's and PhD degree in canon law at the Pontifical Lateran University in Rome. In 1977 he graduated from the Papal Ecclesiastical Academy, and then began his service in the Vatican diplomacy. In 2010-2016 he was the apostolic nuncio in Poland and the dean of the diplomatic corps. From 2016 he has been the apostolic nuncio in Russia.

Lublin to hold „Day of students and PhD students with disabilities”

2019-05-23

The "Alter Idem" Association of Disabled Students and the Disabled People's Service Team of the Maria Curie-Skłodowska University (UMCS) in Lublin are organizing on 24 May 2019 „Day of students and PhD students with disabilities". The event is accompanied by a nationwide, interdisciplinary scientific conference with aim to exchange ideas, views and scientific experiences regarding the broadly understood functioning of people with disabilities at universities. The topics will include a wide range of problems that students with disabilities have to deal with in everyday life. Three thematic blocks are planned: legal problems of people with disabilities, psychosocial problems and professional activation of people with disabilities.

High School in Biała Podlaska receives one million PLN

2019-05-23

The State Higher School in Biała Podlaska received a grant of PLN 1 million as part of the project „Didactic Initiative of Excellence". The symbolic check was handed to the acting rector of the university, Agnieszka Smarzewska, by the deputy minister of science and higher education, Prof. Andrzej Stanisławek. -That money will allow to improve significantly the quality of education. We have a chance to upgrade our school. For that money we will implement various projects and equip the studio with didactic aids, so that students will be able to carry out simulations of real conditions of the labor market - said Agnieszka Smarzewska.

University of Nicolaus Copernicus in Toruń to launch the Center for Research and Conservation of Cultural Heritage

2019-05-23

The University of Nicolaus Copernicus in Toruń has started constructing the Center for Research and Conservation of Cultural Heritage. The Center is the last unrealized element of the investment program prepared a few years ago. The unit will conduct scientific research and conservation work. There will include interdisciplinary research laboratories operating in the field of conservation, using knowledge, techniques and specialists in chemistry, physics, biology and geology. The project provides for the purchase of a polarizing and metallographic microscope, an aging climatic chamber, an infrared spectrometer, an X-ray diffractometer, a portable digital X-ray system, a colorimeter, and 3D scanners. The Centre will be created thanks to co-financing from the European Regional Development Fund - from the «Monumentum Sonus Visio: Academic Centers of Creative Industries of Culture, Art and Monuments Protection» project implemented jointly with the University of Economy in Bydgoszcz.

Kazimierz Wielki University in Bydgoszcz to receive nearly PLN 11.7 million for development

2019-05-23

The University of Casimir the Great in Bydgoszcz received funding for the implementation of the project „We focus on the development of the UKW”. Almost PLN 11.7 million is allocated from the European Union funds under the Operational Program Knowledge Education Development 2014-2020. The substantive scope of the project is the development and implementation of changes in education programs at the faculties of computer science and mechatronics, and the adaptation of the prototyping laboratory rooms for the Institute of Applied Mechanics and Computer Science. The university is also planning to invite foreign lecturers with achievements in scientific and professional work, improving the competence of students responding to socio-economic needs, improving teaching skills of university staff by participating in specialized training and foreign teaching internships and purchasing IT systems to improve the quality of university management.

Bialystok University of Technology to hold congress of Erasmus Student Network Polska

2019-05-24

Representatives of the 35 largest Polish universities are participating in the congress of Erasmus Student Network (ESN) Poland, which will be held at the Bialystok University of Technology (PB) on 23-26 May 2019. The event is organized by ESN PB. Erasmus Student Network Polska is part of the largest student organization in Europe. The main objective of the ESN is to support and promote mobility through international exchange programs, such as Erasmus +. For Polish students, the activity of ESN Poland and meetings with students from other countries are the opportunity to use a foreign language in practice, as well as making new contacts. More: <https://www.esn.pl/pl>

Sanok Higher Vocational School to launch Mechanics and Mechanical Engineering

2019-05-24

From October 2019, the State Higher Vocational School in Sanok will start Master's programs in the field of Mechanics and Mechanical Engineering. After 4 semesters of education in master's studies, the graduates will obtain the title of master engineer. They will be prepared to take up work in companies of machinery industry, involved in the manufacturing and operating machines, design, construction and technological units, as well as organization, maintenance of production and automation of technological processes. Students can apply for studies from June 1, 2019.

Researchers of the University of Bialystok receive grants from the National Science Center

2019-05-24

Scientists from the University of Bialystok have received six grants for a total amount of over PLN 2.6 million from the National Science Center (NCN). The funds have been granted as part of the last NCN calls. The largest grant, amounting to PLN 1 217 630, was awarded to Prof. Krzysztof Szymański from the Faculty of Physics, for the project «Imaging of hyperfine interactions in Mössbauer spectrometry». The other 3 grants were received by the researchers from the Faculty of History and Sociology. The grants will allow Dr Karol Łopatecki to study the social and economic significance of military camps and garrisons in the Polish-Lithuanian state in the period from the 16th to the 18th century, Dr Radosław Poniak to carry out the project «Economic inequalities in the Polish-Lithuanian Commonwealth and their socio-political consequences», and Monika Kozłowska to analyze the nature and scale of the impact of weather conditions on selected economic phenomena, such as crop production, price movements of agricultural products and their export from Poland in early modern period of history.

Projects of young scientists of the University of Silesia receive funding under the Preludium program

2019-05-24

Three projects of young scientists from the University of Silesia will be implemented thanks to funds of the National Science Center for supporting research projects of people starting their careers without the PhD title, allocated under the Preludium program. Project «Foto-grafemity. Shaping the relationship between photography and poetry at the turn of the 21st century on the example of Polish poetry» gained over 81 thousand PLN and will be carried out at the philological faculty. Project «Nudge as an instrument of legal regulation» acquired almost 175,000. PLN and will be conducted at the Faculty of Law and Administration the university. Also, thanks to the co-financing in the amount of almost 209 thousand PLN scientists from the university's faculty of biology and environmental protection are implementing the project «Understanding the genetic basis of beneficial interactions between *Brachypodium distachyon* and endophytic bacteria».

Projects of researchers from the Nicolaus Copernicus University receive financing within the Sonata competition

2019-05-24

Two researchers from the Nicolaus Copernicus University in Toruń will realize their projects thanks to funding from the Sonata call of the National Science Center addressed to people with a PhD degree, obtained from 2 to 7 years before the year of application. Dr Karolina Maria Słowik from the Faculty of Physics, Astronomy and Applied Informatics gained almost half a million PLN for the project DAEMoN: Dynamics of Asymmetric Quantum Emitters controlled using Nanostructures. Dr Anna Wójtewicz from the humanities department will implement the project: "Cultural practices related to the body in everyday life of four generations of Polish men. Sociological analysis" thanks to the co-financing of almost 290 thousand PLN. The Sonata call aims to support people starting a scientific career in conducting innovative basic research using modern equipment or an original methodological solution.

Polish-Portuguese cooperation in the „battlefield medicine“

2019-05-24

The Medical Simulation Center of the Medical University of Wrocław strengthens the cooperation with the Portuguese Centro de Saúde Militar de Coimbra. Thanks to this agreement, students and PhD holders of the Wrocław university will have the opportunity to participate in new courses in the battlefield medicine. The agreement with Módulo de Formação e Simulação Biomédica de Centro de Saúde Militar de Coimbra in Portugal is an extension of the existing cooperation between the two institutions. It offers the opportunity to organize martial arts courses and medical activities in mass events in the future. - I think that we have to prepare our students to such challenges of today and changes in the world – emphasized Dr Piotr Kołęda, who heads the Medical Simulation Center at the Medical University.

Development program of the Technical-Humanistic Academy in Bielsko-Biała

2019-05-24

The University of Technology and Humanities in Bielsko-Biała will carry out the project „Study in the mountains! - ATH Development Program.“ The total budget of the project is almost PLN 8 million. The implementation of the project will allow to introduce a new innovative course of study and to provide the acquisition of additional competences enabling better practical professional preparation of students. The co-financing will improve the competences of the staff, the quality and efficiency of the management and administrative staff, thanks to the introduction of modern solutions and IT tools in the field of university management. The university development program is co-financed from the Operational Program Knowledge Education Development 2014-2020. Its implementation is planned for four years - until the end of March 2023.

University of Lodz to launch a team to counteract discrimination

2019-05-27

The University of Lodz has set up a special team to develop mechanisms of action that allow students and employees to effectively respond to possible cases of discrimination at the university. The team includes both staff and managers of administrative units. The anti-discrimination team is another initiative of the University of Lodz to develop the social responsibility of the university. The team's task is to work out an equality policy for the University of Lodz. The starting point for the document are provisions of national, EU and international law, including the Convention on the Rights of Persons with Disabilities. Equality policy will also result from the receiving the prestigious HR Excellence in Research logo awarded to the University of Lodz.

Higher School of Information Technology and Management in Rzeszów receives almost one million PLN

2019-05-27

Higher School of Information Technology and Management (UITM) in Rzeszów received almost PLN 1 million and became one of few non-public schools with the highest subsidy for maintaining research and teaching potential granted by the Ministry of Science and Higher Education. Only two private Warsaw colleges received higher grants: SWPS University and Kozminski Academy. One of the highest subsidies for non-public schools is a natural result of the consistent policy of building up the scientific capacity of UITM and it confirms the position of our university against other academic units in the country – emphasizes Prof. Agata Jurkowska-Gomułka, vice-rector of science at UITM. The funds from the Ministry of Science are allocated to support team projects contributing to the strengthening of scientific achievements, including their internationalization - adds Prof. Agata Jurkowska-Gomułka.

X International Scientific Coaching Conference to be held in Warsaw

2019-05-27

The Center for Coaching and Mentoring of the Kozminski University in Warsaw is organizing on March 27-28, 2019 the 10th International Scientific Coaching Conference under the slogan „Coaching - new perspectives and challenges“. Coaching is developing very dynamically in Poland and around the world. It has more and more applications and has already been established as a separate, socially recognized profession. New coaching concepts, approaches, tools and areas of specialization are emerging. The conference is addressed to trainers, mentors, supervisors, HR experts, HR-business partners, managers, entrepreneurs, students, PhD students interested in coaching and personal and professional development.

University of Economics in Wrocław to receive grants for projects

2019-05-27

Wrocław University of Economics participates in the group of three economic universities, which managed to get grants in the HS4 panel of this year's OPUS competition of the National Science Center. The awarded projects of the Wrocław University include: «Socio-economic, environmental and technical determinants of energy poverty in rural areas in Poland» by Dr Eng. Arkadiusz Piwowar from the engineering and economic department and «Sustainable urban logistics of the last mile and returns on the e-commerce market. Perspective of various stakeholder groups» by Dr Eng. Maja Kiba-Janiak from the faculty of economics, management and tourism. OPUS is a competition for research projects, including financing the purchase or manufacture of scientific and research equipment necessary for the implementation of the projects. Scientists can apply for funding regardless of their academic titles as well as scientific achievements.

Poznan University of Technology to launch a modern astronomical observatory

2019-05-27

SkyLab - a unique astronomical observatory used to conduct industrial research and research and development of the optical observation systems was launched at the Poznan University of Technology. The ceremony was attended by Deputy Prime Minister and Minister of Science and Higher Education, Jarosław Gowin. The laboratory was launched in a special astronomical dome on the roof of the laboratory hall at the Piotrowo campus. Thanks to the apparatus, scholars can observe objects of size of a pixel from a distance of one kilometre, which allows them to monitor space debris being a threat to satellites. SkyLab research team's new competences in the construction of observation equipment will contribute to the construction of national technical and intellectual potential for the use of space,

strengthen Poland's position, and even allow to be a leader in the field of observation of space objects. More: <https://www.put.poznan.pl/en/aktualnosci/skylab-unikatowe-observatorium-astronomiczne>

Researchers of the University of Silesia to obtain over 2.8 million co-financing under the Sonata competition

2019-05-27

Four projects of researchers at the University of Silesia will be implemented thanks to the funding obtained in the Sonata competition of the National Science Center. The total amount of support is over PLN 2.8 million. The co-financed projects are: «The meaning of the legal text in the light of selected concepts of cognitive linguistics» (department of law and administration); «Chinese New Silk Roads in Central Asia - measures, strategies and actors of the Belt and Way Initiative» (philological faculty); «Interaction in plant-bacteria system during phytoremediation of soil co-contaminated with hydrocarbons and heavy metals» (department of biology and environmental protection) and «Innovative polymerization methods of less activated monomers (LAMs)», (faculty of mathematics, physics and chemistry). Sonata supports students starting a scientific career in conducting innovative basic research or an original methodological solution.

Elbląg University to teach doctors

2019-05-28

The University of Humanities and Economics in Elbląg (EUH-E) waits for the decision of the Ministry of Science and Higher Education on granting the Faculty of Health Sciences EUH-E the right to conduct regular medicine studies. - Demand is huge, doctors, especially specialists are pensioners to a large extent, and the supply of new cadres is insufficient - says Sylwia Sobkowiak, the head of the rectory of the Elbląg University of Humanities and Economics. Two years ago, the opinion of the Ministry of Science and the Polish Accreditation Committee was negative due to the lack of a functioning an

education and simulation center for students of the medical faculty. However, such a center has already been built and equipped. It will start operating from October 1, 2019. The rectors of the Elbląg university expect that after fulfilling all the requirements, they will receive a positive decision from the Ministry of Science.

Technical University of Lodz receives almost PLN 100 million for the construction of Alchemium

2019-05-28

The Lodz University of Technology received funding from the Ministry of Science and Higher Education in the amount of PLN 97.5. The funds will be allocated for the construction of the Alchemium - a modern conference and educational center with chemical and scientific laboratories. On May 23, 2019, an official foundation stone-laying ceremony took place for the construction of «Alchemium - the magic of chemistry of tomorrow». It was a part of the celebration of the 74th anniversary of the Lodz University of Technology, The total construction cost is PLN 113.1 million, of which the university will receive PLN 97.5 million from the Ministry of Science and Higher Education. Jarosław Gowin, Prime Minister and Minister of Science and Higher Education signed the foundation act, during the ceremony.

University of Warsaw to invite to PhD schools

2019-05-28

The University of Warsaw invites students to apply for the PhD School of Science and Natural Sciences and the Inter-Ministerial PhD School. Students can apply for Warsaw PhD School of Mathematics and Computer Science (a joint project of the University of Warsaw and the Polish Academy of Sciences), as well as for the Quantitative Psychology and Economics program. The application period will start on June 1. The purpose of application process is to select the best candidates for schools by assessing their previous experience and scientific achievements, the value of the proposed research project and its importance for a given discipline. More: <https://irk.oferta.uw.edu.pl/pl/offer/SzD2019/>

Kielce University of Technology to receive PLN 20 million

2019-05-28

Deputy Minister of Science and Higher Education Sebastian Skuza handed a symbolic check for PLN 20 million to the rector of the Świętokrzyska University of Technology in Kielce. This is an additional government subsidy for the implementation of a long-term university development strategy. This funding will allow finalizing significant investments in the scientific-research base of the Kielce University of Technology. At the moment, the university is implementing the CENWIS project, which assumes the extension and equipping of the laboratory base and making it available on commercial terms to companies. - We will cooperate with European and global institutions with European. We can see huge benefits due to establishing international contacts, employment for our graduates, providing PhD studies and internships - said the rector of the Kielce University of Technology, Prof. Wiesław Trąpczyński.

Wroclaw University of Science and Technology receives PLN 1.65 million for projects from the Sonata competition

2019-05-28

Three researchers from the Wrocław University of Science and Technology received grants under the Sonata competition. The National Science Center will spend PLN 1.65 million on their research. The financed research will be carried out by: Dr Eng. Marcin Poręba - «Proteolytic analysis of breast cancer using mass cytometry for the purposes of personalized oncology; Dr Eng. Róża Goścień - «Optimization of wireframe optical networks with the use of network modeling and prediction tools» and Dr Eng. Marta Rudnicka-Bogusz - «Architecture and urban planning of nineteenth and twentieth-century military development complexes in the northern and western Poland: typology, stylistics, use and revalorisation of bands». The Sonata program is a competition for people with PhD titles- obtained from two to seven years a year before the application. It aims to support innovative basic research using modern equipment or an original methodological solution.

Maria Curie-Skłodowska University in Lublin to hold 2nd Ukrainian Day

2019-05-29

On May 31, 2019, the Maria Curie-Skłodowska University (UMCS) in Lublin invites participants to the „2nd Ukrainian Day at UMCS”, which will take place at the UMCS Academic Center of Culture „Chatka Żaka”. The event «Ukrainian Day» will show contemporary Ukrainian culture in its various aspects and will bring closer the heritage and national wealth of Polish eastern neighbor. The event aims to integrate students and inhabitants of Lublin with representatives of the Ukrainian community, promoting Polish-Ukrainian dialogue and building friendships between both nations. During the event participants will be able to take part in artistic workshops with folk and folk singing. The program also includes tasting of traditional Ukrainian cuisine. The

organizers also invite guests to a meeting with a young writer, Olesia Jaremchuk, who will present a collection of reportages titled «Nashi inshi» about minorities living in Ukraine.

Academy of Finance and Business in Warsaw to launch new courses

2019-05-29

Academy of Finance and Business (AFiB) Vistula in Warsaw has launched new courses Life-style coaching, Business Journalism, Courses in Polish, English, full-time and part-time studies as well as online studies for the academic year 2019-2020. The AFiB Vistula offer includes novelties that are not available at other universities. Two specializations were launched at the Faculty of Journalism and Social Communication: Business Journalism and Social Media Journalism. In response to the very large interest and needs of the market, the Vistula universities have included Lifestyle Coaching in their offer. This is a 2-year master's degree program at the Main School of Tourism and Vistula Hotel Management (former School of Tourism and Recreation). The graduates of psychology, dietetics, recreation and physical education studies can expand their knowledge in the course,. More: <https://www.vistula.edu.pl/kierunki-studiow>

Lublin University of Technology and Polish Post to sign agreement on cooperation

2019-05-29

The Polish Post has signed a contract with the Lublin University of Technology on cooperation in the field of electromobility, photovoltaics and transport. The signing ceremony took place on 27 May 2019 at Lublin University of Technology. Under the scientific and technical cooperation agreement, the postal operator and the university will jointly implement projects co-financed from European Union funds, which concern research and the possible construction of photovoltaic installations in the Polish Post sorting plant in Lublin. One of the planned projects will be the construction of an energy warehouse. Its connection to the photovoltaic installation will allow the charging and subsequent transfer of energy storage to electric cars of the Polish Post. The Lublin technical university will cooperate with the Polish Post Office also in the organization of student internships, the implementation of diploma theses as well as research and development.

State Higher Vocational School in Elbląg to start application period

2019-05-29

The State Higher Vocational School in Elbląg starts the application period. Students can apply for 13 fields of study and 24 specialties, master's, engineering and bachelor's studies in free day and afternoon programs as well as part-time studies. The Elbląg PWSZ is launching regular Master's degree studies on the following majors: Pre-school and early-school education and Special Pedagogy. The Institute of Economics will launch two-year MA complementary managerial and legal studies. Applications for studies at the PWSZ in Elbląg can be sent on May 31, 2019. More: <https://pwsz.elblag.pl/rekrutacja>

Projects of researchers at the University of Gdańsk receive co-financing under the OPUS competition

2019-05-29

Three scientists from the University of Gdańsk received funding for their projects as part of the OPUS competition of the National Science Center. 1880 applications were submitted to the 16th OPUS competition. As part of the competition, project funds were received by: Prof. Marek Grinberg from the faculty of mathematics, physics and computer science for «Energy structure and spectroscopic properties of 3d3 (Cr3 +, Mn4 +) ions in crystalline matrices in extreme conditions»; by Dr Agnieszka Herman from the oceanography and geography department for «Observation and modeling of the interaction of sea ice with the boundary layer of the atmosphere and the ocean» and by Dr Tomasz Widłak from the law and administration department for «Judges and virtues. Study of the theoretical theory of justice». OPUS is a competition addressed to scientists regardless of the stage of their scientific career, with no funding limit for one project. In this year's competition, 361 projects were qualified for financing.

Wrocław University of Science and Technology to invite PhD students

2019-05-29

Until June 14, the Wrocław University of Science and Technology invite students for its Doctoral School. They can choose twelve various courses. - What distinguishes our offer is the possibility of completing an additional didactic course, which entitles students to conduct classes at the university or to learn English free of charge. Other schools do not have such solution - explains Izabela Kurek from the school's dean's office. The Wrocław University of Science and Technology's Doctoral School will start its operation on October 1, 2019 in the following disciplines: Architecture and urban planning; Automation, Electronics and electrotechnics; Technical informatics and telecommunications; Biomedical engineering; Chemical engineering; Civil engineer-

ing and transport; Mechanical engineering; Environmental engineering, Mining and energy; Maths; Chemical and physical sciences as well as Management and quality sciences. More: <https://pwr.edu.pl/uczelnia/aktualnosci/wystartowala-rekrutacja-do-szkoly-doktorskiej-pwr-11213.html>

Krakow University of Technology to launch a new study

2019-05-30

Clean air engineering is a totally new field of study in Poland. It has been introduced by the Krakow University of Technology (PK) and added to its didactic offer in next academic year. The applications can be submitted since June 10. The new course will be run from October 2019 jointly by three departments of PK: Civil Engineering, Mechanical Engineering and Environmental and Energy Engineering. Dr Eng. Piotr Beńko, co-creator of the education program of this new course explained that the need to create the «clean air engineering» course results from the growing importance of air quality issues, including its impact on human health and the environment, especially in the context of intensive urban development and climate change. Regular studies in the field of Clean air engineering will last 3.5 years. Krakow University of Technology has prepared 36 places for its students.

University of Life Sciences in Poznań receives co-financing for three projects under the Opus call

2019-05-30

University of Life Sciences in Poznan (UPP) is conducting three projects implemented within the scientific consortium that have obtained funding in the Opus National Science Center (NCN) competition. The money from NCN will support the research carried out by Dr Magdalena Rudzińska, Prof. UPP (Faculty of Food and Nutrition Sciences, partner: Wrocław University of Environmental and Life Sciences); Dr Jolanta Tomaszewska-Gras (faculty of food and nutrition sciences, partner: Medical University in Lublin) and Dr Agnieszka Waśkiewicz (department of wood technology, partners: University of Economics in Poznań and Institute of Biotechnology of Agricultural and Food Industries in Warsaw). Opus is a competition addressed to recipients regardless of the stage of their academic career, there is no limit of financing for one project. In the 16th competition, the NCN received 1880 applications, of which 361 projects were qualified for financing.

Jan Kochanowski University in Kielce invites participants to CHEM-NIGHT

2019-05-31

In Kielce on June 7, 2019, CHEM-NIGHT festival will be held under the slogan „Unusual chemistry of ordinary things”, organized by the Institute of Chemistry of the Jan Kochanowski University (UJK) in Kielce. The goal of the event is to popularize science among the local community through participation in lectures, workshops and chemical demonstrations. Nine thematic laboratories will be available, in which participants will be able to carry out their own experiments. Under the supervision of the institute's employees and students, participants will discover „chemistry from the kitchen”. They will find out where to find and how to identify some interesting substances and what phenomena are part of the everyday objects. Also, they will be

able to prepare natural cosmetics, glycerine soaps and sparkling baths and learn about the composition of food.

Foreign experts to select Polish research universities

2019-05-31

The Minister of Science and Higher Education appointed an international team to evaluate applications for the first competition „Initiative of excellence - a research university”. The team is to select a group of universities that will become research universities in the future and according to the Ministry's assumptions, they will effectively compete with the best universities and institutes in the world. On the basis of the team's assessments universities will be selected and will receive an annual subsidy higher by 10 per cent than the subsidy obtained in 2019. The team consists of 15 outstanding foreign experts including rectors or vice-rectors of leading European universities e.g. University of Göttingen, University of Amsterdam, University of Aarhus, University of Manchester and University of Southampton. More: <https://www.gov.pl/web/nauka/miedzynarodowi-eksperci-w-programie-inicjatywa-doskonalsci-uczelnia-badawcza-powolani-kto-bedzie-oceni-al-wnioski>

Cardinal Stefan Wyszyński University to invite future students

2019-05-31

Collegium Medicum of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw is planning to invite 100 students to study medical studies. - The university is somehow complete structure having the medical department, which is one of the most important elements - said Health Minister Łukasz Szumowski. The clinical basis for medical department of CSWU will be provided by medical units located in and near Warsaw: the Military Medical Institute, the Central Clinical Hospital, the Institute of Cardiology in Anin and the Institute of Mother and Child. The University has also collaborated with the European School of Advanced Ophthalmology of the Swiss University in Lugano.

Students of the Polish Naval Academy from Gdynia become finalists of the „NATO Debates Championships” competition

2019-05-31

Elżbieta Lubacha and Tomasz Dranicki, students of international relations at the Naval Academy in Gdynia, advanced to the finals of the international competition „NATO Debates Championships”. The finals will take place from 17 to 19 June in Brussels. The organizers of the competition are George Washington University and the Egmont Royal Institute for International Relations in Brussels. They invited dozens of universities from around the world to participate in the project. The task of the students was to prepare the film material on the subject: «Should the NATO allies commit to at least 2% of their GDPs on defense?» The jury chose best elaborated answers and invited students and staff from 7 universities to the finals. The finalists include the Naval Academy, Canadian Carleton University, French Ecole de Guerre, Belgian College of Europe and Ghent University, University of Bath from Great Britain, Italian University of Bologna and University of Macedonia.

Researchers of the Nicolaus Copernicus University in Torun joins a consortium for the economy of tomorrow

2019-05-31

A group of scientists from the Faculty of Chemistry at the Nicolaus Copernicus University in Toruń (UMK) joined the consortium implementing the project: „Advanced biocomposites for tomorrow's BIOG-NET economy”. The subject of the research is the use of microorganisms to search for innovative solutions in the design and manufacture of new, mixed nanocomposite, porous inorganic materials (metal-protein type). The results will allow for a better understanding of the mechanisms of biological synthesis of inorganic matter by selected microorganisms and the development of biosynthesis methods for nanocomposite materials. The consortium consists of UMK, University of Warmia and Mazury in Olsztyn, Warsaw University of Technology, Białystok University of Technology, University of Adam Mickiewicz University in Poznan and the University of Szczecin. Industrial partners are business entities: Toruń Zakłady Materiałów Opatrunkowych S.A., Sygnis sp. Z o.o. and AdvaChemLab sp. o.o. More: <https://www.umk.pl/wiadomosci/?id=26154>

Students and graduates of the University of Silesia receive an audience award at a conference in Brno

2019-05-31

The game „Weakless” created by students and graduates of the University of Silesia won the audience award at the „Game Access Conference” in Brno. This is another award for the Cubeish Games and Punk Notion teams. «Weakless» is a puzzle-adventure game depicting the relationship of two heroes: people with sight dysfunction and people with hearing impairments who, thanks to mutual help, can overcome obstacles. It was created thanks to the support of the ARP Games accelerator, established by the Industrial Development Agency, Spin US, which is a special purpose entity of the university and the Cieszyn Poviát. The core of the game

«Weakless» is solving logic puzzles and exploring the surroundings with the help of the characters' vision and skills. At any given moment, the player controls only one of the characters, which means that he can not simultaneously use the sense of sight and hearing. The game is distinguished by its own graphics, awarded in the Game Art Design category during the ANIWOW Animation Festival! in Beijing. State Higher Vocational School in Nowy Sącz to launch new studies

2019-06-03

The Pedagogical Institute and the Institute of Foreign Languages of the State Higher Vocational School (PWSZ) in Nowy Sącz will offer new fields of study and specializations in the academic year 2019/2020. The PWSZ will offer students in Nowy Sącz second-cycle studies in criminology and resocialization with pedagogical preparation and professional counseling. Another novelty will be a regular five-year MA courses in pre-school and early-school education. The PWSZ Pedagogical Institute offers two specializations: pre-school education and early school education. At the Foreign Languages Institute students will be able to choose three new language paths: English with Chinese, Russian with Chinese and German with Swedish as part of Linguistics for Business.

Rev. Prof. Michał Heller becomes doctor honoris causa of the Rzeszów University of Technology

2019-06-03

Rev. Prof. Michał Heller, cosmologist, philosopher and theologian, the laureate of the Templeton Prize, was honored by the Rzeszów University of Technology with the title of doctor honoris causa. The ceremony took place on May 30, 2019. Decision on honouring Prof. Heller in April 2018 was taken by the Council of the Faculty of Mechanical Engineering and Aeronautics of the Rzeszów University

of Technology. In November last year the Senate of the Rzeszów University of Technology adopted a resolution to grant Prof. Michał Heller the title of doctor honoris causa. The laudation at the ceremony was given by Prof. Tadeusz Markowski, rector of the Rzeszów University of Technology, who emphasized that Prof. Michał Heller's title of doctor honoris causa of the Rzeszów University of Technology is an expression of the university's highest recognition «for the contribution of the professor to the development and promotion of science in the world and the effective joining science and spirituality».

Conference of Rectors of Academic Schools in Poland

2019-06-03

The implementation of the Act 2.0, and in particular the financing of Polish higher education and science were the main topics of the plenary meeting of the Conference of Polish Academic Rectors (KRASP), which on 30-31 May 2019 took place at the University of Warmia and Mazury in Olsztyn. The conference began with the speech of Jarosław Gowin, deputy prime minister, minister of science and higher education. - We worked on the law for three years. It was well prepared and well received by the academic community. It is now implemented without major perturbations. But without ensuring a minimum increase in funding, the Act 2.0 will certainly fail. The expenditures for financing Polish science and higher education should grow as soon as possible. That is why I ask KRASP to support my efforts to increase funding. At the same time, I am asking KRASP for the adoption of the Act 2.0. This is an indisputable condition, assuring the trust of the scholar environment for the government's actions - said Jarosław Gowin.

University of Warsaw to start accepting applications

2019-06-03

From 5 June, the University of Warsaw (UW) starts accepting applications for regular MA studies in the academic year 2019/2020. Persons interested in the offer of the university will be able to apply for selected majors through the online Registration of Candidates. The deadline is July 5. Candidates will be able to choose from almost 100 studies from various fields of sciences: humanities, social as well as science and natural sciences. They can also choose to study within inter-territorial programs or to be taught in English. Applications can be sent electronically - via the Internet Registration of Candidates (IRK) system. More: <https://www.uw.edu.pl/ksztalacenie/rekrutacja/>

Three Wrocław universities to create a platform for electronic services

2019-06-03

Three Wrocław universities - University of Life Sciences, Medical University and Academy of Physical Education will carry out the project „Platform of electronic services UPWr, UMW and AWF Wrocław - friendly e-universities”. The project assumes the creation of a multiportal IT system for e-services, which will be made available to students and the academic community, as well as to institutions and entrepreneurs cooperating with Career Offices and scientific units. The system will include e-services addressed to students, university staff as well as entities dealing with the human resources. Money for the task, PLN 5.5 million is allocated from EU funds to the Marshal's Office of the Lower Silesian Voivodship.

Seven scientists from Wrocław University of Science and Technology receive Start scholarships

2019-06-03

Seven young scientists conducting research at Wrocław University of Science and Technology have been awarded by the Foundation for Polish Science and received support from the Start program. This is the third best result for Polish universities. The laureates of scholarships from Wrocław University of Technology are: Dr Eng. Bartosz Błasiak (physical chemistry, chemical department); Dr Eng. Róża Goścień (computer science, electronics department); Dr Eng. Błażej Jaworowski (physics, faculty of basic problems of technology); Dr Eng. Piotr Klukowski (bioinformatics, faculty of computer science and management); Dr Eng. Adam Moysiewicz (chemical technology, chemical department); Dr Eng. Olga Rac-Rumijowska (electronics, faculty of electronics, microsystems and photonics) and Dr Eng. Wioletta Rut (chemistry, faculty of chemistry). The Start is the largest scholarship program for the best Polish researchers under 30. This year, the winners were selected from among 899 candidates. The annual scholarship is 28 thousand PLN.

State Higher Vocational School in Chełm to cooperate with the Lvov Technological University

2019-06-04

During a visit to Ukraine at the National Technological University's delegation of the State Higher Vocational School (PWSZ) in Chełm, headed by the rector of PWSZ in Chełm Dr Eng. Arkadiusz Tofil signed an agreement on mutual cooperation between both schools. The agreement, signed by the rectors of both universities for a period of 5 years, provides opportunities for future exchange of students and academic staff, exchange of information in the field of didactic programs, organization of joint programs and scientific conferences, and joint publication of research results. The National Technological University in Lvov is a university educating about 40,000

students. The authorities of both the Lvov University and the State Higher Vocational School in Chełm focus on the development of the latest technologies, modern education methods and innovativeness. In the coming days, the parties will present detailed proposals for cooperation for the coming academic year 2019/20.

Rzeszów University of Technology starts accepting applications for studies

2019-06-04

On June 1, 2019, Rzeszów University of Technology began accepting electronic applications for studies. The university has prepared nearly 5,300 places for first and second cycle studies. Future students can choose from 28 fields of study. The novelties include 7 courses taught in English and studies Sports management, Engineering and data analysis as well as Bioeconomy. Applications for management in sport will be carried out for first cycle studies. The course was created at the Faculty of Management in cooperation with the Center of Physiotherapy and Sport of the Rzeszów University of Technology. Engineering and data analysis are first-cycle studies with a practical profile and will be conducted at the Faculty of Mathematics and Applied Physics. Bioeconomy is an interdepartmental course led by the Faculty of Chemistry and the Faculty of Civil Engineering, Environmental Engineering and Architecture. More: <https://w.prz.edu.pl/uczelnia/aktualnosci/rekrutacja.prz.edu.pl>

Silesian University of Technology to cooperate with the Korean company LG Chem

2019-06-04

Silesian University of Technology will cooperate with the leader of the Korean chemical industry - the company LG Chem. The agreement aims to use the experience and scientific achievements of the Silesian University of Technology and the potential and position of LG Chem for further activities serving the good of the parties and the development of the region. Under the agreement, LG Chem Wrocław Energy Sp. z o.o. will present a list of proposed topics for diploma theses for the university students to enable them to write their diploma theses on the topics indicated by LG Chem and to carry out student internships. Silesian University of Technology will take into account the issues reported by the other party to the diploma thesis topics, will share the thesis with the consent of their authors, and the university staff will participate in selected research work. More: <https://www.polsl.pl/Lists/Aktualnosci/Uczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci&Page=2&WebPartTitle2=Number&Filter1Field2=Identyfikator&Filter1Value2=2727>

Jagiellonian University in Krakow to start accepting applications

2019-06-05

On Tuesday, June 4, graduates of secondary schools can submit their applications for the studies at the Jagiellonian University (UJ) in Krakow. The oldest Polish university has prepared a total of over 10,000 places: 8.9 thousand for first-cycle full-time studies and 1.3 thousand for part-time studies. Graduates of secondary schools can choose from 114 stationary and 12 extramural courses, including three new studies. The Jagiellonian University offers Sustainable development chemistry for 120 students. Education in pre-school and early-school education as well as African studies, which will give students the opportunity to specialize in the social, political and economic issues of this continent, will also start in October.

Program „Implementation of PhD theses” launched

2019-06-05

The program „Implementation of PhD theses” has started. Its aim is to create conditions for the development of cooperation between science and the socio-economic environment. A PhD student, participating in the program, gets a salary in the company in which he is employed and a scholarship, which amounts to PLN 4,450. The main assumption of the program is to prepare a PhD dissertation that will improve the operations of the company. A PhD student, working under the two scientific and industrial supervisors, is tasked with solving the technological problem faced by the company. The program is addressed to people starting PhD studies, however applications must be submitted by academic universities, scientific institutes of the Polish Academy of Sciences, research institutes or international scientific institutes operating in Poland - running a PhD school. University of Silesia begins accepting applications

2019-06-05

The University of Silesia in Katowice began acceptance of applications. The university in the academic year 2019/2020 has prepared a rich educational offer that will enable students to develop their passions and interests in the labor market. New courses include speech therapy; urban policies and public counseling; pre-school and early school education; special pedagogy and International Business Law and Arbitration - studies in English. Creative management in new media is to be accepted by Ministry of Science and Higher Education. The University of Silesia has made an online quiz „U-kierunkuj się”, where persons interested in taking up studies may answer a dozen questions and then receive a list of selected fields. The application is available at: www.ukierunkujsie.us.edu.pl

University of Humanities and Natural Sciences in Częstochowa to launch the course Music in public space

2019-06-05

University of Humanities and Natural Sciences in Częstochowa is launching a new study in the academic year 2019/2020 - Music in public space. It will be a three-year, full-time study. The university offers new specialties: artistic animation and stage music with the specialization of stage vocalists. Graduates of artistic animation will be prepared to work as a manager- animator of musical activity in cultural institutions, such as philharmonics, concert halls, cultural centers, music bands and in the media. Graduates of vocal studies will learn general musical preparation (including playing instruments, singing, ear training, music history, including jazz and light music) as well as knowledge and skills in the music, basics of conducting and harmony, improvisation and jazz arrangement. They will also be prepared to take individual artistic work. More: <http://www.ujd.edu.pl/news/view/muzyka-w-przestrzeni-publicznej-juz-w-maju-rusza-rekrutacja-na-nowy-kierunek-studiow-i-stopnia>

Vistula joined the universities that signed the Responsible Management Education Principles

2019-06-06

The Vistula Academy of Finance and Business and the Main School of Tourism and Vistula Hotel Management from Warsaw have signed the Principles of Responsible Management Education (PRME). Both universities have committed to develop such values as: sustainable development, responsibility and ethics in teaching, research and intellectual leadership. Thus, they joined the global community created by over 700 leading business and management schools from over 90 countries, whose mission is the education of responsible leaders of tomorrow. PRME - is the largest organized network connecting the United Nations with higher education institutions that educate in the field of business and management. It was established in 2007 as a platform to enhance sustainable development in schools and to educate responsible leaders of the future.

Professor Grzegorz Węgrzyn becomes the chairman of the Council for Scientific Excellence

2019-06-06

Minister of Science and Higher Education, Jarosław Gowin, appointed Prof. Grzegorz Węgrzyn to the position of the chairman of the Council of Scientific Excellence (DAM). He will lead the work of the council that will take care of the highest standards of quality of scientific activity required to obtain academic titles. The Scientific Excellence Council is a new organization that cares for the highest standards of scientific quality required to obtain academic titles. Ultimately, the DAM will replace the Central Commission for Titles in the supervision of individual promotion proceedings. Professor Grzegorz Węgrzyn was born in 1963 in Gdańsk. He is the head of the Department of Molecular Biology at the University of Gdańsk (UG). In the years 2002-2008 he was the dean of the Faculty of Biology, Geography and Oceanology of the University of Gdańsk,

and in 2008-2016 he was the vice-rector for science at the University of Gdańsk.

University of Gdańsk Publishers honored at the Academic Book Fair Academia

2019-06-06

The University of Gdańsk Publishing House was awarded in the prestigious ACADEMIA 2019 competition. The distinctions were given to the books „Dialogues of ancient works. Studies on the intertextuality of Old Polish literature” by Radosław Grześkowiak and „Aesthetics of Law” by Kamil Zeidler. The Academic Book Fair Academia takes place during the Warsaw Book Fair. This year's competition was unique - 51 publishers submitted over 138 books. «Dialogues of ancient works. Studies on the intertextuality of Old Polish literature» was awarded for editorial work, and «Aesthetics of Law» received the Rector of the University of Warsaw award for an academic publication in the field of social sciences and humanities.

Cooperation agreement between the University of Szczecin and the Social Insurance Institution

2019-06-06

The University of Szczecin formalized further cooperation with the Szczecin branch of the Social Insurance Institution. The agreement concerns partnerships in the field of scientific and research activities, running joint projects as well as didactic and scientific activities. The aim of the agreement concluded for five years is to build civic awareness in the field of social security, promote the idea of social solidarity on the level of shared responsibility, to promote knowledge about social security, joint organization of conferences and seminars, and cooperation in publishing scientific publications. The signatories of the agreement emphasize that cooperation on science and insurance practice provides the certainty for an effective combination of knowledge and experience in its application and allows the organization of socially valuable ventures.

Warsaw University of Technology to launch new courses in the educational offer

2019-06-07

In the academic year 2019/2020 Warsaw University of Technology (Warsaw University of Technology) will offer new courses to educate professionals to work in dynamically developing industries. Over 57% of companies, where PW graduates work, operate on the international market. Therefore, the university prepares a modern study offer, adapted to the requirements of the modern world. The educational offer 2019/2020 includes four new courses: Mathematics and data analysis (Faculty of Mathematics and Information Sciences), Electromobility (Faculty of Electrical), Cybersecurity (Faculty of Electronics and Information Technology) and Management of critical infrastructure security (Faculty of Management). More: <https://www.portalkandydata.pw.edu.pl/>

Kielce University of Technology to launch a new study Automation and electrical engineering

2019-06-10

Kielce University of Technology in Kielce is launching a new study and six new specialties. Automation and electrical engineering is a new study in the educational offer of the Faculty of Electrical Engineering, Automatics and Computer Science, which is to encourage candidates to study at the university and increase their chances to find an attractive job. Students who will complete Automation and electrical engineering will be prepared to work as an automatic-electrician, their knowledge will be adapted to the requirements of plants using automated and robotic production lines, vision systems, Industry 4.0 technologies and the Internet of Things. More: <https://tu.kielce.pl/start/dolacz-do-nas/internetowa-rejestracja-kandydatow-na-studia/>

Coimbra Group meets at the Jagiellonian University in Krakow

2019-06-10

From June 5 to June 6 2019, the Jagiellonian University in Krakow was holding a conference of representatives of the prestigious university network Coimbra Group. The Coimbra Group is a network of universities established in 1985, comprising 39 oldest and most prestigious universities in Europe. The organization's goal is to consolidate ties between the oldest universities in Europe with high standards of teaching and research. Coimbra Group universities cooperate within the working groups in order to develop academic solution in the field of student and employee mobility, research, as well as to shape European educational policy. The event started with an international conference «Women in the University - the past and the future». The aim of the conference was to assess the situation of women in universities and identify strategies that can help increase their role in the higher education sector and their contribution to the development of science.

Studia.gov.pl portal for students and PhD students

2019-06-10

The Ministry of Science and Higher Education gathered in one place all the most important information for students, PhD students - informed Katarzyna Zawada, spokesman for the Ministry of Science. The portal Studia.gov.pl will help in choosing the university and the field of education. Students can check where to study, the average salaries of the graduates of the chosen course and how many candidates apply for their chosen course. The studia.gov.pl website has three basic tools: the Search Engine Select Study, the ELA graduate earnings comparator and the ranking of the most popular courses. The portal does not only collect all the most important information for students in one place, concerning scholarships, credits, grant competitions or planning further academic career, but also delivers the most important and current information for PhD students. See: <http://studia.gov.pl/>

Larger admission limits for medical studies

2019-06-10

The Medical University of Lodz will accept more students to study medicine. The University of Lodz received a larger limit from the Ministry of Health in the call for the academic year 2019/2020. From October 2019, Łódź Medical University will accept 670 students for the first year of full-time medical studies. However, it should be mentioned that 150 places will be financed by the Ministry of National Defense. 520 places remain for future civilian doctors. Raising the limits of medical studies, paid in total by the state, applies not only to Łódź university. In the regulation from the previous year, the Ministry of Health allowed Polish universities to offer a total of 4,678 places, this year there will be 5122 places for medical students. The development of medical staff is very important from the point of view of the epidemiological situation of the country.

Project of the University of Gdańsk co-financed from the Interreg South Baltic Program

2019-06-10

The project „AquaVIP - a career development platform in aquaculture in the South Baltic region” implemented by a consortium of the University of Gdańsk, the University of Rostock and the University and Science and Technology Park in Klaipeda received over one million euros from the Interreg South Baltic Program. The main objective of the project is to strengthen the labor market in the aquaculture sector by developing cross-border training, building a network of contacts and strengthening business skills. The result will be a career development offer for students and young professionals, a vocational training network for professionals and a virtual platform with e-learning modules. The consortium's activities include dissemination of the image of modern aquaculture as a currently available source of protein production, creating a market for both farm products and modern technologies as well as professional education in the countries of the South Baltic region.

Student of the Nicolaus Copernicus University in Toruń receives a SPIE scholarship

2019-06-10

Beata Zjawin - a physics student at the Faculty of Physics, Astronomy and Applied Informatics at the University of Nicolaus Copernicus in Torun - has received a prestigious SPIE Optics and Photonics Education Scholarship. She is one of three Polish scholarship holders this year. SPIE is an international association for optics and photonics founded in 1955 to develop light-based technologies. It includes members from 166 countries. Every year, it grants scholarships to outstanding students who in the future can make a significant contribution to optics and photonics. The Toruń scholarship holder is on the first year of second-cycle studies in physics. She works in the CASTLE (Cold Atomic Space-Time Laboratory) group, deals with the search for dark matter with the help of optical atomic clocks. Zjawin has already published scientific publications.

„Pamela Mission” becomes the best educational initiative under the Global Space Balloon Challenge

2019-06-10

The „Pamela Mission” project, co-created by scientists of University of Silesia, became the best educational initiative within the Global Space Balloon Challenge 2019. The aim of the scientists is to check the impact of conditions in the stratosphere on living organisms and new materials. As part of the «Pamela Mission» project (Plant, Aranae and Microorganism Exposure to the Light Activity In the Near Space Environment) living organisms - microorganisms, spiders, spider eggs, selected barley seedlings and resistant Arabidopsis as well as hydrogel membrane for the construction of future spacecraft have been sent to the stratosphere (37 km high). The competition organized by the Stanford Space Initiative invites teams conducting stratospheric scientific experiments with the use of a balloon. It serves primarily to popularize the science and inspiration of future generations of scientists and engineers. More: <https://www.us.edu.pl/projekt-pamela-mission-najlepsza-edukacyjna-inicjatywa-w-ramach-global-space-balloon-challenge-201-0>

Program „A talented student - a great student”

2019-06-11

University of Lodz (UŁ) has completed the second program „A talented student - a great student”. 118 pupils from the entire Lodz region attended individual classes conducted by academic staff. The program «A talented student - a great student» provides the opportunity for secondary school students from the entire Lodz region can broaden their skills under the supervision of lecturers, use the university infrastructure and learn about the academic lifestyle even before the decision to choose a particular university. - We wanted to show our University as a place of realizing positive passions, as a great place for conducting research - said Prof. Tomasz Cieślak, vice-rector for student affairs of the University of Lodz, creator of the program. Submit an application to the program at: www.zdolnyuczen.uni.lodz.pl

Successes of the Silesian University of Technology at the XII International Fair of Inventions and Innovations of INTARG

2019-06-11

Four solutions submitted by the Center for Innovation and Technology Transfer of the Silesian University of Technology were awarded in the INTARG competition, which was organized as part of the International Fair of Inventions and Innovations of INTARG in Katowice's Spodek hall. The method of processing waste and laminated foils separated in the refining process from multi-material containers for liquid food of the TetraPak type has won the gold medal, the President's Cup of the Jury and the Cup of the President of the Polish Chamber of Ecology. The uFluidix microfluidic device and the way of conducting 3D cell cultures in conditions reflecting the in vivo environment won the gold medal and the special prize of the Croatian Association of Inventors. The nano-structured fibrous composite material with a polymer matrix with a reinforcing phase and the method of its production has won the gold medal, and the synthetic intra-thorax esophagus prosthesis and the way it is made won platinum medal of the INTARG competition.

Warsaw Medical University is a beneficiary of the „International Alumni” competition

2019-06-12

Warsaw University of Medical Sciences (WUM) received a co-financing amounting to nearly PLN 100,000 from the National Academic Exchange Agency for the implementation of the project „Medical University of Warsaw English Division Student Alumni (EDSA) Reunion” as part of the „International Alumni” competition. As part of the «Medical University of Warsaw English Student Alumni (EDSA) Reunion» project, the WUM will start cooperation with foreign university graduates and establish the EDSA association to promote the English Division of WUM

(ED WUM) and English Dentistry Division of WUM (EDD WUM) abroad. It will also undertake activities aimed at developing the sense of identity of foreign graduates with the Warsaw Medical University.

Lodz University of Technology to start accepting applications

2019-06-12

Lodz University of Technology (PŁ) will start accepting applications on June 14, 2019 for studies in the academic year 2019/2010. The university prepared 6,880 places in 53 courses. The first-cycle studies will accept 4,290 people and 1,505 for the full-time studies. The part-time limits for studies are 935 – for the first-cycle and 505 – for the second-cycle studies respectively. The novelties include: Automation and robot control as well as Applied IT, Chemical and biochemical engineering, Spatial planning, Networks and installations in environmental engineering. The last four directions are also proposed at the second level studies. The Faculty of Process Engineering and Environmental Protection plans to run a second-cycle studies in English-Energy Systems in the Built Environment.

Oświęcim State Higher Vocational School to launch the Monoprofiled Center of Medical Simulation

2019-06-13

On 10 June 2019, Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin, Minister of Entrepreneurship and Technology Jadwiga Emilewicz and Deputy Minister of Health Józef Szczurek-Żelazko, launched the Monoprofiled Center of Medical Simulation at the State Higher Vocational School in Oświęcim. The center consists of seven rooms representing the full hospital environment. It is the first and the most modern Center in western Małopolska Region and will be a didactic base for students of nursing. - We can proudly say that nurses in Poland will be educated at the global level. Thanks to the Medical Simulation Center, we can guarantee that if disaster comes, the patients will be cared for by nurses educated at the highest possible level- said Deputy Prime Minister Jarosław Gowin.

Ministry of Science allocated PLN 2 million to build a security system for the facilities of the Catholic University of Lublin

2019-06-13

The Catholic University of Lublin (KUL) has received PLN 2 million for implementation of investment projects under the project „Construction of security systems for KUL buildings.” Agreements for obtaining funding were signed by Deputy Minister of Science and Higher Education Prof. Andrzej Stanisławek and Rector of the Catholic University of Lublin Prof. Antoni Dębiński. As part of the project, the IP video monitoring system will be expanded by approx. 500 cameras with recorders and the necessary teletechnical infrastructure as well as a system for securely issuing keys in selected facilities. The university's own contribution is 500,000 PLN. The implementation of the system is to improve the safety of students, employees and visitors visiting KUL.

University of Gdańsk to cooperate with the Chartered Institute of Management Accountants

2019-06-13

The University of Gdańsk and the Chartered Institute of Management Accountants (CIMA) have signed a letter of intent regarding future cooperation. The agreement was signed by: vice-rector for development and cooperation with the economy, Prof. Krzysztof Bielawski and CIMA regional director for Europe Jakub Bejnarowicz during the ceremony honoring the hundredth anniversary of the Institute's establishment. Thanks to this cooperation, the students of the University of Gdańsk will be able to obtain the CIMA Professional Qualification recognized worldwide, and through the CIMA connection with the American Institute of Certified Public Accountants (AICPA) - Chartered Global Management Accountant (CGMA). The CIMA Institute of Management Accounting was established in 1919 in London and is a leading professional organization

associating specialists in the field of management accounting, numbering over 232 thousand members and students in 184 countries.

Agnieszka Piotrowska-Kirschling from the University of Gdańsk becomes the most talented student of Pomerania

2019-06-13

Agnieszka Piotrowska-Kirschling, second year student of chemistry at the second-cycle studies at the University of Gdańsk won the 45th competition of the Red Rose for the best student from Pomerania. Her prize was a car. Her scientific interests focus on the study of complex compounds with potential biological effects. She is the author of several publications in high-ranked scientific journals (also from the so-called list of Philadelphia journals), and the total Impact Factor for her publication is 17,161. Agnieszka Piotrowska-Kirschling participated in numerous seminars and scientific conferences, during which she presented several papers and posters. She has been a member of the Polish Chemical Society since 2015. Privately, she is passionate about playing the piano and guitar (she graduated from the 1st degree music school). More: <https://youtu.be/ocQgv61NMe4>

University of Economics in Katowice to hold a conference on the protection of consumer interests

2019-06-13

On 16 to 18 June, the University of Economics in Katowice will host an international conference promoting the results of the didactic project „Enhancing Quality in Innovative Higher Education on Consumer Consciousness: Consume-aware.” The University of Economics is the leader of a consortium of 8 European universities implementing the project. The aim of the conference is the exchange of ideas, views and the latest research on the protection of consumer interests on the European market, as well as the integration of the scientific community from Poland and the world

interested in consumerism, sustainable consumption and social economy. The project received funding through a competition announced by the European Commission under the Erasmus + Higher Education program in the Strategic Partnerships campaign. More: https://www.ue.katowice.pl/no_cache/uczelnia/aktualnosci/article/international-didactic-conference-on-enhancing-consumer-awareness.html

New rector of the State Higher School in Biała Podlaska

2019-06-14

On June 12, 2019, the Electoral College elected a new rector of the State Higher School (PSW) in Biała Podlaska- Prof. Jerzy Nitychoruk. So far he was the dean of the Faculty of Economic and Technical Sciences of the PSW. - Previous actions of the late Rector Józef Bergier resulted in winning the first place in the „Perspektywy” ranking and the „A” and „B” categories three times in the process of evaluating the faculties of our university. This clearly demonstrates the right strategic assumptions adopted by our university and should be continued in the next rector's term of office - said the rector before the election. He also announced the creation of a friendly environment for students to study, and for employees to create a safe and development-friendly workplace.

State Higher Vocational School in Ciechanów to launch a new course

2019-06-14

The State Higher Vocational School in Ciechanów is launching master's studies in the next major – Management at full-time and part-time form of studies. The Ciechanow School has already had the right to conduct regular, full-time MA studies with the practical profile: Pre-school and early-school education. Within the Management studies, two specializations will be launched: Business Management and Financial Management. The graduate will gain managerial skills necessary to manage a production or service enterprise of small or medium size as well as government and self-government administration bodies.

Cardinal Stefan Wyszyński to launch Interdisciplinary Research Network on Migration

2019-06-14

The Interdisciplinary Network for Migration Research is a new initiative of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw. It will enable the use of research to educate the public and implement specific initiatives on the subject of migration by the non-governmental sector. The Migration Research Network has not only scientific character but it also integrates various areas of social life: education at various levels of the education system, public administration and media. The Network's tasks include exchange data on migration in Poland, Europe and the world, providing mutual scientific promotion of universities and researchers, obtaining grants for scientific projects and organizing internships at universities.

Researchers from the Lublin University of Technology scanned objects in Central Asia

2019-06-14

Scholars of the Institute of Informatics of the Lublin University of Technology (PL) returned from a two-week trip to central Asia, where they conducted research and classes with students and participated in seminars and conferences. Lublin scientists took with them over 25 kg of specialist equipment, including 3D scanners, laptops with high computing power, cameras and photographic equipment. - Our task was to provide three-dimensional scanning of museum and archaeological objects. This is especially important for the reconstruction of damaged or destroyed historic items - says Prof. Jerzy Montusiewicz from the Institute of Computer Science. The scientists took scans from the paintings on stones, sculptures of Buddha, buildings of Islamic culture, and even costumes of rulers of nineteenth-century Khanate states.

Kozminski Academy becomes the School of Investment Champions TMS Brokers

2019-06-14

The victory of the students of the Academic Club „Kapitalni” of Kozminski Academy (ALK) from Warsaw brought ALK the title of the School of Investment Champions TMS Brokers. The competition for School of Investment Champions TMS Brokers is an opportunity for students to understand the rules governing the capital market and learn how to invest in practice. Its participants had the opportunity to invest a virtual amount of PLN 10,000 available on their trial brokerage account in a mobile application. Each student could invest it in any instruments, such as currencies, stock market indices, contracts for shares or commodities. It was the first such competition and 6 Polish universities took part in it.

University of Warsaw is the best Polish university in 2019

2019-06-14

The University of Warsaw took first place in the XX Ranking of Universities Perspektywy 2019 before the Jagiellonian University and the Warsaw University of Technology. In the group of non-public universities, the Kozminski Academy in Warsaw was the best. The ranking includes 29 indicators grouped into seven criteria: Prestige, Graduates in the labor market, Scientific potential, Scientific effectiveness, Scientific potential, Innovation and Internationalization. It is one of the most extensive and most transparent educational rankings in the world. It is also one of four rankings that have the international quality certificate «IREG Approved». The next positions in the ranking were taken by Kraków's AGH University of Science and Technology, University of Adam Mickiewicz University in Poznań and the Wrocław University of Science and Technology. More: <http://ranking.perspektywy.pl/RSW2019/>

Researcher from the University of Lodz becomes laureate of the Polish Intellectual Development Award 2019

2019-06-17

Dr Anita Ciesielska, from the Faculty of Biology and Environmental Protection of the University of Lodz (UŁ), became a laureate of the Polish Intelligent Development Award 2019 in the category of the Scientist of the Future. The project «Analysis of the expression of dermatophyte virulence factors in response to selected carbon sources» awarded by the Center for Intelligent Development is financed by the National Science Center as part of the SO-NATA-12 competition. - I study the interaction between the fungus (dermatophyte) and the host cells (epidermis, hair, nails). I am looking for the way how the fungus settles human skin and causes mycosis - explains Dr Ciesielska.

Lodz University of Technology to launch new courses Automation and robot control

2019-06-17

On Friday, June 14, 2019 Lodz University of Technology started accepting applications for studies in the academic year 2019/2020. The new course available for secondary school graduates is Automation and robot control. The Lodz University of Technology has prepared 4,290 places for full-time first-cycle studies for pupils who passed final exams and 1150 places for second-degree stationary degrees, most often available for engineers. PŁ as a novelty presents automation and robot control. The studies will be conducted at the Faculty of Electrical Engineering, Electronics, Computer Science and Automation.

Catholic University of Lublin to launch Center for Social and Economic Analysis

2019-06-17

The Faculty of Social Sciences of the Catholic University of Lublin (KUL) created the first research agency in the country not only created by academic staff, but also operating in university structures. The Center for Social and Economic Analysis is a full-service agency offering multi-faceted research for business entities, public institutions and the scientific community. CASiE team members are specialists in economics, psychology and sociology, supported by professionals in the area of social communication, marketing, mathematics, pedagogy, public relations, statistics and management. The Center offers research on the motivation and attitudes of consumers, brand image, effectiveness of advertising campaigns, employees satisfaction, as well as qualitative and quantitative research for scientific projects.

University of Warmia and Mazury awarded for the Legia Akademicka program

2019-06-18

The University of Warmia and Mazury (UWM) in Olsztyn took the first place of 64 Polish universities that joined this year's „Legia Akademicka” program. The organizer of the voluntary military training of UWM students is the Faculty of Humanities. For the first place, the University of Warmia and Mazury was honored by the Ministry of National Defense with a memorial gorget and a congratulatory letter. A year ago, 500 UWM students applied for the program, 290 joined the practical part and 260 successfully completed the training. This year there were fewer participants- 360, but more people will undergo military training- 310 students. The „Legia Akademicka” program will be implemented until 2021.

Graduates of the AGH University of Science and Technology are more multimillionaires

2019-06-18

AGH University of Science and Technology in Krakow, University of Warsaw (University of Warsaw) and Warsaw University of Technology (PW) boast the richest graduates, whose property exceed 100 million euros individually. The authors of the ranking, Pracownia ekonomiczna 2033, rely on the number of graduates of a given university, whose assets exceed EUR 100 million. The winner- AGH, has taught ten such graduates, the second in the UW -eight, the third place was taken by the Warsaw University of Technology with six graduates. The fourth place is shared by four universities. It is the Silesian University of Technology in Gliwice, the University of Wrocław, the Wrocław University of Science and Technology and the Technical University of Lodz. They have three such graduates.

University of Warmia and Mazury to become a research university

2019-06-18

The University of Warmia and Mazury in Olsztyn has the opportunity to advance in the next three years from the status of a regional university to the status of a research university - said Sebastian Skuza, deputy minister of science and higher education. Deputy Minister Skuza took part in the meeting of vice-rectors for financial affairs of regional universities organized at the University of Warmia and Mazury. The new parameterization of the university will be taken in 2021. So there is still time for all disciplines at the University of Warmia and Mazury to get up at least to the B + rating, which is the starting point for promotion to the «better league» - said Deputy Minister Skuza.

Competition for the publication of a promotional article in Times Higher Education

2019-06-18

The National Academic Exchange Agency (NAWA) invites Polish universities and scientific units to the competition for the publication of a promotional article. The aim of the competition is the international promotion of the Polish area of higher education and science by creating the possibility of publishing the article on the international portal dealing with the subject of higher education and science - Times Higher Education. To participate in the Competition, it is necessary to send an article to the following address by 30 June 2019: media@nawa.gov.pl promoting an individual submitting a competition entry or Poland as an attractive destination for studying. The article may refer substantively to an academic unit or a selected area of study / research or to study values in Poland. Works must be prepared in English and their volume must not exceed 700 words.

Krakow University receives the title of a Fair Trade School

2019-06-19

The Pedagogical University of Krakow is the first university in Poland that received the title of a Fair Trade School. Obtaining the title of a Fair Trade School is related to the fulfilment of many criteria, including both the declaration of support for Fair Trade by the university authorities, as well as activities building the awareness of students and academic teachers in the area of Fair Trade and responsible consumption. The initiator and coordinator of activities related to the campaign for two years was the Pro Universitas Foundation. The fulfilment of the criteria is the result of a campaign promoting Fair Trade within the university. In subsequent years, the UP in Kraków intends to promote the subject of Sustainable Public Procurement.

State Higher Vocational School in Płock to launch new studies

2019-06-19

From June 17, 2019, students can apply for new courses at the State Higher Vocational School (PWSZ) in Płock. The university offers over a dozen courses at various levels of education: bachelor's, engineering, Master's level studies with thirty specialties. From the middle of October, the PWSZ is launching new faculties: Internal security with public administration and Management. In social science, two new specializations will be launched: Rehabilitation with social prevention and Support for people with disabilities and seniors. Two courses: Pre-school and early school education, as well as Special pedagogy are new studies within Master's program.

Jagiellonian University in Krakow has the best law faculty

2019-06-19

The Faculty of Law and Administration of the Jagiellonian University in Krakow won the 8th ranking of law departments prepared by the journal „Rzeczpospolita”. In the category of public universities, the second place in the list was taken by the Faculty of Law and Administration of the University of Warsaw and the third by Faculty of Law of the University of Silesia. In the category of non-public universities, three Warsaw universities were the best. The first place was taken by SWPS University of Humanities and Social Sciences, Lazarski Academy took the second place. The Kozminski Academy was the third.

Deputy Prime Minister Gowin: Polish universities need deep reforms

2019-06-19

- If we want to develop a prosperous society, a modern economy and a functioning state in Poland, we must also ensure our universities functioning in the spirit of the 21st century, not the 19th century

– said Deputy Prime Minister, Minister of Science and Higher Education, Jarosław Gowin. Polish universities are attached to traditional solutions. The position of our universities in global rankings shows that deep reforms are necessary. Besides, academic centers in Europe and around the world are subject to change. There is fierce competition. Who cares only about the maintaining status quo situation will lose - added Deputy Prime Minister Gowin. In the opinion of the head of the Ministry of Science, «the period of broad social transfers is ending», and Poland should concentrate on what ensures long-term economic and civilization development. - Without investment in science, the pace of our development will slow down in the next few years - said Deputy Prime Minister Gowin.

Maria Curie-Skłodowska University in Lublin to award Professor Michał Śliwa honorary doctorate

2019-06-21

Rector and Senate of the Maria Curie-Skłodowska University (UMCS) in Lublin on June 26, 2019 will award Prof. Michał Śliwa - an outstanding political scientist and historian, specializing in the history and ideas of political doctrines the title of doctor honoris causa UMCS. Professor Michał Śliwa is one of the most valued figures in the academic environment of social sciences in Poland and abroad. He made a significant contribution to the development of the history of political science. He is an outstanding historian of ideas, author of the semantics of the history of ideologies and political doctrines in Poland and Germany. He is the author of 300 publications, including over 20 monographs and many biographies of the politicians, including Ignacy Daszyński, Mieczysław Niedziałkowski, Jan W. Machajski, Feliks Perl and Jan Strzelecki. Until 2016, he held the position of the rector of the Pedagogical University National Education Commission in Krakow.

Polish Institute of Economics to launch a report Academicity of Polish cities

2019-06-21

In 97 Polish cities there are 369 higher education institutions with 1.3 million students studying at them, of which 235.5 thousand study in Warsaw. Analysts of the Polish Economic Institute have pointed out that the most academic cities in Poland are Warsaw, Kraków, Poznań and Wrocław. The report „Academicity of Polish cities” prepared by the Polish Economic Institute shows that a university does not guarantee the inflow of young people. Students focus less on the high standard of teaching and the prestige of the institution, and more on the offer of courses, and precisely whether they are consistent with their interests and future-oriented. The five most important factors included the ease of finding a job in a given city or the costs of studying. An attractive job market along with high wages also determines whether students are planning their future in the city in which they have obtained education. More: http://pie.net.pl/wp-content/uploads/2019/06/PIE-Raport_Akademicko%C5%9B%C4%87.pdf

University of Warsaw becomes Academic Polish Champion

2019-06-21

The University of Warsaw (UW) won in the general classification of the Academic Polish Championships. Athletes from the AGH University of Science and Technology in Kraków took the second place and the third place was received by the Gdańsk University of Technology. The victory in the general classification gives the University of Warsaw the title of the Academic Polish Champion. This year teams from the University of Warsaw have won the team classification six times in beach volleyball, which was the last competition in this year's championship. They also got the second place six times. Last two years, the results of the general classification looked the same. The Polish Championships have been held since 1961. Until 2007, it was held under the name of Polish Higher School Championships. This year, the organizer of the championships, the Academic Sports Association, celebrates the centenary of existence. Currently, this nationwide association of academic athletes associates over 250 clubs.

Polski Koncern Naftowy Orlen awarded scholarships for 44 Polish students from the East

2019-06-21

- We help talented Polish students from the East! We funded a scholarship for 44 young Poles studying in our country, who came from Kazakhstan, Belarus, Moldova or Ukraine – wrote in Twitter Daniel Obajtek, the president of PKN Orlen. The company, through its Orlen - Dar Serca foundation, has been paying individual scholarships to descendants of Poles from the East since last year. Initially, nine people studying in Poland received the assistance. They were paid PLN 800 a month from October to December. This year, the foundation expanded the program, granting support to 44 students.

Researchers from the Warsaw University of Life Sciences investigating mosquitoes on the Vistula River

2019-06-21

Dr Daria Sikorska from the Faculty of Civil Engineering and Environmental Engineering of the Warsaw University of Life Sciences, together with a team of researchers from the Independent Applied Entomology Institute and coworkers from Great Britain, conducts research on the mosquitoes in the Vistula riverbank in Warsaw. Scientists are investigating mosquito larvae in water reservoirs that appeared after the Vistula's waters have disappeared. They also use drones to determine the range of potential egg-laying sites. Researchers found three species of mosquitoes that are very similar to each other, although they differ slightly in preferences to the habitat in which they reproduce. The most troublesome insect at the moment is the most numerous *Aedes vexans*, which usually lays eggs in temporary water reservoirs, for example remaining after water flooding, which are currently observed on the Vistula River. Scientists from WULS-SGGW also want to learn how the mosquitoes affect people who rest on the Vistula, so they ask for the survey to be completed: <https://forms.gle/3b1C7BKDhc6TUWX66>

Koszalin University of Technology to cooperate with Goodvalley

2019-06-24

Koszalin University of Technology has signed a cooperation agreement with Goodvalley. The agreement concerns the implementation of apprenticeships by students and paid internships in plants and farms owned by the company. The company also plans to support students in the preparation of diploma theses. The contract concerns 800 students of five faculties of the mechanical faculty: food technology and human nutrition, energy, mechanics and mechanical engineering, management and production engineering as well as transport. Goodvalley representatives declared their willingness to participate in shaping the study program so that they would

be even more adapted to the needs of future employers. In this way, the company will co-decide on the scope of competences acquired by students. The Danish company Goodvalley, operating in Denmark, has been operating on the Polish market since the early 1990s in the agricultural and food processing industry. It also runs biogas plants. In Poland, its plants are located in Przechlewo.

Four majors of the Wrocław University of Science and Technology become the best in Poland in the Perspektywy ranking

2019-06-24

With four best majors in Poland, the third position among technical universities, the sixth place in the general classification and the first place in Lower Silesia, the Wrocław University of Science and Technology advanced in the latest ranking of higher schools- Perspektywy 2019. This year, for the first time, the results of the nationwide ranking and summarizing the best teaching trends were announced simultaneously. In this ranking four majors of the University turned out to be the best nationwide. The winning majors include Architecture, construction and chemical technology in the category of technical and engineering faculties, and spatial economy in the category of social sciences. For the eleventh time the Wrocław University of Technology became the best university in Lower Silesia. Also it is one of the best Polish technical universities, ranked just after the Warsaw University of Technology and the AGH University of Science and Technology in Krakow.

Gdańsk University of Technology advances in the Ranking of Universities Perspektywy 2019

2019-06-24

The Gdańsk University of Technology advanced to the highest position in the history of the most prestigious academic ranking in Poland. The university reached the seventh place, advancing two positions from 2018 and maintained the fourth place among technical universities. - We have been in the top ten universities of the ranking for the last two years. Achieving further promotion at this highest level is extremely difficult, that is why I thank all our academic staff involved in the continuous improvement of quality. Without you this success would not be possible - said Prof. Krzysztof Wilde, rector of the Gdańsk University of Technology. The ranking is based on the criteria of prestige, innovation, scientific potential, scientific effectiveness, educational conditions, internationalization of studies and the position of graduates in the labor market.

Researcher of the Bydgoszcz University receives the grant from the National Science Center

2019-06-24

Dr Igor Chybicki from the University of Casimir the Great in Bydgoszcz won PLN 540 thousand within the OPUS call organized by the National Center for Science for his project „The scope and route of gene dispersion in metapopulation of a coniferous tree sown by a bird”. Thanks to the use of genetic methods of determining parenthood, similar to the methods used in forensic genetics, it is possible to learn whether naturally renewing yew seedlings are the result of the spread of seeds and pollen between populations, and whether the distance of seed distribution depends on the abundance of the breeding (i.e., the quality of the feed base of birds that shed seeds). The 3-year project will be implemented at the Department of Genetics (Institute of Experimental Biology, Faculty of Natural Sciences) in cooperation with the Instituto Nacional de Investigación y

Tecnología Agraria y Alimentaria in Madrid and the University of Agriculture in Krakow.

University of Wrocław to launch a Campaign for clean air

2019-06-24

The Institute of Geography and Regional Development of the University of Wrocław begins the project „Do you know what you breathe? - education and information campaign for cleaner air - LIFE-MAP-PINGAIR / PL „. The project is financed from the European Commission funds under the LIFE financial instrument and the National Fund for Environmental Protection and Water Management. The project combines scientific and practical aspects to meet environmental and social needs, such as improving air quality or universal access to reliable information on air pollution in their places of residence. The subject of the project refers to the main research problems in Poland and is part of the assumptions of the EU environmental policy. The total project budget is over PLN 8.2 million. The venture partners include Wrocław University of Science and Technology and Wrocław Network and Supercomputing Center and the City Hall of Bydgoszcz.

Gdańsk University of Technology and Sopot signed a license agreement for the use of Accessibility Standards

2019-06-24

Sopot is the fifth city in Poland that will use the Accessibility Standards developed at Gdańsk University of Technology to design public spaces in order to create a friendly space for all users, in particular people with disabilities. Accessibility Standards contain necessary information and solutions to design and modernize public space in accordance with the principles of universal design in order to unify solutions used in the city. They refer to Polish legal regulations as well as standards of EU. By signing the contract, Sopot joined the group of cities that want to be residents-friendly in terms of creating spatial conditions that facilitate the use of public places

for the elderly and disabled people, parents with a baby in a wheelchair, pregnant women, and people with temporary mobility limitations. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGNcmo-Qv7K0/content/politechnika-gdanska-i-sopot-podpisaly-umowe-licencji-na-opowiana-ze-standar-dow-depeptosci

Silesian University of Technology to launch Summer school at the Institute of Physics

2019-06-24

The Institute of Physics, Scientific and Didactic Center (CND) of the Silesian University of Technology are organizing a summer school „Applied Physics in: archeology, geology, material engineering, environmental engineering”. Summer school courses are scheduled from 24 to 28 June and they will be attended by secondary school graduates. The main objective is to familiarize students with the subject of research conducted at the Institute of Physics of the Silesian University. The school will start on June 24 and will last until June 28. The lectures are to help participants learn about physics but also about the possibilities of its application to solve problems faced by scientists. During the course students will visit specialized laboratories of the Institute of Physics and participate in practical workshops conducted by the Institute's specialists.

Architecture department of the Silesian University of Technology takes the 1st place in the Top 10 for the Future competition

2019-06-25

The architecture faculty of the Silesian University of Technology took the first place in the Top 10 for the Future ranking, organized by the journal Builder monthly. The criteria for the evaluation of faculties included: the number of lectures, exercises, case-studies, workshops, consultations and competitions organized as well as all the initiatives of scientific groups and student groups. The prizes were also won by individual students. In the Young Architect Manifesto competition, the second prize was received by Bartosz Słomka for his work «Tunnel». The awards were also received by Wojciech Szkarłat for the work «Sport & Living Hybrid», Marta Błaszczuk and Kacper Kania for the work «GlazeNet» and Katarzyna Przybyła for the work «Genesis - Oceanization, Scientific and residential base». In addition, Marta Lata and Mateusz Pietryga, students, who have earlier cooperated within the work «Playground for Architects» with graduates Dobrochna Lato and Agata Czechowska, won the award in the Young Architect's Challenge competition.

Scientists of the University of Life Sciences in Wrocław visit Spitzbergen

2019-06-25

Scientists of the University of Life Sciences in Wrocław (UPWr) are implementing a scientific project whose main assumption is to determine the possibility of using microscopic fungi to assess the environment in the aspect of climate change. Research is conducted in high-mountain conditions, and the polar areas. For this purpose, Wrocław researchers chose the largest island of the Norwegian archipelago Svalbard - Spitzbergen. Research works are funded from the «BioSciUniversity» project financed from the program of the Minister of Science and Higher Education «Strategy of Excellence - University of Research» and are conducted by Dr Wo-

jciech Pusz from the Plant Protection Department and Dr Jacek Urbaniak from the Department of Botany and Plant Ecology. More: http://www.glos.upwr.edu.pl/aktualnosci/49527/nasi_profesorowie_na_spitzbergenie.html

Poznan University of Technology develops cooperation with Huawei

2019-06-25

Poznan University of Technology and Huawei signed a contract under which the company will provide the university with the latest, high-class ICT devices. The partners also initiated the first Huawei ITC Competition in Poland. Cooperation between partners has been developed since 2015. New equipment in the laboratory of the electronics and telecommunications department will give students and university staff the chance to acquire knowledge and skills necessary to design, configure and run modern computer networks. The variety of devices will also allow them to explore security issues and wireless networks based on a operation of central controller. The Huawei ITC Competition last year attracted 40 thousand participants from over 800 universities and colleges. Its goal is not only to discover the talents of the ICT industry and prepare them for professional work, but also to equalize the level of knowledge and skills in line with global standards. More: <https://www.put.poznan.pl/en/aktualnosci/pp-rozwija-wspolprace-z-huawei>

Students of the Adam Mickiewicz University research the equatorial forest in Uganda

2019-06-25

Students of the biology department of the Adam Mickiewicz University in Poznań are flying to Uganda for the course of Tropical Biology. Participants will have the opportunity to learn about the unique equatorial forest environment located in the Kibale National Park. Students will be acquainted with the methodology of research of primates, birds, insects and other invertebrates through observation, film-

ing, recording, catching, measuring and analyzing results. All this will contribute to a better understanding of the phenomenon of the tropical biodiversity boom. Classes are organized for Biology students, selected through a competition. The trip is financed in full by the faculty and Rector's authorities. They will be led by university specialists dealing with insects, primates and birds. In the future, the course will include students and researchers from other faculties.

Wrocław University of Environmental and Life Sciences is the best agricultural university in the Perspektywy ranking

2019-06-25

Wrocław University of Environmental and Life Sciences took the 1st place in the segment of agricultural universities and the 22nd place of all universities in Poland in the „Perspektywy” ranking. Veterinary and Food science and nutrition are its best majors in the ranking. - Our 22nd place of all academic institutions in Poland is a huge advance; last year our university took the 34-th place. Seven categories were assessed: scientific effectiveness, scientific potential, internationalization of studies, number of graduates in the labor market, prestige, educational conditions and innovation. Perspektywy Ranking also conducted a ranking of the best studies, taking into account the quality of accepted graduates, the economic future of graduates, the qualifications to award academic titles, academic titles, scientific publications of teachers, number of quotations, foreign students, patents and protective rights. In this category Veterinary and Food science and nutrition were at the top of the list. More: http://www.glos.upwr.edu.pl/aktualnosci/49543/upwr_w_rankingu_na_pierwszym_miejscu_w_swojej_kategorii.html

Executive MBA program of the University of Economics in Poznań receives AMBA accreditation

2019-06-26

The Executive MBA program UEP (in Polish) of the University of Economics in Poznań received the international accreditation of the Association of MBAs (AMBA). From now on, all MBA programs run by the university are distinguished by this prestigious accreditation. The University of Economics received the AMBA accreditation for the first time in 2008 for the Executive MBA program Poznań-Atlanta. This program has already successfully passed the re-accreditation procedure twice, each time receiving AMBA accreditation for the longest possible period of 5 years. Another re-accreditations, during which both MBA programs conducted by the university will be re-assessed, are planned for 2023. Association of MBAs is based in London since 1967. AMBA accreditation is recognized as the most prestigious accreditation in the world dedicated to the Master of Business Administration programs. Only about 2 percent the best business schools in 70 countries around the world have received AMBA accreditation.

Silesian University of Technology to launch Cybersecurity studies

2019-06-27

The Institute of Computer Science, the Institute of Automatic Control and the Department of Industrial Informatics of the Silesian University of Technology have launched a new specialty – cybersecurity within a second-cycle program (3 semesters) in the faculty of industrial IT in Katowice. The new specialty gives the applicants the opportunity to acquire unique qualifications, and the studies will be conducted at the highest level, by the best specialists in this field, including lecturers from abroad. Specialist in the field of cybersecurity is one of the ten most wanted professions in Poland in 2019, and experts in the field of cyber security in organizations and enterprises are listed in the second place.

Kazimierz Wielki University in Bydgoszcz to launch Criminology

2019-06-27

In October, students of the Kazimierz Wielki University in Bydgoszcz will be able to begin their studies in the criminology. This is a new direction tailored to the current needs of the labor market. Applications can be submitted until July 14. Criminology is an interdisciplinary knowledge of crime and other pathological phenomena that occur in the reality of today. Graduates of the new direction will find work in law protection institutions, inspections and guards, but also in the private sector of persons and property protection as well as in detective companies. The course is characterized by a well developed, consulted with practitioners, an attractive set of subjects including cases of assassinations, forgery, kidnapping, rapes, pedophilia, prostitution, organized crime, drugs traffic, economic crimes, but also suicides, victimology, forensics and criminal law.

Projects of the Pomeranian Medical University in Szczecin receive funding from the National Science Center

2019-06-27

Researchers from the Pomeranian Medical University in Szczecin won funding for three projects as part of the OPUS competition of the National Science Center. All projects will be implemented in a consortium with other universities. Thanks to the financing, the research «Comprehensive analysis of factors determining the course and clinical consequences of tick-borne encephalitis» will be carried out within a scientific consortium with the Medical University of Białystok; »Optimization and analysis of the biological effect of the electromagnetic field on production support and activity of bacteriophage preparations» will be developed by a scientific consortium with the West Pomeranian University of Technology in Szczecin; «The importance of microflora and permeability of the colon barrier in the pathophysiology of schizophrenia - in the search for conditions of subliminal inflammation and metabolic dysregula-

tion» - by a scientific consortium with the Medical University in Wrocław.

Adam Mickiewicz University in Poznań comes third of universities in the Perspektywy ranking

2019-06-27

The Adam Mickiewicz University in Poznań (AMU) took the third place of Polish universities in the Perspektywy ranking. In the general classification of high schools, the Poznań University is the fifth university. - I am also glad that 6 studies at UAM have been recognized as the best-taught courses in Poland and this also confirms the high level of education at UAM. The best courses are: foreign philology and linguistics, biology, Polish philology, pedagogy, special pedagogy and tourism and recreation - says the rector of UAM, Prof. Andrzej Lesicki. The Rector adds that the system of financing science does not prefer the humanities and social sciences today, and the ranking criteria favors technical universities - Of course, we follow the results of rankings, we also know our strengths and prepare a strategy for strengthening the position of UAM in Poland and of course in international rankings - summarizes Prof. Lesicki.

Maritime University in Gdynia to carry out the project „Education matters”

2019-06-27

The Maritime University of Gdynia will carry out the project „Education matters”. The project will be financed from the Operational Program Knowledge Education Development. As part of the project, it is planned to create two new specialties (modules): Clinical Dietitian, and Manager of Management Systems - with a program that will also be implemented in English. In addition, it is planned to improve the competences of the teaching and administrative staff through the participation of employees in a series of specialized trainings. In addition, an IT system supporting management activities at the university will be implemented. The project will start in June.

Academy of Land Forces in Wrocław wins the State Security Leader statuette

2019-06-28

The Academy of Land Forces in Wrocław won the statuette of State Security Leader. Awards were given during the gala at the Conference Center of the Polish Army in Warsaw. The Academy of Land Forces together with consortium partners Smart Nanotechnology and BizGate Aviation were awarded in the Innovative Product category, for the Flatflyer Unmanned Aerial System using in tactical operations of ground troops. The aim of the competition organized by the Association of Suppliers for Uniformed Services is to honor the achievements of Polish entrepreneurs, research institutes and the universities for the innovating products and processes, development of modern technologies and design solutions in the development and modernization of military and state security equipment, contributing to the development of the country's defense potential.

Polish-German project implemented at the University of Environmental and Life Sciences in Wrocław

2019-06-28

Wrocław University of Environmental and Life Sciences and the Christlich-Soziales Association Bildungswerk Sachsen e.V. (CSB) will implement the project „Network of nutritional education for the sustainable development of the Euroregion Nysa”, whose main task is the exchange of experience, transfer of scientific knowledge and intensification of cooperation between entities from Poland and Saxony. The leader of the project is CSB, which was established in 1991 and for many years has been involved in topics related to healthy and balanced nutrition. The Center of Nutrition and the Herbs of the Monastery Marienstern, as well as at the Farm for Children and Youth in Hoyerswerda, are organizing lessons for pupils and adult seminars. The project assumes developing educational offers for various target groups and building a bilingual online platform. An important element will also be the creation

of the Didactic Center in Radomierz and improvement of educational conditions at the Farm for Children and Youth in Hoyerswerda. More: http://www.glos.upwr.edu.pl/aktualnosci/49587/upwr_i_stowarzyszenie_z_saksonii_dla_zywnosci.html

Academy of Physical Education in Katowice again wins in the Perspektywy ranking

2019-06-28

Academy of Physical Education in Katowice for the second time won in her category in the prestigious Ranking of Universities Perspektywy 2019. The second place ex aequo was taken took by the Academy of Physical Education from Gdańsk, Kraków and Wrocław. Ranking of Universities Perspektywy includes academic (public and non-public) universities, which have at least one PhD course and have at least 200 full-time students. The ranking evaluates: prestige, innovation, scientific potential, scientific effectiveness, educational conditions, internationalization and number of graduates in the labor market.

PhD student of Poznań University of Technology to travel for the Santander X Scholarship in the USA

2019-06-28

Dominik Czerkawski, PhD student of the Poznań University of Technology, is the winner of the Santander X Scholarship from the entrepreneurship program TrepCamp Entrepreneurial Simulator 2019. A young scientist will take part in the program from July 8 to 26 in San Diego. - TrepCamp Entrepreneurial Simulator is a unique project that allows participants to acquire invaluable experiences in weeks. It is no wonder that the initiative is of great interest to candidates from around the world. I am glad that thanks to the Santander Universidades program, students from Poland can participate in this global project. - says Wojciech Leśniewski, director of Santander Universidades in Poland. Scholarships are one of the activities within the Santander Universidades social activities. Education support, sustaina-

ble economy or counteracting gender inequality are permanently inscribed in the bank's strategy.

Wrocław University of Science and Technology campus to build a new sports hall

2019-06-28

Wrocław University of Technology will have a new sports hall. On the campus at Chelmoński the construction of a modern facility has been started. Students will use it from the beginning of the academic year 2020/2021. The investment has been divided into two periods. In the first one includes building the basketball and volleyball halls, an administrative block, locker rooms and toilets. The hall will accommodate almost 230 fans, which will allow the organization of the competition of the rank of Academic Championships of Poland. The second period involves the construction of a smaller building, including a gym, a martial arts hall and a room for ballroom and fitness dancing with cloakroom and sanitary facilities. In addition, internal roads, car parks and sidewalks will also be built. - We are still planning to build a swimming pool and I hope that after its creation we will completely satisfy the needs of our academic community - said the rector Prof. Cezary Madryas.

University of Gdańsk to launch the archeotourism in the area of the southern Baltic Sea

2019-06-28

The University of Gdańsk is carrying out the project „ArchaeoBalt - a new ‚green‘ Archaeoroute in the Southern Baltic Sea Region” Its main goals are to create strategies and tools for the development of archetourism in the South Baltic area and to develop permanent green and blue archeotourism routes in the region. Activities are aimed at individual and organized tourists, families with children, seniors, students and school groups, as well as social, tourist and non-governmental organizations, cultural and educational institutions and other entities interested in the development of archetourism. The partners of the project are universities and museums from Denmark, Poland and Sweden, universities in Gdańsk, Aarhus and Lund as well as Gdańsk and Bornholm museums. The project is co-financed by the European Regional Development Fund as part of the Interreg South Baltic Program 2014-2020.

Students of the Wrocław University of Science and Technology to launch experiment „Heat in the car”

2019-07-01

Students of the environmental engineering faculty of the Wrocław University of Science and Technology carried out the „Heat in the car” experiment. On the basis of its results, the dangerous conditions for adults, children and animals staying in the sunned cars will be determined. The experiment was carried out when the thermometers pointed to more than 35 ° C in the shade. The students used four different cars: two black, one white and a silver one. Research was conducted using an extensive measuring system with computer data logging, using portable temperature recorders and thermal imaging cameras. The highest temperature 61.1 C degrees was recorded in a large black car. In other cars, it was about 58 ° C. The measurements indicated that not only the size of the vehicle and the color, but also the

size of windows are of importance. More: <https://pwr.edu.pl/uczelnia/aktualnosci/auto-czy-piekarnik-studencki-eksperyment-na-pwr-11266.html>

University of Lodz to receive prestigious accreditation for the logistics

2019-07-01

The faculty of logistics at the University of Lodz (UŁ) has been accredited for compliance with the requirements of the international ELA certificate (European Logistics Association), which confirms that the programs are adapted to the latest global education standards in the field of logistics and supply chain management. Logistics studies at the Faculty of Management of the University of Lodz are focused on transport and storage processes (bachelor level) and organization of the flow of goods in supply chains and procurement processes (Master's level), and their program is based on the latest theoretical and practical knowledge that meets global educational standards. Graduates of the studies who will have high average grades and relevant professional experience may apply for the European Junior Logistician certificate (after 2 years in an independent position in logistics) and European Senior Logistician (after 5 years on an independent or managerial position in logistics).

Principles of Polish-Bulgarian cooperation in the field of higher education defined

2019-07-01

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin, and Minister of Education and Science of Bulgaria, Krasimir Valchev, signed a Polish-Bulgarian cooperation program in the field of higher education until 2022. - I am glad that we are finalizing a document that will define the principles of academic and scientific cooperation between Bulgaria and Poland over the next few years. Thanks to the joint effort, we have developed a good international agreement. It guarantees a stable basis for our cooperation - said Jarosław Gowin. The agreement provides for exchange of

academic teachers, exchange of students of Polish and Bulgarian philology and lecturers as part of summer language courses, admission of PhD students, in accordance with state internal regulations, internships in public higher education institutions and exchange of lecturers, including specialists in the Bulgarian language and Bulgarian literature as well as Polish and literature.

Rzeszów University of Technology to sign agreement on cooperation with the Catholic University of Lublin

2019-07-01

The Faculty of Mechanics and Technology of the Rzeszów University of Technology in Stalowa Wola has signed a cooperation agreement with the Catholic University of Lublin. The agreement concerns student exchange, cooperation between lecturers, joint research and development, co-organization of conferences, panels and post-graduate studies, and specialist courses. The cooperation will also include participation in research projects financed by state and local institutions and development agencies. The agreement will also provide the development of academic contacts between various university units, in particular cooperation within the Polish-Chinese Center. The contract was signed by the rector of the Rzeszów University of Technology Prof. Eng. Tadeusz Markowski, and Rev. Prof. Antoni Dębiński - rector of the John Paul II Catholic University of Lublin.

Silesian University of Technology and the Schools No. 10 in Zabrze sign Agreement on cooperation

2019-07-01

Silesian University of Technology has signed the agreement on scientific and didactic cooperation with the city of Zabrze and the School Complex No. 10 in Zabrze-Mikulczyce. The university will take care of school pupils and teachers in the field of cybernetics, and thus will create opportunities to develop the interests and knowledge of young people. The document was signed by the rector of the Silesian University of Technology Prof. Arkadiusz Mężyk, mayor of the city of Zabrze, Małgorzata Mańka-Szulik and director of the School No. 10 Mirosław Mendecki. According to the agreement, the university committed to help in the development of proprietary education programs, delegating scientific and didactic employees to conduct classes at the school and raise teachers' qualifications. The school, on the other hand, will modify its curriculum of the class of programmer / IT specialist in cyber security. This class will receive the support of the Ministry of National Defense, the National Center for Research and Development and the Silesian University of Technology.

Academy of Physical Education in Wrocław to receive over PLN 13 million for the development

2019-07-02

Academy of Physical Education in Wrocław (University of Physical Education) received funding from the European Union for the implementation of two projects. The total support for both activities is over PLN 13.3 million. Over PLN 8.2 million from the European Social Fund will be implemented by the integrated AWF Wrocław development program. The subject of the project is to improve the competence of full-time students and didactic competences of university staff as well as introduce organizational and technological changes to the educational process in 2019-2023. The second project - «Integrated

program AWF Wrocław for Regional Development» will bring the university over 5.1 million PLN. The aim is to improve the competence of full-time students, carry out PhD studies in the new formula of the doctoral school and introduce organizational and technological changes to the educational process in 2019-2023 - in accordance with the objectives of the Regional Innovation Strategy of the Lower Silesian Voivodship 2011-2020. Cardinal Stefan Wyszyński University to launch the Center for Digital Science

2019-07-02

KGHM Polska Miedź S.A. and PGE Polska Grupa Energetyczna signed a research cooperation agreement with a scientific consortium, which includes the Cardinal Stefan Wyszyński University (UKSW) in Warsaw, the Information Processing Center, the National Research Institute and the Military Institute of Aviation Medicine. The signatories of the document declared establishing a multidisciplinary research center, developing solutions for the energy and industrial sectors. This is an important agreement for UKSW, which is associated with the creation of a new Digital Science Center, addressed directly to the digital economy. Its creation is the result of the dynamic development of the university. - I am glad that to this initiative we have managed to find such strong and important partners for the development of the Polish economy. UKSW is entering a new space of functioning - both in the light of the new law on higher education as well as economic and social needs - said the Rector of UKSW, Rev. Prof. Stanisław Dziekoński.

Professors from Gdańsk, Poznań and Toruń join the presidium of the Council for Scientific Excellence

2019-07-02

Professor Grzegorz Węgrzyn from the University of Gdańsk became the chairman of the Council for Scientific Excellence. The position of vice-chairmen

was offered to Prof. Bogusław Buszewski from the Nicolaus Copernicus University in Toruń and Prof. Marian Gorja from the University of Economics in Poznań. The Scientific Excellence Council is a new body created to support the development of scientific staff. Their appointment is the stage of implementing the «Constitution for science». The Council will take care of the highest standards of the quality of scientific activities required to obtain academic titles and the titles of professor. The council consists of 141 members - three representatives of each discipline. Its composition was established in democratic elections in which all scholars with at least the post PhD title could participate. The voting took place through the Electronic Electoral System.

Two majors of the Lodz University of Technology receive the certificates of the European Network for Accreditation of Engineering Education

2019-07-02

Two majors of the Lodz University of Technology: Construction and Management and Production engineering have been awarded the certificates of the Accreditation Committee of Technical Universities (KAUT) and the European Network for Accreditation of Engineering Education (ENAAE), in recognition of their high quality. Both majors were accredited for five years, until 2023. Construction at the Faculty of Civil Engineering, Architecture and Environmental Engineering received a certificate for full studies, and Management and Production Engineering at the Faculty of Management and Production Engineering for the baccalaureate studies. ENAAE is a European organization dedicated to the training of engineers. One of ENAAE's activities is to provide European education programs with certificates confirming a high level of education and compliance with the Bologna norms and principles adopted in Europe.

University of Gdańsk awarded in the European Commission competition „European Universities”

2019-07-02

The University of Gdańsk was included in the group of 17 consortia of universities selected in the competition of the European Commission „European Universities”. The total budget of the program is 85 million euros, and each consortium will receive up to 5 million euros for 3 years. The partners of the University of Gdańsk in its consortium are the University of Cádiz (Spain), the University of Split (Croatia), the University of West Brittany (France), the University of Christian-Albrecht in Kiel (Germany) and the University of Malta (Malta). As part of the grant, it will be possible to provide joint courses of study, exchange of staff and students, and joint research projects. «European Universities» is a program of the European Commission, which encourages the developing of alliances of European universities. European Universities will be supranational alliances of higher education institutions from across the European Union with a common long-term strategy, they will promote European values and identity. University of Casimir the Great in Bydgoszcz to launch Pedagogy with addiction prevention and sociotherapy

2019-07-03

In the academic year 2019-2020, the University of Casimir the Great in Bydgoszcz is launching a new field of study - pedagogy with the prevention of addictions and sociotherapy. Stationary, 3-year first-cycle programs are addressed to people interested in working with children from 0 to 15 years of age. Innovation of the field includes providing students with the opportunity to acquire competences necessary in the area of caring, educational or

preventive services, as well as competencies needed to engage in social projects and the activity of social NGOs that will adapt to the changing needs of the labor market. A novelty is the modular learning process that ensures coherence between general education and practical vocational preparation. The majority of classes at the university will be accompanied by tasks completed during the internship for 1-2 days each week of the academic year and during the summer internship. More: <https://www.ukw.edu.pl/strona/aktualnosci/aktualnosci/39596/pedagogikaopiekuncza>

Wroclaw University of Technology joins the project of reconstruction of the historical bus

2019-07-03

The Wrocław University of Technology signed a letter of intent regarding the renovation of the historic Jelcz 043 bus, commonly known as „cucumber”. The project will include Factory of Jelcz, Miejskie Przedsiębiorstwo Komunikacyjne Wrocław, Ośrodek Pamięć i Przyszłość and NSZZ „Solidarność” Region Lower Silesia. With such a bus on August 26, 1980 at 4.30 in the morning, Tomasz Surowiec blocked a bus station No. VII and the strike began in Wrocław, whose participants sympathized with workers from Gdańsk. That is how Wrocław «Solidarity» was born, and the strike spread to more plants. - «Cucumber» is a memory of what happened in Wrocław 40 years ago. These events have affected our entire life, although the young generation may not realize it at all. That is why reminding about it is so important, and our university joined the project - says rector of the University of Technology, Prof. Cezary Madryas. More: <https://pwr.edu.pl/uczelnia/aktualnosci/drugie-zycie-ogorka-wyremontujemy-historyczny-autobus-11265.html>

Chełm Aviation Training Center to train flight dispatchers

2019-07-03

The Aviation Training Center of the State Higher Vocational School (PWSZ) in Chełm received a

Civil Aviation Authority certificate authorizing to conduct training activities in civil aviation in the scope of theoretical and practical training to obtain the FDL air dispatcher license (Flight Dispatch License). Thanks to this decision, the newly created Air Dispatcher Education Center of the University of Chełm has obtained the required qualifications and as the first academic center in Poland will offer free specialty of the Air Dispatcher. In order to obtain the Air Dispatcher's license, the student must complete 90 work shifts under the supervision of a licensed air dispatcher with air operators, also from the LOT.

University of Gdańsk evaluated in the world ranking Times Higher Education Young University Rankings

2019-07-03

The University of Gdańsk - as the only university in Poland - was evaluated in the world ranking of Times Higher Education Young University Rankings 2019. The University was ranked 301+ among young universities from all over the world. This is very good information, especially in the context of the celebrations of the 50th anniversary. The 13 evaluation criteria include the teaching environment, scientific research, the number and quality of publications as well as innovation and social impact and the prestige of the university. The place in the fourth hundred sets is a great distinction for the University of Gdańsk and testifies about its dynamic development, recognition and strengthening its position on the world stage. The Times Higher Education Young University Ranking is a world ranking of the best universities with different profiles, which operate no more than 50 years. The indicators in the statement have been adjusted in order to reduce the importance of the reputation that universities have just created. Full ranking: <https://www.timeshigher-education.com/world-university-rankings/2019/young-university-rankings>

Silesian University of Technology joined the global Santander Universidades network

2019-07-03

Silesian University of Technology has gained another partner - Santander Bank Polska S.A. The cooperation agreement under the Santander Universidades project was signed by the rector Prof. Arkadiusz Mężyk, director of the Academic Business Incubator, Dr Eng. Ireneusz Józwiak, director of Santander Universidades in Poland, Wojciech Leśniewski and director of the southern macroregion Arkadiusz Goździk. The university will receive substantive and financial support for conferences, research and projects, support of entrepreneurship and innovation culture in the academic environment, internationalization of education through foreign scholarships, exchange programs and projects implemented in cooperation with the best universities from different countries, and student support through internships and apprenticeships. Santander Universidades is one of the key social engagement projects of Santander Bank Polska and the Santander Group. It supports the development of students from almost 1,000 universities in the world, including over 50 in Poland. More: <https://www.polsl.pl/Lists/Aktualnosci/Uczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci&Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2768>

Best secondary school graduates applying for the Krakow University of Technology to get special scholarships

2019-07-04

The Krakow University of Technology (PK) will offer dozens of scholarships for the 1st degree studies conducted at 8 faculties, from the new academic year. Candidates can apply for Clean air engineering, Information technology in computer engineering, Construction, Automotive vehicles, Industrial systems and equipment, Transport and Engineering

of industrial design. In total PK prepared 4,700 places for applicants. From the new academic year, students of the first year of first-cycle studies who obtained the highest results during the application process at the Krakow University of Technology can receive a special scholarship from the rector of the university. PK starts a student program "Leader of the first course", in which it offers financial prizes for the best secondary school pupils applying for PK majors.

Students of the Silesian University of Technology win the competition Student Nobel 2019

2019-07-04

Kamil Książek, student at the Silesian University of Technology, is one of the eight laureates of the Student Nobel 2019 competition organized since 2009 by the Independent Students Association under the honorary patronage of the Ministry of Science and Higher Education. Kamil Książek is a student of the mathematics department of the Gliwice University of Applied Sciences. He became the laureate of the competition in the Information Technology category. The scientific interests of the laureate include optimization issues - in particular, heuristic algorithms. He is also interested in machine learning and, more recently, in the Internet of Things. Other students of the Gliwice university qualified for the final of the competition in the Information Technology category include Aleksandra Krawiec, Anna Strzoda and Bartosz Grabowski from the applied mathematics department.

Electronic tags to help orientate on the Wrocław University of Science and Technology campus

2019-07-04

Wrocław University of Science and Technology has launched a pilot system of electronic markers that facilitate the movement of people with disabilities on its campus. The devices have been installed in thirty places including in the main building, Bibli-

otech and at Polinka stations. Tags have been installed both in the buildings and on their elevations. They have an autonomous source of energy, which allows them to work no shorter than three years. If users want to use them, they simply download the free Totupoint app on their smartphones or tablets and so they can orientate on the campus. When users approach the tag, they can hear information about our current location, e.g. entering the canteen in the Student Culture Zone or the Polinka station from the speaker. In addition, the mobile application displays extensive text descriptions with information about moving around the facility, information and architectural accessibility. More: <https://pwr.edu.pl/uczelnia/aktualnosci/znaczniki-ulatwia-poruszanie-sie-po-kampusie-11269.html>

University of Gdańsk joins the Council of Experts of Universities for Education and Integration of Migrants and Refugees

2019-07-04

The University of Gdańsk (UG) has joined the nationwide agreement establishing a Council of Experts of Universities for Education and Integration of Migrants and Refugees. Advanced UG research in the field of migration will be a valuable contribution to the Council's activities. Different academic centers have varied experience in the implementation of research, education programs and projects with the participation of governmental, non-governmental and international partners. Cooperation under the agreement will enable all partners to access the results of these studies, work out their recommendations and to use them in the education of students. The University of Gdańsk can offer its experience to cooperation nationwide in the field of research on contemporary migration of Poles, teaching Polish as a foreign language, intercultural psychology, education of students with migration experience, culturally adequate social work and internationalization of universities.

Adam Mickiewicz University in Poznan joins the European University project

2019-07-08

The EPICUR (European Partnership for an Innovative Campus Unifying Regions) Consortium, which includes the Adam Mickiewicz University in Poznań, has received the EU grant for the creation of a European University. European Universities are transnational alliances of higher education institutions from the EU that share a long-term strategy and promote European values and identity. The idea of creating them is aimed at significantly increasing the mobility of students and staff and supporting the quality, integration and competitiveness of European higher education. The partners of the Poznań University are: University of Strasbourg (project leader) and University of Haute-Alsace (France); University of Amsterdam (Netherlands); Albert-Ludwigs-University Freiburg and Karlsruher Institut für Technologie (Germany); University Bodenkultur Wien (Austria) and Aristotle University of Thessaloniki (Greece).

Polish universities in the International Visibility Project

2019-07-08

20 Polish universities have been invited to participate in the International Visibility Project (IntVP). One of the main assumptions of the project is improving the image of Polish universities in the world, increasing the visibility of Polish universities on the international arena and raising the position of Polish universities in international academic rankings. IntVP also aims to strengthen professional managerial and specialist cadres in leading academic centers. It is about the staff involved in academic rankings and those, who know the key aspects of creating an international university reputation. The project includes: AGH University of Science and Technology in Kraków, Kozminski University in Warsaw, Gdańsk Medical University, Gdańsk University of Technology, Lodz University of Technology, Poznan University of Technology, Silesian University of Technology, Warsaw University of Technology, Wrocław University of Science and Technology, University of Lodz, University of Gdansk, University of

Adam Mickiewicz University in Poznań, Jagiellonian University, Medical University of Białystok, Nicolaus Copernicus University in Toruń, Wrocław University of Environmental and Life Sciences, University of Silesia, University of Warsaw, University of Wrocław, Medical University of Warsaw.

New report on monitoring the Economic Fate of Graduates

2019-07-08

1.5 million Economic Graduates of the Alumni (ELA) of higher education institutions have been so far analyzed by the earnings comparator created at the request of the Ministry of Science and Higher Education. The system of monitoring the Economic Fate of Graduates is created at the Information Processing Center - National Research Institute. Its purpose is to provide the most comprehensive information on the situation of graduates in the labor market. ELA is a unique system worldwide. Its task is to help high school graduates to make the right choice of their way of life - said Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. - In an accessible form, we present students verified information about the fate of their older colleagues, who since 2014 have been at work; how much they earn, how long they have been looking for a job, whether they work under self-employment, or maybe on a contract of employment - added Deputy Prime Minister Gowin. More: https://www.gov.pl/documents/1068557/1069061/ELA_4_prezentacja_podstawowe_informacje.pptx/0231f265-8721-6e13-1869-1cdb538c0294

Wrocław University of Environmental and Life Sciences making its debut in the Shanghai ranking

2019-07-08

University of Life Sciences in Wrocław for the first time in its history is ranked in the Shanghai list. The university took 208th place in the field of food science and technology for 300 best universities in the world. Wrocław veterinary faculty was 241st. The success was a result of the number of citations

- mainly the works of scholars from the Faculty of Biotechnology and Food Sciences. The 208th place in the ranking is the highest position of Polish universities conducting research and educating in the field of food science and technology. The Academic Ranking of World Universities is called the Shanghai ranking after the city in which the Jiao Tong University and its Institute of Higher Education is located. There, the idea of creating a ranking analyzing the academic staff and students in terms of gaining awards in significant scientific competitions, the number of citations and publications in the most important scientific journals was born. More: http://www.glos.upwr.edu.pl/aktualnosci/49616/uniw-szytet_przyrodniczy_we_wroclawiu_w_rankingu_szanghajskim.html

Faculty of Biology and Biotechnology of the University of Warmia and Mazury in Olsztyn to launch tutoring

2019-07-09

From October, students of the Faculty of Biology and Biotechnology (WBiB) of the University of Warmia and Mazury in Olsztyn will be able to take advantage of tutoring system. The first group of academic teachers from WBiB has obtained relevant certificates. Tutoring as a supplement to mass education has been practiced in the world's leading academic centers for many years. Now it is also appearing in Polish universities. -We organized a tutoring course specifically for the needs of our academic teachers. The existing models of education do not allow to discover individual student interests. It is often only the supervisor of a diploma thesis, who reveals the potential of their graduate student. Introducing tutoring we will allow students to develop opportunities at the beginning of their studies - explains Dr Beata Dulisz, deputy dean for education at WBiB and training coordinator.

University of Wrocław launches the Laboratory of Forensic Biology and Entomology

2019-07-09

Forensic entomologists from the University of Wrocław, together with colleagues from the Medical University of Wrocław, created the Laboratory of Forensic Biology and Entomology. The new laboratory will operate in the Department of Biology, Evolution and Conservation of Invertebrates at the University of Wrocław. Forensic entomology involves the use of knowledge about insects, about their biology and ecology as part of, investigative and court proceedings. This is an interdisciplinary science using forensic medicine, chemistry (toxicology) and biology (entomology, genetics). Most often, it is associated with the medical-criminal area, in particular with prosecutor's proceedings. The newly created laboratory explores the displacement and bionomics of necrophagic species of insects, but also other invertebrates. Its employees deal with preparation of specialist opinions for the purposes of preliminary forensic investigations and lawsuits. They also train their successors. More: <https://uni.wroc.pl/entomolodzy-i-medycy-na-tropie-smierci/>

Kielce University of Technology building a new stadium

2019-07-10

On 8 July 2019, the deputy minister of sport and tourism Anna Krupka during her visit to the Kielce University of Technology announced that she would allocate a subsidy of 7.5 million PLN for the construction of a new stadium. The total cost of building the stadium is estimated to be PLN 14 million. The new facility will be located at the Kielce University of Technology. The stadium is to be part of an academic sports center, open not only to the students, but to all people. The design of the new stadium is a complex stadium consisting of an athletics part with a football pitch. The facility will consist of a main pitch, six lanes around the stadium, a straight track along one side consisting of eight tracks for a

long jump, a triple jump, a pole jump, a high jump, a shot putting.

Over 6,000 people want to study at the University of Białystok

2019-07-10

6027 people want to study at the University of Białystok (UwB) in the academic year 2019-2020. The most students applied for economics and criminology. Most people want to study economics - 638. The second largest group are candidates for the legal studies - 492. There are 407 applicants for English philology. Management (364 people), criminology (331) and pedagogy (313) are also very popular. In terms of the number of candidates, the first place is criminology, where each of the 20 places attracted over 16 people. There is also a lot of interest in the administration - nearly 11 candidates for one place, as well as in the study of safety and law - almost 10 people for one place.

President of Poland inaugurated the Belvedere Summer School

2019-07-10

- Science develops thanks to the fact that people have the courage to break the usual patterns and this is the aim of these meetings - said the President of Poland Andrzej Duda during the inauguration of the Belvedere Summer School. The theme of this year's event is «Law for the common good». The Chancellor of the President explains that the students may listen to lectures delivered by professors and practitioners and take part in seminars and workshops. The President inaugurating the Belvedere Summer School stressed that he would like it to be a platform where young people meet with practitioners and theoreticians who deal with the functioning of not only the Polish state, but also the countries of the European community. More: <https://www.prezydent.pl/aktualnosci/wydarzenia/art,1466,prezydent-zainaugurowal-belwederska-szkole-letnia.html>

Podkarpackie Voivodeship allocates one million PLN to Rzeszów universities

2019-07-11

The University of Rzeszów and the Rzeszów University of Technology from the budget of the Podkarpackie Province received almost a million PLN. The money will be spent on their investments. The University of Rzeszów received PLN 500,000 to create a Medical Simulation Center, financed primarily by the National Development Center. The rector of the university, Prof. Sylwester Czopek said «without such a Center, it is currently difficult to imagine the training of medical staff». The university also received PLN 125 thousand of support for the creation of Biobank alias «archive of human tissues». Also, Rzeszów University of Technology received PLN 350,000 for the new Center for Culture and Science.

Mobile application for students and foreigners of the Maria Curie-Skłodowska University in Lublin

2019-07-11

The Maria Curie-Skłodowska University (UMCS) in Lublin has developed the UMCS GUIDE mobile application, intended for foreign students, staff of the Maria Curie-Skłodowska University and foreigners staying in Lublin. The main purpose of the application is to facilitate everyday functioning and moving around the city and on the campus. The UMCS GUIDE contains basic data about the University and Lublin. Users will find information on safety, health and psychological information, timetables and a list of popular restaurants. Thanks to the application, they will be able to know about the most interesting city attractions, places of culture, entertainment and recreation. The application can be downloaded from stores: App Store: <https://apps.apple.com/us/app/umcs-guide/id1460001587> Google Play: <https://play.google.com/store/apps/details?id=en.umcs.guide>

Studies of the College of Ecology and Management in Warsaw receive funding from the European Union

2019-07-11

From the new academic year 2019/2020 the College of Ecology and Management (WSEiZ) in Warsaw is launching a new field of study- IT Engineering studies. -We have 60 places in our studies: 20 places in full-time studies and 40 in extramural studies. All places are subsidized by the European Union - says Katarzyna Nowakowska from the Marketing and International Cooperation Department of the EEZ. For students starting their studies in the academic year 2019/2020, tuition fees will be reduced by the amount of co-financing, i.e. by 80% for full-time and 50% for part-time students, which means a monthly tuition fee of PLN 112 for full-time studies and PLN 240 for part-time studies. All who want to study IT with subsidies can apply at: <https://erasmus.wseiz.pl/?idk=25&s=1>

Chinese universities become one of the priorities of cooperation for the Gdańsk University of Technology

2019-07-11

Gdańsk University of Technology renewed the cooperation agreement with the Shanghai Institute of Technology (SIT). As the first university in Poland, it will also start cooperation with Anyang University in China. Under the agreement, the universities declared their readiness to cooperate in the field of student scientific staff exchange for teaching and research purposes. - Cooperation with Chinese universities is one of the priority directions of our activities in the field of internationalization of universities - said Prof. Krzysztof Wilde, rector of the Gdańsk University of Technology. The chemical faculty of the University of Technology and the School of Materials Science and Engineering SIT signed the agreement giving Chinese students the opportunity to study at the chemical faculty of the Gdańsk university for one semester. Students of the Adam Mickiewicz University in Poznań receive Diamond Grants

2019-07-11

The Minister of Science and Higher Education awarded the Diamond Grants for the eighth time. The winners include six students of the Adam Mickiewicz University in Poznań. The scholarships for their research were obtained by Jakub Buda for his „Bioaccumulation of radioactive isotopes and their impact on populations of organisms in the supraglacial zone of glaciers”; Kinga Kułaga for her “Nighttime song of daytime birds - side effect of light or functional behavior ?”; Rafał Świergiel for “The role of political and social processes in shaping the constitutional system of the Republic of Poland”; Michał Wiczorkowski for “Obeying the rule. The status of interpretative rules in the practice of applying the law in the light of Wittgenstein's skeptical paradox; Adrian Walkowiak for “Selected transition metals (Fe, Ti, V, Nb, Ta) in various matrices as catalysts of oxidation processes using light and / or hydrogen peroxide” and Paulina Książek for “Between madness and non-normality: the heroines of Krzysztof Penderecki's operas”.

Nicolaus Copernicus University creates the European University of the Future

2019-07-11

The Nicolaus Copernicus University in Torun within the international consortium Young Universities for the Future of Europe - YUFE will create the first European University open to everyone. YUFE is one of 17 consortia of universities selected by the European Commission to develop and implement a model European University. At the beginning of the year, the YUFE consortium presented its concept to the European Commission and now it has received the green light to implement its action plan. Preparations for

the launch of the European University are planned for the next three years. The main YUFE partners are Maastricht University (coordinator) - the Netherlands; Carlos III University of Madrid - Spain; University of Antwerp - Belgium; University of Bremen - Germany; University of Cyprus - Cyprus; University of Eastern Finland - Finland; University of Essex - United Kingdom and University of Rome Tor Vergata - Italy. More: <https://www.umk.pl/wiadomosci/?id=26217>

University of Lodz completed accepting applications

2019-07-12

Psychology, Management and English Philology are the most popular studies at the University of Lodz (UŁ) this year. The top ten include also Marketing, Logistics, Journalism and Social Communication, but also a new study of Forensic Biology. For on place on Psychology more than 11 candidates applied this year. A little less competitive is English Philology and Management - there are 9 applicants for one place. The largest number of candidates for studies at the University of Lodz comes from the Lodz region (over 60%), but there are also people from other regions of Poland, mainly from the Mazovia (10%), the Wielkopolska, the Silesia and the Świętokrzyskie region (4% each).

Ministry of Education and Science to offer scholarships for studies in Kazakhstan

2019-07-12

The Ministry of Education and Science of Kazakhstan is inviting all interested candidates from abroad to apply for a scholarship to study in Kazakhstan – under 2019 Kazakhstan Scholarship Program. The offer applies to full-time education within bachelor's, master's and PhD studies. As part of the program, scholarships are offered according to the following allocation: bachelor studies - 25 places, master studies - 125 places, PhD studies - 10 places. Applications will be accepted until July 19, 2019. The operator of the scholarship funds is the Center of Bologna Process and Academic Mobility reporting to the Ministry of Education and Science in Kazakhstan. Wrocław University of Science and Technology receives HR Excellence in Research logo

2019-07-12

The European Commission has accepted the report of the Wrocław University of Science and Technology about its activities undertaken so far and granted the university the right to use the logo „HR Excellence in Research” for the coming years. The prestigious «HR Excellence in Research» logo is awarded to institutions that apply the principles of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers. Its possession is rewarded in international grant competitions of the European Commission, some competitions of the National Science Center and the National Center for Research and Development. The logo means also a prestige and distinction for the university as an institution that creates the best working conditions for researchers in the implementation of scientific and research and development activities in accordance with European standards. Wrocław University of Science and Technology has the right to use it from June 2016. Another audit is scheduled in three years. More: <https://pwr.edu.pl/uczelnia/aktualnosci/hr-excellence-in-research-zostaje-na-politechnice-wroclawskiej-11270.html>

Young scientists from Toruń win Diamond Grants

2019-07-12

Three young scientists from the University of Nicolaus Copernicus in Toruń won the „Diamond Grants” of the Minister of Science and Higher Education. Hubert Joachim Józwiak from the Faculty of Physics, Astronomy and Applied Informatics will receive PLN 189 553 for the project «Collision effects in the hyperfine structure of the hydrogen molecule - a fundamental problem of modern molecular spectroscopy». Olgierd Borowiecki from the Interdisciplinary Center of Modern Technologies raised PLN 179 854 for the project «Imaging praxies - or the cerebral basis of procedural cognitive skills is identical to the cerebral basis of procedural motor skills? - fMRI test». Aleksandra Bogumiła Florkiewicz from the Faculty of Biology and Environmental Protection

will get PLN 182,443 for «Searching for soil drought stress markers used in the selection of yellow lupine varieties with increased yield potential».

Gdańsk University of Technology cooperates with the Port of Gdansk Authority SA

2019-07-12

The Faculty of Ocean Engineering and Ship Technology of the Gdańsk University of Technology and the Authority of Gdansk Port have concluded an agreement on scientific and didactic cooperation, under which both parties will jointly apply for national and foreign grants for the implementation of research and development projects. The agreement included provisions on lecturing by port employees, organization of study visits in its area, cooperation of ZMPG SA with students on the implementation of engineering and master's programs (including topics), as well as organization of student and industrial internships. The signatories of the agreement are Dr Eng. Janusz Kozak, Prof. Associate of Gdańsk University of Technology, dean of the Faculty of Ocean Engineering and Ship Technology, Marcin Osowski, Vice President of the Port of Gdansk Authority SA and Łukasz Greinke, President of the Port of Gdansk Authority SA.

Medical study of the University of Jan Kochanowski in Kielce breaking records

2019-07-15

Jan Kochanowski University (UJK) in Kielce has accepted over 8.4 thousand applications for all studies. The most popular courses are medical studies, psychology and applied criminology. Applications were submitted for 48 studies for almost 4,000 students. The university has accepted over 8.7 thousand candidates, of which approx. 8.4 thousand applied for regular master's studies. Most people chose to study medicine. Nearly 2,2 thousand people have applied for medical studies, which means that there are over 29 candidates for one place. Psychology (almost 450 candidates) and criminology of appli-

cation (over 300 candidates) were also very popular. Finance and accounting, physiotherapy or English philology were also chosen by many students.

Warsaw Lazarski University to launch Center for Medical Simulation

2019-07-15

In October 2019, the Medical Simulation Center (CSM) of the Lazarski University in Warsaw will be open to students of the medical faculty. The Polish Accreditation Committee awarded a distinguishing diploma to the medical department in the category of caring for students and support in the process of learning and achieving educational outcomes. The Lazarski University began to train future doctors in 2017. Students, who undertook medical science then, now are the students of the third year. That is the reason why since October Lazarski University will be launching the CSM. The CSM will consist of high-fidelity simulation laboratories, including rooms simulating the conditions of the hospital emergency department, operating theater, intensive care unit, and ambulance simulator. There will also be laboratories: advanced resuscitation procedures, basic resuscitation procedures, technical, surgical and clinical skills.

Students of the Wrocław University of Science and Technology receive Diamond Grants

2019-07-15

Four students from the Wrocław University of Technology have become laureates of the 8th „Diamond Grant” program sponsored by the Minister of Science and Higher Education. They will receive scholarships of PLN 220,000 for the implementation of their research projects. The awarded students of the Wrocław University of Science and Technology are: Michał Klask – for «Development of a method of orderly placing anisotropic nanostructures in optically active thin polymer layers and testing their optical properties»; Dorota Tomaszewska for «Non-linear conversion of the optical frequency comb into the mid-infrared spectral range for spectroscopic applications». Grants were also awarded to Bartosz Uniejewski for «Forecasting wholesale electricity prices for the needs of risk management: The use of regularization and forecast averaging», as well as Grzegorz Marcjasz for «Deep learning in probability, probabilistic forecasting and trajectory of electricity prices».

Silesian University of Technology to examine the past and the future of industry

2019-07-15

The Laboratory of Research and Analyzes of Work Conditions in Industrial Professions will be created at the Silesian University of Technology. It is a joint initiative of the University of Gliwice and the Association of Tarnogórska Land Lovers, co-financed with the amount of PLN 1.5 million under the „Dialogue” program of the Ministry of Science and Higher Education. The laboratory will deal with extending interdisciplinary cooperation between representatives of the humanities and technical sciences, to deepen research on the working conditions of industrial professions in the past, present and future. The task of laboratory, which is part of the International Center for Interdisciplinary Research, will be to show how

the industry in Silesia changed from the starting the first mines to the modern Revolution 4.0 in factories. The laboratory will be a unique place nationwide, which will take care of an in-depth description and study of industrial works in Silesia from pre-history through present times to futuristic visions. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci&Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2782>

Warsaw University of Life Sciences joins international project strengthening green economy in Asia

2019-07-16

The Faculty of Forestry of the Warsaw University of Life Sciences (SGGW) together with the Faculty of Economic Sciences and the Faculty of Civil and Environmental Engineering are participating in the international project EGEA, Enhancing Green Economy in 3 countries of Asia under the Erasmus + program. The project is implemented in 2019-2021 and includes support for the Kyrgyz Republic, Nepal and India. Currently the socio-economic development of these countries is largely based on the consumption of natural resources. Therefore, they face challenges that threaten their future sustainable development including depletion of natural resources, loss of basic natural ecosystems and stagnation of human capital. The aim of the project is to «identify and then define the possibilities of supporting the skills necessary to implement the green economy in various target groups (students, teachers, specialists, young generation) and for various thematic areas».

Nurses and midwives to be educated extramurally

2019-07-16

The Senate, the upper house of the Polish parliament, voted unanimously for the amendment of the law on nurse and midwife professions. According to this amendment, education in nursing and midwifery is allowed to be carried out in an extramural form. The amendment will be now signed by the

president. It assumes that the first-cycle program in nursing and midwifery, carried out in an extramural form, its duration and number of hours of these studies will be the same as the studies conducted in a regular form. According to the amendment, nurses and midwives will be able to take a paid training leave - up to 6 working days a year. This leave can be used for participation in conferences and scientific courses.

Cardinal Stefan Wyszyński University to act for environmental protection

2019-07-16

Rector of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw, Fr. Prof. Stanisław Dziekoński and the President of Bank Ochrony Środowiska Bogusław Białowas signed a letter of intent concerning joint actions for the environment. Their cooperation will include joint activities in the ecology, biology, engineering and environmental protection, including energy efficiency, renewable energy sources, electromobility, waste management and water and sewage management. The cooperation is to include research and development, organization of joint activities and educational campaigns for the environment, expert cooperation, organization of training, internships, apprenticeships and post-graduate studies. - As the University, we focus on all aspects of human life ranging from the humanities, social, exact or biological sciences through medicine to environmental engineering. I am convinced that the agreement and our cooperation will have a positive impact on the natural environment both through research and planned educational campaigns - said the Rector of UKSW, Fr. Prof. Stanisław Dziekoński.

Medical faculty becomes most popular at University of Nicolaus Copernicus in Torun

2019-07-16

The future students have completed applying for studies at the Nicolaus Copernicus University in Toruń. Candidates could have chosen their study from 109 offers. For 5.5 thousand places the system recorded 19147 applications. Most people applied for the medical faculty (4016), law (873), psychology (745), pharmacy (601), finances and accounting (559), veterinary (543), English philology (512), management (477), physiotherapy (467), logistics (425), nursing (374). Per place, the most candidates have applied for English philology (11 people per place), psychology (8), Japanese studies (8), veterinary (7), logistics (7), pharmacy (6), communication and psychology in business (6), ophthalmic optics with elements of optometry (6), forensic biology (6) and cosmetology (6). The statistics do not include the medical faculty, where the result has not been calculated yet, but every year the competition is the strongest.

National Agency for Academic Exchange completes „Promotion by word“

2019-07-17

Maria Curie-Skłodowska University in Lublin and the University Center for Environmental Studies and Sustainable Development of the University of Warsaw received the main prizes in the competition of the National Academic Exchange Agency (NAWA) for the work „Why is Poland attractive for foreign students? Higher education as a source of Poland's soft power“ and „The transition into a sustainable society by the University of Warsaw „) „Promotion with word“. The purpose of the competition announced by NAWA was the international promotion of the Polish area of higher education and science by creating the possibility of publishing the article on the international portal dealing with the subject of higher education and science - Times Higher Education. The competition was addressed to didactic and research units in Poland, whose task was to

send a competition paper as an article promoting a represented unit or promoting Poland as an attractive destination for studying.

University of Lodz to launch the Third Chinese Summer School

2019-07-17

On Monday, July 15, 2019, the third summer school „Understanding Poland“ was launched at the University of Lodz (UŁ). It is intended for students from Chinese universities. This time 200 students from different regions of China will come to Łódź, including universities such as the prestigious Nankai University in Tianjin. Chinese students will try to learn Polish, learn about the history and culture of Poland. There will also be the trips to Żelazowa Wola and Warsaw. In the educational part, students will take part in selected education modules organized by the Departments of: Biology and Environmental Protection, Economics and Sociology, Philology, Philosophy and History, Mathematics and Information Technology, and Management. The organizer of the School is the Center for Asian Affairs of the University of Lodz.

Computer science is the most popular studies at the Wrocław University of Science and Technology

2019-07-17

Applied informatics, automation and robotics, mechanics and machine building, as well as cybersecurity are the most popular courses at the Wrocław University of Science and Technology. The most popular course is computer science in English - over 17 students tried to get one of fifteen places. About 9 candidates for one place competed to study the information technology in Polish. Algorithmic computer science (7 people for one place), as well as automation and robotics (5 people), mechanics and mechanical engineering in English (over 4 people) and cyber security (4 people for one place) were also very popular. The application system of the Wrocław university registered almost 10,000 can-

didates. The regular students could choose from 50 different studies, including 4 in English. There were more than 6.5 thousand free places for them. More than 26 thousand students study at the Wrocław University of Science and Technology.

Two students of the Medical University of Wrocław win the Diamond Grants

2019-07-17

Klaudia Bardowska and Dawid Przystupski from the University of Medical Sciences in Wrocław became the laureates of the competition of the Minister of Science and Higher Education „Diamond Grant“. They received 220,000 PLN for the implementation of projects PLN. Dawid Przystupski will carry out his research project «Sonoporation as a modern method of modulation of gastrointestinal cancer cell membranes in anti-cancer therapy» at the Department and Department of Molecular and Cell Biology at the Faculty of Pharmacy with a branch of medical analytics. Klaudia Bardowska will realize her project «Biomarkers of recurrence and progression in bladder-cell carcinomas non-muscle-forming - relationship with inflammatory reaction and activation of the plasminogen system» in the Nephrology and Transplantation Medicine Clinic at the medical department of post-graduate education.

Research of physicists from Toruń receive over PLN 15 million

2019-07-17

The Institute of Physics of the Nicolaus Copernicus University in Toruń (UMK) in cooperation with other scientific centers received grants from the Ministry of Science and Higher Education and the National Center for Research and Development. Thanks to funding, Toruń physicists will carry out two research projects. Astronomical Center Nicolaus Copernicus of the Polish Academy of Sciences and the Institute of Physics of the Nicolaus Copernicus University are realizing the project «National Center for Satellite Quantum Communication (NCSatKom)» co-financed by the Ministry of Science and Higher Education with over PLN 9.6 million. The National Center for Research and Development co-financed a joint project of the Faculty of Physics, Astronomy and Computer Science applied at the Nicolaus Copernicus University, Syderal Poland and the University of Gdańsk. The main goal of this initiative is to develop a «self-steering electronic satellite controller for quantum entanglement generator». NCBiR will allocate over PLN 5.5 million for this purpose.

IT stays the most popular course at the Krakow University of Technology

2019-07-18

Information technology, renewable energy sources and municipal infrastructure, applied IT, transport, IT engineering in computer engineering, automation and robotics, architecture, construction, mechanics and machine building are the most popular majors at the University of Technology in Krakow (PK) in the first application period for the academic year 2019/2020. The most popular course this year, as in previous years, has been IT, with 11 people for one place. Other most popular majors include: renewable energy sources and municipal infrastructure at the Faculty of Environmental and Energy Engineering (6 people in place), applied IT at the Faculty of Mechanical Engineering (6), transport at the Faculty of Civil Engineering (4.8), computer engineering at

the Faculty Electrical and Computer Engineering (4,7), automation and robotics at the Faculty of Mechanical Engineering (4,7) mechanics and mechanical engineering (Faculty of Mechanical Engineering - 3, 1), architecture at the Faculty of Architecture (2,9), medical engineering at the Faculty of Mechanical Engineering (2.9), spatial economy (2.4).

Polish universities to educate the most multimillionaires

2019-07-18

The largest number of graduates, whose assets exceed EUR 100 million, graduated from the AGH University of Science and Technology in Kraków. This is a result of the research of the Wrocław Workshop 2033. The report shows that Krakow AGH graduate has the greatest chance of becoming a multimillionaire, with ten such people - one more than last year. The University of Warsaw takes the second place with eight graduates with assets above EUR 100 million (two more than a year ago). The third place is taken by Warsaw University of Technology – with six multimillionaires. The fourth places were occupied by the Silesian University of Technology in Gliwice, the University of Wrocław, the Wrocław University of Science and Technology and the Technical University of Lodz - they all have three rich people.

Gdańsk University of Technology to cooperate with the Korea Institute of Materials Science

2019-07-18

The Faculty of Mechanical Engineering of the Gdańsk University of Technology will cooperate with the Korean Institute of Materials Science (KIMS). The cooperation agreement was signed by Prof. Krzysztof Wilde, rector of the University, and In-Hyuck Song from a Korean university. Under the agreement, each year five students or PhD students of Gdansk University of Technology will be able to go to Korea to participate in research projects implemented by KIMS. Employees of both units will jointly conduct scientific research and participate in lectures, workshops, symposia and courses. - I hope that regular

students, PhD students and KIMS employees will come to learn and lecture at the Gdańsk University of Technology, which will positively affect the level of internationalization of both our universities - says Prof. Krzysztof Wilde.

State Higher Vocational School in Sanok to launch Master's studies in Internal Security

2019-07-19

State Higher Vocational School (PWSZ) in Sanok received the right to conduct the Master's studies in Internal Security from the academic year 2019/2020. Graduates of Internal Security will be prepared to work in services and institutions dealing with security and defense issues such as military services, public order institutions, protection of persons and property, crisis management institutions and security organizations in state and local administration. Graduates will be able to apply for employment in the Armed Forces as well as for the Police, Border Guard, State Fire Service, City Guard, Prison Service, and Road Transport Inspection.

University of Opole joins a consortium of laureates of the „European Universities” competition

2019-07-19

The consortium with the Opole University was included in the group of laureates of the European Commission's European Universities competition funded by the Erasmus + program. The University of Opole is part of the FORTHEM consortium whose leader is Johannes Gutenberg Universität Mainz (Germany) and its partners: Université de Bourgogne (France), Jyväskylä yliopisto (Finland), Università degli Studi di Palermo (Italy), Latvijas Universitāte (Latvia), Universitat de València (Spain). European Universities are transnational alliances of higher education institutions from across the European Union. The idea of creating them is aimed at significantly increasing the mobility of students and employees and supporting the quality, integration

and competitiveness of European higher education. Each consortium can count on a three-year grant of up to 5 million euros. The funds will help joint research groups, technology transfer centers and libraries.

Wrocław University of Science and Technology and Volvo to cooperate closely

2019-07-19

Wrocław University of Science and Technology and the Volvo concern have signed a cooperation agreement. The agreement assumes the conduct and development of innovative scientific projects, the creation of joint educational programs, the organization of apprenticeships and the implementation of PhD diploma theses. Representatives of both parties have declared their willingness to develop the current fruitful cooperation, both in the field of research and projects, as well as the education of young scientific staff. The scope of the contract will allow the parties for the implementation of various projects opening prospects of development and raising competitiveness through the use of experience, knowledge of employees and the potential of both Wrocław University of Science Technology and Volvo. More: <https://pwr.edu.pl/uczelnia/aktualnosci/pwr-i-volvo-beda-scisle-wspolpracowac-11284.html>

Gdańsk University of Technology to cooperate with the Institute of Meteorology and Water Management

2019-07-19

Gdańsk University of Technology will cooperate with the Institute of Meteorology and Water Management (IMGW). The agreement between the institutions was signed by the rector of the university, Prof. Krzysztof Wilde and Dr Przemysław Ligenza - general director of IMGW. Cooperation between signatories will allow the exchange of data and products derived from numerical weather forecast models, which may result in solutions such as the METEOPG project, helping the Ministry of Investment and

Development to monitor drought in Poland. Scientists from both organizations will also develop prognostic models of high time-space resolution, create new methods of data analysis and organize seminars and trainings in the field of the physics of the atmosphere and synoptic meteorology. - We are aiming to take advantage of the opportunities that exist in various centers of our country to make the forecasts implemented by the institute even better, more practical and accurate - says Dr Ligenza.

Diamond Grant for a student at the University of Life Sciences in Poznań

2019-07-19

Klaudia Szala, a biology student at the Faculty of Veterinary Medicine and Animal Sciences at the University of Life Sciences in Poznań, received the Diamond Grant of the Minister of Science and Higher Education. Thanks to the grant, the winner will implement the project „The role of pigmentation of eggshells in sexual selection: whether the intensity of pigmentation is an indicator of the condition of the female and affects the size of the male parent investment (on the example of the scarlet Lanius collurio)”. This is the eighth Diamond Grant competition. This year, Minister of Science and Higher Education Jarosław Gowin awarded over PLN 17 million to finance projects of exceptionally gifted students of regular master's studies or graduates of first-cycle studies, conducting research at a high academic level and possessing outstanding scientific achievements. During the implementation of their research projects, winners will receive a grant of up to 2.5 thousand PLN monthly.

University of Lodz begins accepting applications for the Doctoral Schools

2019-07-22

From July 22, 2019, the students can apply for four Doctoral Schools of Humanities, Social Sciences, Science of Life Sciences and BioMedChem at the University of Lodz (UŁ). The BioMedChem school will be run jointly with two institutes of the Polish Academy

of Sciences (PAN): the Institute of Medical Biology and the Center for Molecular and Macromolecular Studies. Agreement on this matter was concluded on May 20 this year by Prof. Antoni Różalski, rector of the University of Lodz. Education in all schools lasts 4 years. Reform of the science of Deputy Prime Minister Gowin predicts that doctoral students will be educated in doctoral schools, not in the faculties. Anyone who enters a doctoral school will receive a scholarship. No one will pay for doctoral education, as the division between stationary and non-stationary modes disappears. The changes are to raise the scientific level of future doctors.

Cooperation agreement between the University of Casimir the Great in Bydgoszcz and the Copernicus Science Center

2019-07-22

The University of Casimir the Great in Bydgoszcz and the Copernicus Science Center (CNK) in Warsaw will cooperate in the implementation of the Young Explorer's Club Program. The cooperation agreement was signed by the rector of the university, Prof. Jacek Woźny and the director of education at the Copernicus Science Center, Anna Dziama. The aim of the cooperation is to support the local clubs of the Young Discoverer through organization of networking meetings for the partner's staff, organization of events allowing the clubs to interact with active scientists, participation in programs implemented by the Copernicus Science Center in cooperation with an external partner and participation in programs implemented by the scientific partners. The mission of the Young Explorer's Program is to develop club members through increasing their learning skills and increasing the ability to reach the scientific truth by using the applied, theoretical and natural sciences and humanistic skills.

University of Gdańsk joins the consortium of the RESBIOS project under the Horizon 2020 program

2019-07-22

The University of Gdańsk, together with partners from 11 countries, is implementing the RESBIOS project (REsponsible research and innovation grounding practices in BIOSciences). Activities implemented under the Horizon 2020 program are aimed at strengthening the practice of responsible research and innovation in the area of biological sciences. The main goal of the project is to implement RRI (responsible research and innovation) practices in five new research organizations from different countries through the implementation of a dedicated package of activities. The result will be institutional changes in these units in relation to the five key areas of RRI (social involvement, education, gender equality, open access, ethics). The project will be carried out for three years in a consortium coordinated by the Italian University of Tor Vergata in Rome. The consortium consists of 12 partners from 11 countries. The project's budget is EUR 1.5 million.

Competition for the best master's and doctoral dissertations on the subject of disability

2019-07-23

The State Fund for Rehabilitation of Disabled People has announced the 16th competition for the best master's and doctoral dissertations with the research topic of the disability in the health, professional or social dimension of 'Open doors'. The competition includes master's theses, which received a very good grade, doctoral dissertations dealing with the issues of disabled people, accepted up to 24 months before submitting the work to the Competition. MA students, PhD students and all other PhD scientists may enter the competition. Their works may be submitted by the dean of the faculty, director of the institute, supervisor or reviewer of the master's or doctoral dissertation until July 31, 2019.

The works should be submitted to the following address: State Fund for Rehabilitation of the Disabled, Al. Jana Pawła II 13, 00-828 Warsaw, with the note «OPEN DOORS».

Podkarpackie local government granted 800,000 PLN to seven universities from the region

2019-07-24

The Podkarpackie Voivodship Board granted a special subsidy to seven Podkarpackie universities. The total amount of PLN 800,000 will be allocated to investment purchases related to the conduct of their statutory activities. The Rzeszów University of Technology will use a subsidy worth over PLN 300,000 to equip the cabinets in the Physiotherapy and Sports Center with rehabilitation and training devices as well as control, measurement and research equipment - explained Prof. Grzegorz Budzik, vice-rector for education at the Rzeszów University of Technology. The State Higher Vocational School in Sanok will allocate PLN 100,000 for a microwave mineraliser. The device will enable practical training in the field of economy in agricultural and forest ecosystems. The State Higher Vocational School in Krosno will provide the automation and robotics laboratory. The grants were also received by the Podkarpackie College in Jasło, the State Higher School of Technology and Economics in Jarosław and the State Higher School of Eastern Europe in Przemyśl.

Call for proposals for bilateral exchange of scientists with Ukraine

2019-07-24

The National Academic Exchange Agency (NAWA) is inviting participants to submit applications for a bilateral exchange of scientists with Ukraine. The purpose of the recruitment is to support the mobility of scientists in the implementation of research projects carried out jointly by partners from Poland and Ukraine. The NAWA joint research projects may concern all fields of science, with priority given to the following areas: new production and computer technologies (laser, precision, mechatron-

ics, robotic, plasma, optoelectronic, sensor), energy management and energy efficiency, ecology and environmental management, natural sciences, new technologies, health and prevention of the most common diseases, biotechnology, bioengineering and genetics, new substances and materials, social sciences and humanities, and defense technologies. More: https://nawa.gov.pl/images/Bilateralne-Naukowcy/Ukraina-2019/BIL_zaproszenie_Ukraina.pdf

Gdansk University of Technology joins a consortium researching modern road surfaces

2019-07-24

Gdańsk University of Technology became part of a scientific consortium, which together with an industrial consortium made up of Budimex S.A., Grupa Lotos S.A. and Orlen Asphalt Sp. z o.o. will develop technology to reduce road construction costs and improve their durability through the use of highly polymer modified asphalt. Researchers will investigate the impact of the use of modified and highly modified bitumens, i.e. HiMA (Highly Modified Asphalt) asphalt for the construction of various layers of pavement, which will allow to update the Catalog of Typical Structures of Prone and Semi-rigid Surfaces. The results of research and analysis will be known next year. The works will be carried out as part of the research program «Optimization of the asphalt structure of the road surface thanks to the use of modified bitumens». The scientific consortium consists of Warsaw University of Technology and the Research Institute of Roads and Bridges in Warsaw, in addition to the Gdańsk University of Technology. University of Gdańsk to examine the causes of poverty and social exclusion

2019-07-24

The University of Gdańsk is one of the implementers of the WorkYP project (Working and Yet Poor / Working, but still poor). Researchers will analyze the causes of poverty and social exclusion, which is not caused by unemployment. For many years, the phenomenon of alienation caused by low incomes was mainly due to the lack of work and stable income. Meanwhile, in the last decade there have been groups of excluded people who are active in the labor market, but the level of their received remuneration or its frequency does not provide a decent standard of living. The project focuses on those groups of people who remain on the labor market, whose level of remuneration and other working conditions do not guarantee an adequate standard of living. Activities will be carried out for three years in a consortium coordinated by the University of Luxembourg. The project's budget amounts to over EUR 3.25 million.

University of Adam Mickiewicz in Poznań to launch the Center of Drones

2019-07-25

The Faculty of Political Sciences and Journalism at the Adam Mickiewicz University in Poznań wants to create the Dron Center as the first at the Polish university. At the beginning, as part of the awarded grant, the university will buy several top-quality devices. Already a dozen lecturers have been trained to teach students. The drone workshops will be included in the curricula in the following fields: National security; State management; Journalism and Social Communication. They will be practical courses. Most hours students will spend on learning to move the drones, firstly through professional flight simulators, then the real drone purchased by the university. Students after finishing the workshop will be able to receive the certificates of: VLQS - Visual Line of Sight, and BVLOS - Beyond Visual Line of Sight.

More and more foreign students apply for Warsaw universities

2019-07-26

The application period for Warsaw universities is ending. This year, the University of Warsaw and the Warsaw University of Technology have attracted more students, including from abroad. - The number of foreign candidates for studies at the University of Warsaw is constantly growing - said Anna Korzekwa, spokesman of the University of Warsaw. The applicants come from Ukraine, Belarus and also from Germany or France. Management and international relations are still popular. The number of foreign students at the Warsaw University of Technology is also growing. - There are many students from abroad who want to study in Polish - says Prof. Janusz Walo from the Warsaw University of Technology. We have about 200 students from Ukraine, Belarus and Kazakhstan – he adds.

University of Life Sciences in Lublin to launch a new study-Dairy

2019-07-26

In the academic year 2019/2020, the University of Life Sciences in Lublin is starting the full-time studies at the Faculty of Dairy Science. This course is implemented in close cooperation with the dairy industry. The study of dairy was created in response to signals received from dairy plant owners, who notice the need to supplement their staff with well-educated employees - says Iwona Pachcińska, spokesman and head of the University Promotion and Exchange Department at the University of Life Sciences in Lublin. The University of Life Sciences in Lublin ensures that graduates are provided with employment in dairy plants where they will have their internships.

Dietetics is the most popular study of the University of Agriculture in Krakow

2019-07-26

This year, the University of Agriculture in Krakow (URK) prepared 2120 places for full-time MA students. The first application period has already ended and on average over 2 candidates competed for every free place. Most people were interested in dietetics (8.4 per place). Other most popular studies include: Transport and logistics (6.9), Brewing and malting, and Biotechnology (3.53 each), Renewable energy sources and waste management (2.65), Garden art (2.53) and Technology food and human nutrition (1.21 per place). There are 7 faculties at the URK and the University Center of Veterinary Medicine at the Jagiellonian University provides study of Veterinary Medicine. Currently, 30 fields of study are offered, including 2 conducted exclusively in English and 6 conducted both in Polish and English. There are 74 specialties in the entire university.

University of Gdańsk establishes Association of Physical Culture

2019-07-26

The University of Gdańsk established the Association of Physical Culture of the University of Gdańsk. The association, whose partner is Olivia Business Center, will organize and run classes and sports sections aimed at developing physical activity among students as well as children and teenagers. The initiative to establish the association is an expression of the founders' concern for the development of all forms of physical activity aimed at improving the physical and mental condition of young people and students and their support in achieving better sports results at all levels. The association will also take care of people exposed to social exclusion, in particular people with disabilities or from disadvantaged backgrounds. Another task of the association is also to organize the participation of individual teams in competitions organized by the Polish Basketball Association and other Polish and international sports associations.

University of the Third Age of the University of Wrocław develops the competences of seniors

2019-07-26

The University of the Third Age of the Wrocław University is implementing the project „University of Seniors - an innovative approach in adult education”, which took first place in the competition of the National Center for Research and Development. The project assumes the development of four key competences, indicated by the European Union as essential in the lifelong learning process. Regardless of the age, seniors need IT, language, socio-civic competences and skills related to the use of experience. Wrocław University of the Third Age also proposes content that meets the requirements of the modern world - coping with stress, conflict resolution, mindfulness and relaxation. The implementation of activities will cost over PLN 1 million, the whole amount will be financed from the European Union funds. The project is a large-scale program and will be completed in 2021. Kozminski University and McDonald's jointly open a new field of study

2019-07-29

McDonald's in cooperation with the Leon Koźmiński University in Warsaw created a new field of bachelor studies for network employees - management in the QSR sector (quick service restaurants). Only McDonald's employees will be able to apply for this study. They are to be part-time undergraduate students with a minimum of three months' work experience, secondary education, but no higher education. Classes will start in October 2019, and the costs of educating students will be covered entirely by the employer. The course will be conducted in a dual system, which consists in combining learning with practice in the company. The study program includes 1100 hours, half of which will be devoted to workshops and internships at McDonald's, and another half to the classes

and lectures at the university. The study program will include issues related to environmental protection, team management, marketing, finance, IT or logistics.

Białystok University of Technology to launch a new study- Cybersecurity

2019-07-29

Białystok University of Technology in cooperation with the NASK National Research Institute is launching new postgraduate studies in the field of Cyber Security. The studies cover technical, legal and organizational issues related to protection against computer threats. Candidates can apply for studies that will start in October. Postgraduate studies Cyber security are divided into two parts. The first part about the Network Security Administrator specialization will last 2 semesters. After graduation, the studies may be continued for 1-semester with the specialties: ICT Security Analyst and Network Security Engineer. The study program covers technical issues and organizational procedures related to data security and the protection of computer networks. Classes will be taught by lecturers of the Faculty of Computer Science at the Białystok University of Technology and specialists from NASK's National Research Institute.

University of Economics in Poznan receives the title „Top Business School”

2019-07-29

The Poznań University of Economics maintained its position in the international Eduniversal ranking in the „Top Business School with significant international influence” category. The title „Top Business School” is awarded to 200 of the best business universities in the world. The Eduniversal lists 17 programs of studies at the University of Economics in Poznań. No other Polish university can boast of such a result. Seven programs were qualified to the highest category of 4 stars. The others received three stars, none of the programs ended in the lower categories. The «Eduniversal Masters Ranking - the best Master & MBA worldwide» ranking, assesses 1000 best Master's and MBA programs in the world. The

methodology developed by Eduniversal also takes into account the amount of the students' remuneration in their first place of work and the assessment of the HR departments of the leading companies and the students themselves.

Kielce University of Technology in Kielce signs cooperation agreement with Ukrainian university

2019-07-30

The Kielce University of Technology has signed a cooperation agreement with the National University of Water and Natural Resources Management, located in Rivne, Ukraine. The subject of the contract is to improve didactic processes and provide mutual exchange of scientific experiences. - University of Rivne in Ukraine is very similar to ours. It has more or less the same faculties and the same studies. We want to encourage students and enable them to double diploma, that is, to provide the possibility of obtaining a diploma from both Ukrainian and our university - said the rector of the Kielce University of Technology, Prof. Wiesław Trąmpczyński.

More schools join the Vistula University Group

2019-07-30

Olsztyn Higher School, which is part of the Vistula University Group, joins the University of Information Technology and Economics of the Society for General Knowledge in Olsztyn. Olsztyn Higher School and the University of Information Technology and Economics, applied to the Minister of Science and Higher Education for their merger. - We trust that during the holiday period this decision will be made and from October 1 we will start acting as one university - says Dr Zdzisław Rapacki, Chancellor of the Academy of Finance and Business Vistula and chairman of the Executive Council of the newly emerging university. The university, which will be established in Olsztyn, will have three faculties. Faculty of Health Sciences, Faculty of Humanities and Social Sciences and the third department with the offer of undergraduate studies in the fields of pedagogy, economics and administration in Kętrzyn.

Students from Turkey join summer school at the University of Technology and Life Sciences in Bydgoszcz

2019-07-30

A group of students from Turkey are participating in the summer classes organized by the University of Technology and Life Sciences in Bydgoszcz, promoting the teaching offer of the University and further development of cooperation. The arrival of 14 students of Kocaturk Colleges secondary school network (Kocaturk Okulları) was planned as part of the agreement signed in February 2018. The intensive program of residence includes: 30 hours of English lessons, introduction to the history of Poland together with elements of the Polish language (as part of workshops) and art workshops. The plan of their stay includes visiting Bydgoszcz along with visits to several municipal museums. The trips to Toruń, Gdańsk and Warsaw are also planned. This is the first visit of such a large group of students from Turkey. They are potential students of the Bydgoszcz university.

Collegium Civitas in Warsaw to launch educational program in the Caucasus

2019-07-31

„TRASC 2 - Europe - what next? Transformational leadership and building trust for young professionals” is a three-day educational program with aim to help people from the three countries of the South Caucasus and Poland develop their skills to become” leaders of transformation „in the region and beyond. The event is organized by the Georgian Institute for Strategic Studies (GISS) in cooperation with Collegium Civitas in Warsaw, with the financial support of the Black Sea Trust. The program aims to strengthen cooperation at the regional and European level by cultivating empathy and building consensus and improving the quality of the debate on European integration.

Student Quality Forum to hold conference in Poznań on the internationalization of education

2019-07-31

The Student Self-government of the Adam Mickiewicz University in Poznań is organizing for the ninth time the national conference on the quality of education - the Student Quality Forum. The forum will be held from 11 to 13 October, its theme will be internationalization. During the conference, academic teachers, members of pro-quality bodies, students dealing with the quality of education and speakers from external institutions will lead panels regarding qualifications that are an important element of education. This year, participants of the Quality Forum will meet at the Morasko Campus in the building of the historical department at ul. Poznan University 7.

University of Casimir the Great in Bydgoszcz supports the disabled people

2019-07-31

The University of Casimir the Great in Bydgoszcz and the Kuyavian-Pomeranian branch of the State Fund for Rehabilitation of Disabled People have signed a contract that will allow the implementation of joint projects for disabled people and support them under the partner initiatives for university students and PhD students. The cooperation of both institutions will enable social and professional activation of disabled persons (in particular students and graduates of higher education), elimination of architectural barriers, introduction of innovative forms of education for disabled children and young people, as well as conducting research in the field of disabled people. The contract will be implemented by the Office for Persons with Disabilities, which is active in support of education and professional and social activation of people with disabilities. Koszalin University of Technology to receive more money for the development

2019-07-31

The Koszalin University of Technology will implement the program „Integrated - Comprehensive Development Program of the Koszalin University of Technology” receiving PLN 7.5 million for the implementation of the project provided by the Ministry of Science and Higher Education. The project provides support for organizational changes at the university through the implementation of management tools, increasing the competences of teaching, management and administrative staff and the competences of students who will participate in internship programs, certified trainings, workshop classes and solving practical tasks. The support is the result of the university's victory in the Knowledge, Education and Development Operational Program. Through various activities, the university can now raise the level of education, improve the effectiveness and availability of the educational offer and continue innovative research by its employees. More: <http://www.tu.koszalin.pl/art/1878>

Jan Kochanowski University of Kielce to launch Center for Medical Simulation

2019-08-01

The Medical Simulation Center is created at the Faculty of Medicine and Health Sciences of the Jan Kochanowski University (UJK) in Kielce as part of the SIMED project. Prof. Stanisław Głuszek, vice-rector for medical affairs of UJK emphasized that thanks to modern equipment students of nursing and obstetrics studies will be able to practice important treatments in the center from the new academic year. The Medical Simulation Center is almost equipped. There are also studios for the students of Dietician faculty. The value of the SIMED project is approximately PLN 4.2 million.

Professor Maksymowicz appointed vice-minister of science and higher education

2019-08-01

Professor Wojciech Stefan Maksymowicz, head of the Department of Neurosurgery at the Faculty of Medicine of the University of Warmia and Mazury (UWM) in Olsztyn was appointed the Undersecretary of State in the Ministry of Science and Higher Education by Prime Minister Mateusz Morawiecki. Professor Maksymowicz will run the Department of Innovation and Development and the Department of International Cooperation in the Ministry of Science. In the years 1997-1999 he was the minister of health and social welfare in the government of Jerzy Buzek. Then, until 2007, he worked at the Central Clinical Hospital of the Ministry of Interior and Administration in Warsaw. In October 2007 he conducted the duties of dean at the UWM Faculty of Medical Sciences. In March 2016, he was elected the UWM vice-rector for medical school. From August 2018 he was an advisor to Jarosław Gowin - deputy prime minister and minister of science and higher education.

University of Silesia to launch a course for foreign language teachers

2019-08-01

Until August 22, the School of Polish Language and Culture at the University of Silesia will conduct a course for foreign lecturers of Polish as a foreign language. It is attended by people who teach Polish every day in schools, colleges and various cultural institutions in Ukraine, Russia, Japan, Slovenia, China and Azerbaijan. Participants take part in several specialist panels: linguistic, literary and cultural, realist and methodical meetings. Classes are aimed to teach them the latest methods and techniques of working as a foreign language teacher, suggesting methodically attractive solutions to selected issues and presenting textbooks, workbooks, lexicons, collections of tasks that have appeared in recent years. Lecturers will also take part in the practice, conducting classes with students participating in the summer

school of language, literature and Polish culture. The course is organized on behalf of the National Academic Exchange Agency.

Researchers carry out monitoring tests for ticks in Warmia and Mazury

2019-08-02

Researchers from the University of Warmia and Mazury (UWM) in Olsztyn, commissioned by the Warmia and Mazury Marshal's Office, began monitoring tests for ticks. They want to develop a threat map for the province. - In Warmia and Masuria, there is a high percentage of ticks infected with *Borrelia burgdorferi*, or spirochetes that cause Lyme disease. Our research shows that among removable ticks from domestic and wild animals, mainly from deers of that 24% are infected with spirochetes - says Dr Małgorzata Dmitryjuk from the Department of Biochemistry at the Faculty of Biology and Biotechnology, UWM. The final results of the research will be posted on the website of the Marshal's Office in Olsztyn. The researches will allow to undertake preventive and educational activities and should help the sanitary and epidemiological services to work with vulnerable groups (foresters, farmers, energy services) as well as physicians and residents of the region.

State Higher Vocational School in Chełm signs a new agreement with a company from the aviation industry

2019-08-02

LOT Aircraft Maintenance Services (LOTAMS) will support the education of students of the State Higher Vocational School (PWSZ) in Chełm, who study the aviation mechanics specialty. On the basis of the agreement, PWSZ graduates in Chełm will be able to be employed at LOTAMS (Aircraft Maintenance Services). This company is a provider of aircraft maintenance services and the only Embraer Authorized Service Center in Central and Eastern Europe. The signed agreement sets out in detail the scope of cooperation, which will concern the organization of

apprenticeships and internships for students, graduates and lecturers of the State Higher Vocational School in Chełm. Chełm School, previously signed similar agreements with PLL LOT, Wizzair and Enter Air.

National Science Center to support young scientists with almost PLN 54.5 million

2019-08-02

The National Science Center (NCN) will finance 159 scholarships for students, 50 projects carried out by scientists up to three years after the PhD studies and five internships in foreign research teams for people applying for grants from the European Research Council (ERC). The National Science Center will allocate nearly 54.5 million PLN for scholarships, projects and internships for young scientists under the Etiuda 7, Sonata 3 and Uwertura 3 competitions. Young scholars by both age and career criteria are the most active group in terms of the number of submitted and qualified applications. That is why we want the grant the offer taking into account their needs and expectations - says Prof. Zbigniew Błocki, director of NCN. - An important component of competitions addressed to young researchers is internship at a foreign research center, which gives the opportunity to work in international research teams and gain experience, and then transfer it to the native soil - added NCN director.

Young researchers from the Wrocław University of Science and Technology receive scholarships from the National Science Center

2019-08-02

Two young scientists from the Wrocław University of Technology received scholarships from the National Science Center in the seventh Etiuda competition. Over 260,000 PLN will be allocated to complete their projects. Dawid Grabarek from the Chemistry Department thanks to a scholarship of over 152,000 PLN will realize the project «Modeling and characterization of two-photon absorption processes in selected fluorescent proteins by the methods of theoretical chemistry». Maria Pawliszewska from the electronics department earned over PLN 114 thousand for the implementation of the project «Ultrashort pulse generation in 2 um spectral range using nanomaterial-based saturable absorbers». Etiuda is a competition for scientists making their first steps in the research. Within its framework, persons preparing a doctoral dissertation are granted scholarships of 4.5 thousand PLN monthly. In addition, the laureates can take internships at a foreign research center of their choice. They will receive from about 6 to approximately 18 thousand PLN monthly to cover costs.

University of Silesia to cooperate with Chorzów as part of the „University of the Best” program

2019-08-02

The University of Silesia in Katowice will cooperate with Chorzów as part of the „University of the Best” program. The contract was signed by the vice-mayor of the city, Wiesław Ciężkowski and vice-president for education and students of the University, Prof. Ryszard Koziołek. The «University of the Best students» program aims to develop the skills of the most talented students of primary and secondary schools, as well as to present the educational offer of the university and to encourage young people to

study in the Silesian Voivodeship. The initiators of this initiative are the University of Silesia and the city of Katowice. As part of the program, ten best students from primary and secondary schools and residing in Chorzów will be able to start work under the supervision of tutors - scientific supervisors supporting the selection of the optimal scientific path and adapting it to the student's interests.

Students of the Poznan University of Technology receive Diamond Grants

2019-08-02

Two Poznan University of Technology students became the laureates of the Ministerial Diamond Grant program, intended for graduates of engineering / bachelor studies or students after the third year of regular Master's studies who carry out research. The co-financing will allow Grzegorz Miebs to examine new methods of computer-aided decision, resistant to learning data imperfections, and Hanna Orlikowska to implement the project: „Use of forced emission microscopy for imaging systems with very low fluorescence efficiency, in particular selected components of model biological membranes”. This year, Deputy Prime Minister Jarosław Gowin awarded over PLN 17 million to finance the projects of exceptionally gifted students. In the 8th competition, an expert jury selected 85 winners. They will receive up to 220,000 PLN for the implementation of their first independent research projects, lasting from 12 to 48 months.

„Catechist - a man with a class. Program of innovative pedagogical preparation for teaching religion”

2019-08-05

The Faculty of Theology of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw is launching the project „Catechist - a man with class. Program of innovative pedagogical preparation for teaching religion”, supported by the National Center for Research and Development (NCBiR). The project will last 38 months (from 01/09/2019 to 30/09/20),

and its headed by Dr Aneta Rayzacher-Majewska - assistant professor at the Department of Fundamental and Material Catechetics. The project aims to improve the process of obtaining qualifications for religious education by students of UKSW theology and alumni of seminary schools affiliated to the Faculty of Theology of UKSW. The participants will be students of the 3rd year of theology and of the 4th year of clerical seminars.

Call for proposals for the CENTRAL university network competition

2019-08-05

Until August 21, 2019, applications can be submitted in the competition for international research teams led by young scientists - PhD students and people with a PhD degree. The competition is organized by the network of CENTRAL universities as part of the CENTRAL-Kollegs project. Central European Network for Teaching and Research in Academic Liaison (CENTRAL) is a university network that was established in 2014 at the initiative of the Humboldt University in Berlin. The goal of the network is to support international exchange and research work of young scientists. The network includes University of Warsaw, Humboldt University in Berlin, Charles University in Prague, University of Vienna, Eötvös Loránd University in Budapest. Applications can be submitted jointly by young researchers from three universities belonging to the network. Forms should be sent electronically by 21 August. Funding is granted for the organization of workshops during which teams directed by applicants and extended to include students will develop and implement short-term research projects. The call can be attended by representatives of all disciplines. More: https://www.projekte.hu-berlin.de/en/central/central-kollegs-en/central-kollegs-en?set_language=en

Agreement on cooperation between the Krakow University of Technology and the Nowotarski District

2019-08-05

Organization of joint scientific, scientific and research and educational undertakings in areas related to architecture, construction, spatial management, clean air engineering, protection of monuments and transport is one of the main assumptions of the cooperation agreement concluded between the Krakow University of Technology (PK) and the Nowotarski District. The agreement was signed by the rector of the Krakow University of Technology Prof. Eng. Jan Kazior, Head of the Nowotarski District- Krzysztof Faber and Deputy Head of the Nowotarski District- Bogusław Waksmundzki. -I am very happy that the Krakow University of Technology will have such a great partner as the Nowotarski District. This cooperation will certainly be fruitful for both parties. We are open to any proposals to participate in various projects - declared the Rector of the CP.

Quality-assurance program of the Silesian University of Technology

2019-08-05

Employees of the Silesian University of Technology who demonstrated in 2018 a special commitment to the development of the university will receive an additional remuneration. The prizes will also be offered to the organizational units. The pro-quality program introduced by the university's authorities is an element of strategic, systemic and long-term action for development. The aim of this project is to reward work results while supporting further progressive scientific activities. The program enables employees to increase basic salary even by PLN 1000 depending on the type and value of achievement. The achievements recorded in the Dorobek database at the Silesian University of Technology include obtaining a patent / utility model, publication in high-ranked magazines, implementation of a project from the HORYZONT program depending on the

function performed by the leader / partner projects. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListWiadomosci &Page=1&WebPartTitle2=News&Filter1Field2=Identyfikator&Filter1Value2=2796>

Warsaw University of Technology begins cooperation with Framatome

2019-08-06

Warsaw University of Technology and the Framatome company have signed a cooperation agreement that assumes cooperation in the field of science and staff education for nuclear energy and other nuclear industries. The signatories of the contract are the rector of the Warsaw University of Technology Prof. Eng. Jan Szmidt, and the president of Framatome Bernard Fontana. The agreement provides for joint education of personnel for nuclear energy and implementation of scientific projects. Also, Framatome committed to the annual preparation of several diploma internships for students of the Nuclear Power Engineering Faculty of the Faculty of Power and Aeronautical Engineering at the Warsaw University of Technology. Framatome and the university are organizing specialized scientific lectures related to nuclear technology, also available to a wider group of students, including students from other universities, research institutions and public administration.

Lodz University of Technology establishes Interdisciplinary Doctoral School

2019-08-06

Lodz University of Technology (PŁ) from the new academic year 2019/2020 is launching the Interdisciplinary Doctoral School (ISD), in which the innovative educational program in English will be adapted to the needs of interdisciplinary PhD students and implemented in cooperation with other research centers in the country and abroad. - Our expectations, needs and proposals of new solutions aimed at creating conditions for the best possible development of scientists at an early stage of their careers were accepted. What's more, the rector of PŁ Prof.

Sławomir Wiak entrusted the specialists strongly involved in activities for the doctoral community in Poland and in Europe to organize the Interdisciplinary Doctoral School. In this way, in consultation with other members of the PŁ academic community, a new chapter was added in the history of doctoral life for the Lodz University of Technology. Supervision over the activities of the Interdisciplinary Doctoral School is exercised by the Scientific Council of the Doctoral School, composed of representatives of disciplines and doctoral students themselves.

Collegium Civitas to offer dual studies in online marketing

2019-08-06

Collegium Civitas in Warsaw is launching the course of Management of dual studies Internet Marketing and e-commerce. The specialty will be implemented as part of the project „Marketing of the future - dual studies at Collegium Civitas”, co-financed by the European Union, in cooperation with experts from the Internet Industry Employers Association IAB Poland. More than 50% of the program will be implemented in the form of practical classes and paid traineeships held at the headquarters of a specific company, which is a partner of the faculty. Thanks to this formula of learning, students get the opportunity to create a unique diploma thesis, which will be not only a response to the industry's needs, but also a major step towards professional work.

Tarnów State Higher Vocational School completed the first part of application process

2019-08-06

The first part of application process at the State Higher Vocational School in Tarnów ended. The most popular courses are: administration, economics, computer science, nursing, English philology and physiotherapy. This year, the university has prepared about 1,600 places for students. The proposals of the Institute of Mathematics and Natural Sciences were also very popular. A dozen percent more people than last year declared to study there. Persons who have been qualified for admission must confirm their decision to study at the PWSZ and provide the required documents by 9 August. Those who did not manage to get to university will still have a chance in supplementary application process. It will start on September 2 and will last until September 13. The results will be available at the end of next month.

Scientists from the University of Warsaw to create unique map of the Milky Way

2019-08-06

Scientists from the OGLE team (The Optical Gravitational Lensing Experiment) from the University of Warsaw created a new, unique three-dimensional map of the Milky Way. The article, in which researchers described their map, was published by the journal Science. This is the first completely Polish work in this journal for 30 years. OGLE is a project run by the University of Warsaw Astronomical Observatory headed by Professor Andrzej Udalski. This project is one of the world's largest photometric surveys of the sky. Researchers from the University of Warsaw created a three-dimensional map of the Milky Way on the basis of direct measurements. In their opinion, the best way to achieve this goal would be to focus on a group of stars with similar properties. To create a map, astronomers used over 2,400 cepheids (young stars up to 250 million years old), most of which were detected with the help of a Warsaw telescope at the Las Campanas Observatory in Chile.

PhD student of the University of Economics in Wroclaw to receive Scholarship of the National Science Center

2019-08-06

Michał Pająk, PhD student at the Department of Mathematical Economics of the Wrocław University of Economics, became the laureate of the scholarship in the Etiuda competition organized by the National Science Center. The PhD student will receive almost 110,000 PLN for the implementation of the project «Nash equilibrium and optimal solutions in the sense of Pareto in dynamic representations of shared resources». Etiuda is a competition aimed at scientists who take their first steps in research. Persons preparing a PhD dissertation are awarded scholarships in the amount of 4.5 thousand PLN monthly. In addition, the laureates can take internships at a foreign research center of their choice. They will receive from approx. 6 to 18 thousand PLN monthly to cover costs related to a stay abroad.

Lublin University of Technology becomes more international

2019-08-07

From the new academic year, the Lublin University of Technology will cooperate with up to 40 countries. The university cooperates with students and lecturers from Kyrgyzstan, India, Japan, Kosovo, Panama and Armenia. - We gain a lot as a university. The quality of teaching and research is on the rise. The lecturers create new contacts, gain partners for research - said Celina Handzel with the Center for International Education at the Lublin University of Technology. This year, the university opens second-cycle studies of electrotechnics and IT in English, as well as the studies at the Faculty of Civil Engineering and Architecture and at the Faculty of Management. They are also available for candidates from Poland.

Cooperation agreement between Krakow University of Technology and Town of Skawina

2019-08-07

Rector of the Krakow University of Technology (PK) Prof. Eng. Jan Kazior and the deputy mayor of Skawina Town and Commune Tomasz Ożóg signed a cooperation agreement. Under its assumptions, the Krakow University and Skawina will conduct joint activities concerning environmental protection, spatial development, construction, municipal infrastructure, sustainable development, transport, protection of monuments and natural resources. Under the cooperation, the partners are expected to create joint expert teams, organization of educational and cultural projects, conducting theoretical analyzes and experimental research in areas of knowledge of both sides. Skawina Town and Commune committed to supporting the organization of internships and apprenticeships for PK students, as well as assistance in the preparation of engineering and master's theses.

University of Warsaw to be the highest-ranked Polish university by the Center for World University Rankings 2019/20

2019-08-07

Center for World University Rankings 2019/20 is one of the most comprehensive rankings of universities from around the world. The authors of the ranking analyze over 20,000 universities. The following aspects are taken into account: the quality of teaching, the economic future of graduates, the quality of researchers and the results of research carried out by external experts, and not based on survey data obtained from the university. What is important, not only the research potential but also the quality of didactics is analyzed. In the latest ranking, the University of Warsaw took 260th place in the world. The Jagiellonian University in Kraków was classified at 381, Warsaw University of Technology at 576, AGH University of Science and Technology in Kraków at 633, and Poznan University at 741st place. The leader of this year's Center for World University Ranking is the American Harvard University. More: <https://cwur.org/2019-2020.php>

Lublin University to launch post-graduate studies in radioecology

2019-08-07

The Maria Curie-Skłodowska University (UMCS) in Lublin until October 15, 2019 will accept applications for post-graduate studies in radioecology. The studies are aimed at graduates of higher education who want to broaden their professional qualifications with knowledge in the field of radioecology. The study offer is also addressed to fire brigade officers in connection with the amendment of the Atomic Law and the imposition of the obligation to eliminate threats in case of radiation incident on the national rescue and firefighting systems. The acquired knowledge and skills „will enable graduates to have a rational look at the problems of nuclear energy, whose development is planned in the coming years in Poland”.

PhD student of the University of Economics in Poznan receives a scholarship from the Etiuda program

2019-08-07

Marcin Bielicki, PhD student from the Department of Monetary Policy and Financial Markets at the University of Economics in Poznan, became the laureate of the Etiuda 7 competition for doctoral scholarships granted by the National Science Center. The renowned scientist will receive an 11-month scholarship for the preparation of a PhD thesis «Measuring the efficiency of public venture capital funds» and will hold a 4-month internship at the renowned Dutch center of Rotterdam School of Management. Etiuda is a competition aimed at scientists who take their first steps in the researches. Persons preparing a PhD thesis can receive scholarships of 4.5 thousand PLN monthly. In addition, the laureates can take internships at a foreign research center of their choice. They receive, depending on the country of stay, from approx. 6 to 18 thousand PLN monthly to cover costs related to a stay abroad.

Researcher of the University of Life Sciences in Wrocław receives Scholarship of the Foundation for Polish Science

2019-08-07

Dr Kamil Kaźmierski from the Institute of Geodesy and Geoinformatics of the University of Life Sciences in Wrocław became a scholarship holder of the Start Program of the Foundation for Polish Science, which supports the most talented young scientists. - The main subject of my work is to increase the accuracy of positioning using global satellite navigation systems (Global Navigation Satellite Systems, GNSS). I focus on real-time positioning using the PPP (Precise Point Positioning) technique. Over the past few years, I have been refining the positioning method using satellite observations from all global navigation systems: US GPS, European Galileo, Russian GLONASS and Chinese BeiDou - says Dr Kamil Kaźmierski. The Start Program is the largest scholarship program in Poland for the best researchers

before age of 30 representing all fields of science. This year, for the 27th time, the Foundation chose 100 winners. More: http://www.glos.upwr.edu.pl/aktualnosci/49732/stypendium_fundacji_na_rzecz_nauki_polskiej_dla_dr_kazmierskiego.html

University of Technology and Life Sciences in Bydgoszcz to receive 700 thousand PLN of funding for the project „Dialog 2.0”

2019-08-07

The „Dialog 2.0” project submitted by the consortium of the University of Technology and Life Sciences in Bydgoszcz together with external partners: Bydgoszcz Industrial Cluster and „Employers of Pomerania and Kuyavia” Employers Association received funding from the Minister of Science and Higher Education under the „DIALOG” program. The project is an attempt to develop effective solutions in response to new challenges faced by Polish universities. Its aim is to design, implement and popularize a relational model of dialogue and cooperation of the University of Technology and Life Sciences with its external environment. The «Dialog 2.0» project, developed in the area of «Science for Innovation», is planned to be implemented within two years. Ministerial co-financing of activities amounts to almost 700,000 PLN. More: <http://ctt.utp.edu.pl/dialog-2-0/>

Polish stand Ready, Study, GO! Poland at the fair in China

2019-08-08

The National Agency for Academic Exchange (NAWA) is planning to organize the Ready, Study, GO! Stand Poland at the China Education Expo 2019 trade fair that will take place on October 22 in Guangzhou and October 24 in Chengdu (Sichuan). As part of the trip, it will be possible to plan additional events, such as meetings with Polish diplomatic missions or visits to universities. These plans depend on the number of Polish higher education institutions applying for the trip. For organizational reasons, before making any commitments, NAWA asks participants to express interest in the event through pre-registration, which will open over the next few days on the NAWA website: www.nawa.gov.pl

Medicine is the most popular study at the University of Technology and Humanities in Radom

2019-08-08

The University of Technology and Humanities in Radom has completed the first part of application process. Traditionally, the most popular study is the Medicine. There were 20 students per one place. After the first part of application process about 600 people were accepted. Medicine at the University of Radom is the most popular study from the beginning. This year around 2,000 people have applied for this course. Last year there were 1500 applications. Considering non-technical faculties, for several years, the most popular have been: economics, English philology, pedagogy, nursing, physiotherapy. When it comes to technical studies, the most popular are IT, transport and logistics, mechanics and machine construction.

Scientist of the West Pomeranian University of Technology in Szczecin wins Etude 7

2019-08-08

Wojciech Ignaczak, PhD student at the West Pomeranian University of Technology in Szczecin, became a laureate of the Etuda 7 competition. Thanks to funding from the National Science Center, the young scientist will go to a foreign research internship. The acquired grant will allow the doctoral student to travel to Denmark for 4 months, to Danish Polymer Center located at Denmark University of Technology in Copenhagen and to study the fiber-polymer matrix in basalt fiber reinforced composites using the method of broadband dielectric spectroscopy. The subject of the doctoral dissertation of a young scientist from the Szczecin university are «Thermoplastic PP / PBT composites reinforced with basalt fiber». The doctoral student's promoter is Prof. Eng. Mirosława El Fray, director of the Nanotechnology Didactic and Research Center, director of the Polymer Institute and head of the Department of Functional Materials and Biomaterials of the Szczecin University.

Silesian University of Technology to carry out the most implementation doctorate in Poland

2019-08-08

The Silesian University of Technology will receive funds for the implementation of 78 implementation doctorates, including 10 in the field of artificial intelligence. This is the largest number of such doctorates at all Polish universities under the third program of the „Implementation doctorate” initiated by the Ministry of Science and Higher Education. 61 applications were submitted for the competition, of which 52 applications with 449 candidates for the program were submitted into the module «Implementation doctorate I», while 9 applications with 36 candidates applied for the program in the module „Implementation doctorate II in the field of artificial intelligence”. As part of the module „Im-

plementation doctorate I” the Silesian University of Technology received 68 implementation doctorates, in the module „Implementation doctorate II in the field of artificial intelligence” it also received the most - 10 doctorates.

Free places to study available at the University of Bialystok

2019-08-09

The University of Bialystok Supplementary will start the application process in mid-August. New places are available for both bachelor's and master's studies. Candidates will still be able to register for 13 faculties. It is biology, chemistry, eco-business, environmental protection, physics, computer science and econometrics, mathematics, history, eastern studies, philosophy and ethics, cultural studies, Polish philology and general philology including 4 specialization modules: French philology (for candidates starting learning French), applied French with Spanish, Russian philology (for candidates starting Russian) and Russian philology (for candidates with knowledge of Russian). In most of these studies there are from a few to several available places. Applications can be sent to the Internet Candidate Registration (IRK) from August 13 and will last until September 12.

English management is the most popular field of study at Gdańsk University of Technology

2019-08-09

English language management, economics, spatial management, mechatronics and production management and engineering - these are the most popular fields of study at the Gdańsk University of Technology in application process for the academic year 2019/2020. A total of 26663 candidates (including 25324 for first cycle studies) applied for full-time studies, of whom 4305 people were accepted, including 3740 people for first cycle studies. The highest number of applications per one place was recorded in the field of management in English (18.3 persons per place) and economics (17.7 persons per place) at the faculty of management and economics. Almost 15 people (14.9 persons per place) applied for a place in the field of spatial management at the faculty of architecture and in the field of mechatronics (14.5 people per place) at the faculty of mechanical engineering. The top five most popular fields also include production management and engineering (13 people per place) at the faculty of mechanical engineering.

Physicists Boulevard launched in Wrocław

2019-08-09

The first stage of construction of the Physicists Boulevard, a unique experimental garden on the Zwierzyński Boulevard in Wrocław, has begun. Acoustic mirrors are the first of the many attractions that are to show in an accessible way the laws of physics. - The Zwierzycki Boulevard is currently forgotten, but it is a charming place in the city center with a magnificent avenue of trees and a view of the Oder. We decided to create a project for its revitalization. We want to use the space without harming the plane trees growing here - says Dr Maciej Matyka from the faculty of physics and astronomy of the University of Wrocław. The project involves the assembly of four further attractions: a huge sundial, rotary dials with optical illusions, toys with delayed sound and

a rotating platform. An additional attraction will be the geological lapidarium with samples of rocks and boulders on the background of the map of Lower Silesia. More: <https://uni.wroc.pl/zwierciadla-akustyczne-na-poczatek-bulwaru-fizykow/>

Scientists of the University of Silesia won the Sonatina 3 competition

2019-08-09

Two scientists from the University of Silesia received funding for research projects at the Faculty of Earth Sciences. The money - almost 1.7 million PLN is allocated from the Sonatina 3 competition, organized by the National Science Center. Thanks to co-financing, Dr Dawid Surmik will implement the project «Osteopathology in the fossil record as a carrier of paleoecological and paleoepidemiological information» (co-financed with the amount of PLN 772 070), and Dr Ashley Gumsley will examine «Implications of U-Pb geochronology of apatite for aid processes in the area of Kraton Kaapvaal, Africa» co-financed with the amount of PLN 927 545). The Sonatina is a competition addressed to scientists with a PhD title held for no longer than 3 years. The grant covers full-time employment of the laureate in a Polish research unit, implementation of a research project and an internship in a foreign research center lasting from 3 to 6 months. The project implementation period may last 24 months or 36 months.

Chemists of the Nicolaus Copernicus University in Toruń receive Implementation doctorates

2019-08-09

Scientists from the chemistry department of the Nicolaus Copernicus University in Toruń won the „Implementation doctorate” competition organized by the Ministry of Science and Higher Education. The PhD student included in the program will work in two places under the supervision of two substantive tutors - indicated by the employer and coming from a research unit. The monthly amount of doctoral

scholarship for one PhD student is PLN 2,450.00. The money will be allocated to co-finance the costs of using research infrastructure to carry out research conducted by a PhD student and to finance a doctoral scholarship during the period of doctoral studies provided for in their program, not longer than 4 years. Implementation doctorates are a modern and innovative education system designed primarily to enliven cooperation between researchers and the socio-economic environment, and to improve knowledge transfer between science and business.

Swiss government scholarships also for Poles

2019-08-12

The government of the Swiss Confederation offers scholarships, research stays, doctoral studies and postdoctoral internships for Polish citizens for the academic year 2020/2021. These scholarships are awarded annually to promote international academic exchange and scientific cooperation between Switzerland and 180 other countries of the world. Scholarships are intended for young researchers from abroad who have a master's degree or a PhD title. The purpose of Swiss scholarship programs is to select candidates who will complete a postdoctoral scholarship or research stay or begin their studies at one of 10 Swiss Canton universities, two Swiss technology institutes or scientific institutes and higher vocational schools. More: www.sbf.admin.ch/scholarships_eng

State Higher Vocational School in Nowy Sącz to launch Internal security

2019-08-12

The Minister of Science and Higher Education decided that the State Higher Vocational School (PWSZ) in Nowy Sącz will obtain the right to conduct first studies with a practical profile in the field of Internal Security. Electronic application process for candidates will start at the end of August. In the course of studies the students will obtain the following qualifications: safety manager (mass events), providing qualified first aid, sport instructor in the field of swimming and downhill skiing, lifeguard. The graduates will be prepared to work in public administration with a focus on internal security of the state.

University of Life Sciences in Lublin adapts to the challenges of Science 2.0

2019-08-12

The University of Life Sciences (UP) in Lublin has started the implementation of the new project „Life Sciences MIT program to adapt the University of Life Sciences in Lublin to the challenges of Science 2.0”. The program was developed by the UP Science Center in Lublin and its budget is over PLN 7.7 million. Activities planned in the project will be implemented until June 20, 2023. The main goal of the project is to increase the efficiency of resource utilization and the potential of the University of Life Sciences in Lublin towards ordering and strengthening the university management system, increasing education effectiveness with particular emphasis on the needs of the economy and the labor market. As part of the project, the creation of a new field of study «Veterinary Analytics», adaptation of the education program in the innovative field «Biosciences» to socio-economic needs, modification of the education program at the Faculty of Veterinary Medicine in the field of Veterinary Medicine, implementation of the Competence Development Program for students of the Faculty of Biology, Animal Sciences and Bioeconomy, implementation of the Competence Development Program of students and

research and teaching staff of the Faculty of Veterinary Medicine, effective use of university resources are planned.

Open University courses gain record popularity at the University of Warsaw

2019-08-12

Students started to apply for the courses of the Open University of the University of Warsaw (UOUW). The first day broke the record, when from 300 courses, as many as 204 course groups were completed and launched on the very first day. This is the best result in the UOUW's 11-year history. The study «Learn from the best», which has been launched again, has become particularly popular. It is an opportunity to meet outstanding experts from various fields of science. In this trimester the University of Warsaw is recommending the course: „What did the European Union give us? Socio-economic balance of Poland's membership in the community”. Economists Prof. Jan Michałek, Prof. Jerzy Wilkin and Dr Mateusz Szczurek will give their lectures on this topic. The course was created in cooperation with the CASE Socio-Economic Analysis Center. The application process will last for another two months or until groups are completed. The courses will be conducted by lecturers from the University of Warsaw and the Medical University of Warsaw, and prices start from PLN 275 for 30 hours. The classes are dedicated to all students over 16 years of age. More: https://www.uo.uw.edu.pl/aktualnosci/oferta2019_2020

University of Technology and Life Sciences in Bydgoszcz to cooperate with the teacher education center

2019-08-12

The University of Technology and Life Sciences in Bydgoszcz will cooperate with the local Municipal Teacher Education Center. The cooperation agreement was signed by the rector of the university, Prof. Eng. Tomasz Topoliński and director of the Center, Dr Łukasz Kosiński. The agreement provides for joint

consultation and development of scientific research programs, preparation and publication of information materials and methodological notebooks for teachers, promotion of events related to technical education and scientific achievements in the educational environment. The cooperation will also consist in organizing joint conferences or workshops, as well as obtaining external funds - domestic and foreign grants.

Transport faculty at the Gdańsk University of Technology to receive KAUT accreditation

2019-08-12

The Accreditation Committee of Technical Colleges (KAUT) has accredited the Transport field of study at the Faculty of Civil and Environmental Engineering of the Gdańsk University of Technology. The accreditation will be valid until the academic year 2022/2023. KAUT is an environmental commission working to improve the quality of education of Polish technical universities. It was established by the Conference of Rectors of Polish Technical Universities and belongs to the European accreditation commission. In September 2013, it obtained the license from the European Network for Accreditation of Engineering Education to grant the European certificate EUR-ACE Label. Thus, organizations that receive the KAUT certificate simultaneously receive the EUR-ACE certificate for the studies. KAUT accreditations cover five more fields of study at the University of Technology: Biotechnology, Civil Engineering, Electrical Engineering, Computer Science as well as Mechanics and Machine Construction.

Nicolaus Copernicus University in Toruń advances in the webometric ranking of universities

2019-08-12

Nicolaus Copernicus University is consistently strengthening its position in the webometric ranking of world universities. In the latest Cybermetrics Lab classification it is on the 7th position in Poland and 709th place in the world. Four indicators are taken into account in the statement published twice a year: Presence - takes into account the size (number of pages) in the institution's Internet domain; Visibility - evaluates the share of external websites that link to the institution's home page; Transparency / Openness - takes into account the number of citations of one hundred best authors based on Google Scholar Citations and Excellence / Scholar - analyzes the number of articles in the 10 percent most often cited scientific journals, based on data collected by Scimago. Compared to the previous ranking, it was promoted by 53 positions. On a European scale, the university ranks 297 place. Among the universities in Central and Eastern Europe it ranks 24th, and in the country - 7th position.

Students and PhD students of Poznań University join the internships in Oman

2019-08-12

Students and PhD students of the Faculty of Geographical and Geological Sciences of the Adam Mickiewicz University in Poznań participated in the international GEOpraktyka project. The fifth project was called „Around the deserts of Oman”. Participants conducted research on the rate and magnitude of potential and actual evaporation in a tropical climate, took samples from the surface levels of soils for the needs of the created database and theses, valorized tourist routes as well as potential and existing geo-sites constituting the development of geotourism. In addition, they carried out the landscape research on one of the most characteristic elements of the landscape in this area - the valleys of periodic rivers (wadi). Students worked on develop-

ing research results, and from September they want to start promoting activities by organizing a series of lectures at universities, schools and cultural centers.

Krakov Society of Women to hold conference „Following the women in mathematics”

2019-08-13

On August 31 - September 2, 2019, the Polish Society of Women in Mathematics and the Faculty of Applied Mathematics of the AGH University of Science and Technology in Krakow are organizing a scientific conference „Following the women in mathematics - in Honor of Sofia Kowalewska”. The aim of the conference is to honor Professor Sofia Kowalewska, called the «princess of mathematics», her significant contribution to the development of mathematics, especially partial differential equations and their applications, and to emphasize Professor Kowalewska's contribution to the fight for women's rights and their equal access to education and work positions. The series „Following the women in mathematics” promotes the achievements and merits of women whose research, professional activity and publications have made a significant contribution to the development of science, mainly mathematics and related sciences.

Jagiellonian University Collegium Medicum receives a grant from the European Union agency EACEA

2019-08-13

The Institute of Public Health (IZP) of the Jagiellonian University Collegium Medicum (JUCM) in Krakow received a grant from the European Union agency EACEA (Education, Audiovisual and Culture Executive Agency). The funds received will allow IUCM to continue international program of Master's studies at Europubhealth + European Master in Public Health. This is the fourth program lasting 13 years. The participation of the best candidates from around the world is possible thanks to European Union funds under the Erasmus + (Erasmus Mundus Joint Master Degrees) program. Selected

Polish students can participate in EUROPUBHEALTH + classes within the MA program of the second year in Public Health also in English.

Polish students and scientists can receive scholarships in Mexico

2019-08-13

The National Agency for Academic Exchange is inviting participants to the Mexican scholarship offer, which includes seven specialized scholarships of 12-month research stays in Mexico for the students holding bachelor's degree and researchers. The purpose of the NAWA personal exchange program in bilateral cooperation is to increase the internationalization of Polish higher education, establish and implement academic cooperation through personal exchange of students and academic staff based on international agreements between Poland and partner countries. More: <https://www.gob.mx/amexcid>

Naval Academy in Gdynia hosts NATO DEEP workshops

2019-08-13

The Naval Academy in Gdynia is implementing the CALT (Computer Adaptive Language Testing) project to implement an innovative program (algorithm) for conducting computer-based language adaptation tests. The Gdynia university hosted NATO DEEP workshops, the entity supporting the project was the Institute of Journalism and Social Communication at the University of Warmia and Mazury in Olsztyn. Eight remote education experts from the University of National Defense of Ukraine from Kiev, the National Defense Academy of Sofia, the Naval Academy of Gdynia and NATO DEEP ADL Portal participated in the workshops. The topics of the workshop concerned the use of the LMS ILIAS platform and the NATO DEEP ADL portal to conduct these tests, in accordance with the NATO 6001 standard. The participants made substantive arrangements and determined directions for future actions, including the conclusion that the next CALT will take place in February 2020.

Results of the survey on the professional perspectives of graduates of the Gdańsk University of Technology

2019-08-13

Graduates of the Gdańsk University of Technology easily find a job and are satisfied with the chosen university, and their salaries belong to the highest in the country. This is evidenced by the results of the annual survey of the perspectives of graduates and the statement prepared by Sedlak & Sedlak. The research sample totalled 4.5 thousand people, including over 2.5 thousand graduates of 2015 and almost 2,000 people who graduated in 2016. In both cases, about 92 percent of respondents were professionally active, with almost half found work already during the studies. The graduates' knowledge and skills translate into their earnings. The HR consulting company Sedlak & Sedlak analyzed the salaries of high educated people who worked less than one year. PG graduates came the fifth in terms of monthly total salaries and the third for Polish technical university graduates. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGncmoQv7K0/content/Szybkie-zatrudnienie-i-dobre-zarobki-wyniki-badania-losow-zawodowych-absolwentow-pg

Participation of Polish universities in the Horizon 2020 program increased significantly

2019-08-14

According to the information provided by the National Contact Point for European Union Research Programs at the end of June 2019, the share of Polish universities operating within the Horizon 2020 program has increased significantly in comparison to June 2018. Horizon 2020 is a program of the European Commission from 2014 to support research, development and innovation. The number of universities that participate in submitted applications increased to 4144 or 33%. The number of projects coordinated by universities increased - to a total of 60 or by almost 28%. The most important is that the funding obtained by universities increased by over 40%, to almost EUR 115 million.

Poles can participate in the Santander Universidades scholarship program

2019-08-14

Santander Universidades Group is inviting students and scholars to participate in the Digital Skills scholarship project, under which 100 people from Argentina, Brazil, Chile, China, Spain, Colombia, Mexico, Germany, Peru, Poland, Portugal, Puerto Rico, the United States, Uruguay and Great Britain, will receive a Santander IE - Digital DNA Scholarship. The trainings will be conducted online in English and Spanish by professors of the IE School of Human Sciences and Technology, one of the schools of the Spanish IE University. The program is intended for students of the last two years of bachelor's and master's studies and graduates who received the diploma not earlier than in 2014. Scholarship holders will take part in two courses. The first of them, New Technologies in Innovation, aims to show the path of technological development from the point of view of companies and how companies use technologies to create a competitive advantage. The second course, Data Science and Visualization in Business, includes practical classes as part of developing the competence of working with data and their visualization, and the use of data science in business development. More: <https://bank.santander.pl/santanderuniversidades-pl/santander-universidades.html>

Medical University of Silesia is 11th best university in Poland according to Center for World University Rankings

2019-08-14

The Medical University of Silesia (SUM) was ranked on the eleventh place in Poland according to the Center for World University Rankings (CWUR), measuring the quality of education and training of students, as well as the prestige and quality of research conducted by researchers. In the latest ranking SUM took 11th place in Poland (out of 37 classified Polish universities) and 933 place of 2,000 universities from all over the world classified in this ranking. In the previous ranking only 10 Polish uni-

versities were classified, including the SUM. The indicators determining the position in the ranking include: quality of education, measured by the number of university graduates who have won the most important international awards, distinctions and medals in relation to the size of the university and employment of graduates, measured by the number of university graduates who got the highest positions in leading global companies in relation to the size of the university.

Criminology is the most popular study at the University of Gdańsk

2019-08-14

In this year's recruitment, the most popular fields of study at the University of Gdańsk are criminology, production of audiovisual forms, English philology, Management of artistic institutions, Scandinavian studies and Psychology. Information technology (practical profile), Film and audiovisual culture, Sinology, National security and American studies are also very popular. The university's offer includes over 80 fields of study, including 8 new ones. This year, the university has planned the admission places for nearly 12 thousand students: 8 743 for full-time studies and 3 127 for part-time studies. Studies at the University of Gdańsk are very popular among foreigners - nearly 500 non-Polish citizens have applied. The most numerous group are citizens of Belarus (330 people) and Ukraine (110 people).

State Higher Vocational School in Tarnobrzeg to invite students to study psychology

2019-08-16

The State Higher Vocational School in Tarnobrzeg has started application process for a new field of study - psychology. This is the only public university in the Podkarpackie Region that will educate masters in this field. Psychology is an extraordinary study needed in Podkarpacie. Its graduates will work in various institutions that at the time of creating this course asked for cooperation in this field. The specialty «penitentiary psychology» will arise as a response to the needs of prisons and detention centers, in particular the Ministry of Justice, in connection with the need to educate as people prepared to work with socially derailed people and criminals are necessary - says the rector of Tarnobrzeg PWSZ Paweł Maciaszczyk. The study is assuming the plans to build a modern women's prison in Chmielów in the Tarnobrzeg powiat, where up to 460 convicts can be detained. The therapeutic department for women addicted to alcohol will also be built on its premises.

Medical University of Silesia in Katowice obtains money for 7 implementation doctorates

2019-08-16

The Medical University of Silesia in Katowice has raised over PLN 2 million for the 7 implementation doctorates in the field of medical sciences and health sciences. All doctorates for which a Silesian medical university applied for funding from the Ministry of Science and Higher Education were accepted. The money will help finance the costs of using research infrastructure to carry out scientific research conducted by PhD students and finance PhD scholarships for 7 PhD students during their PhD studies (no longer than four years). The doctorates will be implemented under the supervision of employers. In total 61 applications were submitted in two modules - «Implementation Doctorate I» (52 applications / 449 candidates) and «Implementation Doctorate II in the field of artificial intelligence»

(9 applications / 36 candidates). The purpose of this formula is to create conditions for the development of cooperation between the scientific community and the socio-economic environment.

Lodz University of Technology to launch Academic School of Leaders

2019-08-19

The Academic School of Leaders is a project implemented by the Foundation of the Lodz University of Technology. It is to encourage young people to start social and student activities. It is addressed to students of the Lodz University of Technology and to secondary school graduates who will start their studies at PŁ this year. This 5-day training trip is planned for participants of the Academic School of Leaders project from September 9-13, 2019. The summary of the whole campaign will be a special November event for students of PŁ. Participation in the project is free. The project is co-financed by the National Freedom Institute - Center for the Development of Civil Society from the funds of the Civic Initiatives Fund Program for the years 2014 - 2020.

Faculty of Public Health at Silesian Medical University receives positive validation by APHEA

2019-08-19

The public health study at the Faculty of Public Health of the Medical University of Silesia in Katowice has passed the validation procedure by the Agency for Public Health Education Accreditation (APHEA). Completed validation means that the program meets international education standards in this field of study and graduates receive education that does not differ from the best science centers in the world. This is the first step to obtain APHEA accreditation, and the whole process should be completed by December 31. APHEA is an accrediting organization for public health education to create in the result of cooperation between the World Health Organization and the Association of Schools of Public Health of the European Region (ASPHER) which

joins together the best universities educating in the field of public health in Europe and other continents.

Prof. Paul Lagarde to receive honorary doctorate of the University of Silesia

2019-08-19

Professor Paul Lagarde will receive an honorary doctorate from the University of Silesia. The ceremony of giving this outstanding lawyer the highest academic award will be held on September 13 in auditorium No. 6 at the Faculty of Administrative Law in Katowice at ul. Bankowa 11b. Professor Lagarde is one of the most outstanding contemporary lawyers dealing with international private law. He is a valued author of numerous publications serving the development of this discipline, which over the past few decades have been a source of inspiration for representatives of science and law practice around the world. Professor Lagarde has participated in numerous government delegations and expert groups that have made a significant contribution to the development of international law instruments of major importance for the development of international cooperation of European countries. The Council of the Faculty of Law and Administration decided to grant him the title of doctor honoris causa of the Katowice University.

Articles promoting Polish universities published on the Times Higher Education platform

2019-08-20

Articles prepared by Polish universities and scientific units appeared on the Times Higher Education platform and won the „Word Promotion” competition organized by the National Agency for Academic Exchange (NAWA) in June this year. The aim of the competition organized by NAWA was the international promotion of the Polish area of higher education and science by creating the possibility of publishing a promotional article on an international multi-channel platform ensuring the widest possible range related to the higher education and science. The Times Higher Education website is visited by over 24 million readers annually. The article of the Maria Curie Skłodowska University in Lublin: <https://www.timeshighereducation.com/hub/nawa-polish-national-agency-academic-exchange/p/why-poland-attractive-international-students> The article of the University Center for Research on the Environment and Sustainable Development of the University of Warsaw: <https://www.timeshighereducation.com/hub/nawa-polish-national-agency-academic-exchange/p/university-warsaw-helping-transition-towards>

Jagiellonian University is the highest classified Polish university in the Academic Ranking of World Universities

2019-08-20

The Jagiellonian University in Krakow took the place in the fourth hundred of world's universities in the just published Academic Ranking of World Universities, also called the Shanghai List. This is the best result of all Polish universities. The Shanghai List, which has been prepared by the Jiao Tong University in Shanghai since 2003, is considered one of the most prestigious university rankings in the world. The creators of the list choose the best 500 from 20 thousand universities. Another 500 forms the so-called reserve list. In this year's 17th ranking, Ameri-

can Harvard was recognized as the best university in the world. American Stanford was classified on the second and British Cambridge on the third place. Considering the Polish universities, experts rated the highest of the Jagiellonian University. The Krakow university was promoted and this year was placed in a group of universities classified in the 301-400 range. In addition to the Jagiellonian University, the University of Warsaw also reached the top 500, which in comparison to the previous ranking took place in the fifth hundred.

School of French Law at the University of Gdańsk started application process

2019-08-20

Application process for the VIII School of French Law at the University of Gdańsk has begun. Classes will be conducted by lecturers at the University of Gdańsk, at the University of Warmia and Mazury and at the University of Toulouse Capitole 1. The organizers are inviting everyone who wants to learn more about French and European law. The course is addressed to students or graduates of universities (in particular law, administration, economics, management, Roman philology, history, diplomacy, political sciences), as well as to PhD students, trainees, practitioners of French law and language interested in learning the French and European law system and wishing to become acquainted with French legal terminology. Applications will be accepted until January 15, 2020, the order of applications decides about their acceptance. Participants who successfully complete the classes will receive the university's «Certificat d'introduction au droit français et européen».

Krakow University of Technology launches Doctoral School

2019-08-21

The students can submit electronic applications for the Doctoral School of the Krakow University of Technology (PK) from September 1, 2019. The application process will be conducted in several

stages. Substantive supervision over the school is exercised by the Council of the PK Doctoral School. It is headed by the chairwoman Dr Eng. Małgorzata Cimochowicz-Rybicka and includes representatives of the disciplines of the university and a representative of the Doctoral Student Council. It is worth reminding that the Act on Higher Education and Science has replaced doctoral studies (third cycle studies) with doctoral schools. The PK Doctoral School was established by order of the university rector of May 29, 2019. In accordance with the adopted principles, this new organization will provide education in scientific disciplines in which Krakow University of Technology has the right to award doctoral titles. Scientists of the Nicolaus Copernicus University in Toruń join the project Share Your Soils (SYStem)

2019-08-21

The innovative project Share Your Soils (SYStem), co-created by scientists from the Faculty of Earth Sciences of the Nicolaus Copernicus University in Toruń, received over 352,000. euro under the „Erasmus + Action 2. Strategic Partnerships” competition. The project is a response to the challenges posed by higher education to the «Z» generation today, so called «digital natives» who expect that education will use a wide range of mobile technologies and gamification. Its purpose is to create edutainment social media dedicated to the description and classification of soils according to the international classification of WRB. The main tool created as part of the project implemented in a consortium of universities from the Czech Republic, Estonia, Hungary, Italy, Latvia, Poland, Slovenia and Spain is a mobile application for sending soil profile photos with a description and geolocation and classification proposal. Users will have the opportunity to interact and share their knowledge.

Bialystok University of Technology to hold supplementary application process

2019-08-22

Bialystok University of Technology has begun complementary application process for the studies. There are still almost 300 free places at the university. Candidates for first-cycle studies can choose studies of eco-energy, electronics and telecommunications, electrical engineering, resource and waste management, biomedical engineering, material and manufacturing engineering, agri-food engineering, environmental engineering, forestry, applied mathematics as well as mechanics and machine construction. MA students can apply for management. Resource and waste management is a novelty, launched by the Faculty of Civil and Environmental Engineering. Graduates of this faculty will find work

in municipal utilities and companies using renewable natural resources, in institutions and plants dealing with installation and operation of renewable energy devices (renewable energy sources) or designing waste management systems.

Maria Curie-Skłodowska University to launch application process Recruitment for postgraduate studies

2019-08-22

Maria Curie-Skłodowska University (UMCS) in Lublin is launching the application process for full-time and part-time studies and also over 70 postgraduate programs. Postgraduate studies occupy a very important place in the UMCS educational offer. The seventy courses include Coaching and mentoring, Public Procurement or Speech Therapy and new courses of Compliance in organization management and Transport-forwarding-logistics management. Compliance postgraduate studies in organization management are the only postgraduate studies in the Lublin region that can deal with the subject of compliance, such an important element of organization management, especially in the context of changing Polish and international regulations.

Graduates of German philology of the Karkonosze State University highest- paid in the earnings ranking

2019-08-23

According to the ELA System for Monitoring the Economic Results of Graduates, graduates of German philology of the Karkonosze State University in Jelenia Góra become the top five of the highest paid graduates of Polish universities. The ELA Economic Fate Monitoring System was created on behalf of the Ministry of Science and Higher Education at the Information Processing Center - National Research Institute. Its purpose is to provide the most comprehensive information about the situation of graduates on the labor market. The main source of information in the system are administrative data from two sources - the Social Insurance Institution system (data on the graduates' professional situation: employment, unemployment, salaries) and from the POL-on system, i.e. the higher education information system supporting the work of the Ministry Science and Higher Education. Maria Curie-Skłodowska University to launch Pedagogy of Maria Montessori

2019-08-26

From September 2, 2019, the Maria Curie-Skłodowska University (UMCS) in Lublin will launch postgraduate studies in Pedagogy of Maria Montessori. Postgraduate studies of Maria Montessori Pedagogy are intended for university graduates with pedagogical preparation. Graduates will gain skills useful at work in pre-school departments and school classes functioning according to the assumptions of Maria Montessori's pedagogy. They will also gain practical skills in working with Montessori materials, learn to arrange an educational space that stimulates the individual development of a child, and organize educational and didactic processes in a diverse pre-school groups and school classes.

Wrocław University of Economics to cooperate with BNY Mellon

2019-08-26

Wrocław University of Economics has signed an agreement with the Polish branch of BNY Mellon. The agreement will enable cooperation to outline the areas of activities and undertakings that will be the foundation for establishing lasting, significant relationships between the parties in the field of science, education and business. The agreement was signed by Prof. Andrzej Kaleta, rector of the Wrocław University of Economics and Ewa Carr-De Avelon - member of the Management Board of BNY Mellon Poland. - As the Wrocław University of Economics, we strive for the professionalization of activities in relations with the environment and building the image of an university open and ready to cooperate not only on a scientific, but also practically on business level. BNY Mellon Poland supports young talents, which is why it wants to establish cooperation with the University of Economics in Wrocław in the field of science and business. - emphasized Prof. Andrzej Kaleta, rector of the university in Wrocław.

Gdańsk University of Technology to launch postgraduate studies Offshore wind energy

2019-08-26

The Faculty of Ocean Engineering and Ship Technology at the Gdańsk University of Technology and the Polish Offshore Wind Energy Society will jointly organize postgraduate studies in offshore wind energy. Applications can be submitted until September 15. The studies will last two semesters, and their lecturers will be specialists from the Gdańsk University of Technology and companies from the wind energy sector. In addition to knowledge related to the design and operation of wind farms, their topics will cover the legal aspects of the operation of such structures. The first group of students will consist of about 40 people. - We can foresee a dozen or so years of huge investments in offshore wind farms ahead of us, which requires the preparation of staff

to create and operate such facilities. Post-graduate studies launched at the Gdańsk University of Technology are the first step to provide the industry with the necessary specialists - assures Mariusz Witoński, president of the Polish Wind Energy Association.

University of Economics in Wrocław receives ACCA accreditation for Accounting and controlling

2019-08-27

Bachelor's studies in accounting and controlling at the University of Economics in Wrocław have been accredited by the ACCA (Association of Chartered Certified Accountants). ACCA, the Association of Licensed Statutory Auditors, is the largest and fastest growing international organization of specialists in the field of finance and accounting. The organization offers globally recognized certifications for people who want to develop their careers in accounting, finance and management. The prestigious ACCA certification is available to students of selected accredited faculties at leading universities in Poland. Thanks to this, they have the opportunity to start gaining competences during their studies and obtain exemption from ACCA exams.

University in Suwałki launches an Mechatronic Application Center

2019-08-28

The State Higher Vocational School (PWSZ) in Suwałki has gained new modern studios. After the Medical Simulation Center, the Mechatronic Application Center was launched. These are specialized laboratories mainly for students of management and production engineering. The four neighboring studios own one of the most modern equipment in the field of pneumatics, electrotechnics and numerical control in Poland. All this will allow students to learn about the practical version of mechatronics and the equipment on which currently the most modern companies work. The Application Center of Mechatronics is one of the elements of the «Vocational training» project, co-financed from the European Regional Development Fund and from the state budget under the Regional Operational Program of the Podlasie Voivodeship. The project will also include a transport and agri-food processing laboratory. The project value is almost PLN 4 million.

University of Silesia to launch „Between interaction and innovation - creating a communication space in the digital world”

2019-08-28

The Faculty of Philology at the University of Silesia in Katowice received 180 thousand euro funding for the project „Between interaction and innovation - creating a communication space in the digital world”. Researchers from the Silesian University together with researchers from Cyprus, Malta and Lithuania will work on strengthening the digital competences of humanistic-oriented students and increasing the communication competences of science students. The project involves the University of Silesia, European University Cyprus, University of Malta and Kazimiero Simona Viciaus Universitetas. As part of the project, digital textbooks will be created for both students and academic scholars, presenting how to communicate effectively and safely

in the world of WEB 2.0, as well as an educational strategic game based on the concept of mapping knowledge and the idea of gamification.

Secretary General of UNA Europa visits the Jagiellonian University

2019-08-29

Emily Palmer, secretary general of UNA Europa, a university network of seven leading European universities, co-founded by the Jagiellonian University (UJ), was a guest at the Krakow university. UNA Europa is the union of seven European universities initiated in 2018 including: KU Leuven, Université Paris 1 Panthéon - Sorbonne, Universidad Complutense de Madrid, Freie Universität Berlin, University of Edinburgh, Alma Mater Studiorum Università di Bologna and the Jagiellonian University. - Our goal is to build transnational alliances, promote European identity, increase the competitiveness of European education, strive for sustainable development and continuous improvement, as well as to focus completely on the needs of students - emphasized Emily Palmer. The goal of UNA Europa is to create a unique form of cooperation under which joint research, educational programs and activities for local communities and European society will be conducted.

Experts from the Medical University of Gdańsk to talk about health

2019-08-29

The Medical University of Gdańsk, the University Clinical Center and Radio Gdańsk will continue to educate the region's residents about health. The contract for the implementation of the „Be healthy – with no queue” program is unlimited. Programs from the series «Be healthy – with no queue» is an initiative of the Medical University of Gdańsk and the University Clinical Center, which aims to improve health knowledge among the inhabitants of Pomerania Region. The experts and listeners talk not only about diseases, but also about preventive medicine and new products in medicine. The program is

broadcast like a year ago - once a month scientists of various specialties will meet with students at the University Clinical Center. In the next program on September 9 at 14.00 experts from the Clinic of Cardiac Surgery and Vascular Surgery at the Gdańsk University will be present. More: <https://gumed.edu.pl/57693.html>

Agreement between the Medical University of Bialystok and the Croatian university

2019-09-03

Medical University of Bialystok (UMB) has concluded a bilateral agreement with the Faculty of Pharmacy and Biochemistry of the University of Zagreb. This is another bilateral agreement regarding joint conduct of doctoral dissertations concluded this year. In April 2019, the Medical University signed the agreement with another Croatian university – the Josip Juraj Strossmayer University in Osijek. The bilateral agreement assumes conducting the joint doctoral dissertations in the field of medical and pharmaceutical sciences. The agreement is concluded for 5 years, with the option of its extension. Joint doctoral dissertations will be carried out in accordance with the Polish provisions. The University of Zagreb was founded in 1699. It is the oldest Croatian university and at the same time the oldest university in Southeastern Europe.

State Higher Vocational School changes its name to Mazovian Public Collegium in Płock

2019-09-03

From September 1, 2019, the State Higher Vocational School in Płock officially changed its name to Mazovian Public Collegium. The university in Płock also has a new logo, which was presented to journalists. - The reason to change the name into the «Collegium» is because the new law on higher education recommended it and a word «public», not «state» is more associated with universal accessibility - explained rector Prof. Maciej Słodki. And finally «Mazovian» - because we are connected with Płock, where everything has always been and probably will be of Mazovian. Mazovian princes, Mazovian Refinery and Petrochemical Works, Tadeusz Mazowiecki - he added. The Mazovian Public Collegium began supplementary application process on September 2. This year it offers a lot of novelties e.g. MA studies in internal security with public administration and

new specialties in the field of social work: social rehabilitation with social prevention and support for people with disabilities and with senior citizens.

Rector of the Lodz University of Technology becomes an expert of the European University Association

2019-09-03

Professor Sławomir Wiak, rector of the Lodz University of Technology (PŁ), joined the group of experts of the European University Association (EUA). His candidacy was submitted by the Conference of Rectors of Polish Academic Schools (KRASP). At EUA he will be the only Polish representative. The European University Association brings together over 800 universities and national rector conferences from 48 European countries. Its activities play a key role in science, research and innovation in higher education. Expert groups have an important role that influences EUA cooperation with many other international organizations. Professor Sławomir Wiak will work in a team that deals with research and innovation strategies for smart specializations.

Supplementary application process for the second program „University of the Best”

2019-09-03

Supplementary application process for the second program „University of the Best” has begun. The program is a modern educational initiative run by the University of Silesia and the city of Katowice. In the second program it has extended the support for outstanding students from Katowice with Chorzów and Sosnowiec. The goal of the undertaking is to develop the interests of the most talented students of the Upper Silesian and the Zagłębie Metropolitan Region. The main method of the program is individual education based on tutoring. The task of the academic supervisor is to help the student find the optimal path for scientific development and adapt it to his interests, as well as motivating him to long-term work on personal and scientific development. The

application process will last until September 15. The program may be joined by candidates who on the day of project commencement will be pupils of the eighth grade of primary school or secondary school students, with the exception of final exam classes. More: <http://www.uniadademicetnajlepsych.us.edu.pl/>

Silesian University of Technology to continue its drone research

2019-09-03

The Silesian University of Technology has signed a letter of intent with the Upper Silesian-Zagłębie Metropolis. The document concerns cooperation within the Central European Drone Demonstrator. The agreement provides for the promotion of scientific activities in the field of unmanned aerial vehicles, exchange of information on activities undertaken in this field, involvement of the program's scientific staff in an expert role, mutual use or organization of test areas, including conducting technology and service tests. The Central European Drone Demonstrator is an initiative of the Civil Aviation Office, the Polish Air Navigation Services Agency and the Upper Silesian and the Zagłębie Metropolis. The initiative's partners are the JSW Group, the Polish Development Fund, the Institute of Aviation and the companies Hawk-E and DroneRadar. It is the first platform in Poland to exchange knowledge and support for the acquisition and development of technological solutions, as well as a platform for communication and cooperation of various stakeholders.

University of Gdańsk receives PLN 1.2 million for improving the competence of doctoral students and academic staff

2019-09-03

The University of Gdańsk has obtained almost PLN 1.2 million for improving the competence of doctoral students and academic staff through international scholarship exchange from the PROM program of the National Agency for Academic Exchange. The project provides for the financing of scholarships to cover the costs related to the participation of doctoral students and academic staff in short forms of international education, lasting from 5 to 30 days. Scholarships are addressed primarily for students obtaining materials for doctoral dissertations / scientific articles, for their participation in foreign conferences, courses, workshops and internships. The project will allow foreign trips of PhD students and academic staff of the University of Gdańsk, as well as the arrival of scientists from foreign universities. In total, 123 people will participate in the exchange. The project will be implemented until September 2020.

University of Warmia and Mazury to receive PLN 17 million

2019-09-04

The University of Warmia and Mazury in Olsztyn will receive a total of almost PLN 50 million under the university internationalization program in the education- said the deputy minister of science and higher education, Prof. Wojciech Maksymowicz. The program serves to internationalize universities in the field of education, improve the work of academic teachers and adapt education to the needs of economic development. It will also subsidize UWM faculties that did not participate in the previous project, such as the medical faculty. Future doctors will receive special funding for trips abroad to academic centers. Prof. Wojciech Maksymowicz noted that it was possible to increase the amount of funding for the space program for the department of geodesy and construction, which will gain an additional 1.5

million PLN. The branch of the University of Elk will also receive the money.

University of Gdańsk and the Provincial Police Headquarters in Gdańsk sign an agreement

2019-09-04

The University of Gdańsk has concluded an agreement with the Provincial Police Headquarters in Gdańsk on maintaining order and security. The document was signed by the rector of the university, Prof. Jerzy Piotr Gwizdała and voivodship police chief commander Jarosław Rzymkowski. The cooperation between the signatories of the agreement will consist in informing the parties in the scope of preventing, detecting and combating crime, counteracting terrorist threats and counteracting cyber threats. The partners will also undertake educational and preventive activities, including surveys, and participate in discussions on legal awareness and the image of the police and the university. The agreement also provides for enabling the parties to access scientific studies related to crime, its disclosure, detection and combating, as well as assessment of factors affecting its level.

University Scientific Town to be launched on the campus of the University of Silesia in Katowice

2019-09-04

From 9 to 27 September the University of Silesia in Katowice will launch the University Scientific Town on its campus. The project is aimed at popularizing science and is addressed to primary and secondary school pupils. The program includes presentations, scientific experiments, as well as lectures on pop culture and artificial intelligence. Classes and lectures will be conducted by scientists representing the University of Silesia for Children, the Unibot group and graduates from the University of Silesia. The following thematic panels are planned: „Singularities of the World of Physics” - the lecture will present electric charges and fields and fire as a destructive element, which becomes an irreplaceable source of

energy; „Biorobotics” - lecturers will introduce the brain physiology as an inspiration to create an IURO robot as well as the structure and possibilities of using DNA in medicine, and „Amazing history of humanity” - answering the question how to deal with history, pop culture and ... thinking.

Wrocław University of Environmental and Life Sciences to receive PLN 1 million for scholarship exchanges

2019-09-04

The University of Life Sciences in Wrocław has won over PLN 1 million for the international exchange of PhD students and young academic staff. Thanks to the funding from the PROM program of the National Agency for Academic Exchange, 70 people will be able to receive scholarships to foreign scientific centers or to Wrocław. The project assumes, that at least 80 percent project participants are PhD students, with the researchers making 20 percent. The application commission will take into account the competence of foreign languages, ambitions and plans for future careers, willingness to self-development and raising competences, ability to work in a group and future effects of the participation in the program. The university assumes that the experience will translate into the preparation of articles for renowned scientific journals and international publications as well as the development of international cooperation networks, strengthening the research and organizational potential of the university and strengthening its position in the international arena. More: http://www.glos.upwr.edu.pl/aktualnosci/49869/prom_zdobylysmys_kolejny_projekt_dla_mlodych.htm

Wrocław University of Economics in the project „INTEREST - INTEGRATED REporting for SMEs Transparency”

2019-09-04

The University of Economics in Wrocław together with partners from Hungary, Great Britain, Italy, Germany, Belgium and Romania will implement a project aimed at developing good integrated reporting practices in small and medium-sized enterprises. The participants of «INTEREST - INTEGRATED REporting for SMEs Transparency» project will develop a model integrated reporting framework, a practical guide to support integrated thinking about business and reporting achievements in the context of creating value for stakeholders, as well as training materials in the form of blended learning on identifying six capitals within integrated reporting. Project partners are Budapest Business School (Hungary), Leeds Beckett University (United Kingdom), Rhine-Waal University of Applied Sciences (Germany), The University of Udine (Italy) and Babeş-Bolyai University (Romania) and MAC-Team (Belgium), EFA for SMEs (Belgium) and BUSINESSHUNGARY (Hungary).

Białystok University of Technology to start the Doctoral School

2019-09-05

Pursuant to the Act on higher education and science, the Białystok University of Technology has established a Doctoral School from the 2019/2020 academic year. Plenipotentiary for the Doctoral School of the Białystok University of Technology became Dr Eng. Katarzyna Halicka. The Doctoral School of the Białystok University of Technology will educate PhD students in seven scientific disciplines: Automation, Electronics and electrical engineering; Technical information and telecommunications; Biomedical engineering; Civil engineering and transport; Mechanical engineering; Environmental engineering, Mining and energy, and Management and quality sciences. The candidates can apply for the PB Doctoral School until September 9, 2019.

Medical University of Wrocław to support a class of the 7th Secondary School

2019-09-05

The Medical University of Wrocław will support one of the classes of the Secondary School No. VII in Wrocław. Its pupils will practically expand their knowledge during classes at the university. The document was signed by the Vice-Rector for Didactics of the Medical University Prof. Piotr Dziegiel and school director, Leszek Duszyński. The agreement provides for monthly exercises and lectures conducted by academic teachers, thematically related to biology material processed by students. The creation of the supported class was officially announced during the school's opening ceremony. Director Duszyński emphasized that many outstanding graduates of this secondary school have been coming to the Medical University for many years. He expressed joy that cooperation between the school and the university was formally confirmed. Speaking to students, he said that their task was not only to acquire knowledge, but also to multiply the good in the world.

Wrocław University of Economics to receive almost PLN 1.2 million from the PROM mobility program

2019-09-05

Wrocław University of Economics received almost PLN 1.2 million as part of the PROM mobility program of the National Agency for Academic Exchange. Thanks to the grant, the university will organize 82 international exchanges. The money will help send 18 university representatives for 30-day internships abroad, 14 representatives for 10- and 14-day scientific trips, and 10 PhD students to prestigious international conferences. Thanks to the subsidy, 40 monthly internship visits of foreign guests into Wrocław will be organized. This is the second PROM project implemented at a university in Wrocław that has received funding. The first project was implemented in the years 2018/2019 and allowed to finance bilateral trips for 72 people. The funding has also been granted to the newly created summer school for PhD students.

University of Silesia to receive over PLN 1 million for scholarship exchanges

2019-09-05

In October, the University of Silesia will begin the implementation of the second project „PROM - international scholarship exchange of doctoral students and academic staff”. The university obtained over PLN 1.1 million from the PROM program of the National Agency for Academic Exchange. Under the program, 60 trips abroad and 40 visits from foreign universities will be carried out. Most of opportunities are addressed to PhD students. The project is open to both PhD students and those, who take up studies in newly established university doctoral schools. The stays planned under the project will translate into an increase in the university's research potential. The project will also enable the transfer of new research technologies, increasing the number of projects undertaken with partner universities from abroad. Mobility of young scientists will have a positive impact on the internationalization of education.

University of Silesia to launch application process for the third Postgraduate Studies in Regional Knowledge

2019-09-05

Faculty of philology at the University of Silesia in cooperation with the marshal's office of the voivodeship Silesia and the Upper Silesian Association are announcing application process for the third two-semester interdisciplinary Postgraduate Studies in Regional Knowledge. The studies are interdisciplinary course, allowing the participants to explore Silesia, the Zagłębie, the Żywiec and the Częstochowa region. The two-semester study, lectures, seminars, trips, games and activities are planned. The participants will gain new competences and interesting information that they can use in practice. The cost of studies was divided between the Marshal's Office, the commune delegating the teacher and the participants. Teachers working in schools in the province of Silesia will receive funding from the Marshal's Office. The deadline for submitting applications is 20 September.

New informative materials about the University of Warsaw

2019-09-05

For the 2019/2020 academic year, the Press Office of the University of Warsaw (UW) has prepared new informative materials about the university. Multimedia presentations and texts about the University of Warsaw have been prepared in two language versions (Polish and English) and contain the most important data and facts about the university, education, research and international cooperation. A set of ready-made materials about the University of Warsaw for personal use or for sharing at the request of external institutions is prepared by the Press Office before the beginning of each academic year to help individuals and employees prepare their own information materials, websites and public appearances. The materials are available in an electronic version. You can download them at: <https://www.uw.edu.pl/universytet/materialy-o-uw-do-pobrania/prezentacje-i-teksty/>

10th anniversary of Postgraduate Studies in Floristry to be held at the University of Agriculture in Krakow

2019-09-06

On Tuesday, September 3, 2019, the Faculty of Biotechnology and Horticulture of the University of Agriculture in Krakow (URK) was holding a conference entitled „10 years of Postgraduate Studies in Floristry”, combined with an exhibition of flower arrangements created by graduates of the Postgraduate Studies in Floristry. The purpose of the event was to exchange views and experiences in the field of ornamental horticulture and floristry. Conference participants learned about the differences between floristry and bouquet making, and also had the opportunity to participate in specially prepared workshops on subjects related to the plant reproduction in vitro, to taste wines from the university vineyard, observe plants in the university garden, learn about gardening tools, biblical plants, garden roses and

about dyeing plants for dry compositions. For 10 years, 169 graduates mainly from south-eastern Poland, but also from the Czech Republic, England, Switzerland and Italy completed the postgraduate studies in Floristry.

Students of the Academic High School of Wrocław University of Technology created a computer game

2019-09-06

Students of the Academic High School of Wrocław University of Science and Technology have created a virtual „Game of AZON” - a computer game promoting the Atlas of Open Science Resources (AZON) for young people. AZON is an online information platform, which was created at the Center of Knowledge and Technical Science of the Wrocław University of Science and Technology as part of the e-scienceplus.pl Active Information Platform project. It collects, processes and makes available digital learning resources to all interested parties. The project coordinator is the Wrocław University of Science and Technology together with Wrocław's universities: the University of Physical Education, the University of Life Sciences and the Medical University as well as the Institute of System Research of the Polish Academy of Sciences. The heroes of the game fight a mad professor, and in subsequent stages (each of them takes place at a different university) they solve a lot of hidden riddles and puzzles, and above all save resources from destruction. University of Wrocław becomes a partner of the German research center

2019-09-06

A new research institute CASUS (Center for Advanced Systems Understanding) has started operating in Goerlitz, Germany. Its researchers will model complex systems using artificial intelligence. The University of Wrocław is one of the partners of the institute. - The Institute will be involved in the

study, and more specifically in modeling of complex systems, i.e. metasystems. Interdisciplinary research will cover many areas of science, and the common feature is the use of similar tools: mathematics, computer science, artificial intelligence and large data sets - says Leszek Pacholski from the Institute of Computer Science of the University of Wrocław. The Institute's partners are University of Wrocław, Helmholtz-Zentrum Dresden-Rossendorf, the Center for Environmental Research Helmholtz, Max Planck Institute of Molecular Cell Biology, Genetics and Technische Universität Dresden / Center for Information Services and High Power Computing. University of Economics in Poznań for the next 6 years to receive CEEMAN accreditation

2019-09-09

Poznań University of Economics has obtained CEEMAN accreditation again. The accreditation commission proposed to extend the accreditation for another 6 year on the basis of the report presented by the university and the conclusions of the March visit. The report from the visit highlighted the quality of the university's new strategy, work on the internationalization of the university, the quality of scientific research and the number of publications, cooperation with the city, region and partner universities, the quality of teaching and the use of specialized laboratories in research and teaching. CEEMAN International Quality Accreditation is awarded to universities by the International Association for Management Development in Dynamic Societies based in Bled (Slovenia). It deals with supporting the development of management and innovation and improving the quality of education in business schools and institutions related to the development of management sciences. It has been active since 1993 and has 210 members from almost 50 countries.

Wroclaw University of Science and Technology signed a cooperation agreement with the commune of Rawicz

2019-09-09

Joint implementation of scientific and economic projects, research consultations and organization of apprenticeships and internships are the main elements of the cooperation agreement signed on Thursday by the rectors of the Wrocław University of Science and Technology and the Rawicz commune. In the opinion of the mayor of Rawicz Grzegorz Kubik - signing the contract is a great distinction for the commune, and cooperation with the University is a great advantage, above all, for Rawicz schools. Both partners want young people to be interested in technical studies. The framework agreement between the Wrocław University of Science and Technology and the Rawicz commune provides further establishment of contacts with the business environment by the university, development of the commune using the resources of knowledge and access to the results of scientific research and didactic potential of the university, as well as acquiring engineering staff. Wrocław University of Science and Technology is already cooperating with over 120 local governments. Four students of the Silesian University of Technology to receive Diamond Grants

2019-09-09

Four students of the Silesian University of Technology have won the 8th Diamond Grant program of the Ministry of Science and Higher Education. They received 220 thousand PLN for the implementation of their projects. Maciej Klimas will implement the project «Development, measurement verification and implementation of stochastic models of the electric arc phenomenon», Maria Bzówka will realize «Understanding the molecular aspects of regulation of Toll-like receptors with particular emphasis on water molecules as a potential mediator in protein-ligand and protein-protein interactions». Nikolina Poranek will carry out an

«Assessment of the possibility of managing secondary waste from ITPOK in concrete with increased tightness» and Grzegorz Stando will examine «New non-functionalized carbon nanostructures with a hydrophilic nature of the surface and their potential use in composite materials». The Diamond Grant program supports students who conduct high-level scientific research and have outstanding scientific achievements.

Medical University of Bialystok receives almost 300 thousand PLN to strengthen international cooperation

2019-09-10

The Medical University of Białystok has received PLN 295.280 from the National Agency for Academic Exchange for internationalization of scientific cooperation with foreign research organizations. The project will start on October 1, 2019 and will last until September 30, 2020. The program is implemented as part of the project «International scholarship exchange of PhD students and academic staff» of the National Agency for Academic Exchange under the Operational Program Knowledge Education Development co-financed from the European Social Fund. The aim of the Program is to improve the competences of PhD students and academic staff from Poland and abroad, including students from outside the European Union, through international scholarship exchange. A total of 16 people will benefit from the project, including 13 PhD students and 3 representatives of the academic staff. The foreign institutions cooperating in the project include: Mayo Clinic (USA), University of Greifswald (Germany), University of Turku (Finland) and Swiss Institute of Allergy and Asthma Research (Switzerland).

MBA studies for the IT industry at the Polish-Japanese Academy of Information Technology

2019-09-10

The Polish-Japanese Academy of Information Technology (PJATK) in Warsaw is inviting participants to the MBA studies addressed to the IT industry. This

unique curriculum is oriented to the needs of the IT market and targeted at people who want to expand their knowledge in the field of IT and project management as well as improve their managerial skills. The classes are implemented in the form of workshops and seminars and students will learn about IT project management methods and tools, issues related to human resources management, enterprise financial management, issues in the field of labor law and copyright. The studies will last two semesters. The MBA study program for the IT industry is addressed to middle, senior and top management. The condition for undertaking studies are completed studies and several years of professional experience. Application process will be conducted until September 30, 2019.

Since 2017, Jan Kochanowski University in Kielce received PLN 160 million

2019-09-10

The Jan Kochanowski University (UJK) in Kielce summarized activities related to the Constitution for Science. Since 2017, as part of various programs and projects, PLN 160 million has been allocated to the university, of which PLN 72.3 million is capital expenditure. The largest investments include the construction of the Center of Media Communication and Scientific Information as well as the expansion and equipment of the Faculty of Medicine and Health Sciences. The annual subsidy transferred to the university by the Ministry of Science and Higher Education also increased by nearly PLN 12 million. During the press conference, Prof. Jacek Semaniak, rector of the Jagiellonian University emphasized that the investments not only help the university, but also have an impact on the region's development. The key factor will be cooperation with business and external institutions, for example with the Świętokrzyskie Center for Transfer and Technology Innovation, which is to be located in the area of the University Campus.

University of Technology and Humanities in Bielsko-Biała to receive almost 500,000 PLN for research infrastructure

2019-09-10

The Minister of Science and Higher Education awarded 494 thousand PLN for the purchase of highly specialized research equipment for the Department of Biochemistry and Molecular Biology of the Faculty of Health Sciences of the University of Technology and Humanities in Bielsko-Biała. The new research apparatus is a set of technologically advanced devices that allows conducting various types of experiments on the model of an insulated organ in the conditions of a Schuler bath. One of the main areas of the use of this equipment is to study the response of blood vessels, mainly arteries, to various endogenous and exogenous substances with the potential of vasoconstricting or vasodilating. Technological advancement of new devices will allow for extremely precise and repeatable measurement of key parameters from the point of view of physiology and pathophysiology of the circulatory system. More: <https://www.ath.bielsko.pl/grant-na-zakup-infrastruktury-badawcza/>

Adam Mickiewicz University in Poznań applying for the status of a research university

2019-09-10

The evaluation process of applications submitted in the first competition „Initiative of Excellence - Research University” has begun. One of the participants of the competition is the Adam Mickiewicz University in Poznań. In the first stage, university representatives talked to a team of international experts. The race of the best Polish universities for the status of a «research university» is one of the most important consequences of Act 2.0. Winners, no more than 10 universities, in addition to the honorable title will receive additional financial support - in 2020-2026, the annual increase in subsidies by 10%. In the case of a Poznań university, this additional amount may amount to over PLN 50 million annually. At the turn of October and No-

vember the rectors will know which universities will obtain the status of research universities. The winners will be selected on the basis of the submitted applications containing the development strategy as a research university. More: <https://amu.edu.pl/dla-mediow/komunikaty-prasowe/uam-przesluchiwany-w-konkursie-na-uczelnie-badawcza>

Nicolaus Copernicus University in Toruń receives almost PLN 1.2 million for the mobility program

2019-09-10

The National Agency for Academic Exchange awarded the University of Nicolaus Copernicus in Toruń over 1 million 175 thousand PLN for the implementation of the project „PROM - International scholarship exchange of doctoral students and academic staff”. The program will finance scholarships for trips of 50 people from the faculties that make up the Doctoral School of Exact and Natural Sciences and the arrival of 50 doctoral students and scientists from abroad. Co-financing will be offered to PhD students (92 people) and research workers (8 people). Project beneficiaries selected through a competition will be supported for the following activities: internships (3- or 4-week) for 30 PhD students from the Nicolaus Copernicus University and 12 PhD students from abroad; summer schools (at the faculty of physics of astronomy and applied computer science and the faculty of earth sciences) for 17 PhD students and 5 lecturers from abroad, as well as active participation in foreign conferences of 20 PhD students from the Nicolaus Copernicus University, 13 PhD students from abroad and 3 lecturers from abroad.

Students of the Warsaw School of Economics join the international undergraduate program implemented in Beijing

2019-09-11

The Warsaw School of Economics (SGH) in Warsaw signed an agreement with the Guanghua School of Management Peking University (GSM PKU), which enables students of three undergraduate studies (International Economics, Global Business, Finance and Governance and Management in English and Polish equivalents)) to participate in the international undergraduate program implemented in GSM in Beijing. Students qualified for this program will pursue the first two years of study at SGH, and later they will continue their bachelor studies in Beijing (4 semesters) in the group of Chinese students and students from thirteen renowned universities from around the world. By implementing this program, students can obtain a SGH diploma in their field of study (after completing three years of study, i.e. after completing their third year in GSM and defending a BA thesis at SGH) and a Chinese Bachelor of Arts in Management diploma signed by Peking University after completing four years of undergraduate studies.

AGH University of Science and Technology started cooperation with Cisco

2019-09-11

Vice-Rector for Cooperation of the AGH University of Science and Technology in Kraków Prof. Jerzy Lis and the general director of Cisco in Poland Przemysław Kania signed a letter of intent regarding cooperation between AGH and Cisco. Both sides declared cooperation in increasing the effectiveness of education for AGH UST students and staff, joint development of innovative projects, applying for them financed from external sources, organizing internships for AGH UST students in Cisco branches and organizing job fairs, workshops, seminars and conferences. - We are very pleased with the closer cooperation between AGH and Cisco. We believe that science and business should always complement each other and in this case it will be of mutual benefit. It is especially important for us that our students will be able to practically broaden their skills acquired during classes. After all, our goal is to educate in line with the expectations of the labor market - emphasized the Vice-Rector for Cooperation of AGH Prof. Jerzy Lis.

“Learning organization 2019” competition

2019-09-11

The Voivodship Labor Office in Białystok and the Białystok University of Technology are inviting employers from the Podlasie Voivodeship to participate in the fifth „Learning Organization 2019” competition. The winners of the Competition will be selected in three categories: micro and small enterprises (employment up to 49 employees), medium and large enterprises (employment from 50 employees), and public sector. The aim of the competition is to promote employers from the Podlasie Voivodship who invest in the development of employees' competences, are knowledge-oriented and develop their own personnel strategy, organizational culture and implement investments to increase the efficiency of their organization, while supporting the learning of employees and business partners.

Lublin universities to launch new studies

2019-09-11

Garden art and plant arrangements, cyberdetective and mechatronics are new fields of study proposed by Lublin universities for the academic year 2019/2020. The Maria Curie-Skłodowska University (UMCS) is offering new fields, such as physical education at the Faculty at the Faculty in Puławy, legal and administrative faculties, and teaching mathematics and computer science. The Catholic University of Lublin has offered two new faculties, namely school and kindergarten pedagogy as well as applied anthropology in English. The University of Life Sciences in Lublin has launched seven new studies, including dairy, garden art and plant arrangements. The College of Entrepreneurship and Administration in Lublin offers many new studies in IT such as Cyberdetective and Computer Forensics.

Wrocław University of Economics receives a positive institutional assessment EUA-IEP

2019-09-11

Wrocław University of Economics (UEW) has successfully completed the EUA-IEP institutional assessment process. This is the third university in Poland that has successfully passed the EUA-IEP evaluation procedure. The European University Association (EUA) is an organization of European universities conducting research and teaching activities, as well as national associations of rectors and other organizations related to science and higher education. It provides member institutions with the opportunity to exchange information in the fields of higher education and research and enables sharing of best practices by participating in joint projects and events involving many universities. The Institutional Assessment Program (IEP) is an independent EUA membership service. It offers evaluations of participating institutions supporting them in the further development of strategic management and internal quality culture. Silesian Intercollegiate Center for Education and Interdisciplinary Research awarded

2019-09-11

The Silesian Intercollegiate Center for Education and Interdisciplinary Research of the University of Silesia in Chorzów was awarded in the 10th „Brand-Silesian” competition in the science category for its significant contribution to the development of the Silesian Voivodeship. As part of the « Brand-Silesian» competition, people and institutions that act for the benefit of the Silesian Voivodeship and create its positive image both in Poland and in the world were awarded. The competition was settled during the 25th Gala of the Regional Chamber of Industry and Commerce in Gliwice. The competition is organized by: Marshal's Office of the Silesian Voivodeship and the Regional Chamber of Commerce and Industry together with the «Dziennik Zachodni», TVP Katowice and Radio Katowice. This year the awards were presented in 13 categories.

Professors of the University of Lodz become members of the Academy of Economic Sciences of Ukraine

2019-09-12

Professors Beata Glinkowska-Krauze and Bogusław Kaczmarek from the Faculty of Management at the University of Lodz (UŁ) became members of the Academy of Economic Sciences of Ukraine in the Management. The Łódź scientists have been carrying out joint scientific and research projects for several years, including classes for Ukrainian students. In 2016, a Scientific Center for Scientific and Research Cooperation: Poland-Ukraine was established at the Faculty of Management of the University of Lodz. This is the only such scientific unit in Poland. The coordinator of the work was the Department of the Faculty of Management of the University of Lodz, which is represented by Prof. Glinkowska-Krauze and Prof. Kaczmarek, and in Ukraine Prof. V. Chebotarov. As part of this cooperation, several international scientific conferences and seminars were organized (three in Poland in Łódź and two in Ukraine in Kiev). Scientists are planning further Polish-Ukrainian seminars and monographs, scheduled for November 2019 in Ukraine and the following event for 2021.

Cartoon films promote the Doctoral School of the Wrocław University of Environmental and Life Sciences

2019-09-12

Wrocław University of Environmental and Life Sciences promotes its application process to its PhD School with use of animated films. Cartoons will be created for 7 leading scientific disciplines in which the university provides education for students and PhD students as well as scientific research. The first film in the series is devoted to the food technology and nutrition. It says about increased demand for food, waste generated in its production, diet-related diseases and often contradictory information

about what is healthy in food, circulating Internet. All films will present the special research areas of Wrocław university. Cartoons are consulted with representatives of disciplines and present the most important problems of the scientists around the world including Wrocław. Movie: <https://youtu.be/ZGXuGmnU3o4>

State Higher Vocational School in Nysa to receive record funds for international cooperation

2019-09-12

The State Higher Vocational School (PWSZ) in Nysa received for 2019-20 record funds for international cooperation. In the national ranking, due to the total amount of funds received in the Erasmus + Program, it was ranked first for the State Higher Vocational Schools in Poland. Students from Nysa can go abroad for up to 12 months and gain international experience in Cyprus, Greece, Turkey, Spain, Norway, Italy and Portugal. The State Higher Vocational School in Nysa will also cooperate with partners from countries such as: USA, India, China, Mexico, Indonesia, Ukraine, Albania, Bosnia and Herzegovina, Montenegro and Kosovo. While partners from India, Ukraine, Mexico and the Balkan countries are already regular guests of the university, China, Indonesia and other universities in the United States are new, valuable directions of cooperation.

Gdańsk University of Technology to receive PLN 4.5 million for scientists under the Leader competition

2019-09-12

Three projects of scientists from the chemical faculty of the Gdańsk University of Technology received funding under the competition Leader of the National Center for Research and Development. The allocated funds total almost 4.5 million PLN. Funded projects include: «New diagnostic tests for the detection of anti-Toxoplasma gondii antibody in animal sera based on recombinant chimeric proteins», «Development of technology for the production of

foamed polyurethane-rubber composites for use as suppressive materials» and «Integrated prototype of photo-supercapacitor for storage electricity obtained from the conversion of solar radiation». The goal of the Leader program is to expand the competences of young scientists in independent planning and management of research teams during the implementation of scientific projects whose results can be implemented in the economy.

University of Silesia to hold a seminar about opportunities and barriers to the implementation of new legal regulations in Polish universities

2019-09-12

The Research Center for Public Policy and Regulatory Problems of the University of Silesia is inviting participants on September 16 to the seminar „University 2.0 - opportunities and barriers to the implementation of new legal regulations in Polish universities”. The theme of the meeting which will be held at the Faculty of Radio and Television in Katowice at ul. St. Paweł 3, there are opportunities and barriers to implementing new legal regulations in universities in the context of the reform of higher education in Poland. One of the lecturers will be Dr Anna Budzanowska, Director General of the Ministry of Science and Higher Education, who will deliver the paper «Act 2.0 - and what next?». The seminar also provides for three discussion panels: Act 2.0 and changes in public and private universities; A new university model and publishing habits and strategies as well as University councils in practice.

Faculty of Management of the University of Lodz to launch Innovation Night

2019-09-13

On Saturday, October 5, 2019, in the evening, the Faculty of Management of the University of Lodz (UŁ) will organize the Innovation Night, as part of the nationwide Festival of Digitization. The program includes workshops on robots, smart cities, a computer game and a seminar. One of the newest courses in the offer of the Faculty of Management in Lodz is Digitization and Data management in business, and this subject will mainly be discussed at the Innovation Night. The events are addressed to everyone, regardless of age. The lecturers are the members of the international Center for Research on Artificial Intelligence and Cyber Communications, which operates at the Faculty of Management of the University of Lodz. The areas of the Centre's scientific activity include the research on the impact of artificial intelligence on management and organizations, management of a digital enterprise and virtual team, cybersecurity.

Poles to apply for Santander Universidades scholarships

2019-09-13

By September 30, 2019, Santander Universidades Group invites students and graduates of Polish universities to apply for the next scholarship project. As part of the Digital Skills program, 100 people from Argentina, Brazil, Chile, China, Spain, Colombia, Mexico, Germany, Peru, Poland, Portugal, Puerto Rico, the United States, Uruguay and the United Kingdom will receive a Santander IE - Digital DNA Scholarship. On-line training will be conducted in English and Spanish by professors of the IE School of Human Sciences and Technology, one of the schools of the Spanish IE University. The program is intended for students of the last 2 years of bachelor's and master's studies and graduates who received the diploma not earlier than in 2014. Scholarship holders will take part in two courses. The «New Technologies in Innovation» course aims to show the path of technological development from the point of view of companies and how companies use technologies

to create a competitive advantage. Course «Data Science and Visualization in Business» provides primarily practical classes in the development of competence to work with data and their visualization and the use of data science in the development of the company. More: https://www.becas-santander.com/es/program/santander-ie-digital-dna?fbclid=IwAR1Zt2YRTPoVgN07Y0tN5Brxt8PPPzNL89N_Gh-lt6JfZJmh-v1vFWsHlvT4

International University Fair QS in Warsaw

2019-09-13

On October 3, 2019, the Warsaw „Bristol” hotel will host the QS International University Fair. This is the most prestigious series of international fairs devoted to MA and PhD studies. Students, graduates and young specialists interested in postgraduate studies and career development with a MA title will have the opportunity to apply for the best universities in the world and gather information on a wide selection of postgraduate programs in various subjects. Over 20 universities from the USA, Great Britain, Canada, Germany, Spain, Switzerland and Italy will participate in the fair, including London Business School, HEC-Paris, University of Glasgow, University of St. Gallen, Politecnico di Milano, University of Toronto, Hochschule Darmstad, KU Leuven and Warwick Business School. More: https://www.topuniversities.com/events/qs-world-grad-school-tour/europe/warsaw?utm_source=Eurostudent_pl&utm_medium=Link&utm_campaign=World-Grad-School-Tour_F19_Warsaw&partnerid=2565

Representatives of the Chinese embassy pay a visit to the University of Warmia and Mazury in Olsztyn

2019-09-13

At the beginning of September, two joint Polish-Chinese research projects started at the University of Warmia and Mazury (UWM) in Olsztyn. On this occasion, the University was visited by representatives of the Chinese embassy, headed by Jiang Sudong, adviser on science, technology and education. The

visit of Chinese guests was associated with the great success of scientists from Olsztyn. In the first Polish-Chinese bilateral competition conducted by the National Center for Research and Development (NCBR) together with the Ministry of Science and Technology of the People's Republic of China (MOST), two projects from UWM received funding. Researchers from Olsztyn in cooperation with Chinese scientists will implement at the Faculty of Food Sciences the project: «Innovative technologies for the production of functional ingredients of dairy origin and development of new products» (Dairy-FunInn). The second project entitled «Artemis. Development of advanced methodology for real-time multi-system ionospheric services» will be implemented at the Center for Radio Diagnostics of the Space Environment of the Faculty of Geodesy, Spatial Engineering and Construction.

Gdańsk University of Technology to receive over a million PLN from the PROM program

2019-09-13

Gdańsk University of Technology will receive over PLN 1.1 million for international scholarship exchange of PhD students and academic staff from the PROM program of the National Agency for Academic Exchange. The project includes financial support for the participation of 30 PhD students of Gdańsk University of Technology in foreign scientific conferences, whose subject matter is closely related to the subject of their PhD dissertations, as well as financial support for the stay of 20 PhD students at renowned universities and research centers outside Poland in order to carry out research necessary for their PhD theses. The money will also be used to finance the participation of 20 PhD students from outside Poland in courses, workshops and study visits. Another 20 PhD students from abroad will receive financial support for participation in summer and winter science schools organized by the Gdańsk University of Technology. The project will be implemented from October 1, 2019 to September 30, 2020

University of Szczecin and Provincial Police Headquarters in Szczecin against the hate in the Internet

2019-09-13

The University of Szczecin and the Provincial Police Headquarters in Szczecin will implement a project to counteract hate and hate speech among the West Pomeranian youth - „#donthejt”. The project assumes conducting preventive workshops in 20 secondary schools of the voivodship and 10 schools in Szczecin and creating a «room of secrets» - a specially designed place of education where groups of young people will be able to find out what means hatred online and how to defend against it. As part of the project, there will be „stand up” workshops «laugh hate», during which the organizers will try to show that the use of hatred should have legal consequences. There will also be a film spot warning about the effects of hatred on the internet and its consequences for a young person, a photo exhibition and simulation of the criminal trial «sentence hatred for hatred».

State Higher Vocational School in Chełm to receive PLN 2 million for the purchase of a training aircraft for the university

2019-09-16

The State Higher Vocational School (PWSZ) in Chełm will receive PLN 2 million from the Ministry of Science and Higher Education for the purchase of a new training aircraft - informed Prof. Józef Zajac, Vice Rector of the Chełm Higher School. The PWSZ air fleet in Chełm will be expanded with a twin-engine aircraft, used in the pilot training. - This is very important for us, especially since a concrete runway will be built soon, which will enable future pilots to train throughout the year. We are grateful to Minister Jarosław Gowin for this subsidy for the the aircraft - added Prof. Arkadiusz Tofil, rector of the PWSZ in Chełm. The purchase will let the university save money, because the annual cost of renting a

twin-engine training aircraft is almost half the price of a new machine. Currently, the PWSZ in Chełm is educating about 150 future pilots. Thanks to the new aircraft, the air fleet of the Chełm facility will expand to 10 machines.

Shanghai-Warsaw Artificial Intelligence Laboratory opened

2019-09-16

The development of artificial intelligence algorithms and their application for data analysis are the main tasks of the Shanghai-Warsaw Laboratory of Artificial Intelligence, which was established at the Faculty of Electronics and Information Technology of the Warsaw University of Technology (PW). The laboratory will deal with the development of artificial intelligence algorithms and their use for data analysis. It will have two headquarters, located at the Faculty of Electronics and Information Technology of the Warsaw University of Technology and in Shanghai. During the official opening of the Laboratory, the scholars discussed the analysis of textual data, publications and patents to support talent management, which tasks have been implemented in the laboratory since March this year. Future projects on DNA sequence analysis, medical image analysis and financial data were also considered.

National Science Center and the National Agency for Academic Exchange for PhD students to launch joint scholarship program

2019-09-16

Scholarships for the PhD doctoral students in doctoral schools, research funding and the internships are the main assumptions of the new PRELUDIUM BIS competition organized jointly by the National Science Center (NCN) and the National Agency for Academic Exchange (NAWA). The goal of cooperation between NCN and NAWA is to launch joint forms of research funding to ensure continuity and coherence of research, as well as to increase mobility, which is an essential element to achieve scientific

excellence and establish international cooperation. The result of joint activities of these two institutions will be a complementary offer. The agreement on behalf of the National Science Center was signed by director Prof. Zbigniew Błocki, and on behalf of NAWA - director Łukasz Wojdyga. The ceremony was attended by Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin.

Multi-Generation University of Technology to start in Gdańsk

2019-09-16

Gdańsk University of Technology begins the project Multi-Generation University of Technology. This is the first university in Pomerania with free, practical educational classes for people of all ages. Application process will start on October 1. Multi-Generation University is an initiative addressed to preschoolers, school children, adolescents, adults and seniors. Established at the Gdańsk University of Technology in cooperation with the Municipality of the City of Gdańsk - Hevelianum and the Kashubian People's University. The organizers are inviting people who want to expand their knowledge and gain new skills in such fields as mathematics, entrepreneurship, communication and environmental protection. The classes include workshops, lectures, seminars, laboratories, field classes and online courses. Practical classes will provide the tasks to conduct an experiment, solve a problem, create an object of everyday use or design a spatial structure. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGncmoQv7K0/content/politechnika-wielu-pokolen-%E2%80%93-pierwszy-taki-unipitet-na-pomorzu

University of Technology and Life Sciences in Bydgoszcz to receive Logo HR Excellence In Research

2019-09-16

The University of Technology and Life Sciences in Bydgoszcz joined the group of institutions awarded the HR Excellence In Research logo. The decision on this matter was made by the European Commission. The HR logo is one of the activities of the European Commission under the Human Resources Strategy for Researchers. The distinction is awarded to scientific and research institutions which create a friendly work and development environment and have transparent rules for the recruitment of researchers, based on the principles resulting from the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers. The benefits of the logo include increasing the attractiveness of employment, a chance to strengthen the image as a place creating good conditions for the development of research and science, promotion among international organizations and scientists as a university providing researchers with the best working and development conditions, and receiving European grants.

Kozminski University in Warsaw to launch Bloomberg Laboratory

2019-09-17

From October 2019, students and lecturers of bachelor's and MA studies in finance and accounting at the Kozminski University (ALK) in Warsaw will use a financial laboratory based on Bloomberg technologies. They will get access to the full service and additional educational functions of the largest news agency in the world. - Thanks to this solution, education at our university will be based on real analyzes, indicators and information from all financial markets in the world. The same Bloomberg website is received by the largest banks, financial institutions, business and media. This will further strengthen our educational offer - says Dr Błażej Podgórski, finance lecturer and tutor of the Bloomberg Laboratory at

KU. The Bloomberg terminal provides specialized software and allows to receive information from financial markets in real time, and also provides access to historical data.

Warsaw University of Technology implementing a project under the PROM Program

2019-09-17

Warsaw University of Technology (PW) will implement a project under the PROM Program - International scholarship exchange of PhD students and academic staff. The project will be implemented for 12 months starting from October 1, 2019. By decision of the National Agency for Academic Exchange, the co-financing for PW will be PLN 1,154,460. The purpose of the PROM Program is to improve the competences of PhD students and academic staff from Poland and abroad, including scholars from outside the EU, through international scholarship exchanges (participation of PhD students and academic staff in short forms of education, i.e. lasting from 5 to 30 days of international character). The projects include trips of Poles abroad as well as visits of PhD students and academic staff from abroad to Poland. A total of 84 mobility events are planned in the project: 74 trips and 10 arrivals for 74 PhD students and 10 representatives of the academic staff under 40.

Academy of Fine Arts in Wroclaw completed the project „University of Young Explorers”

2019-09-17

The Academy of Fine Arts in Wrocław has completed the implementation of the „University of Young Explorer” project. 126 people aged 6-16 took part in the classes at the three faculties of the university. The project was co-financed by the European Union from the European Social Fund. As part of the project, programs for children and youth were developed and implemented in the form of workshops and theoretical / demonstration classes at the

painting and sculpture, the ceramics and glass, and the graphics and media arts departments. Participants had the opportunity to cooperate with artists and learn the secrets of work in the scientific and artistic environment. The kids created the amazing works including from stained glass and installations in public space to art books and audiobooks. Teachers and school staff from Wrocław, Wołów, Sobótka and Żarów and the «Made in Brochów» foundation cooperated with the artists from the Wrocław Academy of Fine Arts.

Wrocław University of Economics receives AMBA accreditation for MBA programs

2019-09-17

MBA programs conducted at the Faculty of Computer Science and Finance of the University of Economics in Wrocław have obtained the prestigious AMBA accreditation, granted by The Association of MBAs for a period of three years. Only about 300 business schools around the world can boast with this unique confirmation of the high level and quality of the program. In Poland, only a few universities were accredited by AMBA, including the Warsaw School of Economics and Business and Kozminski University. AMBA is a global association that is an authority in the field of postgraduate education in management. Thanks to the awarded distinction, the University joined the elite group of universities, which includes such significant and well-known business schools as London Business School, Oxford Brookes University Business School or Copenhagen Business School.

Adam Mickiewicz University in Poznań still third in the Polish part of the Times Higher Education ranking

2019-09-18

Adam Mickiewicz University in Poznań maintained its position in the prestigious Times Higher Education World University Rankings. In the latest publishing, it has ranked third in Poland, in the world ranking it was in the range of 801-1000. 14 Polish universities have qualified for the current ranking. The Adam Mickiewicz University was in one sector with the Gdańsk University of Technology, while the Jagiellonian University and the University of Warsaw joined the group of universities in positions 601-800. The list of universities in Poland classifies the Poznań university as third in Poland. The Adam Mickiewicz University maintained its status and raised its partial grades at the level of individual areas. The strongest point of the Poznań university turned out to be the number of citations of scientific publications. The latest ranking includes 1396 universities from 92 countries. The Oxford University turned out to be the best in the world for the fourth time in a row. University of Białystok to launch Executive MBA program

2019-09-19

The University of Białystok (UwB) is launching the implementation of the Executive Master of Business Administration program, in a few weeks. The university has organized it together with the Gdańsk Foundation for the Training of Managers (GFKM). The UWb will implement the program by the newly created UWb Institute of Management. Executive MBA is an interdisciplinary program designed for business owners and managerial staff. It covers 4 semesters of classes. Its participants will be able to acquire and deepen management competences, finances and soft skills such as team management, public speaking and business negotiations. GFKM has the international accreditation CEEMAN IQA. The Executive MBA GFKM program belongs to the Master Class of the FORUM Manager Education Association rating. The program validating institution is Porto Business School (PBS), which is part of the University of Porto - the largest educational and research institution in Portugal. Admission period to the Executive MBA in Białystok will last until September 30, 2019. The start of classes is planned for the last weekend of October.

University of Silesia summarizes the project „Jupyter @ edu”

2019-09-19

The University of Silesia is inviting participants to a conference summarizing the project „Jupyter @ edu - infrastructure for cloud-based system education: a scalable implementation of the Jupyter notebook system for scientific research”. Jupyter Notebook is an online interactive computing environment for creating documents containing text and programming language code. This system can be used in both research and education. The conference «Notebook Jupyter in education and research» will be held on September 23 at the Silesian Intercollegiate Center for Education and Interdisciplinary Research in Chorzów. The project «Jupyter @ edu was implemented as part of the Erasmus + Strategic Partnerships program by a consortium of the University of Silesia, the German University of Augsburg, the Portuguese Universidade Portucalense Infante Dhenrique-Cooperativa De Ensino Superior Crl in Porto and the Cypriot European University Cyprus in Nicosia.

Researcher of the Wrocław University of Economics becomes a member of the AACSB Innovation Commission

2019-09-19

Professor Bogusława Drelich-Skulska, Vice Rector for International Cooperation at the Wrocław University of Economics, became a member of the Innovation Committee of the International Association to Advance Collegiate Schools of Business (AACSB). AACSB is the world's largest association of students, universities and business representatives involved in the development of management education. AACSB was founded in 1916 in the United States, and its members come from 90 countries in the world. The Wrocław University of Economics was admitted as an association member in March 2017. The decision to appoint Prof. Skulska's was accepted during the annual meeting of the AACSB in San Antonio in the United States.

University of Lodz to celebrate 25th anniversary of the Faculty of Management

2019-09-20

On Tuesday, September 24, 2019, the Faculty of Management at the University of Lodz (UŁ) will celebrate its 25th anniversary. The ceremonial meeting of the Faculty Council will be combined with naming the auditorium A3 after Prof. Zofia Mikołajczyk, who co-founded the Polish school of management sciences. Professor Zofia Mikołajczyk was head of the Department of Organization and Management for many years, and then she ran Department of Management at the University of Lodz, member of the Committee of Organization and Management Sciences of the Polish Academy of Sciences, she was a co-founder of the Polish schools of management sciences, an outstanding expert in the field of management methods and techniques as well as change management. The highlight of the jubilee will be the gala combined with the solemn meeting of the Faculty Council. Currently, the Faculty includes nine departments and it educates nearly four thousand students in eighteen fields of study. For 12 years it has had the scientific category A. The Faculty of Management is also one of the faculties most often chosen by candidates for studies at the University of Lodz.

Faculty of Chemistry of the Jagiellonian University receives ECTN certificates

2019-09-20

The Faculty of Chemistry of the Jagiellonian University (UJ) in Krakow has received the following certificates: Chemistry Eurobachelor, Chemistry Euromaster and Chemistry Doctorate Eurolabel for the field of chemistry as well as Chemistry Eurobachelor and Chemistry Euromaster for the field of medical chemistry. Certificates were granted to the Jagiellonian University by the The European Chemistry Thematic Network Association (ECTN), assessing the didactic activity of the university in the education of future chemists. The evaluation committee's visit took place at the Faculty of Chemistry of the

Jagiellonian University in June 2019. The required accreditation fees were financed under the «Foreign accreditation» program thanks to grants obtained from the Ministry of Science and Higher Education. The European Chemistry Thematic Network was created by the European Commission under the Erasmus program. It currently has 120 members from 30 European countries.

Young scholars to apply for scholarships under the START 2020 program

2019-09-20

By the end of October 2019, young scholars may apply for a scholarship in the START 2020 program. The START scholarship is addressed to the most talented young researchers awarded in recognition of their scientific achievements. Researchers representing all fields of science who are under 30 years of age may apply for this scholarship. In the competition, the quality and originality of the candidates' previous academic achievements and their most important research achievements are assessed. In previous years, the amount of the annual scholarship was PLN 28,000. The scholarship can be used for any purpose. More: <https://www.fnp.org.pl/oferta/start/>

University of Life Sciences in Poznań signed the University's Social Responsibility Declaration

2019-09-20

Poznań University of Life Sciences (UPP) has signed the University's Social Responsibility Declaration. On behalf of UPP, the document was signed by the Vice-Rector for Studies, Prof. Cezary Mądrzak. The University's Social Responsibility Declaration, initiated in 2017 and signed at that time by 23 universities, is a commitment of the universities' environments to disseminate academic values and popularize science to the society. In 2019, 58 Polish universities solemnly signed it. In practice, it confirms that the University of Life Sciences for years has been voluntarily involved in promoting the idea

of sustainable development in educational programs and in scientific research, and also takes care of organizational order, basing on the foundations of social responsibility.

Cooperation agreement between the Lodz University of Technology and Rossmann company

2019-09-23

Joint research projects, paid internships and scholarships are the most important points of the agreement concluded by the Lodz University of Technology (PŁ) and Rossmann company. - Thanks to new contacts with the Lodz University of Technology, we will develop the competences of our employees, we also want the best PŁ students to join Rossmann. When we combine the intellectual potential of scientists and students with our experience as practitioners, I am convinced that we will gain added value for both sides - said President of Rossmann Marek Maruszak. - In order to meet the current and future needs of our university and Rossmann, we undertake a broader and closer cooperation in many different fields - said the PŁ rector Prof. Sławomir Wiak. The cooperation will be systematic and will involve initiating joint research, implementation and training projects, organization of workshops, student internships and internships, implementation of diploma theses and conducting scientific research.

Pomeranian Medical University in Szczecin receives over 630 thousand PLN for trainings

2019-09-23

The Pomeranian Medical University in Szczecin will implement the project „Procuratio - development of people performing administrative and management activities in the health care system“. Money for the implementation of activities is allocated from the European Social Fund - Operational Program Knowledge Education Development 2014-2020. The aim of the project is to train administrative and management employees of health care entities, as well as representatives of entities creating the health care system. Its value is over 630 thousand PLN. The project involves the implementation of training for employees of provincial offices, local government units and sanitary-epidemiological stations to increase competences related to the implementation of public health tasks, and to finance MBA studies for the management of medical entities providing medical services.

Faculty of management and economics of the Gdańsk University of Technology receives CEEMAN accreditation

2019-09-23

The Faculty of Management and Economics of the Gdańsk University of Technology has been accredited by CEEMAN International Quality Accreditation. In the final report, the international organization CEEMAN emphasized that the university provides excellent management education in line with market needs. All international education courses conducted at the faculty, the quality of scientific research and the level of internationalization in the area of education and academic staff have been evaluated by an international team of experts. Accreditation is granted by CEEMAN, an international organization founded to improve the quality of management ed-

ucation, firstly in Central and Eastern Europe, and now worldwide. It confirms efficient functioning, a good level of didactics and scientific research, as well as financial stability, as well as high quality of education, a comprehensive approach to satisfying the needs of students and enriching their overall academic experience.

Books lost in 1945 returning to the Library of the Gdańsk University of Technology

2019-09-24

The library of the Gdańsk University of Technology received 15 books from the German University of Bremen, which in January 1945 were taken out of Gdansk because of the approaching war. The collection complements two publishing series that are inventories of cultural monuments. Particularly interesting is the «Corpus Vasorum Antiquorum», which is the oldest scientific initiative dedicated to Greek ceramics scattered around museums around the world. Aloys Hirt's 3-volume series «Geschichte der Baukunst bei den Alten» («History of Ancient Architecture») with large-format tables showing plans and plans of ancient buildings is also a unique acquisition. As early as 2000, the University of Bremen donated 750 volumes of books that once belonged to the former collections of the Gdańsk University of Technology. The deposit received at that time initiated the establishment of the Laboratory of Historic Collections and Old Prints in the university library.

University of Silesia in Katowice to launch Polish-Slovak projects

2019-09-24

The University of Silesia in Katowice will implement the projects „GAME JAM as a new teaching method. Improving the quality of education in the field of new technologies on the Polish-Slovak border „and“ Modern education on environmental hazards as a way to create new, specialized jobs“. Money for the implementation of both projects comes from the INTERREG Poland-Slovakia Cross-Border Cooperation Program 2014-2020. Financing agreements

were signed in Katowice by the secretary of state at the Ministry of Investment and Development Grzegorz Puda and the rector of the University of Silesia Prof. Andrzej Kowalczyk. The INTERREG Poland-Slovakia Cross-Border Cooperation Program supports initiatives aimed at developing solutions increasing the quality and diversity of vocational education, as well as adapting vocational education to the requirements of the cross-border labor market and to the expectations of employers operating in the area covered by the program.

GamelT: Summer School to be held at the Philological School in Wrocław

2019-09-24

The GamelT: Gamestorming for Innovative Teaching project, which is a part of the Planet Hexagon board game and RPG game has been implemented at the University of Philology in Wrocław. A Summer School will be held in Wrocław until September with 27 with students and academic teachers from partner universities involved in the project - University of Ljubljana (Slovenia), «Vasile Alecsandri» University of Bacău (Romania) and Western Norway University of Applied Sciences (Norway). During the meeting, Wrocław students and foreign colleagues will have the opportunity to test the latest version of the board game and for the first time and they can take part in tests of four RPG games prepared by each partner university and promoting the culture of their countries. The GamelT: Gamestorming for Innovative Teaching project is funded by the Erasmus + Strategic Partnerships program.

University of Warsaw opens a Cooperation and Dialogue Center

2019-09-25

On September 24, 2019, the University of Warsaw (UW) opened the Cooperation and Dialogue Center. This new organization will be a platform for cooperation and communication between the university and the socio-economic environment. The opening of the Center was accompanied by a debate on the role of universities in shaping the quality of public life. The Cooperation and Dialogue Center was established to promote the academic achievements and successes of the academic staff and to make knowledge and university research resources available to a wide audience, partners and external institutions. The opening of the Center was accompanied by an expert debate entitled «In the age of widespread misinformation: the role of modern university and science of the 21st century in shaping the quality of public life in Poland», which was attended by Prof. Marcin Pałys, rector of the University of Warsaw, Prof. Anna Giza-Poleszczuk, initiator of establishing the Cooperation and Dialogue Center and Dr Anna Budzanowska, general director at the Ministry of Science and Higher Education.

Chairmen of the Council of Scientific Excellence teams appointed

2019-09-26

Scientists from eight Polish universities headed the teams operating within the Council of Scientific Excellence. The Scientific Excellence Council is a new body working for the development of Polish scientific staff. It was created under the Constitution for Science. It is to ensure the highest standards of quality of scientific activity required to obtain the academic titles. The Humanities Team is chaired by Prof. Małgorzata Omilanowska from the University of Gdańsk. The chairman of the Team of Engineering and Technical Sciences became Prof. Eng. Janusz Krzysztof Kowal from the AGH University of Science and Technology in Krakow. The Group of Medical Sciences and Health Sciences is headed by Prof.

Adam Janusz Dziki from the Medical University of Lodz. The Agricultural Sciences Team will be headed by Prof. Jan Franciszek Jankowski from the University of Warmia and Mazury in Olsztyn. The Social Sciences Team is chaired by Prof. Krzysztof Jajuga from the Wrocław University of Economics. The chairman of the Team of Sciences and Natural Sciences is Prof. Krzysztof Michał Pachucki from the University of Warsaw. The Team of Theological Sciences will be directed by Fr. Prof. Krzysztof Gózdź from the Catholic University of Lublin. The Art Team is headed by Prof. Andrzej Banachowicz from the University of Arts in Poznań.

Professor Bielawski: Constitution for Science to help manage university more efficiently

2019-09-26

- Under the new law, the rector has a stronger legal mandate than before. He gets a number of competences that were previously assigned to other university bodies. This is connected with great responsibility, but I am convinced that thanks to the new prerogatives management will be much more efficient - said Prof. Wiesław Bielawski, rector of the Warsaw University of Life Sciences (SGGW) in Warsaw. He commented the implementation of the Constitution for Science. The provisions of the new act have been in force since October 2018, but only the 2019/2020 academic year brings noticeable changes in the functioning of the university. Prof. Bielawski emphasizes most important changes in a new model of PhD students' education within doctoral schools, creation of a new academic careers for outstanding didactics, the possibility for universities to create their own strategies for the development of academic staff based on a stable scholarship system, development of dual studies and practical education with maintaining the principle of free study.

Rzeszów University of Technology cooperates with Liugong Dressta Machinery

2019-09-27

Rzeszów University of Technology (PRz) has signed a cooperation agreement with Liugong Dressta Machinery Sp. z o.o. The agreement promotes the exchange of experience and cooperation of science and business centers. The purpose of the contract is to fully utilize its possibilities and experience that will provide optimal cooperation between science and business centers. In the agreement, the parties are undertaking to cooperate in particular in the following areas: conducting scientific research, research and development works, trainings, apprenticeships and student internships in Stalowa Wola and other companies and plants belonging to the Liugong Capital Group, including those in China, as well as training highly qualified personnel by Rzeszów University of Technology for the needs of Liugong Dressta Machinery. Liugong Dressta Machinery Sp. z o.o. is a manufacturer of heavy construction equipment and powerful machines for the toughest applications, including mine loaders, bulldozers or pipe layers.

Chengdu Agricultural College to cooperate with the Warsaw University of Life Sciences

2019-09-27

On September 25, 2019, a delegation from the Chinese Chengdu Agricultural College was hosted at the Warsaw University of Life Sciences (SGGW). The delegation included vice president of the university Li Qiang and representatives of the mechanical and electrical technology, finance as well as design and development departments. The delegation was met by Vice-Rector for International Cooperation, Prof. Michał Zasada, representative of the Office of International Cooperation and representative of the Faculty of Agriculture and Biology, Dr Katarzyna Kucińska. The visit was aimed at establishing didactic and research cooperation between universities, in particular the issues of cooperation under the diploma program in agriculture were discussed.

Polish universities present at the EAIE fair in Helsinki

2019-09-27

The 31st EAIE conference is taking place in the capital of Finland, Helsinki. This event belongs to one of the largest and most important industry meetings in the world. Once a year, representatives of universities, institutions, agencies and organizations working for academic exchange from around the world are meeting in one of the European cities. The National Agency for Academic Exchange (NAWA) participating in the fair emphasizes that specialists and topic enthusiasts are discussing the issues related to higher education, internationalization and education. The exhibition space is also a great place to make new contacts or maintain cooperation already established with partners. This year, in a joint mission of the Ready, Study, Go! as many as 24 Polish universities took part in Helsinki fair with the NAWA and the representatives of the Ministry of Science and Higher Education. The Polish delegation amounts to nearly 60 people. More: <https://www.eaie.org/helsinki.html>

Gorzów Academy to cooperate with the Provincial Hospital

2019-09-27

Academy in Gorzów Wielkopolski signed an agreement with the local Multi-Specialist Provincial Hospital. This cooperation expresses the intention of the Academy to establish first degree nursing studies with a practical profile. Pursuant to the document, students of the new faculty will have professional internships in the Gorzów clinics and they will profit from the cooperation in the areas of infrastructure, staff, didactic process, apprenticeships and research. The agreement between the academy and the hospital is to be a remedy for the lack of nurses. The hospital has committed to admit students to take internships. The document expresses also a commitment of the parties to undertake joint ventures to popularize the issues of public health - including organizing conferences and practical seminars, publishing joint articles and scientific monographs on this subject.

LEGO Studio launched at Adam Mickiewicz University in Poznan

2019-09-27

University of Adam Mickiewicz University in Poznań is the only academic center in Poland where LEGO® Education Innovation Studio - a space to learn, work and play -was launched. The studio was created in cooperation with the Akces Education company, which donated dozens of LEGO sets. - We want it to be a studio available to the entire University, It is important to teach children about interesting things through play and analysis of relationships between elements. Already at this stage, we are thinking about the future, searching good candidates for studies, employees who will be able to think innovatively, not only in science but also in the humanities - says the Vice-Rector for Information Technology and cooperation with the socio-economic environment of Prof. Marek Nawrocki. The sets of blocks include heat sensors, distances, related to pneumatics, light intensity. They will be used to teach the kids the concepts of mathematics and physics, as well as programming. More: <https://amu.edu.pl/dla-mediow/komunikaty-prasowe/nauka-z-klockow-lego-na-uam>

Economic universities from Warsaw and Wroclaw to start the joint scientific research

2019-09-30

On September 30, 2019, the Warsaw School of Economics (SGH) in Warsaw and the University of Economics in Wrocław (UEW) will launch a new joint research program. Both economic universities are organizing a joint grant competition. Rector of SGH Prof. Marek Rocki and the rector of UEW Prof. Andrzej Kaleta signed a framework agreement and declared their will to cooperate in conducting joint scientific research. The purpose of cooperation is to enrich knowledge in one or several scientific disciplines, the scientific development of employed academic teachers and to take future actions aimed at implementing research projects financed from external sources. To apply for a grant, a scientific

team must be set up to conduct joint research of at least four, but not more than ten academic teachers employed at SGH and UEW, with the participation of employees of one university not less than 40 %. The scientists can receive a grant of up to 24,000 PLN for the implementation of one research project PLN gross.

Medical University of Warsaw to strengthen cooperation with the District Medical Chamber in Warsaw

2019-09-30

The Medical University of Warsaw (WUM) has signed a letter of intent with the District Medical Chamber in Warsaw, which aims to improve the existing partner cooperation in the field of teaching and development as well as scientific, research and implementation of joint projects in the field of the activities of the medical self-government and dental policy. Cooperation between science and the activity of the medical self-government assures the certainty of an effective combination of knowledge and practice of its application and implementation of socially valuable projects. The signatories of the letter expressed their will to expand the participation in joint scientific, research and development projects, including joint organization of scientific conferences devoted to dental issues and concerning the tasks and activities of the medical self-government; scientific advice and consultations; promoting jointly developed dental policy projects.

University of Gdańsk and Energa S.A. to cooperate

2019-09-30

The University of Gdańsk has signed a cooperation agreement with Energa S.A. The main areas of cooperation are the exchange of scientific and technical information and documentation, publication and research documentation, and organization of joint educational and scientific projects. The agreement provides for the development of analyzes, expertise and opinions for the needs of Energa S.A., exchange of scientific and technical information and documentation, publication and research documentation as well as the publication of research results resulting from the cooperation of the parties and the organization of lectures and trainings. The signatories also agreed to cooperate in the organization of scientific conferences, symposia and other forms of knowledge and experience transfer, the possibility of organizing internships for students by Energa S.A., as well as joint scientific-technical and R&D projects, as well as joint use of research and development equipment and scientific apparatus.

President of the Industrial Development Agency awards graduates of vocational schools

2019-09-30

The president of the Industrial Development Agency (ARP) S.A. granted prizes to the authors of the best master's, bachelor's and engineering theses related to the subject of enterprise management, restructuring and innovation. The awards ceremony was attended by Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin and chairman of the Conference of Rectors of Public Vocational Universities professor Witold Stankowski. - One of the priorities of the reform of science and higher education under the Constitution for Science is to adapt the educational offer of vocational schools to the expectations of employers and, consequently, to increase the chances of graduates on the labor market. The reform strengthens those legal instruments that will allow universities to respond

adequately to the changing needs of the modern economy and labor market - said Jarosław Gowin. List of laureates of the competition for the award of the President of ARP S.A. : Master theses: 1. Ewa Wnuk, State University of Information Technology and Entrepreneurship in Łomża for the work «Design and study of intelligent clothing with the functionality of registering selected vital parameters of an industrial plant employee». Bachelor theses: 1. Kamila Oklejewicz, State Higher Vocational School in Sanok; for the work «Application of the competency model in human resource management on the example of the XYZ company». 2. Barbara Rudnicka, State Higher Vocational School Capt. Witold Pilecki in Oświęcim; for the work «Quality management in the process of water treatment for consumption». 3. Julian Skowroński, State University of Information Technology and Entrepreneurship in Łomża, for the work: «A prototype of an autonomous robot handling the movement of pallets between the warehouse and the loading / unloading zone.»

Center of John Paul II to offer scholarships for students from Warsaw

2019-10-01

Until October 10, 2019, students from Warsaw can apply for scholarships funded by the Capital City of Warsaw. The scholarship program is addressed to people studying in Warsaw who achieve scientific, sporting, artistic successes or are socially involved despite the difficult financial situation (net monthly income per one member of their family does not exceed PLN 1,500). Pupils and students who want to receive the scholarship should fill in the application available on the website: Formularze.centrumjp2.pl, and then submit it with the required attachments in person or via traditional mail to the Center of John Paul II at ul. Foksal 11 in Warsaw. More: <https://www.centrumjp2.pl/stypendia/>

Students from Lvov begin their studies at the University of Warmia and Mazury

2019-10-01

For two years, the University of Warmia and Mazury (UWM) in Olsztyn has been implementing an agreement with the Lvov Technical University, enabling Ukrainian students come to Poland. Their new group is beginning their education in Olsztyn. This is a project of joint education of students signed by the Lvov National University and the University of Warmia and Mazury in Olsztyn. It is implemented at the Institutes of Political Sciences in the field of political science. - We have signed a contract regarding double diplomas at master's studies - explains Prof. Teresa Astramowicz-Leyk from the Institute of Political Sciences of the University in Olsztyn. There are also plans to start cooperation between universities from Olsztyn and Lvov regarding joint undergraduate education.

Gdańsk University of Technology rated in the Top 1000 Group of Times Higher Education World University Ranking

2019-10-01

Gdańsk University of Technology as the only Polish technical university was included in the group of thousand best universities in the world according to the latest prestigious Times Higher Education World University Ranking. Also the Jagiellonian University, the University of Warsaw and the Adam Mickiewicz University in Poznań are included on the list of the 1000 best universities in the world. Gdańsk technical university advanced more than other Polish universities, leaving its former position in the 1000+ range. THE World University Ranking is one of the most respected and opinion-forming rankings of universities. The high schools are evaluated in five categories: education, internationalization, scientific research, citation and publication index, and cooperation with business.

10th Night of the Institute of Aviation in Warsaw

2019-10-02

The Institute of Aviation, which belongs to the Łukasiewicz Research Network is inviting participants to an educational night event - 10th Night of the Institute of Aviation. The leitmotif of this year's event will be the secrets of space. The event will take place on October 11, 2019 at the Institute of Aviation in Warsaw. The special guest of the event will be Artur Chmielewski, Polish engineer, space mission manager, working at the California Jet Propulsion Laboratory - NASA. He will share the details of his work as part of the famous Rosetta project and the Galileo, Ulysses and Cassini-Huygens missions, as well as current missions organized by the American Space Agency. The event will provide enthusiasts from student scientific clubs, technical universities and many institutions, such as the Polish Space Agency, the Space Research Center of the Polish Academy of Sciences and the Copernicus Science Center with possibility to show the Polish contribution to space exploration and the successes of Polish engineers, including in the design of rockets, Mars rovers or space probes. More: <http://www.nocwinstytucielotnictwa.pl/>

Promotion of the Faculty of Law and Administration of the University of Gdańsk on Eastern and Asian markets

2019-10-02

The University of Gdańsk will implement the project „SEA-SEE PERSPECTIVE ON LAW: promotion of the Faculty of Law and Administration of the University of Gdańsk on Eastern and Asian markets.” The funding comes from the International Promotion Program of the National Academic Exchange Agency. The project assumes the implementation of a promotional and information campaign aimed at encouraging foreign candidates to undertake education and to exchange academic staff at the Faculty of Law and Administration of the Gdańsk University. Its implementation includes: integrated projects, networking activities, information and pro-

motion campaigns, films, multimedia and traditional information and promotion materials. The aim of the project is to attract foreign candidates for studies and intensify the exchange of academic staff (especially from Ukraine, Kazakhstan and China) through networking activities and activation in modern and effective promotion of the didactic and scientific offer.

Vistula Academy of Finance and Business signed an agreement with Centria University of Applied Sciences

2019-10-02

The Vistula Academy of Finance and Business in Warsaw has established cooperation with another foreign university. It has concluded a double diploma agreement with Centria University of Applied Sciences in Finland. The agreement applies to first cycle studies: BA in Management, Enterprise Management Specialization (Vistula) and BA in Business Management (Centria University); BA in Computer Engineering (Vistula) and BA in Information Technology (Centria University). Students participating in the program will be able to study for two semesters at a partner university and as a result obtain a bachelor's title from both institutions. Centria University of Applied Sciences is an international university that operates in three cities: Kokkola, Ylivieska and Pietarsaari, on the west coast of Finland. It has a wide range of studies - from enterprise management to environmental chemistry and technology, IT and nursing. The university focuses on the practical dimension of education. The training is conducted in English.

2019-10-02

The University of Economics in Wrocław and the Warsaw School of Economics are organizing a competition for research co-financing under inter-university grants for their research and research and

teaching staff. The scientists can receive a grant of up to 24,000 PLN allocated for the implementation of one research project. The aim of the project is to enrich knowledge in one or several scientific disciplines, the scientific development of academic teachers employed at participating universities and to take implement future research projects financed from external sources. To apply for a grant, a scientific team must be set up to conduct joint research of at least four, but not more than ten academic teachers employed at SGH and UEW, with the participation of employees of one university not less than 40 %. The scientists can receive a grant of up to 24,000 PLN for the implementation of one research project PLN gross.

Gdańsk University of Technology becomes a member of the prestigious international organization AACSB

2019-10-02

Gdańsk University of Technology has been admitted to the organization of AACSB (Association to Advance Collegiate Schools of Business), a global association of economic universities. Thus, the process of university accreditation has started and will last about 4-5 years. AACSB accreditation covers institutional as well as educational and program issues. A team of international experts will assess the content of scientific activities related to management and economics combined with engineering and social sciences. Currently, AACSB is accredited by 820 institutions from over 50 countries, including 531 universities from the United States (including Massachusetts Institute of Technology, Yale University, Harvard University). The number of members of the organization today exceeds 1600 units from around the world.

University of Economics in Katowice joins PROMINENCE project partners

2019-10-02

The University of Economics in Katowice, together with six European universities is implementing the international PROMINENCE project: Promoting Mindful Encounters Through Intercultural Competence And Experience. The aim of the project is to improve the didactic process of students in the field of intercultural communication in order to provide the labor market with well-prepared graduates in the design and implementation of internationalization processes for small and medium-sized enterprises. PROMINENCE in its assumptions refers to the key policy objectives of the European Union regarding higher education, opening new opportunities for cooperation between teachers, students and employers. Project partners are: the Finnish Seinäjoki University of Applied Sciences; German Aschaffenburg University of Applied Sciences; Bulgarian University of Economics in Varna, Slovak University of Economics in Bratislava, French University of Savoie Mont Blanc and Hungarian University of Debrecen.

Senegal delegation visits the Warsaw University of Life Sciences

2019-10-03

On October 1, 2019, the Warsaw University of Life Sciences (SGGW) in Warsaw hosted a delegation from Senegal. The capital's university was visited by Serigne Mbaye Thiama, Senegal's Minister for Water and Sewage, Niokhor Ndour, Director of Ds. Water Resources Management and Planning, Senegal's Ministry of Water and Sewerage, and Amadou Dabo, Senegal's Ambassador in Poland. Guests visited the Water Center of the Faculty of Civil and Environmental Engineering, and participated in an expert seminar on water issues, which was attended by representatives of business and academic centers. At the official meeting in the Rectorate the guests met the Vice-Rector for International Cooperation, Prof. Michał Zasada, representative of the Office of International Cooperation and representative of

the Faculty of Civil and Environmental Engineering, Prof. Jarosław Chormanski. The participants discussed presented university's didactic offer and the possibility of organizing short-term trainings for employees of the Ministry of Water and Sewerage of Senegal.

Graduates of the Jagiellonian University achieve the best results of the Final Medical Exam in Poland

2019-10-03

The Medical Exam Center has published the results of the autumn Medical Final Exam (LEK). Medical graduates of the Jagiellonian University Collegium Medicum have again obtained the best result among all medical universities in Poland - in two basic, most numerous categories: for the students taking exams for the first time and the students of last two years (in total about they cover 95% of all students taking exam). Students who have graduated in the last two years have obtained an average of 140.18 points, and students taking exams for the first time - 139.77 points, which is 8.74 and 9.47 points, respectively, than the national average. In the last category, 97 percent UJ CM graduates passed. A total of 640 graduates took the exam, and 594 (93.0%) obtained a positive result.

Białystok University of Technology to receive PLN 11 million for the for modernizing the education offer

2019-10-03

Białystok University of Technology is one of the 23 scientific centers that received funding from the National Center for Research and Development under the Operational Program Knowledge-Education-Development POWER 3.5. The university received PLN 11 million to modernize its education offer and computerize the management process. On behalf of Deputy Prime Minister, Minister of Science and Higher Education, Jarosław Gowin, MP Jacek Żalek

handed over a symbolic check to the authorities of the Białystok University of Technology. - I would like to congratulate the Białystok University of Technology for obtaining such a large sum. The Constitution for Science enabled universities to conduct business. The Podlasie's high schools are developing so fast that they may soon become leading enterprises in the region. Constant development of intellectual potential is a chance for our economy to get out of the trap of medium development. By focusing on new technologies and well-educated students we will be able to meet the requirements of a dynamically developing civilization - said MP Żalek.

Olsztyn Inter-Faculty School of Entrepreneurship to launch application process

2019-10-03

Until October 16, 2019, the Business Academy of the University of Warmia and Mazury (UWM) in Olsztyn will launch the first part of application process for the third „Inter-Faculty School of Entrepreneurship” program. The Business Academy is a unique school in the country for students and PhD students from all university faculties. It prepares its students for business cost-free. The teachers tell students how to set up a start-up company, how to prepare a business plan professionally. All the trainings are led under the guidance of professionals who run their own business and who will be mentors for listeners in the preparation of all documentation and a business model that they will eventually want to introduce to the market. - The Business Academy is intended for those students and doctoral students from our University who are interested in business or already have an idea for some business. We will also take care of students conducting research projects who would like to commercialize them - says Dr Bogdan Włodarczyk, director of the Academy.

Poznań University of Life Sciences to cooperate with Yangling Northwest A&F University

2019-10-03

Poznań University of Life Sciences signed a memorandum of cooperation with the Chinese University Northwest A&F in Yangling (China). The document was signed during the Silkroad Agriculture Education and Research Innovation Alliance (SAERIA) Forum held at the Biocenter of the Poznań university. The memorandum was signed by the rector of the Poznań University of Life Sciences Prof. Jan Pikul and president of Northwest A&F University Wu Pute. The cooperation will cover areas in both didactics and scientific research, including exchange of students and researchers as well as providing joint research projects. Northwest A&F University was founded in 1934 and is one of the largest agricultural universities in China. It currently has over 30,000 students and over 5,000 employees.

Maritime University of Szczecin to cooperate with the Institute of Meteorology and Water Management

2019-10-03

The Maritime University of Szczecin started cooperation with the Institute of Meteorology and Water Management (IMGW). The agreement was signed by Dr Przemysław Ligenza, director of the Institute and rector of the university, Dr Eng. Capt. Wojciech Ślęczka Prof. of the Maritime University. The event was attended by the Minister of Maritime Economy and Inland Navigation, Marek Gróbarczyk. The agreement provides joint implementation of research projects, exchange of scientific and research staff, education of PhD students and joint publications in scientific journals. The decision to cooperate was made with a sense of responsibility for the further development of the potential of both partners. - Nobody has ever considered the Maritime University of Szczecin with IMGW, but water management is the common denominator. This is another example of close scientific cooperation between an academic

center and an institution of a business nature and it also serves the public interest - said the minister

AGH University of Science and Technology in Krakow and the Shibaura Institute of Technology in Tokyo to launch joint studies

2019-10-04

The National Agency for Academic Exchange (NAWA) announced the results for participation in the call „Catamaran - Preparation and implementation of joint studies.” AGH University of Science and Technology in Krakow received funds to launch a new field of study called Energy and Environmental Engineering, which will be implemented together with the Shibaura Institute of Technology in Tokyo. Prof. Eng. Janusz Szmyd submitted the program entitled «Preparation of the study program related to double diploma for the 7th level of the European Qualifications Framework in the field of Energy and Environmental Engineering» that received funding in the amount of PLN 691,400. Professor Janusz Szmyd is the AGH UST coordinator for cooperation with Japan and has been cooperating with renowned Japanese universities for 30 years. The «Catamaran» program is implemented as part of the National Academic Exchange Agency project «Support for the institutional capacity of Polish universities through the creation and implementation of international study programs».

Nowy Sącz Higher Vocational School launches Medical Simulation Center

2019-10-04

The State Higher Vocational School (PWSZ) in Nowy Sącz has launched the Medical Simulation Center to improve the quality of education in the field of nursing and emergency medicine. The Medical Simulation Center in Nowy Sącz includes a real ambulance, fully equipped medical rooms, a hospital emergency room and patients' rooms with modern phantoms. This academic year students will be educated in 16 fields of basic studies, 6 fields of full studies and 2

MA programs. For the first time, students will study internal security at the Institute of Physical Culture and pre-school and early school education at the Pedagogical Institute.

Krakow University of Economics to launch new post-graduate studies

2019-10-04

The University of Economics in Krakow (UEK), is launching a new postgraduate course in Banking and Digital Finance from October 26, 2019. The goal of studies conducted by the Banking Department with the participation of specialists from the financial sector is to prepare high-quality specialists to work in commercial and cooperative banks, companies from the FinTech sector and financial intermediation and consultancy institutions. Two-semester studies enable students to acquire knowledge in the field of new trends and processes occurring on the financial and banking market under the influence of technological changes and digitization. SYNERGIA Bydgoszcz - Chmielnicki 2019 project to support the cooperation of young people from Poland and Ukraine

2019-10-04

The Design Department of the University of Technology and Life Sciences in Bydgoszcz, thanks to the funding received from the City of Bydgoszcz and the Marshal's Office of the Kuyavian-Pomeranian Voivodeship, implemented the project „SYNERGIA Bydgoszcz - Chmielnicki 2019”. The main goal of the project is to support direct contacts and cooperation of young people from Poland and Ukraine. Students and employees of the Design Department and the Interior Architecture Department of the University of Bydgoszcz prepared works that were presented at the exhibition at the Regional Museum of Art History in Khmelnytsky (Ukraine). Young lecturers conducted workshops with youth and students of both countries in order to integrate the participants. The trip of students to Ukraine was an opportunity to exchange thoughts and views, but thanks to the formula of the project it was also an opportunity to present their own artistic works in the field of sculpture, drawing, painting or design. It was also an opportunity to see the work of their colleagues from Ukraine.

Naval Academy in Gdynia signs an agreement with Energa S.A.

2019-10-04

Naval Academy in Gdynia signed an agreement with Energa S.A. The goal is educational, scientific, cultural and environmental cooperation in the field of teaching and research and development in the security sciences, organization and management. The cooperation will be implemented through the preparation of an educational offer by the Academy based on the analysis of the needs of the Energa Group and the expectations of the labor market. The signatories want to organize joint training, conferences, seminars and workshops. Both parties expect efficient and effective implementation of tasks to stimulate the development of the Energa Group, strengthen human poten-

tial and activate employees. The signed agreement is to increase the quality of education of Energa Group employees, as well as shape awareness and responsibility for national security, the company's environment and employees' own security.

Krakow University of Technology inaugurates the academic year

2019-10-07

Over 13.5 thousand students and doctoral students began on 3 October the new academic year at the Krakow University of Technology (PK). - We are celebrating the unique, 75th inauguration of the academic year at our university, at exceptional time of dynamic changes in Polish higher education and our university - said the rector of PK Prof. Jan Kazior. The ceremony was attended by Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education. Congratulation letters to the PK community were sent by Polish President Andrzej Duda and Prime Minister Mateusz Morawiecki. Participating in the inauguration Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin thanked the University community for „a very significant contribution to the final decisions of the higher education reform contained in the Constitution for Science.” He emphasized that the Ministry of Science is ready to amend the reform if such needs were reported by the academic community and pointed out particularly important challenges faced by technical universities: to take advantage of the development opportunities of doctoral schools and develop even more effectively Polish economy. He stressed that the common aspiration of the academic and ruling community should be to increase the financing of Polish science from budget funds.

Wrocław University of Science and Technology completing the digitization

2019-10-07

The digitization project of nearly 280,000 of various articles as technical magazines, architectural reports, photos and negatives is being completed at

the Knowledge and Information Center of Science and Technology of the Wrocław University of Science and Technology. Polish magazines published since 1948 are scanned and processed - including journals that are a valuable source for research and are an important element of national heritage, illustrating the development of Polish science over the years and its impact on world science. Their digitization and development will ensure secure, long-term digital storage and archiving, and in the next stage will enable the broad access to the materials. The digitized materials are also related to architectural and archaeological issues and what creates unique documentation of Polish monuments, with particular emphasis on the Lower Silesia Region. The archives include technical magazines and architectural reports, as well as negatives and photos. Gdynia Maritime University signs a cooperation agreement with Ocean Network Express

2019-10-07

The Maritime University of Gdynia will cooperate with Ocean Network Express (Europe) Ltd. The cooperation agreement was signed by the Vice-Rector for Science, Dr Eng. Ireneusz Czarnowski, Prof. of Gdynia Maritime University and Jotaro Tamura - managing director for the region of Europe and Africa. The signed agreement is aimed at strengthening long-term mutual relations enabling the use of knowledge and skills of representatives of the maritime transport and logistics sector in the process of educating students of the Maritime University in Gdynia. The document also provides for joint research and development activities, as well as offering students the opportunity to gain practical experience through internships organized at Ocean Network Express Ltd.

Success of scientists of the University of Silesia in the Beethoven Life competition

2019-10-07

Two Polish-German projects implemented by scientists of the University of Silesia qualified for funding in the Beethoven Life competition organized by the National Science Center in cooperation with the German Research Community. 10 research projects implemented by Polish-German teams qualified for the final. The winners are two scientists from the Faculty of Biology and Environmental Protection of the University of Silesia. Dr Marek Marzec will implement the project «Understanding the function of strigolactones in plant response to drought stress using a collection of barley mutants», and Dr Miriam Szurman-Zubrzycka for the project «Complex DREAM and NAC - a molecular mechanism of plant response to stress caused by genotoxic factors». Beethoven Life is a supplement to the Beethoven Classic competition, which does not cover the thematic scope of applications in the field of life sciences.

Deputy Prime Minister Gowin visits the Lodz University of Technology

2019-10-08

Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education, visited the Lodz University of Technology. He summed up the cooperation of his ministry with the university for last four years. Its biggest effect for the Lodz university is Alchemium, i.e. the building of the Faculty of Chemistry currently under construction. The Lodz University of Technology is one of the most dynamically developing universities in Poland - said Jarosław Gowin. The construction of Alchemium began in 2018, and Jarosław Gowin was present at the ceremony of laying the symbolic cornerstone in the foundations of the building in May 2019. The first stage of construction is to be completed by August 2020. By this date, a conference and didactic center for 500 people will be created to host the most important university celebrations. The second part, i.e. the

didactic building for students and chemists will be erected in 2021-2024.

„National Academic Team” project is underway

2019-10-08

The Ministry of Science and Higher Education has launched a new project called „National Academic Team”. It is a project to support students-athletes in the education process. The project to support the educating of those student as part of the project National Academic Team aims to enable them to pursue a parallel sports career and academic education, - said Jarosław Gowin, the deputy Prime Minister and Minister of Science and Higher Education at a press conference at the headquarters of the Polish Olympic Committee. Sometimes it is necessary to leave the stadium or pitch and start working beyond sport. In such cases, a good education can be as extremely valuable as almost the Olympic gold - added Deputy Prime Minister Gowin.

„University of Warsaw for climate”

2019-10-08

Rector of the University of Warsaw (UW), Prof. Marcin Pałys, issued an ordinance establishing an advisory team for the climate and ecological crisis. It will operate under the name „University of Warsaw for climate”. Its task will be to develop a strategy for climate actions that the university can take on the daily base. The group „University of Warsaw for Climate” consists of 14 members of the University of Warsaw academic community. They are both academic and administrative employees as well as representatives of students and doctoral students. The team will discuss issues related to counteracting the ecological and climate crisis and discuss the social responsibility of the University of Warsaw in relation to this issue. The plans include identifying needs and developing methods to reduce the university's negative impact on the environment. The group will cooperate with scientists and other members of the academic community, as well as with entrepreneurs, non-governmental organizations and representatives of state and local authorities.

One of the team's tasks is also preparing positions and recommendations for individual UW units.

Continuation of cooperation between Poznan University of Technology and Santander Universidades

2019-10-08

Poznan University of Technology will continue cooperation within the Santander Universidades project. The agreement on the extension of cooperation was signed by the rector of the university, Prof. Eng. Tomasz Łodygowski and director of Santander Universidades in Poland Wojciech Leśniewski. Santander Universidades is one of the key social engagement projects of Santander Bank Polska and the Santander Group. This is the largest program supporting higher education financed by a private company in Poland. Over 360,000 scholarships have been funded from the program since 2005. Poznan University of Technology has been participating in the project since 2012. During this time a number of activities were carried out including scholarships and awards for the best students and doctoral students, trips of students to TrepCamp and Babson College global development projects, grants for student organizations, solar car co-financing and competitions for aspiring entrepreneurs . Scientist of the Poznań University of Economics to examine social policy towards work and family

2019-10-08

Dr Piotr Michoń, Prof. of Poznań University of Economics from the Department of Labor and Social Policy obtained funds for the project „Contemporary Social Policy Towards Work and Family - education and research”. Financing is allocated from the «Academic International Partnerships» program of the National Agency for Academic Exchange. The grant - over PLN 1.5 million - will support research and scientific publications with foreign partners, build the quality and recognition of research activity, and improve the didactic competence of employees. The project will be implemented jointly with eleven foreign universities, including from Germany, Norway, Sweden, USA, Great Britain and Russia.

International Scientific Conference „Role of Catholic Universities in the modern world”

2019-10-09

On the occasion of the 20th anniversary, the Cardinal Stefan Wyszyński University (UKSW) in Warsaw is holding on October 24, 2019, an international scientific conference devoted to the place and role of Catholic universities in the world. The event will be held under the auspices of Dr Jarosław Gowin, Deputy Prime Minister and the Minister of Science and Higher Education and Prof. Piotr Gliński, Deputy Prime Minister and Minister of Culture and National Heritage. During the event, Prof. Michał Kleiber will present the role of science and universities in the modern world, priest Prof. Dr Wojciech Góralski will present the role of Catholic universities in the world of science, and the Rector of UKSW priest Prof. Stanisław Dziekoński will present UKSW as a modern university of the future. The conference will include speeches of Archbishop of the Slovak Greek Catholic Church Jan Babjak and Prof. Vaja Vardidze, rector of the Catholic University of Sulkhan Saba Orbeliani in Tbilisi, Georgia.

Central Statistical Office to launch competition for the best master's and PhD papers on statistics

2019-10-09

The Central Statistical Office (CSO) is inviting participants to the CSO President's Competition for the best master's and PhD paper in the field of statistics in the 2018/2019 academic year. The aim of the competition is to select the best master's thesis and the best PhD paper in the field of statistics, as well as to popularize knowledge about statistics and its information resources. Competition participants may include graduates of full studies or regular Master's studies - in the part concerning the best master's thesis in the field of statistics; graduates of PhD studies - in the part concerning the best doctoral dissertations. The Master's theses and PhD papers in the field of statistics which have received a positive assessment and have been accepted at public and private universities in the 2018/2019, by December 31, 2019, should be submitted to the Competition jury by the authors of the works, universities or promoters of works with the author's consent.

Interactive exhibition Exploratory of the University of Rzeszów

2019-10-09

The University of Rzeszów (URz) is inviting students, teachers and parents to the ceremonial start of the interactive exhibition, which will take place on Saturday, October 12, 2019. The opening ceremony of the interactive exhibition will take place at 8:45 in the A0 building at ul. Professor Stanisława Pigonia 1. This event will be preceded by the inauguration of the academic year for students of the Little University of Rzeszów. At the exhibition viewers will be able to see how new exhibits bring closer knowledge of nature (the mysterious life of mammals and birds) and ecological methods of waste management. They will also be able to perform experiments using augmented reality technology.

Pomeranian University in Słupsk receives over 20 million funding

2019-10-09

The Pomeranian Academy in Słupsk has obtained over PLN 20 million for investments whose main goal is to increase its scientific and didactic potential. The money is intended for the development of the Academy's infrastructure by equipping and creating new laboratories in the field of exact sciences, social and humanities, as well as solutions dedicated to digital humanities. Co-financing will allow for the creation of the Interdisciplinary Center for Innovative Environmental Research in Pomerania - InterPom, the Pomeranian Center for Digital Humanities Pomeranian Center for Digital Humanities, the Academic Center for Monitoring Threats to Population and Critical Infrastructure and the Center for Research on Multiculturalism and Social Inclusion. The subsidy will also help create an Active 5 PLUS Academy - a project to support health-related activities (promotion of sport among children and young people), promotion of academic traditions, Polish culture and language.

University of Technology and Life Sciences in Bydgoszcz to launch international project

2019-10-09

The University of Technology and Life Sciences in Bydgoszcz is implementing the project „EcoSET. Ecology, Science, Education and Technology. Internationalization of the University of Technology and Life Sciences in Bydgoszcz in the field of science and education“. Activities are carried out under the International Academic Partnership Program of the National Agency for Academic Exchange. The aim of the project is to increase the level of internationalization in the field of scientific research and education at the University of Bydgoszcz. The scope of the project includes joint research activities in the following disciplines: civil engineering and transport, architecture and urban planning as well as zootechnics and fisheries. The project has received a grant of almost PLN 2 million and is implemented in partnership with the University of Beira Interior, Portugal, Tarleton State University, United States, Adana Science and Technology University, Turkey, University of Molise, Italy, Justus-Liebig-Universität Gießen, Germany and Aarhus University, Denmark.

University of Warmia and Mazury in Olsztyn launches Doctoral School

2019-10-10

28 people began their education at the Doctoral School established in accordance with the new Act on higher education at the University of Warmia and Mazury in Olsztyn. Education at the Doctoral School is to enable PhD students to acquire skills that they will need both during research and in their scientific careers as PhD holders. The didactic function for which the Doctoral School is responsible will be separated from the so-called scientific research - explains Prof. Paweł Brzuzan, who is the headmaster of the Doctoral School. The school provides space, appoints supervisors and promoters for PhD students. And this is the basic difference. At the moment, doctoral schools are replacing doctoral studies. This is not just a change of name, but also a

certain philosophy. The emphasis will be on research and quality. Therefore, the most responsibility will be put on future promoters and disciplinary councils - adds Prof. Brzuzan.

Medical University of Białystok to receive over PLN 13 million

2019-10-10

The Medical University of Białystok (UMB) received over PLN 13 million from the National Center for Research and Development. The larger part of this amount, almost PLN 9 million, will be allocated to the modernization of the Dentistry department and to the creation of a new course. - First of all, we will introduce e-learning, which is a completely different model of student education in the field of seminars and lectures. Then we will open a new direction: dental hygiene. We will also develop a training program in CAD / CAM systems, because printing is a new method of prosthetic restorations. We haven't had this method so far, that's why we want to introduce it to the education program - explains Dr Teresa Siepińska from UMB. The remaining amount, nearly 4.5 million PLN, will be transferred to the internationalization of the Medical University. Thanks to the money raised, the university will have more opportunities to present itself on Asian, American and Canadian markets. Also, an application for mobile devices will also be created that will allow to communicate with scientists from abroad and UMB English-speaking students.

National Agency for Academic Exchange to launch second Iwanowska's program

2019-10-10

PhD students, who want to develop their scientific career can apply for the second Iwanowska's scholarship program. The program enables students to participate in the foreign trips to the best scientific centers in the world. Under the program, PhD students may take part of doctoral studies in foreign centers in the country chosen by the applicant. Such a scientific stay may last from 3 to even 12 months.

The scholarship for trips can be up to 120 thousand PLN. The program provides for special funding when young researchers are accompanied by spouses and their children, and in the case of disabled people - also for their guardians. Applications for the second program will be accepted until December 18, 2019. The first trips will be available from the beginning of September 2020. More: <https://nawa.gov.pl/naukowcy/program-im-iwanowska>

Nicolaus Copernicus University to implement the project „Open UMK - Open Source, Open Science“

2019-10-10

The National Agency for Academic Exchange has granted the University of Nicolaus Copernicus in Toruń funds for the implementation of the project „Open UMK - Open Source, Open Science“. Open Science means any download, processing and distribution of scientific content using the largest possible number of media. It is the answer to so-called «Replication crisis», according to which most of the results of scientific publications in the field of natural sciences is impossible to reproduce by independent researchers, as well as by the authors themselves. This problem concerns primarily natural sciences, where an important aspect of scientific work is documenting methodology and collecting partial data. The project aims to strengthen cooperation with renowned research centers. Open Access publications will be financially supported in high-ranking journals from the ministerial list.

University of Lodz to launch Intelligent Technology Mixer Center

2019-10-11

The new Intelligent Technology Mixer Center (CMIT), launched by the Faculty of Management at the University of Lodz will deal with Artificial Intelligence (AI), Internet of Things (IoT), blockchain, augmented (AR) and virtual reality (VR). The originator and head of the Center is Dr Dominika Kaczorowska-Spychalska, one of the university's experts in the field of digital technologies. The University of Łódź Promotion Office emphasizes that the Center will deal with research and analysis on the dynamics of technologies such as AI, IoT or AR and the possibilities of their use. It will be also promoting the idea of digital transformation and related smart technologies by overcoming stereotypes associated with them, in line with the main assumptions of the EU Digital Single Market strategy and national strategies for the implementation of these technologies.

Medical University of Warsaw launches the University Dentistry Center

2019-10-11

On Wednesday, October 9, the opening ceremony of the University Dentistry Center of the Medical University of Warsaw (WUM) took place at the university's campus in Warsaw. This is the largest and most modern dental center in Poland. - We are officially starting a new era in dentistry at the Medical University of Warsaw. The University Center of Dentistry starts working, since the beginning of October we have been educating students here, we will treat patients. And the Medical University of Warsaw will continue to develop dentistry for another two centuries, because this magnificent building the Faculty of Medicine and Dentistry has excellent operating conditions - emphasized the rector of the Medical University of Warsaw Prof. Mirosław Wielgoś. The University Center of Dentistry is to educate medical staff, develop scientific research and treat patients. It is a seven-storey building with a usable area of nearly 8 thousand m². The center provides

high quality teaching and creates completely new conditions for conducting scientific research at the highest level.

Outstanding scientist and inventor returns from the USA to the Gdańsk University of Technology

2019-10-11

Dr Eng. Mark Maryański, a graduate of the faculty of technical physics and applied mathematics at the Gdańsk University of Technology, a former lecturer at Yale University and an associate professor of radiation oncology at the Columbia University Medical Center in New York will return to Gdańsk University as part of the Polish Returns program. Dr Eng. Maryański is an inventor of three-dimensional dosimetry of ionizing radiation based on laser gel phantom tomography, in which radiation-induced polymerization leads to the formation of thermally reversible three-dimensional images that measure the dose of radiation. It is one of the most modern and innovative methods of diagnosing severe diseases, extremely useful in modern medicine. The purpose of the Polish Returns Program is to enable outstanding Polish scientists to return to the country and take up employment in Polish universities, scientific institutes or research institutes. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGNcmoQv7K0/content/znakomity-naukowiec-i-wynalazca-wraca-z-usa-na-pg

University of Gdańsk receives over 320 thousand PLN for the project University of Gdańsk-International Friendly

2019-10-11

The University of Gdańsk will implement the project „University of Gdańsk - International Friendly”. Over 320 thousand PLN as part of the „Welcome to Poland” competition will be allocated for this purpose by the National Agency for Academic Exchange. The assumption of the project is to take integrated actions to support the institutional capacity of the University of Gdańsk in the process of

its internationalization and to prepare the academic community and the university's infrastructure to accept and service students, foreign staff as well as international partners. The benefits of implementing the project include increasing the potential of the university as a center adapted to taking on the international environment, both in terms of preparing the academic community and everyday functioning. The functioning of the university as an attractive academic center will affect the positive perception of Pomerania and the whole country and the increase of Poland's attractiveness on the investment map of the world. More: https://ug.edu.pl/media/aktualnosci/90995/w_listopadzie_rusza_projekt_university_gdansk_-_international_friendl

Applications process for the program of bilateral exchange of scientists with China has started

2019-10-14

The National Agency for Academic Exchange (NAWA) invites scholars and students to submit applications in the recruitment process for bilateral exchange of scientists with the People's Republic of China. The main purpose of the program is to support the mobility of scientists in the implementation of research projects, agreed and conducted jointly by partners from Poland and China. Joint research projects can concern the following thematic areas: Natural sciences, Engineering and technology, Medical and health sciences, Agricultural sciences. Funding can only be used to cover the costs of a personal exchange. The sending party should finance the journey of its researcher, while the receiving party covers the costs of staying of the researcher from a partner country. The maximum amount of project financed from the NAWA budget is PLN 35,000. The call for proposals will last until December 3, 2019. University of Opole receives specialist ambulance simulator

2019-10-14

The simulator of a specialist ambulance with full medical equipment was purchased by the Faculty of Medicine of the University of Opole. It is part of the equipment of the university's Multi-Profile Medical Simulation Center. Medical simulation has become the standard of teaching at medical universities. Teaching with this method is a modern educational process using medical educational equipment, ranging from simple trainers for learning individual medical procedures to advanced phantoms and patient simulators, faithfully reflecting man and their parameters. In addition to the ambulance, the Center currently provides a room ALS (Advanced Life Support) and BLS (Basic Life Support), a Laboratory of Science of Technical, Surgical and Nursing Skills - serving as low fidelity rooms and a Clinical and Nursing Room as a high fidelity room. Students of Wrocław University of Science and Technology to receive almost 1.5 million PLN for their projects

2019-10-14

Nine projects prepared by students of the Wrocław University of Technology received funding under the „The best of the best! 4.0. „ They will receive about PLN 1.5 million for the implementation of their plans, tests and trips. The largest funding was granted to students from the PWr Solar Boat Team who are working on a single-person boat equipped with photovoltaic panels and hydro-wings. Thanks to the grant, they will take part in international solar boat competitions in the United States and the Netherlands. Further co-financed projects include trips of the members of the Academic Aviation Club to a series of world competitions of unmanned and autonomous aircraft, presentation of innovative constructions of the KoNaR Robotics Scientific Club

at international competitions, conferences and fairs, as well as raising the level of competence of the PWr In Space Scientific Club members by participating in international Spaceport America competitions Cup 2020. Researcher of the Medical University of Wrocław joins the Prof. Franciszek Walczak program

2019-10-14

Dr Stanisław Tubek of the Medical University of Wrocław became a participant in the Prof. Franciszek Walczak program, run by the National Agency for Academic Exchange. The scientist will start cooperation with Ohio State University. Prof. Walczak's Program is an initiative of the National Agency for Academic Exchange and the Ministry of Health addressed to scientists in the field of cardiology, oncology, allergology or infectious diseases. The program provides trips lasting from 3 to 6 months to the best medical centers located in the United States of America. As part of three competitions, the Agency is planning to provide scholarships for at least 100 Polish doctors and scientists. 17 winners were selected in the first competition, most of them are scholars of Medical University of Lodz and the Medical University of Warsaw. The Medical University of Wrocław has one representative in this group - Dr Stanisław Tubek from the Department of Heart Diseases at the Faculty of Health Sciences.

Lodz University of Technology to create the 5G Competence Center

2019-10-15

Łódź Voivodeship will grant Łódź University of Technology 750 thousand PLN for the establishment of the 5G Competence Center and for the creation of the 5G Information and Communication Portal. Signing the contract, the rector of the Łódź university, Prof. Sławomir Wiak, emphasized that the Łódź region has a huge number of specialists, gath-

ered within the ICT Cluster. Also preparatory works for creating the Competence Center and Knowledge Portal are already very advanced. The university informs that experts have already been selected, including authorities from abroad and representatives of companies, as well as a space has been designated for building the IT infrastructure. Lodz University of Technology has committed to contribute 250,000 PLN for this purpose from university funds.

University of Humanities and Sciences in Częstochowa joins the project „Intranet: corporate entrepreneurship - a network of strategy strategies”

2019-10-15

University of Humanities and Natural Sciences in Częstochowa is a partner of the project „Intranet: corporate entrepreneurship - a network of strategy strategies” under the Erasmus + Action 2: Strategic Partnerships program. Cooperation for innovation and good practices”. The project is related to globalization and frequent changes in living and working environments in contemporary network societies. The results will support the construction of effective and dynamic teams and cooperation groups. The goal is to promote social competences in the field of corporate entrepreneurship by connecting the potential of people, business organizations and educational institutions. The goals will be achieved through innovative online training. Project results can be used in organizations for the training and development of employees' social competences. The coordinator of the activities is the Spanish technology and educational consortium CIDET.

Rzeszów universities signed a cooperation agreement with the Local Government of the Podkarpackie Voivodeship

2019-10-15

The Podkarpackie Voivodeship self-government has signed a cooperation agreement with the Rzeszów University of Technology and the University of Information Technology and Management in Rzeszów for implementing ICT systems and e-services. The purpose of the agreement is to make full use of the possibilities and experience of both parties that will allow for optimal cooperation of science and public administration centers in the implementation of ICT systems. The self-government of the Podkarpackie Voivodeship will cooperate with universities in the implementation of several large ICT projects including the Podkarpackie Spatial Information System, the Podkarpackie Medical Information System - phase II and the Podkarpackie Public e-Administration System-2. The goal of these projects is higher quality and extended range of public services provided electronically.

Gdańsk University of Technology to launch trainings expanding intercultural and language competences

2019-10-15

Over 120,000 PLN funding from the „Welcome to Poland” program of the National Academic Exchange Agency was acquired by the Gdańsk University of Technology. This money will allow to provide the special trainings raising intercultural and language for the administrative staff. The university will implement the project „Deepening the internationalization process at the Gdańsk University of Technology through competence training for administrative staff and implementation of organizational improvements”. The project involves the creation of an original language coaching program for employees who will be accompanied by language teachers in their daily work. Language training is provided for

dean’s office employees, reception staff at student houses and faculties. Special conversation cards will be created for them to facilitate communication with students and foreign employees. The implementation of the project will start this year and will last until the end of March 2021.

Surgeon of the Medical University of Gdansk joins the Prof. Franciszek Walczak’s Program

2019-10-16

Dr Jarosław Kobiela, assistant professor at the Department of General, Endocrinological and Transplant Surgery of the Medical University of Gdańsk became a laureate of the Prof. Franciszek Walczak’s Program. The scientist will do an internship at the American Memorial Sloan Kettering Cancer Center. The Program is a joint initiative of the National Agency for Academic Exchange and the Ministry of Health. The program enables trips to the best medical centers in the United States of America. It is an opportunity for professional and scientific development as well as a chance to gain valuable experience in an international scientific environment, but also to contribute to the improvement of medical care in Poland. Professor Franciszek Walczak is considered a senior of Polish electrophysiology. He is the author and co-author of over 200 publications in Poland and abroad and co-author of many monographs. During his career he cooperated with scientific staff around the world.

Warsaw University of Technology to launch Aerial Research Center

2019-10-16

The Warsaw University of Technology is launching Aviation Research Center near Przasnysz. The university obtained PLN 33 million from EU funds for this project. The project tender has already been completed for the construction of a two-storey laboratory of drones, composites and gluing workshops, CNC machine tools and 3D printing machines. It will also house a research and data processing center

for measuring flights, a drone monitoring system, aircraft and propulsion laboratories, a measurement and computer-computing laboratory, as well as hangars for work on unmanned systems. The start of construction works is planned for this year. The investment is expected to be completed by the end of 2020.

Gdańsk University of Technology receives almost 100,000 PLN to increase cultural diversity among foreign students

2019-10-16

Gdańsk University of Technology has received almost 100,000 PLN for the implementation of the project „Increasing cultural diversity among foreign students of the Gdańsk University of Technology” („Make a #GUTchoice”). As part of the project, the Ambassadors Program will be launched for both foreign students studying at the University and Polish students going abroad under the Erasmus + program. Co-financing will be allocated by the «Foreign Promotion» program of the National Academic Exchange Agency. Students will participate in a series of promotional spots and a professional photo session will also be carried out to provide the promotional campaign in social media and on popular educational platforms. The project will be launched this year and will be implemented until the end of July 2020.

Poznań University of Economics joins the Alliance of Academic Technology Transfer Centers

2019-10-16

Poznań University of Economics has joined the Agreement of Academic Technology Transfer Centers (PACTT) - a nationwide association of representatives of university units responsible for the management and commercialization of intellectual property. The goal of PACTT is exchange of knowledge, experience, operating standards and good practices, development of professional competences of employees of technology transfer centers, cooperation in the commercialization of scientific research results and joint representation of the interests and goals of members before public administration bodies, employers' associations and other entities acting for innovation and science cooperation with business. Universities and research units represented in PACTT can offer access to over 65,000 scientists in Poland and over 14 thousand patents and patent applications through technology transfer centers.

President of Poland participates in inauguration of the academic year at the Cardinal Stefan Wyszyński University

2019-10-16

- This University has always corresponded to the values I felt attached and I was brought up - said President of Poland Andrzej Duda during the inauguration of the academic year at the Cardinal Stefan Wyszyński University (UKSW) in Warsaw. This year's celebrations were of an exceptional nature due to the 20th anniversary of the establishment of the Cardinal Stefan Wyszyński University, founded on the basis of the Academy of Catholic Theology, founded 65 years ago. The inauguration of the academic year was attended by President of Poland, Minister of Health Łukasz Szumowski, parliamentarians, a diplomatic corps headed by the apostolic nuncio Archbishop Salvatore Pennacchio, represent-

atives of the Polish Bishops' Conference with the Great Chancellor of the Cardinal Stefan Wyszyński University- Cardinal Kazimierz Nycz, authorities of Warsaw universities, representatives of local authorities, institutions of science and culture.

Polish universities assessed high in Regional Rankings Emerging Europe and Central Asia

2019-10-17

Two Polish universities were included in the top 10 higher education schools in the Regional Rankings EECA 2020, which includes universities from Eastern Europe, Central Europe and Central Asia. The Jagiellonian University in Kraków was classified in sixth place, and the University of Warsaw in seventh. The next Polish universities in the ranking are Warsaw University of Technology (14th place), Wrocław University of Science and Technology (43), AGH University of Science and Technology in Kraków (52), University of Wrocław (57) and Adam Mickiewicz University in Poznań (60). Regional Rankings Emerging Europe and Central Asia has been published since 2014 as part of QS World University Rankings. The list includes indicators such as: academic staff assessment, employer reputation, employee-student ratio, internationalization, publications and citations, and, for the first time since this year, participation in international research networks. The ranking was once again won by the oldest Russian university, the Moscow State University Lomonosov.

Student of the Nicolaus Copernicus University in Toruń becomes a laureate of the L'Oréal Polska program

2019-10-17

Beata Zjawin, a student of physics at the faculty of physics, astronomy and computer science at the Nicolaus Copernicus University in Toruń (Nicolaus Copernicus University) became one of the winners of the 19th L'Oréal Polska program „For women and science”. The young researcher received an annual

scholarship of 20,000. PLN as the only student in the MA category (the remaining five scholarships were awarded in the doctoral and postdoctoral categories). She is a laureate of the scholarship of the Ministry of Education for the Best Students in Poland, scholarship of the Mayor of Toruń for the Best Students of the Nicolaus Copernicus University, scholarship for the Best Students of the Nicolaus Copernicus University, as well as the prestigious international scholarship SPIE Optics and Photonics Education Scholarship. This year, a record number of 144 candidates from 39 scientific institutions applied for L'Oreal scholarships. The winners were selected on the basis of an assessment of their scientific achievements, experience and the possible practical use of their research.

Medical University of Białystok to cooperate with the university in Texas

2019-10-18

Medical University of Białystok (UMB) has signed a cooperation agreement with Texas Tech University Health Sciences Center El Paso in the USA. The agreement mainly concerns the promotion of staff and student exchange, support for cooperation in teaching, research and development, and support for the exchange of academic materials and publications. The agreement also creates opportunities for cultural and intellectual enrichment of the staff and students of both institutions and joint educational programs. The contract will be valid for 3 years. After verification, the agreement may be extended for another 3 years within the written consent of both parties.

Silesian University of Technology to hold a conference „Silesian science without borders” with the participation of experts of the European Commission

2019-10-18

The Regional Contact Point, Silesian University of Technology are inviting participants to the „Silesian science without borders” conference on October 21-22. Experts from the European Commission and the Ministry of Science and Higher Education, as well as implementers of international projects, confirmed their participation in the event. The conference, which will be held in Hall D of the Education and Congress Center aims to provide participants with a wide range of research funding options in national and international programs, new rules for parametric assessment of units, the best path to build their own scientific careers and the assumptions of funding institutions for the next 2021-2027 budget perspective. The event will be an opportunity for scientists from Silesia and the Opole region to learn about new possibilities of obtaining funds from various sources, including: European programs and international programs financed by national institutions.

Wroclaw University of Science and Technology ranked high in the international ranking

2019-10-18

Wroclaw University of Science and Technology was ranked 43rd of 354 universities from Eastern, Central Europe and Central Asia in the ranking of Regional Rankings Emerging Europe and Central Asia 2020. In the ranking of Polish universities, the University of Science and Technology is placed in 4th position. The Wroclaw university has advanced one position, compared to last year, and 14 positions, compared to the first ranking in 2014. This year, Wroclaw University of Science and Technology got the best assessments in the following categories: participation in international research networks

(43 position), scientific publication (46), reputation among employers (48) and evaluation of academic staff (49). The full list can be found here: <https://www.topuniversities.com/university-rankings/eeca-rankings/2020>

Flying University of Roads

2019-10-21

The Flying University of Roads (LUD) is an informal organization created in 2018 by researchers from the Lublin University of Technology and the Białystok University of Technology, aimed at exchanging and transferring scientific and practical experience in the field of road construction. LUD is mainly focused on educational and research activities. From October 17, 2019, 30 students from the «Drogowiec» Scientific Club of the Białystok University of Technology and the Road and Science Association of the Lublin University of Technology have been participated in workshops of the Faculty of Civil Engineering and Architecture of the Lublin University of Technology. During the course, students will learn the latest methods of testing asphalt and asphalt mixtures, technical and operational parameters of road surfaces, analyze vehicle traffic and road noise, road costs as well as deepen their knowledge about trends in calming traffic. - In the specialists' environment, there has not yet been an idea on how to interest young people in this field. We hope that the Flying University of Roads will change that - said Dr Eng. Marta Wasilewska, originator and co-organizer of the University, employee of the Faculty of Civil and Environmental Engineering of the Białystok University of Technology.

University of Silesia in Katowice to cooperate with the Polish Pellet Council

2019-10-21

The University of Silesia in Katowice will cooperate with the Polish Pellet Council. The agreement provides for the implementation of joint projects, organization and promotion of events directed to the academic community, as well as promoting entrepreneurship and supporting student projects. As part of the agreement, the organization of appren-

ticeships and internships for students and graduates is foreseen, the association will also support consulting training programs and subjects of diploma theses arising at the university. The cooperation will also enable the involvement of qualified association staff in conducting classes with students. The Polish Pellet Council is an association of companies dealing in the production, trade and distribution of wood pellets, manufacturers of heating equipment and fireplace stoves, producers of pelletizing technology and other business entities, institutions and organizations actively operating in this industry and engaged in its development.

President of Poland participates in the inauguration of the academic year at the AGH University of Science and Technology

2019-10-22

The Krakow AGH University of Science and Technology has been supporting the Polish state for a hundred years - said President Andrzej Duda during Saturday's main celebrations of the university's jubilee. He emphasized that the requirements for students are very high and only the best pupils have a chance to get to the university. The President of Poland participated in the ceremony inaugurating the 101st year of AGS's activity. Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education also participated in the event. - I want to thank on behalf of the sovereign, independent and free Republic of Poland for the extraordinary effort of scientific works, research and educating many generations of young Polish engineers who brought and bring us pride working at universities and companies around the world - said the president. He added that each of the AGH UST graduates is perfectly prepared to practice their profession. He noted that university graduates are the best paid engineers and managers in Poland.

Bialystok University of Technology and University of Bialystok exploring the possibilities of merging universities

2019-10-22

Both universities are planning to make a special report by March 2020, which will examine the possibilities of merging the Bialystok University of Technology and the University of Bialystok. On the basis of the report, universities will be able to make a possible decision on whether and in what form to merge. Over 900,000 PLN will be allocated to prepare a detailed analysis of the effects and benefits of a possible merger of two universities. The funds were obtained by the Bialystok University of Technology and the University of Bialystok as part of the project of the Ministry of Science and Higher Education «Supporting university consolidation processes». -We should consider the topic thoughtfully, seriously, but without prejudice. Interdisciplinarity is the future of science and those who will be prepared for it will win - said the rector of the Bialystok University of Technology, Prof. Lech Dzieńis.

University of Zielona Góra receives almost PLN 10 million for modern teaching and cooperation with entrepreneurs

2019-10-22

The University of Zielona Góra obtained almost PLN 10 million for the project „Modern teaching and practical cooperation with entrepreneurs - development program of the University of Zielona Góra”. Co-financing comes from the operational program Knowledge Education Development. The aim of the project is to improve the competences of students of the University of Zielona Góra, meeting the needs of the economy, labor market and society as well as support organizational changes and increase the competence of university teaching staff through the implementation of a comprehensive support program. Thanks to the implementation of the project,

over 600 students will gain professional, IT, analytical and communication competences, and almost 200 teaching staff will develop teaching competences, including the use of professional databases and their use in the education process, as well as presentation and communication skills.

Scientists from the Koszalin University of Technology to teach mathematics to future engineers

2019-10-23

Researchers from the Koszalin University of Technology, together with their colleagues from five European universities, are implementing the project „EngiMath - Mathematics on-line learning model in Engineering education”. Its goal is to develop and implement an innovative mathematics teaching model among engineering students. The main idea of the project is to use cooperation between higher education institutions to improve students' involvement in learning mathematics, to remove gaps in mathematical knowledge and to develop an online model for teaching mathematics at technical universities. Mathematicians from the universities of Poland, Estonia, Ireland, Portugal, Spain and Romania are working on designing a mathematics course model for first-year students. They use information technologies and means of communication to increase the student's involvement in the learning process. The project is financed by the European Union under the Erasmus + Partnership program.

Professor Pierre Joliot receives an honorary doctorate of the Maria Curie-Skłodowska University in Lublin

2019-10-24

On October 24, 2019, the world-famous biochemist and grandson of the Maria Curie-Skłodowska - Prof. Pierre Joliot will receive an honorary doctorate from the Maria Curie-Skłodowska Lublin University. Professor Pierre Joliot is an honorary professor of Col-

lege de France, a member of the French Academy of Sciences and an international authority in the field of photosynthesis - a key process conditioning life in the biosphere. He made a significant contribution to the development of biology, biophysics and biochemistry. He is also the author of 157 scientific papers and a member of many leading scientific organizations: American Society of Plant Biologist, National Society of Sciences (USA), Academia Europaea and Académie Européenne Des Sciences, Des Arts Et Des Lettres. His interest in science results from the family traditions of two generations of Nobel laureates - grandmother Maria Curie-Skłodowska and parents - Irena and Fryderyk Joliot-Curie.

Koszalin University of Technology receives money for the purchase of equipment for innovative research

2019-10-24

Koszalin University of Technology has obtained a grant for the purchase of equipment for conducting scientific research regarding the assessment of the technical condition of buildings. The subsidy of 532 thousand PLN is allocated by the Ministry of Science and Higher Education. The money will be used to purchase specialized measuring equipment used in construction and geodesy. The set includes: a ground-based laser scanner with a thermal camera, a set of shields and a tablet for mobile cooperation with the scanner. The apparatus can be used to conduct scientific research in laboratory and field conditions. The technique of terrestrial laser scanning is based on remote measurement of the object and creating, based on the data obtained in this way, a detailed image of it. This allows specialists to assess the technical condition of various buildings: detect defects, cracks and other defects. On the basis of a detailed analysis of surface changes, it is also possible to evaluate the progressing changes in the structure of objects. More: <http://www.tu.koszalin.pl/art/1958>

Jagiellonian University holds conference on Polish-Brazilian scientific cooperation

2019-10-25

The Jagiellonian University (UJ) in Krakow held the international conference „Brazil-Kraków. A Bridge to South America” devoted to the development of scientific and academic cooperation between Brazil and Polish universities. The event was attended by the Brazilian ambassador to Poland Hadil Fontes da Rocha Vianna. Plenipotentiary of the Rector of the Jagiellonian University for internationalization Prof. Adam Jelonek emphasized that Brazil is one of Poland's most important foreign partners in Latin America. He noted that the excellent basis for Polish-Brazilian cooperation is created by the fact that there is a very large (about two-million) community of people of Polish origin in this country. The hundredth anniversary of the establishment of diplomatic relations between Poland and Brazil next year is an opportunity to strengthen mutual partnership. Professor Jelonek expressed the hope that the meeting at the Jagiellonian University will significantly contribute to achieving this goal, especially in the field of scientific research and higher education.

Students of the Poznań University of Economics to receive Awards for master's theses

2019-10-25

Four MA theses written in the Department of Insurance at the Poznań University of Economics were awarded in the third Competition of the Financial Ombudsman. The first place was taken by Magdalena Chmielewska for the work «Activities of legislation and market protection institutions on changes in liquidation fees in life insurance with an insurance capital fund», the second award was received by Anna Chojan for the work „Analysis of the impact of economic assumptions on the value of life insurance company valuation using methodology Embedded Value. „ The third award was shared between two works: „Insurance contract as a method of managing cyber risk” by Mateusz Manuszak and

„Change in the definition of an insurance accident in trade credit insurance in the light of restructuring and bankruptcy law and the consequences for the insurer” by Kamila Nowicka.

Scientists from the Adam Mickiewicz University in Poznan to search E-sport

2019-10-28

The Laboratory of Psychophysiology of Health at the Adam Mickiewicz University in Poznań, started innovative research on e-sport- the fastest growing branch of sport competition. The research involved e.g. players of Counter-Strike: Global Offensive and FIFA game series. Researchers have introduced an extensive methodology for psychophysiological laboratory experiments to research on e- sports. In addition to the results of the game, they analyse physiological signals (frequency and variability of heart contractions), mimic expression or motor activity of the body. Research on e-sportspeople can show mechanisms that drive human behavior, such as the impact of emotions on performance. The situation of playing video games creates great controllable conditions for testing many general psychological issues. Research should answer how to use games, e.g. to shape effective methods of regulating emotions. More: <https://amu.edu.pl/consciousosci/aktualnosci/studentci/e-sport-pod-lupa-naukowcow>

University of Gdańsk to receive almost PLN 19 million for a consortium project

2019-10-28

The project „Integration and mobilization of data on biotic diversity Eukaryota in the resources of Polish scientific institutions (IMBIO)” implemented within the consortium participated by the University of Gdańsk has received funding from the Digital Poland Operational Program. The aim of the project is to open access to scientific data on the biological diversity of nuclear organisms (Eukaryota), in the resources of Polish scientific institutions. It will be implemented by digitizing and sharing data that are still unavailable in digital form or in the Internet.

Co-financing of almost PLN 19 million will enable to create an IT system to integrate and share data from nature collections and data on species findings from other information sources that have not been digitally available so far. Access to data on the distribution of species in Poland and data from the most scientifically valuable Polish flora and fauna collections from around the world will be opened and free.

Warsaw University of Technology to hold the conference „Transformation of academic higher education in Poland in the period of 30 years: 1989-2019”

2019-10-29

On October 28-29, 2019, Warsaw University of Technology (PW) is hosting the scientific conference „Transformation of academic higher education in Poland in the period of 30 years: 1989-2019”, organized by the Conference of Rectors of Polish Academic Schools, in cooperation with PW and with support of the Polish Rectors Foundation. The aim of the conference is to review and assess the achievements of the transformation process in higher education in Poland during the transformation of 1989-2019 on the basis of political and administrative sciences (public policy sciences) and management and quality sciences (management sciences) from a systemic and institutional perspective. The conference participants will provide the analysis of the activities of governments and universities for reforms in higher education during the system transformation in order to use its results in the work on the government's document on the state's scientific policy.

Jan Kochanowski University in Kielce to launch Monoprofiled Center for Medical Simulation

2019-10-29

Faculty of Medicine and Health Sciences of the Jan Kochanowski University (UJK) in Kielce will be transformed into Collegium Medicum UJK from November 1 and will open the Monoprofiled Center for Medical Simulation for nurses and midwives. The center will be established as part of the SIMED project and cost PLN 4.2 million, of which 3.54 million is co-financed by the European Union. The laboratory, equipped with the latest phantoms will be used to train nurses and midwives. The university authorities emphasize, that since 2005 PLN 120 million has been invested in the medical department. The new laboratories are equipped with the high- tech and world-class solutions.

Gdańsk scientist receives the Fulbright international scholarship

2019-10-29

Dr Robert Czajkowski from the Intercollegiate Faculty of Biotechnology of the University of Gdańsk and the Medical University of Gdańsk received the Fulbright STEM Impact Award 2019. The Gdańsk scientist will implement the project at Colorado State University together with Prof. Amy Charkowsky. 22 applicants took part in the competition. The competition procedure including substantive assessment of the application provided by 3 independent experts and an interview with applicants who received the highest marks resulted in granting 5 scholarship awards. The Fulbright STEM Impact Award is a new scholarship program of the Polish-American Fulbright Commission. The program is addressed to researchers representing the fields of STEM (Science, Technology, Engineering, Mathematics). The offer is directed to people who manage research projects and supervise the work of other researchers.

University of Warmia and Mazury to educate nurses in Elk next year

2019-10-30

From the academic year 2020/21 the branch of the Olsztyn University of Warmia and Mazury (UWM) in Elk will start nursing education. The agreement was signed by Prof. Ryszard Górecki, rector of UWM and Tomasz Andrukiewicz, mayor of Elk. UWM is committed to launching the faculty of nursing at full-time and part-time studies at bachelor level providing it with appropriate teaching staff. The City of Elk will finance the equipment of nursing skills labs, fund the Mayor's scholarships to the best students, provide free access to the Municipal Hospital base for students and to help UWM obtain properly qualified staff. The agreement was concluded for an indefinite period and its initiator is the UWM rector.

Professor Molinari receives an honorary doctorate from the Krakow University of Technology

2019-10-30

Professor Alberto Molinari from the University of Trento received an honorary doctorate from the Krakow University of Technology (PK). The Italian scientist is one of the most outstanding and most active researchers in the world in the field of powder metallurgy. The 35-year research activity of Prof. Molinari resulted in over 500 publications in international and national scientific journals and conference materials. He made a huge contribution to the development of world materials science, especially to the development of low-alloy sintered construction materials and the development of methodologies for optimization of key technological processes in the powder metallurgy industry - emphasized in the laudation the rector of PK Prof. Jan Kazior.

Nicolaus Copernicus University in Toruń to implement the project under the Dialog program

2019-10-30

The Nicolaus Copernicus University in Toruń will implement the project „Invisible, absent, necessary. University administration for scientific excellence”. The Ministry of Science and Higher Education allocated over 670,000 PLN under the „Dialog” program. The project is implemented by a consortium with the Warsaw School of Economics and the University of Social Sciences and Humanities in Warsaw, which consists of a research to provide knowledge of the roles of administrative staff and their work organization and training systems. It will allow the acquired knowledge to be used in practice for improvement employees and work organization systems at various levels of administration. The assumption of the project is the belief that science is always a collective undertaking, and scientific excellence requires constant cooperation of scientific and administrative employees as well as efficient cooperation of employees from various levels of administration. More: <https://www.umk.pl/wiadomosci/?id=26377>

Major of the Warsaw School of Economics among the top 10 in the world

2019-11-04

The Financial Times published the latest ranking of Master's programs in Global Master in Management. Two management faculties offered by the Warsaw School of Economics (SGH) were assessed as 8th and 58th best majors in the world according to the newspaper. CEMS Master in International Management, co-organized by SGH (the only Polish economic university belonging to the CEMS association) was promoted to 8th place. The second management direction led by SGH was 58th in the ranking. The rankings of the Financial Times assess primarily the success of graduates on the labor market. Being ranked twice in the hundred of the best majors confirms the high quality of education at the Warsaw School of Economics and our reputation - commented on the results of the SGH Rector, Prof. Marek Rocki.

Results of „Warsaw diploma theses” competition

2019-11-04

Mayor of Warsaw awarded authors of MA and PhD theses submitted and accepted at Warsaw universities in 2018. Within the «Warsaw diploma theses» competition, the main prize in the category of PhD theses was awarded to Dr Eng. Ewa Jarecka-Bidzińska, a graduate of the Faculty of Architecture at the Warsaw University of Technology (PW), a researcher at the Faculty of Geodesy and Cartography of the Warsaw University of Technology, for the work «Praga-Północ in Warsaw as an art district», written under the supervision of Prof. Eng. Krystyna Guranowska-Gruszecka. In the category of Master's theses, the main prize was awarded to Maciej Polakowski, a graduate of the Faculty of Architecture of the Warsaw University of Technology, for the work «Urban agriculture in the spatial structure on the example of Warsaw», written under the supervision of Dr Eng. Krystyna Solarek.

10 Polish universities selected to become research universities

2019-11-04

The first competition within the „Initiative of Excellence - Research College” program has been completed. The aim of the competition was to select and support universities that will strive to achieve the status of a research university, and will be able to successfully compete with the best academic centers in Europe and in the world. The international team of experts has selected 10 of the 20 best universities in Poland, which in the years 2020–2026 will receive a subsidy increased by 10%. Other colleges that took part in the competition but were not in the top 10 will also receive financial support - a 2% increase in subsidies. Universities that are to become research universities are: University of Warsaw, Gdańsk University of Technology, University of Adam Mickiewicz University in Poznań, AGH University of Science and Technology in Kraków, Jagiellonian University, Warsaw University of Technology, Medical University of Gdansk, Silesian University of Technology, Nicolaus Copernicus University in Toruń and University of Wrocław.

Nokia becomes a partner of the Medical University in Wrocław

2019-11-05

The Medical University of Wrocław will cooperate with Nokia. The signed agreement regulates the issues of cooperation in the field of teaching and research and development activities. - Our university is open to cooperation with large partners, so we are very happy to cooperate with Nokia. I hope it will be a reason for cross-talk between students with interesting ideas and IT specialists with the knowledge necessary to implement them. It is an investment in young people, which is extremely important to me - said rector of the university, Prof. Piotr Ponikowski. The basis for concluding the contract was the earlier, fruitful cooperation of Nokia and the Medical University at Cardiology Innovations Hackathon. The event, taking place as part of Cardiology

Innovations Days, takes the form of a competition in which interdisciplinary teams compete in creating modern solutions for the care of people with heart failure. More: <https://www.umed.wroc.pl/content/nokia-partnerem-uni.000>

University of Heidelberg holds a meeting of API project partners with the University of Warsaw

2019-11-05

From 30 to 31 October University of Heidelberg held a meeting of partners of the project „Academic Partnership for Innovation in Teaching and Learning” (API), which includes four universities from the 4EU + Alliance with University of Warsaw (UW). The main purpose of the two-day meeting was to prepare the implementation of short modular programs to be held at all four partner universities in the 2019/2020 academic year. It is an innovative form of short exchange programs using effective teaching and learning methods. The «Academic Partnership for Innovation in Teaching and Learning» (API) project is implemented as part of the «Academic International Partnerships» program of the National Agency for Academic Exchange (NAWA). The team consists of four universities of the 4EU + Alliance: the University of Warsaw (coordinating institution), the University of Heidelberg, the Charles University in Prague and the University of Sorbonne. The work is coordinated by the International Cooperation Office in cooperation with the University of Warsaw Digital Competence Center.

High School of the Lodz University of Technology launches first „Newton Room” in Poland

2019-11-05

The Public High School of Lodz University of Technology is launching an innovative „Pop-up Newton Room” created by the Norwegian non-profit foundation - FIRST Scandinavia. The «Newton Room» concept was developed by a Norwegian foundation in cooperation with teachers, academic institutions and company representatives. Tomasz Kozera, director of the high school of the Lodz University of Technology emphasizes, that this is a modern, well- equipped classroom adapted to the aviation classes with airplane flight simulators, established in cooperation with Boeing. For three weeks, from November 5 to 24, studio classes are planned for pupils of primary and secondary schools in Łódź, conducted by a specially trained teacher in Polish. The students’ task will be to carry out an air rescue mission. They will work in groups, make calculations and measurements to plan a practical reconnaissance flight using stationary flight simulators.

Applications can be submitted for the Iwanowska’s Competition

2019-11-05

Doctoral students of Polish universities may submit applications for scholarships under the Iwanowska’s Competition. The program allows trips to the best scientific centers in the world. Under the program, doctoral students can take part of their PhD studies in foreign centers. The stay may last from 3 to even 12 months, and the amount of the scholarship is limited up to 120 thousand PLN. The program provides additional co-financing in the case if the spouse or children accompany scholars as well as guardians in the case of disabled persons. Scholarship holders will be able to undergo part of the education related to their PhD theses, conduct scientific research related to its preparation, obtain materials for their PhD theses or scientific publication, participate in the «Implementation doctorate» program and conduct

teaching classes or other forms of scientific or academic activity in the host centers, if they are related to the preparation of their PhD theses.

University of Silesia receives financing under the „Dialogue” program

2019-11-05

The University of Silesia in Katowice received over PLN 1.5 million in funding for the project „Interdisciplinary Center for the Development of Human Resources - a think tank for the development of key competences of future human resources for Polish science”. Money was granted by the Minister of Science and Higher Education as part of the „Dialogue” competition. The main goal of the undertaking is to support the processes of managing the development of human resources in the higher education sector in Poland by creating and disseminating an integrated concept for the development of key competences of the research and administrative support staff. The activities of the Interdisciplinary Personnel Development Center of the University of Silesia in Katowice will strengthen the research potential of the higher education sector. The project's task will also be to improve the effectiveness of cross-sectoral cooperation between science and the business environment and to develop tools that will ultimately enable monitoring of the level of key competences for the higher education sector in Poland.

MBA studies entirely via the Internet

2019-11-06

Collegium Civitas in Warsaw introduces to its offer MBA postgraduate studies (Master of Business Administration) in English implemented entirely via the online e-learning platform. The key advantage of studies - argues Collegium Civitas - is the fact that 100% of classes take place online, which allows flexible adaptation of studies to the student's calendar. This is particularly important for the target group of MBA studies, which are employees of lower and middle management in the area of finance, marketing and sales in enterprises, NPO and NGO

organizations, and people who care about career development in this field. The flexible formula also encourages you to study. You can join the program at any time, and the entire study lasts only 14 months. The price of the course in English is 7900 euros. Jan Długosz University of Humanities and Natural Sciences in Częstochowa for Polish volleyball

2019-11-06

Faculty of Law and Economics at the University of Humanities and Natural Sciences Jan Długosz in Częstochowa began cooperation with the Polish Volleyball Federation (PZPS). The letter of intent in this matter was signed by the president of the board of PZPS Jacek Kasprzyk and the university rector Prof. Anna Wypych-Gawrońska. The purpose of cooperation is to identify legal issues that raise doubts that Polish volleyball faces and to conduct scientific research in this field by the University. The results of the research, which will result in indicating specific legal solutions, can be used by the PZPS in their operations. - It is a significant achievement that the scientific activity of our employees was positively assessed by the PZPS authorities and resulted in the official cooperation between the parties. Employees of the Faculty of Law and Economics hope that the contribution of the Unit to the efficient functioning of the Union will contribute to further successes of Polish volleyball - we read on the university website.

Professor Henryk Sozański becomes doctor Honoris Causa of the Kazakh Academy of Sport and Tourism in Alma-Ata

2019-11-06

Professor Henryk Sozański of the Academy of Physical Education (AWF) in Warsaw received the title of Doctor Honoris Causa of the Kazakh Academy of Sport and Tourism in Alma-Ata. The title was given during the celebrations of the 75th anniversary of the Kazakh university, during which the International Scientific Conference of Students and Young Researchers «Academic sport: health and well-being of the Nation» was also held. Professor Sozański is the only professor in the field of physical culture sciences in Poland who has four Doctor Honoris Causa titles. Earlier he was honored by the Ukrainian State University of Physical Education and Sport in Kiev, the Academy of Physical Education and Sport in Gdańsk and the State University of Physical Culture in Lviv. In the years 1996-2002 and 2005-2008 prof. Sozański was the rector of the Warsaw University of Physical Education.

Silesian University of Technology wins the competition „Initiative of Excellence - Research University”

2019-11-06

The Silesian University of Technology is a laureate of the „Initiative of Excellence - Research University” competition. The purpose of the competition was to select and support universities that will strive for the status of a research university and will be able to successfully compete with the best academic centers. - The outcome of the first competition under the «Initiative of Excellence - Research College» program is a key element of the 4-year reform period of the Polish higher education system. This is one of the most important initiatives introduced by the Constitution for Science. It is also the culmination of several years of efforts to select research

universities - Prime Minister Jarosław Gowin said while announcing the results. 20 best universities qualified for the competition. An international team of experts related to the science and higher education sector has selected 10 of them, which in the future will become research universities. Winners in the years 2020–2026 will receive a subsidy increased by 20%. The employees of the Faculty of Law and Economics hope that the contribution to the efficient functioning of the Union will contribute to further successes of Polish volleyball.

Scientists from the Adam Mickiewicz University in Poznań join the group of researchers of the asteroid Hygiea

2019-11-08

Scientists observing the asteroid Hygiea indicate that there are grounds to include it as a dwarf planet. The group includes researchers from the Astronomical Observatory of Adam Mickiewicz University in Poznań. The results of their research were published in Nature Astronomy. They used one of the world's biggest telescopes - ESO VLT for observations of the asteroids with unprecedented resolution. The measurements were supported by observations using small telescopes, also amateur ones, registered on the GaiaGOSA website run at the Astronomical Observatory Institute of the Poznań

University. Determining the exact shape and size of Hygiea gives grounds to classify it as a dwarf planet. Hygiea now meets all four necessary conditions to be classified as a dwarf planet: it orbits the sun, is not the moon and - unlike the planet - has not cleared the environment of its orbit and is almost spherical. More: <https://amu.edu.pl/dla-mediow/komunikaty-prasowe/n-planeta-karlowata-naukowcy-z-uam-w-grupie-badaczy-objektu-hygiea>

University of Silesia ranked the thirteenth in the competition „Initiative of Excellence - Research University”

2019-11-08

The University of Silesia in Katowice was ranked in the thirteenth position among the twenty best research universities in Poland. Thanks to this, in the years 2020–2026 it will receive a subsidy increased by 2%. Each of the twenty universities, participants of the first competition in the «Initiative of Excellence - Research College» program, was evaluated by fifteen outstanding experts, including former rectors, presidents or vice-rectors of leading European universities. The team members were also scientists who enjoy authority in the international scientific community. Participation in the program, increasing funding and recommendations received from an international team of experts will allow further strengthening of the research position of the Silesian university and even better use of its development potential.

Marshall Nawara Foundation to launch competition for bachelor's, master's and doctoral dissertations on local government

2019-11-12

Marshall Marek Nawara's Foundation has launched the 3rd competition for the best doctoral, master's and bachelor's theses in the Malopolska Region concerning the system and activities of local gov-

ernment, as well as presenting the main characters of the local government. The dissertations may also be focused on specific topics on the cooperation of local governments and universities, for example, problems and issues commissioned by local governments, important in the practice of the functioning of these institutions. The purpose of the competition is to reward people who make a significant intellectual contribution to developing Poland as a state that respects the principle of subsidiarity in relation to local government. Diploma theses from 2017, 2018, 2019 can be submitted to the competition. The deadline for submitting papers is November 25, 2019. The competition is launched under the auspices of the Lesser Poland Voivode. More: https://www.malopolska.pl/_userfiles/uploads/REGU-LAMIN_2019%20r%20_III%20edycja%20konkursu.pdf

Students of the Warsaw School of Economics to launch pilot program mLegitymacja

2019-11-12

On November 8 Prof. Marek Rocki, rector of the Warsaw School of Economics (SGH) in Warsaw and Marek Zagórski, minister of digitization, inaugurated the pilot mLegitimation program for SGH students. The School of Economics is the first university in Warsaw where students can use mLegitmacja, i.e. student ID on the phone, stored and shown using a mobile application. ID card is a document issued in addition to an electronic student ID card, which confirms student status and affiliation to the university, entitles to concessions and exemptions, and confirms personal data. More: <http://administracja.sgh.waw.pl/pl/CTI/Strony/mLegitymacja.aspx>

Silesian University of Technology launches third Palo Alto Networks Academy program

2019-11-12

The Silesian University of Technology together with ING Tech Poland, Palo Alto and Comp SA is preparing another set of lectures and workshops for people studying IT - the Palo Alto Networks Academy program. The program aims to deepen students' knowledge of topics related to computer networks and IT security. The classes will be held at the Silesian University of Technology in Gliwice or Katowice by specialists from ING Tech Poland and Palo Alto using modern equipment supplied to the university by Comp SA. All participants of the training will receive the Palo Alto Networks certificate.

Participants can apply for the third program until November 22 via the registration form: https://politechnikacati.rstat.pl/survey/survey/index/form_id/50

Gdańsk University of Technology takes second place in the competition „Initiative of Excellence - Research University”

2019-11-12

Gdańsk University of Technology was one of the 10 winners in the competition under the program of the Ministry of Science and Higher Education „Initiative of Excellence - Research University”. The Gdańsk university took second place in Polish part of the competition. - The status of a research university is a huge prestige but also a challenge. I thank all members of the academic community who have contributed to the fact that our university was in such an elite group, in particular scientists and PhD students, former university authorities and my current colleagues - says the rector of the University, Prof. Krzysztof Wilde. The aim of the competition was to select and support universities that will strive to achieve the status of a research university and will be able to successfully compete with the best

academic centers in the world. The program enables academic centers to concentrate their scientific potential around the most promising research areas.

Cardinal Stefan Wyszyński University to create a mathematics and cybernetic high school

2019-11-12

The cooperation agreement about the creation of an entity developing digital competences was signed by Fr. Prof. Stanisław Dziekoński, rector of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw and Dr Grzegorz Kaczor, President of the School Foundation. The main idea is establishing an entity with the aim to create a high school with a mathematical and cybernetic profile, which will provide the basis for developing digital competences and will allow young people to find their way in the future in non-existent professions. The idea of establishing such a school was caused by the challenges facing modern society in connection with the civilization digital transformation. During education, students, supported by practitioners and academic staff, will acquire the knowledge needed in the modern economy.

Catholic University of Lublin to launch Innovation Laboratory

2019-11-13

The Innovation Laboratory started its activity at the Catholic University of Lublin. The unit is to aid students, doctoral students and university employees to develop their entrepreneurial competences. The laboratory started its activity on November 7. In the first part over 100 participants applied for trainings and lectures. They will work in groups of 12-16 people. Thanks to these workshops, students, doctoral students and academic staff will be able to learn creativity and entrepreneurship. Under the program workshops and trainings will be conducted by mentors - explains Tomasz Małecki, laboratory mentor. As part of the initiative, four development paths will be created: Self & Marketing, Startup & Tech, Sci-

ence & Grants and Social & Design. The mentors will include startup specialists, influencers, businessmen and scientists providing successful commercialization. The laboratory is the result of our observations and a response to market demands - adds Małecki.

University of Lodz to launch the cooperation with the police within the „Open Lodz” project

2019-11-13

The Philology Department of the University of Lodz, as part of the „Open Lodz” project, will train 80 officers of the Municipal Police Headquarters in Lodz. The scope of training will include intercultural communication, communication with people with poor knowledge of Polish and English at the basic and intermediate levels. In return, the officers of the Łódź police will conduct security training and legal regulations for foreigners who are participants of the project. -We want foreigners who come to Łódź to feel the best here. In the case of problems, the police are often the first contact group, and that is why we jointly agreed that the communication skills of officers are needed. Both policemen and English teachers helped in the development of the materials - says Dr Monika Kopytowska, coordinator of the «Open Łódź» project.

Lublin University of Technology promoted on the Indian education market

2019-11-13

Lublin University of Technology in cooperation with the Indian company RG International and a group of young Indian youtubers made a music video promoting the university on the Indian market. -The roles in the film will be played by students of the university, mainly members of the GAMZA Ballroom Dance Formation. We have also invited foreign students. Their age and experience are not important. Willingness, creativity and availability count. In addition to students, the music video will be featured by six well-known Indian youtubers - explains Dorota Adamczyk-Gruszka from the International Education Office of the Lublin University of Technology. The Indian education market is one of the largest in the world. 160 thousand young Indians start to study abroad annually. Today, most Indian students are choosing the United States, but Europe is also becoming more and more popular. By 2020, there will be 40 million students in India who will be looking for opportunities to get higher education. This population significantly exceeds the number of places currently available in India, which is why these young people will have to go abroad to study - says Dr Pradeep Kumar, president of the Indo-European Education Foundation.

Adam Mickiewicz University in Poznan assessed as a research university with an increased research subsidy

2019-11-13

The Adam Mickiewicz University in Poznań is one of 10 universities that were granted the status of a research university. 20 academic centers took part in the „Initiative of Excellence - Research University” competition, but only 10 of them received the subsidy. -This decision confirms that the University of Adam Mickiewicz University in Poznań belongs to the largest and best universities in our country. Our excellent academic staff has always been our strength. As a research university with more resources, we will

be able to link education more closely with research conducted by our scientists. I hope that this perspective will attract talented, young people who want to do scientific work - says the rector of the University, prof. Andrzej Lesicki. Thanks to the new status, in the years 2020-2026 the university will receive a subsidy increased by 10%. This additional amount may bring over PLN 50 million per year. More: <https://amu.edu.pl/wiadomosci/aktualnosci/kandydaci/uam-otrzymal-miano-uczelnia-badawczej-i-zwiekszona-subwencje-na-badania-naukowe>

Students to submit applications for the BioLAB program of the Polish-American Fulbright Commission

2019-11-13

The Polish-American Fulbright Commission is inviting students and PhD students of biological and chemical sciences to submit applications to the BioLAB 2020-21 Program. The deadline is February 1, 2020. The BioLAB program enables one-year research internship in a laboratory located in one of four educational institutions in the USA: University of Virginia in Charlottesville, University of Chicago, University of Texas: Southwestern Medical Center in Dallas and Oklahoma Medical Research Foundation in Oklahoma City. During the internship, students will conduct independent research in modern laboratories, the results of which are often published in peer-reviewed scientific journals. In addition, they can take an active part in the life of an American university, participate in seminars, guest lectures, and learn about American culture. In some cases, they also have the option of using research results for their MA / PhD thesis at the home university.

Poznan University of Technology receives the Polish Innovation Award 2019

2019-11-13

Poznan University of Technology received the Polish Innovation Award 2019. The award was granted during the 7th Polish Congress of Entrepreneurship,

at the Conference and Training Center of the University of Warmia and Mazury in Olsztyn. The Polish Innovation Award is an image program run by the Polish Entrepreneurship Agency and the editors of the «Entrepreneurship Forum». Its goal is to reward institutions and companies operating on the Polish market whose activity is characterized by innovation and care for the research and development sphere. Participation in the program is also a great opportunity to promote innovative solutions created using EU funds. The goal of the Polish Entrepreneurship Agency is also to appreciate those who are thriving, investing, developing and showing innovative activity both through products and the management.

University of Silesia to start cooperation with the Silesian Association of Beekeepers in Katowice

2019-11-13

The University of Silesia will cooperate with the Silesian Association of Beekeepers in Katowice. The cooperation will primarily concern conducting joint scientific and didactic projects - in particular the organization of the Scientific Beekeeping Conference as well as scientific and didactic activities on beekeeping topics. The agreement was signed by the president of the Silesian Association of Beekeepers Zbigniew Binko, a member of the board Dr Eng. Wiesław Londzin and Vice-Rector for international and national cooperation Dr Tomasz Pietrzykowski, Prof. University of Silesia. The Silesian Association of Beekeepers in Katowice is an independent beekeeping organization, gathering 2,570 beekeepers in 67 local clubs. Since 2010, he has been a member of Apimondia - the International Organization of Beekeeping Unions, associating 81 national beekeeping associations of the world, based in Rome. Beekeepers of the Silesian Association have 42 563 bee families.

University of Lodz launches the Academic Support Center

2019-11-14

Emergency help in crisis situations, psychological consultations, group classes or a quiet zone - are some services for the support students of the University of Lodz (UŁ) can find at the Academic Support Center (ACW). The goal of ACW's activities will be to support those members of the academic community of the University of Lodz who will need help for various reasons. The members of the UŁ academic community can use training room, therapy rooms and relaxation area. I personally hope that it will be a place where we will be able not only to solve problems and overcome difficulties, but also to sit down, meet, talk ... or keep silent together - says Dr Anna Gutowska, head of ACW UŁ.

University of Silesia receives over PLN 25 million for the to create a creativity and coworking center

2019-11-14

Strengthening cooperation between the University of Silesia and the business environment is one of the main goals of the university's development strategy. The creation of the regional and intercollegiate creativity and co-working center SPINplace is to serve this purpose. SPINplace was designed for people who want to start or develop their business activity, have an idea for a new product or service and look for establishing contacts between the academic community representing various technological areas and the business world. The project involves creating a multi-functional space for people interested in developing innovative entrepreneurship. The center will serve to broaden their competences, exchange experiences and establish cooperation with representatives of the academic and business community. For the implementation of the project, the University of Silesia will receive over PLN 25 million under the Regional Operational Program of the Silesian Voivodeship. More: <https://www.us.edu.pl/ponad-25-mln-zl-na-utworzenie-centrum-kreatywnosci-i-coworkingu-spinplace>

Signing the founding declaration of the Polish-Czech University Association

2019-11-14

The Conference of Rectors of Silesian Universities (KRUŚ) will be transformed into the Polish-Czech University Association. The founder's declaration was signed during the KRUŚ meeting at the University of Silesia in Opava (Czech Republic). Signing the founder's declaration was one of the highlights of the session program. Members of the new association are universities cooperating so far within KRUŚ and the Technical University of Liberec, Hradec Králové University, Palacky University in Olomouc and the University of Pardubice. Rectors also discussed the implementation of the new law on higher education and science at Polish universities, the possibilities of developing cross-border cooperation and transformation, as well as the project of a third-century cross-border university. An additional event was a scientific conference at the Faculty of Public Policy of the University of Silesia in Opava. The theme of the meeting was the image of Poland and Poles in the Czech media.

University of Opole presented its offer at educational fairs in Guangzhou and Chengdu

2019-11-14

The University of Opole presented its educational offer at educational fairs organized by the National Agency for Academic Exchange in Guangzhou and Chengdu in China. Nine Polish universities participated in the fair, where they competed with the offer of Spanish, Canadian, Czech and many other universities. The consulates of the Republic of Poland in Guangzhou and Chengdu joined the campaign for Chinese students at Polish universities by organizing meetings of representatives of Polish universities with agencies recruiting Chinese students interested in foreign studies and Polish universities. Over 40 students from China study at Opole University, and another 50 are ready to arrive in the next academic year. During the meeting at the Polish consulate in Chengdu, the director of the Chi-

nese Institute of Chinese Education - Weilin Chen started discussion on the realities of the Chinese education market pointed to the Opole university as exemplary Polish partner.

Professor Demenko becomes a honorary doctor of the Kielce University of Technology

2019-11-15

Professor Andrzej Demenko, an outstanding scientist in the field of electrical engineering and electrical machines, the founder of a scientific school in the field of computer methods of electromagnetic field analysis and synthesis, as well as field models of electromagnetic transducers, received the title of doctor honoris causa of the Kielce University of Technology. Andrzej Demenko received the academic title of professor in 1998 from the President of the Republic of Poland. In 2004 he took the position of full professor at the Poznan University of Technology. As an academic teacher at the Faculty of Electrical Engineering of the Poznań University of Technology he promoted many specialists in the field of modeling and design of electromagnetic transducers. He initiated scientific and didactic cooperation with foreign centers as part of international exchange programs, including with the Catholic University of Leuven, with RWTH Aachen or with the universities of Dortmund, Southampton, Liege and Darmstadt. He was a visiting professor at foreign universities e.g. at the University of Louisiana.

University of Warmia and Mazury to launch psychology faculty

2019-11-15

The University of Warmia and Mazury (UWM) in Olsztyn from the academic year 2020/21 will launch psychology as a new field of study at the Faculty of Social Sciences. Professor Jerzy Przyborowski, Vice-Rector for Education and UWM Students, emphasizes that the University has a great chance to establish a new field. -Discussions about creating a psychology course have been taking place at our University for a long time. The current deputy minister Prof. Wojciech Maksymowicz supported this initiative. First of all demand for psychologists with various specialties is high, secondly, every good university has psychology, and thirdly, we have excellent staff at the Faculty of Social Sciences, firmly anchored in the environment of psychologists - argues Prof. Przyborowski. The coordinator of the course and a member of the team developing the education program is Dr Beata Krzywosz-Rynkiewicz, Prof. of UWM, a member of the presidium of the board of the Polish Psychological Association.

Mazowiecki Public College to hold Polish-German scientific seminar in Płock

2019-11-15

On November 18-19, 2019, the Mazowiecki Public College in Płock will host the participants of the seminar „The process of becoming independent of foster pupils - Polish and German experiences”. The seminar will be a platform for the exchange of knowledge and experience between various entities involved in the process of independence of young people: practitioners, representatives of science and representatives of state institutions from Poland and Germany. It will not only be a meeting of experts with students, but also an opportunity to plan a larger research project on the topics discussed. The seminar is an enterprise organized after obtaining a grant from the Polish-German Foundation for Science. The grant application was submitted by the Mazovian Public University in cooperation with the

Naval Academy in Gdynia, the University of Warmia and Mazury in Olsztyn and the Elbląg University of Humanities and Economics. The German side include the Legal Research Center SOCLES International Center for Socio-Legal Studies in Heidelberg, the College of Alice Salomon in Berlin, Institute of Social and Organizational Pedagogy, University of Hildesheim, University of Potsdam.

University of Life Sciences in Poznań joins the project „Consumer Engagement Laboratories”.

2019-11-15

The University of Life Sciences in Poznań implements the project „Consumer Engagement Laboratories”. The activities of scientists are part of the international project „RIS Consumer Engagement Labs” stimulating the emergence of innovation on the agri-food market and financed by EIT Food. The idea is to develop an innovative product through direct contact of various food market entities with the target group - people aged 65+. The consortium include Poznań university, food producer - Folwark Wąsowo; biotechnology startup - Cofactor; distributor - Gminne Składy Sp. z o.o .; non-governmental organization working for the transfer of technology - Poznań Science and Technology Park; University of Warsaw and EIT Food. EIT Food is part of the European framework of the Knowledge and Innovation Community working throughout Europe to raise the level of innovation in the agri-food sector. It implements research projects based on cooperation methods. More: <https://puls.edu.pl/ogloszenia/dmik/innowacyjne-produkty-ywno-ciowe-dla-klient-w-65>

Researcher of the West Pomeranian University of Technology in Szczecin to receive Fulbright scholarship

2019-11-15

Professor Mirosława El Fray from the West Pomeranian University of Technology in Szczecin received a prestigious scholarship from the American Fulbright program. Thanks to it, she will be able to conduct

research in the United States for four weeks. The laureate is a specialist in the field of polymer biomaterial engineering. Thanks to the scholarship, she will implement the project «Enzymatic Catalysis of Green Polymers». At The Ohio State University she will work under the guidance of an outstanding specialist in polymer engineering and chemistry Prof. Judit E. Puskas. They will provide experimental works on new polymer materials, for the synthesis of which enzymes will be used as natural catalysts. The Fulbright STEM Impact Award is a scholarship program for active researchers representing the fields of STEM (Science, Technology, Engineering, Mathematics). Its purpose is to support cooperation for the development of science, culture and interpersonal and inter-institutional relations. Academic Center of Materials and Nanotechnology of the AGH University of Science and Technology receives A + scientific category

2019-11-18

By the decision of the Minister of Science and Higher Education, the Academic Center of Materials and Nanotechnology of the AGH University of Science and Technology in Kraków received the A + scientific category. In this way, AGH became the third university in Poland, after the University of Warsaw and the Jagiellonian University, in which five basic organizational units have received the highest scientific category. The Academic Center of Materials and Nanotechnology is the youngest basic organizational unit of AGH-UST conducting scientific and research activity since 2014. The Center conducts interdisciplinary scientific research in the field of modern engineering, physics and material chemistry, material nanodiagnostics and nanotechnology. Its task is also to maintain and develop modern research infrastructure, in particular related to nanodiagnostics and nanotechnologies, and to make it available to employees of AGH and other research institutions.

PhD student of the Poznań University of Economics receives a DAAD grant

2019-11-18

Katarzyna Ślubik, a PhD student at the Department of Monetary Policy and Financial Markets of the Poznań University of Economics, received a grant from the German Academic Exchange Center (Deutscher Akademischer Austauschdienst, DAAD) for a 3-month research stay at the University of Tübingen in Germany. The DAAD grant is intended for graduates, doctoral students and young scientists, and its purpose is to enable the implementation of a research project at a university or non-university research unit in Germany. Thanks to the funding, the young researcher will implement the project «Cryptocurrencies as a new segment of financial investments». The German Academic Exchange Center is an organization dealing with international student exchange practiced by German universities. It is financed mostly from public funds of the Federal Republic of Germany.

Young researchers of the University of Silesia won scholarships for outstanding young scientists

2019-11-19

Five employees of the University of Silesia in Katowice have won the scholarship competition of the Minister of Science and Higher Education for outstanding young scientists (up to 35 years old). Ministerial scholarships were awarded to scientists from the faculty of exact and technical sciences: Dr Magdalena Tarnacka and Dr Jakub Spiechowicz in the field of physical sciences and Dr Karolina Jurkiewicz in the field of materials engineering, as well as Dr Michał Kłosiński from the faculty of humanities in the field of literature and Dr Eng. Justyna Knapik-Kowalczyk from the faculty of exact and technical sciences in the field of pharmaceutical sciences. Scholarships of the Minister of Science and Higher Education are awarded to persons conducting innovative research at a high level and possessing international scientific achievements.

Young scientists to receive over PLN 40 million for scholarships

2019-11-19

211 outstanding young scientists, including 29 doctoral students, received scholarships from the Minister of Science and Higher Education. The Ministry of Science and Higher Education allocated over PLN 40 million to finance the scholarships. 23 scholarship holders are scholars of the Jagiellonian University, 17 of the University of Warsaw, and 10 from the University of Adam Mickiewicz University in Poznań. Minister Jarosław Gowin awarded scholarships to young scientists who conduct innovative, high-quality scientific research and reach impressive scientific achievements of high prestige and international significance. Winners will receive scholarships of PLN 5,390 per month for up to 3 years.

Lodz University of Technology to cooperate with a university from Senegal

2019-11-19

Professor Sławomir Wiak, rector of the Lodz University of Technology (PŁ), signed an agreement on didactic and scientific cooperation with the Thiès University of Technology, which was represented by the Prof. Alassane Diène and Prof. Mamadou Lamine Lo, head of the foreign cooperation department. University representatives from Senegal visited the faculties and laboratories of the Lodz University of Technology related to the areas where the Thiès University of Technology conducts research and education. They watched laboratories of the Faculty of Mechanical Engineering, the Information Technology Center, the Faculty of Construction, Architecture and Environmental Engineering as well as Lab Factor. Senegal provides a change in the profile of higher education. It will be more focused on technical sciences than before. Because Senegal has only two universities of technology it will gladly use the experience of PŁ.

Six scientists from the Nicolaus Copernicus University receive grants from the Miniatura program

2019-11-19

Six researchers of the Nicolaus Copernicus University in Toruń (UMK) become laureates of the „Miniatura” program funded by the National Science Center. Dr Agata Pacuła will implement the project «Water-soluble seleniates - a solution to the problem of low bioavailability of selenoorganic compounds», Dr Tomasz Jasiakiewicz will conduct a research «Interpretation of wills in Polish and foreign law» and Dr Karolina Sikorska will examine «Life narratives of contemporary visual artists - preliminary research». Dr Tomasz Jędrzejewski will implement the project «Coriolus versicolor extract as a potential modulator of the M1 / M2 macrophage phenotype - study of interactions between breast cancer cells and macrophages», Dr Sonia Szymańska will develop the project «Searching for biologically active compounds limiting the colonization of crop plants by human pathogenic microorganisms», and Dr Dawid Szostek, Prof. of NCU will attempt to develop a validated scale to measure counterproductive behavior at work.

Rzeszów University of Technology invites students to study in Wuhan, China

2019-11-20

Students willing to study in China can apply until December 4 at the Rzeszów University of Technology. Students of Rzeszów university can study at Huazhong University of Science and Technology in Wuhan. The studies will take place in the summer semester of the 2019/2020 academic year. So far, 145 students of Rzeszów University of Technology have already used the opportunity to go to a Chinese university. Huazhong University of Science and Technology is assessed in the top ten best universities in China. Over 56 thousand people study there. Rzeszów University of Technology signed a cooperation agreement with this university in June 2013. When deciding to study in China, students are exempt from tuition fees and they also have a dormitory. They must cover the costs of travel, living and insurance themselves.

Executive MBA of Kozminski University assessed in the best hundred in the world

2019-11-20

The Financial Times announced the ranking of the world's best Executive MBA programs 2019. The Kozminski University (KU) from Warsaw took 61 place advancing for 13 places compared to last year. This is the only Polish university that is included in the ranking. International and even transcontinental programs dominated the Financial Times ranking. The forefront include studies with the participation of Asian universities, especially from China. Well-known business schools include HEC Paris, London Business School, ESCP Europe, INSEAD, IESE, IE Business School, IMD, as well as Columbia, Oxford, Cambridge, MIT and Yale were high in the ranking. The success of Kozminski Executive MBA studies consists of the professional achievements of subsequent groups of graduates. These are the oldest studies of this type in Poland, which we have been running continuously since 1989. Over 5,000 people already graduated from them - said Prof.

Witold T. Bielecki, rector of the Kozminski Academy. See ranking: <http://rankings.ft.com/exportranking/executive-mba-ranking-2019/pdf>

University of Silesia joins the Nature Index

2019-11-20

The University of Silesia in Katowice was assessed as the seventh scientific institution in Poland, and the fifth among Polish universities, in the Nature Index in terms of the publishing activity of scientists in prestigious world magazines in the field of exact and natural sciences. The ranking took into account the number of articles published in selected magazines, whose co-authors represented individual institutions, and the fractional count (FC) indicator, including the number of institutions represented by all co-authors of a given article. The ranking gathers data from 82 major magazines - including «Nature», «Science» or «Physical Review A». The ranking opens access to the most current research results carried out at the highest level by scientists from around the world. It also provides information on cooperation undertaken by researchers at institutional, national and regional levels.

New laboratories of the Institute of Agricultural Engineering of the University of Life Sciences in Wrocław

2019-11-20

The University of Life Sciences in Wrocław has gained eleven didactic and scientific laboratories. A new building of the Institute of Agricultural Engineering was opened on the Biskupin campus. The new labs include a prototype workshop, a drying laboratory, biomass and waste, soil center agrophysics, plant technology and protection, and traction tests labs. The new premises also houses the Training Center of Plant Protection Techniques. The facility belongs to the Institute of Agricultural Engineering, but the nature of the work carried out in the laboratories is part of interdisciplinary research not only of agriculture and horticulture, but also food and nutrition technology or the field of engineering and

technical sciences. The reconstruction of the former garage building for teaching purposes cost over PLN 6 million. More: http://www.glos.upwr.edu.pl/aktualnosci/50254/nowe_laboratoria_instytutu_inzynierii_rolniczej.html

Maria Curie-Skłodowska University in Lublin to launch Day of Internationalization

2019-11-21

On November 25, 2019, the University of Maria Curie-Skłodowska (UMCS) in Lublin, together with Santander Bank Polska and the National Agency for Academic Exchange, are organizing the 1st Internationalization Day, devoted to the issue of internationalization of higher education in Poland. The theme of the event will be internationalization of higher education, and «environmental reflection on the development and improvement of activities for internationalization». The meeting will also be an excellent opportunity to present good practices in this area. An expert of the European Association for International Educators (EAIE) - Dr Uwe Brandenburg, a recognized international authority in the field of internationalization will deliver an open lecture entitled «Why internationalisation? Rationales and future trends».

Institute of Psychology and the Malopolska Cogiteon to promote science jointly

2019-11-21

The Institute of Psychology of the Jagiellonian University (IP UJ) has signed a cooperation agreement with the Malopolska Cogiteon Science Center in Krakow (MCN), which aims to exchange experiences and implement joint projects promoting science. Closer cooperation will enable to use the full potential of both institutions. Dr Michał Wierzchoń emphasizes, that the university depends on the transfer of modern psychological knowledge to the university's social environment, which is why the network of partner institutions should be constantly being expanded. The scientists of the Jagiellonian University are already involved in the preparation of the permanent exhibition at MCN. According to the director of MCN Piotr Szymański, so far in the science centers the main focus has been directed on exact sciences, which is why Cogiteon wants to change this trend, also paying attention to social sciences.

Ministerial scholarships for outstandingly talented young researchers of the Wrocław University of Science and Technology

2019-11-21

Five young scientists from the Wrocław University of Science and Technology received scholarships from the Minister of Science and Higher Education of the amount of PLN 5,390 per month for three years. The applications were evaluated by an advisory team selected from candidates proposed by the Main Council for Science and Higher Education, the Science Evaluation Commission and the Young Scientists Council. 211 scientists from all over Poland received scholarships - including 29 doctoral students. The jury honored were five researchers from the Wrocław University of Science and Technology: Dr Eng. Marcin Kaszuba (mechanical department), Dr Adam Narbudowicz and Dr Eng. Róża Goścień (electronics department), Dr Eng. Michał Baranowski (faculty of

basic technical problems) and Jan Zaręba (chemical department). Ministerial scholarships are granted to the young scientists who conduct innovative, high-level scientific research and enjoy high-profile and international scientific achievements.

University of Gdańsk to launch Project „Mobility in higher education”

2019-11-21

The University of Gdańsk will implement the project „Mobility in Higher Education” co-financed from the Financial Mechanism of the European Economic Area for 2014-2021 under the Education Program. The aim of the Program is to reduce economic and social differences within the European Economic Area and to strengthen relations between Poland and Donor States (Iceland, Liechtenstein, Norway) in the field of education. The project aims to increase the mobility of students and university employees between Poland and the Donor States. It includes the mobility of academic teachers to conduct teaching activities and the mobility of employees to carry out «job shadowing» trips, participation in seminars, training sessions, workshops and conferences improving skills and expanding knowledge. Thanks to the funding, it will enable students to go on internships to cooperating institutions for a period of 2 to 12 months in one academic year.

Scientists from the University of Life Sciences in Poznań receive scholarships from the Minister of Science and Higher Education

2019-11-22

Two scientists from the Faculty of Veterinary Medicine and Animal Sciences of the University of Life Sciences in Poznań received the scholarships of the Minister of Science and Higher Education. Scholarships in the amount of PLN 5,390 per month for up to 3 years will be given to Dr Anna Maria Kubicka from the Institute of Zoology and Dr Marcin Hejdzysz from the Department of Animal Breeding and Evaluation of Raw Materials. The ministerial funding is granted

to scientists who conduct innovative research at a high academic level and obtain impressive scientific achievements of high prestige and international reach. In this year's competition, the applications were evaluated by an advisory team selected from the candidates proposed by the Main Council for Science and Higher Education, the Science Evaluation Commission and the Young Scientists Council. Almost 1.5 thousand applications were sent to the competition, of which approx. 1.4 thousand met the formal conditions and were assessed.

Wrocław University of Science and Technology wins PLN 14 million within the „College available” project

2019-11-22

Two and a half thousand employees and students will be trained under the „College available” project. Wrocław University of Science and Technology received a grant from the National Center for Research and Development for its activities. The total amount of funding is over PLN 14 million. The project includes 254 training sessions and workshops for groups of 8-12 people. They will be implemented in four areas: an awareness module, where participants will be able to gain knowledge about the functioning of disabled people, workshops on working with disabled people in the teaching process, workshops for administrative, support and management staff. As part of the project, over 50 navigation plans will be made, which will match key places of the university. A virtual walk around the university and a guidebook for people who would like to cooperate with the disabled and educational materials tailored to their needs will be created. There are also plans to adapt the interior of the dorms. More: <https://pwr.edu.pl/uczelnia/aktualnosci/miliony-na-uczelnie-dostepna-11405.html>

Opole University nominated for the Polish Intelligent Development Award

2019-11-22

The University of Opole has been nominated for the Polish Intelligent Development Award for 2019 in the „Studies of the Future” category for the implementation of the „Paleobiology. Internationalization of the masters specialization in Biology at the Independent Department of Biosystematics at the Faculty of Natural Sciences and Technology of the Opole University”. The project was implemented by paleobiologists from the Independent Department of Biosystematics (now the Institute of Biology) and ended this year with the promotion of 17 masters. The Polish Intelligent Development Award is a nationwide award appreciating the most innovative projects implemented as part of EU and national programs by Polish scientific institutions, institutions and companies dealing with research and development activities, which by their innovative investments and solutions will apply to Poland's sustainable development.

Computer science is the most popular field of study in Poland

2019-11-25

Over 424,000 students started their studies this academic year. Over 110,000 students decided to continue their studies as full studies, 311,000 applied for first-cycle studies or regular master's studies. Ministry of Science and Higher Education emphasizes, that as in previous years, young people most often chose computer science, with 32,680 people applying for this field of study. The first three most popular studies also do not differ from last year and include IT, psychology and management. This year, however, psychology took the second place (25 831 volunteers) and the management was the third (22 930 volunteers). Further places were taken by medicine (excluding medical universities, which are supervised by the Minister of Health), law, economics, English philology, finance and accounting, construction and logistics. The universities

with most candidates for one place include Warsaw, Gdańsk and Poznań technological universities with 6 to 7 people for one place. The fourth place was taken by the University of Economics in Krakow (5.7 candidates for the place), as well as the University of Economics in Wrocław (5.5 candidates for the place).

State Higher Vocational School created in Chełm to launch the headquarters of the Institute of Medical Sciences

2019-11-25

The State Higher Vocational School (PWSZ) in Chełm has already developed the initial feasibility study and the concept of the entire investment of the new premises of the Institute of Medical Sciences. -We want to boast that we have completed the first part of our new investment, the seat of the Institute of Medical Sciences - said Prof. Eng. Arkadiusz Tofil, rector of the PWSZ in Chełm. He said that work on this serious investments should soon transform into «the process of preparing technical documentation and starting construction works themselves». It is an investment that is to create conditions for the development of medical science education in Chełm. The new institute will be the beginning of development of the spot, which was unused for a long time - added Prof. Tofil.

Wrocław University of Science and Technology to cooperate with Missouri University of Science and Technology

2019-11-25

The Wrocław University of Science and Technology will cooperate with the American Missouri University of Science and Technology. The agreement on cooperation in the field of scientific research and academic exchange has been signed by the rector of the University of Technology - Prof. Cezary Madryas and Vice-Rector of the American College, Dr Richard

Wlezien. The purpose of the contract is to support cooperation in the field of didactics and scientific research, and to increase the research activities of both universities. The integral part of university cooperation are exchange of students, employees and academic staff, joint research work, and co-organization of seminars and academic meetings. The agreement was concluded for seven years. Missouri University of Science and Technology was founded in 1870. Currently, about 7,000 students study mainly STEM group (science, technology, engineering and math), including specialties related to space, mining and petroleum engineering.

Adam Mickiewicz University in Poznań awarded in the LUMEN 2019 competition

2019-11-25

University of Adam Mickiewicz in Poznań was awarded in the competition for the best managed projects and ventures in the university sector - Leaders in University Management - LUMEN 2019. The award was granted for the LEIS project - «LEGO Education Innovation Studio - a unique space to play, learn and work at the Faculty of Mathematics and Computer Science of the Adam Mickiewicz University in Poznań» in the cooperation category. LEIS actively engages participants in their own learning process. It is an educational space for students in which they are equipped and strengthened in the areas of key competences considered necessary for functioning in a knowledge-based economy. It is also a place gathering schools, students, teachers, parents and employers, where entities interested in student development and support for education will be able, to combine learning, passions and fun using international models developed by the academic community.

West Pomeranian University of Technology in Szczecin joins Partnership for Accessibility

2019-11-25

The West Pomeranian University of Technology in Szczecin joined the Partnership for Accessibility program. This is another step towards removing barriers in the university space. The Szczecin university is another signatory to the program. It joined 170 entities from various industries and environments that declared their efforts to eliminate barriers. The Accessibility Partnership supports areas such as architecture, transport, education, healthcare, digitization, services, competitiveness and coordination. The signatories of the document declared that they would be guided by the idea of access and equal treatment and jointly strive to equalize the opportunities and access of all citizens to the physical, social, cultural, recreation, leisure, sport, health care, education, work, transport, information and means of communication.

Best master's theses in the field of economic sciences selected

2019-11-26

The 12th Competition for the Award of the President of the National Bank of Poland for the best master's thesis in economic sciences under the honorary patronage of the Minister of Science and Higher Education and the president of the Polish Academy of Sciences has been completed. The goal of the competition is to develop Polish economic thought and increase the interest of the academic community in macroeconomics and finance, in particular monetary policy and financial markets. In this year's competition, the first prize of PLN 15,000 was awarded to Wojciech Jędruszczak from the University of Warsaw for his work entitled Stochastic convergence pattern of unemployment - Poland 2004-2016. The second prize of PLN 10,000 was received by Jakub Klimaszewski from the Warsaw School of Economics for his work entitled Resistance of the Australian real estate market to the global crisis of 2007-2010. Conditions, course, causes. Justyna

Janiec from the University of Lodz received the third prize of PLN 7,000 for her work entitled Impact of new capital and liquidity regulations on the banking sector in Poland.

Member of the Monetary Policy Council suggests to create an economic university in Łowicz

2019-11-26

-It is worth creating the Władysław Grabski Polish University of Economics in Łowicz - writes Prof. of the Poznań University of Economics (UEP) Dr Eryk Łon, member of the Monetary Policy Council. There is already a Władysław Grabski Complex of Secondary Schools No. 4 in Łowicz with 4th Secondary School, 4th Technical Secondary School and Industry School No. 4. Taking into account the establishment of the Polish University of Economics in Łowicz would be something natural and it would be another step on the road to Łowicz's development – emphasizes - Dr Eryk Łon. Professor Łon is known for many initiatives. This year, he has already called for Poland's resignation from the Euro currency due to the Fatima prophecy and proposed to honor Maria Konopnicka, who raised eight children, on the 800 PLN note.

Scientists of the University of Silesia awarded in the Opus competition of the National Science Center

2019-11-26

Five researchers of the University of Silesia will be able to implement their projects thanks to the Opus competition of the National Science Center. The total value of their research funding is over 4.1 million PLN. The co-financed projects include: «Water fictions: refugees and the sea»; «Socio-legal justice for women. Analysis of female vertebrae» and «Correlation between limited size and surface interactions and their impact on the molecular dynamics of two-dimensional space limited materials. Does the size of the spatial limitation apply?» Funding was also awarded to the following projects: «TreesBEEs -

Trees as a biogeomorphological factor of ecosystem transformation - biological weathering, initial soil development and slope formation under the influence of tree roots, rhizospheric bacteria and mycorrhizal fungi" and „How many glaciations? Neoproterozoic countdown to the biological „big bang”.

Cooperation agreement between the Pomeranian Academy and the Moscow State Law University

2019-11-26

The Pomeranian Academy in Słupsk will cooperate with the Moscow State Law University. The contract, was signed by the rector - Dr Eng. Zbigniew Osadowski, Prof. of the Pomeranian Academy. The bilateral agreement concerns the development and implementation of joint educational programs, student exchange (bachelor's, master's and doctoral studies), staff and teaching staff exchange, as well as organization and conducting joint scientific projects, conferences and seminars. The initiator of cooperation is the Institute of Law and Administration established at the Pomeranian Academy, which, taking into account the needs of the high level of education, ensures exchange of experience at an international level. This is the first step regarding further cooperation in the field of the Double Diploma program.

Danish prince couple to visit the University of Warsaw

2019-11-27

On November 25-26, the University of Warsaw (UW) was holding a conference celebrating the 100th anniversary of the re-establishment of Polish-Danish diplomatic relations. On that occasion, the university was visited by the heir to the throne of Denmark, Prince Frederick and Princess Maria. Prince Frederick took part in the ceremonial opening of the conference on relations between countries. Inaugurating the conference, University of Warsaw Rector Prof. Marcin Pałys talked about scientific cooperation between the University of Warsaw and Danish universities, also about within the 4EU + Alliance. -We have great hopes about the 4EU + Alliance, which obtained the status of the European University by the decision of the European Commission in June this year. The alliance connects six research universities from different countries, including the University of Warsaw and the University of Copenhagen, - said the rector.

Academy of Special Education to cooperate with the Mazovian Public College in Płock

2019-11-27

Academy of Special Education in Warsaw and the Mazowiecka Public College in Płock have signed a cooperation agreement regarding the implementation of scientific and research and development projects. The cooperation agreement covers: joint implementation of educational, scientific and research and development projects; cooperation in the field of staff training and raising the competences of doctoral students and research and teaching staff, cooperation in obtaining scientific promotions, organization of postgraduate studies and training, as well as professional internships, joint organization of thematic conferences and seminars as well as publication of articles and scientific monographs. -This agreement is particularly important to us in the context of our preparations for parameterization in the pedagogy discipline. We also hope that it will

be support for our employees applying for academic degrees - said Prof. Maciej Słodki, rector of the Mazovian Public University.

Poznań University of Economics to receive over 2.25 million for adaptation to the needs of the disabled people

2019-11-27

The University of Economics in Poznań received over PLN 2.25 million for the project „Adaptation of buildings and the educational offer of the University of Economics in Poznań to the needs of students with disabilities”. The project includes purchase of equipment for conducting classes with disabled people, employment of a psychologist and psychiatrist, purchase of TOTUPOINT devices, exchange of compulsory literature for an electronic version adapted to the application used by the person disabled. The project also involves the elimination of architectural barriers, installation of a hearing aid system, purchase of escape chairs for the disabled, installation of a system for summoning help for people disabled people, installation of devices facilitating the opening of heavy doors and adaptation of the university's website to the needs of people with disabilities.

State Higher Vocational School in Nysa to cooperate with Donaldson Polska

2019-11-27

The State Higher Vocational School in Nysa (PWSZ) has established cooperation with the Donaldson company, a global leader in the production of filtration systems and spare parts. The agreement provides for the possibility of apprenticeships and internships for students of the Nysa university, organization of workshops, lectures and other forms of classes, also in the company's specialized laboratories, in order to improve students' skills and competences. The company's employees will be able to improve their competences as part of the training offered by PWSZ in Nysa. Donaldson company

works for clients in the industrial sector and in the field of diesel engines, including air purification in industrial facilities, compressed air and gas purification, flue gas and dust removal, electricity generation, disk drive filtration as well as bulky equipment and trucks.

Representatives of one of the best Chinese universities visit the University of Warsaw

2019-11-28

University of Warsaw (UW) was visited by a delegation from Sun Yat-Sen University from China. Representatives of both universities discussed possible cooperation. The talks concerned the possibility of undertaking scientific cooperation and the implementation of academic exchange of employees and students of natural, exact and technical sciences, as well as languages and translation studies. At the end of the visit, guests visited the University's campus at Krakowskie Przedmieście. Sun Yat-Sen University is one of the leading Chinese universities. It is in the top ten high colleges in China and in the two hundred best universities in the world according to the Academic Ranking of World Universities (ARWU), i.e. Shanghai ranking.

Professor Jerzy Hausner receives an honorary doctor title from the Warsaw School of Economics

2019-11-28

Professor Jerzy Hausner received an honorary doctor's title from the Warsaw School of Economics (SGH). The SGH Senate gives this honorable title to people particularly distinguished for the development of science, economy or international cooperation. Professors Juliusz Gardawski, Andrzej Sławiński and Jacek Szlachta justified their decision: «Professor Hausner's scientific research and public service are recognized and appreciated in Europe. He was honored with the position of Adjunct Professor in Transition Economies at the International Center for Business and Politics at the prestigious Copenhagen Business School. From 2014, he participated in the work of the Brussels European and Global Economic Laboratory, and from 2018 is a member of the High Level Industrial Roundtable «Industry 2030», which is the advisory body to the European Commission in building a new industrial policy in Europe. « Professor Hausner in the years 2001–2005 was a member of the Sejm and minister in the governments of Leszek Miller and Marek Belka, in the years 2003–2005 he was the deputy prime minister and a member of the Monetary Policy Council in the 2010-2016 term.

University of Poznań joins a consortium forming the Academy of Innovative Applications of Digital Technologies

2019-11-28

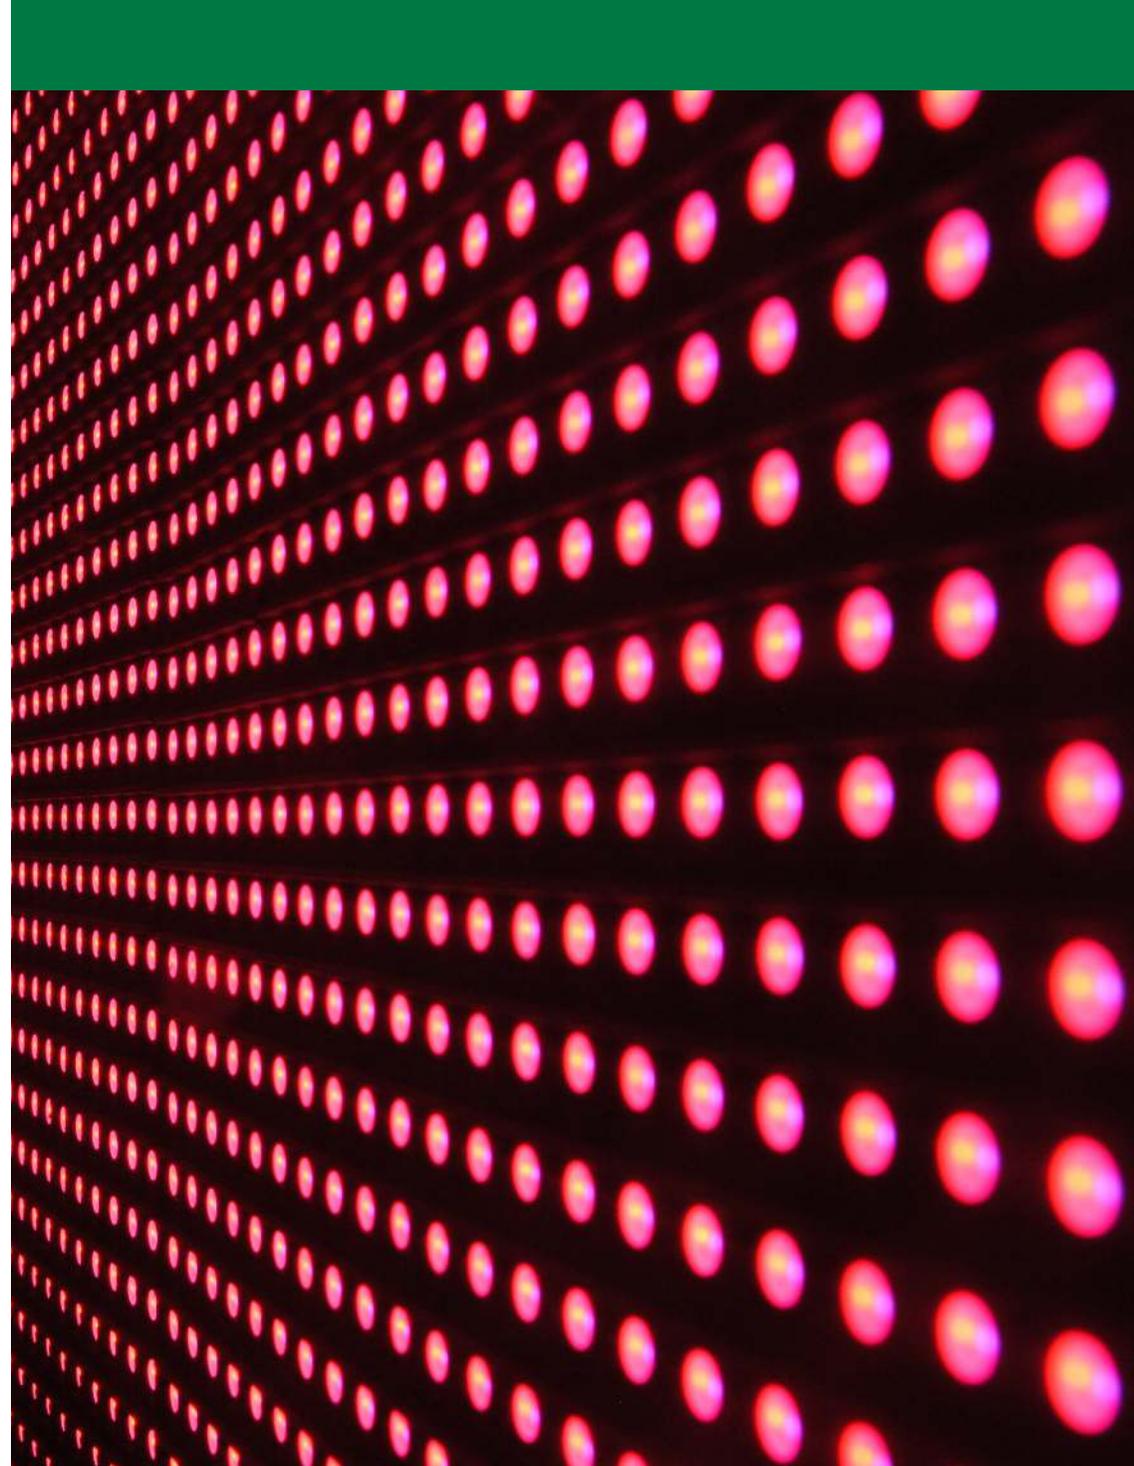

The Ministry of Digitalization together with universities in the country are creating a model of systemic education of the highest class specialists in artificial intelligence, machine learning and cyber security. Adam Mickiewicz University in Poznan will join the consortium established to create the Academy of Innovative Applications of Digital Technologies (AI Tech). - The idea of the Ministry of Digitization of

the creation of AI Tech is very good news for candidates for full studies at the Faculty of Mathematics and Computer Science of our University - says Vice-Rector - Prof. Marek Nawrocki. Students can participate in internships at leading universities in the country and abroad, internships at leading IT companies, lectures by experts and invited scientists. Universities are to educate so that graduates are not only excellent IT specialists, but also people with broader managerial skills, able to take on business and scientific challenges, including implementation doctorates. Assistant Professor of the University of Szczecin becomes a laureate of the scholarship of the Minister of Science and Higher Education

2019-11-28

Dr Eng. Paweł Ziemba, assistant professor of the University of Szczecin from the Institute of Management, received a scholarship from the Minister of Science and Higher Education for outstanding young scientists in the discipline of management and quality sciences. The subject of the laureate's research is closely related to the work of the Department of Decision Support Methods and Cognitive Neuroscience at the Szczecin university. Dr Eng. Ziemba investigates methods of multi-criteria decision support and knowledge bases that are used in decision-making systems for the purposes of management, including sustainable management. The laureate in particular deals with: development and applications of multi-criteria decision-making analysis methods, as well as the construction of ontological knowledge bases and knowledge inference mechanisms. The combination of the research directions indicated is to lead to the development of intelligent decision systems based on logical inference and multi-criteria decision analysis.

Cardinal Stefan Wyszyński University strengthens cooperation with the Medical University of Lublin

2019-11-29

Fr. prof. Stanisław Dziekoński, rector of UKSW talked about telemedicine and the cooperation of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw with the Medical University of Lublin in the program „This concerns us” broadcast on the Lublin branch of the Polish Television. Civilization development is inevitable and the changes can be used by doctors- said Prof. Dziekoński. Father Professor Stanisław Dziekoński said that the cooperation between UKSW and the Medical University of Lublin is implemented at many levels. -It should also cover the area of research. We want to create a new quality with the Medical University that will reduce the financial burden of the medical care system in Poland and at the same time bring doctors closer to patients - said the Rector of UKSW.

State High School in Zamość to launch new post-graduate studies

2019-11-29

State High School in Zamość has offered a new postgraduate course- Crisis management in the state security system, which was launched on November 23-24. The aim of the studies is to prepare specialists in the field of crisis management, defense matters, civil defense, administration of personal data and protection of classified information, effectively operating in situations of threats to the security and property of Polish citizens. The studies are addressed to employees of the central and local government administration, uniformed services and anyone interested in acquiring new qualifications enabling them to take up employment in the field of crisis management.

Faculty of exact and technical sciences of the University of Silesia receives Symbol of Synergy of Science and Business

2019-11-29

The Faculty of exact and technical sciences of the University of Silesia received the Symbol 2019 in the category of synergy of science and business. The award was granted in the promotional program of the „Market Monitor”, „Dziennik Gazeta Prawna” and the „Business Monitor” distributed with „Rzeczpospolita”. The Symbols are awarded to companies and institutions that are characterized by the highest quality of management and initiatives. The program strengthens the positive image of the awarded entities and gives the opportunity to establish new business contacts. The jury appreciated the commitment of university scientists in implementing projects important not only for scientific knowledge, but also those undertaking important social issues and offering innovative solutions for the business sector. The university listens carefully to the needs of the region, serving knowledge, apparatus, information, library and housing resources, as well as its achievements and discoveries.

University of Adam Mickiewicz in Poznań joins the EPICUR consortium

2019-11-29

University of Adam Mickiewicz in Poznań became part of a consortium of universities from Strasbourg, Freiburg, Amsterdam, Karlsruhe, Vienna, Thessaloniki and Mulhouse. The consortium has adopted the name EPICUR (European Partnership for an Innovative Campus Unifying Regions) and belongs to the first 17 European Universities. Participation in the project means that UAM will receive financial support for activities aimed at developing research and scientific projects. There will also be changes in the study system. Students will receive training offers in new fields, offers of other forms of student exchange and an opportunity for an international diploma. The consortium universities will offer joint

study programs. The way of their implementation will include e-learning platforms or online courses. The level and quality of scientific research will be increased not only thanks to the cooperation of several academic centers, but also thanks to establishing relations with their economic environment. More: <https://amu.edu.pl/wiadomosci/aktualnosci/kandydaci/epicur-jeszcze-wiecej-badan-i-projektow-edukacyjnych.-jeszcze-wiecej-wyjazdow-zagranicznych-dla-studentow>

Professor Jolanta Choińska-Mika joins the UNICA Steering Committee

2019-12-02

Professor Jolanta Choińska-Mika, Vice-Rector for Student Affairs and Quality of Education of the University of Warsaw (UW), was re-elected to the 5-member Steering Committee of the Network of Universities from Capitals of Europe (UNICA). UNICA is an association of 51 universities from 37 European capitals. At these universities 160,000 teachers are educating currently 1.9 million students. The goal of the UNICA network established in 1990 is to promote academic excellence, integration and cooperation between member universities throughout Europe. UNICA represents the position of member universities in the negotiations with European institutions, national, regional and local authorities. Professor Jolanta Choińska-Mika is a professor at the Institute of History of the University of Warsaw. She is a researcher in the history of early modern Europe, the history of parliament and political culture.

University of Białystok to cooperate agreement with the and Liaocheng University from China

2019-12-02

The University of Białystok (UwB) will cooperate with Liaocheng University from China. The document was signed by Prof. Robert Ciborowski - UWBRector and Prof. Haiquan Hu - Vice Rector of the Chinese University. The Polish-Chinese agreement stipulates the implementation of joint research projects by both universities, exchange of scientific staff and students, and joint organization of scientific conferences. It was concluded for a period of 5 years with the possibility of its extension. The Chinese university is most interested in cooperation in the field of natural and exact sciences. However, both sides do not exclude that in the future joint activities will also be implemented in the field of pedagogy or foreign language education. Liaocheng University is located in Liaocheng City in East China, Shandong Province. Over 30 thousand students are educated there.

University of Economics in Katowice receives distinction „HR Excellence in Research”

2019-12-02

The European Commission awarded the University of Economics in Katowice the distinction „HR Excellence in Research”. The award shows that the university provides the best working conditions for researchers and conducts recruitment processes in a transparent manner, in accordance with the guidelines of the European Charter for Researchers and the Code of Conduct for the recruitment of researchers. The benefits of having a distinction include confirmation of compliance with transparent rules when recruiting employees, rewarding the university in grant competitions and confirmation of its readiness to apply and implement scientific projects on the national and international arena. „HR Excellence in Research” is one of the activities under the „Human Resources Strategy for Researchers” strategy aimed at increasing the attractiveness of the working conditions and careers of researchers

in Europe. This sign distinguishes institutions operating in the field of research and development and research funding organizations.

University of Wrocław and the Medical University in Wrocław sign agreement on cooperation

2019-12-02

Rector of the University of Wrocław Prof. Adam Jezierski, rector of the Medical University of Wrocław Prof. Piotr Ponikowski signed a cooperation agreement. Cooperation between universities will be implemented by the Laboratory of Biology and Forensic Entomology of the Department of Biology, Evolution and Protection of Invertebrates of the Institute of Environmental Biology of the Faculty of Biological Sciences of the University of Wrocław and the Forensic Thanatology Laboratory of the Department of Forensic Medicine of the Medical University in Wrocław. It is to consist of conducting research in the field of biology and forensic entomology, dissemination of research results, in particular through scientific and popular science publications as well as participation in conferences, as well as the transfer of knowledge in the form of training, internships and internships for students and employees.

University of Gdańsk more accessible to disabled students

2019-12-02

The University of Gdańsk will implement the „UG Available” project - a comprehensive program to eliminate barriers to access to education for people with disabilities. Activities will be co-financed by the National Center for Research and Development under the Operational Program Knowledge Education Development. The main goal of the project is to improve the accessibility of the University of Gdańsk for students with disabilities by implementing a comprehensive solution focused on organizational, architectural, technological, educational changes and the organization of training to improve competence in working with people with disabilities.

The project includes construction of an external passenger elevator and creation of a professional labeling system for the campus of the university, launching the website of the Office for People with Disabilities, purchase of specialized equipment and adaptation of internet portals and e-learning trainings to the needs of people with disabilities. More: https://ug.edu.pl/media/aktualnosci/92312/dostepny_ug_-_kompleksowy_program_likwidacji_barier_w_dostepie_do_kształcenia_dla_osob_z_niepelawodnosciami_-_piate_miejsce_na_liscie_rankingowej

Collegium Martineum of the Adam Mickiewicz University in Poznań to launch Enigma Cipher Center

2019-12-02

The Enigma Cipher Center will be built in the Collegium Martineum of the Adam Mickiewicz University in Poznań. The first visitors will be able to enter the Center in 2021. In the place of today's Collegium Martineum, before 1939, there was a cipher office of the General Staff of the Polish Army, where Marian Rejewski, Jerzy Różycki and Henryk Zygalski - broke the code of the German cipher machine worked. The exhibition will be divided into themed zones, equipped with interactive and multimedia stands and traditional exhibits. In addition to individual tours, there will also be classes for organized groups and open lectures. As part of the investment, the interior of the building will be modernized. In addition to their new arrangement and renovation of the installation, its accessibility for people with disabilities will also be improved. More: <https://amu.edu.pl/dla-mediow/komunikaty-prasowe/budujemy-centrum-szyfrow-enigma!>

Mazowiecka Public College in Płock to offer new majors

2019-12-03

By the decision of the Ministry of Science and Higher Education, the Mazovian Public College in Płock received permission to create practical studies in Management starting from the 2020/2021 academic year. With new majors, the university will educate specialists in the organization management. The studies are to enable «the development of the student's personality and social competences related to a positive attitude to getting to know the surrounding world». Management graduates will acquire knowledge, skills and competences in the field of: management of modern organizations, problem solving in the field of organization management based on the latest literature and practice in the field of economics and finance, human capital management, and the latest information technologies.

Wroclaw University of Environmental and Life Sciences to improve the quality of local wines

2019-12-03

Almost 4.8 million PLN will be awarded to scientists from the Wrocław University of Environmental and Life Sciences for a project that aims to improve the quality and recognition of Lower Silesian wines. The money will be allocated from the budget of the Agency for Restructuring and Modernization of Agriculture. As part of the project «Innovative technology for the production and bottling of grape wine and the method of organization of production as factors for improving the quality of locally produced wine products», a mobile wine bottling line and a center for analyzing horticultural wines will be created, which will support research and facilitate the work of wine plantations from the region. Researchers will research viticulture agrotechnics and cultivars to create a code of good practice for vine cultivation. The project was created in a consortium of 18 members including University, winemakers from the Lower Silesia and Opole region, the Lower Silesian Agricultural Advisory Center and the Pol-

ish Society for Horticultural Sciences. More: http://www.glos.upwr.edu.pl/aktualnosci/50491/iq_grape_upwr_poprawi_lokalne_wina.html

Bialystok University of Technology to hold International Training Week

2019-12-03

17 representatives of 11 universities from 9 countries will participate in the International Training Week taking place at the Białystok University of Technology (December 6). The meeting for partner universities in the Erasmus + Program is organized by the PB International Cooperation Office. The participants of the International Training Week include academic teachers and employees of international cooperation offices from 11 world academic centers. Guests have the opportunity to learn about the Białystok University of Technology, participate in meetings at faculties, as well as conduct classes for students. University representatives from Albania, Algeria, Malaysia, Moldova, Nepal, Paraguay, Russia, Serbia and Tunisia also hope to establish cooperation with teachers and academic staff of the Białystok University of Technology.

Adam Mickiewicz University in Poznan strengthens cooperation with the University of Shanghai

2019-12-03

University of Adam Mickiewicz University in Poznan strengthens cooperation with the University of Shanghai, which will create for UAM students new 'mobility opportunities'. In December, both universities will sign an official agreement on joint studies. Both academic centers have already conducted many joint scientific initiatives. One of them was the November trip of doctoral students and lecturers from the Adam Mickiewicz University to Shanghai to participate in a scientific conference. Joint implementation of the education program as well as conducting scientific research are also planned. During their stay in China, Polish delegation discussed joint study projects, academic exchange, internship pro-

gram and participation in summer schools. The discussions also included proposals for 2020: organizing a Polish film festival and Polish culture days in Guangzhou, as well as organizing a joint scientific conference at the University of Zhaoqing.

West Pomeranian University of Technology receives over PLN 4 million for greater accessibility for the disabled people

2019-12-03

Project of the West Pomeranian University of Technology in Szczecin (ZUT) „Eliminating barriers of the access to education” has received funding under the National Center for Research and Development competition. The goal of the program is to eliminate barriers to access to higher education. Thanks to the allocated funds, it will be possible to introduce organizational changes - including the launch of an office supporting disabled people. There are also plans to construct an elevator in one of the faculties, and provide specialized trainings to raise the awareness and competence of the staff, which will translate into increased accessibility of the educational offer for people with disabilities. The competition is financed from European Funds - Knowledge Education Development Program. The planned budget was PLN 200 million, but in the end it was increased by over PLN 121 million thanks to the high quality of submitted projects and the significance of the actions. More: <https://www.zut.edu.pl/zut-strona-glowna/informacje-biezace/artikel/zut-otrzyma-ponad-4-mln-zl-na-zwiekszenie-dostepnosci-dla-niepelnosprawnych-studentow.html>

University of Silesia nominated to the ELSEVIER Research Impact Leaders Award 2019

2019-12-03

The University of Silesia in Katowice has been nominated for the ELSEVIER Research Impact Leaders Award. Awards will be granted in the areas of agricultural and natural sciences, engineering and technical sciences, humanities, health and medical sciences, exact sciences and social sciences. The competition takes into account the increase in the number of publications in the last five years in the most prestigious scientific journals with the participation of co-authors representing foreign scientific centers, as well as a high level of citations. The university in Katowice has been nominated in the category of engineering and technical sciences. The University of Silesia also participates in the International Visibility Project implemented by the Perspektywy Educational Foundation under the ministerial program „Dialogue”. The project is aimed at preparing university audits and organizing seminars on the methodology for creating rankings, scientific tools and experiences in building international visibility. More: <https://www.us.edu.pl/nominacja-universytetu-slaskiego-do-elsevier-research-impact-leaders-award-2019>

Krakow University of Technology begins cooperation with Siemens Mobility

2019-12-04

Krakow University of Technology (PK) and Siemens Mobility have concluded a cooperation agreement in the field of science and education. On its basis, Siemens Mobility will support the faculty of transport engineering, launched this academic year, conducted at the Faculty of Mechanical Engineering. Siemens Mobility is a global leader producing rail, road and air vehicles, as well as creating specialized solutions in the field of transport and intelligent systems in the field of mobility and logistics. In the field of transport engineering, PK and Siemens

Mobility will cooperate on the railway industry, including innovative technologies for the production and operation of transport means, intelligent transport systems and solutions in the field of mobility, as well as integrated solutions for transport and logistics.

Center for Popularization of Science and Innovation in Olsztyn to be called Kortosfera

2019-12-04

The competition for the name of the Center for Popularization of Science and Innovation was launched by the rector of the University of Warmia and Mazury (UWM) in Olsztyn on October 8. 154 entries were submitted for the competition. The jury chose the name Kortosfera, which refers to the nature or specificity of the center's activity or activity at UWM and its location. In addition, it is original, never used before, inventive and not too long name. The name Kortosfera was submitted by 2 people: Dr Urszula Doliwa, Prof. of UWM, from the Institute of Journalism and Social Communication, the Faculty of Humanities and MA Emil Andrzej Karpiński from the Department of Tourism, Recreation and Ecology, Faculty of Environmental Sciences.

Employees and students of three Japanese universities visit the Lublin University of Technology

2019-12-05

Until December 7, a 23-person delegation from Japan, consisting of employees and students of three partner universities: Kumamoto, Sojo and Ryukyus, is staying at the Lublin University of Technology. The visit is an opportunity to summarize nearly 36 years of cooperation between the Lublin university and Japanese universities. It focuses on research (mainly related to plasma technologies, renewable energy and the use of plasma in environmental protection), exchange of students and employees, joint publications, as well as organization of conferences and seminars. -Lublin University of Technology under-

lines particular importance to scientific cooperation with Japan. It is a very attractive country scientifically, economically and culturally. We signed the first official contract in 1984 with the Kanazawa University and it concerned the exchange of employees and students - reminded Prof. Henryka Stryczewska, dean of the Faculty of Electrical Engineering and Computer Science at the Lublin University of Technology.

Awards of the rector of the University of Warsaw

2019-12-05

Professor Paweł Stępień from the „Artes Liberales” Faculty, Dr Agata Dziewulska from the European Center and Dr Andrzej Dragan from the Faculty of Physics became the laureates of the fourth didactic award competition of the rector of the University of Warsaw (UW). The didactic prize of the University of Warsaw Rector is awarded individually to academic teachers for outstanding didactic achievements and introduction of innovative teaching methods. Every year, the prize is awarded in three fields: humanities, social sciences and exact sciences. The first award competition took place in 2016. -Teaching is one of the fundamental functions of the university. Good education is a demanding task, especially in times of so many changes. It is even more important to keep up with the requirements and challenges of modern society - said Prof. Marcin Pałys, rector of the University of Warsaw.

Pomeranian universities to launch digitization of nature collections

2019-12-05

The University of Szczecin, the University of Gdańsk and the Pomeranian University in Słupsk will implement a project of digitization and sharing collections of herbariums of Pomeranian academic units on the Internet. This is the first such undertaking in Poland. The aim of the project is to digitize and make available on-line resources of Pomeranian herbarias. Thanks to the project, the costs of access to herbarium resources will be reduced, as well as access to the achievements of Polish researchers will be easier. The Pomeranian Herbaria will be made available digitally as the first such initiative in Poland. This will help disseminate the knowledge about the achievements of Polish scientists, as well as increase the number of Polish researchers' citations. Almost 500 thousand valuable plants will be scanned and made available on the web. The project will be financed from the Operational Program Digital Poland 2014-2020. The total cost of implementation is PLN 25 million. More: <https://usz.edu.pl/digitalizacja-zbiorow-przyrodniczych-pomorza/>

University of Warsaw inaugurated program Cátedra México

2019-12-06

The „Cátedra México” program was inaugurated by the University of Warsaw (UW). This is a series of lectures given by Mexican scientists. This year the lectures was delivered by physicist Dr Mauro Napsuciale Mendivil. This year's guest, Dr Mauro Napsuciale Mendivil, is the Dean of the Faculty of Physics at the University of Guanajuato. During the inauguration of the series he gave a lecture entitled «Dark Matter: Facts And Myths». Also, Alejandro Negrin, Mexico's ambassador to Poland, took part in the meeting. The program «Cátedra México» includes lectures for students. The multidisciplinary program is also an opportunity for cooperation between Polish and Mexican scientists representing humanities, social sciences, natural and exact sciences. The pro-

gram is implemented in cooperation with the Ministry of Foreign Affairs of Mexico.

Deputy PM Gowin awards Diamond Grants

2019-12-06

85 outstanding students received the Diamond Grants from Jaroslaw Gowin, Deputy Prime Minister and Minister of Science and Higher Education. In addition to the prestigious award, researchers will receive financial support. The Ministry of Science will spend over PLN 17 million on the implementation of their scientific projects. -It is encouraging that every year the group of scientists of the youngest generation increases with new scientific diamonds - said Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. - Through all competitions of Diamond Grants, we have supported almost 700 talented students who can carry out their first independent research projects, thanks to the Ministry of Science and Higher Education, - he added. Over 17 million PLN support will be received by 85 projects whose authors are students or graduates of bachelor studies conducting own scientific research. Winners of the competition will receive up to 220 thousand PLN for their research. Students will be able to receive a salary of up to PLN 2,500 per month for a period of 24 to 48 months, i.e. throughout the duration of the project.

Construction of the West Pomeranian University of Technology received a European certificate

2019-12-06

The major of construction at the Faculty of Construction and Architecture of the West Pomeranian University of Technology received the European quality certificate European Accredited Engineer (EUR-ACE) by the Accreditation Committee of Technical Universities (KAUT). EUR-ACE is a type of accreditation created by European engineering organizations. This system was developed by the European Network for Engineering Accreditation (ENAE) network, which brings together national organizations dealing in

the quality of engineering education at universities in Ireland, Finland, France, Spain, Kazakhstan, Germany, Poland, Portugal, Russia, Romania, Slovakia, Switzerland, Turkey, Great Britain and Italy. In Poland, KAUT is such an organization. ENAE awards the Certificate to its technical accredited programs. The document is recognizable in all European countries and confirms the compliance of the study program with the norms and principles adopted in Europe.

University of Zielona Góra implementing the European project „NewM - New Modes of Mobility”.

2019-12-06

The Institute of Mechanical Engineering of the University of Zielona Góra is implementing the international project „NewM - New Modes of Mobility”. The activities are financed from the funds of the European Union and the German Academic Exchange Center. The main goal of the project is to enable project partners and external higher education institutions to implement new mobility modes. The specific objectives are to connect Europe by raising awareness and understanding in cooperation between universities, increasing the transversal competences of their graduates, and thus increasing Europe-wide employment opportunities and reducing inequalities in international education. In addition to the University of Zielona Góra - the project involves: University of Applied Sciences Würzburg-Schweinfurt (Germany), Debrecen University (Hungary), Fontys Venlo University of Applied Sciences (Netherlands), Lucian Blaga University of Sibiu (Romania), Seinäjoki University of Applied Sciences (Finland).

Gdańsk University of Technology becomes one of the most popular universities in Poland

2019-12-06

Gdańsk University of Technology is the second in Poland in terms of the number of all applying students. In this year's applying process, there were on average 7 applications for one place in full-time studies. The most popular were the management and economics faculties: management in English (over 18 people per place) and economics (17.7). The spatial management at the faculty of architecture (almost 15 people per place) and the mechanical faculties: mechatronics (14.5) as well as management and production engineering (13 people) were also popular. Finally, 3740 people were admitted to the studies at the Gdańsk University of Technology in the 2019/2020 academic year. The ranking of the most-chosen public universities in the country was published by the Ministry of Science as a summary of the results in the 2019/2020 academic year. More: https://pg.edu.pl/aktualnosci/-/asset_publisher/hWGncmoQv7K0/content/politechnika-gdanska-ponownie-w-gronie-najpopularopular-uczeln-w-polsce

Deputy Prime Minister Gowin appointed members of the Polish Accreditation Commission

2019-12-09

On January 1, 2020, the Polish Accreditation Commission (PKA), an institution working to ensure and improve the quality of education, will begin its next four-year term. Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education appointed the PKA members. The main objectives of the Commission's activities are to ensure compliance with the quality standards adopted for higher education, referring to the best models in force in European and global educational space and to support public and private universities in the process of improving the quality of education and building a culture of quality. -The decisions taken by the PKA significantly affecting the functioning of uni-

versities in Poland, to a large extent also shape the functioning of the entire higher education system. I would like new PKA members to remember this all the time while they were in office - emphasized Deputy Prime Minister Jarosław Gowin. Composition of PKA: <https://www.gov.pl/web/nauka/komunikat-w-sprawie-powolania-czlonkow-polskiej-komisji-akredytacyjnej-na-kadencje-2020-2023>

Vice-Rector of the Jagiellonian University met with the European Commissioner for Innovation and Youth

2019-12-09

Professor Stanisław Kistryn - Vice-Rector of the Jagiellonian University for Research and Structural Funds, met with Commissioner Marija Gabriel and took part in the debate „A New Vision for the European Higher Education Sector”. Marija Gabriel is a member of the European Commission, who from December 1 acts as Commissioner for Innovation and Youth, responsible also for the research and higher education sector. Vice-Rector Prof. Kistryn is also a co-founder of The Guild of European Research - Intensive Universities and a representative of the association of European universities UNA Europa. During the meeting, they discussed important issues concerning matters of European University initiatives, problems of differences in the participation of EU-15 and EU-13 countries in Horizon 2020 programs and prospects for reducing these disparities in Horizon Europe. They also talked about funding scientific research from European, national funds, and initiatives supporting international cooperation with countries outside the EU.

Faculty of Agriculture and Bioengineering of the University of Life Sciences in Poznań awarded the Symbol of 2019

2019-12-09

The Faculty of Agriculture and Bioengineering at the University of Life Sciences in Poznań received the title of Symbol 2019 in the category: synergy of sci-

ence and business. The program has been run for 9 years by two independent newspaper supplements - „Market Monitor” distributed with „Dziennik Gazeta Prawna” and „Business Monitor” distributed with newspaper „Rzeczpospolita”. The awarded Symbols are an expression of appreciation of previous activities and achievements of companies and institutions that are characterized by the highest quality of management and initiatives. The award also serves to distinguish entities characterized by innovation, a strong position on the market and transforming their environment through intelligent mechanisms based on knowledge and competence.

Three students of the University of Wrocław win the Diamond Grant competition

2019-12-10

Students of the University of Wrocław Michał Stefańczyk, Tomasz Róžański and Jakub Mikrut have won the Diamond Grant competition organized by the Ministry of Science and Higher Education. The Diamond Grant is a program that gives the opportunity to implement their own research project to students of uniform Master's studies or graduates. It also allows students to shorten their scientific career path and undertake PhD studies without having a master's degree. Michał Stefańczyk received a grant for the study „Genesis of gender differences in disgust sensitivity”, Tomasz Róžański a grant for „Research on the stratification of elements in 3He chemically singular star atmospheres”, and Jakub Mikrut received a grant for „Comparison of geochemical evolution and petrology of mantle rife cells (massif Puke) and supersubduction (Kukesi massif) from Mirdita ophthalmite (N Albania). „

Association of Business Service Leaders recognises the University of Silesia in Katowice

2019-12-10

The University of Silesia in Katowice has been recognized by the Association of Business Service Leaders in Poland - the Association of Business Service Leaders (ABSL) for its contribution to the development of the modern business services sector in the last two years. ABSL is a leading organization representing modern business services in Poland. It cooperates with national and local government agencies and universities to improve the qualifications of people entering the labor market, and also to increase the investment attractiveness of Poland. As part of its activities, it awards distinctions to entities that contribute to the development of the potential of the modern business services sector. Awards in ten categories were granted during a meeting of the management of member companies. The university in Katowice has been recognized in the category of education leaders for cooperation with the modern business services sector, striving to develop the best education programs.

Promotion of the Warsaw School of Economics in the Financial Times ranking

2019-12-11

As every year, in December the Financial Times published a ranking of the top 95 business universities in Europe, which is a summary of last four rankings that were published last year. In 2019, Warsaw School of Economics (SGH) advanced from 71 to 69. This is the second promotion in a row. SGH achieved the highest growth of graduates wages in the entire ranking (122%). FT also praises the unique international offer of the Warsaw university. In the past year SGH took part in one ranking of FT studies - in September Master in Management, in which the field of management was ranked 58th in the world, and co-led by SGH CEMS MIM at 8th. In the December ranking of business schools, HEC Paris comes first, London Business School comes

second, and the Italian University of Bocconi comes third. More: <http://rankings.ft.com/businessschool-rankings/european-business-school-rankings-2019>

Santander Universidades launches its facility at the University of Szczecin

2019-12-11

The Santander Universidades, the largest program supporting higher education financed by a private company, has been opened at the Faculty of Economics, Finance and Management of the University of Szczecin. Santander Universidades is one of the key social engagement projects of Santander Bank Polska and the Santander Group. Only in 2018, the bank awarded 73,741 scholarships and grants worldwide. Universities participating in the program gain substantive and financial support for conferences, research and projects, both local and international, supporting entrepreneurial culture and innovation in the academic environment, internationalization of education through foreign scholarships, exchange programs and projects implemented in cooperation with the best universities from various countries, and student support in entering the labor market through internship programs and employing graduates.

Student of the University of Wrocław receives the Silver Medal of Chemistry

2019-12-11

Wojciech Stawski, a student of the Faculty of Chemistry of the University of Wrocław won the Silver Medal of Chemistry in a competition organized by the Institute of Physical Chemistry of the Polish Academy of Sciences. He kept the award for the work „Tetrafirine Hybrids (1.1.1.1) and Triphyrin (2.1.1) - Synthesis and Characterization” Triphyrins and tetrafirins belong to porphyrinoids (similar to hemoglobin or chlorophyll), some of which may be used in photocatalysis and photodynamic therapy, used for example in the treatment of cancer. The laureate is a graduate of bachelor's studies and a first-year student of chemistry. This year he

started his research at the University of Cambridge. In addition to the medal, he also received a cash prize of 5,000. PLN. The goal of the Gold Medal of Chemistry competition, organized in cooperation with DuPont, is to select the best undergraduate or engineering theses in the field of chemistry and its connection with physics and biology. More: <https://uni.wroc.pl/wojciech-stawski-zdobywca-srebrnego-medalu-chemii/>

Five scientists from the Poznań University of Technology win grants in the Miniatura 3 competition

2019-12-11

Poznań University of Technology researchers have won 5 grants in the Thumbnail competition of the 3rd National Science Center. The winners are Dr Beata Mądrecka from the Institute of Environmental Engineering for «Determination of the possibility of growth of antibiotic-resistant bacteria in biologically active carbon filters used in water purification processes», Dr Paweł Mendant from the Institute of Automatic Control, Robotics and Computer Engineering for «Application of graph theory methods to classify unbalanced data», Dr Eng. Łukasz Knyp-ński from the Institute of Electrical and Industrial Electronics for «Comprehensive optimization of synchronous motors with direct start», Dr Ziemowit Domański from the Institute of Mathematics for «Quantum mechanics in non-commutative spaces in terms of deformation quantization» and Dr Eng. Przemysław Głowacki from the Institute of Materials Research and Quantum Engineering for «Preliminary studies of the superfine structure in the manganese atom for applications in quantum metrology and engineering».

Kraków's universities to develop cooperation with research centers in the Czech Republic

2019-12-11

The National Agency for Academic Exchange (NAWA) has published the results of the recruitment in the framework of bilateral exchange of scientists between Poland and the Czech Republic. Funding was awarded to 17 of 62 formally correct applications. In this group, two projects will be carried out by scientists from the Jagiellonian University in Krakow, and its partner institutions will be Palacky University in Olomouc and the Institute of Organic Chemistry and Biochemistry of the Czech Academy of Sciences in Prague. Agricultural University of Hugo Kořáta in Krakow will be implement three projects jointly with Mendel University in Brno. The aim of the competition was to support the mobility of scientists to implement research projects agreed and carried out jointly by partners from Poland and the Czech Republic.

Silesian University of Technology awarded for the best educational programs

2019-12-11

The Silesian University of Technology was awarded by the Association of Business Service Leaders, an organization of employers and entrepreneurs. The award was granted in the 'Education leaders' category for providing best-in-class educational programs enabling further development of the sector. The Association of Business Service Leaders (ABSL) is an organization that sets standards and directions for the development of the industry, which already gives a job of around 300,000 people in Poland and taking into account a number of economic conditions that can become the largest source of employment in the private sector. The Association's mission is to develop the potential of the modern business services sector and continuous work, together with government agencies, local governments and universities to improve the qualifications of people entering the labor market and to ensure that Poland's investment attractiveness increases.

Internationalization Stars 2020

2019-12-13

Educational Foundation „Perspektywy” is inviting university staff to submit applications for the Environmental Award „Internationalization Stars 2020”. The mission of the Award is to select, reward and promote people, who have outstanding achievements in the internationalization of Polish universities. The competition is directed to employees of academic universities, their offices of foreign cooperation, promotion and recruitment departments, as well as dean's offices and other administrative units and management staff, including university authorities, who, through their work, commitment, achievements, experience and skills, shape the face of internationalization of Polish higher education. Collegium Civitas receives certificate Journey to Changemaker

2019-12-13

Collegium Civitas in Warsaw received the prestigious Journey to Changemaker certificate awarded by the international Ashoka organization. In this way, the university joined the largest network of „enterprising and socially engaged” universities, bringing together over 65 scientific and educational units from around the world. The Journey to Changemaker certificate is addressed to universities focused on global education, open to synergistic cooperation with other members of the network and working to ensure the highest educational standards, which in turn are reflected in the practical achievements of their graduates. -The positive result of the certification process has allowed us to join the group of universities from around the world associated with the #MillionsofChangemakers idea. We want to show our students the opportunities and areas that can influence positive changes in the world, and equip them with the necessary competences in this area, i.e. changemakers' skills. „- said Prof. Małgorzata Baran, Vice Rector for Strategic Development of Collegium Civitas.

Chinese minister of education awards the rector of the Jagiellonian University

2019-12-13

The Minister of Education of the People's Republic of China Tian Xuejun honored the rector of the Jagiellonian University (UJ) in Krakow Prof. Wojciech Nowak with the special award for his contribution to the creation and continuous support of the Jagiellonian University Chinese Language and Culture Center „the Confucius Institute in Krakow”. The ceremony took place during the International Chinese Language Education Conference. This year's conference was attended by representatives of all world Confucius Institutes and took place in Changsha - the capital of Hunan province. The Rector of the Jagiellonian University represented the oldest Polish university at the meeting of the Program Council of Confucius Institutes and as the only member of this body he was asked to deliver the prizes to representatives of outstanding units.

Gdańsk University of Technology receives HR Excellence in Research distinction for the for the next 3 years

2019-12-13

The European Commission has decided to maintain and extend the right of the Gdańsk University of Technology to use the HR Excellence in Research distinction for next three years. This means that the evaluators considered the implementation of the HR4R PG Strategy to be systematic and consistent with the description in the action plan and the activities themselves were found of high quality. Two years after obtaining the right to use the Logo HR, the team of assessors of the European Commission evaluated the mid-term activities of the university in the implementation of the principles of the Charter and the Code of the Scientist. The evaluators stated that the implementation of the action plan is ensured in a reliable, systematic and pro-quality way, and the HR Logo is presented on websites visibly. The team encouraged the University to continue its activities and further implement the principles of the European Charter for Researchers and the Code of Conduct for the Recruitment of Researchers, wishing success and updating the HR4R Strategy in 36 months.

Polish-German projects financed under the National Agency for Academic Exchange

2019-12-13

Two projects of scientists from the Nicolaus Copernicus University have received funding from the National Agency for Academic Exchange as part of a program of bilateral exchange of scientists between Poland and Germany. Thanks to the funding will be implemented the following projects: „Accurate Kohn-Sham methods for large molecules: utilization of a fragment-based optimized effective potential method”, which is the result of cooperation between Prof. Ireneusz Grabowski from the faculty of physics, astronomy and applied computer science, and Prof.

Andreas Hesselmann and Andreas Goerling from Lehrstuhl for Physikalische und Theoretische Chemie Universität Erlangen-Nürnberg and „New Topological Invariants in Multiparameter Bifurcation Theory”, which is the result of cooperation between Dr Robert Skiba from the mathematics and computer science department and Prof. Nils Waterstraat from Martin-Luther-Universität Halle-Wittenberg.

University of Warsaw signs agreements with the Camões Institute and Bank Millennium

2019-12-16

The University of Warsaw (UW) has signed agreements with the Camões Institute and Bank Millennium, allowing students of Iberian studies to receive scholarships for trips to Portuguese universities. «The University of Warsaw will provide its lecturers and students with opportunities to develop their knowledge of Portuguese language and culture, in particular by supporting student mobility.» This is one of the provisions of the cooperation agreement concluded between the University of Warsaw, the Camões Institute and Bank Millennium. The purpose of the agreements is to develop teaching Portuguese language and culture in Poland. Thanks to the cooperation of the signatories, the best students of Portuguese undergraduate studies at the Institute of Iberian and Ibero-American Studies of the University of Warsaw will get a chance to receive a scholarship that will allow them to participate in the courses organized by Portuguese universities.

Polish scientist joins the ESREA Main Board

2019-12-16

Dr Joanna Ostroch-Kamińska, Prof. of University of Warmia and Mazury in Olsztyn, was elected to the ESREA General Board for the term 2020-2022. She joined 11 other scientists representing universities in Sweden, England, Ireland, Portugal, Germany, the Czech Republic, Serbia, Finland, Italy and Cyprus. ESREA (European Society for Research on the Education of Adults) is an international scientific association of adult education researchers. Its purpose is to support international cooperation and

professional development of scientists by initiating activities in research networks and exchange of experience and the latest research results, as well as caring for the development of doctoral students for whom summer and winter schools are organized, and scholarships are awarded for participation in seminars and conferences.

Ministry of Science signs an agreement with the Institute of Human Sciences in Vienna

2019-12-17

Wojciech Maksymowicz, deputy minister of science and higher education, signed a cooperation agreement with the rector of the Institute of Human Sciences in Vienna, Prof. Shalini Randeria. On its basis, in the years 2020-2022, the Ministry of Science and Higher Education will transfer funds for scholarship programs for Polish scientists and mentoring workshops for applicants for European Research Council grants. Deputy Minister Maksymowicz emphasized, that the intention of the Ministry of Science is to popularize the projects of the Vienna Institute of Human Sciences in Poland. -That is why we decided to increase our financial participation in this idea, having in mind our young and ambitious Polish scientists. There are many scientific and research units in Poland (especially the Łukasiewicz Research Network), enterprises with R&D potential. I am sure that they can offer a lot to the institute - said deputy minister Maksymowicz. The Institute of Human Sciences (IWM) is an Austrian independent scientific unit in the field of humanities and social sciences.

Warsaw School of Economics becomes the best Polish economic university in the ‚Rzeczpospolita’ ranking

2019-12-17

The Warsaw School of Economics (SGH) for the fourth time took the first place in the ranking of economic universities of the Rzeczpospolita newspaper. The University of Warsaw is the leader in education related to economics (including finance, accounting and management) among non-economic universities. SGH is the clear leader in terms of the quality of teaching, as well as the careers of its graduates among the six compared in the ranking of economic universities. This year's runner-up is Poznań University of Economics (it took third place a year ago), while the University of Economics in Katowice won the third place. In the category of non-economic universities, the best economic studies are offered by the University of Warsaw, and Gdańsk University of Technology is the runner-up this year (it took the eighth position a year ago). The University of Lodz took third place (it was the fifth last year).

Become a digital Polish ambassador

2019-12-17

The National Agency for Academic Exchange (NAWA) is organizing a competition to select 15 students or graduates of Polish universities who would like to deal with the promotion of Poland by showing their own unique experience in dealing with Poles, Polish culture and Polish language. As NAWA informs, the role of the digital ambassador would include: - support Ready, Study, GO! Poland campaign operated by NAWA; - promotion of studies in Poland for foreigners, with particular regard to the country of origin; - regular preparation of NAWA and social media materials indicating why studying and living in Poland are attractive; - support in obtaining data and sources for publication (e.g. through interviews with other students); - participation in promotional films regarding studies in Poland. More: <https://nawa.gov.pl/nawa/aktualnosci/zostan-cyfrowym-ambasadorem-polski-z-nawa>

Students can apply for the Mazovian Youth University

2019-12-17

The Faculty of Economic Sciences of the University of Warsaw (UW) is providing the application process for the next „Mazovian Youth University” project. It is an initiative addressed to secondary school students, whose aim is to broaden knowledge about finance and entrepreneurship and to develop critical thinking skills. Mazovian Youth University is a 30-hour course. It consists of 3 modules: financial literacy (financial issues), entrepreneurship, critical thinking. Participation in the course is free for young people and participants will have accident insurance. Transport will be organized for students of schools located over 30 km away from Warsaw. The project is co-financed by the European Union. More: <https://www.wne.uw.edu.pl/pl/aktualnosci/pl-aktualnosci/projekt-mazowiecki-universytet-mlodziezowy/>

Delegation of Tsinghua University in Beijing visits the Lodz University of Technology

2019-12-17

On Monday, December 16, Lodz University of Technology was visited by a delegation from Tsinghua University in Beijing. As part of this visit to the Center for International Cooperation, the delegation met students and presented the opportunities to study at Tsinghua University. Tsinghua University in Beijing was founded in 1911 and is a unique university, connecting China and the Western world, antiquity and modernity, art and science. As one of the most prestigious universities in China. Tsinghua is involved in educating future leaders. Through education and research at the highest level, the university develops innovative solutions that help solve the most pressing problems in China and the world.

Silesian University of Technology to cooperate with the Mokate Group

2019-12-17

The Silesian University of Technology has signed a cooperation agreement with the Mokate Group. This is an example of the constant development of a network of contacts with the socio-economic environment. The company will use the expert knowledge of scientists - including expanding production activities. It will also be involved in educational and internship programs for university students. Effective cooperation with the economic environment includes organizing student apprenticeships and internships, job search assistance, as well as mediation in identifying university experts who can respond to outsourced research and consultancy assignments for companies. Cooperation agreements are also the basis for the activation of students who receive the unique opportunity to participate in joint ventures. Thus employers have better perspectives to engage them in practical aspects of educating potential future employees. More: <https://www.polsl.pl/Lists/AktualnosciUczelniane/PokazWiadomosc.aspx?WebPartTitle=ListaWiadomosci&Page=1&WebPartTitle2=Wiadomosc&Filter1Field2=Identifier&Filter1Value2=2983>

Adam Mickiewicz University in Poznan advanced in the Green Metric ranking

2019-12-17

University of Adam Mickiewicz in Poznan for the third time was assessed by the international World University ranking „Green Metric” and again proved to be the best of the Polish universities. The ranking included 780 high colleges from around the world. The University took 156th place. The ranking, in addition to educational programs and infrastructure investments, takes into account the issue of waste management, including toxic waste, solutions in the field of water and energy saving, space management, including green innovations, development of paths for pedestrians and cyclists on campuses. The strongest side of the Poznań university was the Morasko campus (54 place in the ranking) along with the current infrastructure such as retention tanks and green areas, as well as waste management policy on the campus (113 place). The leading group of «Green Metric» include the University of Wageningen, Oxford University, University of California Davis and the University of Nottingham. More: <https://amu.edu.pl/consciousosci/aktualnosci/pracownicy/uam-w-zielonym-rankingu>

University of Warsaw presented 5 priority research areas

2019-12-18

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin, as well as Anna Budzanowska, Deputy Minister of Science and Higher Education, met with the authorities of the University of Warsaw (UW), who won the „Initiative of Excellence - Research University” competition. During the meeting, the UW presented development plans for 5 priority research areas, which will be implemented within the competition. They include: - Research for Earth - an integrated multidisciplinary approach to identifying threats to the environment, biodiversity, climate and health, and searching for implementable solutions, - At the heart of the micro and macro world - searching for breakthrough innovations for the future: materials, energy sources and

technologies ensuring sustainable development, - Petabytes challenge - advanced mathematics and computer science tools in analyzing large data sets - from random processes on the stock exchange to medical diagnostics, - Expanding the borders of the humanities - humanities research crossing discipline boundaries, developing innovative tools and models, expanding understanding of the mind, language and culture, - In search of regional solutions for global challenges - multidisciplinary teams examining the consequences of increasing mobility, multi-dimensional inequalities and digital transformation.

Department of Applied Ecology of the University of Lodz receives the status of a UNESCO Chair

2019-12-18

Thanks to many years of international cooperation and significant achievements, especially in the field of Ecohydrology, as part of the UNESCO International Hydrological Program, the Department of Applied Ecology at the University of Lodz (UŁ) has obtained the status of a UNESCO Chair. The goal of the prestigious network of UNESCO Chairs is to support knowledge exchange, research, training and inter-university cooperation as well as to promote academic solidarity in the world. -Obtaining the status of a UNESCO Chair is a unique distinction in the international arena, which puts our Chair in a prestigious group of entities closely cooperating with this organization. The UNESCO Chair implements innovative scientific research and education programs, and cooperates in projects related to the optimization of water resources and adaptation to climate change - said Prof. Maciej Zalewski, head of the Department of Applied Ecology, University of Lodz.

National Science Center to launch new competitions for young scientists

2019-12-18

The National Science Center (NCN) announced the process of applications for the fourth time within the SONATINA competition, and for the eighth time in the ETIUDA competition. Polish scientists will be able to apply for funding for research projects and doctoral scholarships. The total budget of both competitions is PLN 30 million. SONATINA 4 is a competition for people with a PhD title who have obtained it up to 3 years before the year of submitting the application, or who will be awarded it by the end of June 2020. The aim of the competition is to enable the employment of young researchers in Polish scientific units. On the other hand, ETIUDA 8 is a competition aimed at people who only start their scientific careers are doctoral students at the Polish universities authorized to offer doctoral titles. Young researchers may receive a scholarship of PLN 5,000 per month for a period of 6 to 12 months.

Faculty of Electrical Engineering of the Wrocław University of Science and Technology receives the scientific category A

2019-12-18

The Ministry of Science and Higher Education awarded the Faculty of Electrical Engineering of Wrocław University of Science and Technology with a scientific category A. The process of obtaining this grade took over two years. In November 2017, the Ministry of Science and Higher Education awarded the faculty category B with 15 points were missing for grade A. The department appealed against this decision in December 2017. The ministry upheld the first verdict, recognizing only part of the department's arguments. In the opinion of the department's authorities, the department failed to assess due procedural and substantive diligence, and therefore it was decided to file a complaint to the Provincial Administrative Court in Warsaw. The court overruled the ministry's decision, and the ministry finally awarded the faculty the A science category. This has an impact on the amount of subsidies for the university and the unit itself, but above all it influences on its prestige and the possibility of applying for specific grants or conducting implementation doctorates. More: <https://pwr.edu.pl/uczelnia/aktualnosci/wydzial-elektryczny-w-kategorii-a-11435.html>

University of Opole signs contract with the European FORTHEM consortium

2019-12-18

The University of Opole has signed a partnership agreement with the European FORTHEM consortium. It includes Johannes Gutenberg Universität Mainz (Germany), Université de Bourgogne (France), Jyväskylän yliopisto (Finland), Università degli Studi di Palermo (Italy), Latvijas Universitāte (Latvia), Universitat de València (Spain). - Belonging to the European University network, participation in the FORTHEM consortium is a great job, but also a great prestige for our university, a prestige that obliges. I am glad that our employees from the Faculty of Po-

litical Science and Social Communication managed to obtain such an important and prestigious grant - says the rector of the Opole University, Prof. Marek Masnyk. Project activities under the consortium include students and employees mobility, as well as co-creation with partners of a consortium of seven multidisciplinary research laboratories (FORTHEM Labs), in which students, employees and experts are main participants. More: <http://www.uni.opole.pl/page/3212/umowanipartnerow-europejskiego-konсорсјum-forthem-podpisana-film>

Professor Wrochna became the deputy minister of science and higher education

2019-12-19

On December 16 Professor Grzegorz Wrochna was appointed by the Prime Minister Mateusz Morawiecki as the Undersecretary of State in the Ministry of Science. The new deputy minister is a professor of physical sciences. In the years 1986–1991 he worked at the Faculty of Physics of the University of Warsaw, cooperated with the DESY centers in Hamburg and CERN in Geneva. In 1991–1998 at CERN he participated in the design and construction of the CMS experiment at the LHC Large Hadron Collider. From 1999 he worked at the Institute for Nuclear Studies, and from 2006 he was its director. He is one of the initiators of the establishment of the National Center for Nuclear Research in 2011 and its director until 2015.

Student of the University of Life Sciences in Poznań to receive Diamond Grant

2019-12-19

Klaudia Szala, a student at the Faculty of Veterinary Medicine and Animal Sciences of the Poznań University of Life Sciences, becomes a laureate of the Diamond Grant competition organized by the Ministry of Science and Higher Education. Thanks to the grant, a Poznań student will implement the project „The role of pigmentation of egg shells in sexual selection: is the intensity of pigmentation an indicator of the condition of the female and affects the

amount of male parental investment? (on the example of red-backed shrike *Lanius collurio*)”. Winners of the competition will receive up to 220 thousand PLN for their research. They will be able to receive a salary of up to PLN 2,500 per month for a period of 24 to 48 months. In addition, they can apply for a doctorate without completing a master's thesis. Candidates must find a supervisor and the institution in which they will implement their project.

University of Silesia joins the project „WORK for JOB - through work experience”

2019-12-19

The Poviāt Labor Office in Tychy together with the Institute of Sociology of the University of Silesia implemented the project „WORK for JOB - through work placement”. Students took part in the internship, in which they conducted social research, and the results obtained in this way became the inspiration to introduce some innovations in the office. The students' task was to design social research on issues agreed with specialists from the employment office. Working in three teams of three students, they analyzed the situation of young people and foreigners on the local labor market, as well as evaluated the effectiveness of subsidies granted for starting a business. Completed qualitative and quantitative researches had practically useful dimensions. They enabled to check the effectiveness of actions taken by the Tychy labor office, aimed at professional activation of both the unemployed and job seekers. More: <https://us.edu.pl/studenci-socjologii-dla-urzedu-pracy-w-tychach/>

University of Warsaw project receives international funding from the JPco-fuND 2 program

2019-12-20

The „OligoFIT” project, managed by Dr Piotr Hańczyc from the Faculty of Physics of the University of Warsaw (UW), received funding under the international program JPco-fuND 2. The JPND network finances research in the field of precision medicine in neurodegenerative diseases. This time, it awarded 18 out of 180 applications. EU Joint Programme - Neurodegenerative Disease Research (JPND) is an international undertaking aimed at supporting research on neurodegenerative diseases. First of all, its initiators strive to improve work on analyzing the causes and discovering methods for early recognition of symptoms of Parkinson's, Huntington's or Alzheimer's diseases. It is also important to develop appropriate forms of therapy for the affected patients. One of the activities undertaken by JPND is the organization of competitions for the implementation of international research projects prepared by teams of scientists from at least three countries-members of the network.

New application allows to check online recognition of foreign diplomas in Poland

2019-12-20

The National Agency for Academic Exchange (NAWA) has prepared a „Qualifier”, a new electronic tool that allows users to automatically check general information about selected types of university diplomas obtained abroad. The qualifier allows to find out about the level and status of foreign qualifications in the country of their issuing and to find out how a given diploma or title is recognized in Poland. It also indicates the specific legal basis for rights of the diploma holders. Users of the new tool can save recognition statements as a PDF document. The reliability of information is guaranteed by the NAWA electronic signature. The tool is available in Polish and English. More: <https://kwalifikator.nawa.gov.pl/>

University of Silesia joins the „European Universities” program

2019-12-20

The University of Silesia in Katowice is participating in the second competition for the selection of European Universities - consortiums of higher education institutions from the European Union, implementing a joint long-term strategy and promoting European values and identity. The university consortium, with the participation of the University of Silesia, consists of: Universität des Saarlandes - Germany (project coordinator), Universidad de Alicante - Spain, Università degli Studi di Trieste - Italy, Vytauto Didžiojo universitetas (University of Vytautas the Great) - Lithuania, Sofia University St. Clement of Ohrid - Bulgaria and the Estonian Academy of Fine Arts. European Universities is a flagship initiative of the European Education Area to create joint inter-university campuses. The high colleges are to combine their expertise, platforms and resources to develop joint curricula or modules covering different disciplines. <https://us.edu.pl/universytet-slaski-w-programie-universytetow-europejskich/>

Graduate of the West Pomeranian University of Technology receives a Diamond Grant

2019-12-20

Eng. Aleksander Jan Albrecht, a graduate of the Faculty of Chemical Technology and Engineering of the West Pomeranian University of Technology, received the „Diamond Grant” for the implementation of his first independent research project. The laureate received 220 thousand PLN for the implementation of phase transformation studies of nanocrystalline iron nitrides with a specific size of crystallites, which will be implemented at the Department of Inorganic Chemical Technology and Environmental Engineering of the faculty of technology and engineering of the Szczecin University. The organizer of the Diamond Grant competition is the Ministry of Science and Higher Education. The winners were selected from 243 applicants in a two-stage competition pro-

cedure. During the implementation of the project, the winners will receive up to PLN 2,500 per month. More: <https://www.zut.edu.pl/zut-strona-glowna/informacje-biezace/article/absolwent-nanotechnologii-z-diamentowym-grantem-od-ministra.html>

University of Economics in Katowice comes 3rd in the Rzeczpospolita ranking

2019-12-20

The University of Economics in Katowice took the 3rd place in the country in the 4th ranking of „Rzeczpospolita” economic universities, rising by one position compared to last year. The jury of the ranking compared the results obtained by universities in terms of teaching quality, internationalization, scientific potential and graduates' careers. The ranking is based on data from the Integrated Information System on Higher Education and Science and from a nationwide system for monitoring the economic fate of university graduates. It compared six universities that could conduct full three-cycle economic studies. - The promotion in the ranking is the result of our hard work to increase the prestige of studies at the University of Economics in Katowice. We are constantly increasing the requirements for candidates and students and we put special emphasis on the quality of education - says the rector, Dr Robert Tomanek, Prof. of University of Economics in Katowice. More: https://www.ue.katowice.pl/no_cache/uczelnia/aktualnosci/article/ue-katowice-na-podium.html

National Agency for Academic Exchange to launch the Łukasiewicz Program and the Poland My First Choice Program

2019-12-23

National Agency for Academic Exchange (NAWA) with the deputy minister of science Prof. Wojciech Maksymowicz and deputy foreign minister Paweł Jabłoński, inaugurated the activities of two of its programs for foreigners: the Łukasiewicz Program and the Poland My First Choice Program. The event was participated by more than 100 this year's scholarship holders from sub-Saharan Africa, Latin America, Asia and Europe. During the inauguration, participants listened to the lecture «Diving with robots - interdisciplinarity of modern science», which was delivered by Dr Tomasz Łuczyński from the University of Heriot-Watt in Great Britain. The scholarship holders had the opportunity to get to know each other, exchange their first experiences in Poland, talk to the Program coordinators and participate in the workshops.

Professor Lipowski becomes honorary professor of Ningbo University

2019-12-23

Professor Janusz Lipkowski of the Institute of Chemical Sciences of the Cardinal Stefan Wyszyński University (UKSW) in Warsaw became an honorary professor at the University of Ningbo in China. Professor Janusz Lipkowski specializes in supramolecular chemistry. He is a member of the Polish Academy of Sciences, and since 2001 he delivers also lectures at UKSW. In November and December this year, Professor Lipkowski participated in the conference «2019 China (Ningbo) International Forum on Advanced Materials and Commercialization» organized by the University of Technology in Ningbo in China. The university is one of the leading innovation-oriented institutions in China.

Academy of Fine Arts in Wrocław gives up plastic disposables

2019-12-23

The Rector of the Academy of Fine Arts in Wrocław signed an order prohibiting the use of single-use items made of plastic at the university and promoting an ecological lifestyle. The ordinance eliminates the use of disposable plates, cutlery, cups, stirrers, sticks, straws and food containers made of plastics, and requires that they should be replaced with reusable counterparts or disposable compostable or biodegradable products. The new rules that have come into force include also promoting an ecological lifestyle, drinking tap water, buying drinks in returnable or reusable bottles, and using university promotion materials that can be fully recycled by the university and complete giving plastic objects up. More: <https://www.asp.wroc.pl/?module=News&controller=Read&action=news&id=13013>

Poznań University of Economics to modernize its Collegium Altum

2019-12-23

Poznań University of Economics has signed a contract for the modernization of energy system of Collegium Altum. Due to the shape of the building, but also because of its unusual technological solutions, reconstruction is very expensive and extremely difficult to maintain. The investment is aimed at improving work safety, but also at implementing a number of additional benefits - including improving work comfort through more efficient ventilation ensuring standard air exchange and better lighting with modern LED lamps will ensure even light distribution, a more stable room temperature in summer and winter. The total cost of the investment will amount to almost PLN 41 million and works will start in January 2020. During the works, asbestos cement panels will be also removed from the building. The university took care of meeting all required standards working with asbestos-containing materials and provided additional security measures. More: <https://ue.poznan.pl/pl/aktualnosci,c16/aktualnosci,c15/podpisanie-umowy-na-modernizacje-collegium-altum,a91529.html>

Wrocław University of Environmental and Life Sciences to promote its offer in Central and Eastern Europe

2019-12-23

Thanks to funding from the National Agency for Academic Exchange, the Wrocław University of Environmental and Life Sciences, together with the Wrocław Agglomeration Development Agency (ARAW) will promote its study offer in the countries of Central and Eastern Europe. The University will create biology and chemistry e-learning courses for candidates from abroad who want to study in Polish. These courses will allow candidates to train a specialized language in the field of science, which will help students in the first months of study. The courses will be made available to Polish community centers, schools and Polish language teachers from the university and ARAW Agency. They will be promoted by the animation program «7 Wonderful Naturalists», presenting seven leading directions of the Wrocław University of Environmental and Life Sciences, which are the most popular among foreign candidates.

Employees of the University of Economics in Katowice join the Fact-checking project

2019-12-23

Employees of the College of Computer Science and Communication of the University of Economics in Katowice implement the international project „European cooperation project on disinformation and fact-checking training. Empowering current and future media and media education professionals, to identify, prevent, and combat fake news spread over digital networks” (Fact -checking). The goal is to design and develop a study program in the field of fake news. The program is addressed to secondary school pupils, students and academic teachers conducting classes in media education and the use of computer science in the analysis of social media. The coordinating institution is Universidade Nova de Lisboa (Portugal). Other partners include Université Sorbonne Nouvelle - Paris 3 (France), Lapland University (Finland), National and Kapodistrian University of Athens (Greece), Leiden University (Netherlands) and ATC Media and fact-checking platform development company (Greece).

University of Zielona Góra to expand its cooperation with Chongqing Normal University

2019-12-23

The University of Zielona Góra (UZ) is expanding its cooperation with the Chinese Chongqing Normal University (CNU). Representatives of both universities have signed an annex to the current cooperation agreement. It will allow to develop cooperation between the faculty of physics and astronomy of UZ and the School of Physics and Electronic Engineering CNU. The annex provides for an exchange of up to 50 students at undergraduate and graduate studies, specifies the duration of studies at both institutions and the requirements necessary to obtain a double diploma. The basic agreement between the University of Zielona Góra and Chongqing Normal University was signed in May 2018 and provides for the development of scientific contacts and cooperation between universities, exchange of students at

all levels of studies, organization of joint conferences and seminars, participation of both universities in project implementation and joint publications.

Foundation for Polish Science awarded away scholarships

2019-12-24

The Foundation for Polish Science (FNP) offered the academic scholarship for the MISTRZ laureates with in seventh competition. The scholarship may sponsor a trip to a prestigious foreign scientific center in order to conduct research work. The winners of this year's competition are: Bronisław Marciniak from the Faculty of Chemistry of the University of Adam Mickiewicz in Poznań, who received a scholarship of USD 5,500 per month for a 4-month trip to the University of Notre Dame in the USA; Wojciech Balus from the Faculty of History of the Jagiellonian University in Krakow, who received a scholarship of EUR 5,000 per month for a 3-month trip to the Zentralinstitut für Kunstgeschichte, Munich in Germany; Marek Domański from the Faculty of Electronics and Telecommunications, Poznan University of Technology, who received a scholarship of USD 5,500 per month for a 3-month trip to Nagoya University in Japan.

Award of the Minister of Foreign Affairs for the best master's thesis in contemporary international relations

2019-12-27

-The competition for the best master's thesis in the field of contemporary international relations has been completed. I am glad that the subject of the work refers to current events in foreign policy - said Minister of Foreign Affairs Jacek Czaputowicz. The assessment of master's theses defended in 2019 was made by the Award Committee appointed by the Minister of Foreign Affairs, chaired by Artur Harazim, the Director of the Diplomatic Academy. Monika de Silva received the first award for her master's thesis: «How Does Law Protect Religion in War? International Protection of Freedom of Reli-

gion in Armed Conflicts ”, written at the Faculty of Law and Administration of the University of Warsaw. The second prize was received by Iwo Gurdek for his master's thesis: «Directions of Polish foreign policy in the information of the Ministry of Foreign Affairs in the years 1990-2019”, written at the Institute of Political Sciences and International Relations at the Faculty of International and Political Studies of the Jagiellonian University.

National Agency for Academic Exchange completed Bekker Program

2019-12-27

The National Agency for Academic Exchange (NAWA) informs that the second call for proposals within the Bekker Program has been completed. Scholarships covering the costs of staying in renowned research centers abroad will be received by 126 best applicants. The applications selected for funding include the researchers in natural sciences (43), social sciences (29) and engineering and technical sciences (28). 13 scientists will implement projects in the medical sciences and also 13 in the humanities. The most popular destinations are the United States (29), United Kingdom (16), Germany (15), France (7) and the Netherlands (7). The aim of the Program is to support scientists and academic teachers employed in Polish universities and research units to master their scientific results and undergo a post-doctoral internship, conduct scientific research or obtain materials for scientific work in renowned foreign centers on a scholarship basis. More: <https://nawa.gov.pl/images/users/629/Lista-rankingowa-Bekker-2019.pdf>

Minister of Science and Higher Education to award scholarships for significant scientific, artistic or sports achievements

2019-12-27

Almost 500 people will receive scholarships from the Minister of Science and Higher Education for significant scientific, artistic or sports achievements. Students from all over Poland were evaluated by a team of experts representing various fields of science and art. Awarded students will receive PLN 17,000 each. The rectors provided the minister with 1,106 applications for a ministerial scholarship for significant achievements for the academic year 2019/2020. The applications were evaluated by the Advisory Jury to Evaluate Applications for Grants from the ministries of higher education and science. Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin decided to award 488 scholarships to students. Most scholarships were received by students of the Jagiellonian University - 106, University of Warsaw - 58, Wrocław University of Science and Technology - 40 and the Nicolaus Copernicus University in Toruń - 33.

National Academic Exchange Agency to launch Competition „Digital Ambassador of Poland”

2019-12-27

The National Academic Exchange Agency is launching the „Digital Ambassador of Poland” competition. The goal is to promote Poland, individual academic cities and universities by foreign students and graduates of Polish universities. The role of the digital ambassador is to support: program Ready, Study, GO! Poland, promotion of studies in Poland among foreigners, regular preparation of materials indicating why studies and life in Poland are attractive, obtaining materials and sources for publication, and participation in promotional films regarding studies in Poland. The organizers are looking for people who study at Polish universities and who would like

to promote Poland by showing their own unique experiences in dealing with Poles, Polish culture and Polish language. They offer includes training on copywriting, running social media and blogs and the opportunity to participate in educational events and fairs in Poland and abroad.

Medical University of Gdańsk accesses an innovative bone examination method

2019-12-27

The Medical University of Gdansk, as the first center in Poland and one of the few in the world, will gain access to microindentation, an innovative method of bone examination. Researchers at the Department of Nephrology, Transplantology and Internal Diseases - Dr Magdalena Jankowska and Dr Bogdan Biedunkiewicz - completed a certified training in the application of Osteoprobe Active Life Scientific, USA technology at the European reference center of the University of Barcelona. Microindentation is currently the only minimally invasive method of assessing bone material strength, possible to be used in humans and giving knowledge about bone quality, not available before. The assessment of the bone strength allows for fracture risk evaluation and has been used so far in scientific research in the endocrinology, rheumatology and oncology.

Collegium Civitas to offer transcripts in the competition for secondary school graduates

2019-12-30

Concilium Civitas is inviting this year's secondary school graduates to participate in the contest, where they can write and submit an essay, article or reportage on the topic ‚I, Poland, Europe, World - 2040'. The prizes include transcripts for a selected field of study at Collegium Civitas in Warsaw. Concilium Civitas is a group of Polish social science professors of Collegium Civitas also working at leading foreign universities. They decided to find out what future is expected by young Poles and announced a competition for an essay, article or report on

the subject «I, Poland, Europe, World - 2040». The deadline for submitting competition entries is 15 January 2020. The competition is organized by the Collegium Civitas Foundation and the Polish Teachers Association.

Koszalin University of Technology to launch experimental room for students

2019-12-30

Design and Interior Architecture students of the Koszalin University of Technology can now use the new, experimental Room M8 under the „Island” project implemented at the university for over a year. The idea of the project implemented with the participation of second-year MA students in Interior Design is to create a multifunctional, useful facility, tailored to the needs of students, providing comfort in a «brutal post-industrial environment». M8 is a spacious room, divided into five zones, which are used for individual work with laptops, group work, resting, preparing a meal and storing. The hall has an industrial character, but is at the same time it has an open, cozy, warm, atmospheric and artistically developed interior. The opening of the Hall is beginning the testing phase of the new space. The final results of the «Island» project will be presented during the Gdynia Design Days 2020 festival.

Dr Genoveffa Franchini receives an honorary doctorate of the Medical University of Bialystok

2019-12-31

The Senate of the Medical University of Bialystok (UMB) awarded Dr Genoveffa Franchini from the National Cancer Institute in the USA an honorary doctorate. Dr Genoveffa Franchini is a world-renowned authority in the field of virology and a pioneer in the study of oncogenes and human retroviruses. The aim of her research is to prevent and treat diseases caused by pathogenic human retroviruses. Since 1997, Dr Franchini has been managing the Animal Models and Retroviral Vaccines Section laboratory at the National Cancer Institute (NCI) belonging to the National Institutes of Health (NIH) in the US. Dr Franchini conducts constant scientific cooperation with many centers in the USA, Europe and South America, including cooperation with the Medical University of Bialystok for over 20 years.

State Higher Vocational School in Chełm to receive new aircrafts

2019-12-31

The Aviation Center of the State Higher Vocational School (PWSZ) in Chełm has received new three aircrafts for future trainings. The university fleet has been enhanced by two new AT-3 aircrafts and the twin-engine Tecnam P2006, a second-generation aircraft with retractable landing gear, equipped with an autopilot, modern avionics and all systems currently used in aircraft - informed the Rector of the PWSZ in Chełm, Dr Eng. Arkadiusz Tofil, Prof. of PWSZ in Chełm. The PWSZ Aviation Center in Deputycze Królewskie has nearly 18 aircrafts, of which 12 are the property of the university. Money for the purchase of new aircrafts is received mainly from the Ministry of Science and Higher Education. In September, the construction of a concrete runway began at the PWSZ airport. It will have a huge impact on the training possibilities of the university, because the new aviation infrastructure will extend the time of using the airport by students, as well as it will enable the landing of larger machines.

Smart Charge - intelligent electromobility

2018-02-01

Designing an optimal system for charging electric vehicles nationwide will be the main task for the participants of the hackathon „Smart Charge - intelligent electromobility“. During the competition, programmers and IT students will launch their own applications on special supercomputers. The event will be held on 15 - 16 February 2018 in Warsaw.

Designing a network of charging stations for e-vehicles is definitely more difficult than solutions for gas stations, where the refueling time is short, the increase of its capacity is relatively easy to implement, and the demand is easy to predict. Restrictions of the distribution network are an important factor, influencing the design and location of the charging station. Here you will find more information: <http://akademia.icm.edu.pl/szkolenia/hackathon-wielkie-wyzwania-programistyczne-edycja-ii-smart-charge-inteligentna-ekonomobilnosc/>

Robot plays the piano, AGH student plays the violin

2018-02-01

Wojciech Światała, a student of Automation and Robotics at the AGH University of Science and Technology in Krakow, programmed the Mitsubishi RV-2F-D industrial robot to play the piano.

He graduated from the music school and decided to combine his two passions - music and robotics. Robot with a graceful nickname Staszek is linked to a specially written computer software. The student can play the instrument using the robot. In addition, Staszek can remember the melody played, saving it to a file that can be replayed at any time. The program allows the robot to play with two fingers, hitting a cymbal and making its bow. The playing device of the robot has been printed in 3D technology. See how Wojciech Światała and the robot Staszek perform the Polish carol:

Agreement on cooperation between NCBR and NCN

2018-02-02

The National Center for Research and Development and the National Science Center have signed a cooperation agreement that aims to release the potential of Polish science. The cooperation between NCBR and NCN offers better development opportunities for Polish scientists, also in terms of TANGO program, financed by NCRD with PLN 40 million. The aim of the TANGO program is to join basic, applied and industrial research, which will create new opportunities to use the effects of researchers' work in practice. There are no thematic restrictions and that allows to implement projects from various fields. - We use all available means to ensure the best possible conditions for conducting, both basic and applied research. The agreement signed today by the NCRD and the NCN is another step in the improvement of support mechanisms that Polish science and the economy will benefit from - said Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. The largest smog cleaner in the world will be erected in Krakow

2018-02-02

The Smog Free Tower will be located in the Jordan's park in Kraków. The 7 meter high tower uses patented ionization technology to purify the air.

The installation is equipped with environmentally friendly technology that allows to filter 30 thousand m³ of air per hour, using less electricity than the water boiler. The effectiveness of the tower has been confirmed by the Eindhoven University of Technology. The author of the project is a Dutchman Daan Roosegaard. The construction of Smog Free Tower in Poland was initiated by ING Bank Śląski. The tower is to be activated in mid-February and it will remain in Krakow for two months. Watch the video material about this event: <https://youtu.be/3UhQG1pForw>

Burning garbage in a furnace - watch out for the drone

2018-02-05

A new drone appeared over Katowice and Gliwice cities. It became a curse for all who illegally burn garbage in the furnace, poisoning the air over Silesia Region.

The machine was built by the Flytronic company and it is equipped with the FlyEye observation system and pollution detection software from the Institute for Chemical Processing of Coal. The drone sensors analyze the chemical composition of fumes from chimneys from single- and multi-family houses. The laser counter of airborne particulate matter records the concentration of ethanol, ammonia, hydrogen chloride, formaldehyde and PM10, PM2,5 or PM1. Cheap and comfortable homes for families

2018-02-06

Students will design single-family houses (2 + 3) for small and medium-sized municipalities within the program Mieszkanie Plus (Flat Plus). The competition was inaugurated in Warsaw with the participation of Jarosław Gowin, deputy Prime Minister, Minister of Science and Higher Education. Previously, students presented proposals for urban multi-family houses. The Mieszkanie plus program will increase the availability of cheap apartments for rent with the option of gradual purchasing the property. It is addressed to the less-wealthy people. The pilot constructions of 1,700 first «flats plus» have begun in Biała Podlaska, Wałbrzych, Gdynia, Warsaw, Kępno and Katowice.

Scientific photos wanted

2018-02-06

Foundation for Polish Science is looking for interesting, intriguing photos and illustrations depicting the subject of research and showing the beauty of science.

The Foundation intends to use the best photos in promotional materials (along with information about the author of the study and his work). The person providing the photo must own proprietary copyrights to it. Pictures in printable resolution, grouped in files with extension * .jpg, * .tiff or * .eps. can be sent to: elzbieta.marczuk@fnp.org.pl by 28 February this year.

Agreement „Silesia under the blue sky” enters the implementation phase

2018-02-06

Local administration of Silesia Region has prepared a short online survey to identify the preferences and needs of companies regarding research and development related to anti-smog technologies. The results are to be helpful in implementing the agreement signed on January 22, 2018 «Silesia under the blue sky» between the Silesian Region and the National Center for Research and Development. Companies may obtain the co-financing of their projects in the fields of energy, environment, IT, transport or medicine. The survey is available at the address:

Consolidation of ICT facilities

2018-02-06

The Institute of Mathematical Machines, the oldest Polish IT institution for research and development of computer systems has merged with the NASK National Research Institute in Warsaw, supervised by the Ministry of Digitization.

As a result of integration, a new strong organization has been created for providing the Ministry's program Digital Poland, in particular for the development of digital education and research on methodology of biometric and electronic signatures. They are particularly important in state and public safety policies. The merger will also enable the development of works on BigData, IoT and digital robotics. Program PYTHIA at Warsaw Military University of Technology

2018-02-07

The Institute of Optoelectronics of the Military University of Technology began in February works within the PYTHIA research program, a strategic project of the European Defense Agency. The military science and research facility is part of an international consortium headed by Italian Engineering Ingegneria Informatica, which won the EU bid contest. PYTHIA's task is to prepare intelligent tools for forecasting and assessing trends in the development of technologies that are of strategic importance for the defense of EU countries. The EU PYTHIA will automatically collect information from various public sources, e.g. patents databases, scientific publications, prototype descriptions. They will be processed with using analysis techniques dedicated for large data sets. More: <http://www.wat.edu.pl/?p=14536>

Szczecin Maritime Science Center is established

2018-02-07

It will be a multimedia science and education institution for children and young people interested in the sea, maritime science and technologies as well as in maritime economy and traditions of Szczecin and its region. A ship's hull-shaped building will be constructed on the Oder river, in the city center, on the Łasztownia island. The Center will be built by 2021, at a cost of over PLN 80 million from the EU Regional Operational Program for the West Pomeranian Region with participation of regional budget (kp) More: <http://naukawpolsce.pap.pl/aktualnosci/news%2C28123%2Cszczecin-powstaje-...>

Third Congress of Health Challenges in March

2018-02-07

- Will the progress in science replace once oncology doctors with technologies? This is a somewhat provocative question, but we should talk about it - says Prof. Krzysztof Skłodowski, director of the Oncology Center in the Maria Skłodowska-Curie Institute in Gliwice, who takes part in the Scientific Council preparing the 3rd Congress of Health Challenges. The 3rd Health Challenges Congress (HCC 2018) will be held in Katowice on March 8-10. It will be devoted to the emergence and practical implementation of new medical technologies. During the Congress session, speakers and guests will talk about start-ups in medicine, about innovative glaucoma surgery or models of cooperation between science, the state and industry. More about the Congress:

<http://www.hccongress.pl/pl/>

Research centers for cancer and quantum technologies planned in Gdańsk and Warsaw

2018-02-07

The Foundation for Polish Science has transferred over PLN 109 million for research in three international science centers planned in Gdańsk and Warsaw. The International Center for the Theory of Quantum Technologies will be established at the University of Gdańsk. Research will include the use of quantum technologies in computers. Its foreign partner is the Institute of Quantum Optics and Quantum Informatics (IQOQI) of the Austrian Academy of Sciences. Scientists from Prof. Konrad Banaszek's Center in Warsaw will develop quantum optical technologies. They cooperate with the Oxford University. The Cancer Research Center will be set up in Gdańsk and it will be run by Prof. Jan Dumański from the University of Uppsala (Sweden) and Dr Arkadiusz Piotrowski from the Medical University of Gdańsk. (Kp)

Government plans to reduce CIT for innovative entrepreneurs

2018-02-07

- We want the government to release the proposal of «innovation box» by the end of the first quarter. It will be a tax incentive that will allow to lower significantly CIT tax for companies successfully commercializing their research and development - said Minister of Enterprise and Technology Jadwiga Emilewicz. The government proposes to lower CIT to 4 percent, if the entrepreneur patented or worked out a new technology or a service and started to sell it with taxable income. Polish startups receive public and private money

2018-02-08

In 2017, money from the programs of the Polish Agency for Enterprise Development were transferred to 103 Polish start-ups and innovative companies. Investments amounted to approx. PLN 80 million. Particular subsidies should have not surpassed PLN 800,000. Such support is provided also from acceleration programs and incubators run by Polish private sector companies. For example mBank allocated 50 million euros to the mAccelerator venture capital fund last year. It financed the software Robotic Process Automation (RPA) development projects for banks and companies from the financial sector. This is the first such project in Poland and in Central and Eastern Europe.

Conference of innovative start-ups in Warsaw

2018-02-08

On September 9-11, 2018, the seventh Wolves Summit - an international conference for startups, investors and corporate representatives will take place in Warsaw. The conference will be attended by 2,500 guests from over 60 countries, including 400 promising startups. Over 300 investors and 450 representatives of corporations are expected. - We will focus on hardware, Internet of Things, fintech and blockchain - emphasized Piotr Piasek, co-founder of Wolves Summit. Direct meetings of participants and experts will be viral. Before the event begins, they can arrange 15-minute talks to establish business contacts, get information on innovative projects and technologies worth investing their time and money. (Kp) More: <https://www.wolvessummit.com/pl>

Individual grant from the European Commission for Gdańsk scientists

2018-02-08

The project „Dating fossils with use of molecular data - an innovative approach to determining the age of Baltic amber” (AMBER) has received an individual grant from the European Commission for scientists - MSCA Individual Fellowships. Individual grants are awarded to researchers who have more than 4 years of experience in research or a PhD. The project was implemented by Dr Dagmara Żyła under the supervision of Dr Tracy Heath from the Iowa State University of Science and Technology and Dr Jacek Szewdo, Prof. of University of Gdańsk. The main assumption of the AMBER project is to develop a new method of accurate dating of fossil species preserved in Baltic amber. The project will run from September 1, 2018 to August 31, 2020 with its budget of EUR 147,000.

Polish nature reserve with a research station in Colombia

2018-02-08

The „Polish” reserve is to occupy an area of approximately 30 hectares and will be located on the eastern side of the Andes, approximately 30 km in a straight line from the Amazon Forest.

The initiators of the reserve are Dr Marta Kolanowska from the University of Gdańsk and Dr Radomir Jaskuła from the Faculty of Biology and Environmental Protection of the University of Lodz.

In January 2017, the Institute for Biodiversity Research was established. It is a non-profit foundation to collect money for a plot of tropical forest and to set up a research station through voluntary contributions from people who are close to nature especially such exceptional places as rain forests. More: <https://www.uni.lodz.pl/aktualnosc/szczegoly/polski-rezerwat-przyrody-ze...>

What determines healthy old age?

2018-02-08

Aging processes only in 25 percent depend on genes. Lifestyle plays the major role – stated participants of the third National Dietary Congress in Warsaw. Experts from the Institute of Food and Nutrition presented the Pyramid of Healthy Nutrition and Physical Activity modified for seniors, and prepared in this scientific and research institution. At an advanced age, health can be maintained thanks to proper nutrition and physical activity as well as quick detection of threats resulting from diseases or limited efficiency of the organism. There are 6 million people in Poland over the age of 65 in Poland now and in 20 years there will be 9 million. Poles live longer due to changing eating habits - they eat much more vegetable fats, fruit and vegetables. (Kp) http://www.rynekseniora.pl/zdrowie/116/eksperci_starzenie_tylko_w_25_pro...

Smartphones help the disabled to learn Eastern languages

2018-02-09

The Eastern Languages School of the Faculty of Oriental Studies of the University of Warsaw has created an application for smartphones, facilitating the learning of Chinese, Japanese and Arabic for blind students or for those who suffer from manual dysfunction. Learning is performed „without signs”, by listening and speaking. For a year, students aim to achieve language proficiency at A2 level. - I am sending the students a file, and their smartphones articulate it - explained Olgierd Uziembło, a lecturer who conducts classes in Chinese «without signs» at school. The School of Eastern Languages runs classes in the languages of the former socialist countries, as well as from Middle East, Far East and African countries. The course lasts 2 years. Learning is provided according to the rules of the University Foreign Language Teaching System and exams are provided at A2, B1 or B2 level in accordance with the criteria of the Council of Europe. (Kp) www.sjw.uw.edu.pl
www.certyfikacja.uw.edu.pl

Village renewal - escape from urbanization

2018-02-09

Prof. Irena Niedźwiecka-Filipiak and Dr Zbigniew Kuriata from the University of Life Sciences in Wrocław were awarded by the local government of the Opole Region for participation in the Rural Renewal Program. - The restoration of the village began in Western Europe and was a response to the widespread urbanization of the villages. This did not prevent from the depopulation of rural areas, on the contrary, despite improving living conditions, the young people still fled to the cities - explains Prof. Irena Niedźwiecka-Filipiak in the journal „Głos Uczelni”. As Wrocław scientists emphasized that the first association with the name of the program is misleading. The renewal of the village is not only about the renovation of buildings. It is a renewal of both the material and spiritual lifestyle of the villagers. The Regional administration offices are responsible for the implementation of the Village Renewal program. <http://www.odnowawsi.eu/serwis/>

Month of Mother Language in Krakow

2018-02-09

From February 21 to March 21, 2018, the following part of program called „Month of Mother Language” will be held at the Jagiellonian University in Krakow. The initiative is aimed to popularize science and the Polish language. Integral parts of this project are: an advertising contest for primary schools «Language - the work of generations», a contest for commentary on any sporting and cultural event for junior high school students, a contest for the chat «Our regional identity» and linguistic workshops for schools. One of the most interesting events is the «Krakow Dictation» organized for the fourth time. It will be held in two versions: traditional - open to everyone and in the junior category – for young people up to 15 years. The patron of the «Krakow Dictation» is Jarosław Gowin - Minister of Science and Higher Education. More: <http://mjo.uj.edu.pl/>

Inventions of Polish students at the Geneva exhibition

2018-02-09

The winners of the „Student-inventor” competition will present their works during the 46th International Exhibition of Inventions in Geneva and the 12th International Warsaw Exhibition of Inventions IWIS 2018.

The competition commission awarded five inventions carried out by Polish students. This year's competition was organized by the Kielce University of Technology and co-financed by the Ministry of Science and Higher Education. Among 78 submitted applications were 123 innovative solutions from 24 universities and research institutes from all over Poland. The competition was addressed to students, PhD students and graduates who during their studies became the creators of the invention (utility or industrial design), protected by an exclusive right or patent in Poland or abroad. More about the competition and the list of awarded works here: <http://www.nauka.gov.pl/aktualnosci-ministerstwo/studenci-wynalazcy-jada...>

Railway Industry Accelerator has been launched

2018-02-09

The innovation accelerator was created by Agency of Industrial Development with the POLREGIO railway company. The accelerator is aimed to support start-ups and the sector of small and medium-sized enterprises. The railway will be looking for software to sell tickets at stationary cash desks, on-board entertainment system, or mobile applications for passenger integration.

According to the assumptions, the implementation of innovative products will also increase the level of passenger safety and improve management processes. ARP and POLREGIO are planning further events promoting the development of innovation and entrepreneurship. More: <https://www.arp.pl/dla-mediow/aktualnosci/kolej-na-innowacje-rusza-akcel...>

Film promoting the Poznan University

2018-02-12

Professional actors from Poznan theaters, dozens of extras - students of the university (among them a Turkish student staying in Poznan as part of the European Erasmus program) appeared in a new promotional film of the University of Adam Mickiewicz in Poznan.

The film shows a Poznań university as a place to pursue scientific passions. It used scenes from well-known hits of world cinema. Guessing the titles of the films from which they were borrowed can also be interesting for the viewers. The photos lasted two months, from June to August 2017. They were shot in the university buildings, in the areas of Poznań Ławica Airport, and even in Venice. See the video: <http://uam.platontv.pl/adv?page=1&title=film&lang=-1&order=1&main=False&...> (kp)

World Brain Days

2018-02-12

For several years, World Brain Days have been celebrated in March. Also this year, Polish universities, institutions and scientific societies are involved in this project. Held in Gdańsk, Gdynia and Sopot, the event will be devoted to the expanding of knowledge about the brain. On March 16-17, the Faculty of Biology of the University of Gdańsk organizes a series of lectures, workshops and laboratory demonstrations to bring the knowledge about the structure and functioning of the brain, as well as to familiarize with the neurobiologists, neurosurgeons and psychologists. In turn, in Krakow, on March 12-18 the Auditorium Maximum of the Jagiellonian University provides a series of lectures on the functioning of the brain and its diseases. Later, at University of Rzeszów, on March 14, an open lecture will be held by Dr Paweł Balcerak from the Institute of Philosophy titled „Brain and Mind. Is a man more than a body?" More: <http://www.dana.org/baw/>

New forms of medical care for former miners and steel workers

2018-02-12

New Silesian Clinical and Scientific Center for Prevention and Treatment of Environmental, Civilization and Old Age Diseases will be created in Zabrze.

In the cities of Silesia, where heavy, mining and chemical industries have been located, hundreds of thousands of old people suffer from complex diseases related to old age and work in harmful conditions. Treating them requires highly specialized medical care - In Silesian post-industrial cities - said Prof. Marian Zembala, initiator of establishing the center, director of the Silesian Center for Heart Diseases - people live 4-6 years shorter than on average in Poland, heart diseases are more often connected with the so-called co-morbidities. The first patients may come to the center in Zabrze at the end of 2021. (kp)

In 5 years, Polish microsatellite in space

2018-02-13

The Polish microsatellite of Earth observation called Intuition-1 will be launched at the turn of 2022 and 2023. The KP Labs and FP Instruments with Future Processing as members of the FP Space consortium elaborate on this project. The venture is financially supported by the National Center for Research and Development. Intuition-1 will be the first such advanced Earth observation satellite in the world. Its design is so innovative that the planet's surface images will be processed by the satellite's on-board computer. This solution will significantly reduce the stream of data sent to the ground receiving station. The microsatellite will be a 6x CubeSat with dimensions of 10 x 22 x 36 cm. It weighs from 15 to 20 kg. More about the FP Space project and consortium <https://www.fpspace.com/pl>

Polish specialization in OCEAN 2020

2018-02-13

Research and Development Center of Maritime Technology Center SA belonging to Polska Grupa Zbrojeniowa S.A. participate in the OCEAN 2020 project of the European Defense Agency (EDA). Its purpose is to increase the allied capabilities of navies to conduct surveillance and recognition of EU territorial waters by means of unmanned nautical submarine and submarine platforms and air systems.

Specialists from the Center of Marine Technology will work on the system design, its integration, rehearsals, including the participation of the Polish Navy. They have experience in the field of marine observation systems installed on land and on ships. They prepared them for Polish naval forces. OCEAN 2020 is the first pan-European military research program funded by the European Defense Fund. It brings together 42 partners from 15 countries; the leader is the Italian company Leonardo. (Kp)

Laureates of the 13th Academic Forum Competition

2018-02-13

Katarzyna Pańczyk, PhD student at the Pomeranian Academy in Słupsk, won the 13th Academic Forum Competition for a popular science article entitled «Complicated and simple. Young scholars about their research». The honorary patron of the competition is Jarosław Gowin, Deputy PM and Minister of Science and Higher Education. The second prize was won by Magdalena Kłodowska (Institute of Nuclear Physics, Polish Academy of Sciences), and the third - Dominik Szulc (Institute of History of the Polish Academy of Sciences). Also Edyta Charzyńska (University of Silesia), Olga Kielak and Aksela Kobiąłka (both from the Maria Curie-Skłodowska University in Lublin) and Tomasz Skawiński (University of Wrocław) were awarded. Congratulating the winners, Sebastian Skuza, deputy minister of science and higher education, expressed his hope that they would also be included for scholarships as outstanding young researchers. The ceremony was attended by Prof. Zbigniew Marciniak, the chairman of the Main Council of Science and Higher Education. The prize founders and contest partners were Foundation for Polish Science and the Wydawnictwo Naukowe (Science Publishing House). Scientists from Toruń will digitally reconstruct the port sunk for centuries

2018-02-13

We will get to know the look and the secrets of the sunken medieval port in Puck, located on the Baltic coast. Journey in time will be provided by scientists from the Department of Underwater Archeology at the Torun University of Nicholas Copernicus. The remains of the port were discovered in the late 1970s. Information about its most interesting facilities will be provided by the latest digital technologies, including photogrammetry and three-dimensional modeling. They will be used to reconstruct old in-

stallations and port buildings- in the virtual reality. Archaeologists from Toruń, together with the Puck City Office, work under the Virtual Arch grant - Visualize to Valorize 2017-2020 from the EU Interreg program. Eight inaccessible objects were selected for virtual reconstruction in Austria, the Czech Republic, Croatia, Germany, Poland, Slovenia, Slovakia and Italy. Biostatistics at the Medical University of Białystok

2018-02-14

Bachelor studies of biostatistics are launched at the Medical University of Białystok. This is the first such field of study in Poland. The studies are to combine mathematics, computer science and medicine. Biostatistics include statistical methods used in medicine and biology as well as other natural sciences (e.g. veterinary medicine). The studies refer to: mathematical knowledge in the scope of understanding the essence and the use of biostatistic models, IT knowledge in various types of statistical packages and medical knowledge in the scope of substantive understanding of the analyzed phenomenon and its medical character. The Medical University of Białystok has already conducted postgraduate studies in biostatistics in the previous years and currently it may use that experience and staff for launching the course for undergraduate studies. Training conference on innovations in oncology

2018-02-14

The 3rd National Student Training Conference „Innovations in Oncology” organized by the Student Science Club Onkoma from the Medical University of Warsaw will be held on April 14. The venue for the conference will be Warsaw for the third time, however, thanks to the use of modern ICT tools, the event will be broadcast live to 14 academic centers in Poland. The conference will begin with the inaugural lecture of Katarzyna Głowala - Undersecretary of State in the Ministry of Health. Later research-

ers will inform participants about innovations in the detection and treatment of colorectal, ovarian and thyroid cancers. Registration for the conference below: <https://docs.google.com/forms/d/e/1FAIpQLSed6d0ZOL3Z2y1TLJWUjaj3iIpgSNXv...>

Naukobusy (science busses) reach the villages and towns

2018-02-15

Naukobusy - modern mobile laboratories with more than 20 exhibits that can be touched and tested have reached almost 100,000 children from all Poland. According to the program of the Ministry of Science and Higher Education, the kids have the opportunity to learn the secrets of the human body, carry out experiments in physics or to cheat their senses. All this is provided under the supervision of animators from the Copernicus Science Center in Warsaw. Naukobusy visit villages and smaller cities (up to 130,000 inhabitants). This initiative aims at equalizing educational opportunities and also aims to prevent exclusion. The science ministry allocated PLN 2.3 million this year to the activity of children's universities and to popularize science among the youngest. As part of Young Explorers' Universities, children and adolescents aged 6 to 16 had a chance to feel like real scientists. Thanks to the support of the Ministry of Science and Higher Education, Young Explorers' Universities appeared in all provinces.

University drone examines air quality in Wrocław

2018-02-15

The Department of Climatology and Atmospheric Protection at the University of Wrocław is testing air quality with a modern drone. The device was purchased thanks to a subsidy from the Municipal Office in Wrocław. The idea for the purchase of a drone by the University of Wrocław appeared already in 2015, when the LIFE-APIS / PL project implemented by the Department of Climatology and Atmospheric Protection was awarded with the Polish Innovation Prize. It was a great opportunity to establish scientific cooperation with Optimum Tymiński Company, which in 2017 created the first unmanned flying platform. In environmental monitoring, drones are very popular and have different applications. The University drone is used as a platform for measuring air quality and basic meteorological parameters. The range of measurements is several hundred meters. The drone is equipped with the so-called environmental warhead, measuring dust and ozone concentration; in addition, it measures the temperature and humidity of the air. More about the LIFE-APIS / PL project: <http://life-apis.meteo.uni.wroc.pl/>

Former director of NASA Ames Research Center visits Toruń

2018-02-15

Former director of NASA Ames Research Center in Silicon Valley, General Simon Peter Worden visited the Toruń University. General Worden met the Vice-Rector for Research Prof. Jacek Kubica, director of the Astronomy Center Prof. Michał Hanasz and vice-dean of the Faculty of Physics, Astronomy and Applied Computer Science, Dr. Winicjusz Drozdowski, Prof. NCU. The meeting was also attended by Mateusz Józefowicz from the ABM Space company in Toruń. The topics included the development opportunities for the space industry in Toruń, plans to create a selection committee for candidates for the scientific award granted by Simon Worden's foundation and research projects regarding the search for planets carried out at the Astronomy Center of the Toruń University.

Change of the Maritime University of Gdynia into the Maritime University

2018-02-15

- This is matter of prestige for us - says the Rector of the Maritime University Prof. Janusz Zarębski. - In Poland and worldwide it is a signal that we will be a real university, a university on a slightly higher level. This is also a signal that the Polish maritime economy is developing and that the government is interested in it - he adds. The university authorities believe that the change of name will increase the university's capabilities, that it allows to distinguish it from military universities. In international contacts, the Maritime University uses the name «Gdynia Maritime University», which has more prestige and a higher position than «Maritime Academy». On November 15, 2017, during an extraordinary meeting, the Senate of the Maritime University of Gdynia adopted a resolution on changing the name of the high school to the Maritime University. On February 10, 2018, on behalf of Minister Marek Gróbarczyk the decision was announced by the Deputy Minister of Maritime Economy and Inland Waterway Transport, Anna Moskwa, during the Great Sea Ball.

University from Nowy Targ signed an agreement with Podhale Rifles

2018-02-15

The State Higher Vocational School in Nowy Targ has signed the first in its history agreement on cooperation with the military formation - the 21st Brigade of Podhale Rifles. The State Higher Vocational School in Nowy Targ is involved in the pilot program of the Academic League (Legia Akademicka), and for its performing, the alliance with the military formation will be very valuable. Academic League, providing military education of volunteer students, is a joint project of the Ministries of National Defense and Science and Higher Education. The agreement obliges both parties to disseminate volunteering activities for state defense, patriotic education, pro-defense education of students of the Podhale high school and integrating military milieus and

academic youth. According to the agreement, the 21st Brigade will accept students who have applied to the Academic League. In July and August 2018, 1000 new members are expected.

Will the European University Games take place in 2022 in Łódź?

2018-02-15

Łódź attempts to organize the European EUSA Games University Olympic Games in 2022 or 2024. The city is visited by the EUSA delegation (European University Sport Association) consisting of two evaluation and technical committees that test Łódź «potential in terms of sports facilities and accommodation for many thousands of the Olympic Games participants. About 6000 athletes from at least 40 countries will come to a city selected by EUSA. The idea to apply for the organization of the Games in Łódź was coined at the Łódź University of Technology. The conceptual and organizational work was carried out jointly by the Academic Sports Association of the Łódź University of Technology, Lodz University of Technology and the city of Lodz. The entire academic and sports milieu of Łódź will take part in the preparations for such an important project. During this event, there will be a minimum of 13 sports disciplines provided with potential extension of further 7 disciplines, played in both male and female categories .

Professor Giulianotti and Dr Armstrong visit the Warsaw Institute of Political Sciences

2018-02-16

Two prominent European sport sociologists will visit the Institute of Political Sciences of the University of Warsaw in March. Professor Richard Giulianotti and Dr. Gary Armstrong on 9-10 March 2018 will give a lecture and conduct a methodological seminar. March 9, 2018, at 3 PM, Prof. Giulianotti and Dr. Armstrong will give a lecture entitled «Key contemporary issues in the sociology and anthropology of football». The lecture will take place in the Collegium Politicum (Auditorium Building) as part of the course on the monographic subject «Football in Europe: Case Studies» led by Dr Seweryn Dmowski. The lecture will be open and will be conducted in English. On March 10, 2018, from 10:30 AM, scientists will conduct a methodological seminar for Polish PhD students and students. The seminar will take place in room 303 in the Collegium Politicum (Auditorium Building). The guests of the Institute of Political Sciences will cover the following topics: theory and methodology of contemporary social sciences (with particular emphasis on research on sport / football), experience in writing and publishing scientific articles in renowned journals and publications and international scientific networking. For further information, please contact Dr Seweryn Dmowski (seweryn.dmowski@uw.edu.pl).

Concert on the occasion of the 100th anniversary of the Lublin Catholic University

2018-02-16

Fragments of the Holy Bible in a unique interpretation of leading Polish artists may be heard on February 26 during the concert on the occasion of the 100th anniversary of the Catholic University of Lublin. Anna Dymna, Małgorzata Kożuchowska, Jerzy Trela, Stanisław Soyka, Adam Woronowicz and Wojciech Malajkat will perform in the concert titled «I Am». The audience will listen to the fragments of the Holy Bible showing the history of human salvation, from the Book of Genesis to

the Apocalypse of Saint John. The director of the concert Krzysztof Czczot is also the creator of the BIBLIA AUDIO project. The musical setting will be provided by a 40-member band of the Crown Tribunal Orchestra, and the Choir of the Catholic University of Lublin that will perform Psalm 139th. The concert will take place at the Center for the Meeting of Cultures in Lublin on February 26, 2018 at 19.00. Tickets can be purchased on the website: <http://www.eventim.pl/bilety.html?affiliate=PLE&doc=artistPages%2Fticket...>

Next Thursdays with economics for children and youth launched

2018-02-16

In March, next series of „Thursdays with Economics”, known as the Economical Children's University and the Academy of the Young Economist, begin in seven Polish academic cities. In Szczecin, the Faculty of Management and Economics of Services at the University invites young students for scientific lectures. Classes will be held in two age groups. The younger (11-13 years) as part of the Economic Children's University and during the six lectures the kids will learn principles of creating products, basic rules for their advertising and the importance of ecology in economic processes. In turn, older students (14-16 years) may attend lectures on conflict management, trends in marketing, interpersonal communication the key to business success, index analysis of the enterprise, globalization of the economy, as part of the Academy of the Young Economist. The recruitment will be conducted until February 25, 2018 for classes at the Children's Economics University in Warsaw, Poznań, Wrocław, Białystok and Gdańsk. The duration of registration for meetings in Szczecin was extended until February 28, 2018, and for classes in Katowice until March 5, 2018. Application form for classes at the University of Economics Application form for classes of the Academy of the Young Economist: <http://www.gimiversity.pl/zapisy2/> Participation in the classes is free. <http://www.uniwersytet-dzieciacy.pl/zapisy2/> <http://www.gimiversity.pl/zapisy2/>

The latest monograph of the Nobel Prize winner Czesław Miłosz

2018-02-16

The Scientific Publisher of the Academy of Technology and Humanities in Bielsko-Biała published a scientific monograph entitled Miłosz. Meetings. Miłoszological studies and dissertations. In the review, Prof. Zofia Zarębianka from the Jagiellonian University wrote that the publication „is a cognitively valuable proposition, not deprived of innovative approaches and interpretations”. The author of the monograph is Prof. Marek Bernacki, involved in the works of Czesław Miłosz for many years. The first part of the monograph contains interpretations of known works of the Polish Nobel Prize winner (including the poem My Faithful Speech). The author discussed the poetical and philosophical considerations of the poet and his attitude towards the idea of Central Europe (Mitteleuropa). The second part is devoted to Miłosz's relations with other writers (including Zbigniew Herbert) and people who significantly influenced his life (Leopold Chomski, Jerzy Turowicz). <https://www.ath.bielsko.pl/monografia-naukowa-o-czeslawie-miloszu/>

The most influential people of Polish medicine

2018-02-16

Prof. Wiesław W. Jędrzejczak - head of the Chair and Clinic of Hematology, Oncology and Internal Diseases of the Medical University of Warsaw is on the top of the list of the hundred most influential people in Polish medicine. The competition is organized by the journal „Puls Medycyny”. The second is Prof. Cezary Szczylik, specialist in internal medicine, clinical oncologist, Rector's representative at the Warsaw Medical University for the organization of the Clinical Research Center in Oncology. The third is Prof. Henryk Skarżyński, otolaryngologist, audiologist and phoniatriest, national consultant in the field of otorhinolaryngology, director of the World Hearing Center in Kajetany near Warsaw, head of the Department of Audiology and Phoniatics at the Academy of Music in Warsaw, chairman of the Committee of Clinical Sciences of the Polish Academy of Sciences. (Kp) See a list of the hundred most influential people in Polish medicine: <http://listastu.pulsmedycyny.pl/4686591,78304,lista-stu-2017-medycyna>

Leading economists will meet in Warsaw

2018-02-19

From September 13 to September 15, 2018, the Warsaw School of Economics, a leading Polish business university, will host the European Trade Study Group, the most prestigious scientific conference on economics and international trade in Europe. About 350 economists from universities and research centers take part in it each year. The world's leading economists will come to Warsaw from Harvard, Princeton, the London School of Economics, the World Bank and the World Trade Organization. The European Trade Study Group is a non-profit academic association. It is involved in the study of international economic cooperation. The scientific committee is headed by Prof. Elżbieta Czarny from the Warsaw School of Economics. The chairman of the organizing committee is Dr Andżelika Kuźnar. (Kp) More about the European Trade Study Group: <http://www.etsg.org>

Event management - a new field of study in Silesia

2018-02-19

The Silesian University of Technology in Gliwice launches a new two-semester post-graduate program. Event management will allow graduates to acquire the knowledge, skills and competences needed to manage mass events. According to the assumptions of the studies, their graduate will have a formal basis for undertaking activities related to the management and organization of events, i.e. will acquire the right to be an Event Manager. This type of knowledge and qualifications are valuable for sports facilities managers, employees of organizational units, people responsible for public safety, non-governmental organizations activists or employees of educational organizations. The students will learn how to manage, plan, organize and conduct a mass event, how to manage teams responsible for preparing and conducting the event, what legal provisions must be included in the organization of mass events and how to plan their safety. The studies begin in March 2018 and the entries are accepted by the Faculty of Organization and Management at the Silesian University of Technology.

Kielce University of Technology launches four new specialties

2018-02-19

Kielce University of Technology is to become a modern university, educating highly qualified staff for the needs of the innovative labor market. The university has received over PLN 7 million to improve the offer and quality of education from the National Center for Research and Development. This money allows to create four new specialties: building information modeling, proecological engineering, ICT with computer control and measurement systems. Students will also benefit from additional training and workshops to help them create and run their own businesses. The university will also expand the offer of internships in the region's leading enterprises. Funds from the National Center for Research and Development were directed by the Ministry of Science and Higher Education as part of a program

supporting the development of smaller regional universities. In total, almost PLN 250 million was allocated. Support for smaller research centers is crucial in terms of the development of the regional economy.

MEDmeetsTECH Telemedycyna conference

2018-02-19

MEDmeetsTECH will start on April 18, 2018 in Warsaw, and for the fifth time it will connect entrepreneurs, startupers, doctors and scientists. This time the conference will concern telemedicine. The MEDmeetsTECH program will consist of following sessions: trends, medicine, knowledge transfer, legal regulations, financing and startup presentations. During the event, examples of the implementation of telemedicine systems, various forms of financing such services by a public or private partners and trends in global markets will be presented. The most interesting startups in the field of telemedicine as well as the legal challenges of developing a startup will be also the topics of the conference. MEDmeetsTECH aims to create space for experts in medicine, science, technology and business to establish dialogue and exchange experiences. As part of the conference, the MEDmeetsTECH Innovation Showcase, an innovation fair, will also take place on 19 April. Registration for the conference: <http://medmeets-tech.com/rejestracja>

In March Warsaw hosts a global expert conference on supercomputers

2018-02-20

The international conference presenting the most innovative solutions in computational science for large-scale operations will take place in Warsaw from 12 to 15 March. Supercomputing Frontiers Europe 2018 is a meeting of world-class experts in the field of supercomputers. The organizer of this event is the Interdisciplinary Center for Mathematical and Computational Modeling of the University of Warsaw (ICM UW). Previous conference took place in Singapore. During Supercomputing Frontiers Europe 2018 Prof. Karlheinz Meier from the University of Heidelberg will provide the research results on a neuromorphic computer, whose system is inspired by the human brain structure, and Prof. Dimitri Kusnezov, scientific advisor to the US Secretary of State, will present the US program of building the most powerful computers in the world and their impact on individualized medicine, where each patient is treated as a separate diagnostic and clinical case, including the creation of individualized medications and their doses. More: <https://supercomputingfrontiers.eu/2018/>

5th Conference for Rectors of Universities under the Baltic University Program

2018-02-20

In February 2018 Turku (Finland) hosted the 5th Conference of Rectors of higher education institutions cooperating in the Baltic University Program. The University of Turku invited more than 150 representatives from 74 universities and colleges from the Baltic Sea region. Poland was represented by 35 representatives from 24 universities. The program center for Poland is located at the Lodz University of Technology and has been operating for 18 years. The Baltic University program focuses on the issues of sustainable development, environmental protection and democracy in the Baltic Sea region. The participants of the Baltic University Program are universities located in the countries of the Baltic region. Apart from countries di-

rectly located on the Baltic Sea, the network includes: Belarus, Ukraine, the Czech Republic and Norway. The program includes all types of universities – humanities, technical, higher pedagogical and economic schools, agricultural and medical academies as well as other higher education institutions and research and scientific organizations. In July 2018, Poland starts a six-month rotating presidency in the Baltic University Program.

Conference on Polish cinematography in Bydgoszcz

2018-02-20

The Department of Creative Industries of the University of Economy in Bydgoszcz and the scientific journal „Culture and Education” invite to participate in the interdisciplinary conference „Creative Minds. New roads of Polish cinema „, which will be held on 6-7 March 2018 in Bydgoszcz. During the conference, participants will be able to listen to over a dozen lectures on Polish cinematography. Professor Arkadiusz Lewicki from Wrocław University will present the «Image of the Eighties in the Polish Newest Cinema (2007-2017)», Dr Krzysztof Kopyński from the University of Warsaw presents the topic «Irony and harmony. The search for author's identity in the Polish creative document of the 21st century», Dr Magdalena Bergman from the University of Economy in Bydgoszcz will analyze «Images of social exclusion in contemporary Polish cinema in a sociological perspective» and Artur Petz, MA from the University of Lodz will introduce the phenomenon of a Polish scriptwriter, director and writer Patrick Vega. He will also make a lecture «How to raise the viewer and achieve commercial success». The conference will start on March 6, 2018 at University of Economy in Bydgoszcz at Naruszewicz str.11, building K, ground floor, room K001.

Scientific conference on the development of Eastern Poland

2018-02-20

The sector of small and medium enterprises and the competitiveness of the peripheral region is the title of the conference that will be held on May 24-26,

2018 in Kazimierz Dolny. The organizer of the tenth international scientific conference is the University of Economics and Innovation in Lublin. For years, the conferences focused on the development of Eastern Poland and they formed a research initiative group called «Lublin Project». This year three plenary sessions are planned. They analyze the impact of the small and medium-sized enterprises sector on regional and local development as well as support instruments for the small and medium enterprises sector provided by the local government. The third topic are start-ups and their participation in the process of stimulating economic growth. The President of Lublin is the honorary patron of the conference. Applications for participation in the conference should be sent by May 5, 2018, to the e-mail address: sylwia.skrzypek-ahmed@wsei.lublin.pl

Opole Electrics Days

2018-02-21

The XXVIII Opole Electrics Days are an event addressed to enthusiasts, practitioners and theoreticians of electrical technology. The organizers invite to the second campus of the Opole University of Technology on March 6. There will be lectures and the Open Day of the Faculty of Electrical Engineering, Automatics and Computer Science. During the event, besides the presentation of the educational offer, a series of lectures on electrical engineering and electrotechnics is planned. Dr Eng. Stefan Wolny from the Opole University of Technology will talk about electricity generated from hydrogen. In turn, Eng. Andrzej Przytułski will familiarize future students with the electric means of communication at the turn of the 19th and 20th century and Dr. Eng. Ryszard Beniak will conduct a lecture entitled «Three-phase AC systems as the driving force of our world» Opole Electricity Days will start on March 6 at 9.30 am in the premises of the Opole University of Technology (building 9A) ul. Prószkowska 76.

Talks about women in the media and public debate

2018-02-21

On the occasion of the Women's Day, the Information Office of the European Parliament in Poland and the SWPS University of Social Sciences and Humanities in Warsaw invite to the debate „Female minister, female expert, female reporter. Women in the media and public debate. „ The untrue, stereotype-based image of women is slowly becoming the past thanks to the technological revolution and changes in society. Women oppose more and more loudly against the objectification and sexist advertising, clearly talk about their aspirations, they are present in the public debate. Some of the media and advertisers have noticed these changes. The new trend of ads appeared, called femvertising, which emphasizes the value and potential of women. Is this the beginning of a permanent change? After the debate, Steven Spielberg's film «Fourth Power» will be presented. The event will take place on March 2, 2018 in the Warsaw «Kinoteka», Plac Defilad 1, More information and registration here: <https://docs.google.com/forms/d/e/1FAIpQLSegez-0YjAbLdhBKY-wVNRHNX-oBnw716SJMzZuN2V8jGzSyWg/viewform>

Students from Poznań in the SAE Aero Design competition

2018-02-21

Students of the Poznan University of Technology Aviation Club have constructed an unmanned aerial vehicle that will take part in three competitions of the SAE Aero Design. February 23-24, 2018 - as the only European team - PP students will participate in Mexican competition (SAE Aero Design Mexico 2018). Later, on March 9-11, 2018, they will travel to Florida for SAE Aero Design USA East 2018, and on April 6-8, 2018 - to California for SAE Aero Design USA West 2018. Prestigious academic aviation competition has been held since 1986. The organizer is the International Association of Transport Engineers SAE (Society of Automotive Engineers). The partners of academic competitions are such companies like F-16 aircraft manufacturer, Lockheed-Martin, Boeing and NASA (members of these organizations are in the jury). Poznan students worked on

the competition model about half a year. The design task covers the whole production process of the aircraft. It consists of developing a concept, making a prototype and then presenting the final version for the competition.

Deputy Prime Minister Jarosław Gowin at the celebration of the Torun University

2018-02-21

On February 19, 2018, the Torun University celebrated its feast - the 545th anniversary of the patron Nicolaus Copernicus' birth. Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education was the special guest of the celebrations. During the ceremony the university staff was awarded with state and university prizes and titles: Doctor Honoris Causa, Honorary Professor and Ambassador of the Nicolaus Copernicus' University. New habilitated doctors and doctors received diplomas. - Nicolaus Copernicus University is one of the best-growing Polish universities and has a chance to be in the group of so-called research universities - said Deputy Prime Minister Jarosław Gowin. We need to let Polish universities differ from each other. The mission of a research university differs from a good vocational school - he added. The Minister of Science and Higher Education reminded that the government continues to work on the so-called constitution for science. Jarosław Gowin emphasized that he would strive to implement the law in its current form. According to the assumptions of the Act, a group of research universities will be organized. The presence of the University of Nicolaus Copernicus in this cluster is a chance for even greater development of the university. During the ceremony, Deputy Prime Minister Jarosław Gowin proposed the initiative to celebrate the Day of the Scientist on February 19 - the day of Nicolaus Copernicus' birth.

Fair Academy 2018

2018-02-21

The 24th educational fair Akademia 2018 will take place at the University of Gdańsk on March 19- 20.

2018. It is the largest educational event in the Pomeranian Region and it is also a great opportunity for future students to get acquainted with the educational offer of Polish universities. During those two days, dozens of universities from around the country will be presented. Visitors will also have the opportunity to participate in the Open Days of the University of Gdańsk, which will be held at all faculties and at the university library. It is a perfect way to see the infrastructure, to talk to students and lecturers, or to take part in numerous events, such as exhibitions, experiments, workshops. The Akademia Fair is a part of the anniversary of the University of Gdańsk, which was established on March 20, 1970 and is included in the program of University Day celebration. Organized for over twenty years, the Fair is the largest and oldest educational event in Pomerania Region.

Industry 4.0 Conference - Innovative applications for enterprises

2018-02-22

The latest Polish achievements in Industry 4.0 and IT solutions for automation and robotization of enterprises were presented at the Industry 4.0 conference „Innovative applications for enterprises“. The conference was organized by the Rzeszów University of Technology and the National Industry Cluster 4.0, which was established as a result of an initiative in cooperation with the Rzeszów University. What is Industry 4.0? It is a collective term meaning the integration of intelligent machines, systems and introducing changes in production processes that aims to increase production efficiency. This term applies not only to technology, but also to new ways of working and the new role of people in industry. During the conference, the latest Polish achievements in Industry 4.0 were presented. One of them was the premiere presentation of the first Polish industrial printer 3D SYS PROBE based on selective sintering of polymer powders. This Polish device successfully competes with 3D printers from world-renowned companies. The machine has Ethernet, USB, also uses Wi-Fi and remote connectivity through mobile devices.

In March, Gliwice hosts Deputy PM Gowin at conference on dual education

2018-02-22

On March 5, 2018 the Education and Congress Center of the Silesian University of Technology in Gliwice organizes the second conference on the Dual Education - EDUAL. Deputy Prime Minister and Minister of Science and Higher Education Jarosław Gowin took his patronage over the event. The conference «Dual studies in response to the needs of Industry 4.0» will also be attended by representatives of science and economy, who will discuss the best tailored forms of student education for the needs of science and industry. During the conference, examples of dual education and various activities related to this type of education at Polish universities will be presented. One of the sessions is devoted to best practices, implemented by foreign partners of the Silesian University of Technology. Simultaneously, the Conference of Rectors of Polish Technical Universities will be held in Gliwice with the participation of Deputy Prime Minister Jarosław Gowin. More about the conference: <http://www.edual.polsl.pl/>

Early contact with a university means the right choice of the field of study

2018-02-22

Military University of Technology in Warsaw took the scientific patronage over students of the First School Complex named after Stanisław Staszic in Wschowa in the Lubuskie Region. The school will receive substantive educational support. Academic teachers will conduct classes in Wschowa and students will take part in the academic activities and competitions conducted by the Warsaw university. - We need good candidates for our studies - said Col. Dr. Eng. Tadeusz Szczurek - Rector-Commandant of the Military University of Technology. We want them to have knowledge about military directions, but also we will educate future engineers of civilian studies in many interesting, unique specialties. - We use all available forms to enrich our educational offer - said Wojciech Kuryłło, vice-mayor of the

Wschowa municipality - the sooner the students will contact with the university, the more aptly they will choose the fields of study (kp) <http://www.wat.edu.pl/?p=15256> <http://www.wat.edu.pl/?p=15256>

Scholar from Warsaw will study the most famous syndrome in psychology

2018-02-22

Professor Magdalena Żemojtel-Piotrowska from the Department of Christian Philosophy at the Cardinal Stefan Wyszyński University in Warsaw won the National Science Center competition and received over PLN 1.7 million to create a team and research one of the most famous syndromes in psychology - narcissism. - We are trying to explain the social functioning of different types of narcissism - said Professor Żemojtel-Piotrowska in a brief description of the project, available on the website of the Cardinal Stefan Wyszyński University - the state of knowledge about this phenomenon needs a solid, theoretical and well ordered research. Research will include observational and objectivized data, such as the analysis of the functioning of narcissistic people in social networks or in romantic relationships. The whole research is complemented by intercultural research; it verifies the assumption of the existence of four forms of narcissism in various contexts and cultural conditions. (kp) More: <http://www.uksw.edu.pl/pl/universytet/uczelnia-dzis/aktualnosci/1265-wys...>

Success of scientists from Bydgoszcz and Toruń at the Bangkok inventions fair

2018-02-22

The team of the Bydgoszcz University Prof. Mariusz Kaczmarek, Dr Marek Macko, Dr Dariusz Mikołajewski and Zbigniew Szczepański and Prof. Aleksandra Gocha and Dr Emilia Mikołajewska from the Toruń University was awarded with a gold medal. They constructed a passive exoskeleton for the treatment of children with upper limb myalgia, using 3D printing technology. The device is built individually for each patient; and it is an element of personalized

patient-tailored therapy. Lack of engine and computer lowers its weight, which reduces the effort of the limbs. The exoskeleton was awarded with special prizes by the leaders of the Canadian and Romanian delegations. The gold medal was also awarded to Dr Marek Macko and MA Zbigniew Szczepański for elaborating the innovative, fast procedure of creating teeth replica. Earlier, we informed that research and development teams from the Military University of Technology in Warsaw and the Academy of Science and Technology in Częstochowa were also awarded with gold medals in Bangkok. The IPITEX 2018 «Intellectual Property, Invention, Innovation and Technology Exposition» was organized by the National Council for Scientific Research of Thailand (NRCT) on 2-6 February 2018 in Bangkok (Thailand). (Kp)

Constitution for Science addressed the Standing Committee of the Council of Ministers

2018-02-23

Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin directed the draft of the new law on higher education and science to the Standing Committee of the Council of Ministers on February 22, 2018. - I would like the Constitution for Science to enter into force on 1 October 2018 - Deputy Prime Minister Gowin announced a few days ago. On this day, we will begin to implement a groundbreaking reform of science and higher education. I know that not everyone likes it. What do we like the most? The fact that it was formed in our group, in a dialogue with honesty and respect. I believe that it is precisely because it was created in such a dialogue, it will enter into force. Thanks to this reform, we will unlock the potential of our students and scientists. We will free the potential of lecturers and researchers, doctors and professors - emphasized the deputy prime minister.

Polish scientists develop research in Sudan

2018-02-23

Soon, the Polish Archaeological Center of the Mediterranean Archeology Center of the University of Warsaw will start work in Khartoum, the capital of Sudan. - Currently, 11 scientific missions from Polish universities are working in Sudan - said Dr. Artur Obłuski, director of the Center of Mediterranean Archeology in Cairo (Egypt) - four research projects are underway, including ancient trade routes and human populations. The Polish Archaeological Center will be opened on February 27, 2018 with the participation of Sebastian Skuza, deputy minister of Science and Scholarship and Prof. Marcin Palys, Rector of the University of Warsaw. It will be headed by Prof. Mahmoud el-Tayeb, who has been associated with the University of Warsaw throughout his academic career. Polish archaeologists are still in the forefront of Nubia (ancient Sudan) research. At the end of the 1950s, the expedition of prof. Kazimierz Michałowski discovered and saved the famous frescoes from the Faras cathedral (kp) More: <http://www.pdma.uw.edu.pl/pl/wydarzenia/artykul/powstaje-polski-osrodek-archeologiczny-w-chartumie/>

New research center at the Wrocław University of Technology

2018-02-26

In October 2018, the new research center „GEO-3EM Energy, Ecology, Education” of the Wrocław University of Technology will be opened. All 12 laboratories are located on 4,500 square meters. The total value of the investment is approximately PLN 100 million. The aim of the project prepared by the Wrocław University is to create a unique center of research and technology transfer in the aspect of sustainable use of raw materials and energy from various sources. Research conducted in this center e.g. spatial mobility, natural and secondary raw materials, machinery and equipment as well as materials processing, are to be used by the Lower Silesian industry. The authors of the project assume that ideas developed here will be commercialized.

New laboratory of the Silesian University of Technology established in cooperation with the industry

2018-02-26

Research on the impact of post-accidental spine injuries and creating robots helping medical staff to care for the sick will be possible thanks to the Leonardo Lab, established at the Faculty of Biomedical Engineering at the Silesian University of Technology. The solutions created in the Leonardo Lab are interdisciplinary and practical applications, providing better care for health and the support for medical personnel in the fight against diseases. Leonardo Lab is an example of cooperation between Polish universities and industry. It was established due to the cooperation of the Faculty of Biomedical Engineering at the Gliwice university with the APA Group, which is one of the leaders on the intelligent industrial automation market.

Students of Forest Departments learned inventory of wolves in the Bieszczady Mountains

2018-02-26

Students of the three largest Polish Forest Science centers: Faculty of Forestry at Warsaw University of Life Sciences, Warsaw University of Agriculture and University of Life Sciences in Poznan took part in the 15th Wolf Expedition. The Wolf Expedition participants will for seven days acquire knowledge of the wolf *Canis lupus* ecology and biology, learning the methods of inventorying this species and acquire knowledge to recognize the presence of wolves in Baligród, Cisna, Komańcza, Lutowska and Stuposiany located in the Krosno Regional Directorate of State Forests. Participants of the scientific camp use the application of Taxus IT company, which enables to aggregate quickly data collected during wolves inventories.

Startup Europe Week launched in five Polish cities

2018-02-26

Startup Europe Week 2018 is an initiative of the European Commission and Startup Europe organization. On March 5-9, thousands of dedicated meetings will take place in over 300 cities from almost 50 European countries. In Poland, Katowice, Kraków, Bielsko-Biała, Białystok and Płock participate in the event. The aim of the project is to create a platform for dialogue between startups, young entrepreneurs, and investors, representatives of local governments, business environment institutions and all who are interested in supporting and promoting entrepreneurship in the region. In each city, the event has a different program. In Płock, one of the debates topic is «Social innovations + StartUps = innovation close to people». In Białystok, Karolina Modrzejewska from the Department of Communication and Marketing of the Polish Agency for Enterprise Development plans a lecture on funds for innovations from the Polish Agency for Enterprise Development and in Bielsko-Biała Kamil Bargiel from SentiOne will present his own experience in building a startup. More: <http://startupeuropeweek.eu/>

Polish seminar in Cambridge

2018-02-27

The Polonium Foundation together with the Federation of Polish Student Societies in Great Britain and the Polish Cambridge University Association, with the financial support of the Ministry of Science and Higher Education invite to the „Quantum Physics & Cryptography” scientific event, which will take place on March 7, 2018 at the Cambridge Union Society. It will be an evening scientific seminar, which takes place as part of a series of meetings in Great Britain - From Poland with Science. During the seminar, Prof. Stefan Dziembowski from the Institute of Computer Science at the University of Warsaw will give a lecture on «Basic research in cryptography», and Dr. Radek Łapkiewicz from the Faculty of Physics at the University of Warsaw will deal with the issue of «Correlation of photons: imaging tool». More: <https://www.eventbrite.co.uk/e/quantum-physics-and-cryptography-from-pol...>

Wielkopolska Union of Public Vocational Colleges launched

2018-02-27

Rectors of the State Higher Vocational Schools from Kalisz, Leszno, Gniezno, Konin and Piła decided to establish a Union of Wielkopolska Public Vocational Schools. The Act on Higher Education assumes the cooperation of universities, which may cover many areas in the scope of organization, competence, personnel policy, financial economy, conducting scientific research, publishing activities or administrative services. Importantly, establishing a university relationship does not deprive them of their autonomy. Currently, there are three unions of universities in Poland two of which were established in the last quarter of 2017. The rectors of the Wielkopolska vocational universities will present the union idea to Jarosław Gowin - the deputy prime minister, minister of science and higher education.

Congress of Polish Geography

2018-02-28

From April 12 to 14 2018, the Congress of Polish Geography will take place. This is the most important event of the Polish Geography Year. The celebration was announced by the Committee of Geographical Sciences of the Polish Academy of Sciences, referring to the 100th anniversary of the Polish Geographical Society and the 100th anniversary of teaching geography at the University of Warsaw. During the congressional debates, an overview and assessment of the achievements of Polish geography in the past century will be made and the most important problems and research challenges faced by the Polish geographers will be indicated. The last, open day of the congress will be celebrated as the Geographer's Day. The Jubilee Geographic Competition will be held and the best, young geographers will be selected from among 200 students representing 228 schools in the contest. (Kp) http://wgssr.uw.edu.pl/kongres/?page_id=10

Poznan University prepares its building for the Enigma Museum

2018-02-28

University of Poznań donates the building of the old Collegium Historicum for the construction of the Enigma Museum. The German cipher was broken by Marian Rejewski, Henryk Zygalski and Jerzy Różycki, who majored from mathematics at the Poznań university. In 1932, they learned the secret of the German electromechanical Enigma encryption machine operations. They did it with use of mathematical methods. Until that time only linguistic methods had been used in cryptology. Originally, Enigma was supposed to serve for the purposes of secreting business correspondence. However, it was used in the German armed forces. The three Polish mathematicians designed a copy of the encryption machine. Copies of this device were made at the AVA Radio Production Station in Warsaw. In the summer of 1939, the Polish military authorities sent copies of the machine to France and the United Kingdom along with information on the broken code.

PhD student won the competition „Innovation is a woman”

2018-03-01

Agnieszka Podwin, a PhD student at the Wrocław University of Technology was the winner of the „Innovation is a woman” The winner of the competition submitted the concept of a low-cost biological laboratory lab-on-chip, consisting of three components, each of which contains a proprietary invention. The awarded solution will be presented in June 2018 during the international exhibition «Invent Arena» in Třinec, Czech Republic. «Innovation is a Woman» is a competition addressed to female researchers who can boast of developing an original innovative solution. The competition is one of the forms of promoting women's achievements in the science and research sector by the Foundation «Women of Science - Polish Women's Science Network».

Conference for technologists of fruit and vegetable processing in Bydgoszcz

2018-03-02

The University of Technology and Life Sciences in Bydgoszcz, together with the Committee on Food and Nutrition of the Polish Academy of Sciences, organizes in May 2018 the National Scientific Conference of Processors of Fruit and Vegetable Processing. The aim of the conference, which this year is run under the slogan: «Fruits, vegetables and mushrooms - innovation, safety, quality, technologies», is to deepen and systematize knowledge in the field of fruit, vegetable and mushroom processing, taking into account the latest trends, including innovation in analytical methods. The conference takes place from 17 to 18 May 2018 in the main building of the University of Technology and Life Sciences in Bydgoszcz at Aleja Profesora Kaliski7.

„Days with psychoforensics” at the Katowice University of Social Psychology

2018-03-02

As part of the series „Meetings with science”, the Social and Social University of Social Sciences and Humanities in Katowice organizes on 7-8 March 2018 an open, popular-oriented event „Days with psycho-forensic studies”. The initiative is addressed to all students and teachers of upper secondary schools who are interested in psycho-forensics. During the event, the researchers from the University of SWPS will seek together with the participants answers to the questions: Do weather and humor influence the crime? What are the possibilities of forensics in search of missing persons? Can you really detect lies using new technologies? More information about the event can be obtained from the Youth Zone Project Coordinator in Katowice at the email address: strefa.katowice@swps.edu.pl

Celtic Day at the Catholic University of Lublin

2018-03-02

The Department of Celtic Philology and the Institute of English Philology at the Catholic University of Lublin in cooperation with the Embassy of Ireland invite to the Celtic Day on March 16, 2018, which is part of the nationwide St. Patrick's Festival. The event «Have Fun Like In Ireland» will start at 10.00 in the Lublin Center for Transfer of Knowledge. Celtic Day has been prepared for those who want to expand their knowledge about the history, language and culture of Ireland and Wales. The program of this year's celebrations at the Catholic University of Lublin includes five lectures (in Polish and English), Irish and Welsh language workshops, Irish dance workshops and the movie „Seachd: The Inaccessible Pinnacle” directed by Simon Miller. See the trailer of the movie „Seachd: The Inaccessible Pinnacle”: https://youtu.be/aoYescAw1_I

20th competition „Polish product of the future”

2018-03-05

- The development of innovation is one of the pillars of the Strategy for Responsible Development. The „Polish product of the future” competition shows that Polish innovations are going in the right direction. All awarded projects are to strengthen the Polish economy and raise the standard of living in Poland - emphasized Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. The following winners were awarded: National Center for Nuclear Research for Intraline-IOERT, a medical electron accelerator won the competition in the category Product of the Future for the scientific unit. Instytut Mechanizacji Budownictwa i Górnictwa Skalnego together with NTI Modern Technologies for the technology of managing fly ashes, including industrial and municipal waste, in the production of light aggregates for construction was awarded in the Product category of the Future for the scientific unit and entrepreneur with a special award for the product in the area of eco-innovation: Triggo Spółka Akcyjna for Triggo won the special award of the Patent Office for a double, four-wheeled electric

vehicle in the Product of the Future category for the entrepreneur. Medical Simulation Technologies won Special prize for the product submitted by a young and innovative entrepreneur for the simulator used to train specialist doctors in the field of transesophageal echocardiography. Special Award Minister of Entrepreneurship and Technology was handed to FLASH Robotics for EMYS robot teaching children foreign languages.

10th International neuroscience conference at the Jagiellonian University in April

2018-03-05

Neuronus IBRO Neuroscience Forum is one of the largest conferences in the field of neuroscience in Europe. It will take place in April 2018 at the Jagiellonian University in Krakow. During this year's conference, 6 plenary lectures will be presented. They will be delivered by: prof. Amir Amedi (Hebrew University, Israel), prof. Ole Jensen (University of Birmingham, Great Britain), prof. Markus Ullsperger (University of Magdeburg, Germany), prof. Yves De Koninck (Laval University, Canada), prof. Thomas Kuner (University of Heidelberg, Germany) and prof. Emma Robinson (University of Bristol, Great Britain). Conference guests will see 25 presentations and participate in several scientific sessions and symposia. The event will take place on April 20-22, 2018 at the Auditorium Maximumum at the Jagiellonian University in Krakow. More: <http://neuronusforum.pl/>

Dr Iwański from the Jagiellonian University won the Wolters Kluwer and „Przegląd Sądowy” contest

2018-03-05

An employee of the Jagiellonian University Department of Penal Law, Dr. Mikołaj Iwański, author of the book „Criminal liability for corruption offenses”, won the 9th Wolters Kluwer and „Przegląd Sądowy” Competition for the law book most useful for the practice of justice. 27 books were submitted for the competition, and the jury, chaired by Jacek Gudowski, a judge of the Supreme Court, member of the Editorial Board of the Przegląd Sądowy, also awarded two additional prizes. They were received by Aleksander Klich for the book «Proof of expert opinion in civil proceedings. Expert doctor «and Mikołaj Małecki for the item entitled» Preparation for crime. Dogmatic and legal analysis «. According to the regulations of the competition, the author of «The law book of the most useful legal proceedings in 2016» received the prize of PLN 10,000.

XI Głogów Days of Science and Art

2018-03-05

On March 8-9, 2018, the State Higher Vocational School in Głogów organizes the 11th Głogów Days of Science and Arts. Fans of technical sciences will carry out chemical and physical experiments, look at the formation of 3D cubes and build their own tin army. Humanists will have the opportunity to meet with film, advertising, philosophy and history. Everyone can join the nursing skills workshop, where they will become familiar with the specifics of the nurse profession and check their knowledge and skills in the field of first aid. The scholars of the Institute of Economics of the Głogów university will provide a lecture on tax systems and together with participants will consider whether Bitcoin is a phenomenon of our time. The event will take place at the State Higher Vocational School in Głogów at ul. Piotra Skargi 5.

Another award for the students of the College of Information Technology and Management in Warsaw

2018-03-05

Last year, three students from the College of Information Technology and Management in Warsaw: Bartek Kmita, Kamil Kryński and Wojciech Szwed completed a six-minute science fiction film as part of their diploma thesis. The film «Paradigme» was completed in the first half of 2017 with the support of Film Busters and Platige Image. It won recognition at the London X4 Seasonal Short Film Festival as the Best Film of Sci-Fi / Fantasy and won the award for Best Montage at the 48th KRAF Short Film Festival in Rijeka, Croatia. He has now been awarded the Fantasy / Sci-Fi Feedback Film Festival in Los Angeles for the best pictures. See: <https://youtu.be/PkOYODsUEXE>

Celebration of March ,68 at the University of Warsaw

2018-03-05

Next Thursday, March 8, 2018, is the 50th anniversary of the March events at the University of Warsaw. Student protests in 1968 were brutally pacified by the communist security service. Debates, conferences and exhibitions will take place at the University of Warsaw to commemorate these tragic days and to honor their participants. The celebrations will begin on March 8 at 12.00 with placing flowers at the plaque commemorating March <68, located at Krakowskie Przedmieście, next to the main gate of the University of Warsaw. At 13.00 in the former University Library Professor Jerzy Eisler will give a speech «March <68 after half a century: assessments, interpretations and manipulations». At 5 pm, a meeting with Adam Michnik- one of the participants of the March 1968 events- will take place in the Column Hall of the Historical Institute,. The interview will be led by Dr Joanna Wawrzyniak from the Institute of Sociology at the University of Warsaw and Professor Dariusz Stola, director of the POLIN Museum of the History of Polish Jews. More: <https://www.uw.edu.pl/50-rocznica-marca-68-plan-urowczystosci/>

Polish Airlines LOT cooperate with the university in Chełm

2018-03-05

The State Higher Vocational School in Chełm has signed an agreement on cooperation with Polish Airlines LOT. According to the agreement, students of the Pilot of the Mechanics and Machine Design specialties might take apprenticeships in Polish Airlines LOT. In addition to the theoretical part and learning about the specifics of the work, the young pilots will participate in the flights of passenger planes belonging to the LOT fleet. The Polish LOT wants to provide the initial recruitment process for the pilot position at the State Higher Vocational School in Chełm. As part of the agreement, both the University of Chełm and LOT will carry out joint projects, events, conferences and campaigns to promote civil aviation.

Summer space school in Austria

2018-03-05

Students and young scientists from Poland will have the opportunity to design space missions under the supervision of specialists and engineers from the European Space Agency in July 2018. Until March 31, 2018, the second year students, as well as young scientists, may submit applications to the summer school in Alpbach, a city in western Austria. The workshop will last from 17 to 25 July 2018, and its participants will be involved in the creation of a mission with aim to provide a planetoid sample to Earth. In Poland, information on the program is provided by Dr Anna Łosiak from the Institute of Geological Sciences of the Polish Academy of Sciences at the following e-mail address: anna.losiak@twarda.pan.pl More about the summer school in Alpbach: <https://www.summerschoolalpbach.at/>

Competition for the educational board games creators at the Warsaw University of Technology

2018-03-05

The Center for Innovation Management and Technology Transfers of the Warsaw University of Technology organizes Science Game Jam on March 10, 2018. Science Game Jam is a marathon of creating board games about science. The event will start at 10:00 at the building at 4 Rektorska Street in Warsaw. Teams have a task to develop a game prototype within a few hours. Then, the jury will select the best solutions that will be further developed. They will also be presented in October 2018 at the «Planszówki na Narodowym» event, which will take place at the National Stadium in Warsaw. Registration for the event: <https://docs.google.com/forms/d/e/1FAIpQLScWlidSj-uNAh2Dlv59ulkJIPOL-VuvMIN81k3qKgRPqiKLOWg/viewform>

Conference on literature and culture of the 1860s at the University of Warsaw

2018-03-05

The Department of Literature and Culture of the Second Half of the XIX Century of the Institute of Polish Studies at the University of Warsaw invites to the conference „Dislocations. Literature and culture of the 1860s between politics and privacy.” From 5 to 7 March 2018, scientists from all over Poland will present presentations with issues elaborating on the conference topics. Professor Grażyna Borkowska from the Institute of Literary Research of the Polish Academy of Sciences will read on „Reading the map: Lithuania. Orzeszkowa and her cycle Znad Niemna „„ Dr Iwona Węgrzyn from the Jagiellonian University will reflect on the topic „Galician Lesson of 1863” and Professor Tomasz Sobieraj will give a speech „Between the private and the public. Models of novels in Polish literary criticism of the 1860s. „ The conference will take place in the Ballroom of the Tyszkiewicz-Potocki Palace in Warsaw at ul. Krakowskie Przedmieście 32. Funds for university foreign promotion from the National Academic Exchange Agency

2018-03-06

The National Academic Exchange Agency since 1 March 2018 invites participants to apply for the Modern Foreign Promotion program. The program is addressed to universities located in Poland, scientific organizations of the Polish Academy of Sciences, Polish research institutes and international scientific institutes operating on the territory of Poland. It gives the opportunity to receive financial support for the implementation of international promotion projects, characterized by innovation and a high degree of matching to the needs of the target group as well as for the purposes of the university or scientific bodies. The proposed projects may cover a wide range of activities, from with integrated information campaigns and promotional activity in selected communication channels (for example social media), to direct contacts implemented in various ways both at home and abroad. More: <https://nawa.gov.pl/institucje/programy-dla-institucji-juz-wkrotce>

Scholarships from the International Visegrad Fund

2018-03-06

Until 15 March 2018, the International Visegrad Fund invites Polish students to apply for scholarships for master's and doctoral studies. Scholarships are offered in all scientific disciplines, in every Central Europe's language and include a stay at the university for 1 to 4 semesters. The program does not impose any age limit for candidates. Scholarship holders may continue the studies or conduct research at universities and other research centres in Central and Eastern Europe. Accepted candidates receive a scholarship in the amount of 2,300 euro per semester while the accepting scientific institution receives a grant of 1,500 euro per semester. The International Visegrad Fund was established under the agreement signed in 2000 and is the only institutionalized form of cooperation within the Visegrad countries (Poland, Hungary, the Czech Republic and Slovakia). The main tasks of the Fund include supporting cultural, scientific, educational, artistic and

tourist cooperation. All details and access to the online application system: <https://www.visegradfund.org/news/2018-2019-visegrad-scholarships/>

International doctoral studies at the Medical University of Białystok

2018-03-06

From the end of May 2018, young scientists from Europe can apply for international doctoral studies in medical biology and biostatistics at the Medical University of Białystok. The studies are intended for graduates of such majors as: biology, biotechnology, medical analytics, pharmacy, medical and related sciences, who do not have a PhD and have stayed in Poland for no longer than a year in the last 3 years. Polish researchers who have been living and working abroad for the last three years, and in Poland for no more than a year, can also apply for admission. The studies are free. Each PhD student will receive a scholarship of EUR 2,600 per month for 4 years. They will be run as part of the ImPRESS project, co-financed by the European Commission and the Ministry of Science and Higher Education. More: <https://www.umb.edu.pl/en/impress>

Series of social conferences „Polonia Restituta. Decalogue for Poland on the 100th anniversary of independence”

2018-03-06

On the occasion of the 100th anniversary of regaining independence by Poland, the Ministry of Science and Higher Education together with the Council for Social Affairs of the Polish Episcopate Conference is organizing a series of ten scientific thematic conferences in the most important Polish academic centers. The project «Polonia Restituta. Decalogue for Poland on the 100th anniversary of independence» will begin on March 12, 2018 with a conference dedicated to the family, which will be held at the Cardinal Stefan Wyszyński University in Warsaw. A series of 10 nationwide scientific thematic conferences takes up issues in broadly considered socio-political, economic and cultural life. The conferences will be devoted to: family; work, entrepreneurship and the social market economy, citizenship and patriotism; freedom, sovereignty and the rule of law, culture and identity, dignity and social justice, ecology, social solidarity and sustainable development, the state in its relations with the church; Europe and the human person and its rights. The culmination of the cycle will be the international congress in Krakow, which will take up the problem of conscience and responsibility in public life. More: <https://polonia-restituta.pl/>

Conference „Energy and defense in the Nordic-Baltic region”

2018-03-06

The Polish Institute of International Affairs, the Norwegian Institute of International Affairs, the Center of Eastern Europe of the Maria Curie Skłodowska University in Lublin and the Faculty of Political Science of the Maria Curie Skłodowska University in Lublin invite the participants to the conference „Energy and Defense in the Nordic-Baltic Region” on March 9, 2018. The conference will be held at the Lublin Conference Center. During the event, the results of the project «Nordic-Baltic Security in

Times of Uncertainty: The Defense-Energy Nexus» will be presented, and the scientists will focus on two thematic areas. The first is «Russia's neo-imperial ambitions: the implications for defense in the region.» The second one is an attempt to answer the question whether energy is the key to the security of the region. The conference registration is open and registration is online until March 8, 2018 at: https://www.pism.pl/rejestracja/?lang_id=1&id_event=175&f_rodzaj=1

Internationalization of the Lodz University of Technology

2018-03-06

The coordinators and faculty coordinators for of the program Erasmus+ outlined the long-term internationalization strategy of the Lodz University of Technology. The strategy was developed in 2017 by the International Cooperation Center of the Lodz University of Technology, which is the unit responsible for the integration of all processes related to the cooperation of the Łódź university with foreign partners. According to the assumptions in 2020, the Lodz University of Technology is to be «one of the best innovative research university with a technical profile in Poland» with an established international position. The university, will start implementation of the new strategy assumptions with the organization of the conference «Double diplomas as a pillar of international strategic partnerships». It will take place in June 2018 at the International Cooperation Center under the patronage of the Minister of Science and Higher Education and the National Academic Exchange Agency.

Management in sport - a new field of study at the Rzeszów University of Technology

2018-03-06

Management in sport is a new direction, launched from October 1, 2018 at the Faculty of Management in cooperation with the Center of Physiotherapy and Sport at the Rzeszów University of Technology. It is supposed to be practice-oriented, to educate experts in management and the use of IT resources in sport. Graduates will be able to be sport managers,

coach consultants, employees of the image agency and sports enterprises. They will have knowledge of management, use of information and communication technologies, management of human potential, and preparation of sports contracts. Rzeszów University of Technology conducts 28 fields of study. The most popular directions are aviation and cosmonautics.

Symposium on the directions of Polish development at the College of Social and Media Culture in Toruń

2018-03-06

Startups, 5G technology, using innovation in the defense sector - such development directions for Poland were indicated by the Minister of Investment and Development Jerzy Kwieciński during the Symposium „Digital Independence. Polish technological thought, from idea to success. „ It took place at the Higher School of Social and Media Culture in Toruń. The biggest problem for startups is currently breaking into the market, rather than simply raising capital for development - said Prime Minister Mateusz Morawiecki during the symposium. In turn, the Minister of Investment and Development, Jerzy Kwieciński, pointed out that half of the startups «flee from Europe» and is bought by other countries, including the United States or Israel. The latter country takes over more startups from the European market than several times bigger France. This shows that a small country, with strong support from the state, is able to build a strong innovation policy. We want to build such a policy - emphasized Minister Kwieciński. More about the symposium: <https://wksim.edu.pl/m-blaszczak-absolwenci-wksim-na-jlepszi/>

25th Engineering Job Fair

2018-03-07

On March 13-14, 2018, the 25th Engineering Job Fair will take place at the Warsaw University of Technology. The exhibition organizer - the BEST Warsaw association - emphasizes that it is an ideal opportunity to meet with representatives of companies, learn about potential employers and their require-

ments. It is also the chance to apply for dream practice, internship and regular work. Exhibitors will organize workshops during both days of the fair, e.g. MARS Polska holds lecture on „Production management, engineer challenge as a manager”, Schneider company on „Drive technology and robotics in the era of Industry 4.0”, and Polskie Koleje Państwowe Intercity on „Engineering of modern rail transport”. More: <http://targipracy.org.pl/>

Polish-Chinese cooperation in the development of electromobility

2018-03-07

UNIMOT joint-stock company, the largest Polish independent importer of liquid fuels, plans to actively participate in the development of electromobility in Poland. UNIMOT considers extending the product range with charging stations for electric vehicles. The company's board of directors signed a preliminary agreement with Wanbang Charge Equipment Co. Ltd. (Star Charge) - the largest independent operator of electric vehicle charging stations in China. As part of the agreement, UNIMOT will also analyze the possibility of producing electric chargers based on Star Charge solutions, as well as launching a joint research and development center to develop those technologies.

University of Warsaw holds workshop on the Constitution for Science

2018-03-07

The authorities of the University of Warsaw invite members of the academic community - employees, doctoral students, students and graduates - to workshops on the new Law on Higher Education and Science. During the workshops, which take place between March 5 and 19, their participants will talk about the most important areas of the university's functioning: education, research and development and staff. Together, they will reflect on what currently hinders them from studying, working and planning their careers, what barriers should be removed and how to use the provisions of the new

law to achieve the University's goals. More: <https://come.uw.edu.pl/nowaustawa/>

Rzeczpospolita runs the conference on Polish science Edukator 2018

2018-03-07

Polish daily newspaper Rzeczpospolita holds conference on Polish science with the participation of Deputy Prime Minister Gowin and Minister Zalewska. The year 2017 was the time of changes in the educational system of Poland. In September, the reform of primary and secondary education entered into force, and the Ministry of Science and Higher Education presented the assumptions of changes in the higher education system. Regarding to the reforms, the Rzeczpospolita organizes the conference «Edukator 2018» on March 15, 2018 with the participation of Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education and Anna Zalewska, Minister of National Education. The conference is to summarize the state of reforms, make first analyses of their effectiveness and discuss the necessary adjustments. The organizers target to contrast the reformers' perspective with the business and prepare appropriate recommendations. The registration for the conference is open and the event will take place in the Library of the University of Warsaw at ul. Dobra 56/66. COST Association holds conference on quantum in the Copernicus Science Center

2018-03-07

On 8 March 2018, the COST Association will present COST CONNECT project at the Copernicus Science Center. The event is titled „Quantum: Where will the next jump go?” Prof. Aleksander Bobko, secretary of state in the Ministry of Science and Higher Education and Dr Ronald de Bruin, director of the COST Association confirmed their participation in this conference. The cycle of events under the name COST CONNECT was initiated by COST (European

Cooperation in Science and Technology) in June 2017. The aim of the project is to combine COST representatives and other scientists interested in the given scientific issue, who could contribute to the research initiated by COST. The European Program for Scientific and Technical Cooperation is jointly organized by 36 European countries and Israel as an institutional structure. Its most important task is to organize multilateral scientific and technical cooperation of member countries. More: http://www.cost.eu/events/cost_connect_quantum

Ministry of Science selected beneficiaries of the „Dialog” program

2018-03-07

The Ministry of Science and Higher Education published the list of projects approved for funding within the „Dialog” program. The «Dialog» program includes co-financing of activities in three areas: „Scientific excellence”, „Science for innovation” and „Humanities for development”. Its purpose is to support activities aimed at building cooperation and strong relationships between entities operating in science and the socio-economic areas. The beneficiaries are the Polish Press Agency Foundation, which received nearly PLN 2 million for running and developing the website „Science in Poland”, Copernicus Center Foundation, whose project „Humanities in dialogue” will be supported with almost PLN 1.5 million and the Pedagogical Faculty of the Ignatianum Academy in Krakow, which will receive over PLN 1 million for the „Inclusive Society in the Catholic Social Studies” project. Dual studies are effective combination of learning and work

2018-03-07

Our goal is to more precisely adapt curricula to the needs of the market. Dual studies allow students to combine learning with work effectively through simultaneous participation in teaching at the university and working at the workplace. This way, students acquire new skills faster and more effectively - said Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education during the Second Conference on Dual Education - EDUAL in Gliwice. In December 2017, the National Center for Research and Development, the executive agency of the Ministry of Science, announced a competition aimed at adapting curricula to the expectations of future employees and their employers. The recipe for success is to run an effective combination of learning and work, in terms of implementation of the Edual education programs. The contest's budget is PLN 100 million. The EDUAL conference was organized by the Silesian University of Technology and the Katowice Special Economic Zone and the city of Gliwice.

Vice PM Gowin: Expenditure on learning must increase

2018-03-07

On Thursday March 8, 2018 the Committee of the Council of Ministers will analyze a draft version of the Constitution for Science to prepare it for government session next week- informed Jarosław Gowin Deputy Prime Minister, Minister of Science and Higher Education, in the broadcast of „Political Salon of the Program Three” in Polish Radio. Deputy Prime Minister Gowin emphasized that expenditures on learning must increase if we want to have a truly modern economy and implement the Strategy of Responsible Development. In his opinion, the Constitution for Science will improve the situation at Polish universities, regardless of the amount of funds allocated for science and higher education.

Polish delegation visits Japan to cooperate in the energy storage technologies

2018-03-07

Michał Kurtyka, Undersecretary of State in the Ministry of Energy visited Japan. The delegation with Polish representatives of state companies and key institutions supporting the implementation of innovative solutions in Poland visited a factory producing cells for lithium-ion batteries. The delegation members were acquainted with the technologies used in this industry. During the talks, Deputy Minister Kurtyka assured that Poland is ready to cooperate for the development of energy storage technologies. Deputy Minister also took part in the 9th International Rechargeable Battery Expo - Battery Japan. The fair is recognized as the global meeting for representatives of the battery industry. In February 2018, the Polish scientific consortium Pol-Stor-En was founded, established by seven scientific units, whose goal is cooperation in the research on energy storage.

Competition for Polish-Luxembourgian service innovations

2018-03-07

The National Center for Research and Development has opened an on-line application for the CORE 2018 competition announced by the Luxembourg agency Fonds National de la Recherche. Applications for bilateral, Polish-Luxembourgian projects in the category «Innovation in Services» can be submitted to the Fonds National de la Recherche. The National Center for Research and Development allocates PLN 2 million to co-finance Polish entities for the projects that will be accepted for funding under the competition procedures. Applications can be submitted by 18 April 2018 only in electronic version, in English. More: <https://www.fnr.lu/funding-instruments/core/>

National Center for Research and Development announces a competition for projects within the TECHMATSTRATEG program

2018-03-08

The director of the National Center for Research and Development has announced the second competition for projects under the strategic program of scientific research and development work within „modern material technologies” - TECHMATSTRATEG. The main objective of the Program is to develop knowledge that will transfer innovative solutions to the socio-economic environment and raise international position of Poland in scientific research and development works. The competition covers five strategic problem areas: technologies of construction materials, technologies of photonic and nanoelectronic materials, technologies of functional materials and materials with designed properties, non-waste material technologies, technologies of biodegradable engineering materials, materials technologies for energy storage and transmission. The budget allocated for selected projects in the competition is PLN 200 million, and applications can be submitted from April 9 to June 8, 2018. More: <http://www.ncbr.gov.pl/programy-strategiczne/nowoczesne-technologie-materialowe---techmatstrateg/techmatstrateg-ii-konkurs/aktualnosci/art,6013,techmatstrateg-ii-konkurs.html>

Talk & Tech 2018 Conference for women from the IT and new technologies

2018-03-08

On 9-10 March 2018, the Talk & Tech 2018 Conference will be held at the Center of Audiovisual Technologies in Wrocław. This is the first meeting of women from the IT and new technologies industries under the patronage of the Association for Computing Machinery. The aim is to promote the involvement of women in all aspects of the IT industry. The first day of the conference will be filled with lectures of the women working in the new technologies industry. The second day is to be devoted to workshops that will bring closer career opportunities in the IT industry. The special guest of the event will be Dr. Aleksandra Przegalińska, assistant professor at the Center for Research on Organizations and Workplaces at the University of Warsaw, currently working and conducting research at the Massachusetts Institute of Technology in Boston. More: <http://talkandtech.pl/>

Students from China at the University of Białystok

2018-03-08

39 students from Luoyang Normal University in China will spend a semester at the University of Białystok. University authorities expect that students from this country will come to Białystok next year. Chinese students will study in English. They have nearly 40 subjects to choose at six faculties: pedagogy and psychology, economics and management, law, historical-sociological, mathematics and computer science, and physics. They will not pay for participation in classes but they will cover the costs of their accommodation in dormitory. The Białystok University plans to launch paid MA studies in English for Chinese students, including such fields as international relations, computer science, pedagogy or English philology. Internationalization of studies is one of the priorities for the authorities of the University of Białystok. Currently, 458 foreigners are studying at the University, among which the most numerous groups are Lithuanians, Belarussians and Ukrainians.

Fair of Academic Education Offers will be held in Toruń

2018-03-08

On March 13, 2018 the Nicolaus Copernicus University of Toruń, the XXV National Fair of Educational Offerings „Educational Promotion 2018” will be held. Candidates for studies will be able to get acquainted with the full didactic offer of higher education institutions, study programs, and admission policy for particular faculties in the academic year 2018/2019. Almost 20 universities from all over Poland will present their educational offers, including: the Nicolaus Copernicus University, the Collegium Medicum in Bydgoszcz; Universities from: Gdańsk, Łódź, Olsztyn, Warsaw, Bydgoszcz, and Zielona Góra; Naval Academy in Gdynia, Gdynia Maritime University, Pomeranian Academy in Słupsk, as well as Universities of technology from Gdańsk, Koszalin, Poznań and Warsaw as well as the State Higher Vocational School in Włocławek and the Gdańsk Medical University. There will be also military schools presented: the Higher School of Air Force of Dęblin and the Military University of Technology in Warsaw. The «Educational Promotion 2018» fair will take place in the Auditorium of the Nicolaus Copernicus University at ul. Gagarina 11 in Toruń. More: <http://www.umk.pl/kandydaci/targi/>

Scientists from the AGH University of Science and Technology on podium of the Process Simulation Cup competition

2018-03-09

Eng. PhD student Ewelina Brodawka, from the Faculty of Energy and Fuels at the AGH University of Science and Technology in Krakow, won the international competition for the simulation of the technological process Simulation Cup (PSC2017). The third place was taken by Eng. Kamil Krzemień, who studies chemical technology at the same faculty. The competition, which lasted from March 2017 to February 2018, was attended by over 150 students and PhD students from 70 leading technical universities from around the world. In the year-round competi-

tion the participants had to demonstrate their skills in chemical process engineering, chemical simulations, knowledge about automation and in control of industrial processes.

Seminar of Collegium Civitas on terrorism in political terms

2018-03-09

The Center for Terrorism Studies Collegium Civitas in Warsaw and the History Meeting House are organizing a scientific seminar „From a terrorist to a politician” on March 23, 2018. The seminar is a part of the interdisciplinary project «Look at terrorism» run by Collegium Civitas. It aims to present the history of terrorism and shows its complexity from the perspective of various sciences: economics, political science, security sciences, media studies, literary studies, sociology and psychology. During the seminar a discussion panel was planned with the participation of the Member of the Polish Sejm, Joanna Kluzik-Rostkowska, a political scientist and expert on South America Dr. Piotr Łaciński and an expert on security and the author of the «Encyclopedia of terrorism» Dr. Krzysztof Karolczak. The event will take place on March 23, 2018 at 18.00 at the Dom Spotkań z Historią in Warsaw at ul. Karowa 20. Admission is free. The organizers ask for confirmation of their presence at the address: cbnt@civitas.edu.pl

Poznan Fair to launch Scientific Book Review in March

2018-03-09

The 23rd Poznań Scientific Book Review will begin on Monday, March 12, at the University Library in Poznań. Scientific books of Poznań publishers will be available until April 26. Next fair "Meeting with the book" is planned for 23-25 March, when the 22nd Poznań Science and Popular Science Book Fair will take place at the Poznań International Fair. The Poznań Science and Popular Science Book Fair, organized by the Adam Mickiewicz University Publisher in Poznań, is a presentation of the academic, scientific and popular science offers. During the weekend, meetings with authors, discussion panels and workshops will be provided for the participants and visitors of the Fair. The Scientific Book Review presents the academic output of Poznań and it is organized under the honorary patronage of the Rector of the Poznań University. Last year, 22 exhibitors presented over 340 books and scientific journals. <http://radiopoznan.fm/patronaty/23-25-marca-22-poznan-skie-targi-ksiazki-naukowej-i-popularnonaukowej>

Krakow University launched first postgraduate program of practical coloproctology in Europe

2018-03-09

The Medical Center for Postgraduate Education of the Jagiellonian University together with the Faculty of Medicine of Collegium Medicum of the Jagiellonian University inaugurated a two-semester post-graduate program „Practical Coloproctology”. This is the only university postgraduate program in the European market that takes into account the problems of coloproctology in theory and practice. The studies were created in cooperation with the Polish Club of Coloproctology, which deals with the problems of colon diseases. The most distinguished specialists from all over Poland were invited to conduct the classes. 30 surgeons participate in the first edition of the course.

Meeting with intelligence officers at the University of Lodz

2018-03-09

The Faculty of Philosophy and History of the University of Lodz invites participants on 14 March 2018 to meet with ... officers of the Foreign Intelligence Agency. They will give a lecture, in which they are to show the specifics and goals of FIA work, as well as present the methods they use. After the lecture, the participants are given possibility to ask questions. The meeting will take place on March 14, 2018 at 12:00, room 47 at the Institute of History of the University of Lodz, at 27a Kamiński Street.

National Academic Exchange Agency launched the „Return to Poland” program

2018-03-09

The National Academic Exchange Agency launched „Return to Poland” program to enable Polish scientists to return to the country and take up employment in Polish universities or scientific organizations. It offers the scholars a competitive salary and the opportunity to run project teams. Over the last few decades, several thousand scientists left Poland – they were talented, young people who were looking for conditions for scientific work and the exchange of ideas out of Poland. Today we have the conditions to accept them back in Poland. Recently, we observed tremendous changes in Polish science: with full responsibility, I state that it is possible to run world class research in Poland today – emphasized Deputy Prime Minister Jarosław Gowin during the conference opening the Program. Cooperation agreement between the University of Szczecin and Hoya Lens Poland

2018-03-12

The Faculty of Mathematics and Physics of the University of Szczecin has signed a cooperation agreement with Hoya Lens Poland. Hoya is one of the world's largest manufacturers of spectacle lenses and other optical products. The agreement concerns cooperation through practitioners - employees of Hoya Lens Poland - as well as consultancy for creating and modifying study plans related to ocular optics. It also establishes apprenticeships and internships for students of spectacle optics faculty at Hoya. University of Szczecin attaches great importance to the practical skills of students of the optics faculty. Previously, it has already signed cooperation agreements with both local optical entrepreneurs: Rako Optyk Serwis and Optyk Trendy, as well as the Polish Blind Association West Pomeranian District and with Essilor JZO Soczewki Okularowe.

Competition for the Siemens Award

2018-03-12

The entries for the XXIII Contest for the Siemens Award for 2017 will be accepted until March 31, 2018. The competition is organized by Warsaw University of Technology and Siemens AG. It promotes outstanding achievements in technology and scientific research conducted by employees of academic and non-academic institutions in Poland. The Siemens Award may be given to authors of works concerning areas of interests to Siemens AG such as: electrical engineering and energy, generation, transmission and use of electricity, electronics and information technology, automation and robotics, rail transport as well as traffic management and control. Works can be submitted at: Rector's office of the Warsaw University of Technology Pl. Politechniki 1, room 106, 00-661 Warsaw with the note «Competition for the Siemens Award»

Open day of the MOST Wiedzy project at the Gdańsk University of Technology

2018-03-12

On March 14, 2018, the Open Day of the MOST (Bridge of Knowledge) project will take place at the Faculty of Management and Economics of the Gdańsk University of Technology. MOST Wiedzy is a portal for a multidisciplinary, open system of knowledge transfer allowing scientists to present their scientific achievements. The Open Access (OA) enables free and unlimited access to scientific works in digital version. The goal of the project is to increase the availability, coherence and re-use of learning resources. These resources are made available to representatives of the world of science, entrepreneurs and the public in an open, simple and transparent form via the portal. More: <https://mostwiedzy.pl/>

Pedagogical University of Krakow talks on social security

2018-03-12

The Krakow University together with the ZUS (National Social Insurance Institution) organized a conference with the participation of students, teachers and directors of local high schools. For two days (7-8 March 2018) they talked about how to conduct education on social security -The work of ZUS includes not only pensions, but the whole system of benefits. Throughout our life, from birth to death, we are affected by the issues related to social insurance - said Paweł Jaroszek, vice-president of ZUS in the program of the Polish Television in Krakow. In turn, professor Kazimierz Karolczak, the rector of the Pedagogical University in Krakow, emphasized the importance of education in this area. - Our graduates go into schools and will educate. Therefore, the teachers themselves must be perfectly educated in the field of social security, in order to transfer knowledge to their students fairly – added Professor Karolczak.

European Innovation Council to be a new opportunity for Polish industry in Horizon 2020

2018-03-12

On 12 April 2018, the Centrum Kreatywności Targowa in Warsaw will host a conference and workshops: „European Council for Innovation - a new opportunity for Polish industry in Horizon 2020”. Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education accepted the honorary patronage on the event. The partners include National Center for Research and Development, Enterprise Europe Network, Employers' Union Polish Clusters, Lewiatan Confederation and National Contact Point for Financial Instruments of European Union Programs. Participants will learn the rules of applying for EU grants, they also receive practical tips related to applying for co-financing from framework programs. The European Innovation Council particularly invites companies interested in applying to the Horizon 2020 Framework Program, Polish research and development units, beneficiaries of grants, as well as representatives of public and local administration. Registration for the event: <http://www.kpk.gov.pl/?event=europejska-rada-ds-innowacji-eic-nowa-szansa-dla-polskiego-przemyslu-w-horyzoncie-2020>

Graduate Talents Days

2018-03-12

The 9th largest job and apprenticeship fair in Poland, Graduate Talents Days, have begun. The fair invites students and graduates in the largest academic centers: Warsaw (6 March) and Wrocław (8 March), and through March- Rzeszów, Poznań, Kraków, Katowice, Łódź and Gdańsk. Over 700 employers take part in the fair and they prepared over 5,000 job offers, apprenticeships and internships for young specialists. As part of Absolvent Talents Days there will be 100 professional training sessions provided. More: <https://www.absolvent.pl/talentsdays>

Main Council of Science and Higher Education supports the Constitution for Science

2018-03-12

The basic objectives of the Act, which are strengthening the role of science and higher education in the development of Poland and increasing the contribution of Polish scientists to global science, are fully in line with the proposals formulated by the Polish academic community for a long time - said Professor Zbigniew Marciniak, chairman of the Main Council of Science and Higher Education. On March 8, 2018, the Main Council of Science and Higher Education adopted a resolution in which it expressed unequivocal support for solutions contained in the draft law on higher education and science. As emphasized in the document, particular attention should be paid to the fact of extensive consultations undertaken in the academic environment and including a lot of their remarks by the Ministry of Science into the draft Constitution for Science.

Sergey Kovalev to receive an honorary doctor of the University of Warsaw

2018-03-13

Dr Sergey Kovalev, biophysicist, defender of human rights and political activist, will receive the title of doctor honoris causa of the University of Warsaw. Sergey Kovalov participated in the creation of the first group in the Soviet Union, which protested against the violation of freedom. In the 1970s, he was sentenced to seven years of prison and three years of exile for activities against the communist authorities of the Soviet Union. He was the chairman of the Human Rights Committee in Russia in the early 1990s. In 2009, President Lech Kaczyński awarded Sergey Kovalev the Great Cross of the Order of Merit of the Republic of Poland. The ceremony of awarding the title for Kovalev will take place on March 14 at 12 in the Senate Hall of the Kazimierzowski Palace in Warsaw at Krakowskie Przedmieście 26/28.

„Polish universities - Horizon 2020 strategy“

2018-03-13

The National Contact Point for Research Programs of the European Union in cooperation with the Confederation of Rectors of Academic Schools in Poland invites participants to Olsztyn for an informative meeting „Polish universities - the strategy for Horizon 2020. The European Union Framework Program for research and innovation as an instrument of internationalization of scientific organizations“. It will be devoted to increasing the participation of Polish universities and industry in the Horizon 2020 program, in particular, in grants of the European Council for Scientific Research, and in competitions for Spreading excellence and widening participation (Teaming, Twinning, ERA-Chairs). The event will take place on March 21, 2018 (Wednesday) at 11.00 - 15.00 in Olsztyn, building of the Old Boiler Room, ul. R. Prawocheński 9. Registration for the event: <http://www.uwm.edu.pl/rpk/szkolenia/rejestracja?training=520>

Students will become ambassadors of Grupa Azoty

2018-03-13

The pilot of the program „Grupa Azoty Group Ambassador“ is launched. Its aim is to interest university students in building a professional career in this one of the largest capital groups of the chemical and fertilizer industry in Europe. The pilot program starts in March 2018 and is addressed to second and third year students of selected universities. «Ambassadors» this year will become students of the Jagiellonian University in Krakow, Silesian University of Technology, Warsaw University of Technology and West Pomeranian University of Technology in Szczecin. The aim of the program is to promote the brand in academic communities. Dynamic, creative ambassadors who are representatives of the group at the university will raise interest in Grupa Azoty's activities and build its positive image as a desirable employer. Applications can be submitted until March 16, 2018 at: <http://grupaazoty.com/ambasadormarki/>

About cryptocurrencies at the Warsaw School of Economics

2018-03-13

On March 19, 2018 the Banking Institute of the Warsaw School of Economics invites participants to the conference „Blockchain - a breakthrough innovation or media gadget?“ Bitcoin, along with other virtual currencies, has entered common consciousness as an alternative to traditional forms of money and investment. However, due to the controversy related to speculation on Bitcoin and the emerging information about its use for criminal purposes, there is a real risk of missing the amazing potential of Blockchain, which is the technological foundation of the cryptocurrency market. The conference is to start a scientific discussion on the perception of Blockchain technology and its potential for use in the financial system. Representatives of the authorities of the National Bank of Poland, the Polish Financial Supervision Authority, commercial banks and companies dealing with innovative technologies will take part in it. More: http://kolegia.sgh.waw.pl/pl/KES/struktura/IB/konferencje/Strony/blockchain_przelomowa_innowacja_czy_medialny_gadzet.aspx

Innovative medical devices at the Congress of Health Challenges

2018-03-13

- I would like innovative telemedicine solutions to be increasingly included in the scope of guaranteed services. We will work on this - said Minister of Health Łukasz Szumowski during the panel discussion about innovations in medical devices, organized by the Polish Chamber of Commerce of Medical Devices POLMED. The discussion on the state of medical innovation and development barriers in the commercialization of projects took place as part of the Congress of Health Challenges in Katowice, which lasted from 9 to 11 March 2018. - We have Polish cardiological products that are sold in the world, but not in Poland, because they are not among the products refunded by the state. It is difficult to talk about commercialization until there is a fast path from commercialization to reimburse-

ment - said Minister Szumowski. At the end of the panel, the Polish Chamber of Commerce of Medical Devices POLMED announced the commencement of work on the report on the market of medical devices in Poland.

Inauguration of the „Polonia Restituta“ project

2018-03-13

Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education, announced the start of the project „Polonia Restituta. Decalogue for Poland on the 100th anniversary of regaining independence.“ The ten scientific conferences that make up the project are intended to deepen reflection on Polish history and the present situation in the context of independence. - We came to the conclusion that in celebrating the 100th anniversary of regaining independence, the most important thing is looking into the future, thinking about what Poland should be like. My co-workers proposed to look at the past, present and future of Poland from the perspective of Catholic social science - said Deputy Prime Minister Jarosław Gowin, announcing the inauguration of the conference. The President of Poland Andrzej Duda accepted the Honorary Patronage of the event. More about the project in the previous article: <http://polishscience.pl/en/series-of-scientific-conferences-polonia-restituta-decalogue-for-poland-on-the-100th-anniversary-of-independence/>

International competition for innovations in electronics

2018-03-13

The call for innovation proposals is currently being held within an international competition organized as part of the ECSEL Joint Undertaking. The competition is intended for authors of innovative projects in electronics. The ECSEL Joint Undertaking is a public-private partnership in electronic components and systems. The institution manages a research and innovation program to build and develop a strong, globally competitive electronic components and systems industry in the European Union. PLN 1.5 million has been allocated for co-financing the participation of Polish entities in projects selected as part of the National Center for Research and Development competition. More: <http://www.ncbr.gov.pl/programy-miedzynarodowe/wspolpraca-wielostronna/-inne-inicjatywy-wielostronne/ecsel-ju/aktualnosci/art,6018,wspolne-przedswiezicie-ecsel-otwarcie-naboru-wnioskow-w-konkursie-2018.html>

Polish female scientist among the emerging talents of world science

2018-03-13

Dr Agnieszka Gajewicz from the University of Gdańsk, holder of the scholarship L'Oréal Poland Program „For Women and Science”, was awarded the International Rising Talents. The Polish woman was included in the group of 15 women from different countries who, thanks to their research, have a chance to change the world. Dr Gajewicz is the third Polish woman in the history of the competition, who was awarded this distinction. She was appreciated for research on chemical risk assessment of various types of substances. A researcher from the University of Gdańsk recently deals with the development of chemoinformatic methods in science. Chemoinformatics is a relatively new field of science at the intersection of computer science, mathematics, chemistry and theoretical physics and chemometrics. International Rising Talents is a competition for emerging world science talents organized by the

L'Oréal Foundation and UNESCO. The official award ceremony will take place during the final gala on March 21 in Paris. More: <https://en.unesco.org/women-in-science-rising-irt-2018>

Innovative technologies at the Lodz University of Technology

2018-03-14

Professor Anna Kogut will present opportunities for cooperation between universities, entrepreneurs and the National Center for Research and Development at the Lodz University of Technology. Professor Kogut, the President of the Council of the National Center for Research and Development, will open a conference on innovative technologies. The aim is to match the world of science and business for providing successful research, development and commercialization of innovative solutions and technologies. The organizers of the event are Center of Technological Transfer Ltd and the Center for Cooperation with the Economy, Innovation and Technology Transfer of the Lodz University of Technology. The meeting will take place on Tuesday, 20 March 2018, at the Bay of Sport of the Lodz University of Technology at Politechniki 10.

Rector of the School of Tourism and Recreation nominated in the event industry competition

2018-03-14

Professor Jolanta Żyśko, rector of the School of Tourism and Recreation in Warsaw, was nominated by the MP Power Awards jury for the award in the „Association” category. MP Power Awards is the first nationwide competition in the event industry. Therefore, the contribution of the Warsaw School of Tourism and Recreation to the development of event management was appreciated. The School belongs to the Vistula High Schools Group. Since 2017, the new international education program on Tourism and Recreation has been introduced at the Warsaw School, with classes held in English. One of the management specializations conducted in this

field is event management. The final of the MP Power Awards will take place on March 23, 2018, at the Służewiec Horse Race Track in Warsaw.

Review of Jewish films at the University of Gdańsk

2018-03-14

From March 15 to 18 at the University of Gdańsk the 5th Gdańsk Review of Jewish films „Shalom Polin” will be held. The event is organized by the Film Discussion Club of the University of Gdańsk and the Academic Culture Center Alternator in cooperation with the Polish-Israeli Community Common Heritage Moreshet Meshutefet. In addition to film reviews, there will be language, culinary and dance workshops and lectures introducing Jewish culture at the University of Gdańsk. The Gdansk review of «Shalom Polin» will start with a lecture on the impact of the events of the March «68 on Polish cinematography and the screening of the documentary film by Michał Jaskulski and Lawrence Loewinger «At Planty 7/9». Films will be presented in Hall 1.43 of the Faculty of Philology at the University of Gdańsk, ul. Wita Stwosza 55 in Gdańsk. More: <http://shalompolin.ug.edu.pl/>

R&D National Center to allocate over 5 billion zlotys for research and development

2018-03-14

The National Center for Research and Development will allocate over PLN 5 billion for research and development projects this year - said Piotr Dardziński, deputy minister of science and higher education. As part of the "Fast Track", - the Center's flagship program, five competitions will be provided. Their budget amounts to almost PLN 3 billion. The program is horizontal, there are no industry restrictions, and various projects are allowed to apply for co-financing. - «Fast track» supports all those entrepreneurs who have the courage to undertake innovative projects. Those that will change the reality - said Professor Aleksander Nawrat, deputy director of the National Center for Research and Development. Deputy Minister Dardziński announced the return of competitions within the «Social Innovation» program. The previous program brought an application allowing blind or visually impaired people to listen to alternative soundtracks at the cinema, such as audio description or the lecture version.

Polish scholarship program for foreigners from Eastern Partnership countries and Central Asia

2018-03-14

The call for proposals for the Stefan Banach Scholarship Program has begun. It is a joint scholarship initiative provided by the Ministry of Foreign Affairs and the National Academic Exchange Agency, implemented as part of Polish development assistance. The program allows students to undertake postgraduate studies at universities supervised by the Minister of Science and Higher Education in the field of exact sciences, natural sciences, technical, agricultural, forestry and veterinary sciences. It is addressed to foreigners from Eastern Partnership countries (Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine) and Central Asian countries (Kazakhstan, Uzbekistan, Turkmenistan, Kyrgyzstan and Tajikistan). Future scholarship holders should be

students of the final year of regular studies of exact sciences, natural sciences, technical, agricultural, forestry and veterinary sciences or they, who have completed regular studies in these areas, but not before the academic year 2015/16. An additional condition is the knowledge of the Polish language at least at level B1. The call for applications will run until 30 April 2018. See the regulations of the Scholarship Program. Łomża researchers investigate the properties of the fast-growing Oxytree tree

2018-03-14

In the area of the College of Agribusiness in Łomża an Oxytree experimental field for research purposes was founded by scientists. The main goal of the experiments was to determine the biometric features of a fast growing tree. Oxytree is a deciduous tree with unique properties. It is a resistant and undemanding plant. It is non-invasive and safe for the local ecosystem. The high quality wood obtained from Oxytree is a sought-after industrial raw material and material with high calorific value. In addition, after being cut, the tree grows back again. Dr Eng Janusz Lisowski and Henryk Porwisiak, scientists from the Łomża College have already conducted research on growth, overwintering, presence of macro and microelements as well as Oxytree's combustion heat. More about the results of research in the Scientific Notebooks of the College of Agribusiness: <http://oxytree.pl/wp-content/uploads/2018/03/Zeszyt-Naukowy-nr-67.pdf>

Upper Silesian School of Economics to launch virtual hospital

2018-03-14

Upper Silesian School of Economics in Katowice has signed a partnership agreement with the Center for Diagnostics and Treatment of Women's Diseases- Tommed. It is related to the project «Implementation of the development program in Nursing» as part of the Operational Program of Knowledge Ed-

ucation for Development (POWER). The school will create a Monoprofil Center for Medical Simulation of Nursing skills at the Faculty of Medicine. The virtual hospital, established in the Katowice University, will improve the quality of education of the future medical staff. Upper Silesian School of Economics is one of 35 high schools educating nurses and midwives in Poland, which will benefit from European funds as part of the POWER program.

Lecture of Professor Pineau at the University of Lower Silesia

2018-03-14

The Faculty of Pedagogical Sciences of the Lower Silesian University in Wrocław invites participants to an open lecture by Professor Gaston Pineau entitled „Current trends and new perspectives in applying the biographical method as a research and practical approach”. Professor Pineau will also lead the methodological workshop «How to conduct biographical research? Research experience and methodological solutions applied in the francophone countries». These events will take place as part of the International Scientific Conference titled «In the space of biography. Identification of experiences, processes and changes on the occasion of the 100th anniversary of the publication of the «Polish Peasant in Europe and America» by Florian Znaniecki and William Thomas. The work of William Thomas and Florian Znaniecki is still a source of inspiration for scientists, due to the pioneering way of analyzing and interpreting authentic documents that emphasizes the importance of the biographical dimension of human life. The lecture of Professor Pineau will take place on May 9, 2018 at the Faculty of Educational Sciences, Lower Silesian University in Wrocław, ul. Strzegomska 55, at 9:30 am, room 111.

Deputy Prime Minister Gowin: It is the family that shapes us

2018-03-14

- It is the family that shapes human's moral, social and cultural models. To a large extent, it's home that's made us who we are today - said Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education, during the conference „Polonia Restituta - family”, which took place on Monday, March 12 at the University of Cardinal Stefan Wyszyński in Warsaw. Deputy Prime Minister Gowin appealed to all political forces for an agreement over divisions regarding the long-term policy of support for Polish families. – Let's stop this constant change of priorities in the state policy towards the family. We need continuity in this issue - said Gowin. A similar appeal, for a cross-party consensus and a continuation of the most important matters for Poland, was announced by the Warsaw Metropolitan, Cardinal Kazimierz Nycz. The project „Polonia Restituta. The Decalogue for Poland on the 100th Anniversary of Regaining Independence „is addressed to people of science, culture, politics and business, to students, the government, local government and non-governmental organizations, as well as to people involved in education. The organizers of the project are the Ministry of Science and Higher Education and the Council for Social Affairs of the Polish Episcopate Conference.

Polish Agency for Enterprise Development aids foreign start-ups to start their operations in Poland

2018-03-15

Until March 29, 2018, the Polish Agency for Enterprise Development is waiting for applications from entities wishing to become operators within the Polish Prize program. The aim of the program is to present Poland as the country of first choice for foreign start-ups to do business in Central and Eastern Europe. The task of the 3 operators (selected in the competition) will be scouting for and developing foreign talents. The operators will help young companies make the choice to settle and run their

business in Poland. Start-ups can also count on a grant of up to PLN 200,000 and the cooperation of Polish investment or industry partners.

Conference Man-Business-Technologies at the Lodz University of Technology

2018-03-15

The Faculty of Management and Production Engineering of the Lodz University of Technology organizes since March 15, 2018 a series of meetings „Man-Business-Technologies”, which will be devoted to the overall vision of society, economy and technology. The following meetings are planned: March 15 – Prof. Maciej Sojn, Corporate Social Responsibility. Ethics or rhetoric? April 19 - Dr. Szymon Wierzbński, Personal Heroism or Collective Responsibility? Organization of the Byzantine army. 17 May - Dr Joanna Sośnicka, Ethics and technology - contemporary dilemmas. June 14 - Dr Inga Kuźma Cein, Social aspect of innovation. Seminars will be held at 18.00, in Łódź at ul. Wólczarska 215 (Building of Three Faculties) room 422.

Sailing ship „Dar Młodzieży” sets off on the Independence Cruise

2018-03-15

In May 2018, the Cruise of Independence around the world will begin. The „Dar Młodzieży” foundation invites the youth from Poland and from the countries visited by the Polish sailing ship to participate in the cruise around the world. The organizers of the cruise are the Maritime University of Gdynia and the Ministry of Maritime Economy and Inland Navigation. The purpose of the cruise, which will take place under the patronage of the Prime Minister, is to disseminate knowledge about Poland and its role in the world. Symbolically, the event will be inaugurated on May 3, 2018 (Polish Constitution Day) in Krakow - the former Polish capital city and at the host city of the last World Youth Days (meeting of Catholic youth from all continents with Pope Francis). The «Dar Młodzieży» will sail from Gdynia in the Independence Cruise on May 18, 2018, and

in January 2019 will arrive in Panama. The crew of the sailing ship will take part in the 34th World Youth Day there.

Digital Competence Congress in Tarnów

2018-03-15

In Tarnów on 14-15 March 2018, the first Polish Digital Competence Congress takes place. It is the largest meeting of experts and researchers in digital education. Almost two hundred digital education experts, representatives of IT sector companies, methodologists, creators of training projects, academic teachers and researchers of digital education problems will participate in the Congress. This is the first event organized by the Digital Education Network KOMET@, which was established several months ago. The Congress began works on the «white book» of digital education, which will be prepared by Tarnów expert team. It will be developed within three months and handed over to the ministers of digitization, education and development.

University of Zielona Góra in the World Catalog of Medical Schools

2018-03-15

The Faculty of Medicine and Health Sciences of the University in Zielona Góra was registered in the World Directory of Medical Schools. -This is very important information for our students, because in the future it will enable them to recognize a doctor's diploma outside the European Union, especially in the USA and Canada - highlights Professor Agnieszka Zembron-Łacny, dean of the Faculty of Medicine and Health Sciences of the University in Zielona Góra. World Directory of Medical Schools combines information previously contained in the WHO World Catalog, the International Medical Directory Catalog (IMED) and the Avicenna Catalogs. It contains information on 2,900 universities from all over the world (including 19 Polish medical schools and departments running a medical faculty), recruitment conditions and duration of medical studies.

Polish scientific expeditions to Peru

2018-03-15

Since 2006, Polish scientists have been implementing a project called „Polish Science Expeditions to Peru.” The initiator and the head of those expeditions is Prof. Eng. Andrzej Paulo from the AGH University of Science and Technology in Krakow. Polish scientists from the Faculty of Geosciences of the University of Silesia participated in the most recent trip to Peru. The main goal of the expedition in 2017 was research on the manifestations of modern tectonic activity in the subduction zone on the South American oncoming (top) lithospheric plate, under which the Nazca plate is moving at a rate of 63 mm per year. Scientific research conducted by employees of the Silesian university are related to the project called «Creating a scientific foundation for the future Colca Canyon National Park and the Volcano Valley in southern Peru». This project was included in the group of 40 scientific programs selected in the competition for the most outstanding achievements of Polish science as part of a project «Promotion of the achievements of Polish science» co-financed by the European Union.

World Pi Day at the Kraków University of Science and Technology

2018-03-15

The AGH University of Science and Technology in Krakow invites participants on March 16, 2018 for the Friday Science Evening, organized on the occasion of the World Pi Day. The event is addressed to children and adolescents aged 11-15. After the inaugural lecture, participants divided into smaller groups will take part in workshops, experiments and logic games. The event will be held under the patronage of the Rector of the Krakow Academy Professor Tadeusz Słomka. All attractions are prepared by employees and students of faculties of Applied Mathematics, Materials Science and Ceramics, Power Engineering and Fuels, Physics and Applied Computer Science. Events promoting mathematics and science are inextricably linked to the International Day of Pi Number (3,14), which is celebrat-

ed on March 14. The date is not a coincidence - in the American record (first month, then day) March 14 we read as 3.14, which corresponds to the Pi value. The Friday Evening of Exact Sciences will be held at the Faculty of Physics and Applied Computer Science of the AGH University of Science and Technology in Krakow at ul. Reymonta 19, building D-10 from 17.00 p.m.

Lodz University of Technology to cooperate with the State Higher Vocational School in Włocławek

2018-03-16

Positive experience of the cooperation between the State Higher Vocational School in Włocławek with the Faculty of Technical Physics, Informatics and Applied Mathematics of the Lodz University of Technology prompted the university authorities to develop their collaboration. University's Rector, Prof. Sławomir Wiak and the Rector of the High School, Dr Małgorzata Łagiedź-Gałuszka, have signed an agreement whose main objective is to support the Włocławek school in the implementation of practical education programs. The Lodz University of Technology will thus become a more attractive destination to continue education for Włocławek students. Both high schools declare the cooperation in education, science, research and in the contacts with the social and economic environment.

Invitation to participate in a project on sharing economic

2018-03-16

The Lublin Foundation for Development invites future and current entrepreneurs to participate in the international SharEEN project implemented by eight partners from the European Union. The goal of the project is to identify and connect sharing economy platforms, exchange experiences and help companies, including social entrepreneurs to take advantage of the opportunities offered by sharing economy. The project includes a series of trainings on sharing economy, coaching and mentoring support, networking for the international-

ization of business platforms and promotion of sharing economy initiatives in Europe. More: www.shareen.eu

Dr Joanna Sułkowska becomes Person of the Year 2017 in Radio RMF Classic contest

2018-03-16

Dr Joanna Sułkowska from the Center of New Technologies of the University of Warsaw won the award in the category „Person of the Year 2017” in the eighth MocArty contest of RMF Classic radio. The researcher was selected by the station listeners. The statuettes were solemnly handed on Monday, March 12. Dr Joanna Sułkowska runs chemical research at the Interdisciplinary Laboratory for Modeling Biological Systems of the University of Warsaw. She specializes in protein, molecular and theoretical biophysics and conducts research on the looped proteins. The results of her work contribute to explanation and treatment of Alzheimer's, Parkinson's diseases and obesity.

Prime Minister Morawiecki at the celebration of March 68 at the Wrocław University of Technology

2018-03-16

Prime Minister Mateusz Morawiecki unveiled a plaque commemorating the strike of students in March 1968 at the Wrocław University of Technology. «Wrocław was a beautiful city of the struggle for freedom, my city. The outbreak of March 1968 is a great reason for praise and glory»- highlighted the prime minister, who participated in the celebrations and the meeting with the heroes of March 68. They had the courage to be brave – said Prof. Cezary Madryas, rector of the Wrocław University of Technology. In turn, the participant of those events, Prof. Marian Sobierajski reminded that protests at other Wrocław universities began from the rally organized on 12 March 1968 at the Wrocław University of Technology to defend students who had been protesting for four days in Warsaw.

Poznań Science and Technology Park aids to create innovative startups

2018-03-16

As part of the „Merlin” project, the Poznań Science and Technology Park of the University of Adam Mickiewicz organizes a series of workshops „Lean startup” that help innovators in the ICT industry to create and develop companies to deal with the commercialization of scientific research. The ICT sector is an industry of communication and IT devices as well as accompanying services. The Merlin project, apart from workshops, also includes webinars, meetings with potential clients and investors, networking and the chance to be included in the Startup Europe network. Participation in the Merlin project is free of charge, thanks to financing from the Horizon 2020 Program. More: <https://merlin-ict.eu/>

PLN 19 million for the Vilnius branch of the University of Białystok

2018-03-16

Almost PLN 19 million will be allocated by the Ministry of Science to co-finance the Vilnius branch of the University of Białystok. Deputy Prime Minister Jarosław Gowin signed an agreement between the Ministry of Science and Higher Education and the University of Białystok regarding co-financing the reconstruction and extension of the building of the Faculty of Economics and Information at the Białystok branch of the university in Vilnius. Since October 2007, the Faculty of Economics and Information Technology in Vilnius has enabled the Polish to study in Vilnius at the academic level, in Polish. Over 600 graduates have already graduated from the Faculty, currently, 293 students are studying there. At the beginning of its activity, the University educated at two bachelor's degrees: economics and informatics, in the academic year 2014/2015, second-degree studies were also launched. For the last few years there are also first-degree studies available in European studies.

Conference „School afresh” in the Białystok Science and Technology Park

2018-03-16

The Białystok Science and Technology Park invites the participants on 17 and 18 March 2018 to the conference „School afresh”, whose aim is to inspire changes in education. During the conference, specific tools will be presented and practiced, which can be used to strengthen the teacher's relationship with the student, support the children in their individual process of growing and learning. Speakers will familiarize participants with non-violent communication (NVC), mediation, learning neurobiology, formative assessment and ways to motivate students, including using new technologies. Registration for the event: <http://juchno.eu/szkolaodnowa2/index.php>

School of Business in Dąbrowa Górnicza holds 14th Science Festival

2018-03-19

The School of Business in Dąbrowa Górnicza was the organizer of the 14th Science Festival, with the aim of updating the participants with the latest achievements and discoveries and presenting scientific research in the attractive manner. The inaugural lecture «Transition from the opportunistic to the relational market game - towards the economics of values» was given by Prof. Jerzy Hausner from the University of Economics in Krakow. Invited keynote speakers were Major General Dr Eng Roman Polko, who presented the process of forming modern special forces; journalist Kamil Durczok, who wondered how the information is developed in the era of digitization and priest Dr Andrzej Nowicki, a graduate of the Pontifical Academy of Theology in Krakow, who sought the answer to the question of how to be a happy person in today's world.

Professor Okamoto visits Wrocław University of Technology

2018-03-19

Prof. Masami Okamoto from the Toyota Technological Institute in Nagoya will come to the Wrocław University of Technology. The world-famous Japanese chemist is named among the Nobel Prize candidates. He will visit a Wrocław University as part of the Visiting Professors program. Professor Okamoto will give series of specialist lectures on «Nanocomposites for Application in Tissue Engineering» (March 19-23) and will be a guest of the open Interdisciplinary Scientific Seminar (March 20). The Japanese guest's scientific interests include: obtaining biocomposites and polymer nanocomposites, bone tissue engineering, regenerative medicine, cancer cell metastases and cancer stem cells.

Deputy Prime Minister Gowin at the International Conference of Students of Medical Universities in Szczecin

2018-03-19

In new scientific system the titles will not matter, but real scientific achievements will - said Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education, while opening the 3rd International Conference of Students of Medical Universities in Szczecin. It was his reference to the reform of education. The conference was addressed to students and young doctors and was organized by the Student Scientific Society of the Pomeranian Medical University in Szczecin. The participants got acquainted with the research results and the latest trends in medicine. They also had the opportunity to meet other young scientists, exchange experiences, ideas or inspiration. During the conference, there were also health, dental and PhD sessions.

New fields of study in English to launch at the Warsaw University of Life Sciences

2018-03-19

The Warsaw University of Life Sciences in Warsaw received PLN 28 million from the National Center for Research and Development for adjusting and implementing academic education programs in line with socio-economic needs as part of the POWER (Knowledge and Education Development Operational Program). The main objective of the project «Success by nature - a comprehensive program to improve the quality of management of the education process and the quality of teaching at the Warsaw University of Life Sciences» is to implement changes in the management of the education process and to improve the quality of teaching at the Warsaw university. Particular emphasis will be placed on increasing the level of internationalization of new majors and specialties taught in English including Organic Agriculture and Food Processing, nutritional business manager, Civil Engineering, and Computer Science and Econometrics - Big Data Analytics.

Report to the Global Impact Challenge if you know how to influence the lives of a billion people

2018-03-19

The application for the first Polish Global Impact Challenge has been started. The contest aims at selecting the most innovative ideas. The idea must be unusual, because presented startup or prototype must positively affect the lives of a billion people over a decade. The prize in the competition is a two-month stay in the Silicon Valley, where the laureate will be able to implement his idea. Applications will be accepted until April 26, 2018. The organizer of the Polish contest is the Digital University Foundation, the sole representative of Singularity University in Poland. Talented scientists, engineers, startup entrepreneurs and entrepreneurs are invited for the competition. The final with a maximum of 10 projects will take place on May 24 and 25 in Warsaw. The jury consists of: Sebastian Kulczyk; Regina Njima (Singularity University); Supreet Singh Manchanda (business angel, Silicon Valley) and Jowita Michalska (Digital University Foundation) <https://su.org/gic/>

General Andrzejczak to hold a lecture at the University of Szczecin

2018-03-19

As part of the series of lectures „Szczecin Humanistic”, the dean of the Faculty of Humanities of the University of Szczecin invites participants to a lecture of Maj. Gen. Rajmund Andrzejczak „Leadership - passion and vision. Modern leadership in a comprehensive security environment”. General Andrzejczak is the commander of the 12th Szczecin Mechanized Division. In 1991 he graduated from the Higher Officers School of Panzer Armies in Poznan and later the Military Academy of Defense of the Czech Republic. He was a participant in many foreign missions. He was decorated with the Star of Iraq and the Star of Afghanistan. The lecture will take place on Thursday, 22 March at 12.00 at the Faculty of Humanities. This will be a summary of the Legia

Akademicka program - a pilot program of military student training launched in 2017 by the Ministry of National Defense.

Polish Academy of Sciences to present Report on Water Management in the World

2018-03-19

The Polish Academy of Sciences (PAN) holds the conference „Solutions Close to Nature for improvement of Water Resources”, that presents the document Nature-Based Solutions (prepared by the World Water Assessment Program (UNESCO IHP)). The conference will take place on March 22, 2018 at the Staszic Palace in Warsaw. Annual Reports on Water Management in the World focus on strategic water issues. Members and partner organizations of the United Nations related to the water issue, as well as other experts, provide thus the latest knowledge on water management. The aim of this year's Report on Water Management in the World is to inform world representatives of politics and decision-makers about the potential of solutions inspired by nature.

Professor Joseph Schatzker, doctor h.c. of Jagiellonian University

2018-03-19

Prof. Joseph Schatzker, one of the world's greatest traumatologists, became an honorary doctor of the Jagiellonian University. Prof. Schatzker is a scholar of Polish origin, living in Canada and working at University of Toronto. He is the author of many analyses of fractures, which give the basis for choosing the right treatment method and indicate possible complications. His books and textbooks formed the foundations of modern traumatology, and are used by orthopedists and trauma surgeons throughout the world. In 1979 he became an associate professor and in 1984 a professor of surgery at the University of Toronto. In 1985, he was appointed the head of the Trauma Orthopedic Department at Sunnybrook Hospital, the largest orthopedics and trauma center in Canada. He was also an examiner of the Royal College of Canadian Surgeons. He is the vice-chairman of the world orthopedic organization SICOT (Societe Internationale de Chirurgie Orthopedique et de Traumatologie).

Scientists from Torun studied Peter Rubens' paintings in London

2018-03-20

Professor Piotr Targowski from the Institute of Physics at the Nicolaus Copernicus University in Toruń and Dr. Magdalena Iwanicka from the Institute of Monuments and Conservation carried out research on the monumental paintings of Peter Paul Rubens on the vault of the Whitehall Banqueting House in London - informs the University of Toruń. Torun scientists stayed in London from 12 to 16 March 2018 at the invitation of the Historic Royal Palace. Using OCT optical tomography, they analyzed the structure and the condition of repeatedly restored pictures. It is part of a multidisciplinary campaign conducted within the MOLAB offer (mobile laboratory) of the international research project IPERION CH (Integrated Platform for the European Research Infrastructure ON Cultural Heritage) implemented in the Horizon 2020 program.

Days of Chinese Culture at the University of Lodz

2018-03-20

Until March 23, 2018, the Days of Chinese Culture will take place at the University of Lodz. The event was organized by the Faculty of Economics and Sociology at the University of Lodz where are over two thousand students from 95 different nationalities, including about 100 Chinese students. As part of the event, the students can see tai-chi shows, take part in Chinese language and calligraphy workshops, compete in a games competition or listen to a gong concert. The main goal of the event is to promote Chinese culture among students of the University of Lodz and to popularize knowledge about its cooperation with many Chinese universities. More: <http://www.eksoc.uni.lodz.pl/dni-kultury-chinskiej-2018/>

Seminar on natural radiation at the University of Bialystok

2018-03-20

Professor Eugeniusz Żukowski from the University of Bialystok will present the results of research on radiation of selected substances with increased radioactivity and natural background measurements. The research was conducted in the laboratories of the Faculty of Physics for many years and they will be presented during the open seminar, which will take place on Tuesday 20 March 2018. The source of radiation is not only wastes of nuclear medicine or civilization facilities using radiation of various types. Professor Żukowski points out that our natural environment is also slightly radioactive. The source of the natural radiation background is, for example, cosmic radiation, radon in the air or radiation of radioactive elements from soil and water. The event will take place on March 20, 2018 at 13.15 in room 2011 of the Faculty of Physics of the University of Bialystok.

Warsaw University of Technology organizes courses improving the competences of lecturers

2018-03-20

The Center for Innovation Management and Technology Transfer of the Warsaw University of Technology invites participants to take part in courses implemented as part of the project „Competent lecturers - a high level of teaching”. The following types of courses are provided: enhancing competences in the field of IT skills used in didactics; improving competence in conducting didactics in English; improving competence in information management implemented in the form of workshops; enhancing competences in the field of innovative teaching skills and Design Thinking in didactics. Applications for the course are accepted until March 21, 2018. Application form: https://docs.google.com/forms/d/e/1FAIpQLSeHz967qHTIY6pPYPZxDhP_7im7uT4pQHB8tT0nCkhORpYzCA/viewform

Hybrid bicycle from 3D printer wins „Soczewki Focusa” competition

2018-03-20

Students of the Silesian University of Technology won the competition „Soczewki Focusa 2017” presenting their spokeless hybrid-powered bike. The young engineers „printed” their invention on a 3D printer and won the main prize in the category of technical innovations. The innovative bike has a foot drive, if necessary supported by an electric motor. The battery has been placed in the frame of a two-wheeler. The prototype consisted of over 300 plastic parts printed on 3D printers. The target structure is to be made of aluminum or carbon fiber - bicycle designers are looking for a business partner to start its production. „Soczewki Focusa” is a competition aimed at selecting the best Polish innovations. The organizers choose the most interesting technologies created in Poland.

Wroclaw satellite in the competition of the European Space Agency

2018-03-20

Students from Wroclaw have constructed a micro-satellite, which will soon take part in the CanSat competition, organized by the European Space Agency ESA. Before the final part the young constructors asked for a professional opinion of scientists from the University of Wroclaw. The satellite is small, with size of a can (hence the name of the competition). This year the competition objective is to construct a sampler examining the atmosphere of a planet. Its task is to measure the temperature and air pressure and send the data to the receiving station. The space wanderer must also be able to survive a high-speed landing. Six students from the School No. 14 in Wroclaw have been working on the prototype since October last year. Before the national final, the constructors visited the University of Wroclaw. During an official meeting, they listened to the advice of scientists who enthusiastically accepted the proposal for cooperation on this and subsequent projects (the students are already planning to participate in the next CanSat).

Wroclaw University of Technology digitizes the film archives

2018-03-20

Employees of the Wroclaw University of Technology digitize archival film materials that can be viewed on the AZON platform (Atlas of Open Science Resources). Analog materials including films from students feasts, awarding honorary doctorates, lectures will be rerecorded into a digital version. The digital archive will also include academic news, concerts, student debates, rectors' elections, theaters, reports from science and sports festivals. After digitalization, color and exposure correction, noise reduction and sound level correction materials will be stored at the AZON platform, which collects, processes and provides university resources in an open digital form to all interested persons. The coordinator of the project is Wroclaw University of Technology together

with partners: Academy of Physical Education in Wroclaw, Wroclaw University of Environmental and Life Sciences, Medical University of Wroclaw and Institute of Systems Research of the Polish Academy of Sciences in Warsaw.

Dragonfly and Red Bomber will fly to the USA

2018-03-20

Dragonfly and Red Bomber - unmanned airplanes constructed at the Academic Air Club of Wroclaw University of Technology - will take off in April in the SAE Aero Design West 2018 competition in California. 75 teams from around the world announced the participation in this competition. SAE Aero Design tournaments have been organized for 30 years. The task of the participants is to construct unmanned airplanes that meet stringent standards. Machines are designed to lift as much weight as possible while weighing as little as possible. Constructed by members of the AKL „Red Bomber” will start in the Micro class, in which the ratio of the raised weight to the weight of the aircraft itself is thoroughly calculated. The model weighs only 423 grams, but it can lift up to 1.3 kilograms weight. The second plane - „Dragonfly” - will start in the Advanced class. It weighs 8 kilograms and it will be able to carry a load of 15 kilos, and then drop it onto the designated target. During the construction, students used laser cutting and 3D printing.

Wroclaw University of Economics to switch to renewable electricity by 2030

2018-03-20

Wroclaw University of Economics is the first university in Poland, which declared its willingness to use only renewable sources of electricity. Rector of the University, Prof. Andrzej Kaleta, signed the plan „100% Committed”. of the Climate Reality Project team. Professor Kaleta declared that by 2030, the energy used at the university campus will come exclusively from renewable sources, which will contribute to reducing carbon emissions, mitigating climate change and increasing air quality. The University wants to be part of this process both theoretically

– through scientific and didactic work - and practically, creating a green campus. The Climate Reality Project is a venture set by the Nobel Peace Prize laureate and the former US vice president Al Gore to accelerate the transition to clean energy and solve the climate crisis.

Ambassador of Pakistan visited the Jagiellonian University in Krakow

2018-03-21

Scientific and educational cooperation of the Jagiellonian University with university centers in Pakistan was the goal of the visit of Shafquat Ali Khan, the ambassador of Pakistan at the Krakow university. The Ambassador was received by Professor Wojciech Nowak, Rector of the Jagiellonian University. He visited the Institute of Middle and Far East, where he gave a lecture entitled «Foreign Policy of Pakistan. New Challenges and New Directions».

Visegrad Summer School

2018-03-21

Until the end of March 2018 the students can apply for the next Visegrad Summer School. The School is a series of training sessions for young people from the Visegrad Group countries and Eastern Europe, implemented since 2002 by the Villa Decius Association in Krakow. Lectures, workshops and debates at the Visegrad Summer School are conducted by outstanding experts representing various fields of knowledge and public activity. Apart from experts and intellectuals, the Summer School lecturers include also ambassadors, ministers and representatives of the European Union. The program is addressed to students, PhD students, young teachers, entrepreneurs and journalists. This year's School will be held from 1-14 July 2018. More about the project: www.visegradsummerschool.org

Rectors from universities of southern Poland visit Brussels

2018-03-21

Rectors of fourteen universities from southern Poland visited Brussels on 19 and 20 March. They took part in meetings with representatives of the European Union institutions and discussed European programs related to higher education as well as scientific research. Their visit was an opportunity to talk about higher education with Tibor Navracsics, who will be the EU commissioner for education, culture, youth and sport from 2020. During the meeting, they discussed the issues related to higher education and scientific research after 2020 from the perspective of the European Union, including the new EU initiative called the European Education Space.

Talks on freedom, culture and identity during the 5th Night of the Humanists

2018-03-21

The relations between freedom, culture and identity were discussed during the 5th Night of Humanities at the University of Wrocław. Experts discussed on the influence of music on culture-forming and identity processes - on the example of the Polish anthem and the jazz from the 1950s. The Night of the Humanists is a regular event organized by the Faculty of Historical and Pedagogical Sciences of the University of Wrocław. The theme of this year's event was community and personal freedoms, their limitations and dependencies related to socio-historical determinants and cultural norms, patterns and symbols. Medievalists talked about the importance of Silesia in the politics of the Central European countries in the 9th and 10th centuries, and about how the «God's Pure Word» was the mainstay of Silesian rights and freedoms under the Habsburg rule. Audience's attention was also attracted to the problems of Polish democracy in 1918-1939, as well as the question who in fact triggered the 1989 changes.

Academic Legion starts at the Opole University of Technology

2018-03-21

34 students - volunteers from the Opole University of Technology began their military training as part of the Academic Legion - a pilot program launched by the Ministry of Defense and the Ministry of Science and Higher Education. The program enables students to become soldiers during their studies. The training consists of a theoretical part, lasting from 30 to 60 hours and exercises in a military unit, which will take place during the summer break and will last for 22 or 44 days. Depending on the chosen program the volunteers will obtain a rank of reserve soldiers, or become non-commissioned officers with the rank of corporal. Lectures at the Opole University of Technology will be conducted by specialists from the Land Forces Academy in Wrocław. The program includes basic information about the army, national security, first aid, firearms, rules of tactics and behavior on the battlefield.

The 70th anniversary of Silesian Medical University

2018-03-21

The Medical University of Silesia (SUM) celebrates its 70th anniversary. The Regulation establishing the Medical Academy with the Faculty of Medicine and the Dental Department in Bytom was issued by the Council of Ministers on March 20, 1948. It was then the eighth medical school in Poland. In 1949, the university was renamed the Silesian Medical Academy. Since 2007, it has been operating under the name of the Silesian Medical University in Katowice. The beginnings - in the opinion of the Rector of SUM Prof. Przemysław Jałowicki - were not easy. «Among medical schools with long tradition, we were named with the sarcasm as the» nursery school», but future showed that the pejorative term turned out to be completely groundless» - recalled the rector. SUM conducts studies in 25 fields - including 9 in English. It educates over 10,000 students, including 500 foreigners from 48 countries. For 70 years, over 40,000 students graduated from the SUM - also from the USA, Canada, India, Nigeria and Pakistan.

PLN 3.7 billion for Polish science in 2019

2018-03-22

The expenditure on Polish science and higher education will increase by PLN 3.7 billion in 2019 – said Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. He underlined in the interview for Polish Television news program that the new Act on Science and Higher Education replaces the four existing ones. It definitely increases the autonomy of the university, opens the promotion opportunities for young scientists and increases the level of internationalization of Polish universities and science. - We have assumed that we will implement an algorithm to increase the expenditure on Polish science systematically next 10 years in relation to the level of GDP - said the Deputy Prime Minister. If the economy grows by, for example, 4 percent, the level of growth in expenditure on science in a given year will be slightly higher than 4 percent, always slightly above the GDP growth rate.

Days of Francophonie at the University of Silesia

2018-03-22

On Wednesday, 28 March the celebration of the Francophony Days, organized by the Institute of Romance Languages and Translatory will take place at the University of Silesia. The motto of this year's event is „Francophonie 2018: Entre tradition et modernité (Francophonie 2018: between tradition and modernity). The program includes language and translation workshops for high school and junior high school students combined with a translation competition and a presentation of the Institute of Romance Languages' offer and the career prospects for multilingual people. During the Days of Francophonie, participants of the competition «Francophonie: entre tradition et modernité» will be awarded prizes. In the artistic part, a concert of French music will be performed by Edyta Poznańska. Also the presentations «Entre ciel et mer: fin de la terre. A propos de voyages bretons et autres « and « Entre homme et machine: les langues à l'ère numérique « will be organized.

Wroclaw scientists won prize for in vitro plants

2018-03-22

Scientists of the Department of Genetics, Plant Breeding and Seed Production at the University of Life Sciences in Wrocław, were awarded in the Genius Universitatis competition for plants propagated in vitro and sealed in small jars. The jury awarded it in category of best promotion gadget. They appreciated the innovation of the gadget, aesthetics, its thematic connection with the university profile, sharing knowledge of botany, biotechnology and genetics and promoting the university. Plants - sun-dews, orchids and violets propagated in vitro, enclosed in small, decorative jars, on white and black nutrients ensuring their growth for several months - are created under the supervision of prof. Renata Galek in the laboratories of the Department of Genetics, Plant Breeding and Seed Science at the Faculty of Natural Sciences and Technology. Scholarships for young archaeologists and conservators from the Middle East

2018-03-22

The Center of Mediterranean Archeology of the University of Warsaw is a partner in the scholarship program of the Polish Committee for UNESCO and the Ministry of Science and Higher Education. Young scholars from Middle Eastern countries, especially from post-conflict areas, may apply for archaeological scholarships by April 30, 2018. Scholars will hold their internships training sessions in Polish institutions related to archeology, protection and management of heritage and conservation of monuments in Poland for 8 months. The substantive program of the training internship is developed by the Center of Mediterranean Archeology of the University of Warsaw in cooperation with the Institute of Archeology of the Warsaw university and the Academy of Fine Arts in Warsaw. More: <http://www.unesco.org/new/en/fellowships/programmes/unesco-po->

[land-co-sponsored-fellowships-programme-in-archaeology-and-conservation/](http://www.unesco.org/new/en/fellowships/programmes/unesco-po-land-co-sponsored-fellowships-programme-in-archaeology-and-conservation/)

Miniature laboratory wins the „Innovation is a Woman” competition

2018-03-22

Agnieszka Podwin, PhD student at the Wrocław University of Technology, won the 8th „Innovation is a Woman” competition. The young researcher developed a refined laboratory on the chip, including a gas dispenser to support cell culture and a yeast-powered mini reactor for generating oxygen. The laboratory on the chip is a miniature device of a size from a few millimeters to a few square centimeters. It is used for various types of biochemical analyzes, e. g. analysis of genetic material and blood, but also for cell culture. Cell cultures require the use of dispensers that provide them with various types of nutrients and gases. For research on miniature chips, the miniaturized versions of devices should be used, but the models available on the market are expensive. The PhD student developed her own type of dispenser made of semipermeable polymer. More information: <http://pwr.edu.pl/uczelnia/aktualnosci/wielkie-mozliwosci-miniaturowego-laboratorium-10797.html>

Education system develops in the Słupsk Academic Center

2018-03-23

Pomeranian Academy in Słupsk in partnership with Słupsk Chamber of Industry and Commerce and Pomeranian Agency for Regional Development S.A. implements the project: Development of a practical education system within the framework of the Słupsk Academic Center. The aim of the program is to adapt the educational offer of the Słupsk high school to the requirements of practical education for the needs of the economy and the regional labor market. The specific objectives of the project include enhancing the quality of the didactic base necessary to implement practical education as well as enhancing the practical professional qualifications of the teaching staff in cooperation with entrepreneurs. As part of this objective, 28 lecturers will take

part in sixteen specialist trainings. Another goal is to increase the efficiency of cooperation between the High School and entrepreneurs through their involvement in modifying educational programs and directly in the didactic process.

Planetobus arrives to schools

2018-03-23

Planetobus- a mobile planetarium allowing the children for a journey through space, is a new didactic solution of the Ministry of Science and Higher Education and the Copernicus Science Center. The first vehicle of science- Naukobus was launched in January. The planetobus consists of a planetarium sphere for 35-40 students. Young visitors - under the guidance of animators from the Copernicus Center – are able to look at any part of the sky from every corner of the world, follow the course of the seasons, and also move around the Universe. Students are able to travel in time and the observatory provides animations depicting constellations from four thousand years ago. In January 2017, Naukobus, the predecessor of Planetobus, started in Poland. It is a mobile exhibition with more than twenty activities for students, under the guidance of animators of the Copernicus Science Center. About 50,000 people participated in the first program. The Ministry of Science plans that in 2018 a mobile laboratory will reach up to 100,000 people. More: <http://naukad-laciebie.gov.pl/>

Didactic cooperation of the Warsaw School of Economics with the universities from Vienna and Bratislava

2018-03-23

The Central Europe Connect Joint Certificate Program is a new program of tripartite didactic cooperation between the Warsaw School of Economics, the Vienna University of Economics and Business, and the University of Economics of Bratislava. As part of the program, 60 undergraduate students of these three universities will participate in classes devoted to the specificity of business in Central Europe. The classes will be conducted in the form of three one-week blocks, carried out successively at partner universities. Program participants will gain experience in international cooperation and establish mutual contacts during the project work. The first program will be launched in the summer semester of 2019. Recruitment will start in October 2018.

Collegium Da Vinci in Poznan talks about educational computer games

2018-03-23

The Faculty of Computer Science and Visual Communication Collegium Da Vinci in Poznan invites participants to the lecture „Serious Games - Can we create educational games that are not boring?” This is a meeting with active representatives of the computer and video game industry. This time, the university's guest will be Jakub Ryfa, a game designer specializing in serious games and Game-Based Learning from Doji company. Jakub Ryfa is a PhD student at the University of Economics in Poznań and the author of numerous publications and studies on game design and their use in educational and business applications. He is also a Project Manager and co-founder of Doji - Educational Innovations and the creator of the computer training game Coffee Noir with applications.

Academy from Gorzów Wielkopolski organizes a conference on national security

2018-03-23

„National Security of Poland: Threats and determinants of change” is the topic of the conference, which will take place this Friday, March 23, 2018 at the Academy in Gorzów Wielkopolski. The inaugural lecture entitled «New Fields of State Security» will be delivered by Prof. Andrzej Zybortowicz, adviser to the President of Poland. Then the conference participants will discuss the following panels: Germany - European Union - Poland. Challenges for security policy in a changing Europe; Theoretical and practical dimensions of European security. The aim of the conference, which will be held under the patronage of the voivode of the Lubuskie Region and the National Security Bureau, is identification of factors determining the contemporary security environment for the evaluation and validation of security policy of entities operating in this environment on a global, regional, subregional and state scale.

Wrocław University of Technology at the World Summit of the Information Society

2018-03-23

Students and scientists at the Wrocław University of Technology presented their inventions at the World Summit of the Information Society (WSIS Forum) 2018 in Geneva, Switzerland. They showed six projects - including an unmanned and autonomous air system for blood transport. Wrocław University of Technology students also presented a 3D scanner controlled by a mobile application that enables quick and easy reproduction of three-dimensional elements (3D photocopying), a Martian rover Scorpio and a robotic chessboard - a device for playing chess games, both with a live partner and with artificial intelligence. Other Wrocław projects on the co-organized by UNESCO WSIS Forum 2018 were a robot with a manipulator that detects obstacles, working in conditions inaccessible to people and an innovative rental service through the application powerbank from any location in the city.

New Silk Route discussed at the University of Silesia

2018-03-23

The cooperation with China will be discussed by scientists and students of the University of Silesia. The conference „New Silk Road - geopolitics, economy, culture” is scheduled for Tuesday, March 27 at the Center for Scientific Information and the Academic Library. The discussion will take place within four panels: «China's Geopolitics in the 21st Century»; «Pivot to the Pacific - the future relations of the West countries and China»; «The New Silk Road - a chance for the region or the threat of Chinese domination?» And «Europe, Intermarium, USA or China - potential strategic alliances of Poland». The panelists will try to answer the question whether the Chinese plan to rebuild the old trade route means only benefits. They will pay attention to the opportunities and threats related to Chinese investments and the economic and political expansion of the Middle Kingdom. The event is organized by the Regional Center for International Debate in Katowice, the Institute of Political Sciences and Journalism and the Culture and Law Society of the University of Silesia.

Polish Radio in Katowice launched AS- radio for students of Silesian universities

2018-03-23

On the first day of the spring, Radio Katowice and the University of Economics in Katowice launched a new project. Students of the Journalism and Social Communication create a two-hour program on 101.2 FM. The editorial team of the program for students of Silesian universities is created by students of journalism and social communication of the University of Economics of Katowice. The program mentors are Dr Anna Musialik-Chmiel - editor of Polish Radio of Katowice and Andrzej Prugar - deputy technical director of Polish Radio Katowice, a respected record producer. The Wednesday AS Radio program is broadcasted on 101.2 FM AS and it tackles topics related to student life. It will inform

about culture, art, sports, cuisine, motoring, fashion, music, travel, ecology and psychology, about career and personal development and music - the authors convince and assure that they will avoid politics.

Wroclaw archaeologists printed in the journal „Nature”

2018-03-23

Researchers from the Institute of Archeology of the University of Wroclaw worked in an international team of scientists from Europe and the United States. The results of their research are described in the prestigious journal Nature. The international team of 144 geneticists, archaeologists and anthropologists has attempted to explain the «beaker phenomenon» - a riddle related to the appearance of similar objects between 4750 and 4400 years ago in the graves across Europe. Because of the exclusive bell-shaped beakers the findings were called the bell-beakers culture. It triggered a debate that lasted over a hundred years whether they are traces of migration of people on a large scale. The results of genetic examinations of about 400 skeletons described in «Nature» from various sites in Europe indicate that the spread of the «beakers phenomenon» between Iberia and Central Europe took place without significant population movement.

Six Polish teams in the final of the Martian rovers competition in University Rover Challenge 2018

2018-03-26

Teams: University of Warsaw Rover Team from the University of Warsaw; Impulse from the Kielce University of Technology; KNR Team from the Warsaw University of Technology; Raptors from the Lodz University of Technology; Legendary Rover Team from Rzeszów University of Technology; PCz Rover Team from the Czestochowa University of Technology have been qualified for participation in the Mars Rovers Challenge University Rover Challenge 2018. 95 design teams participated in the qualifying rounds for the competition this year. The jury quali-

fied 36 most interesting solutions from the USA (11 teams) Canada and Poland (6 teams). In addition, teams from India, Bangladesh, Great Britain, Egypt, Mexico, Australia and Turkey will take part in the finals. The University Rover Challenge (URC) is the most prestigious international competition for Mars rovers built by students and it takes place in the Utah desert. This year the competition will last from May 31 to June 2. See the film presentation of the University Rover Challenge 2018 and in it all final prototypes: <https://youtu.be/RfHNODonLeQ>

Scientific conference in Lublin on relations between robots and people

2018-03-26

The Institute for Market, Consumption and Business Cycles Research - National Research Institute and the Faculty of Philosophy and Sociology at the Maria Curie Skłodowska University in Lublin in cooperation with the Lublin Voivode invite participants to the conference „People or robots? Future competition”. The introductory lecture «What skills and knowledge do people need for interacting with robots?» will be given by Prof. Marek Hetmański from the Faculty of Philosophy and Sociology at the Lublin University. The program also includes a debate on what relationships with robots we need. The organizers also plan to find answers to the questions: Will robots deprive people of work? How to prepare for cooperation with artificial intelligence? What is the future education for the constructors of automated industrial solutions? The conference will take place on April 9, 2018 in Lubelski Provincial Office at Spokojna 4. Conference programme: <http://ibrkk.pl/index.php/pl/konferencje/150-9-iv-ludzie-czy-roboty-nowoczesne-kadry-dla-przemyslu-4-0>

Professor Bronic-Czerechowski visits Wrocław University of Technology

2018-03-26

On Monday, March 27, Prof. Włodzimierz Bronic-Czerechowski from the Polish University in Abroad (PUNO) in London will start his two-day visit to Wrocław. The architect and soldier of the Armia Krajowa will visit the Wrocław University of Technology. During his visit to the alma mater (Włodzimierz Bronic-Czerechowski is a graduate of the Wrocław University of Technology from 1952) he will give an open lecture on «Architectural conditions for a sustainable environment built on the assumptions of a new type of housing estate in the Smart Cities project» and will lead two seminars on modern architectural solutions and urban planning. Professor Bronic-Czerechowski is an architect, lecturer and architecture theoretician. He is a co-creator of the post-war reconstruction of the Wrocław center. He conducts research in the field of smart, self-sufficient residential units. He has lived and worked in London since leaving Poland. He is an active member of the Royal Institute of British Architects.

LabDay 2018 – applied chemistry at the Wrocław University of Technology

2018-03-26

During the LabDay at the Wrocław University of Technology participants were able to learn about the applied chemistry. One of the attractions was a lecture with elements of the show „Molecular Gastronomy, or Chemistry in the Kitchen”. LabDay is a project of the Students' Self-Government of the Faculty of Chemistry. During one day, scientists and students from scientific circles presented atypical applications of chemistry and revealed the secrets of their laboratories. They presented the Nuclear Chemistry Laboratory, and in the Biotechnology Laboratory, where everyone could isolate their own DNA from a sample of saliva with the use of reagents available at home. The Marathon of laboratory experiments and the Panel of Opportunities, i.e. meetings with representatives of industry compa-

nies and graduates working in the profession and with the most talented students and doctoral students, were also popular. In total, over 60 lecturers attended the lectures on the LabDay.

Exhibition of students of the Silesian University of Technology at the Italian University

2018-03-26

At the University of Cassino (Italy) the exhibition of students of the Silesian University of Technology has been presented. Their works were created as part of the project „San Pietro Infine: il luogo e la memoria - place and memory”. The exhibition is the result of a competition organized by the Faculty of Architecture of the Silesian University of Technology together with the Department of Civil Engineering and Mechanics of the University of Cassino and the city of San Pietro Infine - a city completely destroyed during the Second World War. From 1943, the town is abandoned and remains in ruins. This area is very valuable historically, architecturally and culturally and it has become the subject of research, conservation and design studies. The aim of the project is to research and evaluate the heritage, develop a strategy for its protection and promotion, carry out architectural and conservation projects, make the area accessible to visitors, and build awareness of its value, and significance also in the history of World War II.

5 projects for the National Geographic Award in the scientific discovery of the year category

2018-03-27

Every year the Polish edition of National Geographic and its readers reward Polish scientists and travelers with the prestigious TRAVELERY prizes. In 2018, five projects were nominated for the award „for scientific achievements allowing better understanding of the world, people and cultures”. The nominees included: Dr Andrzej Stupakiewicz and Dr. Krzysztof Szerenos from the Faculty of Physics, University of

Białystok, for discovering the ultrafast data storage. The discovery allows computers to consume much less energy than today and work more efficiently. Dr Gerard Gierliński from the Polish Geological Institute and National Research Institute for finding the oldest human footprints in Crete. The prints date back to 5.7 million years ago. Professor Krzysztof Selmaj, head of the Department of Neurology at the Medical University of Łódź for the discovery of microRNA molecules that allow to diagnose multiple sclerosis. Dr Eng Rafał Dalewski from the Warsaw University of Technology for constructing a flying «mechanical bee» - the world's first autonomous robot for pollinating plants. Professor Marek Naruszewicz from the Warsaw Medical University for explaining how oleacein works - a compound contained in extra virgin olive oil. The decision on the competition will be made in June.

Ministry of Science supports research projects devoted to the Polish way to freedom

2018-03-27

Ten projects selected in the competition „Routes of Independent Poland” will receive almost PLN 10 million. The program of the Ministry of Science and Higher Education is implemented as part of the celebration of the 100th anniversary of Poland's independence. The project is to support scientific and artistic initiatives devoted to issues related to the Polish heritage of independence. It is also to present the Polish independence idea of the 19th and 20th centuries. Among the awarded ten projects were «Shaping the borders of independent Poland in the light of cartographic documents» and «Interactive Historical Atlas - Routes of Independent Poland 1914-1922» submitted by the University of Maria Curie Skłodowska in Lublin. University of Szczecin will receive funding for the implementation of the project «Cemeteries in the suburbs of Lwów. Polish national heritage» and the University of Łódź for the work „Education and upbringing for forming Polish modernity and independence in the years 1915-1918”.

Norman Davies to hold a lecture at the Jagiellonian University

2018-03-27

The Interdisciplinary Research Center, the Jagiellonian University and the City of Krakow invite participants to the lecture „Events in History”, which will be presented on April 5, 2018 by the world-renowned historian Prof. Norman Davies. Is there a logic of history? What was the role of unpredictable events in the past? Is the history written by events, not by winners? How can you deal with the event problem in historical studies? Do historians try to be too rational looking for justifications for events that were mainly decided by the accident? - these are some questions about the role of incidents in the history of Poland and the whole world. The lecture will take place on April 5, 2018 at 18.00 in the auditorium of the didactic building of the Faculty of Law and Administration of the Jagiellonian University in Kraków, ul. Krupnicza 33a.

100 works in the Krystyna Bochenek competition

2018-03-27

More than one hundred works were enrolled for Nationwide Journalist Krystyna Bochenek Competition. The jury evaluates the works that were created and appeared in 2017. The aim of the competition is to promote the region and to commemorate Krystyna Bochenek - a Silesian journalist known for many social initiatives. The competition is open. The works should present the issues of Silesia in a literal or a universal way and Silesia is not necessarily a main focus. This year a new category- Student is added. It is addressed to university students from all over Poland. The works related to Upper Silesia, Zagłębie, Podbeskidzie or Ziemia Częstochowska will be assessed. The prize funded by the Rector of the University of Silesia is PLN 5,000. The envelope of all prizes is PLN 50,000. The competition jury consists of scientists, journalists, artists and local government officials.

International Geopolitical Contest

2018-03-27

Last minute applications to the I International Geopolitical Contest are still being accepted. Students and PhD students representing national and foreign research centers can take part in the contest organized as an initiative of the Polish Geopolitical Society. Its aim is to disseminate geopolitics understood as an interdisciplinary field of knowledge combining political science, geography, international relations, military sciences, national security, geostrategy, geoeconomics. The competition is planned in stages. First, the participant needs to write a paper about current events in the international relations. The authors of the best works and the articles published in scientific journals from the list of the Ministry of Science and Higher Education will be promoted to the next stage. The top 30 will be selected from the best 30 participants. The applications can be sent to: ptg@ptg.edu.pl

April March for Science

2018-03-27

March for Science is a worldwide pro-scientific and pro-social initiative and it will be held also in Warsaw on April 22, 2018. March for Science 2018 in Poland is to be a reminder of the importance of science as a field of human activity, emphasizing the role of scientists in society and encouraging greater financial and logistical expenditure on Polish science and education. It should also be an expression of the support of scientists, students, science enthusiasts for knowledge-based public activities, in particular on issues such as: smog, medicine and vaccination; energy, GMO and agriculture; climate, natural economy and environmental protection; human sexuality and the role of man and group in society. The event is organized by scientists, students and pro-racial activists. More: <http://www.marszdanauki.pl/>

First anniversary of the Silesian Center for Popularization of Science

2018-03-27

The Center for Popularization of Science of the Silesian University of Technology celebrated its first year of activity. Researchers decided to celebrate the anniversary by popularizing science at the Gliwice shopping center. Among the attractions were m.in. 3D printing and laser engraving. As part of the celebration, science popularizers realized a number of spectacular shows and presentations during which they explained the intricacies of science and technology in a simple and interesting way. The participants were able to fly on the drone simulator, print a birthday souvenir in 3D and also taste the molecular cuisine. There was also a birthday cake. Visitors could learn about the «matrix of careers» - on-line tools for measuring and diagnosing soft and professional competences as well as drawing up competency and qualification balances necessary to determine the direction of professional development. At the stand of the Student Careers Office, the visitors could consult their CVs.

Gold medal at the Valencia fair for Toruń scientists

2018-03-27

The location system called „Method of finding positions of objects, in particular humans, and human positioning equipment” is an invention of scientists Michał Meiny and Dr Krzysztof Rykaczewski from the University of Nicolaus Copernicus in Torun who won the Gold Medal of the INNOVA 2018 Inventiveness Fair in Valencia. The invention was constructed for supporting fire services. The invention of Torun scientists was implemented as part of the project «KUBUS - Commercialization of University Research and Services» run by the Academic Business Incubator of the Nicolaus Copernicus University within the program of the Ministry of Science and Higher Education «Incubator of Innovation +». The location system has been designed to support fire services and taking into account the specificity of work during rescue and firefighting operations. Determining the position of firefighters in real time increases the safety of the rescue team and provides better coordination of fire-fighting activities - informs the University of Toruń.

Another gold medal for Poland at the INNOVA 2018 Fair

2018-03-28

During the International Exhibition of Innovation, Research and New Technologies INNOVA 2018 held in Valencia, the Institute of Aviation- Department of Remote Sensing (Space Technology Center) was awarded the Gold Medal of Invention, for the development of the tools for processing satellite images, data aggregation and creating easy-to-interpret maps of the physical phenomena. At the same fair, the gold medal was also won by scientists from the Nicolaus Copernicus University in Toruń for the location system supporting the fire service. The INNOVA fair is the oldest event in the field of inventiveness and scientific research in the world. For 65 years the fairs were held in Belgium, and last year they were transferred to Spain. The previous event took place in Barcelona while the current one took place in Valencia. Over 160 exhibitors from around the world

participated in it. Parallel to the INNOVA Fair, the FORINVEST International Forum was also held. This was an exhibition of products and services in the fields of finance, investment, insurance and new technologies from various fields.

Conference on scientific management at Warsaw University of Technology

2018-03-28

As part of the celebrations of the 100th anniversary of regaining independence, the Faculty of Management at the Warsaw University of Technology and the Warsaw Branch of the Scientific Society of Organization and Management organize a scientific conference „Management 4.0 - scientific management in the vanguard of Polish development for 100 years”. The scholars plan to reflect on the current development trends of «Management Science», especially in the context of progressive digitization, based on modern technologies and causing dynamic economic and social changes. The event will consist of four thematic blocks related to management: strategy, processes, relationships and human resources. In addition, a discussion panel will be held with representatives of leading high-tech companies: Oracle, Dell, Intel and Microsoft. More: http://www.wz.pw.edu.pl/index.php/Media/Files/Zaproszenie_na_konferencje_Zarzadzanie_4.02

„Compostomat” from the Silesian University of Technology awards the Stena Circular Economy Award

2018-03-28

The compostomat developed at the Faculty of Environmental and Power Engineering of the Silesian University of Technology to increase the efficiency of bio-waste collection received the main prize of the Stena Circular Economy Award - the Leader of Closed Circuit Economy. Compostomat constructed by a student Karolina Ceglaz is an energy self-sufficient and easy-to-use device that enables increasing the efficiency of bio-waste collection from urban multi-storey blocks. The device is to be located near

local rubbish containers. The residents bring kitchen waste in special chipped containers. In return, they receive points that they can exchange for a home composter, compost, a discount for waste disposal, gadgets that help reduce the amount of waste generated, and discounts to cooperating companies.

Researchers of the Medical University of Wroclaw educate children

2018-03-28

The harmfulness of smog, the benefits of a vegetarian diet, the prevention of addictions through sport and the prevention of tooth decay - these are the themes of the meeting as part of the Wrocław Medical University's „Uruchamiamy Dzieciaki” campaign. Dr. Tomasz Zatoński presented studies on his thesis that Wrocław is the second (after Krakow) most polluted city in Poland, and Dr. Katarzyna Neubauer tried to convince the audience that a well-balanced vegetarian diet is appropriate at every stage of life. The researchers encouraged the young participants of the meeting to physical activity, explaining that sport is one of the forms of preventing addiction - it directs activity on other tracks, teaches how to function in the group, increases self-esteem and reduces the level of anxiety. Finally, the issue of ... frequent teeth cleaning was presented. The teeth should be cleaned at least twice a day - after breakfast and supper.

Students of the Land Forces Academy at the training ground in Wędrzyn

2018-03-28

Cadets of the Academy of Land Forces in Wrocław improved their skills at the Training Center of the Ground Forces in Wędrzyn. The practice on the training ground is a chance to check the acquired theoretical knowledge in real conditions. Officers of mechanized, reconnaissance and aeromobile specialties practiced techniques and ways of operating in the urban area using the Laser Shooting Simulator. Future tank commanders improved their skills in commanding a platoon of tanks in tactical operations. In turn, artillerymen - as part of the shooting and fire control classes - carried out firing tasks from DANA self-propelled gun howitzer. The culmination of the training were integrated activities carried out in the Central Urbanization Center, during which general military units cooperated with sub-units of various types of troops.

Cardinal Stefan Wyszyński's university established cooperation with the Studium Biblicum Franciscanum in Jerusalem

2018-03-28

Cardinal Stefan Wyszyński University in Warsaw signed a cooperation agreement with Studium Biblicum Franciscanum in Jerusalem. It will include the promotion and implementation of joint scientific research, teaching programs and cooperation in the field of international volunteering. The contract was concluded in Jerusalem. It was signed by the rector of the Cardinal Stefan Wyszyński University, priest Prof. Stanisław Dziekoński and the rector of Studium Biblicum Franciscanum, priest Prof. Rosario Pierri. The University of Jerusalem is a famous scientific unit of biblical research and archeology. Representatives of both universities are convinced that joint research and educational projects will contribute to the development of academic, cultural and scientific relations as well as to the implementation of activities related to archaeological and historical-artistic researches.

Agnieszka Sobczak-Kupiec from the Cracow University of Technology won „Inventor 2017”

2018-03-29

Dr Eng Agnieszka Sobczak-Kupiec from the Faculty of Chemical Engineering and Technology at the Cracow University of Technology won the „Inventor 2017” competition. All competitors were applied by the research institutes, technical universities, scientific and technical associations as well as innovative companies and laureates of previous editions. Dr Eng. Agnieszka Sobczak-Kupiec deals in obtaining nanometals, nanosilver and nanogolds. Her research combines material engineering, chemical technology and nanotechnology. She develops biomimetic implant materials, modeled on biological structures and created a synthetic bone substitute with antibacterial properties. The «Inventors 2017» competition was organized by the Association of Polish Inventors and Rationalizers and the Federation of Scientific and Technical Associations of the Supreme Technical Organization together with the «Przegląd Techniczny» magazine with the support of the Patent Office.

Salary increase for academic teachers since 2019

2018-03-29

Almost half of university teachers in public universities will receive pay rises. The Ordinance of the Minister of Science and Higher Education regulating this remuneration increase enters into force on 1 January 2019- informs the Ministry of Science and Higher Education. The regulation is the part of the Constitution for Science. The basic salary of PhD tutors will increase by PLN 860. The assistants, lecturers, teachers and instructors will notice the difference. So far, their minimum salary was around PLN 2,400. After the changes, it will be over PLN 3200 - about PLN 800 more than at present. Since the economy is growing rapidly and it is also developing thanks to scientists, they must earn more. Their salaries should reflect their role in the process of building strong Poland. - emphasized Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education.

Jan Długosz Academy receives a grant for university development

2018-03-29

Jan Długosz Academy in Częstochowa received almost PLN .5 million for the development program. It is foreseen that over 700 students, 130 teachers and approximately 70 people from the management and administrative staff will be covered with that support. The aim of the project is to raise the competence of students of the Academy Jan Długosz in Częstochowa, support organizational changes and increase the competences of the didactic, managerial and administrative staff of the university through the implementation of a comprehensive program to improve the quality of its functioning. The program includes trainings, internships, study visits and additional classes. Under the program over 700 students will gain new professional qualifications and competences - including IT, group work and language. The support will also cover 130 teachers and about 70 people from the management and administrative staff who will develop their competences in the university management, IT technologies and languages.

Students and graduates of the Silesian University of Technology are laureates of the Fiat competition

2018-03-29

Six works of students and graduates of the Silesian University of Technology were awarded the prize of the Fiat Chrysler Automobiles group for the best diploma and research works. The aim of the 19th competition is to support young scientists who are passionate about the automotive industry and its modern construction solutions. The awarded works are: «BAT-T2CARS electric vehicle - traction calculations»; «BAT-T2CARS electric vehicle - prototype construction»; «A new generation of energy-saving permanent magnet synchronous motors for automotive applications»; Test Thermo-Shock application on the cDAQ platform in the context of IIOT (Industrial Internet of Things); «The influence of boron on the structure and hardness of ductile iron» and «Optimization and numerical analysis of the strength properties of the connecting-rod of an internal combustion engine». This last job also won the prestigious Giovanni Agnelli prize, awarded by the Fiat Research Center in Torino.

Project of the Polish-Japanese Academy of Information Technology for the 100th anniversary of Polish independence

2018-03-29

The Polish-Japanese Academy of Information Technology and the Poster Museum in Wilanów, a branch of the National Museum in Warsaw, in cooperation with 20 universities from all continents, undertook a contemporary interpretation of the concept of „Independence.” The effects can be viewed from 29 March 2018 at the Warsaw Poster Museum in Wilanów at the exhibition entitled «100 x Independence» The exhibition - inspired by the 100th anniversary of Poland's regaining independence - is the result of workshops conducted at universities that participated in the project. As the organizers assure, this is the voice of the young generation,

covering a hundred original student statements from around the world. The participants will send traditional posters and other interactive forms like visual messages, accompanied by essays of mentors to form the visual and multimedia communication. More: <https://independence.pja.edu.pl/>

Professor Ewa Łętowska holds a lecture on the twilight of the liberal state of law in Poland

2018-03-29

Professor Ewa Łętowska will give a lecture on „The Twilight of the Liberal State of Law in Poland” on April 5, on the invitation of the student government of the Faculty of Law and Administration of the University of Szczecin. The event is organized as part of the university program „Shades of Justice”. Professor Ewa Łętowska specializes in civil, administrative and constitutional law. In her career, she was the first Ombudsman in Poland, a judge of the Supreme Administrative Court and the Constitutional Tribunal, she is a member of the Polish Academy of Sciences. She received the title of doctor honoris causa of the University of Gdańsk, the Academy of Special Education and the University of Warsaw. The lecture will take place on Thursday, April 5, at 11:00 am, in the lecture hall of the Faculty of Mathematics and Physics at the University of Szczecin, ul. Wielkopolska 15.

Interactive exhibition at the University of Rzeszów

2018-03-29

University of Rzeszów and the Explores Association have launched the interactive exhibition. The event is another step on the way to create the Center of Science Eksploratorium. The exhibition presents the issues from various fields of science: mathematics, biology and physics. Among almost 20 stands there are anatomical models and models of selected physical phenomena: wave motion, center of gravity and issues of optics. Visiting the exhibition, students can solve geometric puzzles, build a bridge according to Leonardo da Vinci's plans or check Pythagoras with the help of the steering wheel. Campaign „Girls go to the technical universities!” to launch in Poland

2018-03-30

April „Girls go to the technical universities!” Campaign is the largest project promoting technical, engineering and exact majors among young women in Poland and in Central and Eastern Europe. The project started in 2006 and this year technical universities in Poland invite girls for an open day on 19th of April. The initiators of the action are the Conference of Rectors of Polish Technical Universities and the Perspektywy Educational Foundation. The most important goal is to overcome stereotypes and encourage upper secondary school female students to start technical and exact studies. The culminating point of the campaign is the National Open Day for Girls. Women working at universities, lecturers, but also female students and graduates meet with students to tell them about their career path and professional fascinations. They invite girls to visit the laboratories and organize special workshops, lectures and demonstrations for them. More: <http://www.dziewczynynapolitechniki.pl/>

2th Hispanic Congress at the Catholic University of Lublin

2018-03-30

The Department of the Spanish World, Politics and International Relations of the Catholic University of Lublin and the Regional Center for International Debate in Lublin organize on April 5-6 the Second Hispanic Congress „Between East and West”, which will focus on „Polish missionaries in the Spanish language countries. History, presence, perspectives. „According to the organizers, the Congress is to undertake «an intellectual reflection on the history, the present and the perspectives for the participation of Polish clergy and laity, in the work of evangelization in the geographically distant and very diverse regions in the cultural sense». The Lublin event was attended by Alberto Salas Barahona, Ambassador of Peru and Francisco Javier Sanabria Valderrama, Ambassador of Spain.

Conference on neuroscience at the Jagiellonian University

2018-03-30

The Jagiellonian University in Krakow organizes on 20-22 April 2018 an international conference NEURONUS 2018 IBRO Neuroscience Forum. Neuronus IBRO Neuroscience Forum is an important scientific conference in Central and Eastern Europe, devoted to dynamically developing neuroscience. Last year's conference gathered 500 participants, representing 61 research institutes and universities from 18 countries. This year's scientific program was divided into four thematic blocks: Drugs that heal, cognitive session, biological session and medical session. The program will be complemented by the lectures of the renowned scientists: Amir Amedi from the Hebrew University in Jerusalem, Ole Jensen from the University of Birmingham, Markus Ullsperger from the University of Otton von Guericke in Magdeburg, Emma Robinson from the University of Bristol, Yves de Koninck from Laval University and Tomas Kuner from the University of Heidelberg . More: <http://neuronusforum.pl/>

Kraków AGH University researchers to explore the caves on Spitsbergen

2018-03-30

Scientists from the Department of Mechanics and Vibroacoustics of the Faculty of Mechanical Engineering and Robotics at the AGH University of Science and Technology in Krakow has conducted a comprehensive acoustic analysis of ice caves at Spitsbergen. In March, the third scientific expedition took place. Works were carried out during this and two previous expeditions (in August 2016 and in February 2017) by: Prof. Eng. Jerzy Wiciak, Prof. Eng. Antoni Kalukiewicz, Dr Eng. Janusz Piechowicz, Dr Eng Dorota Czopek and Dr Eng Paweł Małecki. It is an important starting point for further acoustic studies in the polar environment, and in particular for the observation of acoustic climate changes. During this year's expedition, acoustic measurements were made in four ice caves: Larsbreen, Longyearbreen and Tellbreen. It is planned to continue the acoustic research in Spitsbergen in the summer season,

therefore the existing recordings database will be supplemented with the Barentsburg acoustic map in the summer time and acoustic monitoring of the bird colonies in the area of the Fuglefjell plateau.

Autonomous vehicles from the Wrocław University of Technology considered as the best at competitions in the Czech Republic

2018-03-30

Students of the Wrocław University of Technology advanced to the finals of international competitions of autonomous vehicles NXP Cup. They took the first two places in the final elimination tournament in the Czech Republic. NXP CUP is an international series of competitions in which student teams compete on designated routes with autonomous vehicles. The machines are made up of parts provided by the organizers, and the young constructors must develop the engine control module and the vehicle control software themselves. Teams from the Scientific Circle of Mechatronics and Robotics prepared two models of autonomous vehicles. After a fierce battle, the Synergy team won. Their vehicle made the entire route in 17.2 seconds while the Synergia team with the score of 20.8 seconds took second place and also qualified for the final tournament in Germany.

Chinese students of landscape architecture in Dzierżonów

2018-03-30

Polish-Chinese landscape architecture students at the University of Environmental and Life Sciences in Wrocław visited Piława Dolna to prepare an analysis of the village landscape and design concepts of two parks. Thanks to the agreement concluded with the commune of Dzierżonów, students of Polish-Chinese specialty in landscape architecture prepare the concept of land development in one of the villages every year. In 2016, it was the development of Gnejsów, and in 2017 the pond area in Mościsko. This year, Chinese students dealt with the areas in Piława Dolna. In mid-March, they got acquainted with the landscape and the advantages of the village.

After the visit - within the framework of the subject of Shaping of the rural areas in Europe - they made landscape analysis, and later presented the design concepts of two parks - at Spacerowa and Blotna.

Award for book „S jak Śląsk – Superbohaterowie po śląsku „

2018-04-03

The book „S jak Śląsk – Superbohaterowie po śląsku” by Dr Marek Głowacki was awarded in the competition of the Edward Pudelko Association of School Publishers. It was published by the University of Silesia Publishing House. The book contains drawings, illustrations and texts created as part of the artistic project «S stands for Silesia - Superheroes in Silesia». The project includes a series of comic illustrations about the characters created on the basis of biographies of real inhabitants of Silesia, who through their achievements approached the ideal of the superhero. Dr Głowacki describes these figures, referring to the graphical scheme of black and white comics realizations, presenting their stories in the form of individual illustrations rich in detail. The project was implemented as the subsidy supporting the academic staff of the Artistic Department of the University of Silesia. Detailed information about the publication on the website: www.wydawnictwo.us.edu.pl.

Student IT Festival in Krakow

2018-04-03

On 5-7 April 2018, the 14th Student Information Festival will take place at the Auditorium Maximum of the Jagiellonian University in Krakow. This is an annual event organized jointly by the scientific circles from the following universities: the AGH University of Science and Technology, the Jagiellonian University, the University of Economics and the Cracow University of Technology. The event is under the patronage of the rector of the Jagiellonian University, Prof. Wojciech Nowak. During three days, the festival participants will take part in many inspirational lectures and workshops. The speakers include Larry Wall - the creator of the Perl language, Joe Armstrong - author of Erlang, and Bram Moolenaar - creator of the popular text editor Vim. More: <https://www.facebook.com/sfikrakow/>

Professor Knottenbelt to hold a lecture on cryptocurrencies at the Lodz University of Technology

2018-04-03

„The cryptocurrency revolution: what's this all about?” - Professor William Knottenbelt from Imperial College London will hold this lecture at the Technical University of Lodz on Thursday, 5 April 2018. Those, who plan to learn something about the phenomenon of Bitcoin and cryptocurrency, dig the first Bitcoin, or invest in other cryptocurrencies are invited to a unique opportunity in Poland to meet Prof. William Knottenbelt. The lecture will take place in the auditorium of the Faculty of Management and Production Engineering (Building of Three Faculties, 3rd floor), ul. Wólczajska 215 in Łódź, at 12.00.

Rector of the Poznan University of Technology visits the Peruvian universities

2018-04-04

The Rector of the Poznan University of Technology Prof. Eng. Tomasz Łodygowski with his colleagues visited in March eight best Peruvian universities and Salesian high school and technical education centers. The Rector of Poznan University of Technology represented a consortium of Poznan universities for cooperation with Peru. The consortium includes the University of Technology, the Adam Mickiewicz University and the University of Life Sciences. The objective of the consortium is signing a cooperation agreement with PRONABEC (Program Nacional de Becas y Credito Educativo). It is a government agency that grants the scholarships on behalf of the President of the Republic of Peru, covering the total cost of studies (master's or doctoral) along with transport and maintenance costs. During the meeting with the authorities of this institution, further steps were established to begin the cooperation between PRONABEC and the consortium of Poznań universities.

Professor Jerzy Surma from the Warsaw School of Economics becomes head of the National Center for Cryptology

2018-04-04

The Minister of National Defense Mariusz Błaszczak appointed Prof. Jerzy Surma for the new head of the National Center for Cryptology. The professor is an employee of the Department of Information Technology at the Institute of Computer Science and Digital Economy, Collegium of Economic Analysis of the Warsaw School of Economics. Scientifically, he deals with the analysis and data operating in the field of social media, business intelligence and cyber security. He is also the head of the Postgraduate Studies in Cybersecurity Management. The National Center of Cryptology is a subordinate entity of the Ministry of National Defense, dealing with the research and implementation of cryptographic solutions for the needs of Polish public administration and the army.

Opole University of Technology has established cooperation with three Ukrainian universities

2018-04-04

The Opole University of Technology will cooperate with the Tarnopol University of Economics, the Lwow State University of Physical Culture and the National University in Lwow. Agreements were concluded during educational fairs. „Higher Osvita 2018” in Lwow. The agreements signed at the Palace of Art concern joint education and international scientific cooperation of the University of Technology with three Ukrainian universities. During the fair, the vice-rector of the Opole University, Prof. Krzysztof Malik talked with the authorities of Lwow technical universities about double diploma issues, joint educational grants and the Erasmus + program. The Rector also encouraged potential candidates to familiarize with the educational offer of the Opole University of Technology. One of the goals of his visit was to increase the number of Ukrainian students at the Opole university.

Prof. Benner holds a lecture at the Academy of Special Education in Warsaw

2018-04-04

The Academy of Special Education in Warsaw invites participants on April 12 for an open lecture „On three kinds of causality in the processes of upbringing and education and their importance for special education” by Prof. Dietrich Benner, retired professor of the Humboldt University in Berlin. Professor Benner received a doctorate in philosophy at the University of Vienna in 1965 and completed his postdoctoral thesis five years later at the Faculty of Arts of the University of Bonn. From 1973, he has been a professor of pedagogical sciences. Until 1991 he managed the Institute of Education at the University of Munster. In 2004 he became an honorary professor at the Pedagogical University of Shanghai. He is the honorary doctor of the University of Aarhus (Denmark) and the University of Abo Akademie (Finland). In the years 2008-2013 he was a professor at the Cardinal Stefan Wyszyński University in Warsaw. The lecture will begin on April 12 at 11.40 in Hall A, Building C, Academy of Special Education in Warsaw.

University of Silesia will train on the principles of good behavior

2018-04-04

The best students from schools cooperating with the University of Silesia will take part in a savoir-vivre course, organized for them by the Silesian university. The lecture and training will take place on Monday, 9 April in the rectorate building of the University of Katowice, ul. Bankowa 12. The workshops will cover the classic principles of savoir-vivre (including greetings and farewells, presentation, styling, inappropriate behaviors) and issues related to interpersonal communication (including non-verbal forms of communication). The lecturer will also talk about the basic principles of the culinary etiquette or a proper dress code. The classes will be led by Dr Andrzej Szteliga, specialist in the field of economic diplomacy. He is also a lecturer of the diplomatic protocol and etiquette at the Academy of Diplomacy of the University of Silesia.

Professor Jan Chmura won the Crown of the World's Biggest Marathons

2018-04-04

Professor Jan Chmura, 69 year old researcher at the Academy of Physical Education in Wrocław, won the Crown of the World's Big Marathons. He completed the 6 most important and largest marathons in the world and simultaneously he had run the scientific project in physiology on his own body. Professor Chmura is the only professor in Poland and the first academic and didactic employee in the history of APE in Wrocław, who won the Crown of the World's Marathons. To get this distinction one must complete the marathons in Boston, London, Chicago, Berlin, New York and Tokyo. The professor did not avoid Polish marathons - he completed running in Warsaw, Krakow, Poznan, Dębno and Wrocław. In the last 5,5 years, he ran almost 20,000 kilometers (a distance from the North to the South Pole).

Students of the University of Silesia to organize the Węgiel Film Festival

2018-04-05

Short films and animations from the entire world will be presented on April 12 and 13 during the 15th Węgiel Film Festival organized by the students of the Radio and Television Department at the University of Silesia. The aim of the festival is to present student works from the world universities, as well as exchange the experience and enhance the integration of the high schools. This year's festival will take place on April 12 and 13 in the new headquarters of the Radio and Television Department of the University of Silesia in Katowice, at ul. Sw. Pawła. The student contest will be a great opportunity to observe the techniques and skills of their colleagues and discuss about the films qualified for the competition. The list of films qualified for the festival is available at: www.wegielfestiwal.us.edu.pl

Nobel Prize winner Prof. Klaus von Klitzing to hold a lecture at the Wrocław University of Technology

2018-04-05

The winner of the Nobel Prize in physics Prof. Klaus von Klitzing will be a guest of the Wrocław University of Technology. On Tuesday, April 17, the Nobel Prize winner will hold a lecture on „The New Kilogram Pattern in 2019: The Greatest Revolution in Metrology After the French Revolution”. The lecture concerns the changes in the International System of Units (SI system). Currently, only a basic unit of kilogram is defined on the basis of a specific object (platinum-iridium roller stored in Sevres). After the change, all 7 units will be based on universal physical constants, that is, phenomena, not objects. This will be possible thanks to the von Klitzing's discovery of the „quantum Hall phenomenon” for which the scientist received the Nobel Prize. Professor von Klitzing was born in 1943 in Sroda Wielkopolska in Poland. He is one of the most-cited scientists in the world, he is a doctor or professor of honor from 22 universities around the world.

Conference „Languages & Emotions” at the University of Silesia

2018-04-05

University of Silesia, SWPS University and the City of Katowice jointly organize the third international conference „Languages & Emotions”. From 13 to 15 April, various lectures and workshops are planned in three thematic headings: bilingual children; selective mutation and stuttering, peace of mind and balanced planner. On the first day of the conference, specialists will show how to help the child to learn a non- native language - how to support a child in the process, how to start and what to avoid. The second day will be devoted to the challenges of the work with a child with a mutism and how to deal with anxiety disorders and expectations during therapy for teenagers and adults. On the last day, scientists will tell the participants how to have more spared time, how to manage the time to gain up to three

hours a day, to improve the happiness level, regain health and control home finances. Detailed information and registration form are available at: www.jezykiemocje.eu.

„Terrorism and Medicine” at the Collegium Civitas in Warsaw

2018-04-05

The Center for Research on Terrorism of Collegium Civitas organizes a scientific conference „Terrorism and Medicine”, which aims to present the threats and exchange views and practical experience on the medical aspects of terrorism. During the conference, the specialists in the field of terrorism and medicine will hold lectures on the medical aspect of terrorism. The Warsaw University emphasizes that terrorist attacks become a new challenge for medical services. Issues related to the medical aspects of terrorism create a vast, multidisciplinary branch of knowledge, combining elements of disaster medicine (mass events), organization of emergency medical systems, clinical disciplines (specificity of injuries), forensic medicine, organization of the victim identification process as well as clinical psychology. The area of health threats is extremely wide and includes chemical, biological, radiation threats. The conference will start on April 25, 2018 at 8.00, in the Aula Collegium Civitas (XII floor of the Palace of Culture and Science in Warsaw).

Scientific conference on Euro-integration at the University of Economics in Białystok

2018-04-05

The University of Economics in Białystok, together with the Ukrainian Tarnopol Institute of Social and Information Technologies, organizes on 25-26 April 2018 the scientific conference „Euro-integration processes in education, science and economy”. The aim of the conference is to exchange knowledge and good practices in the area of current problems and needs of Euro- integration in the educational, scientific and economic areas. The participants of the event will deal with problems in four thematic headlines: Innovation and investment development of cities and regions; Social institutions in the conditions of European integration; The integration process in the global scientific and educational space; Innovative and information systems for the transfer of knowledge and technology. The conference will start on April 25, 2018 at 9.00 at the University of Economics in Białystok, ul. Zwyciestwa 14.

Agreement on the Polish-Chinese competition for research projects

2018-04-06

The National Science Center has signed an agreement with the National Natural Science Foundation of China (NNSFC) in Beijing. It will result in a bilateral competition for Polish-Chinese research projects in the field of basic research. The competition, conducted in cooperation with the Chinese partner will be another bilateral project offered by the National Science Center. The Polish-Chinese projects will be supported in the field of life sciences, exact and technical sciences and selected disciplines in social sciences. The detailed conditions of the competition will be announced in June 2018. - We hope that the Polish-Chinese program will attract so much interest as previous bilateral competitions. The selected direction of cooperation is no a coincidence. Establishing and strengthening relations with such an economically and scientifically active country as China will certainly serve the Polish academic envi-

ronment - emphasized Prof. Zbigniew Błocki, director of the National Science Center.

Government allocates PLN 70 million for the campus at the University in Lublin

2018-04-06

The government allocated PLN 70 million from the state budget for the construction of a new, western campus at the Maria Curie-Skłodowska University in Lublin. April 3, 2018 Deputy Prime Minister, Minister of Science and Higher Education Jarosław Gowin and Rector of the Lublin University Prof. Stanisław Michałowski signed agreements on financing new University investments. The new headquarters of the Faculty of Political Science, Institute of Psychology, Institute of Pedagogy, as well as the Academic Sports Center will be constructed in the western Campus. As part of the government's support, the modernization of the Academic Culture Center «Chatka Żaka» will also be completed. Deputy Prime Minister Jarosław Gowin emphasized, that this investment is a great opportunity to develop not only the Lublin university, but also the region. Today Lublin is one of the most important academic cities in Poland. Thus, this investment enables the University of Maria Curie-Skłodowska to become one of the leading universities in Poland providing the high quality and comfort of studies.

Students to design computer games in Torun

2018-04-06

Four student game projects were awarded in a competition organized by the Nicolaus Copernicus University in cooperation with Vivid Games company. The participants' task was to prepare the concept of a game for mobile devices or a multiplatform game together with a proposal for its artistic development. The laureates are female students of the Faculty of Fine Arts at the University of Toruń. The winning projects are: «Schrupaszczka» - a game about an insectivorous plant surrounded by various insects; «Speedrun» - a game for mobile devices about an ant escaping from a forest fire to an underground shelter; «Fiubódzio» - a game takes

place in the human body with subsequent boards depicting the functions of various parts of the brain and «Cherry on the top» - platform 2D game whose hero is a cherry, separated from his brother by an evil confectioner. The cherry has to return to her brother, breaking through the top layers of the cake.

Gliwice Technopark invites to Science and Industry Days

2018-04-06

Science and Technology Park Technopark Gliwice and the city of Gliwice invite students to participate in the 8th Science and Industry Days. The exhibitors - companies, institutions, scientific circles and anyone interested in innovative solutions can apply for this event until 27 April. Participation in the event is a great opportunity for Silesian companies and scientific units to promote for free their innovative solutions. Exhibitors come from various industries, including automation, robotics, IT, telecommunications, automotive and biotechnology. Every year, over 50 exhibitors participate in the event and more than a thousand guests visit it. Future exhibitors are asked to open the Science and Industry Day website: <http://dnip.pl/> fill out the application form and send it to the e-mail address: targi@technopark.gliwice.pl

Congress of the oil and gas industry at the AGH University of Science and Technology

2018-04-09

On April 10-12, 2018, the AGH UST SPE Student Chapter (AGH University of Science and Technology Society of Petroleum Engineers) will host the 9th Congress of the oil and gas industry „East meets West” organized by the AGH University of Science and Technology. As part of the event, a competition of papers, posters and European and the quiz competition «PetroBowl» are planned. «East meets West» is the largest student conference in Europe and it gathers hundreds of delegates representing the universities and the companies from around the world. The main idea of the event is to match industry companies with talented students. AGH UST SPE Student Chapter (the Student Section of the Society of Petroleum Engineers) is operating at the AGH University of Science and Technology and it is the only organization of this type in Poland. The Society of Petroleum Engineers (SPE) is an international organization associating over 100,000 engineers and students associated with the oil industry. More: <http://emwcongress.org/>

Father Adam Boniecki to receive honorary doctorate from Lodz University

2018-04-09

The Senate of the University of Lodz has decided to award the title of doctor honoris causa to Father Adam Boniecki. The ceremony will take place on April 12, 2018 at the Faculty of Philology at the Łódź University. The resolution has been adopted by the reviewers - lecturers of the Cardinal Stefan Wyszyński University, the University of Warsaw and the University of Lodz. Father Adam Edward Fredro-Boniecki was born on July 25, 1934 in Warsaw. He studied philosophy at the Catholic University of Lublin and at the Paris Catholic Institute. He is a publicist and the former editor-in-chief of the Tygodnik Powszechny. He worked for it since 1964 when the Polish bishop Karol Wojtyła asked him to cooperate. Wojtyła, as Pope John Paul II, again

invited Father Boniecki to write in another magazine - L'Osservatore Romano. Father Adam Boniecki is also a laureate of many awards and distinctions, including the Kisiel Award, the Ecce Homo Order, the Gold Medal „Gloria Artis” and the Dariusz Fikus Award for publishers. The promoter of his honorary doctorate is Professor Barbara Bogolebska from the Faculty of Philology of the University of Lodz.

Professor Krzysztof Diks to receive the Lifetime Coach Award ICPC 2018

2018-04-09

On 15-20 April 2018, the next Academic World Championships in Team Programming (ICPC) will take place in Beijing. This year, the organizers decided to honor the Professor Krzysztof Diks from the University of Warsaw with Lifetime Coach Award, for bringing their teams to the world finals 20 times. Professor Krzysztof Diks is the chairman of the Polish Accreditation Committee and the director of the Institute of Computer Science of the Faculty of Mathematics, Computer Science and Mechanics of the University of Warsaw. The ACM International Collegiate Programming Contest (ICPC) is an international team programming competition for students from around the world. The competition is organized every year with the support of IBM. For years, the teams prepared by Professor Dix have gained the leading positions in these competitions. Last year, the University of Warsaw team ranked the second.

University of Szczecin to organize courses for Ukrainians

2018-04-09

The University of Szczecin will organize the course „New competences in a new country” for Ukrainians. The university provides the classes on practical language skills, economics, law, as well as present Szczecin and its city administration. The course will help the integration of Polish and Ukrainian citizens and facilitate assimilation of Ukrainian citizens. The main goal will be to overcome the language and

cultural barriers by organizing the practical language learning. The topics of the meetings are devoted to issues related to the work, running your own business, the rights and obligations of foreigners during their stay in Poland, the principles of the use of medical care and health insurance, and the compulsory schooling and education system in Poland. More information: <http://ua.usz.edu.pl/>

University of Silesia invites high school graduates to the night matriculation repetitions

2018-04-09

The University of Silesian Graduates organizes Quick Night Repetitions. During three-hour lectures, secondary school graduates will repeat the most difficult or most common final exam issues appearing in the tests. Repetitions are scheduled for the last week of April. There will be organized Polish repetition (with classes devoted to the preparation for the oral exam); English language; mathematics at the basic and extended level; chemistry (with the participation of the Experimentalists Association); biology; history. The meetings will be run as part of the University of Silesian Graduates by university lecturers and teachers, and during the course participants will be able to use modern digital tools and multimedia materials. Detailed information and application forms: www.facebook.com/events/1801140206610889 and maturzysta.us.edu.pl.

Wrocław University of Technology to cooperate with Saxony

2018-04-09

Polish and German entrepreneurs, representatives of local government, non-governmental institutions and ecology organizations participated in the conference „Saxon-Lower Silesian cross-border cooperation in the field of the environment” at the Wrocław University of Technology. The most important challenges in environmental protection in Lower Silesia are responsible use of resources, protection of natural environment, creation of green rings around urban agglomerations, development of renewable energy sources and the closed circle economy. The participants of the conference also drew attention to the deteriorating quality of ground and surface water as well as the uncontrolled spread of urban development and the degradation of the landscape. Wrocław University of Technology currently implements five projects jointly with Saxony. The cooperation between Saxony and the Wrocław Technical University officially began 10 years ago.

Gdańsk University of Technology receives a grant within the framework of Polish-Taiwanese research cooperation

2018-04-09

The scientist of Gdańsk University of Technology will receive funding for the project in the joint competition organized by the National Center for Research and Development together with the Taiwanese Ministry of Science and Technology. The creator of the project Power2hCarbon «Materials for direct conversion of electricity to hydrocarbons» is Dr Eng Piotr Jasiński, Prof. of the Gdańsk University of Technology. In the scientist's opinion, the electrolysis of water, and in particular the electrolysis of water and carbon dioxide, is a very promising technology for the storage of energy in the form of hydrogen or synthesis gas from renewable sources, such as wind and solar energy. „This is so-called the power-to-gas concept that allows the reduction of

greenhouse gas emissions, while providing sources of energy „- emphasized the author of the project, which will be implemented jointly with the National Taipei University of Technology.

Almost PLN 100 million for the expansion of the Lodz University of Technology

2018-04-10

Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education and Prof. Sławomir Wiak, Rector of the Lodz University of Technology, signed an agreement under which the Ministry of Science will allocate PLN 97.5 million for the development of the infrastructure at the Łódź University. As part of this targeted subsidy, a modern conference and teaching center, as well as a laboratory and didactic building of the Faculty of Chemistry of the Lodz University of Technology will be financed. Lodz University of Technology is one of the best technical universities in Poland - said Deputy Prime Minister Jarosław Gowin. - The Chemical Faculty is a strong scientific center of the University of Technology, which needs an adequate infrastructure for further development if we want Łódź to be a city, whose development is based, among others, on modern industry. In this way, we implement a strategy of responsible development, which should turn Poland towards the innovative economy, towards the revolution 4.0 - added the Deputy Prime Minister.

16th Tourism Days at the University of Poznan

2018-04-10

The Faculty of Geographical and Geological Sciences at the Adam Mickiewicz University in Poznań invites participants for the Tourism Days. The organizers announce unusual attractions including games, gifts, workshops, competitions and meetings with famous travelers. The program of the event includes a Japanese evening with a demonstration how to eat with chopsticks, a survival workshop on the trip «Survive at any cost» and meetings with interesting guests: a traveler Aleksander Doba; a climber Adam Bielecki and a journalist Szymon Hołownia. The Tourism Days are organized for the 16th time

and the event is scheduled for Monday and Tuesday, 16 and 17 April. It is a travel festival organized by students of Tourism and Recreation Faculty of the Poznań University. It aims to familiarize students with the culture and geography of various corners of the world. More information on the website www.dniturestyki.pl and the official fanpage <https://www.facebook.com/dni.turystyki/>

Almost PLN 70 million for the development of Silesian universities

2018-04-10

Rectors of Silesian universities received checks with subsidies for modernizing education system from the Deputy Prime Minister, Minister of Science and Higher Education, Jarosław Gowin as part of the „Integrated University Programs”. «I want to ensure that these symbolic checks will be cashed as soon as possible. It is very important for us to start the internal reforms as soon as possible, and that money should start working as soon as possible to improve the teaching offer of Silesian universities and raise the level of scientific research, « said the Deputy Prime Minister. The checks were received by representatives of seven universities - Rector of the Silesian University of Technology Prof. Arkadiusz Mężyk, Rector of the University of Economics Prof. Robert Tomanek, Vice-Rector for Finance and Development of the University of Silesia Prof. Michał Daszykowski, Vice-Rector for Studies and Students of the Medical University of Silesia Prof. Joanna Lewin-Kowalik, Rector of the Academy of Fine Arts Prof. Antoni Cygan, Rector of the University of Technology and Humanities in Bielsko-Biała Prof. Jarosław Janicki and the Rector of the Academy of Jan Długosz in Częstochowa, Prof. Anna Wypych-Gawrońska.

Researchers of the Wrocław Medical University sought the graves of victims of repression in Georgia

2018-04-10

The employees of the Department of Forensic Medicine at the Medical University of Wrocław together with archaeologists from the Office of Exploration and Identification of the Institute of National Remembrance in Georgia sought mass graves of victims of Stalinist repressions from the 1930s and from the period of the Georgian uprising. During the work, the place of revealing human remains in the vicinity of the village of Rustavi was examined, where, according to archival data, there could be mass graves of victims of repression. The Polish team of scientists acquainted Georgian archaeologists and employees of the Georgian Ministry of Interior with the methods used for many years in the country to conduct archaeological searches, research documentation and inspection of remains. The search in the vicinity of Rustavi was the first step of Polish-Georgian cooperation. The investigated post eventually turned out to be a former cemetery and mass graves were not found during the work. According to mutual assurances, exploratory research in Georgia will be continued.

Researcher of the Wrocław University of Technology wins a prestigious mathematical prize

2018-04-10

Professor Rafał Weron from the Faculty of Computer Science and Management at the Wrocław University of Technology received the prize of Hugo Steinhaus, awarded annually by the Polish Mathematical Society. The researcher was honored for his lifetime achievements, with particular emphasis on modeling and price forecasting on the wholesale energy market. According to Rob J. Hyndman, an outstanding specialist in the field of forecasting, reviewing the work of Prof. Weron will be the ABC manual in the literature on electricity price forecasting. It is published in the «International Journal of Forecast-

ing». Professor Rafał Weron specializes in risk management, computer simulations, forecasting energy prices on the electricity market and the application of statistics tools to finance and insurance issues. At the Wrocław University of Technology, he manages the Economic Modeling Team at the Department of Operational Research, Finance and Information Technology Applications.

PLN 1 million for the State Higher Vocational School in Nysa

2018-04-10

The State Higher Vocational School in Nysa has received an additional PLN 1 million to support the development of education on a practical profile. The reason for the selection was the analysis of data from the National System of Monitoring Economic Fates of graduates from 34 State Higher Vocational Schools. The following indicators were taken into account in Nysa case: the relative unemployment rate of graduates in the first year after obtaining the diploma; the relative rate of graduates earnings in the first year after graduation and no negative assessment from the Polish Accreditation Committee during the last five years. In the opinion of the university authorities, the award proves that the right decisions are made and the School provides the proper educational offer, as well as the very good professional preparation of the graduates.

Agreement on cooperation between the Warsaw University of Technology and the Main Inspectorate of Road Transport

2018-04-10

Joint implementation of IT projects and cooperation in the implementation of IT systems by the Chief Inspectorate of Road Transport are tasks included into an agreement signed by Warsaw University of Technology and the Main Inspectorate of Road Transport. The contract will be signed by the Rector of the Warsaw University of Technology Prof Eng Jan Szmidski and Chief Inspector of Road Transport Dr Eng

Alvin Gajadur. The cooperation focuses primarily on the joint implementation of IT projects, analysis, development, implementation of IT systems by the Chief Inspectorate of Road Transport. The aim of the agreement is also to support scientists from the Warsaw University of Technology in the training employees of the Inspectorate. On the other hand, the Main Inspectorate of Road Transport accepts students of the Warsaw university for internships.

New authorities of the Young Scientists' Council

2018-04-10

Dr Eng. Michał Niezabitowski from the Silesian University of Technology was elected the president of the Young Scientists' Council - informs the Ministry of Science. The inaugural meeting of the team was attended by Jarosław Gowin Deputy Prime Minister, Minister of Science and Higher Education, who invited the gathered students to join the work on the Constitution for Science. The vice-presidents of the Council are Dr Justyna Możejko-Ciesielska from the University of Warmia and Mazury and Dr Diana Dajnowicz-Piesiecka from the University of Białystok. The Council of Young Scientists is an advisory body of the Minister of Science and Higher Education, which promotes solutions supporting the career development of young researchers in Poland. A member of the board must have significant academic achievements and be under 35 years of age.

Polish innovative company Neuro Device to receive 1 million \$ in global competition

2018-04-10

Neuro Device, a startup from Warsaw, has developed a method of stimulating damaged areas of the brain after a stroke. Its innovative solution was qualified for the final of the world competition Chivas Venture and it will compete for the main prize of \$ 1 million. Every year, the authors of the competition invest in projects that change the world for better and permanently affect the quality of human life. As explained by the president of Neuro Device Paweł Soluch, the competition solution is based on neuromodulation, that is stimulation of relevant areas of the brain with electrical impulses, thanks to which proper processes are consolidated in it and alternative centers and connections in the brain are created. The key stage of the startup has been completed, as it won the Polish eliminations and thus it was qualified for the world final, which this year takes place in Amsterdam. However, in order to get the main prize in the global Chivas Venture competition, the Warsaw company needs Internet users' votes from April 25 through the website: www.chivasventure.com

University of Silesia to cooperate with the Copernicus Science Center

2018-04-11

The University of Silesia and the Copernicus Science Center will cooperate in implementing projects under the Young Explorer Program (KMO). The university will become a regional partner of the program and their cooperation will be inaugurated on 18 April with a scientific conference on the activities of the KMO. The conference program includes lectures and workshops on teaching methodologies through inquiry, research projects, opportunities for cooperation within the framework of the ESE-RO program (European Space Education Office) and visiting laboratories of the Silesian Inter-University Center for Education and Interdisciplinary Research.

The aim of the KMO project is to involve children and young people in the process of learning through personal, shared experience, inspiring their curiosity and learning skills. As part of the program, over 700 clubs were established to support the development of physical, mathematical, natural and socio-civic competences in children and adolescents.

Poznan Science and Art Festival

2018-04-11

Poznań universities - together with the science and technology park and the local branch of the Polish Academy of Sciences (PAN) - organize the 21st Poznań Science and Art Festival. The event program consists of workshops, presentations, experiments and lectures. During the event - from April 22 to 26 – the participants will be able to learn how Piłsudski's legend was developed and why he became the head of the state. They will also be able to see practical ways to prepare healthy meals and learn how to read information from food labels. Students of the University of Economics will assess the economic efficiency of the Olympic Games in Athens in 2004 and London in 2012, and the scientists from the Polish Academy of Sciences will show how television in virtual reality looks like. Certain events require to register (via the Internet), others are available without registration. Program, details of events and registration: <http://festival.amu.edu.pl>

Success of Wrocław University of Technology students in California

2018-04-11

The students of the Wrocław University of Technology won six medals (five silver and one bronze) at the SAE Aero Design West 2018 flight construction competition, which took place at the Van Nuys airport near Los Angeles. Over 70 teams from around the world took part in the competition. The Technology University of Wrocław presented two planes - «Red Bomber» in the Micro category and «Dragonfly» in the Advanced class. In the Micro class, the students won the second place in the technical presentation, the third place in the technical report-

ing, the second place for the heaviest raised load and the second place in the general classification. In the Advanced class they won the second place in the accuracy of the cargo discharge and the second place in the general classification. SAE Aero Design tournaments have been organized for 30 years. The task of the participants is to construct unmanned aircraft that comply with strict regulations. The machines are designed to lift as much weight as possible with minimum own weight.

Professor Kacprzyk to be a member of the oldest scientific society in Finland

2018-04-11

Professor Eng. Janusz Kacprzyk from the University of Applied Computer Science and Management in Warsaw, was elected a foreign member of the oldest Finnish Academy of Corporate Science - Finnish Society of Sciences (Societas Scientiarum Fennica). Professor Kacprzyk is the only Pole among the 124 foreign members of The Finnish Society of Sciences (Societas Scientiarum Fennica). It is the oldest Finnish scientific society, founded in 1838. The main interests of Professor Kacprzyk in scientific activity are: fuzzy logic and its application in databases, decision support systems, fuzzy methods of representation and information processing, control and decision making in conditions of uncertainty and lack of precision, evolutionary programming and neural networks.

Recollection of the Podlasie victims of the Smolensk disaster at the University of Białystok

2018-04-11

Jerzy Giedroyc University Library of the University of Białystok invites to a solemn meeting devoted to the memory of the Podlasie victims of the Smolensk disaster on April 10, 2010. During the meeting, the lecture on Karolina Kaczorowska and the fragments of film recordings from the archives of President Ryszard Kaczorowski will be presented to commemorate the victims. The results of the competition named «Ryszard Kaczorowski from Białystok. Last President of the Second Polish Republic in Exile» will also be announced. After the meeting, the participants will visit the President Ryszard Kaczorowski's Office, located in the campus. The meeting will take place on April 13, 2018 (Friday) at 11.00 at the Institute of Biology, University of Białystok (room 2058, campus at K. Ciołkowskiego Street).

Startup Mixer in Rzeszów

2018-04-11

The next series of business meetings Startup Mixer will take place on April 18, 2018 in Rzeszów. The event is organized by Academic Business Incubators Rzeszów operating at the University of Information Technology and Management in Rzeszów and the University of Rzeszów in cooperation with the Investor Service Office of the Municipal Office of Rzeszów. Startup Mixer is a regular meeting, where the entrepreneurs running their own business or just thinking about starting a company have the opportunity to increase their knowledge through lectures given by special guests. They also have the chance to make new, interesting acquaintances during networking sessions. As part of the event, a competition for the best business idea will be organized and new Rzeszów companies and startups will present their potentials. Registration for the event: <https://evenea.pl/imprezy/szkolenia/rzeszow/startup-mixer-18-kwietnia-2018-190328/>

Applications for EIG CONCERT-Japan competition

2018-04-11

The applicants submit their offers for the 5th competition under the EIG CONCERT-Japan initiative. EIG CONCERT-Japan is an international joint initiative supporting and developing cooperation in the field of science, technology and innovation between European countries and Japan. For the first time, the National Center for Research and Development takes part in the organization of the competition. As part of the competition, scientific units, enterprises and scientific consortia may apply in the contest. The support will be dedicated to basic research, industrial research and development works on the topic of the competition «Functional porous materials». The National Center for Research and Development allocated a budget of 750,000 euro to co-finance the participation of Polish entities in the project. More: <http://www.ncbr.gov.pl/programy-miedzynarodowe/wspolpraca-wielostronna/-inne-inicjatywy-wielostronne/eig-concert-japan/aktualnosci/art,6085,eig-concert-japan-informacja-dotyczaca-otwarci-naboru-inferencje-WV-konkursie.html>

Bishop Pieronek to hold lecture at the University of Warsaw

2018-04-12

Bishop, Prof. Tadeusz Pieronek will hold a lecture under the title „State and the Church” on the 17th of April at the University of Warsaw. The meeting will be organized in the series „8 lectures for the New Millennium”. Tadeusz Pieronek is a professor of legal sciences, a Roman Catholic priest, he was the auxiliary bishop of the Sosnowiec diocese and the secretary general of the Polish Episcopate Conference. In the years 1998-2004 he was the rector of the Pontifical Academy of Theology in Krakow. He is the laureate of many decorations, including Cross of the Great Order of Polonia Restituta. A few years ago, in one of the interviews, bishop Pieronek said: «The church is not a national institution. Politicians use it for their needs, some defend it, others attack it, because they have chosen it as their goal. They

should first know what the Church is for, and do not invent it for their own use.» The lecture will take place on April 17 at 17.00 in the hall of the former University Library.

11th Krakow Days of Integration

2018-04-12

On April 16-20, 2018, the 11th Krakow Days of Integration will be held. It is an initiative of the Kraków university aimed at extending the educational offer for students with a disability and people acting for this environment. The opening event is a conference «Responsible Support and Sustainable Development». The aim is to outline jointly the strategic priorities of reducing social exclusion in Poland based on the highest standards of educational support and cooperation of science and business. This is to be achieved through their employment in large companies, own entrepreneurship and creating new services and products tailored to their needs. - Disability is not a problem, it is an undiscovered potential in the development of Poland's civilization and economic development. There is no sustainable development without using this capital – emphasized conference organizers. More: <http://bon.uek.krakow.pl/index.php?p=m&idg=mg,253>

University of Life Sciences in Lublin at an education fair in Kazakhstan

2018-04-12

April 5 to 7, the delegation of the University of Life Sciences in Lublin participated in the International Education Fair „Education and Career” in Almaty, Kazakhstan. The main purpose of the trip was to promote the educational offer of the University of Life Sciences in Lublin, increase the number of foreigners studying at the Lublin university, promote new fields of study (plant medicine, bio- cosmetology, physical activity, qualified tourism and gardening in Russian). In addition, the program included establishing cooperation with the Narxoz University, Polish organizations, cultural and educational centers of cooperation with Poland in Kazakhstan and promoting Lublin as an academic city. During the visit, a meeting was held for people of Polish origin and for candidates interested in studying in Poland. The competitive advantages of the University of Life Sciences in Lublin were presented, and information on the costs of studies and the Erasmus + program was provided. Detailed information on the recruitment process, the possibility of obtaining social and scientific scholarships, the conditions and costs of dormitories, the labor market, and opportunities for personal development both at the university and in Lublin.

Open lecture on cellular communication at the University of Białystok

2018-04-12

Prof. Ewa Łuczja Stępień of Jagiellonian University will talk about the Nobel prize-winning researchers of cell communication this Saturday (14 April 2018) in Białystok. During the lecture, she describes the history of research on cell ultrastructure and regulation of cellular processes through vesicular transport. These studies recently enabled explaining the mechanisms of intra and extracellular communication as well as the regulation of the genome's function. The cell communication scientists were awarded 2 Nobel Prizes in medicine and 1 Nobel Prize in

the field of chemistry. Professor Ewa Stępień is a molecular biologist, a graduate of the Jagiellonian University. She uses nanotechnology for the application of diagnostic medicine to search for new disease biomarkers. The open lecture will start at 11.00 in room 2011 of the Faculty of Physics (campus at Ciołkowskiego Street).

Three gold medals for the Poznan University of Technology at SAE Aero Design West 2018

2018-04-12

The team of the Academic Aviation Club of the Poznan University of Technology won three gold medals at the Professionals Competition of the Society of Automotive Engineers SAE Aero Design West 2018 in Los Angeles. Participants build unmanned aircraft in accordance with the restrictions and requirements of the contest. This year, the students' task was to design and build an aircraft that, with the lowest possible own mass, would transport the maximum weight. The rules of the competition defined the material of the plane and the type and power of the drive. Poznań students won in the Regular class, where other 37 teams competed, including USA, Canada, India, Mexico, Egypt and China. SAE Aero Design is an international academic competition organized for over 30 years by the American Society of Automotive Engineers (SAE) in cooperation with SolidWorks, Lockheed Martin or ANSYS.

Conference on new technologies in Gliwice public transport

2018-04-13

Representatives of science, local government organizations and energy companies as well as specialists of public transport will gather on Monday 16 April at the Silesian University of Technology to discuss the implementation of modern technologies in public transport. The conference - organized by the Polish Association of Municipalities and Counties, Silesian University of Technology and the city of Gli-

wice will be held at the Center of New Technologies at the University at ul. Konarskiego 22B. Its aim is to present and compare various solutions used in bus public transport and discuss the conditions for the implementation of new technologies. The matter of the conference is becoming more and more important due to legislative changes. One of the most important change is the adoption of the Act on electromobility and alternative fuels at the beginning of the year. The first consequences of this regulation will be noticed by local governments and energy companies in 2018. Application form: <https://www.silesia.org.pl/formularze/formularz-zgloszenia-udzialu-w-konferencji-pn-nowe,152>

News reading in the disinformation era at the University of Gdańsk

2018-04-13

Theoreticians and practitioners of information - scientists, experts, journalists and students - participated in the debate on reading news in the disinformation era. The meeting was organized by the Polityka Insight analytical center, Facebook and the Faculty of Social Sciences of the University of Gdańsk. The participants of the debate - mostly students of journalism - got acquainted with the short guide to the information intended to mislead the recipient and learned how to try to limit the damage caused by fake news. The debate took place as part of a nationwide project - meetings of experts, representatives of «Polityka Insight», Facebook, journalists and academics with journalism students at universities in Poland. The aim of the meetings and workshops is to familiarize students - future opinion leaders - with the problem of disinformation, false information and the ability to critically analyze the sources.

Prof. Przemysław Czapliński to hold a lecture on freedom without equality

2018-04-13

The Adam Mickiewicz University in Poznań, the UAM Foundation and the Zamek Cultural Center invite participants to a meeting at the „University Lectures in the Castle”. April 17 Prof. Przemysław Czapliński from the Faculty of Polish and Classical Philology will give a lecture on „Freedom without equality? Literature in the face of social conflicts. „ After the change of political power in 2015, the following statement appeared: «Freedom went well, only something did not work out with equality.» Its author of the lecture separated the two basic values of modern society, suggesting that they can exist separately. The story of how the isolation took place, what role it played and what ideas for re-joining freedom and equality can be found in culture will be presented by Prof. Czapliński. Professor Przemysław Czapliński is a historian of XX and XXI century literature, essayist, translator, literary critic; co-founder of the Department of Anthropology of Poznań University. The subject of his research is literature and the problems of late modernity.

Board of the National PhD Students Representation meets in Opole

2018-04-13

The PhD students of the Opole University of Technology were the hosts of the Second Open Meeting of the Board of the National PhD Students Representation. PhD students came to Opole from 26 Polish academic centers to discuss the most important environmental problems. Among the most important issues discussed during the meeting was the draft law on higher education. As the secretary of the KRD's board - Anna Kuklińska said, the Constitution for Science will be a «very big revolution» for PhD students. The takeover of education of young scientists by PhD students as assumed in the project will cover over 40,000 students throughout the country. In addition to serious discussions, the meeting at the Opole technical university gave PhD

students from different cities an opportunity to get to know each other.

Deputy Prime Minister Gowin meets the head of Portuguese diplomacy

2018-04-13

On the occasion of the 40th anniversary of the establishment of the Department of Language and Culture of the Luzo-Brazilian Institute of Iberian and Ibero-American Studies at the University of Warsaw, Augusto Santos Silva, Minister of Foreign Affairs of Portugal, visited Poland. During his stay he met Deputy Prime Minister Jarosław Gowin, Minister of Science and Higher Education. Ministers talked about ways to strengthen student exchange and research collaboration. The proper institution is the National Academic Exchange Agency. Its main task is to bring Polish scientists working abroad back to Poland, as well as intensifying contacts with foreign researchers. Over the past few years, the number of foreigners studying in Poland has increased. Among them were over 1,000 Portuguese students what makes Portugal the sixth country in terms of Erasmus + students coming to Poland. About 120 Portuguese academic employees visit yearly Polish universities - informs the Ministry of Science.

Railway industry funds scholarships at the Cracow University of Technology

2018-04-13

1000 PLN of monthly scholarship, paid internships, apprenticeships and employment guarantees in the leading companies of the railway industry - such incentives are planned for students of the railway construction industry at the Faculty of Civil Engineering of the Cracow University of Technology - informs the university. In the coming years, huge rail investments will be implemented in Poland, and employers from railway companies urgently will need engineering staff with highly specialized qualifications. Such qualifications will be attained by graduates of the Cracow University of Technology studying programs developed jointly by the university and specialists

from the railway sector. Declaration of cooperation with the Faculty of Civil Engineering at the Cracow University of Technology has already been submitted by seven companies: Polish State Railways - Polish Railway Lines, Przedsiębiorstwo Napraw i Utrzymywania Infrastruktury Kolejowej w Krakowie Sp. z o.o., Kolejowe Zakłady Nawierzchniowe «Bieżanów» Sp. z o.o., Grupa ZUE, Track Tec S.A. , Budimex S.A. and STRABAG Sp. z o.o. They funded 26 scholarships for students of the second and third semester of regular studies on the railways specialty.

Competition for the best article on education

2018-04-13

Educational Foundation of Prof. Roman Czernecki announced the first competition for the best article on education. The competition has a positive impact on the development of education in Poland through the appreciation and dissemination of the works promoting scientific and journalistic activities. The prizes in the first Competition in 2018 will be awarded in two categories: a scientific article (a cash prize of PLN 20,000) and a journalistic article (funding a participation in an education event up to PLN 10,000) Submitted articles must be published in Polish or English and written or co-written by the person applying for the Competition. Only articles that have been published since January 1, 2016 to June 30, 2018 can be submitted for the Competition in both categories. Applications should be sent by 31 June 2018 by email to the address nagroda@efc.edu.pl

Polish-Austrian agreement on a joint competition for research projects

2018-04-13

The National Science Center has signed an agreement with the Austrian Science Fund (FWF). The result of the cooperation will be a bilateral competition for Polish-Austrian research projects in the field of basic research. As part of the new competition, Polish-Austrian research teams will be able to apply for financing research projects in all areas. The announcement of the competition is planned for the last quarter of 2018. Substantive assessment of the applications in the competition will be conducted by the Austrian website. According to the National Science Center, the agreement signed by the director Zbigniew Błocki and the president of the Austrian agency Klement Tockner is one of the elements of closer cooperation between research funding agencies in the Central Europe region.

Dr Krzysztof Szerenos receives the Medal of a Young Scientist

2018-04-16

Dr Krzysztof Szerenos, a graduate of the Faculty of Physics at the University of Białystok, was awarded the Medal of a Young Scientist awarded by the Warsaw University of Technology. The young scientist received this distinction for his participation in the discovery of a new method of ultrafast photomagnetic recording. A breakthrough discovery was made at the Faculty of Physics of the University of Białystok by a team of researchers led by Prof. Andrzej Stupakiewicz, and the results were published in January 2017 in the prestigious journal «Nature». The Medal of the Young Scientist, established by the Warsaw University of Technology in 2007, is awarded for outstanding and recognized achievements in the field of science and technical innovation and other outstanding creative achievements. The distinction is to promote the achievements of young scientists characterized by the independence of creative concepts and the special dynamics of development. The medal is awarded to persons who have not exceeded 35 years of age.

Courses and specialties at the Maria Curie-Skłodowska University receive „Studies with future” certificates

2018-04-16

During the third Competition and Accreditation Program „Studies with the Future”, five fields of study and specializations at the Maria Curie-Skłodowska University in Lublin received the certificates. Certificates «Studies with the future» were awarded to Information architecture - MA studies at the Faculty of Humanities, Philosophy and ethics - post-graduate studies at the Faculty of Philosophy and Sociology, Chemistry in sculpting and architectural renovation - specialty at MA studies and Photonics and fiber-optic technologies - specialization studies at the Faculty of Chemistry and Spatial Management - engineering studies at the Faculty of Earth Sciences and Spatial Management. The «Studies with the Future» program is a joint accreditation project of the Foundation for the Development of Education and Higher Education and the PRC Agency. It serves to highlight the most innovative and valuable directions of education at Polish universities, characterized by high quality of the implemented program and effectiveness in education aimed at labor market.

Consultative conference on the State's Policy for Raw Materials in Szczecin

2018-04-16

On April 18, at the University of Szczecin, experts and entrepreneurs will discuss Poland's raw materials policy. The meeting will take place in a series of regional consultative conferences of the Government's State Policy Development Project (PSP). The PSP project consists of nine pillars. The Szczecin discussion will raise the subject related to the 4th Pillar of the State Fire Service, which implements elements of the strategy for securing supplies of key raw materials through import and through international cooperation. Panelists will try to answer the questions whether it is necessary to provide deficit resources from external partners and how it affects the country's economic development. Three panels

are planned - „State policy on mineral resources”, „Experts and entrepreneurs on international aspects of the SFS” and „Management of mineral resources on the example of amber”. The subject of the conference will also be the exploitation of foreign deposits and the Geological Geological Reconnaissance Program (PRoGeO).

Award of the Academic Andragogical Society for outstanding monograph

2018-04-16

Dr Sylwia Słowińska from the Faculty of Pedagogy, Psychology and Sociology of the University of Zielona Góra was honored by the Academic Andragogical Society with an award for an outstanding monograph in 2018. After reading the reviews and the opinion of Prof. Józef Kargul, the head of the award chapter, the Main Board of the Andragogical Academic Society honored Dr Słowińska with the «Award for an outstanding monograph» in 2018 for «Sense of bottom-up cultural initiatives in the interpretation of their implementers». Dr Sylwia Słowińska is an adjunct at the Department of Animation of Culture and Andragogy, at the Institute of Pedagogy at the Faculty of Pedagogy, Psychology and Sociology of the Zielona Góra University. According to the regulation of the Minister of Science and Higher Education of December 12, 2016 regarding the awards of scientific category to scientific units and universities, the winner of the competition received 50 points in parametric evaluation for a scientific monograph considered an outstanding work.

Conference on innovation in education in Gdańsk and Sopot

2018-04-16

Professor Jerzy Hausner - politician and economist, originator of the concept of enterprise management „Company-idea”, will participate in the conference „Competitive education. University-idea: digital transformation. „ The conference under the honorary patronage of the Ministry of Science and Education will be held in Gdansk and Sopot on 17 and 18 April. The event includes combining lecture, power speech, Oxford debate and the mentor's box. The audience is also invited to participate in the discussion, including representatives of scientific, business, administrative, non-governmental and media communities. The conference is part of activities carried out under „Competitive education” concept, combining the intellectual and organizational potential of academic and business environments, to jointly develop the best, innovative ideas and solutions for the development of education.

Wrocław University of Technology and AWF in the Common Architectural Initiative

2018-04-16

Architecture students of the Wrocław University of Technology with physiotherapists from the University of Physical Education and the Association for Support of the Development of Disabled People create an innovative project to help people with disabilities to remove architectural, technical and communication barriers. The goal of the Joint Architectural Initiative is to help people with various disabilities and cognitive functions to adapt the apartment to their specific needs. This support can also be used to improve the accessibility of public buildings - centers and social welfare homes. In order to obtain support, eligible person reports to the Social Welfare Center to carry out architectural works and facilitate their daily functioning. Co-financing for such tasks comes from the State Fund for the Rehabilitation of the Disabled.

Botanical Garden of the Maria Curie Skłodowska University opens to visitors

2018-04-17

After the winter break, the Botanical Garden of the Maria Curie Skłodowska University in Lublin was opened to the public. In the garden of 21 hectares, almost 7,000 plant species from around the world were collected. Until the end of October, the Lublin University invites visitors for Sunday walks with a guide and for floristic workshops. Juniors are welcomed to the Summer Academy of the Junior Naturalists. Everyone is invited to visit the Kościuszków Palace, situated in the Botanical Garden which has currently a representative character. The University uses the manor house as a place for special events, and from 2013 made it available to visitors - informs the Lublin university. More information, including the calendar of events, can be found at: www.garden.umcs.lublin.pl

„A Day with Economics” at the University of Warmia and Mazury in Olsztyn

2018-04-17

The lectures of practitioners, workshops and trainings will constitute „The Day with Economics”, which will take place on April 19, 2018 at the Faculty of Economic Sciences of the University of Warmia and Mazury in Olsztyn. During the event Dr Marek Prawda, director of the European Commission Representation in Poland will lead the debate «Future of Europe - civil dialogue on the future of Europe», representatives of the Social Insurance Institution will discuss the civil-law contracts in social insurance and Ewa Zimnoch - Bank Citi Handlowy credit risk manager- will talk on communication in a team. «A Day with Economics» aims to present the potential of the Faculty of Economic Sciences at the Olsztyn university, to promote the teaching offer among future students and to integrate the scientific and business environment.

Tischner Days in Krakow

2018-04-17

In Krakow, the 18th Tischner Days will begin on April 18th. The organizers of the event are: Institute of Józef Tischner Thoughts, Znak Social Research Institute, Jagiellonian University, Pontifical University of John Paul II and the State Drama School in Krakow. The special guest is Prof. Timothy Garton Ash from Oxford. During the Days, the sponsors Znak and ERGO Hestia present the Tischner Award to selected journalists and writers in three categories. In the category of religious or philosophical literature, the prize will be received by the philosopher Ireneusz Ziemiński. In the category of journalism on social issues the winner is a journalist Ewa Siedlecka, and in the category of pastoral and social initiatives the award will be presented to Father Mirosław Tosza, founder of the community of Bethlehem in Jaworzno. The head of jury is Father Adam Boniecki. More: <http://dni.tischner.pl/>

European University Games USA Games in 2022 in Łódź

2018-04-17

Over 6,000 athletes from over 400 European universities will come in 2022 to participate in the European Academic Games in Łódź. The initiator of the event is Lodz University of Technology, which this year organizes two student sports events of international rank - Academic World Championships 2018 in floorball and cheerleading. The games will take place in facilities belonging not only to the Lodz University of Technology, but also to the city and other universities in Lodz. During the last EUSA (European University Sports Association) Games the athletes competed in 21 disciplines, including basketball, football, futsal, handball, volleyball, badminton, tennis, table tennis, judo, karate, rowing, rugby and swimming.

Three gold and one silver medal for Bydgoszcz universities in Moscow

2018-04-17

University of Technology and Life Sciences and the Bydgoszcz University were awarded with gold and silver medals at the Moscow salon of innovative inventions, Archimedes 2018. Two solutions from the University of Technology and Life Sciences were awarded with gold medals: «Construction of a mixer for granular materials with vibratory propulsion and helical drive system» and «Stationary stirrer for a dryer and granular materials mixer, working with vibratory helical propulsion». The Bydgoszcz University prototypes of passive exoskeleton for children with weakness of upper limbs were developed and printed in 3D. The Bydgoszcz University also won a silver medal for light-cured dental implants. The 21 Moscow International Salon of Inventions and Innovative Technologies Archimedes 2018 was organized from 5 to 8 April, and almost 700 inventions from 28 countries were presented.

Congress of Change Leaders to be held in Białystok

2018-04-18

The College of Finance and Management in Białystok organizes on April 20-21 the Congress of Change Leaders under the title „Advantage thanks to cooperation - Challenges of Economy 4.0” The aim of the event is to review the latest methods of management and interpersonal communication and to present good examples of cooperation between business, science and public administration in the modern industry. Andrzej Arendarski, president of the Polish Chamber of Commerce and Andrzej Soldaty, leader of the Platforma Przemysłu Przyszłości project will be the speakers during the conference. The scientific patrons of the Congress are: University of Białystok, Białystok University of Technology and Medical University of Białystok. More: <http://kongresliderowzmian.pl/>

Crystal Brussels Sprout Prize

2018-04-18

Since 2001, the Crystal Brussels Prize has been awarded for successes in the European Union Research and Innovation Framework Programs strengthening scientific excellence and increasing economic competitiveness. This distinction is presented to scientists and entrepreneurs for innovation and contribution to the development of Polish science and economy. The Chapter awarding the Prize is chaired by Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education. This year, the winners will be selected in the following categories: science (universities, research institutes, scientific institutes of the Polish Academy of Sciences); business (enterprises); local government; non-profit entities. The names of the winners will be announced on June 6 in Warsaw during the Gala of the Brussels Sprout Award.

Graduate of Gdańsk University of Technology holds the prize of the Association of Polish Architects

2018-04-18

Michalina Frątczak a graduate of Gdańsk University of Technology won the prize Zbyszek Zawistowski Dypłom Roku 2018 held by the Association of Polish Architects . The winning work was selected from 99 proposals sent from 19 Polish universities. Award-winning work is titled «On the edge. Expansion and adaptation of the sanctuary and the pilgrim's house into the place of tranquility. Cape Espichel, Portugal». This is a project of the expansion and revitalization of a decrepit sanctuary from the 15th century. «The author reveals the potential of the 15th-century sacral team embedded in the harsh Portuguese landscape as a place that has a chance to restore the lost balance to visitors. It proposes a discreet architecture that reveals the value of what is found and introduces simultaneously what is necessary to sustain the still-smoldering life here «- it was written in the justification. The prize Zbyszek Zawistowski admits the Association of Polish Architects. This year it was presented for the 54th time.

„Ikar Jakości” for the Academy of Technology and Humanities in Bielsko-Biała

2018-04-18

Kamila Cieszka from the University of Technology and Humanities in Bielsko-Biała received a distinction in the final of the second „Icarus Quality” - a nationwide competition for the best diploma thesis on the management. The awarded work is entitled „Quality of management from the patient's perspective on the example of the Provincial Hospital in Bielsko-Biała”. The aim of the competition is promoting solutions that can significantly affect the practical aspects of companies of different profiles. The competition is organized by the Qualitas Foundation, the European Center for Good Business Practices in Katowice under the honorary patronage of the Minister of Science and Higher Education. The graduates of state and private universities in Poland can apply for the competition provided with opinions of their academy promoters.

Partners of the Baltic Science Network project meet at the University of Gdańsk

2018-04-18

The Baltic Science Network project partners met at the University of Gdańsk. The aim of the meeting was enhancing the level of scientific excellence and innovation in the entire Baltic Sea region. The Baltic Science Network prepares strategies and programs supporting higher education, research and innovation. Activities are carried out in several areas: strategies for specific research areas, improvement of existing research infrastructure; developing mobility tools and recommendations for increasing the participation of countries with a lower innovation rate in international initiatives. Members of the network are ministries and agencies responsible for education, development, innovation and research as well as universities and scientific institutions from Denmark, Estonia, Finland, Latvia, Lithuania, Germany, Norway, Poland, Russia and Sweden as well as international organizations of the Baltic Sea region.

Oxford debate about immigrants at the Maria Curie-Skłodowska University in Lublin

2018-04-19

The topic of the Oxford debate, which will take place on April 20 at the Faculty of Political Science of the Maria Curie-Skłodowska University in Lublin is "The economic benefits from the inflow of immigrants to Poland are greater than the social and political problems caused by them" Aneta Adamska, spokesman of the Lublin university emphasizes that the debate was prepared by students of international relations and national security of the Faculty of Political Science, participating in the project under the Operational Program Knowledge Education Development, which is co-financed by the European Social Fund. Oxford debates are a kind of debate in which it is absolutely forbidden to insult or ridicule speakers of the opposite party. The all debates are judged by the jury and the public.

Competition for the projects of Maria Curie-Skłodowska COFUND

2018-04-19

The European Commission has announced a new competition for the Maria Curie-Skłodowska COFUND projects, co-financing grants and scholarship programs. Applications may be submitted by institutions interested in the creation of grant programs (for persons with a PhD degree). All grant programs should aim at strengthening the international mobility of researchers, including intersectoral mobility. Their goal should be to mobilize domestic and international institutions to create high-quality research and training programs using the Maria Curie-Skłodowska Action Patterns that support the development of research careers. The projects last from 36 to 60 months and they are to implement an interdisciplinary, international and cross-sectoral research and training program. More: http://www.kpk.gov.pl/?page_id=22729

„E-technologies in Engineer Education” at the AGH University of Science and Technology in Krakow

2018-04-19

Integration of the academic environment involved in didactics supported by technologies, exchange of experience and good practices, as well as searching for inspiration for further activities - these are the goals of the conference „eTEE (e-Technologies in Engineers Education)”, which from 19 to 20 April 2018 takes place at the AGH Academy in Kraków. The topics of the conference are the impact of modern technologies on the training of engineers, theory of learning and e-learning models, good practices of e-learning in technical universities, teaching with the use of mobile devices (m-learning), and e-learning foreign languages for students of science and engineering. During the event, Agnieszka Wykowska, Giorgio Metta (Italian Institute of Technology), Anna Turula (Pedagogical University in Krakow) and Christopher Sweeney and Andrzej Pierkowski from the Katalyst Education Foundation will hold their lectures.

PLN 20 million from the National Science Center for „small grants”

2018-04-19

The National Science Center launched the Miniatura 2 competition. It is addressed to people with a PhD degree, received up to 12 years prior to the application, who had not managed and implemented research projects funded by the National Science Center. The aim of «small grants» is to enable researchers to take their first steps in the grant system. The experience gained during the implementation may help in the future to run finance projects under other competitions - explains Professor Zbigniew Błocki, director of the National Science Center. The funds obtained in the competition will be used by the researchers to complete queries and scientific internships, research, provide consultancy and conference trips, as well as preliminary and pilot examinations. The funding period is a maximum of 12

months, and the individual amount vary from 5,000. up to PLN 50,000. The total amount for the Miniatura 2 competition is PLN 20 million. More: <https://ncn.gov.pl/ogloszenia/konkursy/miniatura2>

Graduate of the Poznan University of Technology wins the TAURON company competition

2018-04-19

Jacek Kamiński, a graduate of the Poznań University of Technology won the competition for the best MA thesis of TAURON Dystrybucja - informs the university on its website. The main prize was awarded for the work „Optimal power distribution in a solar-wind power plant with energy storage”. Jacek Kamiński developed the concept and made the software implementing the process of optimization of the hybrid structure of the solar-wind power plant with the energy storage. He also conducted optimal distribution of power in objects with a specific 24-hour load profile. The use of renewable energy sources in combined hybrid systems with storage can solve one of the biggest problems of modern energy - a continuous increase in demand for electricity with scarcity of conventional sources. Hybrid systems can accumulate surplus energy when demand is lower than the current level of production and return it when demand exceeds this level.

Maritime University of Szczecin is a COST member

2018-04-19

The international project „A pan-European Network for Marine Renewable Energy with a focus on Wave Energy” has been approved by the COST program. Among the networking organizations, connecting over 100 participants from 25 countries, is the Maritime University of Szczecin. The aim of the campaign is to create the basis for joint projects and to establish directions for research in the field of offshore renewable energy (in particular marine energy), financed by the European Commission. The activities assume creating working groups, organizing conferences and trainings, and disseminating knowledge. The European Program for Scientific and Technical Cooperation - European Cooperation in Science and Technology (COST) is an institutional structure that is held jointly by 36 European countries and Israel (as a supporting state). Its most important task is to organize scientific and technical cooperation of member countries. More information: <https://www.am.szczecin.pl/aktualnosci/4594-akademia-morska-w-szczecinie-czlonkiem-akcji-cost>

Medical University of Silesia will join the Magna Charta

2018-04-19

The Observatory's Council positively considered the application of the Medical University of Silesia in Katowice to join the Magna Charta Observatory. The solemn signing of Magna Charta Universitatum is planned for September, during the celebration of the 30th anniversary of the association - informs the university on its website. Magna Charta Universitatum contains the principles of academic freedom and institutional autonomy of universities. This is the international university environment sharing the same academic values and goals. Magna Charta Observatory is a non-profit organization founded by the University of Bologna and the European University Association. It collaborates with other national, European and international organizations, setting similar or consistent goals, mainly preserving academic values without any influence or pressure.

Toruń Festival of Science and Arts

2018-04-19

Time and space is the motto of the 18th Toruń Science and Art Festival. The program will last from 20 to 24 April and it includes 130 events: workshops, shows, outdoor events, discussions and concerts. One of the main attractions will be «Medieval street» where costumed students will recreate the atmosphere of Toruń from centuries ago. In the street Pod Krzywą Wieżą the participants will be able to meet distinguished councilors, wealthy merchants and agile traffickers, religious monks, dueling knights, a clever thief and a bad witch. The Toruń Modernity Center offers Mill of Knowledge experiment referring to the film series «Back to the Future». Visitors will be able to admire the well-known vehicle - DeLorean DMC, which Dr. Emmett Brown and Marty McFly traveled over time. In the parking lot in front of the Modernity Center there will be a future town built of pneumatic spherical tents. Program and details: <https://www.festiwal.torun.pl/>

Interdisciplinary Research Center in Georgia

2018-04-20

In Kutaisi, the second largest city in Georgia, the Professor Stefan Krukowski Interdisciplinary Research Center was opened. Polish scientists working in Georgia gained the base for new expeditions. The newly opened center is the first foreign archeological station in the Transcaucasus. The archaeologists from the University of Warsaw have been conducting their research for years in this area. The center is headed by Dr Radosław Karasiewicz-Szczypiorski from the Institute of Archeology, University of Warsaw. The Georgian partner is the National Agency for Cultural Heritage.

Rzeszów Computer Science Students in the finals of the Digital Dragons competition

2018-04-20

Students of computer science of the University of Rzeszów reached the final of the competition organized as part of the largest conference of the

video game industry in Central Europe Digital Dragons - informs Dr. Maciej Ulita, spokesman of University. The project team includes Krystian Pinderski, Mateusz Molik, Sławomir Niedbała, Jakub Gurgacz, Adam Lalik, Szymon Kusiak, Paweł Warcaba, who designed the game «Tree of Life: Tower Defense». This is a 3D game from the 3rd person perspective view in the style of Tower Defense. The player selects the character of Dwarf who defends the last healthy place in the world. The gameplay involves defending a tree (Nexus) and the player builds fortifications around. The opponents in the game have to break into the tree and damage it. The world of the game it is a destroyed, rusty area with the last tree to be defended. https://www.facebook.com/events/34449862935323/?active_tab=discussion

L'Oréal Poland competition for female scientists

2018-04-20

The deadline for accepting applications for the L'Oréal Poland For Women and Science program is expiring on 30 April 2018. The competition is addressed to female scientists conducting research in the field of life sciences. Scholarships in the program are awarded in three categories: PhD dissertations, post PhD theses and MA theses. The competition is open to candidates who live in Poland and are under 25 - in the case of graduate students, 32 - in the case of PhD students, and 40 years - in the case of post PhD students. The jury will grant 6 scholarships: three post PhD students, two PhD students and one graduate student. Applications for the competition can be submitted at: <https://www.forwomeninscience.com/pl/manifesto>

Seminar on „Sociology of Terrorism” at the Collegium Civitas in Warsaw

2018-04-20

Are European services able to prevent attacks? Can we forecast trends in the development of terrorism? Can sociological analyses help in the effective fight against terrorism? The following questions will be discussed at the seminar „Sociology of Terrorism”. The seminar is organized by the Center for Re-

search on Terrorism at Collegium Civitas in Warsaw and the House of Encounters with History. The event is scheduled for 20 April in Warsaw at ul. Karowa 20. Dr Anna Matczak from Collegium Civitas, Paweł Cywiński from the portal refugees.pl and Dr Łukasz Jurczyszyn from the Polish Institute of International Affairs will be lecturers of the seminar. The seminar is part of the interdisciplinary cycle «Views on terrorism.» More: <https://www.civitas.edu.pl/pl/uczelnia/kalendarium/socjologia-terroryzmu>

Debate on cooperation between business and science at the 11th Investment Forum in Tarnów

2018-04-20

If we plan to achieve development based on innovation we must create a spirit of the dialogue between companies and scientists. Such conclusions result from the debate of entrepreneurs and representatives of science, which took place during the 11th Investment Forum in Tarnów. The more dynamically developed economy, the greater the percentage of gross domestic product is spent on science. If science receives money, the greater is the chance to implement innovation in business. In order for this correlation to work in practice, it is necessary to integrate both environments that set common goals - said Dr. Stanisław Kowalski, rector of the University of Economics and Computer Science in Kraków. The panel discussion was also attended by Dr. Eng. Jadwiga Laska, rector of the State Higher Vocational School in Tarnów, Paweł Buszman, president of the board, American Heart of Poland and Leszek Nowicki, president of the board of the Tarnowska Agencja Rozwoju Regionalnego.

PhD student at the University of Life Sciences in Wrocław wins a gold medal at the Geneva exhibition

2018-04-20

Joanna Kozłowska from the University of Life Sciences in Wrocław won a gold medal in the medical category and a special prize of the Malaysian Association for Scientific Research at the 46th International Exhibition of Inventions in Geneva. PhD student of the chemistry department at the Wrocław university presented a series of 46 inventions regarding the preparation of new derivatives of flavonoids - organic compounds naturally occurring in plants. In the competition she competed in the M class - related to medicine, surgery, hygiene, orthopedics and materials for the disabled. The research conducted jointly with the Wrocław Medical University checks the activity of the compounds obtained by the PhD student on cancer cell lines. „In our research we focus on colon cancer, in the future we plan research on other cell lines, including breast cancer. The first results are very promising, „says the winner.

Junior school student wins the physics competition with awarded admissions to two universities in Wrocław

2018-04-20

The student of the third-class gymnasium at the Wrocław University of Technology won the 14th physics competition. Krzysztof Nowak presented the project „Levitation of neodymium magnets” in the final of the competition. The winner is the only junior high school student in the final of the competition. As a reward, he received an admission to any faculty of the Wrocław University of Technology (apart from the Faculty of Architecture) and an admission to the Faculty of Physics and Astronomy at the University of Wrocław. Earlier, Krzysztof was the laureate of the competition for junior high school students from Lower Silesia in 2018 - in physics, chemistry and mathematics. Interschool Open Physical Competition is jointly organized by the Wrocław University of Technology, the Faculty of Physics and

Astronomy of the University of Wrocław and the 10th High School in Wrocław. The 14th competition took place under the patronage of the Polish Physics Society, the president of Wrocław and the superintendent of education in the Lower Silesia.

Yacht from recycled materials wins international competition

2018-04-20

The design of the yacht by Dr Wojciech Wesolek from the Academy of Fine Arts in Wrocław won the Millennium Yacht Design Award 2018 in the professional category. The awarded project was presented at the „Hybrid and electric propulsion” conference in the Italian Carrara. The project involves the use of recycled materials for the construction of the yacht protected from marine conditions. The outer shell is made of recycled cutters and ships, the teak floors come from decommissioned yachts, and the interiors are made of elements of beams from the demolition of houses. According to the author's plan, the construction of the yacht should be carried out near the demolition site of old ships. «It is also an opportunity for the scrapping community. It gives chances for better working conditions and much higher incomes in the industry commonly recognized as luxurious, «says the author of the project. The winning design on the author's website: <http://wwdesign.eu/html/rat120.html>

Scientific conference on intelligent development in territorial systems in Biała Podlaska

2018-04-23

Department of Economics and Management at the Faculty of Economic and Technical Sciences of the National High School in Biała Podlaska organizes on June 28-29 the 1st International Scientific Conference „Intelligent development in territorial systems (Intelligent Cities, Villages and Regions)” - informs Dr Danuta Guzal-Dec, head of the University of Economics in Biała Podlaska. The conference was divided into three thematic sessions. The first part

will concern the theoretical aspects of implementing the smart development concept, the second will be related to its determinants and the third covers the experience of Polish and European local governments in implementing the concept of smart development. The patrons of the event were the Marshal of the Lublin Province, the Mayor of Biała Podlaska and the Rector of the State Higher School in Biała Podlaska.

European Rover Challenge 2018

2018-04-23

65 teams from 20 countries will take part in international races of the European Rover Challenge 2018. The final part is planned from September 14 to 16 at the Museum of Nature and Technology in Starachowice. The event is under the patronage of the European Space Agency and the Ministry of Science and Higher Education. The competition will be attended by students from the best technical universities in the world. Teams from Poland include universities and high schools in Białystok, Bydgoszcz, Chełm, Kielce, Częstochowa, Gliwice, Kraków, Łódź, Opole, Rzeszów, Szczecin, Toruń, Warsaw and Wrocław. The teams from Germany, Great Britain, India, Italy, Canada, the United States, Norway, Mexico and Bangladesh will also compete. The organizers inform that the European Rover Challenge is one of the world's largest international robotics and space competitions, gathering not only specialists in the field of planetary robotics and rover constructors, but also representatives of the world of science, business and the new-tech sector. The organizer of the event is the European Space Foundation, and the co-organizers of the Special Economic Zone «Starachowice» S.A., Powiat Starachowicki, Museum of Nature and Technology in Starachowice and Mars Society Poland. More: <http://roverchallenge.eu/pl/home/>

Platoon commanders develop the leadership competences at the Academy of Land Forces

2018-04-23

Fourteen platoon commanders improved their skills of team building, making decisions under pressure, effective communication and effective cooperation on the course conducted by the Academy of Land Forces in Szklarska Poręba - informs the university on its website. The course of shaping leadership competences was implemented for the first time by the Academy of Land Forces as part of the course training of the Ministry of National Defense. The young lieutenants spent five days in the «Wysoka Kamień» training center practicing the practical and theoretical skills necessary in the role of a real leader. The participants of the course passed the competency tests, and were thoroughly observed. Based on the results of the test and observation, each of the platoon commanders received information about their strengths and weaknesses. Commanders of the course participants will receive an assessment of young officers potential.

Professor Granqvist receives the Medal for Merit at the Gdańsk University of Technology

2018-04-23

A Swedish scientist - Prof. Claes Goran Granqvist, an outstanding specialist in nanotechnology and material engineering, was awarded the Medal of Merit for the Gdańsk University of Technology. „The award is a pride for me, because I appreciate the cooperation with the University”, says Granqvist, quoted on the university website. Professor Granqvist received a medal from Prof. Jacek Namieśnik, the rector of the Gdańsk University of Technology. The professor noted that he is already retired, but it will not be a reason for interrupting joint projects. The scientist started cooperation with the University in 2001, preparing scientific articles together with Gdańsk researchers. Professor Claes Goran Granqvist is a retired professor at Uppsala University

in Sweden. He published over 500 articles indexed in the Web of Science and 40 books cited over 26 thousand times.

Conference about the national and international security of Poland in Kielce

2018-04-24

National Security Institute at the Institute of International Politics and Safety of the Faculty of Law, Administration and Management at the Jan Kochanowski University in Kielce together with the National Security Department of the Academy of War Art in Warsaw, Department of Naval Command and Operations of the Naval Academy in Gdynia, Department of Administration and Security of the School of Economics, Law and Medical Sciences in Kielce at participation of Czech and Slovak universities organizes the international scientific conference „Security of Poland in the national and international dimension”. The topic of the conference is «State security in terms of threats and new challenges». The most important topics will include contemporary threats and forecasted challenges for the international security environment; national security and the defense system of the state; strategic studies on the security of the future; legal regulations and European security policy as well as information security and media communication. The conference will be held from 25 to 26 April at the Faculty of Law, Administration and Management at the Jan Kochanowski University in Kielce, ul. Świętokrzyska 21.

Conference on double diplomas at the Lodz University of Technology

2018-04-24

The Ministry of Science and Higher Education and the National Academic Exchange Agency hold the conference „Double diplomas as a pillar of international strategic partnerships”, which will take place on 14-15 June in Łódź, at the International Cooperation Center of the Lodz University of Technology. Signing double diploma agreements is one of the best tools for establishing advanced partner-

ships and activities within international university networks. It is also an important pillar for assuring quality of education at universities - emphasizes Prof. Eng. Sławomir Wiak, rector of the Lodz University of Technology. During the event there will be three ordinary sessions devoted to the legal framework for signing double diploma agreements in Poland within the new Act on Higher Education, administrative aspects and rules for the implementation of such agreements and the challenges faced by students in connection with double diploma agreements. The conference will end with the plenary session “Models of double diploma agreements - how to deal with the diversity of higher education models in the world”. More: <https://www.ife.p.lodz.pl/pl/doubledegree>

Furniture from Wroclaw at Milan Design Week

2018-04-24

The „ILES” furniture set developed at the Faculty of Interior Design and Design at the Academy of Fine Arts in Wrocław was presented at Ventura Future - an exhibition showing the latest interior design trends as part of Milan Design Week 2018. The ILES set is a diploma work realized by Maja Górowska, Karolina Koryniowska and Kamila Potocka. The promoter of the designers was Prof. Waclaw Kowalski. A set of furniture for studio apartments and hostels has 11 elements. The furniture was designed for the Millenium generation, the authors' inspiration was the geometry and organic shape of the stone. The collection is designed in a uniform color, differentiated by materials - varnished steel, fabric and designer's own idea - an epoxy resin combined with buckwheat. Source: Academy of Fine Arts in Wrocław more information about Ventura Future - <http://www.venturaprojects.com/ventura-future-2018>

International conference at the Silesian Medical University

2018-04-24

The International Medical Congress of Silesia is an international conference organized by the Student Scientific Society and the PhD Students Association of the Medical University of Silesia. It will be held in Katowice from 25 to 26 April. The event is interdisciplinary. Plenary sessions for students and PhD students are planned. Students will present the results of their research carried out as part of the activity in 170 Student Scientific Clubs. PhD students will present the results of their work as part of the clinical and experimental medicine, and the newly created PhD student «General Medicine» sessions. The International Medical Congress of Silesia is a regular event of the academic year. Every year, the Medical University of Silesia is visited over 1,700 participants - students and young doctors. More information on the website of the Student Scientific Society: www.stn.sum.edu.pl

Agreement on cooperation between the University of Economics and the self-government of Lower Silesia

2018-04-24

Wrocław University of Economics and the Lower Silesia Province self-government will cooperate in the implementation of development projects in the economic, social and environmental sphere. The actions are to influence the cohesion of Lower Silesia by stimulating initiatives, developing entrepreneurship and networking. One of the first joint ventures is the School for Local Leaders, whose aim is to strengthen cooperation between the University, its students and Lower Silesian local government authorities at the regional and local level. Through participation in training and leadership lectures under the guidance of tutors students will develop their skills and competences in the field of interpersonal communication, negotiation skills, diagnosis, analysis and problem solving, as well as innovation, preparation and conducting of presentations and change management.

Professor Wojciech Golusiński to be President of the European Head and Neck Society

2018-04-24

Professor Wojciech Golusiński - head of the Clinic of Head, Neck and Laryngological Surgery at the Poznan University of Medical Sciences has been elected President of the European Head and Neck Society (EHNS) - informs the university on its website. EHNS brings together doctors who in everyday practice deal with head and neck cancer - laryngologists, head and neck surgeons, maxillofacial surgeons, oncological surgeons, plastic surgeons, radiotherapists, clinical oncologists, radiologists and pathologists. The organization also includes speech therapists, physiotherapists, oncology nurses, psychologists, dietitians and social workers as well as patient organizations supporting patients with head and neck cancer at every stage of treatment. The main goals of EHNS are to popularize knowledge about head and neck cancer and to support the highest standards of scientific research, education, prevention, treatment and care of patients. Lublin University to hold a conference on archaeological research in Poland, Belarus and Ukraine

2018-04-25

The international conference entitled „Archaeological research in Central and Eastern Poland, Western Belarus and Ukraine in 2017” will take place on April 26-27 at the Maria Curie-Skłodowska University in Lublin – informs Aneta Adamska, a spokesman of the Lublin university. The conference is organized by the Institute of Archeology of the Maria Curie Skłodowska University and the Lublin Museum. It is a forum for the exchange of ideas and experiences of archaeologists and specialists from other fields of science from Poland, Belarus, Moldova, Russia and Ukraine. During the event, the latest results of ar-

chaeological research will be presented. This year, 4 lectures and 42 papers in two sections (prehistoric and early-historical) will be delivered in the plenary session. Participants will discuss prehistoric settlements in Lublin-Zemborzyce, flint materials at the cemetery of the Lusatian culture in Radom-Wośni-ki or new discoveries of underwater archeology in Polesie Voivodship. The opening of the meeting will take place on April 26 at 9.30 at the Gallery of Polish Painting of the XVII-XIX centuries of the Lublin Museum. The program of the event: <https://phavi.umcs.pl/at/attachments/2018/0415/174455-programxxxivkonferencji-lublin.pdf>

Agreement on scientific and technical cooperation between Poland and the USA

2018-04-25

On April 23, 2018, the government of the Republic of Poland and the government of the United States signed an agreement in Washington between on mutual scientific and technical cooperation. On behalf of the Polish government, the agreement was signed by Jarosław Gowin, Deputy Prime Minister, Minister of Science and Higher Education. The Polish delegation included also Jadwiga Emilewicz, Minister of Entrepreneurship and Technology, Adam Bielani, Deputy Speaker of the Senate and Piotr Dardziński, Deputy Minister of Science and Higher Education. - Our visit on such high level with such a broad formula demonstrates that Polish-American relations are very good - said Deputy Prime Minister Jarosław Gowin. The agreement is to strengthen the scientific and technical cooperation of Polish scientists, scientific entities and executive agencies such as the National Center for Research and Development, the National Science Center and the National Academic Exchange Agency with American partners. It will apply for 10 years.

Student Parliament of Poland to hold National Conference

2018-04-25

The XXIV National Conference of the Students' Parliament of Poland took place in Krynica. One of main topics was the change that the Constitution for Science brings for students. Piotr Müller, Deputy Minister of Science and Higher Education emphasized that the new legislative solutions realize two objectives. It improves the quality of education and research and it treats the university as a subject – reports the Ministry of Science and Higher Education. Deputy Minister Müller presented the detailed provisions of the new law, drawing attention to the mechanisms of protection of students' rights introduced in the Constitution for Science. - Students and graduates decide about the reputation and prestige of the university. This is the largest part of the academic community and they will be the national elite of our country in future. That is why we want to provide them with the best possible education conditions and thus make up for the losses resulting from the massification of their studies. Therefore, we proposed solutions to change in traditional model of studies - said the deputy minister.

Winners of competition at the Silesian University of Technology to get a transcript before graduation

2018-04-25

The winners of the „Competition for the gold transcript of the Silesian University of Technology” received transcripts of the Silesian university before the final exam. Awarded students can start studying in the chosen field without having to participate in the qualification procedure - informs the university on its website. High school students checked their knowledge and skills in physics, mathematics, chemistry and computer science. 101 students qualified for the second stage. In the end, the university transcripts were awarded to 32 people who achieved the best result in the test organized in March at the University. The winners include 12 students with the best results in mathematics, 10 students with the

best results in chemistry, 9 in physics and 1 in computer science. All of them have free access to the selected technical field of studies.

University of Economics in Wroclaw to launch project „Leaders of knowledge - Leaders of success”

2018-04-25

The University of Economics in Wroclaw is implementing the project „Leaders of knowledge - Leaders of success”, which aims to bring the specifics of economic studies, University offer, exceptional campus climate and modern infrastructure to the secondary school graduates, and consequently attract the best candidates to the university. For last three months the University signed 8 agreements with secondary schools in Lower Silesia. The university visited 20 graduation classes, whose students participated in special lectures and exercises, conducted by the academic staff of the university, business practitioners, and university graduates. «Learning about the methods and tools of academic education gives the opportunity to taste student life before graduation (hence the motto of the project: Become a student by the final exam). Such presentation of career perspectives allows pupils to assess the quality and value of the offered education» - emphasized the project's authors on the University website. More information: www.liderzy.pl

Poznan University of Technology to cooperate with the University of Kazakhstan

2018-04-25

Rector of Poznań University of Technology, Prof. Dr. Eng. Tomasz Łodygowski and vice president for academic affairs Al-Farabi Kazakh National University (KazNU), Askara Khikmetov signed a cooperation agreement for both universities - informed Poznan University of Technology on its website. The cooperation will concern the participation of both universities in the ERASMUS + program, student exchange, supervising master's theses and PhD dissertations, the double diploma program and summer intern-

ships. The Kazakh university is internationally renowned, and it is the leader of scientific and educational activities in Kazakhstan. In an independent assessment by QS World University Rankings from 2018, KazNU was awarded the «Four Stars of Excellence» in the «QS Stars Development Road Map International Ranking» as the first and only university in Central Asia.

Educational picnic „From Micro to Macro” at the Warsaw University of Technology

2018-04-26

On Saturday, May 19, Warsaw University of Technology organizes the Educational Picnic „From Micro to Macro”. The event will be a great opportunity to learn the secrets of science, experience the atmosphere of our university and talk to students and the staff. Picnic organizers prepared many attractions for the pupils and kids. They can play with «inflatables», dive into the ball pool or to attend the special workshops and activities, such as the constructing eco-robots and eco-piggy banks, what enables participants to learn how and why it is worth using secondary raw materials. The whole event will be complemented by a show of huge soap bubbles. All these events will take place between 10 am and 4 pm on the campus of the central Warsaw University of Technology at Plac Politechniki in Warsaw.

Officers from Wrocław at competitions at West Point academy

2018-04-26

Representation of the Wrocław Academy of Land Forces participated in the prestigious SANDHURST combat contest. In the competition at the famous West Point Academy, Polish cadets took 18th place out of 64 teams from around the world - informs the Academy. The competition was held in varied, difficult terrain. Among the assessed tasks were shooting, tactical competitions and tasks requiring physical effort - running, moving tires, boxes with ammunition, canisters and manikins simulating the injured. Participants of the competition also had to overcome the lake on the landing craft, go through the tactical obstacle course, perform an ambush and conduct a night reconnaissance. Each team consisted of 11 soldiers, including one woman and two reserve soldiers. The jury assessed the endurance, precision, speed, commanding skills and behavior of the entire team.

Award for the Wrocław Academy of Fine Arts

2018-04-26

The „Greenhouse” project of the Furniture Department of the Academy of Fine Arts in Wrocław was awarded in the international competition LIT Lighting Design Awards in the „Light Art Project” category. The design team proposed installation based on the archetype of greenhouses. Modification of the geometry, it was given a lofty character. From the very beginning, the designers expressed the need to emphasize small objects - represented in the installation of ceramic forms with germinating plants. The highlighting element is the light illuminating the roots of plants in the shelves and other exhibits. The distinction enables «Greenhouse» to be shown at Tokyo LIT Exhibition, among selected 30 other objects. The exhibition will be held in Tokyo in mid-May. Project on the contest website: <http://litawards.com/winners/winner.php?id=2392&count=1&mode>

Poznan University of Technology at Expo Estudiante in Bogota

2018-04-26

Poznan University of Technology presented its offer at the largest Latin America Expo Estudiante educational fair in Bogota. The educational mission to Colombia was organized by the National Agency for Academic Exchange. All interested students could get acquainted with the study offer at the University of Technology and get information about the scholarship program managed by the Agency for developing countries. The «Poland my best choice» exhibition was very popular among the fair visitors. Emilia Wojtczak from the Department of Continuing Education and International Poznan University of Technology visited the Fundación Universitaria del Área Andina to prepare the agreement on academic exchange. There are 3 students from Colombia at Poznan University of Technology. One of them is a scholarship holder of the Ignacy Łukasiewicz program.

Researchers from Warsaw University nominated for the European Inventor Award

2018-04-27

Researchers from the Faculty of Physics and the New Technologies Center at the University of Warsaw Dr Joanna Kowalska, Prof. Edward Darzynkiewicz and Prof. Jacek Jemielity were nominated for the European Inventor Award. The European Inventor Award is organized by the European Patent Office. It is attended by inventors contributing to economic or social development from around the world. Researchers from the University of Warsaw have been studying the interactions of proteins and RNA nucleic acid fragments in cellular processes for over 10 years, as well as the chemical synthesis of analogous terminals of mRNA molecules. Through their research, they solved the issues of mRNA instability and increased its productivity. Their discovery provides the development of effective genetic vaccines that in the near future will fight malignancies. The award ceremony will take place on June 7 in Paris.

Startup Weekend in Olsztyn

2018-04-27

On May 11-13, 2018 the University of Warmia and Mazury in Olsztyn organizes Startup Weekend Olsztyn. The participants will be able to create projects and instantly verify their business ideas during this 54-hour marathon. Mentors, businessmen-practitioners, as well as graphics and programming specialists will help with their experience. Anyone who has an innovative idea can participate in the event. More info on page: <http://communities.techstars.com/poland/olsztyn/startup-weekend/12252>

Conference on economic psychology

2018-04-27

The Kozminski University in Warsaw, together with the Academic Association of Economic Psychology, is organizing the conference „Economic Psychology”, which will take place from 16 to 18 May in Konstancin-Jeziorna. The plenary lecture will be given by Prof. Grzegorz Śędek, who is the vice-rector for the science of SWPS at the Humanities and Social Sciences University. He specializes in experimental, social, clinical and cognitive psychology. He conducts interdisciplinary research on cognitive limitations. The topics of the conference include psychology of economic behavior, decision making, risk perception, experimental economics, psychology of money, and economic socialization.

Film festival „Made in Poland” at the University of Silesia

2018-04-27

PhD students at the University of Silesia, together with the School of Polish Language and Culture, the International Polish Studies and the Center for Chinese Language and Culture, organize the sixth film festival „Made in Poland”. This year’s title is „Made in Poland, Made in Asia”. The Polish, Georgian, Kyrgyz and Chinese films will be presented on May 8 at the university building at ul. Uniwersytecka 4 in Katowice. The aim of the festival is to deepen the scope of cultural competences among Polish and foreign students. The organizers want to achieve their goal by presenting the cultures, traditions and customs appropriate to given countries. The festival is also to introduce Polish foreign culture to students studying at the University of Silesia.

Researcher at the Opole University of Technology receives grant and position in Measurement

2018-04-27

Prof. Grzegorz Królczyk from the Department of Machine Technology and Production Automation of the Faculty of Mechanical Engineering of the Opole University of Technology received a grant from the National Science Center as part of the OPUS competition. The scientist also became a member of the editorial committee of the prestigious magazine “Measurement”. Professor Królczyk deals with modeling of dynamic and endurance issues in the process of precise milling. The project will be implemented in 2018-2020. Its budget is over PLN 750,000. OPUS is a competition for research projects, including financing the purchase or manufacture of equipment necessary for their implementation. It is a prestigious competition, in which the academic achievements, including publications in renowned scientific journals, constitute a significant contribution to the scientist’s final evaluation. «Measurement» is one of the most prestigious metrological journals in the world. Professor Królczyk accepted the position of Associate Editor.

Prof. Daniel Gianola to hold a lecture at the Wrocław University of Environmental and Life Sciences

2018-04-27

Until Monday 30th of April students can apply for the lecture of Prof. Daniela Gianola at the University of Environmental and Life Sciences in Wrocław. This outstanding specialist in the field of mathematical statistics used in natural sciences will be a guest of the university on 13-14 of April. Modern genetics cannot exist without mathematical statistics, because it is a tool in the analysis of so-called attributes with a complex model of inheritance - says Prof. Joanna Szyda from the Department of Genetics at the Faculty of Biology and Animal Breeding. In her opinion, the application of mathematical statistics and computer science in biology is the basis of modern data analysis. The competence of Prof. Gianola is the application of mathematical statistics methods in genomics, with particular emphasis on applications to livestock and to the analysis of features with a complex model of inheritance. Professor Gianola began as a World Bank expert and later worked at the Universities of Illinois and Wisconsin-Madison. More information: http://www.glos.upwr.edu.pl/aktualnosci/47738/statystyka_matematyczna_z_prof_gianola.html

Wrocław University of Technology to run the project „Watchtower of the atmosphere”

2018-04-27

Researchers from the Wrocław University of Technology will develop procedures and a system for analyzing ash from domestic furnaces under the „Watchtower of the Atmosphere” project launched in Lower Silesia. Its purpose is to enable municipalities to co-finance projects related to the improvement of air quality. The Voivodship Fund for Environmental Protection and Water Management allocates 500,000 PLN for the program. It will be used for co-financing the purchase of containers for ash sampling, measurement sensors for air testing and covering the costs of research carried out in

laboratories - informs the technical university on the website. The first task of scientists is to create procedures that cover the entire control process, from the moment of sampling, to the final report. Prof. Anna Janicka from the Faculty of Mechanical Engineering at the University emphasizes that it will answer the question what is actually burned in the boilers.

Conference „Science of art - the art of science” in Lodz

2018-04-30

The Polish Association of Creative Strategies, the Department of Drama and Theater and the Department of Journalism and Social Communication of the University of Lodz organize on May 14-15 a nationwide scientific conference: „Science of art - the art of science. Strategies and creative processes ..”. The conference is interdisciplinary. Its organizers plan to focus on topics related to the tradition of analysis and interpretation of art, artistic phenomena and creative processes. By analyzing these processes, conference organizers want to understand aspects of human cognition and learning through art, as well as to shape the cultural environment for creative life. The conference’s scientific leaders are Prof. Grażyna Habrajska and Dr Mariusz Bartosiak.

Conference on separatist movements in the modern world

2018-04-30

The Political Movements Department of the Faculty of Political Science at the Maria Curie Skłodowska University in Lublin is organizing a conference „Separatist movements in the modern world” on 9 May. The aim of the conference is to systematize and evaluate the experiences associated with separatist movements and to indicate potential directions of their development, as well as the opportunities and threats created by them - informs the Lublin university. During the conference, participants will be able to listen to the lecture of Professor Grzegorz Piwnicki from the University of Gdańsk presenting the separatist and disintegrating movements of the turn of the 20th and 21st century in Europe. Dr Roman Szul from the University of Warsaw will hold a lecture about the structure and dynamics of ethno-territorial identity and Dr Wojciech Nowiak from the University of Adam Mickiewicz in Poznań will present «Separation in the Nordic way.» In addition, panel discussions are planned: Separatism - problems and challenges, Separatism in the world, Separatism in Western European countries, Separatism in the countries of the former Soviet Union and Separatism in the countries of Central Europe.

Delegation from Sichuan Province meets the National Academic Exchange Agency

2018-04-30

Representatives of NAWA National Academic Exchange Agency met with a delegation from China representing the Department of Education of the Government of Sichuan Province. The Chinese government delegation from the Sichuan Province came to Poland to participate in the Chinese educational fair. According to NAWA, the Chinese educational fair is aimed at presenting to Polish students and universities the potential of Sichuan universities and colleges, encouraging students to study in Sichuan, as well as getting acquainted with the offer of Polish universities in terms of increasing the number of

Chinese students in Poland. At the same time, the activities of the National Academic Exchange Agency and Polish universities at the China Education Expo fair were discussed. The Expo will take place on October 25 in Chengdu.

Competition for the mascot of the Silesian University of Technology

2018-04-30

An open nationwide competition for the concept and name of the mascot for the Silesian University of Technology has been launched. Works should be submitted until May 31. The mascot is to arouse positive associations and promote the values of the university also it should promote the development of Polish science, technology and culture as well as attitudes of patriotism, civic responsibility, social activity and mutual respect and tolerance. The project must be consistent with the mission and vision of the University to be a prestigious European technical high school that conducts innovative research and development work, educates highly qualified staff for the society and knowledge-based economy, and actively influences the development of the region - explain the competition organizers on the website. The competition jury will take into account the readability of the message, innovativeness, aesthetic values of the project and the promotional potential. The technique of developing a mascot concept is optional. Detailed information and rules of the competition: <http://www.polsl.pl/Documents/Regulamin%20konkursu%20-%20Concepcja%20maskotki%20wraz%20z%20jej%20nazw%C4%85%20dla%20P%C5%9A.PDF>

Awards for Poznań students and PhD students

2018-04-30

Paweł Jeżowski received the Poznań mayor's award for his PhD dissertation „Lithium-ion capacitors based on a pre-lithiation of a graphite electrode from a composite positive electrode”. This is the 14th municipal competition for the best master's and PhD theses - informs Poznań University of Technology. In the category of PhD dissertations, Julian

Balcerek was awarded for «Human-computer interfaces for supporting automatic hazard recognition»; Przemysław Bartczak was awarded for «Assessment of sorptive abilities of natural materials in the removal of selected inorganic and organic pollutants from water systems» and Rafał Brodziak for «Synthesis of scenarios for operation and control of the process of water recognition using the method of artificial infiltration». In the master's thesis category, Iga Chudaska was awarded for «Methodology of designing and rapid manufacturing of upper limb prosthesis components», and Rafał Krzysztof Nowak for «Visualization of process control in a smart building». More information: <https://www.put.poznan.pl/en/aktualnosc/poznanscy-studenci-i-doktoranci-nagrodzeni>

Security of the state and the threats were discussed in Wrocław

2018-04-30

The Medical University and the Academy of Land Forces in Wrocław organized a conference on „Rescue systems in Poland and civil and military security”. Over 300 participants attended the three-day meeting - we read on the University's website. On the first day, the security of the state was discussed, the threats and the role and tasks of specialist rescue and military medical rescue. After the lectures there were three discussion panels: tactical medicine, emergency medical services and specialist rescue. On the second day, army specialists, mountain volunteer service, sea rescue and emergency medical officers practiced resuscitation in the Rosomak medical evacuation vehicle, handling mass events and securing injuries on the battlefield. As part of the conference, the 1st Lower Silesian Meeting with Rescue was held, when over 200 children learned the principles of first aid and obtained the title of a small rescuer.

Naukobus in Lithuania

2018-05-07

Naukobus or a mobile exhibition prepared by the Copernicus Science Center in Warsaw along with the Ministry of Science and Higher Education, set off on its first foreign trip. It visited Vilnius, Kaunas and several other cities in Lithuania. Naukobus gives a chance to see and touch over 20 exhibits prepared and serviced by a team of animators from the Copernicus Science Center. Children can thus learn the secrets of various fields of science, including biology, physics, chemistry or computer science in a practical way, through experiments. Presentations in Lithuanian cities were intended for nearly 2,000 students of Polish and Lithuanian schools. The project was organized jointly with the Polish Institute in Vilnius and its aim was to promote science among Polish children in Lithuania - informs the Ministry of Science.

Dr Jakub Nowak from the Maria Curie Skłodowska University wins the main media prize

2018-05-07

Dr Jakub Nowak from the journalism department at the Faculty of Political Science at the Maria Curie Skłodowska University in Lublin won the first „Media and Democracy Karol Jakubowicz Award”. The competition is organized by the Polish Society of Social Communication. The scientist was awarded for the monograph of „Popculture network policy” - says Katarzyna Kozielowicz from the university's press office. In the awarded monograph, the author deals with the problems of visibility of online content and political mechanisms of its broadcasting, new patterns of civic activity and the political status of so-called digital intermediaries. In the first competition, Dr Maria Nowina-Konopka from the Jagiellonian University was awarded for the monograph „Infomorphosis: Information management in new media”. The celebration of the „Media and Democracy Karol Jakubowicz Award” will take place during the Congress of the European Media Management Association - June 15 at 11:30 in the University Library in Warsaw.

Prof. Kołodko to present his newest book „Will China save the world?”

2018-05-07

On 15 May, the latest book of Prof. Grzegorz Kołodko „Will China save the world?” will be presented. Professor Grzegorz Kołodko is the most quoted Polish economist in the world. He was the deputy prime minister of the Polish government and the minister of finance four times. Currently, he is the director of the TIGER Transformation, Integration and Globalization Research Center at the Leon Koźmiński Academy in Warsaw. The latest study by Prof. Kołodko is a comprehensive documentation of China's economic achievements. These considerations, however, are just the background for trying to answer whether China's economic successes can help solve global problems. Prof. Maciej Bałtowski from the Maria Curie Skłodowska University wrote in his review: «This extremely important and interesting study addresses the key issues (...) and the future of the world. The understanding of the Chinese phenomenon - the causes, conditions and effects of an extraordinary civilizational leap - is superficial in the West, also in Poland. The author successfully overcomes this limitation and the book goes far beyond the standard study of the Chinese economy.»

Researchers from Siberia visit University of Wrocław

2018-05-07

The Paleozoology Department of the University of Wrocław invites students to lectures run by academic researchers from the University of Tomsk on Thursday, May 10 to the Large Lecture Hall of the Institute of Environmental Biology at ul. Sienkiewicz 21. Lectures will be conducted in English - informs the university on its website. During the morning session, guests from Siberia will talk about the extinction of the woolly mammoth in the area of Siberia and northern Eurasia, global climate change, human impact and changes in environmental geochemistry as well as changes in the natural environment in the Chulym river basin from the Mesozoic to the Cenozoic era. In the afternoon session, a lecture entitled «Land settlements in the southern part of Western

Siberia (area, geological structure, paleontological sites, research methods, expeditions)» is scheduled. All participants will also have the opportunity to get acquainted with the scientific and didactic offer of the University of Tomsk. The visit takes place as part of the Erasmus ++ program.

Professor Krystyna Modrzejewska from the University of Opole honored with the Order of the Academic Palms

2018-05-07

Professor Krystyna Modrzejewska from the Department of French Culture and Language at the University of Opole was honored with the Order of Academic Palms - one of the oldest and most prestigious French decorations set up by Napoleon I. Dr. Christophe Paoli, attaché for science and university cooperation of the French Embassy in Poland awarded the order on behalf of the French Ministry of National Education, Science and Higher Education. It is awarded to especially distinguished people in the education, contributing to French intellectual, scientific and artistic development. Krystyna Modrzejewska has been working at the Opole university since 1977. She organized and ran the department of French culture and language at the University of Opole.

Gdańsk University of Technology scientists succeed at the 3D Printing Days in Kielce

2018-05-07

The team of the Polymer Technology Department of the Faculty of Chemistry of the Gdańsk University of Technology won the main prize for the best product in 3D Printing Days competition organized by Kielce Trade Fairs and the Polish Association of Technology Initiatives - informs the university on its website. The award was granted for compostable and biodegradable granulate for the production of supporting filaments obtained from renewable raw materials - BioGranAqua. The granulate is made from polymer compositions developed in the department of polymer technology basing on the invention protected by a European patent. At the Kielce trade fair, the scientists presented granulate itself and its characteristics as well as the prototype of filaments obtained from it. They are environmentally friendly - they disintegrate in water and are susceptible to organic recycling. They can be an alternative to supporting filaments obtained from petrochemical raw materials.

Biologists' Spring at the University of Szczecin

2018-05-07

The Faculty of Biology of the University of Szczecin organizes for the seventh time the Biologists' Spring. The organizers invite participants to follow the spring on Friday, 11 May. The program includes interesting shows and attractive workshops, exhibitions and other curiosities. As part of the event, the participants will be able to see «Herbarium Stetinensis» - the first herbarium in the history of Szczecin, which includes collections of vascular plants, lichens, fungi and historical German collections from 1837-1939. In the Herbarium resources there are currently approx. 55 thousand specimens. During the event the scientists will talk about saving species threatened with extinction - for example the noble crayfish. Also, the guests will have a chance to transfer plant explants to various booths visiting

in vitro laboratory. Dozens of insects and tropical arachnids with various species of lichens and fungi will be presented at the special exhibition. Detailed information: http://wb.usz.edu.pl/upload/wb/PROGRAM_Wiosny_Biologow_2018_zbior.pdf

Joint discovery of Polish and German scientists in the Tatras

2018-05-07

Dr Paweł M. Owsiany from the Adam Mickiewicz University in Poznań together with scientists from Germany discovered new species of algae in the Tatra National Park. The obtained research results allow to include the Tatra Mountains as one of the European centers of biodiversity to the areas of „emerging” new species. Research in the Tatra National Park is carried out by the Nadnotecki Institute of the Adam Mickiewicz University in Piła, with the support of the Nord Foundation and the Handicapped Scuba Association (HSA) «Step by Step». Two of the discovered species of dinoflagellata (Dinoflagellata) were named *Parvodinium marciniakii* and *Parvodinium trawinski* after Piła scientists - Grzegorz Marciniak and Krzysztof Trawiński. Researches of the Dr. Owsiany team are conducted in cooperation with the research group of Prof. Marc Gottschling from the Ludwig and Maximilian University in Munich.

Competitions for bilateral exchange of Czech and Slovakian scientists

2018-05-08

Poland already announced competitions for bilateral exchange of researchers with France, Austria and Germany and now it will provide such cooperation with the Czech Republic and Slovakia - informs the National Academic Exchange Agency. The aim of the competitions is to support the mobility of scientists who will carry out projects jointly with the researchers from partner countries. Such personal exchange will be subsidized. Applications for funding may be submitted by universities, scientific organizations of the Polish Academy of Sciences, research institutes

and international scientific institutes established under separate regulations, operating in Poland. More: <https://nawa.gov.pl/naukowcy/oferta-wyjazdowa>

Warsaw and Lodz students develop an innovative diver locator

2018-05-08

Student team of the Warsaw University of Technology and the Lodz University of Technology took the first place in the national finals of the Microsoft Imagine Cup 2018 competition in the Big Data category - informed the Polish Press Agency. They are the authors of the innovative locator Wavy System for recreational divers. The system, developed by the students, provides information on the position of the diver in real time. The collected data goes to the Azure cloud, where they are analyzed and visualized using the application on the smartphone. The students are currently working on the fastest possible completion of the prototype to launch the product on the market. There are a few million people diving around the world that will be surely interested in the solution that will increase their safety. The students from the Warsaw University of Technology and Lodz will represent Poland in the world finals of the competition, which will take place in Seattle in the United States in July this year.

Success of Olsztyn landscape architecture students

2018-05-08

Students of the University of Warmia and Mazury in Olsztyn won the competition for the best landscape architecture diploma and master's thesis - informs the e-newspaper of the university in Olsztyn. The competition organized by the Association of Polish Landscape Architects in the category of engineering works was won by Eng Ewelina Pochodyła for her work «The concept of spatial development of a scenic path along a fragment of the shore line of the Morąskie Rozlewiska». In the master's thesis category, the first prize was awarded to Katarzyna Wójcik for her work: «Wind power stations and landscape. Analysis of the impact of the planned Mikołajki Pomorskie wind farm on the landscape». The promoter of both theses was Dr Mariusz Antolak, assistant professor in the landscape architecture department at the Faculty of Environmental and Agricultural Development at the University of Warmia and Mazury.

Open University of Warsaw University celebrates its 10 years anniversary

2018-05-08

On the occasion of the tenth anniversary of its launch, the Warsaw Open University is holding the conference „Opened University to everyone - 10 years of adult education in a new dimension”. As reported by the Warsaw University, the Open University organizes courses for all adults, regardless of education and professional qualifications. More than 1,200 lecturers have cooperated with it since 2008. Last year, students were able to study more than 200 courses in every trimester. 574 new groups were launched and over 8,500 people participated in the lectures. The conference will be divided into four discussion panels: «Why do adults learn? Adult learning and competences of the future» held by Ewa Czerniawska from the Faculty of Psychology, «Lifelong learning, the labor market and its needs» conducted by Agata Wroczyńska from the Office for Quality of Education, «Learners of adults, i.e. the challenge for the university» by Andrzej Wys-

mołek from the Faculty of Physics and «How to teach adults? « – a lecture given by Prof. Radosław Pawelec from the Faculty of Journalism, Information and Bibliology. More: https://www.uo.uw.edu.pl/10lat/konferencja_jubileuszowa

Agreement on cooperation between the University of Rzeszów and the University of Bari

2018-05-08

The University of Rzeszów has signed a scientific cooperation agreement with the Italian Aldo Moro Università Degli Studi di Bari. Both universities were represented by the rectors Prof Sylwester Czopek and Prof. Antonio Felice Uricchio - informs the Rzeszów university. The signed agreement provides joint research and exchange of employees and students. In addition, universities will exchange experiences in the organization of the teaching process and study programs of similar specialties. They will also carry out joint studies and research projects. - Establishing scientific relations with foreign centers is an important aspect of the pro-quality policy pursued by our University. We are glad that the University of Bari joined our partners - said Prof. Sylwester Czopek.

New workshops at the Center for Practical and Continuing Education in Zabrze

2018-05-08

The Center for Practical and Continuing Education in Zabrze launched a new car workshop equipped with a hybrid car. The workshop was opened during the conference „New quality of vocational education”. During the ceremony, the Vice-Rector for cooperation with the socio-economic environment of the University Prof. Janusz Kotowicz gave a lecture on innovative technologies. Later the participants and the Center specialists discussed the need of constant education. The car workshop with a new and fully functional Toyota hybrid car joins the other laboratories operating in the Center for Practical and Continuing Education in Zabrze. In the Hall of

New Technologies there are already workshops of numerically controlled machines from American company HAAS, models of renewable energy sources from the Finnish company FORTUM, as well as the ROCA assembly and operation installations.

Gdańsk University of Technology awarded in „Innovations for the Polish Armed Forces”

2018-05-08

The Pomeranian Crisis Management Laboratory at the Gdańsk University of Technology was awarded in the competition „Innovations for the Polish Armed Forces” organized by the Inspectorate of Implementation of Innovative Defense Technologies. The awarded design is a navigational simulator for special operations. The device is used to create and implement advanced scenarios of soldier training for individual and team navigation in special operations. It operates with aim of a full-size cube virtual CAVE system - 6 screens of 3.4 metres with simultaneous stereoscopic back projection. The cave is located in the Laboratory of Immersed Spatial Visualization. The soldiers have the impression of being completely immersed in a virtual world that is generated on an ongoing basis. This enables the implementation of realistic training scenarios prepared in the Pomeranian Crisis Management Laboratory.

Professor Terry Rockafellar to hold a lecture at the Poznan University of Technology

2018-05-08

Poznan University of Technology invites students to a lecture of Prof. Terry Rockafellar - one of the leading scientists in the field of optimization theory and mathematical analysis and combinatorics. The lecture is scheduled for May 10 and concerns the optimization of decisions under conditions of uncertainty. In case when the uncertainty of future events is described using probabilistic models, we are dealing with stochastic optimization. A frequent criterion for making decisions is to keep the risk below a certain level. To this end, the so-called „Risk measures” including new so called buffered failure probability. This allows for a more intuitive description of the situation and requires less complicated calculations - explain the organizers of the lecture. R. Tyrrell Rockafellar graduated from Harvard University (1963). His scientific interests include stochastic programming, optimal control in economics, finance and engineering applications. More information about the lecturer: <https://sites.math.washington.edu/~rtr/mypage.html>

Białystok University of Technology students successful at robot competitions in USA

2018-05-09

Student team of the Faculty of Mechanical Engineering of the Białystok University of Technology participated in the largest robotic competition in North America - Robogames 2018 in Pleasanton and won two gold and one bronze medals. The gold medal in the MiniSumo category was won by the Hellfire2 robot, while in the MegaSumo category, among other 24 robots, the Białystok's SumoMasters introduced two robots to the finals. The ACE won the competition, the Masakrator was the third, and Speedster finished as the fourth robot. The Polish team completely dominated the competition in Pleasanton, California. Financial support for the construction, its improvement and for participation

in the competition was provided as part of the project of the Ministry of Science and Higher Education «The best of the best! 2.0. «

Students of the AGH University of Science and Technology built a solar lamp in Tajikistan

2018-05-09

Students from the AGH University of Science and Technology in Krakow within the framework of the Tajikistan Project educated their Tajik peers from Tajik Technical University in Dushanbe in the renewable energy. Firstly, they introduced them to the secrets of photovoltaics and then during a visit to Dushanbe, they built a solar lamp together - informs Anna Żmuda-Muszyńska, spokesman for the Krakow university. The solar lamp, together with the attached measuring system, will be a real example of the photovoltaic technology for Tajik students and an innovative tool during laboratory classes. The Tajikistan project is an initiative of four students from the Faculty of Energy and Fuels at the AGH University of Science and Technology: Joanna Maraszek, Anna Ścierańska, Joanna Dubielewska and Hubert Stinia, who decided to share their knowledge of renewable energy sources with their peers in Tajikistan and thus influence the energy shortage situation electricity in central Asia. In Tajikistan as much as 70 percent residents experience electricity cuts. More:<http://projecttajikistan.pl/>

By May 11 participants can register to the conference „Polonia Restituta ...”

2018-05-09

By May 11 participants can register to the conference „Polonia Restituta ...” at the Faculty of Theology of the University of Silesia. The debate „Thinking Homeland ... Citizenship and patriotism on the hundredth anniversary of Poland's independence” will take place on May 14. Speakers include Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education, Teresa Czerwińska, Minister of Finance, Wiktor Skworc, Metropolitan of

Katowice, Marian Niemiec, bishop of the diocese of the Evangelical-Augsburg church in Katowice, and Robert Kostro, director Museum of Polish History in Warsaw. The conference takes place as part of the project «Polonia Restituta. Decalogue for Poland on the 100th anniversary of regaining independence », initiated by the Ministry of Science and Higher Education and the Council for Social Conferences of the Polish Episcopate. The project consists of ten thematic conferences addressing issues of public, economic, political, social and cultural life. More information: <http://www.us.edu.pl/konferencja-z-cyklu-polonia-restituta-na-uniwerysytacie-slaski>

Researcher of the Silesian Medical University honored with Professor's nomination

2018-05-09

A new professor joined the Silesian Medical University staff. President Andrzej Duda granted the Full Professorship's title to Prof. Grażyna Lisowska from the Department and Clinical Department of Otorhinolaryngology and Laryngological Oncology of the Faculty of Medicine. Professor Grażyna Lisowska is a specialist in otorhinolaryngology. Her scientific activity focuses mainly on issues related to the objective assessment of auditory organs. The most important achievements include the innovative method of assessing the olivarysystem developed in cooperation with HNO (Hals-Nasen-Ohren) Universitätsklinik Kantonsspital Basel. Professor Lisowska deals mainly with modern methods of treatment of sudden hearing loss and tinnitus as well as sinus diseases and the use of modern endoscopic sinus surgery techniques in clinical practice.

Gdańsk University of Technology accepts the declaration of Partnership for accessibility

2018-05-09

Gdańsk University of Technology has accepted the declaration of Partnership for accessibility. This is meant as a commitment to cooperate in implementing the assumptions of the government Accessibility program for 2018-2025. The program implemented by the Ministry of Investment and Development consists of the following areas: architecture, transport, education, health care, digitization, services, competitiveness and coordination. The main purpose is to provide the free access to goods and services and participation in the social and public life for people with special needs. Signatories of the document are representatives of the government, local governments, non-governmental organizations, entrepreneurs, public institutions and the media. They declared to develop the idea of accessibility and equal treatment and cooperation in equalizing opportunities and access to the physical, social and cultural environment, recreation, leisure, sport, healthcare, education, work, transport, information and means of communication.

Professor Michał Tendera to be new member of the Academia Europaea

2018-05-09

Professor Michał Tendera from the Department of Cardiology and Structural Diseases of the Heart of the Faculty of Medicine of the Silesian Medical University was elected as member of the Academia Europaea - a European non-governmental scientific organization. This is the appreciation of his achievements and contributions to European research. Academia Europaea is the largest pan-European scientific society, founded in 1988 on the initiative of the Royal Society. Currently, it associates 3.5 thousand members, including Nobel Prize winners and leading experts in the fields of biological sciences and medicine, law, economics, technology, humanities, social and exact sciences. The Royal Society's mis-

sion is to introduce the highest standards in science, research and education, supporting interdisciplinary and international research, and promoting the value of European science and research.

Academic debate about Ukrainians in Poland

2018-05-09

University of Economics in Poznan and Adam Mickiewicz University in Poznan invite participants to the 9th Academic Debate under the slogan „Close strangers: Ukrainians in Poland”. The meeting is scheduled for Monday, May 14. In the Collegium Minus Hall scientists will debate on the growing number of Ukrainians coming to Poland. Their influx began after Russia's aggression in 2014. Since then, according to various estimates from 1 to 1.5, million of Ukrainians came to Poland. They arrived initially mainly to Warsaw and the cities of eastern Poland. Now they work and live in almost every region. The participants of the 9th Academic Debate together with the Ukrainians connected with Poznań universities plan to reflect on this new phenomenon and its social, cultural, economic, demographic and political consequences.

XIV International MBA Congress in Krakow

2018-05-10

On May 18-20, the 14th International Congress of the MBA will be held in Krakow. This is the unique initiative integrating the MBA environment in Poland. The event is organized by the Krakow School of Business of the University of Economics in Krakow. This year's motto is «Local business resources and the global operations of companies.» The congress will consist of five discussion panels, conducted by eminent specialists from the world of science and business. There are also business workshops for all participants. The workshop topics include: Using local resources in globally managed HR projects - a case study, Behavioral economics - irrational consumer decisions and global company decisions, Challenges of global companies on local markets - diversity management in practice, Introduction to agile project management. More: <http://kongresmba.pl/>

Call for Polish-South African research projects

2018-05-10

The National Center for Research and Development (NCBR) together with the National Research Foundation (NRF) have announced the call for joint Polish-South African research projects. The projects must concern the following research areas: Health Sciences, Agriculture, Bioscience and biotechnology, Environment and climate change, Water and renewable technologies, Maritime economy, Clean coal technology, Information and communication technologies. The National Center for Research and Development will allocate up to PLN 450,000 for the project to co-finance the participation of Polish entities in the program. Limited number of at most 10 projects will be co-financed. The project implementation period is 36 months. The deadline for submission of applications is 9 July 2018. More: http://www.ncbr.gov.pl/gfx/ncbir/userfiles/_public/programy_miedzynarodowe/wspolpraca_dwustronna/rpa/2_konkurs/zasady_udzialu_polskich_podmiotow_rpa_2018.pdf

Collegium Civitas conference devoted to economic fraud risk management

2018-05-10

„Managing the risk of economic fraud - requirements in the context of proposed legal regulations” is the title of the conference organized by the Center for Social and Economic Risks Collegium Civitas, which will be held on May 21, 2018 at the Zielna Conference Center in Warsaw. The conference aims at bringing closer the changes of the protection for persons who report violations of EU regulations under the new EU Commission rules. As explained in the Collegium Civitas information, the protection of persons reporting cases of violation of law in the European Union is currently fragmentary and inconsistent. Only 10 EU Member States provide full protection for such reporters. In other countries, the protection is partial and refers to specific economy sectors or employees. During the conference, participants will be able to hear the following lectures: “The role and legal position of the Reporter”; “Reporting cases of using banks' activities to commit crimes” or “Investigative audit - an innovative approach to detecting and preventing abuses in an organization”.

Scientific seminar on transformations on agricultural markets of European Union countries

2018-05-10

Warsaw University of Life Sciences in Warsaw organizes on 14 May 2018 the scientific seminar „Common Agricultural Policy towards European agricultural markets - current status and directions of development of crop production”. It aims at presenting the results of scientific research on changes in agricultural markets in the European Union countries under the Common Agricultural Policy. During the seminar, its participants will diagnose the current situation of selected agricultural markets and reflect on the directions of development of the market for plant and animal products. The program also includes a discussion on changes in the Common

Agricultural Policy in the context of contemporary economic transformations of the European Union, as well as the consumer protection policy in the EU.

IX Festival “Between”

2018-05-10

The 9th Festival of Literature and Theater “Between” will take place in Gdańsk, Gdynia and Sopot from the 14th to the 20th of May. The main topic of the event is “MAPS”. The organization is provided by staff, PhD students and students of the Faculty of Philology at the University of Gdańsk. Festival of Literature and Theater “Between” is a meeting place for fans of literature, theater, music and other forms of art. Festival events are planned primarily in Sopot - in the BOTO Theater, Teatr na Plaży, The Sierakowski Mansion and in the Wybrzeże Theater - informs Dr Beata Czechowska-Derkacz, spokesperson of the University. During the festival there will be meetings with writers and poets - Monika Sznajderman, Andrzej Stasiuk, Mieczysław Abramowicz and Michael Edward, as well as concerts, exhibitions, performances and theater workshops, film presentations, scientific sessions and discussions. The event opening is planned on Monday, May 14, at 10.00 in the building of the Modern Languages of the University of Gdańsk.

First patellar grafting in Europe at the hospital of the Medical University of Wrocław

2018-05-10

Doctors from the Clinic of Orthopedics and Traumatology of the University Clinical Hospital in Wrocław conducted the first in Europe and the second in the world transplantation of extensor apparatus in a patient with patella cancer. Doctors could not use the standard treatment method, which is a tumor excision. It was necessary to reconstruct the whole extensor apparatus to allow the patient to straighten the knee joint, so we decided to transplant it - explains the head of the clinic, Prof. Szymon Dragan. The grafting material came from a deceased donor. Doctors decided not to give the patient immunosuppressive drugs to not to weaken the body's immune system. There were also fears that the dead bone

grafted into a living knee joint will function properly. One year after the operation it is known that it was successful - the patient was able to return to work and is now fully fit.

Gdansk University of Technology is a member of IREG Observatory on Academic Ranking and Excellence

2018-05-10

Gdańsk University of Technology joined the IREG Observatory on Academic Ranking and Excellence - an international organization whose aim is to improve the quality of international and national rankings of universities. - Once again, we are glad that not only the fact that we are one of the oldest universities in the country has been noticed, but also that we lay great emphasis on maintaining high standards of education - says Prof. Jacek Namieśnik, the rector of the University of Technology. The IREG Group (International Ranking Expert Group) met for the first time in 2002, in 2009 it was transformed into a global non-profit organization. IREG Observatory cooperates with rating organizations, universities and entities interested in raising the quality of university rankings. In addition to the Gdańsk University of Technology, the group also accepted the University of Business and Technology in Jeddah (Saudi Arabia) and the Silesian University of Technology.

Polish „folding skyscraper” wins the prestigious architectural competition

2018-05-10

Polish students won the international architectural competition eVolo. Piotr Pańczyk from the Wrocław University of Technology, Damian Granosik from the Lodz University of Technology and Jakub Kulisa from the Cracow University of Technology designed a folded tower for the victims of natural disasters. Skyshtelter.zip - a portable skyscraper built like a balloon is made of a nanomaterial based on EFTE foil (ethylene tetrafluoroethylene). It is a multifunctional center for various types of rescue operations. The whole structure, with a maximum length of 100 and a 10-by-10-meter base, folds like an accordion or origami. The rescuers can control the number of floors that will be spread out through the amount of gas pumped into the interior, eVolo Skyscraper Competition is one of the most prestigious architecture competitions. Awarded projects implement new technologies and materials, proposing new aesthetics and organization of space. More about the project: <http://pwr.edu.pl/uczelnia/aktualnosci/projekt-studenta-dzdzialu-architektury-nagrodzony-w-usa-10847.html>

XXXV international conference „World economy of the 21st century: Challenges and perspectives”

2018-05-10

The staff of International Economic Relations at the Wrocław University of Economics invite visitors to take part in the XXXV International Scientific Conference „World Economy of the 21st Century: Challenges and Perspectives”. The conference planned for 14 May is closely related to the structural and systemic changes occurring in the global and Polish economy as well as in regions - including Lower Silesia. The participants of the largest and oldest conference in Poland dealing with the problems of regionalism in the era of globalization will discuss pro-export policy of Poland and foreign investments. Active participation of researchers from all Polish

academic centers, as well as representatives of state administration, business and the media has been already the tradition of Silesian conferences. Participation in this year's edition was confirmed by over 50 scientists from Poland and abroad.

University of Lodz receives Polityka journal History Prize 2018

2018-05-11

The University of Lodz Promotion Center reported that research „Diary from Łódź ghetto Rywka Lipszyc”, developed by Dr Ewa Wiatr from the Center for Jewish Research of the University of Lodz received the Historical Prize 2018 of the journal „Polityka”. - My adventure with the diary of Rywka Lipszyc began in 2009. It was then that a copy of an anonymous manuscript was sent to the Jewish Research Center. The name Rywka and her family appeared in the course of work on the edition of the journal. We were lucky to find Rywka's cousins living in Israel. For me, dealing with the history of the Lodz ghetto on a daily basis is a source of exceptional value - says Dr Ewa Wiatr. The Center for Jewish Research of the University of Lodz has been operating since 2005. Its tasks include examining the history of Jews in Poland.

Katowice University of Economics researchers at the ECO-BOT project meeting

2018-05-11

Researchers from the University of Economics in Katowice participated in the plenary meeting of the ECO-BOT project partners. The project is to change the behavior of energy consumers towards energy efficiency and pro-ecological activities. The ECO-BOT research project (Personalized ICT for the Active Engagement of Consumers Towards Sustainable Energy) is financed from the Horizon 2020 program. Its goal is to create a virtual, personalized energy assistant that will provide information on its current consumption and suggest to limit unnecessary use of energy and thus save it. The meeting was organized in Marathon near Athens. It was aimed at pre-

senting the current progress of research, exchange of views and experiences and coordination of further activities leading to the implementation of the project. More about the project: <http://eco-bot.eu/>

Poznań Days of Exotic Animals

2018-05-11

Students and PhD students at the Faculty of Veterinary Medicine and Animal Sciences at the University of Life Sciences in Poznań participated on May 19 and 20 for the sixth Poznań Exotic Animal Days, under which the eighth Exhibition of Exotic Animals will take place. The organizers highlight that the exhibition will present over 150 species of fauna. In addition to exotic rodents, visitors will be able to admire colorful reptiles, amphibians or arthropods. Poznań Days of Exotic Animals is the largest non-commercial event at the Poznań university. The organizers plan to share the science in the fields of biology, breeding and ecology. They also want to encourage young naturalists to explore the fascinating world of animals from a different perspective.

Cultural diversity of Silesia expressed in language literature and traditions

2018-05-11

The University of Opole has launched the project „Cultural diversity of Silesia in language, literature and traditions”. The Polish-German undertaking is carried out by the Opole Institute of German Philology in cooperation with the Studierendengericht Trier (SWG). The aim of the project is to capture the regional phenomenon of cultural diversity in Silesia. Its participants, students from Germany and Poland, plan to learn and document historical and current aspects and dimensions of Polish, German, Silesian and Jewish cultures. Cultural diversity enriches, inspires, and allows to overcome restrictive beliefs and habits. The specificity of Silesia is that constituting a mix of national and ethnic minorities, cultures, traditions and languages, it still forms one community - explain project implementers. The project is co-financed by Polish-German Youth Cooperation Office Potsdam.

Professor Andrzej Ślebarski wins Kościuszko Foundation scholarship

2018-05-11

Professor Andrzej Ślebarski from the solid state physics department at the University of Silesia received a prestigious scholarship from the Kościuszko Foundation allowing the scientist to spend three months at the University of California in San Diego (UCSD). The University of California San Diego is one of the best universities in the USA, but also in the world. A few scientists of this university are Nobel laureates. Among them is Maria Goeppert-Mayer, Nobel laureate in the field of physics, born in Katowice and associated with the American university in San Diego. The scholarship will allow Prof. Ślebarski for a three-month study stay at a California university in the academic year 2018/2019. This is not the first international scholarship of the Silesian university scholar. Professor Ślebarski received already a Fulbright scholarship, and twice held two other Kościuszko Foundation scholarships.

III Academic Nuclear Energy Forum in Krakow

2018-05-14

From May 16 to 18, the 3rd Academic Nuclear Energy Forum will take place in Krakow. The organizer is the Department of Nuclear Power Engineering of the Faculty of Energy and Fuels at the Kraków AGH University of Science and Technology together with the Scientific Circle of Nuclear Power Engineering „Uranium”. The forum is addressed to students of majors related to nuclear energy and physics, members of scientific circles and enthusiasts of this subject from all over Poland. The program includes lectures of Zbigniew Kubacki from the Nuclear Energy Department of the Ministry of Energy. He will present “the Polish Nuclear Power Program «. Natalia Krawczyk from the Institute of Plasma Physics and Laser Microfusion will give a lecture on «Thermonuclear Fusion - Energy of the Future «. Dr Mikołaj Oettingen from the Department of Nuclear Power, Faculty of Power Engineering and Fuels will hold a lecture «Perspectives of using the thorium in energy sector». During the Forum there will also be a com-

petition of student presentations and workshops prepared in cooperation with the Institute of Nuclear Physics of the Polish Academy of Sciences and the Institute of Public Policies. More: <http://www.afej.agh.edu.pl/>

Krakov students to construct the unique parametric pavilion

2018-05-14

The parametric pavilion, designed and produced by students from the Imago Scientific Circle, operating at the Faculty of Architecture of the Krakow University of Technology, is a unique design in the world. The construction will be presented during the Science and Art Festival, which will take place from 16 to 19 May in Krakow. The parametric pavilion consists of 132 elements that are connected like a 3D puzzle model. The construction material used for the production of the pavilion is foamed parking polystyrene. The pavilion is 12 meters long and 7 meters wide. At the highest point it reaches 3 meters. It is one of the largest buildings of this type in the world and it is also the most original pavilion as each element was specially designed- informs the Krakow university.

Conference on emotions in language and communication at the University of Warmia and Mazury

2018-05-14

The Institute of Polish Studies and Logopedics at the University of Warmia and Mazury in Olsztyn organizes on May 14-15 a nationwide conference in the series „New phenomena in language, text and communication”. This year’s conference will be held under the motto «Emotions in language, text and communication» - informs the university in Olsztyn. During the conference, linguists, psychologists and media language researchers will deal with the relationship between language (text) and emotions and between emotions and communication participants. The organizers plan to explain new forms of expressing emotions in language, emotions in the

semantic and pragmatic expressions, emotionality of the politics language, emotion expressions in journalistic messages and cyberemotions - emotionality in the Internet.

Professor Bilewicz of the Warsaw University to hold an open lecture on the language of contempt

2018-05-14

Prof. Michał Bilewicz will hold a lecture „Speech of contempt. How the brutal language of the Internet has changed our thinking about strangers? „ as part of the Warsaw University program „8 lectures for the New Millennium”. Professor Michał Bilewicz works at the University Center for Research on Prejudice. As he claims, «we have been dealing with a real epidemic of contempt speech for several years. Insulting Muslims, Jews or Ukrainians is a sad practice of everyday Polish media and the Internet. « In his opinion, this problem has also a global dimension. Professor Bilewicz plans to show how the language of contempt changes the media recipients. During the lecture, he will try to answer whether we become less sensitive to evil around us through speech of contempt? Do we change the way how we look at strangers? The lecture will take place on May 15 at 17.00 in the hall of the former University Library in Warsaw.

Conference „Reportage in the World - Reporting World” at the University of Silesia

2018-05-14

The International Polish Studies and the School of Polish Language and Culture at the University of Silesia in Katowice organize the international scientific conference on the 23 and 24 May as part of „Polish Literature in the World”. The theme of this year’s edition is „Reportage in the World – Reporting the World”. The subject of discussion will be a reportage as an intercultural interference evolving under the influence of civilization phenomena. The participants of the conference will deal with the problems of the foreign reception of Polish reportages including the discrepancies in its understanding in Poland and in the world. They will also consider its relation to global technological, geopolitical and socio-cultural processes - digital revolution, tabloidisation of the media, globalization and multiculturalism.

Poznań Adam Mickiewicz University students to launch pro-ecological projects

2018-05-14

Three projects of Poznań students received funding in the call „IDEAMU!”. The aim of it is to develop „green” and social innovations to strengthen lasting relations between the University and the environment. The winning project is «Morasko is worth of Poznań». The students plan placing boxes and animal houses in the Morasko campus. The installations will contain descriptions of the species for which they are intended and information on the research teams involved. The second project - «Living mural» will present the green aspect with artistic presentation of Maria Skłodowska-Curie. It will connect the university with the inhabitants, it is also a bridge between human and nature elements. The third project «Greenhorns in it» is a cycle of radio university broadcasts promoting attitudes, ideas and pro-ecological activities – e.g. modern recycling and home-made methods for use of renewable energy sources.

English Competition „Challenge Accepted” in Lublin

2018-05-15

The Maria Curie-Skłodowska University in Lublin invites students of universities from all over Poland, high school students, as well as residents of Lublin and the Lublin province to participate in the third English language and Anglo-Saxon culture competition „Challenge Accepted” - informs Aneta Adamska, spokesman of the Lublin university. The competition is organized by the Center for Promotion and the Center for Teaching and Certification of Foreign Languages at the Maria Curie-Skłodowska University. The competition consists of a 45-minute written test, in which participants will have to answer 60 closed questions. The participants should be over 16 years of age. The competition will take place on June 15 at 10.15 at the Faculty of Law and Administration of the Maria Curie-Skłodowska University in Lublin (Plac Marii Curie-Skłodowskiej 5). The number of places is limited to 400, therefore the order of applications matters. Applications should be submitted by June 13 via the website: www.umcs.pl.

AGH University of Science and Technology to held seminar on challenges for scientists and engineers in innovative industry

2018-05-15

The Academic Center of Materials and Nanotechnology of the AGH University of Science and Technology in Krakow is organizing on 17 May 2018 the seminar „Challenges for scientists and engineers in innovative industry”. The guest and lecturer of the seminar will be Luc Van De Putte from the Netherlands, currently employed as a Group Manager Modeling at ArcelorMittal Poland. In his lecture he will deal with the issues of innovation in the steel industry, which is sometimes perceived as an old industry, but in fact it implements many innovations and investments. This provides new opportunities for scientists and engineers working in companies of this industry. During the seminar, Luc Van De

Putte will present the challenges faced by the ArcelorMittal Modeling Group, where scientists (physicists, chemists and material engineers) work on process models, planning and logistics improvements, and data analysis.

Collegium Civitas in Warsaw to hold seminar „Psychology of Terrorism”

2018-05-15

The Collegium Civitas Center for Terrorism Research in Warsaw in cooperation with the House of Historical Encounters invites the participants to the seminar „Views on terrorism”. The seminar covers terrorism in psychological terms - informs the Warsaw university. The discussion on psychological sources of terrorism will be conducted by Mariola Wołoszyn, psychologist and lecturer at Collegium Civitas, Dariusz Piotrowicz, police psychologist at the Warsaw Metropolitan Police Headquarters in 2004-2010 and lecturer at the SWPS University, and Andrzej Mroczek, expert on terrorism at the Collegium Civitas Center for Terrorism Studies. The seminar will start on Friday, May 25 at 18.00 at the Dom Spotkań z Historią in Warsaw at ul. Karowa 20. Admission is free. The organizers ask for confirmation at the address: cbnt@civitas.edu.pl

Researchers from Hong Kong to hold lectures at the University of Silesia

2018-05-15

Dr. Dorothy Tse Hiu-hung and Dr. Christophe Tong Yui from the department of humanities and creative writing of the Baptist University in Hong Kong will be guests of the Institute of Polish Literature of the University of Silesia from 16 to 18 May. Visitors from China will give lectures on Hong Kong literature and culture. They will also present films about the city and the specific historical and cultural situation after its return to China. The lecturers will analyze the literature and art of Hong Kong from the perspective of the so-called Time Zero, the moment of the final takeover of Hong Kong by the People's Republic of China. Dr Dorothy Tse Hiu-hung and Dr. Christophe Tong Yui combine didactic work and creative writing workshops with research work on the latest literature of Hong Kong. They conduct translation and artistic activities. They are well-known and award-winning writers in China as authors of stories, novels and poems.

MedTrends - European Forum for Modern Health Protection

2018-05-15

On 23 and 24 May in Zabrze the participants of the 4th international MedTrends- European Modern Healthcare Forum conference will discuss the current trends, problems and challenges in modern health care in Poland and Europe. The first day of the conference will focus on issues related to the implementation and development of digital health in Poland. The discussants will discuss the use of artificial intelligence and machine learning in education, diagnosis and treatment of civilization diseases also in the context of new challenges and expectations in the Polish health-care system. The second day program is dedicated to startups in health care. There are planned lectures to be given by experts and practitioners as well as workshops and case studies. The conference will also host the MedTrends TOP TRENDS competition to select the best startup in health care. Applications for participation in the conference / workshop: www.rejestracja.medtrends.pl

Students of the University of Economics in Poznań win the competition „City in motion”

2018-05-15

The team of students of the University of Economics in Poznań won the competition „City in motion” organized by the Poznań University of Technology, University of Economics in Poznań and the City of Poznań in cooperation with Volkswagen Poznań Ltd. The aim of the competition was to explore the development strategy of the Poznań metropolis until 2050 with particular emphasis on urban transport and logistics solutions as well as to create scenarios for the development of cooperation between local government administration, science and business. The authors of the winning project analyzed the challenges in the future transport of goods and transport of people. The group provided concrete solutions proposals in the form of applications designed to facilitate the flow of people and goods. Students Cezary Brudka, Klaudia Chomiak and Adam Rozykowski received a cash prize of PLN 22.000. and the possibility of two-month internships at Volkswagen Poznań Ltd.

ACADEMIA Book Fair in Warsaw

2018-05-16

From 17 to 20 May, the Warsaw Book Fair will be held at the National Stadium in Warsaw. As part of this event, the Academia Book Fair is also planned. Their organizers are the University of Warsaw Publishers, Warsaw University of Technology Publishing House and company Murator. An integral part of the Fair is the competition for the best academic book ACADEMIA. The prizes are funded by the Rector of Warsaw University of Technology for the best academic publication in the field of technical and exact sciences and by the Rector of the University of Warsaw for the best academic publication in the field of social sciences and humanities. The fair is also accompanied by the award ECONOMICUS for the best economic book organized by the Dziennik Gazeta Prawna and Prof. Jerzy Skowronek Awards granted to authors and publishers in the field of history and archives science.

Conference on science based innovations at the Lodz University of Technology

2018-05-16

The Association Top 500 Innovators and the Technical University of Lodz invite the participants on 17-18 May 2018 to a conference devoted to science-based innovations. The event will be attended by British and Polish specialists in start-ups - informs the Łódź university. As part of the event, Professor Allan Barrell from Cambridge Worldwide Associates will talk about his observations in British and Polish innovation clusters. Nicholas Coultts will present programs supporting startups, which he co-created in various parts of Europe and Mark Tyl, founder of the Innovation Forum organization, will present an offer for young startups acceleration and support in international development. During the conference a discussion panel on fundraising for start-ups and commercialization of research results is planned. The panel will be attended by Bartosz Sokoliński, Director of the Development and Innovation Bureau of the Industrial Development Agency, Daniel Maksym, Project Director in the Polish Energy Group New Energy and Prof. Alan Barrell. The conference will be held in the Bay of Sport at the Lodz University of Technology at Aleja Politechniki 10.

Learning during the Museums Night

2018-05-16

The 15th Museum Night will take place on May 19 in Warsaw. The event has been organized for many years by Warsaw universities and the Ministry of Science and Higher Education. This year the Ministry invites visitors to see the office of Deputy Prime Minister Jarosław Gowin. In the Ministry of Science, apart from the Deputy Prime Minister's Cabinet, the guests can visit Naukobus, Planetobus and also three interactive SANBOT robots. The Warsaw University of Technology invites participants to visit the university between 6.00 am and 6.00pm for a chemical demonstration with light effects. «Lectures on the cloud» will be held In Warsaw School of Economics from 19:00 «to learn how to earn a million on the stock exchange». In the Copernicus Science Center from 20:00 there are several hundred interactive exhibits to be seen in the new experimentation space.

Intercultural communication at the University of Rzeszów

2018-05-16

The recruitment of students for the next academic year began at the University of Rzeszów. This year, the educational offer of the Rzeszów university expanded with a new study - intercultural communication at the Department of Sociology and History. The new field of study is dedicated to people who want to develop their skills not only in the Podkarpacie Region, but also to build their professional career in the global world - says Dr Maciej Ulita, a spokesman at the University of Rzeszów. Professor Paweł Grata, dean of the Faculty of Sociology and History, emphasizes that the advantage of the new field of study is the possibility of pursuing a professional career in many positions related to external and internal communication in the company and HR management. In the new academic year, 25 candidates can apply to the study. More:<https://irk.ur.edu.pl/WR/>

Professor Andrzej Więcek wins European Nephrology Society award

2018-05-16

Professor Andrzej Więcek, head of the Clinic of Nephrology, Transplantology and Internal Diseases of the Medical Faculty of the Silesian Medical University was awarded the European Society of Nephrology Prize (ERA-EDTA). It is recognition of the outstanding contribution of Prof. Więcek in the development of the Society. Prof. Więcek has been a member of ERA-EDTA for 30 years. In 2011 he became secretary-treasurer and three years later the President of this organization. During his term in office, he stabilized the financial situation of the Society, reorganized the office in Parma and increased the number of ERA-EDTA members. The professor is also the originator of the virtual museum ERA-EDTA and its first custodian. The award ceremony will take place on May 24 - during the opening ceremony of the European Society of Nephrology Congress in Copenhagen.

Students of the Wrocław University of Life Sciences run the National Biotechnology Days

2018-05-16

Students of the two research groups of the biotechnology and food science faculties of the Wrocław University of Environmental and Life Sciences presented an interesting scientific issues during the National Biotechnology Days organized by students of the University of Wrocław, Wrocław University of Technology and the University of Life Sciences. Wrocław biotechnologists prepared attractions for children and adults. Adults were able to see colored preparations and insects under the microscope, find out how plants grow in vitro and how blood is detected at the crime spot. Children participated in numerous experiments such as money laundering, games with non-Newtonian liquids and volcanic lava. The novelty of the event was hare and hound game organized by three universities. The prizes were university gadgets, fragranced soaps

produced by students and AgarArty - cultures of wine bacteria, enclosed in dishes.

Prof. Jerzy Buzek to hold lecture at the Gdańsk University of Technology

2018-05-16

„The future of Polish students in Europe and in the world” is the topic of a lecture held by Prof. Jerzy Buzek at the Gdańsk University of Technology. The lecture is scheduled for Friday, 18 May at 13.00 in the 007 auditorium of the Faculty of Management and Economics. Admission is free, but the number of places is limited. After the lecture, the students will have an opportunity to ask questions to the professor. The lecture will be accompanied by a review of the scientific activities at the Gdańsk Technical university. The students will present their achievements in the lobby of the Management and Economics department. The organizers of the lecture are the University Student Organization «Horizons» and the Student Government of the Gdańsk University of Technology. Professor Jerzy Buzek is a Polish politician and chemist, member of the Sejm of the 3rd term and Prime Minister in 1997-2001. Since 2004, he has been a Member of the European Parliament, and in the years 2009-2012 was the chairman of this institution.

National Science Center to allocate PLN 400 million for research projects

2018-05-17

National Science Center announced the results of the 14th Opus and Preludium calls. Researchers submitted 3122 applications, of which 669 projects were accepted for funding. National Science Center granted PLN 397,5 million for their implementation. In the Opus the Center accepted: «Transformations of Polish food in a cosmopolitan food landscape» by Prof. Fabio Parasecoli from the Institute of Philosophy and Sociology of the Polish Academy of Sciences, «Architecture of the Legal Mind» by Prof. Bartosz Brożek from the Faculty of Law and Administration of the Jagiellonian University and «Fish under stress - a dermal stress response system - how does it work?» by Prof. Ewa Kulczykowska from the Institute of Oceanology, Polish Academy of Sciences. In the Preludium co-financing will include: «Reception of ancient philosophy in the works of Mulla Sadra» by Agnieszka Erdt from the Faculty of Philosophy and Sociology of the University of Warsaw and «The influence of magnetic admixtures on states bound in superconductors» by Eng Szczepan Głodzik from the Faculty of Mathematics, Physics and Computer Science of the Maria Curie-Skłodowska University in Lublin. More: <https://www.ncn.gov.pl/konkursy/wyniki/2018-05-15-opus14-preludium14>

Prof. Musielak to hold a lecture about the secrets of the Universe

2018-05-17

On May 24, 2018, the Institute of Physics at the Maria Curie-Skłodowska University in Lublin invites the participants to an open lecture by Prof. Zdzisław Musielak titled „Secrets of the Universe.” The lecture will be an extraordinary opportunity to listen to stories about the beginnings and possibilities of the end of the universe, the role of dark matter and dark energy, black holes and the possibilities of life on planets orbiting the stars away from the Sun - informs Aneta Adamska, a spokesman for the Lublin university. Professor Zdzisław Musielak is the author

of numerous publications and the double winner of the Humboldt Prize. Since the 1980s, he has been working and teaching in the United States, recently running the Astronomy Department at the University of Texas. The scientist also works with NATO and NASA. The lecture will take place on May 24 from 11:15 to 12:45 at the Aula of the Institute of Physics at ul. Akademicka 7 in Lublin.

Bialystok Physicists in the European consortium COST

2018-05-17

The Faculty of Physics of the Department of Physics and Magnetism at the University of Białystok will implement a new project of the European Cooperation in Science & Technology (COST)- informs Katarzyna Dziedzic, spokesperson of the University of Białystok. The „Ultrafast opto-magneto-electronics for non-dissipative information technology” project will be coordinated by Radboud University from the Netherlands within the international consortium. The head of the work carried out by Polish scientists will be Dr Andrzej Stupakiewicz from University of Białystok. He emphasized that „this project will allow for greater integration of the international scientific and technical environment in one of the most innovative areas of science related to information technology.” More: <http://www.cost.eu/>

Warsaw Faculty of Architecture wins a competition for a model single-family house in Program Flat Plus

2018-05-17

The Faculty of Architecture of the Warsaw University of Technology dominated the BGK Real Estate competition for the development of a model single-family home. The competition was held as part of the government Flat Plus program. The best solutions will be implemented as prototype houses. The Ministry of Science and Higher Education was a partner of the competition. The technical universities and architecture offices could have applied for the competition. The first and second places among the

universities belonged to the projects proposed by the Faculty of Architecture of the Warsaw University of Technology. In addition, the project by the next team of the Faculty of Architecture received a distinction. - The initiative taken by BGK Real Estate is another impulse to build a bridge between the world of science and business. An innovative state can be built only on the basis of close cooperation of these two environments and efficient transfer of knowledge in key areas of the economy - emphasized Jarosław Gowin, Deputy Prime Minister and Minister of Science and Higher Education.

Clinical departments of the Jagiellonian University regarded best in Poland

2018-05-17

The Clinical Department of Urology and Oncological Urology and the Clinical Department of Gynecology and Oncology together with the Breast Unit of the University Hospital in Krakow took first place in the national ranking „Hospitals 2018” carried out by the Wprost weekly newsmagazine. The Clinical Department of Urology and Oncological Urology specializes in uro- oncology. Experts appreciated the work of Prof. Piotr Chłosta and his team in the area of operating patients with advanced renal cancer. The department was also the winner in rankings of urological operations. - Our experience provide that operations are characterized by a low mortality rate and favorable long-term results, i.e. good results without relapse - says Prof. Piotr Chłosta, head of the Clinical Department of Urology and Oncological Urology of the University Hospital. These results are comparable to the best centers in the world - informs Collegium Medicum of the Jagiellonian University. More: <http://rankingi.wprost.pl/szpitala>

Fun and games of various countries in the Polish-French publication

2018-05-17

Prof. Małgorzata Bronikowska of the Academy of Physical Education in Poznań published a book „Fun and games of different cultures”, which describes traditional games from different countries. The co-author of the publication is Jean-Francois Laurent from The Association For International Sport for All (TAFISA). Implementing traditional games by teachers can «program kids to move» - convince the authors. According to the authors, the publication is a great offer for active spring and summer weekends. The games described and shown in the book can also be used by teachers in physical education activities. The book corresponds to the assumptions of the new core curriculum, which assumes introducing traditional team games to physical education lessons.

Conference on World War II monuments in Central and Eastern Europe

2018-05-17

University of Szczecin invites the participants on Friday, 18 May to the international conference „Dealing with the past in 2018. Monuments of World War II in Central and Eastern Europe”. The partners of the event are the Foundation for Polish-German Cooperation, the Polish-German Foundation for Science and the Association of Polish Municipalities of the Euroregion Pomerania. After the adoption of the law on the ban on communist and other totalitarian propaganda from 2016 dealing with the past began. The act also concerns the commemoration of the victory over Nazism in World War II - including monuments of fame and victories of the Red Army and monuments of „gratitude” of Polish society or memorabilia of the Polish-Soviet „brotherhood of arms”. The aim of the conference is to analyze the treatment of World War II monuments in Central and Eastern Europe. Participants will discuss the situation in Germany, the Baltic countries, the Czech Republic and Ukraine. Conference program: [http://](http://www.usz.edu.pl/attachments/article/1735/Pomniki%20II%20ws_program.pdf)

www.usz.edu.pl/attachments/article/1735/Pomniki%20II%20ws_program.pdf

University of Silesia to support High school in Libiąż

2018-05-17

The Faculty of Law and Administration of the University of Silesia in Katowice has become the scientific patron of the Catholic High School in Libiąż. The agreement on didactic and scientific cooperation was signed by Dr Piotr Pinior - vice-dean for part-time studies at the Law and Administration Faculty and headmaster of the high school Anetta Szewczyk. As part of the cooperation, lecturers will conduct classes in high school, students will also be able to participate in lectures, seminars and workshops at the University of Silesia. Support for teachers improving professional qualifications is also provided. Students will also benefit from the cooperation because they will be able to conduct pedagogical practices at the school. The results will be the basis for bachelor's, master's and scientific work.

Students of the Wrocław University of Technology win medals at RoboGames 2018

2018-05-17

One gold and four silver medals were won by students from the KoNaR Scientific Circle of the Wrocław University of Technology at the RoboGames 2018 robotics Olympiad in the USA. 828 robots from over 20 countries competed in the tournament. Wrocław students won gold in the Best of Show category for a robot chessboard project, in which the role of the opponent was played by the social robot EMYS built in the Wrocław University and developed as a commercial product by FLASH Robotics. Three silver medals were won by «Sky-Wave» and «Navy» robots built by Rafał Cymiński. The fourth silver was won in the Nano Sumo category, where robots were tasked to push each other off the ring. This part was won by the robot «Stasio» constructed by Michał Piotrowicz and Michał Burdka. RoboGames is the largest robotic tournament in the world that takes place every year in the Silicon Valley. The Scientific Circle «KoNaR» has operated

at the Department of cybernetics and robotics, at the Faculty of Electronics of the Wrocław University of Technology, continuously since 2003.

Wrocław University of Technology starts recruitment for studies

2018-05-17

The Wrocław University of Technology has started recruitment for studies. The candidates can apply for sixteen different faculties with 61 departments. The first recruitment will end on July 5. The results will be announced on July 9. The second recruitment will start on July 14. More than 6.3 thousand MA candidates and 345 PhD students will be accepted. About 950 places are provided for extramural students - including over 600 for MA studies. This year, there will be no new faculties at the University, but there is a new specialty in the department of computer science and management - Data science. The most popular trends last year were Computer Science in English, Systems Engineering at the Faculty of Information Technology and Management, Computer Science at the Faculty of Basic Technical Problems and Mechatronics at the Faculty of Electrical Engineering. For more information, please visit: <http://rekrutacja.pwr.edu.pl/>

Polish Africanist Society awarded Dr Robert Kłosowicz from the Jagiellonian University

2018-05-18

The Polish Africanist Society recognized the book „Contexts of dysfunction of Sub-Saharan African countries” by Prof. Robert Kłosowicz from Jagiellonian University as the best Sub-Saharan African publication in 2017 in the category „author’s scientific publication after obtaining the habilitation” - informs the Cracow university. In the justification, we read that the Polish Africanist Society awarded the author «for the methodologically and supported by field research analysis of the dysfunctionality on the examples of Sub-Saharan African countries, which allows a better understanding the basis of state crises in this region and contributes to the development of modern international relations.» Prof. Robert Kłosowicz runs the Department of International Relations and Foreign Policy at the Jagiellonian University in Krakow.

Agreement on cooperation between Warsaw University of Technology and the Naval Academy

2018-05-18

The rector of the Warsaw university Prof. Jan Szmidt and the rector-commander of the Polish Naval Academy, commander Prof. Tomasz Szubrycht signed a cooperation agreement. The signed agreement is to contribute to «the development of scientific-didactic and scientific-research activities in areas particularly important for the defense of the country and maritime economy, using the potential, position, experience and achievements of both universities.» As part of the cooperation, it is planned to create joint research teams, mutual provision of services in the field of access to laboratories and the use of technical equipment. Warsaw University of Technology and the Naval Academy will also exchange experts and jointly organize scientific and technical conferences and symposia.

Memorandum of understanding between universities in Zielona Góra and Chinese Hangzhou

2018-05-18

Rector of the University of Zielona Góra, prof. Tadeusz Kuczyński and president (rector) of the Chinese University of Zhejiang A & F, Prof. Yin Yibin signed a memorandum of understanding on the teaching and research cooperation of both universities. Universities from Zielona Góra and Chinese Hangzhou will cooperate in the areas of exchanging scientists and students to conduct research of common interest, visits of scientists invited to give lectures, inviting to participate in conferences, symposia, research and training; exchange of information, scientific materials and publications and to facilitate the mobility of lecturers and students through exchanges and visits between universities. The University of Zielona Góra previously signed two cooperation agreements with other Chinese universities: the University of Chongqing as part of the ERASMUS + program and a bilateral agreement with the Shanghai Pedagogical University.

Scientist of the University of Silesia to examine the finances of ancient Egyptian farmers

2018-05-18

Dr Marcin Kotyl from the department of classical philology faculty at the University of Silesia received a scholarship from the Deutscher Akademischer Austauschdienst (DAAD). The scholarship was awarded for the „Rent arrears of farmers in Roman Egypt” project in cooperation with the Zentrum für Altertumswissenschaften at the University of Heidelberg. The project concerns tax arrears related to the lease of land in imperial property in Roman Egypt. Researchers will examine unpublished documentary papyri and learn how to calculate and collect tax arrears, the reasons for falling into debts and the terminology used in official documents. Dr Marcin Kotyl deals with the Greek documentary and literary papirology - above all unpublished tax documents

and literary texts, mainly the Iliad papyri. DAAD is the world’s largest organization supporting international exchange of students and scientists.

Open Innovation Week at the Wrocław University of Technology

2018-05-18

On Monday, May 21 the Wrocław University of Technology launches Open Innovation Week. For four days, lectures and workshops on design thinking, 3D printing, crowdfunding, building a network of contacts and combining science and business are planned. The conference is addressed to everyone interested in open innovation and the commercialization of knowledge. The scholars will present concepts of closed economy and Lower Silesian Smart Specializations. The organizers also announce the presentation of companies from the Academic Entrepreneurship Incubator and the introduction of the topic of crowdfunding. Open Innovation Week is organized as part of the NUCLEI project (Networks of Technology Transfer and Advanced Processing Industry). It is attended by ten universities and business support institutions from Austria, the Czech Republic, Germany, Italy, Poland and Slovakia. More at <http://openinnovationweek.pl/>

Medical University of Gdańsk projects achieve funding in OPUS 14

2018-05-18

Three projects of scientists of the Medical University of Gdańsk have received funding from the National Science Center in the 14th OPUS 14 competition. The laureates include the scientists from the molecular enzyme department at the inter-university faculty of biotechnology: Dr Rafał Sądej with the project «The role of FGFR2 in the regulation of autophagy in breast cancer - prognostic significance» and Dr Patrycja Koszałka for the project «The role of CD73 (ecto-5'-nucleotidazay) in the processes of promotion and progression of breast cancer and its evaluation as a therapeutic target». The project «Study of reproductive potential of oocytes and embryos with the use of proteomic analysis of alveolar and culture fluid» by Prof. Krzysztof Łukaszuk from the obstetrics and gynecology nursing department of the health sciences also was financed. Over PLN 4.2 million will allow the employment of young scientists in post-doc positions and the payment of scholarships for students and PhD students.

Students designed a literature garden in the Museum of Ignacy Kraszewski in Dresden

2018-05-18

Landscape architecture students from the Technische Universität Dresden and the Wrocław University of Life Sciences designed different variants of the literature garden in the Museum of Ignacy Kraszewski in Dresden. The designs were created during Polish-German workshops. The museum of Ignacy Kraszewski in Dresden is a villa in which the writer lived for six years in exile. He created the garden to remind him Romanów, the place, where he spent the happiest years of his childhood. To this day, many Kraszewski's letters have been preserved and they in detail describe the gardens in Dresden and in Romanów. Polish and German students re-created the writer's Dresden garden. The Dresden garden is a common idea of Prof. Marcus Köhler from the Technische Universität Dresden, Dr. Justyna Jawor-

ek-Jakubska from the University of Life Sciences in Wrocław and Joanna Magacz, director of the Kraszewski Museum in Dresden.

Scientific conference „People of war” at the University of Lodz

2018-05-21

On June 7 and 8, the Institute of History of the University of Lodz organizes a scientific conference “People of War” within the series Faces of War. - Our goal is to present the persons who have marked the history of wars - heroes and traitors, outstanding leaders and losers, well-known people and those who remained hidden in the shadows. The conference is interdisciplinary. Historians, archaeologists, political scientists and representatives of other scientific disciplines are invited to participate in it. During this event, many speakers will hold their lectures: Andrzej Niewiński from the Catholic University of Lublin with a lecture «William Marshal, the best knight ever lived», Rafał Wróblewski from the Museum of Romanticism in Opinogóra will hold the lecture «Polish cavalymen of the Emperor Napoleon I» and Dariusz Radziwiłłowicz from the University of Warmia and Mazury, who will remind «Brigadier General Kazimierz Rumsza, the forgotten Siberian commander of the Polish division». More: <http://www.obliczawojny.uni.lodz.pl/>

University of Economics in Katowice to hold discussion about money - yesterday, today and tomorrow

2018-05-21

The University of Economics in Katowice invites participants to the conference on May 23 entitled „Money yesterday, today, tomorrow, in Silesia and not only there” Its purpose is to present the history of money in Poland and Silesia. The research and teaching staff of the University of Economics in Katowice, the Warsaw School of Economics and the National Bank of Poland will also discuss the form of money in the future in the light of the changes taking place in the modern market econo-

my and the related challenges. The list of lecturers include Prof. Janina Harasim from the Department of Banking and Financial Markets of the University of Economics in Katowice, Robert Klepacz - Deputy Director of the Payment System Department of the NBP, Dr Anna Szelałowska from the Warsaw School of Economics, Dariusz Mazurkiewicz - president of the Polish Standard of Payments and prof. Jacek Pietrucha from the Department of Economics of the Silesian University.

Gdańsk University of Technology scientist becomes Accessibility Leader 2018

2018-05-21

Dr Eng Marek Wysocki from the architecture department and universal design center of Gdańsk University of Technology received the statuette of Accessibility Leader 2018 from the President Andrzej Duda. Professor Wysocki was awarded in the category of architect-urbanist «for long-term activities in the field of legislation and science, which contribute to the change in public awareness and dissemination of standards for design and construction, introduced by Polish cities». The laureate is a research and didactic scholar at the Faculty of Architecture at the Polytechnic. For 23 years he has been dealing with issues related to the design of space available for people with disabilities and the OAPs. He was the first Access Officer in Poland, appointed for this position in 2014 by the Gdynia local government. He works with many non-governmental organizations. He was awarded many times for his activity.

Officers from Wrocław on sniper competition in the USA

2018-05-21

Officers from the Academy of Land Forces in Wrocław participated in the 47th Winston P. Wilson competition and the 27th Armed Forces Skill at Arms Sniper Championships organized at the American base Fort Chaffee, Arkansas. The Academy representatives competed with professional sniper teams from the USA, Poland, Denmark, Canada and Italy. Two cadets competed in the precision shooting and field crafts - including detection and elimination of masked targets at unknown distances, shooting for mobile purposes during the day and at night, and performing «under stress» tasks with the transfer of the wounded soldier. Most of the shooting was done with the so-called „Cold barrel” – with no possibility of correcting the fire and in accordance with the „blind shoot” principle - lack of knowledge about the next competition. The cadets from Wrocław took 15th place in the general classification for 20 teams.

Graduate of the Catholic University of Lublin to become a cardinal

2018-05-22

A graduate of the Catholic University of Lublin and papal almoner archbishop Konrad Krajewski will become a cardinal. The decision to include him in the College of Cardinals was taken by Pope Francis. He announced it on May 20, 2018 during the Regina Coeli prayer. Giving the cardinal's dignity will be celebrated during the consistory on the feast of St. Peter and Paul on June 29, 2018. Archbishop Krajewski will be the 7th Pole in the College of Cardinals. The future cardinal Konrad Krajewski graduated in theology at the Catholic University of Lublin in 1988. He has been working in the Vatican since 1999. He served as a ceremony master for three successive popes: John Paul II, Benedict XVI and Franciszek. In 2013, the latter appointed him a bishop and entrusted him with the papal almoner dignity.

Prof. Peter Seeberger to hold a lecture at the Lodz Polish Academy of Sciences

2018-05-22

The Lodz Polish Academy of Sciences and the Center of Molecular and Macromolecular Studies of the Polish Academy of Sciences invite participants on May 23, 2018 to hear Prof. Peter Seeberger's lecture. He is a director at the Max Planck Institute in Potsdam and professor at the Free University in Berlin. The lecture will explore carbohydrate vaccines in the prevention and control of infectious diseases. Professor Peter Seeberger was the first in the world to develop an automatic synthesis of oligosaccharides. The lecture will start at 15:30 at the Center for Molecular and Macromolecular Studies of the Polish Academy of Sciences in Łódź, ul. Sienkiewicza 112, room 9.

Space 4.0 conference in Krakow

2018-05-22

The Space 4.0 Conference "Solution From The Sky" will be held in Krakow on May 25-26. The event is organized by the Krakow University of Technology together with the Krakow Technology Park. During the conference, the specialists will present satellite data, its acquirement, the use in science and opportunities of commercial use. Students will learn about the acceleration of startups, the processing of satellite data, financing and support of space technologies in Poland. The guest of the conference will be Lluç Diaz, coordinator of the European Space Agency's technology transfer network. The conference can be attended by representatives of scientific communities, government institutions, large companies implementing programs based on satellite databases, representatives of space business and young companies that are just beginning their adventure using satellite data. Registration for the event: <https://solution-from-the-sky-2018.evena.pl/>

Competence Center of the Future Industry to be established in Koszalin

2018-05-22

Representatives of the Koszalin University of Technology, Koszalin self-government, Pomeranian Regional Development Agency in Słupsk and Technological Park S.A. in Koszalin signed a cooperation agreement on creating the Competence Center of the Future Industry. The Center will act as a training center and will provide entrepreneurs with practical knowledge about available technologies. It will also create demonstrative technological spots and make them available to entrepreneurs for cognitive, test and production purposes. Technological spots of the Center will be created firstly in Koszalin, Słupsk and Szczecinek. Koszalin Competence Center of the Future Industry is the second initiative of this kind in Poland. The first Gliwice center was created by the Silesian University of Technology.

Mars lander from the Wrocław University of Technology reaches the final of the Mars Society and NASA competition

2018-05-22

The Martian lander „Eagle” prepared by students from the Off-Road Scientific Circle of the Wrocław University of Technology reached the final of the Mars Society and NASA competition - informs Michał Ciepelski from the university information and promotion department. The competition task was to develop the simplest, safest and cheapest lander that can deliver 10 tons of cargo to Mars using technologies that could be developed by 2026. Wrocław students have proposed 3D printing technology for electronics. This is a significant reduction in the mass of systems at low cost - now most of the temperature, humidity, pressure, wind strength and UV radiation sensors are easily printable. Five projects from Poland, France and the USA, as well as joint projects from Germany and Sweden and from India and Italy have been qualified for the finals. The winners will be announced at the end of August during the convention of The Mars Society in Pasadena.

University of Toruń scientists succeed at the Paris inventions fair

2018-05-22

The inventions of scientists from the Nicolaus Copernicus University in Toruń have been recognized at the 117th International Exhibition of Invention „Concours Lépine 2018” in Paris. Michał Meina from the Faculty of Physics, Astronomy and Applied Informatics and Dr Krzysztof Rykaczewski from the Faculty of Mathematics and Computer Science won Medal of the Minister of Internal Affairs of France and the gold medal „Concours Lépine 2018” for „The method of determining the position of the object, in particular of man, and the device for determining the position of man”. A team of scientists from the faculty of biology and environmental protection headed by Dr Grażyna Dąbrowska was awarded the International Eiffel Award from the French Federation of Inventors for «Method of seed preparation using a biological stimulator». Prof. Jerzy Łukasiewicz and dr Anna Ilnicka from the Department of Materials Chemistry, Adsorption and Catalysis received the he bronze medal for the «Method of producing carbon nanotubes».

Polskie Koleje Państwowe together with Pesa to build a dual-drive locomotive

2018-05-23

The Management Board of the Polish State Railways Cargo (Polskie Koleje Państwowe) announced that it had signed a letter of intent with the company Pesa Bydgoszcz regarding the construction of a dual-engine diesel-electric locomotive. A similar letter with the Pesa was concluded with the Polish Intercity State Railways as part of the Luxtorpeda 2.0 program implemented by the National Center for Research and Development in 2016. - The Parties are interested in establishing cooperation for the implementation of joint ventures in the area of research and development for the construction of a new generation of railway vehicles, in particular of a double-engine (diesel) electric locomotive for running freight trains on electrified and non-electrified lines and an autonomous locomotive.

Professor Michał Grabowski from the University of Lodz to join the international research network Barcode of Life

2018-05-23

Professor Michał Grabowski from the Department of Zoology of Invertebrates and Hydrobiology at the Faculty of Biology and Environmental Protection of the University of Lodz was invited to join the international research network Barcode of Life (iBOL), which deals with the modern identification and serialization of species using a genetic code, or DNA nucleotide sequence. The ordering of species using DNA nucleotide sequences was developed in 2003 by scientists from the University of Guelph in Canada. This is a new method that allows to assess the diversity of living beings. It reminds the system of bar codes being labeled to goods in a hypermarket. Researchers use a specific piece of DNA to identify a species that can not be confused with another species. Currently, 28 countries from five continents have worked together in the iBOL research network. Poland will be the 7th European country that will join the organization.

PhD student at the University of Life Sciences in Wrocław wins the Anna Pasek competition

2018-05-23

Henryk Grzywina - PhD student at the Institute of Environmental Shaping and Protection at the Faculty of Environmental Engineering and Geodesy of the University of Environmental and Life Sciences in Wrocław became a laureate of the Anna Pasek Scholarship Competition. promoting the most talented PhD students of Polish universities. The laureate is a graduate of engineering and water management. His scientific interests focus on the use of GIS (geographic information system) tools and remote sensing in environmental monitoring, and he focuses on the monitoring of soil moisture with respect to drought monitored for agriculture. The project awarded in the competition demonstrates the usefulness of remote sensing techniques for imaging

the temporal and spatial variability of humidity conditions. The author develops the use of operational methodology for forecasting agricultural drought based on satellite spectral data. Information about the Foundation: <http://www.annapasek.org/>

PhD student at the University of Poznan wins the Magellan prize

2018-05-23

The editors of „Magazyn Literacki KSIAŻKI” awarded the Magellan Awards for the best tourist publications. Among the winners there was „And what that about Sweden” by Natalia Kołaczek, PhD student at the Faculty of Modern Languages at the Adam Mickiewicz University in Poznań. In the «travel book» category, 3 publications were awarded ex aequo: «And what that about Sweden» by Natalia Kołaczek, «Zanzibar - a treasure island. Tales from the Swahili world» by Beata Lewandowska-Kaftan and «Under the dark skin of the Philippines» by Tomasz Owsian. The idea of the competition is to honor the publishers who excel in their care for tourist quality, awakening the passion of traveling and bringing up new generations of globetrotters. This year 76 titles were qualified for the competition. They were awarded 14 main prizes, 21 awards and a special prize. Natalia Kołaczek is a PhD student at the Scandinavian Department, a translator of the Swedish language. He also runs the Szwecjoblog website.

„Lexicon of the contemporary city” - joint publication of the University and City Hall in Toruń

2018-05-23

Researchers from the Nicolaus Copernicus University together with the City Hall in Toruń created the „Lexicon of the contemporary city”. The publication contains the entries corresponding to the concept of a modern city and was created as part of the Gen-Y City project. The list of entries in the lexicon gives an overview of many important topics covering a variety of issues - from architecture, through urban planning and bioecology to smart solutions used in cities. The publication was developed by the employees of the department of urban studies and regional development at the University: Dr Stefania Środa-Murawska, Dr Elżbieta Grzelak-Kostulska, Dr Jadwiga Biegańska, Dr Justyna Chodkowska-Miszczuk, Dr. Eng. Krzysztof Rogatka and a student of tourism and recreation - Leszek Dąbrowski. The purpose of the Gen-Y City project is to support the development of creative industries and innovative enterprises. The leader of the Gen Y City network is a city of Poznań.

Poznan scientist is a member of a prestigious European Molecular Biology Organization

2018-05-23

Professor Artur Jarmołowski from the Institute of Molecular Biology and Biotechnology at the Faculty of Biology at the Adam Mickiewicz University in Poznań became a member of the prestigious European Molecular Biology Organization (EMBO). Professor Jarmolowski will be officially welcomed to the EMBO during a special meeting of members in Heidelberg from 24 to 26 October. EMBO members actively participate in the implementation of initiatives undertaken by the organization through acting in the EMBO Council, committees and editorial offices of it's the The current director of EMBO Maria Leptin – emphasizes that the members of the organization are outstanding scientists working in various fields

of the life sciences. Their task is to strengthen the scientific community in Europe and beyond through their contacts and international cooperation.

2018 Gruber Cosmology Prize for Prof. Krzysztof Górski from the University of Warsaw

2018-05-24

The Gruber Foundation, operating at Yale University in the US, has granted its prestigious prize to the cosmology team Planck satellite. One of the leaders of this team is Prof. Krzysztof Górski from the Astronomical Observatory of the University of Warsaw. Professor Krzysztof Górski participated in studies on cosmic background radiation since the early 1990s. In the period 1993-1996 he was a member of the COBE satellite team, which for the first time measured the anisotropy of the cosmic background radiation (Gruber and Nobel Prize in 2006). Since 1996, Prof. Górski has been directly involved in the work in the Planck team.

Professor Dariusz Dudek from the Jagiellonian University to head European interventional cardiologists

2018-05-24

Professor Dariusz Dudek from the Collegium Medicum of the Jagiellonian University was elected the chairman of the European Association of Cardiovascular Interventions in the European Cardiac Society (EAPCI ESC). This is the first time, when the Pole became the chairman of this organization. His term of office will start in 2020. On a daily basis, Professor Dariusz Dudek is the head of the 2nd Department of Clinical Cardiology and the Intervention of Heart-Vascular University Hospital. The cardiologist has been implementing modern methods of treatment of myocardial infarction and hybrid heart valve procedures for many years, giving patients a chance for innovative therapies.

Krakow University AGH to hold the conference „Science - Start-up - Industry”

2018-05-24

On 5-6 June 2018, the Institute of Technology and Innovation organizes the conference „Innovative ideas of young scientists: Science - Start-up - Industry”, which will take place at the Academic Center for Materials and Nanotechnology of the AGH University of Science and Technology in Krakow. The event will take place as part of the Małopolska Festival of Innovation. Young scientists, PhD students, students and scientific circles will take part in the conference. During it, they will present their own innovative solutions of a scientific-research, technical, organizational, financial and marketing. The purpose is to develop and implement new or improved products, processes or management and sales systems. PhD student at the Medical University of Wroclaw wins the FameLab competition

2018-05-24

Ruth Dudek-Wicher won the 7th FameLab competition for the best science promoters in Poland. In June, PhD student at the Medical University of Wroclaw will take part in the international final in Great Britain. Her lecture, bringing PLN 25 thousand and the participation in the international finals, concerned bone infections and modern methods of their treatment. The jury of the competition in the justification emphasized her high skills, simple and accessible presentation, well-chosen and used props, freedom of expression, tactful sense of humor and distance to herself. FameLab is an international competition co-organized by the British Council, encouraging scientists to speak in public. Scientists are to tell the jury and the public within 3 minutes what they do in their research work. More: <https://www.umed.wroc.pl/content/ruth-dudek-wicher-wygra%C5%82a-konkurs-famelab>

Professor Edward Norman Dancer from the University of Sydney awarded the J.P. Schauder Medal

2018-05-24

Prof. Edward Norman Dancer from the University of Sydney was awarded the Medal of Julius P. Schauder 2017. The medal was awarded for outstanding achievements in the field of non-linear analysis, theory of differential equations and their applications. The award was established by the Center for Non-linear Research of J. P. Schauder at the University of Toruń. The medal is awarded every two years for scientific achievements and contribution to non-linear analysis and its applications. The laureate is selected from candidates proposed by the councils of mathematical units and from professors of mathematics. Professor Edward Norman Dancer is an outstanding expert in the field of nonlinear mathematical and functional analysis and the theory of ordinary and partial differential equations. He is the author of many groundbreaking works published in leading mathematical journals.

Polish-German Center for Hybrid Lightweight Structures established in Gliwice

2018-05-24

Experts from Germany and Poland will jointly conduct research on new materials and hybrid constructions. The agreement on the establishment of the Polish-German Center for Hybrid Lightweight Structures was signed in Gliwice. The agreement was concluded by Silesian University of Technology, city of Gliwice, Katowice Special Economic Zone, Federation of Aviation Firms «Bielsko» Institute of Light Engineering and Technology Polymer Technical University in Dresden, as well as Technical University Bergakademie in Freiberg. Cooperation between representatives of science, industry and self-government from Poland is to help in the development of modern technologies for the design of lightweight constructions. The creation of the center is a response to the expectations of modern industry regarding the development of innovative materi-

al technologies and the rapid commercialization of research results.

AGH University of Science and Technology in Krakow holds a conference on space mining

2018-05-25

Scientists and students of the AGH University of Science and Technology in Krakow tried to answer how to evaluate an asteroid, whether the life of comets is stormy and how to acquire water in space, during the Conference on Cosmic Mining held in Kraków. The 1st Student Space Mining Conference was organized by four research groups: AGH Space Systems, the Mining Mechanics Scientific Team, the Skalnik Scientific Team and the Geophysics Group of GEOFON. The patrons of the conference were the Polish Space Agency and the Space Research Center of the Polish Academy of Sciences. During the conference, technologies related to cosmic mining were discussed. The geology of celestial bodies, 3D printing in a state of weightlessness, space propulsion, sampling of rocks from celestial bodies, use of geophysical methods in space exploration and space robotics were discussed.

Vistula Academy of Finance and Business in Warsaw to hold scientific seminar on Ireland

2018-05-25

The Vistula Academy of Finance and Business in Warsaw organizes on Monday 28 May the scientific seminar „Ireland in the international context and relations with Poland”. The lecture in English will be given by Gerard Keown, the Irish ambassador to Poland. Introduction to the lecture will be presented by Dr Wawrzyniec Konarski. During the seminar, the participants will focus on the position of sovereign Ireland as a subject of international relations, its efforts to end the conflict in Northern Ireland and Polish-Irish relations in the interwar period and after Poland's admission to the European Union. Gerard Keown is Ireland's ambassador to Poland since March 2015. He has been working in Irish di-

plomacy since 1996. In March 2016, he published his book entitled First of the Small Nations: The Beginnings of the Irish Foreign Policy in the Interwar Years, 1919-1932.

Summer School of Personalized Medicine in Warsaw

2018-05-25

On 19 - 22 June 2018, the 3rd Summer School of New Horizons in Personalized Medicine will take place in Warsaw. The organizers of the event are the Polish Coalition of Personalized Medicine, Center of Oncology, Maria Skłodowska-Curie Institute in Warsaw and the European Alliance for Personalized Medicine. The main goal of the Summer School of Personalized Medicine is to provide knowledge about the latest reports and discoveries in the field of personalized medicine, which in the future will allow for a better understanding of patients and the selection of optimal therapies. For 4 days, the participants of the School will take part in lectures and workshops conducted by top-class specialists from Poland and Europe in the field of radiology, oncology, hematocology, molecular biology and molecular diagnostics. Scientists of the Wrocław Medical University win the „Young Talents” competition

2018-05-25

Researchers at the Medical University of Wrocław won the „Young Talents” competition. They won in the „Success in Science” and „Success in Innovation” categories. Jędrzej Grzegorzówka, PhD student at the Department of Embryology and Histology, was awarded in the category of «Scientific Success». His work focuses on the search for mechanisms that potentially affect the progression of cancer, mainly in relation to breast cancer (IDC) and skin cancers. Miron Tokarski - a PhD student at the Department of Molecular Techniques and Izabela Pielka - a student of Medical Analytics won in the category „Success in the field of innovation”. The winners are co-creators of the analysis technology enabling rapid identification of pathogens used in the device for mobile diagnostics - Genomtec Fresh - based on the amplification and detection of specific DNA and RNA fragments.

Students of the Silesian University of Technology to start in the regatta of concrete canoes

2018-05-25

Members of the „Concrete” Scientific Circle from the Faculty of Civil Engineering at the Silesian University of Technology designed and constructed a concrete canoe, which will take part in the next edition of the university rowing competition BetonKanoRace in the Netherlands. 17 students from European universities will compete in races of self-designed and constructed concrete canoes in Eindhoven. During the competition, participants must demonstrate not only engineering knowledge of technology, but also physical strength and imagination. Double, male, female and mixed teams will race on distances of 100, 200 and 400 meters. The team from the «Concrete» scientific club is starting for the seventh time in the BetonKanoRace regatta. In the two previous competitions young engineers from the Silesian University of Technology won the «most creative project»

category. This year they will row in the «President's Fists» concrete canoe designed and constructed by them.

University of Silesia Publishing House awarded in the „Academia 2018” competition

2018-05-25

The Publishing House of University of Silesia (Wydawnictwo Uniwersytetu Śląskiego) was awarded in the competition for the best academic book „Academia 2018” in the field of social sciences and humanities for the publication „S as Silesia - Superheroes in Silesia” by Marek Głowacki. The awarded book is a collection of illustrations and texts that were created as part of the artistic project «S as Silesia - Superheroes in Silesia». The publication contains more than thirty drawings created in the cartoon convention using traditional and digital techniques. Drawn characters were inspired by biographies of real inhabitants of Silesia, who approached the ideal of the cartoon superheroes. The awards were presented during the Academic and Scientific Book Fair organized as part of the 9th Warsaw Book Fair. Dr Marek Głowacki is an adjunct at the drawing institute of the Art Institute at the University of Silesia in Cieszyn.

University of Lodz to hold open lecture „Man and new technologies. The Humanistic Perspective”

2018-05-28

The Social Innovation Center of the University of Lodz invites participants to an open meeting as part of the „For Practice” program on May 30. During the event, Dr. Marta Songin-Mokrzan will give a lecture on „Man and new technologies. The humanistic perspective.” The lecture will address issues of human identity in opposition to non-human factors - animals and products of technology such as robots or androids. The scholar will also explore the issue of the practical application of the humanities in new technologies. Marta Songin-Mokrzan is a PhD

in the field of ethnology, assistant professor at the Laboratory of Practical Anthropology at the Institute of Ethnology and Cultural Anthropology at the Faculty of Philosophy and History of the University of Lodz. She deals with the anthropology of materiality, anthropology of technology, ethnography of production processes, philosophy and ontology of machines.

University of Warsaw researchers anticipate election results more accurately than polling centers

2018-05-28

Researchers from the Faculty of Journalism, Information and Bibliology of the University of Warsaw have been researching Big Data for a few years and they are convinced that their analyzes of changing electoral preferences are more accurate than polling surveys. BigData's research team is led by Professor Włodzimierz Gogolek. During the last presidential election campaign, the team carried out a project on political preferences. The results turned out to be much more accurate than the outcomes of pre-election surveys - says Dr Eng Wiesław Cetera from the Department of Information Technology of Media of the Warsaw university in an interview for the onet.pl portal . The basis of research and source of knowledge were social networking sites and all types of forums on the Internet. Researchers searched for everything that Internet users wrote about the main candidates for the office of the President. Then we combined it in the statistical process defined by the algorithm and compared it with earlier quotations. The result we obtained was almost identical to the result of the election - adds Dr. Cetera. Krakow University of Technology to invite children to a tram simulator

2018-05-28

The Institute of Rail Vehicles of the Mechanical Faculty of the Krakow University of Technology prepares for the Children's Day a special surprise. On Saturday - June 2 - children and their guardians are invited to a tram simulator. The first Polish NGT6 tram simulator operates at the Krakow University of Technology. It will allow the visitor to feel like a driver and face situations that can happen during real driving. They can be slippery tracks, the entry of a pedestrian or car on the rails, or a vehicle breakdown. The simulator faithfully reflects the tram cabin. The event will be held at the Krakow university at 11.00-14.00 in Krakow at al. Jana Pawła II 37. More: <https://www.facebook.com/events/2092540401030623/>

Polish start-ups at the Viva Technology fair in Paris

2018-05-28

Polish start-ups supported by the Orange Fab acceleration program were presented at the Viva Technology 2018 international technology start-up fair held in Paris. The company Whirla, proposing a system of wireless phone charging for cafes, offices and shopping centers, Seedia - a manufacturer of solar benches, NaviParking, focused on systems for optimizing and searching for free parking spaces, and JT Weston - application creator Makigami to optimize time-consuming business processes such as invoicing presented their solutions at the fair in Paris. As part of the accelerator, the French telecommunications company Orange supports Polish start-ups in testing solutions, developing a model of cooperation and commercial activities. It offers access to mentors and experts and participation in conferences, fairs and international promotion.

Eagle to be painted on the wall of the University of Wrocław

2018-05-28

A wall-mural is similar to a mural but it is painted inside the building. Now such a wall-mural is being painted at the Historical Institute of the University of Wrocław. The work of Prof. Adam Chmielowiec and students from the Wrocław Academy of Fine Arts presents the Lower Silesian eagle combined with the eagle inspired by the state emblem. The painting combines the motif of the Silesian Piast eagle with a characteristic silver crescent and a cross with the eagle inspired by the appearance of the emblem from the Jagiellonian times. - These two halves of two different eagles make up one whole and such eagle gives the impression of constant metamorphosis - explains Prof. Filip Wolański the deputy director of the Institute from University of Wrocław. The work is created on the first floor of the Institute, near the former library and reading room. The painting will be ready at the end of May, and its official unveiling is planned for the beginning of June.

Students from Poznań won the competition for the most interesting physical education lessons

2018-05-28
